

Rowftap Counter Set

by Michael Murgatroyd
(mike-angie.scartho@virgin.net)
Below are counters for the basic army lists given with the amended rules. Print off, stick on card, cut out and away you go!
The counters will fit on 3 cm hex grids quite com-

fortably. I use a software program for the hex maps called Graph Paper Printer which was originally free to download but I believe now charges a small fee. In any case, check it out on your search engines.

GERMAN/GOTH/HUN ALLIANCE

Rpg To Ccg Conversions

by SIR GERARD LUFT, KDM

What is included below is a simple framework to convert D20 RPG characters to “Magic the Gathering-like” CCG cards, and visa versa. For those rare CCG players who have never played MTG, similar systems include: MTG’s Doctor Who, Cactus Games Redemption, Starquest: the Regency Wars, to name a few.

D20 Rpg Characters To "mtg-like" Ccg Cards

- POWER= Att + Average Dmg of primary weapon or total levels of spells available per day
- TOUGHNESS= Armor Class + Hit Points

Power

1	4
2	11
3	23
4	47
5	94

toughness

1	14
2	28
3	56
4	112
5	224

DEPLOYMENT COST (Power + Toughness)/2= Deployment Cost

"mtg-like" Ccg Card To D20 Rpg Character

Power

1	Att0, Average Damage 4; or 1st level wizard
2	Att+1, Average Damage 6
3	Att+15, Average Damage 8
4	Att+33, Average Damage 14
5	Att+51, Average Damage 43; or 10th level wizard
6	Att+69, Average Damage 119
7	Att+87, Average Damage 285; or 20th level wizard
8	Att+105, Average Damage 643; or 25th level wizard
9	Att+123, Average Damage 1373; or 30th level wizard

Toughness

1	AC10, HP4
2	AC16, HP10
3	AC20, HP36
4	AC25, HP87
5	AC30, HP194

1	AC10, HP4
6	AC35, HP413
7	AC40, HP956
8	AC45, HP1947
9	AC50, HP2934

Rules Of Order

Introduction

Card game for 2+ players. Representation of a parliamentary debate. Based on Robert's Rules of Order. Players compete to capture the Floor, which enables them to Use up (gain) the most Time.

Victory

The player with the most Time Chips at the end of the game wins.

The Deck

Players share a common deck.

Time Chips

There are 100 Time Chips (Use tokens, coins, beads, whatever)

The Floor

Use a special item (Key, pencil, mallet, whatever) to represent the "Floor". Only one player at a time can have the "Floor". Sometimes no one will have the Floor and the next player able to Play a Gain card gets the Floor.

Only the person with the Floor can play Time cards & gain time chips.

Setup

All 100 Time chips are in a pile in the middle of the table. Each player is dealt a hand of 5 cards. The loudest player has the Floor first (or flip a coin).

Turn Sequence

- Players take turns.
- Each turn has 4 Phases:
 - Proposal Phase
 - Motions Phase
 - Oration Phase
 - Resolution Phase

Common Deck Card List

Card Name	Type	TTG	Notes
Limit Debate	L	-	
Majority Vote	L	-	
Out of Order	L	-	Opponent discards 1 card

Proposal Phase

Draw 1 card.

Motions Phase

There are 2 possibilities here:

1. If no one has the Floor, you may play a "Gain" card to get possession of the Floor.
2. If an opponent has the "Floor" you may play a "Lose" card on that player to make them lose the Floor (at this point, no one has the Floor). You may then Play a "Gain" card to get possession of the Floor.

An opponent may play a "Negate" card to nix your play of a "Lose" card.

Oration Phase

If you have the Floor, you may play 1 Time card and gain the indicated number of Time chips from the center pile. When there are no more time chips left in the center pile, the game ends. If you have the Floor but have no time card to play, you automatically lose the Floor.

Resolution Phase

Max hand size is 5 cards. Discard excess cards.

Censure Rule

A censured player loses the Floor and skips his next turn.

Card List Notation

- T** Time card
G Gain Floor
L Lose Floor
N Negate the play of a Lose Floor card
X Special
TTG Time Tokens Gained by playing the Time card

Card Name	Type	TTG	Notes
By-Laws	L	-	
Motion to Adjourn	L	-	All players discard 1 card
Indecorum	L	-	Opponent Censured
Question of Order	L	-	
Rescind	L	-	
Strike Out	L	-	
Withdraw a Motion	L	-	
Suppress	L	-	Opponent gains 1 card
Defer	L	-	Discard 1 card
Objection	L	-	Draw 1 card
Postpone	L	-	Look at opponents hand
Take a Recess	L	-	Look at next 5 cards in deck
Fix the Time	L	-	All players draw 1 card
Extend Limits	N	-	
Amend an Amendment	N	-	
Undebatable	N	-	
Amend Standing Rules	N	-	
Main Motion	G	-	Next Time card played gets +5
Order of Precedence	G	-	Look at next 5 cards in deck
Raise a Question of Privilege	G	-	
Seconded	G	-	All players discard 1 card
Reconsidered	G	-	
Adopt a Report	G	-	
Appeal	G	-	Opponent is Censured
Refer	G	-	Opponent gains 1 card
Commit	G	-	
Division of the Question	G	-	
Informal Consideration	G	-	Look at opponents hand
Lay on the Table	G	-	All players draw 1 card
Suspend the Rules	G	-	Draw 1 card
Incidental Motion	G	-	Discard 1 card
Inquiry	G	-	Opponent discards 1 card
Reconsider	G	-	
Substitute	G	-	
Leave to Continue	G	-	
Make Nominations	G	-	
Special Order	G	-	
Oratory	T	15	
Read Papers	T	10	Lose Floor and draw 1 card
Confined Debate	T	5	
Debate	T	20	Opponents may draw 1 card
Rhetoric	T	10	
Drone on and on	T	20	Lose Floor
Point by Point	T	15	
Review	T	15	
Introduction	T	5	Draw 1 card
Fine Points	T	10	
High Points	T	10	
Anecdotes	T	5	Play a second Time card this turn
Monologue	T	10	
Announcements	T	5	
Proposals	T	10	
Inflammatory Rant	T	15	You are Censured

Card Name	Type	TTG	Notes
Deliberation	T	20	All players draw 1 card
Resolution	T	10	All players discard 1 card
Argument	T	10	
Discussion	T	15	
Lecture	T	20	Discard 1 card
Illustration	T	5	
Instruction	T	10	
Outburst	X	-	Negate Time card; You are censured
Prepared Notes	X	-	Draw 3 cards
Opposition Disorganized	X	-	Opponent discards 3 cards

Chairman & Secretary

The winner of the previous game is the Chairman. The Chairman gets to go first in the next game. The last place loser of the previous game is the Secretary.

The Secretary goes last and gets to shuffle and deal the cards (and serve drinks)

Optional Cutthroat Rule

During your Motions Phase, if you have control of the Floor, an opponent may play a "Lose" card on you to make you lose the Floor.

Rules Of War

Introduction

Generic Rules for Combat in any scale or era. No Cards are used, just hex maps, dice, and counters. The basic concept is to be able to have: Relatively quick battles with 20-30 units to a side.

A minimum of record keeping. Easy set up. A very simple rules-system, easily learned, and easily modified.

Equipment

- Hex Maps
- Counters (or Miniatures)
- Dice

Scenarios

The designer of a scenario must determine the following: Which Armies to use. How many units and what types. What map to use.

Setup- Initial Placement of Units Victory conditions

- The opponent picks which side he wants to play.

Unit Stats

Each unit has 6 stats:

1. Movement Rating (Movement Points)
2. Range Rating (In Hexes)
3. Attack Rating
4. Defense Rating
5. Morale Rating
6. Hits Rating (Number of Kills before the Unit is Destroyed)

Turn Sequence

Each Round has 4 phases.

- Initiative Phase
- Player A Movement Phase
- Player B Movement Phase
- Morale Phase

Initiative Phase

Determine turn order by rolling high on 1D10. Reroll ties. The Player with the high roll chooses whether he wants to be Player A or Player B. The Player with the low roll is left with the choice not taken.

A Player gets -2 to his roll if his Leader unit is destroyed.

Facing

All unit counters must have an arrow to indicate their direction of facing. Units can only move in the direction they face. After each hex moved a unit may change its facing 60 degrees.

A unit can only attack units it is facing in a 120 degree arc. Hand to Hand attacks against the back or rear of a unit are at Attack +2. The Defender gets defense -3.

Routing units immediately change their facing 180 degrees.

Stacking

Only one ground unit per hex, except for units that can carry other units. This may be altered depending on the scale of the map.

Movement Phase

MP Movement Points.

MPs are expended upon entering an adjacent hex. Units may move up to their movement allowance.

- A unit that is not damaged, pinned, etc, can always move at least 1 hex.
- A unit may spend a movement point to change its facing to any direction.
- A unit may (dis)mount a vehicle in the same hex if both pay 1 MP.

Attacking

All units may attack only once per turn. Any unit may attack at any time during either Movement Phase. Resolve attacks immediately.

If players want to attack at the same time, the attacks are simultaneous. Each unit has an attack range in hexes. When attacking roll 1D10. this is the Attack roll.

An Attack Hits if the roll is less than or equal to the Attack rating of the Attacker. Natural Rolls of 1 always hit, and rolls of 10 always hit. If an attack hits the Defender may attempt to save.

The Defender saves on a roll on 1D10 less than or equal to the Defense value of the Defender. If a unit receives a number of hits equal to its Hits Rating it is killed and is removed from play. Unless otherwise stated all attacks must be Line of Sight.

Combined Attacks Rule

Every unit after the first to attack the same target unit gets Attack Rating +1.

Overkill Rule

If an attack hits, subtract the roll result from the attack rating. This is the Overkill factor. The defender reduces his Defense rating by this factor.

For example: the attacking tank has an Attack rating = 9. It rolls a 5. The overkill factor is $9 - 5 = 4$. The defending infantry has a Defense rating = 6. The Modified defense rating is $6 - 4 = 2$.

Overrun (free Advance)

A unit that has destroyed an adjacent enemy unit may move into its hex.

Morale Phase

Units must make morale checks every time they are hit but not destroyed. Units must also check morale if an adjacent friendly unit routs. If they roll equal to or less than their Morale Rating on 1D10 they keep fighting.

On a higher roll they rout. They move away from enemy units at top speed. If they move off the board they are removed from play. Routing units may roll to rally every turn after they rout.

If they roll equal to or less than half (round up) of their Morale Rating on 1D10 they rally. Morale checks

Skirmish	1 Man
Tactical	10
Brigade	100
Operational	1,000; Countries
Strategic	10,000 Men; Continent
Small Naval	Coastal Region

Army Eras

For two armies to fight they must have the same Scale, Era, and Terrain Set. The Name of the Army basically determines what Nationality and Era it belongs to. Some possible Eras, or Time Periods, include: Ancients, Roman Empire, Medieval, Feudal Japan, Napoleonic, WWI, WWII, Modern, Future

Basic Ground Terrain Set

Terrain Type	MP	Defense	Notes
Open	1	-	Grass lands, plains
Forest	2	+1	Woods, Defense +2 vs Ranged Attacks
Water	-	-	Impassable
Shallow Water	2	-1	-
Mountainous	-	-	Impassable
Buildings	-	-	Impassable
Bridge	2	-1	-

are at -2 if the Leader unit is destroyed. Morale checks are at -1 if they are outnumbered 2 to 1.

Fire Support

These are attacks that are generated somewhere off map. This usually represents Artillery batteries or Air strikes. These can strike anywhere on the map.

They are limited in ammo and number of attacks per turn.

Spotting

Some lists include spotting ranges as a unit stat. This is the range in hexes a unit will spot enemy units. Once spotted, any unit can attack it.

Army List Stats

Every Army List includes the: Nationality or Era, Scale, Terrain Set

Army Scales

For two armies to fight they must have the same Scale, Era, and Terrain Set. Scales can be in terms of manpower, or distances. Some possible Scales include:

Skirmish	1 Man
Large Naval	Ocean
World War	Entire Globe
Interstellar Space	Single Solar System
Galactic Space	Light Years

Terrain Sets

For two armies to fight they must have the same Scale, Era, and Terrain Set. The Armies Scale basically determines what Terrain Set it will use. A Terrain Set will list what Terrain types are available and how they effect play.

A Terrain type will have one or more of the following attributes: Defense: A bonus or penalty applied to the Defense Rating of any unit occupying the space. MP: The number of Movement points required to enter the space.

Terrain Type	MP	Defense	Notes
Marsh	2	-1	-
Desert	2	-	-
Low Wall	2	+1	-
Fortress	3	+2	Walls, Defense +3 vs Ranged Attacks

Elevation Rule- Determine the elevation of all hexes. A higher elevation costs 1 additional MP to enter. At a higher elevation get +1 Defense if being attacked from

below and get +1 to attack units below.

Units may not stack unless the Army List allows it.

Wwi Ground Terrain Set

Terrain Type	MP	Defense	Notes
No Mans Land	1	-	
Mine Field	1	-1	Units moving through receive an Attack of strength = 5.
Barbed Wire	2	-2	
Trenches	2	+3	
Roads	$\frac{1}{2}$	-	
Pill Box	2	+4	
Fortress	2	+6	3 Hits
Hill	1	+1	Attack +1; Costs 2 MP to go uphill
Forest	2	+1	
Buildings	2	+2	Also Ruins
Airfield	1	-	
Water	-	-	Impassable

Terrain Bonuses do not protect against gas. Indi-

cate direction of wind.

Wwii Squad Ground Terrain Set

Terrain Type	MP	Save
Clear	1	-
Road	1/2	-
Tall Grass	1	2
Bocage	2	4
Building	3	5

Terrain Type	MP	Save
Rubble	3	6
Trees	2	3
Mud	2	-
Barbed Wire	4	-
Pill Box	3	7

Save If a unit in this terrain is hit it is not killed on a

1D10 roll under this value.

Basic Space Terrain Set

Terrain Type	MP	Defense	Notes
Void	1	-	Empty Space
Gasses	2	+1	Attack at -1
Radiation Belt	2	+2	Attack at -2
Asteroid	-	-	Impassable
Space Hulks	-	-	Impassable (Unless Destroyed: 2 Hits)
Dark Matter	2	-	-
Star Dust	2	-	-
Satellites	-	-	Impassable (Unless Destroyed: 1 Hit)

Army Lists

Some sample army or unit lists are provided below:

Historical Army Lists

Persian Wars Greek Army List

Unit Name	Move	Range	AH	AR	Defense	Morale	Notes
Spartan Warband	2	1	8	-	8	10	
Athenian Hoplites	2	1	7	-	7	8	
Ionian Peltasts	3	3	4	2	4	6	
Cretan Bowmen	3	6	3	2	3	5	
War Chariots	4	3	5	2	5	9	
Heavy Infantry	2	1	7	-	7	7	
Corinthian Phalanx	2	1	7	-	8	9	
Greek Archon	4	1	8	-	7	10	Army Leader

Use the Basic Ground Terrain Set. Scale: Skirmish-Tactical-Brigade. All units have a Hits Rating = 1.

AH Attack Rating vs adjacent units. Hand to Hand.

AR Attack Rating vs units 2 or more hexes away. Ranged Attacks.

Persian Wars Persian Army List

Unit Name	Move	Range	AH	AR	Defense	Morale	Notes
Immortals	2	6	6	2	6	9	
Persian Archers	3	6	3	2	3	7	
Scythed Chariots	4	1	5	-	4	6	
Scythian Horse Archers	6	5	2	1	3	4	
Phrygian Javelineers	3	3	4	2	4	3	
Ethiopian Tribesmen	3	4	3	1	3	2	
Arabian Nomads	6	5	4	1	3	2	
Indian Heavy Chariots	4	3	4	2	4	4	
Egyptian Levies	2	1	4	-	5	4	
Mede Cavalry	6	5	5	1	6	6	
Assyrian Light Chariots	5	3	3	1	3	5	
Bactrian Spearmen	2	1	4	-	5	2	
King Xerxes	4	1	6	-	7	10	Army Leader

Use the Basic Ground Terrain Set. Scale: Skirmish-Tactical-Brigade. All units have a Hits Rating = 1.

AH Attack Rating vs adjacent units. Hand to Hand.

AR Attack Rating vs units 2 or more hexes away. Ranged Attacks.

Punic Wars Roman Army List

Unit Name	Move	Range	AH	AR	Defense	Morale	Notes
Velites Skirmishers	3	3	3	2	3	3	
Hastatus Heavy Infantry	2	3	5	2	5	7	Pila
Princepes Heavy Infantry	2	3	6	2	6	8	Pila
Triarii Veteran Spearmen	2	1	6	-	7	9	
Centurion	2	1	7	-	7	9	ArmyLeader
Auxillary Light Infantry	3	3	3	2	3	2	
Aux. Heavy Infantry Cohort	2	3	5	2	5	6	Pila
Heavy Cavalry	5	1	4	-	4	4	

Use the Basic Ground Terrain Set. Scale: Tactical-Brigade. All units have a Hits Rating = 1. Units with Pila get 2 ranged attacks, on the same turn, the very

first turn they enter into HTH during the battle. They can make no other Ranged attacks.

Punic Wars Carthagian Army List

Unit Name	Move	Range	AH	AR	Defense	Morale	Notes
War Elephants	4	1	7	-	4	5	
Balearic Slingers	3	4	2	1	2	3	
Spanish Heavy Infantry	2	3	5	2	5	7	Pila
Spanish Light Infantry	3	3	3	2	3	7	
Numidian Light Cavalry	6	3	3	2	3	4	
Spanish Cavalrymen	6	3	4	2	4	7	Pila
African Heavy Infantry	2	1	5	-	6	7	
Celt Heavy Cavalry	5	1	5	-	4	6	
Celt Warbands	2	1	6	-	5	7	
Hannibal	5	1	6	-	7	10	Army Leader

Use the Basic Ground Terrain Set. Scale: Tactical-Brigade. All units have a Hits Rating = 1. If an Elephant unit routs, it will attack friendly units blocking its escape route.

Units with Pila get 2 ranged attacks, on the same turn, the very first turn they enter into HTH during the battle. They can make no other Ranged attacks.

Barbarian Army List

Unit Name	Move	Range	Attack	Defense	Morale	Notes
Pathfinders	4	6	3	4	4	Short Bows
Naked Warriors	4	1	5	3	8	Always Charge
Swordsmen	3	1	5	4	7	
Spearmen	3	1	4	4	6	+1 Defense vs Shock Cavalry
Axe Throwers	3	3	4	4	6	
Hunter Archers	3	8	2	3	5	
Axemen	3	1	6	4	7	
Heavy Cavalry	5	1	5	4	6	
Berserkers	3	1	7	4	9	Always Charge
Chieftain	3	1	6	5	8	Army Leader

Use the Basic Ground Terrain Set. Scale: Skirmish-Tactical-Brigade. All units have a Hits Rating = 1. A unit cannot make a ranged attack and move in the same turn.

Units may charge into combat: Move +1 (+2 if Cavalry), Attack +1, Defense -1. This List represents Vikings, Celts, Gauls, Visigoth tribes.

Medieval Army List

Unit Name	Move	Range	Attack	Defense	Morale	Notes
Peasant Rabble	2	1	2	2	3	
Halberdiers	3	1	6	4	6	Set Spears +1
Crossbowmen	3	14	3	3	5	
Longbowmen	3	12	4	2	5	
Shortbowmen	3	8	2	2	4	
Pikemen	2	1	5	4	6	Set spears +2
Swordsmen	3	1	5	5	6	
Footmen	3	1	4	4	5	
Shield Men	2	1	3	6	5	+1 Defense vs Ranged Attacks
Mntd Crossbows	7	14	2	3	5	
Horsemen	7	1	5	4	5	
Mounted Knights	6	1	6	6	7	
Knights on Foot	2	1	6	6	7	
Nobility	6	1	6	6	6	Army Leader

Use the Basic Ground Terrain Set. Scale: Skirmish-Tactical-Brigade. All units have a Hits Rating = 1. A unit cannot make a ranged attack and move in the same turn.

Units may charge into combat: Move +1 (+2 if Cav-

alry), Attack +1, Defense -1. Units with Set Spears get +X Defense vs Shock Cavalry and they get to attack first in any HTH. Ranged units always get to make missile attacks before an enemy attacks in HTH.

Feudal Japan Army List

Unit Name	Move	Range	Attack	Defense	Morale	Notes
Ashigaru Spearmen	3	1	3	3	4	Set Spears +1
Ashigaru Gunners	3	12	2	1	3	
Bushi Spearmen	3	1	4	4	6	Set Spears +1
Bushi Musketeers	3	16	3	2	5	
Bushi Spear Cavalry	8	1	3	3	5	+1 Attack vs Routers
Buddhist Monks	4	1	5	5	7	
Ninja	4	1	5	3	5	
Samurai Swordsmen	3	1	6	5	8	
Samurai Naginata	3	1	5	6	8	Set Spears +1
Samurai Archers	3	12	4	3	7	
Samurai Heavy Cavalry	6	1	4	4	8	
Samurai Horse Archers	7	10	3	3	7	
Daiyamo	6	1	6	7	9	Army Leader

Use the Basic Ground Terrain Set. Scale: Tactical-Brigade. All units have a Hits Rating = 1. A unit cannot make a ranged attack and move in the same turn.

Units may charge into combat: Move +1 (+2 if Cav-

alry), Attack +1, Defense -1. Units with Set Spears get +X Defense vs Shock Cavalry and they get to attack first in any HTH. Ranged units always get to make missile attacks before an enemy attacks in HTH.

Napoleonic Era Army List

Unit Name	Move	Range	A1	A2-5	A6+	Morale	Defense
Guard Infantry	3	3	7	3	-	9	6
Elite Infantry	3	3	6	3	-	8	5
Line Infantry	3	3	5	2	-	7	4
Light Infantry	4	5	5	3	-	8	6
Militia	3	3	2	1	-	4	3
Heavy Cavalry	5	3	5	2	-	8	5
Dragoons	6	2	4	2	-	7	6
Shock Cavalry	5	1	6	-	-	8	4
Field Pieces	2	12	8	6	3	6	3
Howitzers	2	8	6	3	1	5	2
General & Staff	5	1	3	-	-	9	6

Use the Basic Ground Terrain Set. Scale: Company (1 Hex = 100 yards) A unit may only have one Formation marker at a time. A unit without a formation marker is considered to be in line in close order. A unit must make a morale check to change its formation or else it does nothing.

Units may instead of attacking put on or take off a Column Formation marker. A unit with a column marker is Attack -1, Defense -1, Move +1. Heavy Infantry (Line, Elite, Guard) may instead of attacking put on or take off a Square Formation Marker. Infantry in Squares are Move = 0, Attacks -1, Defense +5 vs Cavalry, and Defense -2 vs other troop types.

Units that are hit receive a 'Disrupted Formation' counter. Disrupted Units get a -1 to all ratings ex-

cept Range. A unit that receives a second 'Disrupted Formation' counter is destroyed.

Militia and Light Infantry can never inflict a second Disrupted counter, instead, the unit that was hit must check morale. Artillery cannot move and attack in the same turn. Howitzers may make indirect attacks over the heads of friendly troops.

Non-artillery units may make bayonet/saber charges at adjacent enemy units. Charging units get Attack +2 and Defense -2.

A1 Attack Rating at Range = 1

A2-5 Attack Rating at Ranges = 2-5

A6+ Attack Rating at Ranges = 6+

Guard Infantry- Old Guard, Young Guard Elite Infantry- Musketeers, Grenadiers, Highlanders Line

Infantry- Fusiliers, Sappers, Gendarmes, Legere, Jagers Light Infantry-(Rifles) Skirmishers, Cacadores, Voltigeurs, Zouaves Militia- Landwehr, Blunderbus-sars, Partisans Heavy Cavalry- Cuirassiers, Carabin-ers, Chasseurs Dragoons- Also Hussars, Cossacks

Shock Cavalry- Lancers, Uhlans, Mamelukes How-itzers fire shells. Field pieces fire canister and round shot. Round Shot attacks every unit it passes through in a straight line.

World War I Unit List

Unit Name	Move	Range	Attack	Defense	Notes
Infantry	2	2	6	5	
Snipers	2	4	4	6	
Flame Throwers	2	1	6	2	Attack +5 vs Pillboxes
Cavalry	4	1	4	1	Cannot enter Barbed Wire
Machine Guns	1	2	7	5	
Mustard Gas	-	4	8	-	All units have a Def = 5 vs Gas
Tanks	2	4	6	8	
Mortars	1	6	2	5	
Light Artillery	1	12	2	4	
Medium Artillery	1	20	3	3	
Siege Guns	1	32	4	2	Attack +5 vs Fortresses
Headquarters	1	1	1	2	Army Leader
Airplane	40	1	2	5	Attack +5 vs other planes
Flak Guns	1	6	5	4	

Use the WWI Terrain Set. Scale: Tactical-Brigade. All units have a Hits Rating = 1. Only Infantry, Snipers, Flame Throwers, Airplanes, Cavalry, and Tanks can move and attack in the same turn. Siege guns attack every other turn.

Mustard gas is an attack chit carried by some in-fantry. It is discarded when used. Gas affects all units

in a line of 4 hexes. Attacks must be in direction of the wind. Airplanes must land at a friendly airfield at the end of every other turn.

Only Flak guns and Airplanes may attack Airplanes. Airplanes ignore terrain when moving and when being attacked. All units have a Morale Rating = 7.

World War II Squad Unit List

Unit	R5	R4	R3	R2	R1	OA	MP
Sniper Rifle	-	2	3	3	2	-	6
Rifle	-	1	2	2	2	-	6
SMG	-	-	1	2	3	-	6
Officer	-	-	1	2	2	-	6

Use the WWII Terrain Set. Scale: Tactical. All units have a Hits Rating = 1.

RX Attack value at range = X

OA Unit is out of ammo when an attack roll of this value is made.

Unit	R5	R4	R3	R2	R1	OA	MP
Flamethrower	-	-	-	1	4	10	4
Machinegun	-	1	2	3	3	10	4
Mortar	2	2	2	1	1	10	4

All units have a Morale Rating = 7. A squad without a officer has Morale -2.

Science Fiction Army Lists

Space Fleet Unit List

Unit Name	Move	Range	Attack	Defense	Hits	Notes
Interceptor Fighter	7	5	2	6	1	Attack +5 vs Fighters
Assault Fighter	6	6	6	4	1	
Fighter Bomber	5	3	2	3	1	Attack +5 vs Ships
Heavy Fighter	5	6	5	5	1	
Light Fighter	8	4	4	6	1	
Escort Corvette	4	8	3	6	2	Attack +4 vs Fighters

Unit Name	Move	Range	Attack	Defense	Hits	Notes
Hunter Corvette	5	9	5	5	2	
Gunship Corvette	4	10	4	4	2	Attack +2 vs Ships
Destroyer Ship	4	12	5	4	3	Attack +2 vs Fighters
Cruiser Ship	3	14	6	5	4	
Battle Ship	2	16	7	6	5	+1 vs Ships

Use the Basic Space Terrain Set. Scale: Skirmish-Tactical. All units have a Morale Rating = 10. All Fighters have Defense +3 vs Ships All Ships have Attack +2 vs Corvettes All Corvettes have Attack +2 vs

Fighters Ships & Corvettes have -1 Move, Attack, and Defense per hit lost.

Use Damage counters to designate hits. Players pick one of their vessels to be their leader unit.

Star Wars Galactic Empire Fleet Unit List

Unit Name	Move	AD	Hull	Shields	Cargo	Notes
Star Galleon	2	0/1/1	1	2	-/3	Point Defense
Carrack Light Cruiser	5	1/1/2	1	2	-/-	Attack Rating = 5
Republic Dreadnaught	2	1/1/1	1	2	1/2	Bombardment
Imperial Escort Cruiser	3	1/1/1	1	2	6/-	Point Defense
Galleon	3	-	1	1	-/2	-
Super Star Destroyer	3	7/3/5	6	12	12/9	Bombardment
Lancer Frigate	3	2/2/2	1	3	-/-	Point Defense
Strike Cruiser	3	2/1/2	2	6	1/-	Bombardment
Assault Transport	4	2/0/1	1	3	-/1	Point Defense
Interdictor Cruiser	3	1/1/1	1	6	-/-	Attack Rating = 5
Victory Destroyer	3	2/0/2	2	2	2/2	Bombardment
Victory II Star Destroyer	3	2/2/2	2	6	2/-	Bombardment
Imperial Star Destroyer	3	2/1/2	3	3	6/3	Bombardment
Imperial II Star Destroyer	3	4/1/3	4	8	6/3	Bombardment
Death Star	1	8/8/8	12	18	24/18	Bombardment

Use the Basic Space Terrain Set. Scale: Skirmish-Tactical. All units have a Morale Rating = 10. All ships have a Defense Rating = 0.

Shields & Hull are the same as Hits. Shields are lost before Hull points. Cargo: The first value is the number of fighter squads carried. The second Cargo value is the number of troop regiments carried.

Surviving Troop regiments may count towards victory objectives. Ships with the Bombardment ability may count towards victory objectives. Ships with Point Defense have an Attack Rating = 6 vs Fighters Ships with Point Defense have an Attack Rating = 4 vs Ships Ships with Bombardment have an Attack Rating = 4 vs Fighters Ships with Bombardment have an Attack

Rating = 6 vs Ships All attacks have a Range = 1.

AD Attack Dice: The number of Attacks the unit can make per turn in 4 arcs:

Front/ Aft/ Sides (Port & Starboard) The Death Star can make 1 Special Attack every other turn at Range = 5. This attack automatically destroys any target it hits. As it move, any ship may hyper jump out of the battle. Enemy ships may attack first.

Interdictor Cruisers have Gravity Wells that prevent all ships on the map from hyper jumping. Use Damage counters (or change) to designate hits. Ships reduced to half hull points have half AD and Movement.

Players pick one of their vessels to be their leader unit.

Star Wars Galactic Empire Fighter Unit List

Unit Name	Move	AD	Defense	Notes
Tie Fighter Squad	7	1	6	Point Defense
Tie Interceptor Squad	8	2	7	Attack Rating = 5
Tie Defender Squad	7	3	6	Attack Rating = 5
Tie Bomber Squad	6	2	5	Bombardment
Slave-1 (Boba Fett's Ship)	6	2	7	Attack Rating = 7

All fighter Squads have only 1 hit, but notice, they do have a Defense Rating. All Attacks are into the

forward Arc.

Star Wars Rebel Alliance Fleet Unit List

Unit Name	Move	AD	Hits	Shields	Cargo	Notes
Corellian Frigate	3	1/1/2	1	3	-/-	Attack Rating = 5
Dauntless Cruiser	3	2/2/4	3	8	4/2	Bombardment
Corellian Gunship	5	2/1/2	1	2	-/-	Point Defense
Liberator Cruiser	4	2/1/2	2	6	6/3	Bombardment
Bulwark Battlecruiser	3	8/2/5	5	11	10/4	Bombardment
Nebulon-B Frigate	3	2/1/1	1	3	2/-	Attack Rating = 5
Alliance Dreadnaught	3	1/1/1	1	2	1/2	Bombardment
Mon Calamari Cruiser	3	2/2/2	2	3	3/1	Bombardment
Bulk Cruiser	3	1/0/1	1	2	-/-	Bombardment
Bulk Transport	2	-	1	2	-/6	-
Medium Transport	3	0/0/1	1	1	-/2	Point Defense
Alliance Escort Carrier	3	1/0/1	1	2	6/-	Point Defense
Corellian Capitol Ship	3	2/1/2	2	6	-/1	Bombardment
Corellian Corvette	3	2/1/2	1	2	-/-	Point Defense
Assault Frigate	3	3/0/2	2	6	-/-	Bombardment
Millennium Falcon	6	1/1/1	1	1	-/-	Point Defense

Corellian Frigates have Gravity Wells that prevent all ships on the map from hyper jumping. The Millen-

nium Falcon has a Defense Rating = 5.

Star Wars Rebel Alliance Fighter Unit List

Unit Name	Move	AD	Defense	Notes
A-Wing Squad	8	1	7	Point Defense
B-Wing Squad	6	3	5	Bombardment
X-Wing Squad	7	2	6	Attack Rating = 5
Y-Wing Squad	6	2	6	Attack Rating = 5

One of a Y-Wings Attack Dice may be fired into any arc. Squads with a Jedi pilot have Attack and Defense Ratings +2. Any Fighter Squad that hits the Death Star has 1 in 1D10 chance of Destroying it.

ing the Death Star.

Jedi Squads have a 1-5 in 1D10 chance of destroy-

Fantasy Army Lists

Middle Earth - War Of The Ring - Dark Powers - Army List

Unit Name:	Move	AM	AR	Defense	Morale	Notes
Sauron the Dark Lord*	0	7	-	9	10	Magic = 20

Umbar Corsairs	2	4	2	3	5L	Attack +1 at Sea
Easterlings of Rhun	2	4	3	3	4L	Men
Men of Harad	2	4	3	3	5L	Southrons
Balchoth Barbarians	2	5	3	3	6L	Men
Wargs	4	6	-	5	8L	Great Wolves
Wolf Riders	4	6	2	4	7L	Orcs & Wargs
Great Bats	8F	3	-	2	9L	
Vampires	8F	7	-	6	8	Undead
Gaurhoth Werewolves	4	6	-	6	9	Shapeshifters
Fell Beasts	8F	5	-	4	8	Carry Nazgul
Wainriders	4	4	2	3	6L	War Chariots
Flies of Mordor	6	3	-	6	10L	Swarms
Dunlendings	2	4	2	3	4L	Men
Haradrim Mumakils	3	7	2	8	8L	War Elephants
Hillmen	2	3	2	3	7L	
Smeagol Gollum	3	1	-	8	3	
Kraken	1	9	-	8	9	3 Hits, Water Only
Variags of Khand	2	4	3	4	5L	Men
Siege Towers	1	4	3	6	9L	
Catapults	1	1	3	2	5L	Breach = 2, Range = 3
Battering Rams	1	1	-	4	7L	Breach = 4
Ships	6	4	2	6	6L	Carry = 1

Use the Basic Ground Terrain Set. Scale: Skirmish-Tactical-Brigade. All units have a Hits Rating = 1.

AM Attack Rating Melee. Used against adjacent opponents.

AR Attack Rating Ranged. Used against opponents 2 hexes away.

Units with an AR rating have a Range Rating = 2. Units with a * are 'Heroes'. Heroes may stack unlimited on other Units. Units with an L after their Morale rating are Legions.

Heroes cannot attack Legions. Legions cannot attack Heroes stacked on a Legion. Legions adjacent to

or stacked with heroes get +1 on all their ratings.

On a roll of 1-5 on 1D10, Ships, Siege Towers, Catapults, and Rams are captured, not destroyed. The letter F after the move rating indicates the unit can fly. Each Ship can carry one non-ship Legion and any number of Heroes.

Sauron never moves from his Lair in Mordor. Units with Magic points can cast spells. Units with breach ability use this as an attack rating to destroy walls and Fortifications.

Units get no terrain bonus when attacked by Siege Towers.

Middle Earth - War Of The Ring - Forces Of Light - Army List

Unit Name:	Move	AM	AR	Defense	Morale	Notes
Gandalf the Grey*	6	5	-	9	10	Istari, Maiar, Magic = 8

Middle Earth Magic

Magic Spell:	Effect
Haste	1D10 Target Adjacent units get Move Rating +1D10 this turn.
Barrier	Designate 1D10 connected hexes that enemy units may not enter this turn.
Aid	Any rating of any Target Unit +/- 1D5 this turn. Cast before roll is made.
Fear	1D5 Target Adjacent units must make a Morale Check at -2.

A Spellcaster can use one spell per turn. The Aid spell can be cast during the opponents turn. Each spell cast uses up one Magic Point.

Game Designers Notes

More Army Lists and Terrain Sets are on their way.

Middle Earth Scenario Outline

Battle of Morannon, outside the Black Gates of Mor-dor.

Rules Of War For The Ancient Period

by Michael Murgatroyd
(mike-angie.scartho@virgin.net)

Introduction

Generic Rules for Combat in any scale or era. No Cards are used, just hex maps, dice, and counters. The basic concept is to be able to have: Relatively quick battles with 20-30 units to a side.

A minimum of record keeping. Easy set up. A very simple rules-system, easily learned, and easily modified.

Equipment

- Hex Maps
- Counters (or Miniatures)
- Dice

Scenarios

The designer of a scenario must determine the following:

- Which Armies to use.
- How many units and what types.
- What map to use.
- Setup- Initial Placement of Units
- Victory conditions
- The opponent picks which side he wants to play.

Unit Stats

Each unit has 6 stats:

1. Movement Rating (Movement Points)
2. Range Rating (In Hexes)
3. Attack Rating
4. Defense Rating
5. Morale Rating
6. Hits Rating (Number of Kills before the Unit is Destroyed) NB All units in the Ancient period rules have a hits rating of 2

Turn Sequence

Each Round has 4 phases.

- Initiative Phase
- Player A Movement Phase
- Player B Movement Phase
- Morale Phase

Initiative Phase

Determine turn order by rolling high on 1D10. Reroll ties. The Player with the high roll chooses

whether he wants to be Player A or Player B. The Player with the low roll is left with the choice not taken.

A Player gets -2 to his roll if his Leader unit is destroyed.

Facing

All unit counters must have an arrow to indicate their direction of facing. Units can only move in the direction they face. After each hex moved a unit may change its facing 60 degrees.

A unit can only attack units it is facing in a 120 degree arc. Hand to Hand attacks against the back or rear of a unit are at Attack +2. The Defender gets defense -3.

Routing units immediately change their facing 180 degrees.

Stacking

Only one ground unit per hex, except for units that can carry other units. This may be altered depending on the scale of the map.

Movement Phase

MP Movement Points.

MPs are expended upon entering an adjacent hex. Units may move up to their movement allowance. A unit that is not damaged, pinned, etc, can always move at least 1 hex.

A unit may spend a movement point to change its facing to any direction.

Attacking

All units may attack only once per turn. Any unit may attack at any time during either Movement Phase. Resolve attacks immediately.

If players want to attack at the same time, the attacks are simultaneous. Each unit has an attack range in hexes. When attacking roll 1D10. this is the Attack roll.

An Attack Hits if the roll is less than or equal to the Attack rating of the Attacker. Natural Rolls of 1 always hit, and rolls of 10 always hit. If an attack hits the Defender may attempt to save.

The Defender saves on a roll on 1D10 less than or equal to the Defense value of the Defender. If a unit receives a number of hits equal to its Hits Rating it is killed and is removed from play. Unless otherwise stated all attacks must be Line of Sight.

Combined Attacks Rule

Every unit after the first to attack the same target unit gets Attack Rating +1.

Overkill Rule

If an attack hits, subtract the roll result from the attack rating. This is the Overkill factor. The defender reduces his Defense rating by this factor.

For example: the attacking tank has an Attack rating = 9. It rolls a 5. The overkill factor is $9 - 5 = 4$. The defending infantry has a Defense rating = 6. The Modified defense rating is $6 - 4 = 2$.

Overrun (free Advance)

A unit that has destroyed an adjacent enemy unit may move into its hex.

Type	Scale
Skirmish	1 Man
Tactical	10
Brigade	100

Army Eras

For two armies to fight they must have the same Scale, Era, and Terrain Set.

Terrain Sets

For two armies to fight they must have the same Scale, Era, and Terrain Set. The Armies Scale basically

Morale Phase

Units must make morale checks every time they are hit but not destroyed. Units must also check morale if an adjacent friendly unit routs. If they roll equal to or less than their Morale Rating on 1D10 they keep fighting.

On a higher roll they rout. They move away from enemy units at top speed. If they move off the board they are removed from play. Routing units may roll to rally every turn after they rout.

If they roll equal to or less than half (round up) of their Morale Rating on 1D10 they rally. Morale checks are at -2 if the Leader unit is destroyed. Morale checks are at -1 if they are outnumbered 2 to 1.

Army Scales

For two armies to fight they must have the same Scale, Era, and Terrain Set. Scales can be in terms of manpower, or distances. Some possible Scales include:

Type	Scale
Operational	1,000; Countries
Strategic	10,000 Men; Continent

determines what Terrain Set it will use. A Terrain Set will list what Terrain types are available and how they effect play.

A Terrain type will have one or more of the following attributes: Defense: A bonus or penalty applied to the Defense Rating of any unit occupying the space. MP: The number of Movement points required to enter the space.

Basic Ground Terrain Set

Terrain Type	MP	Defense	Notes
Open	1	-	Grass lands, plains
Forest	2	+1	Woods, Defense +2 vs Ranged Attacks
Water	-	-	Impassable
Shallow Water	2	-1	-
Mountainous	-	-	Impassable
Buildings	-	-	Impassable
Bridge	2	-1	-
Marsh	2	-1	-
Desert	2	-	-
Low Wall	2	+1	-
Fortress	3	+2	Walls, Defense +3 vs Ranged Attacks

Elevation Rule- Determine the elevation of all hexes. A higher elevation costs 1 additional MP to enter. At a higher elevation get +1 Defense if being attacked from below and get +1 to attack units below.

Ancient Period Army Lists

The following lists are based on those given in the original rules but expanded by myself. Please feel free to modify them if you feel they need it.

Please note the composition of ancient armies varied tremendously with circumstances and many nations used a wide variety of local or mercenary troops as and when necessary. The following are typical ex-

Units may not stack unless the Army List allows it.

amples only, using the core troop types of each army.
Where troop types have a choice of weapons that choice is yours.

Greek Army

- 1 General
- 8 Units Hoplites
- 2 Units Peltasts
- 2 Units Psiloi
- 2 Units Medium Cavalry
- 1 Unit Light Cavalry

Persian Army

- 1 General
- 6 Units Spearmen/Bow (1 Unit may be Immortals)
- 2 Units Medium Infantry
- 2 Units Light Infantry
- 2 Units Medium Cavalry
- 3 Units Light Cavalry

Macedonian Army

- 1 General
- 6 Units Phalangites
- 2 Units Hypaspists
- 2 Units Light Infantry
- 1 Unit Heavy Cavalry/Companions
- 2 Units Medium Cavalry
- 2 Units Light Cavalry

Indian Army

- 1 General
- 4 Units Elephants
- 4 Units Chariots
- 4 Units Medium Infantry/Bow
- 2 Units Medium Infantry/Spear
- 1 Unit Medium Cavalry

Carthaginian Army

- 1 General
- 2 Units Elephants

Greek Army

- 3 Units Spearmen
- 4 Units Medium Infantry/Gauls/Spaniards
- 3 Units Light Infantry
- 1 Unit Heavy or Medium Cavalry
- 2 Units Light Cavalry

Roman Army

- 1 General
- 6 Units Legionaries
- 3 Units Auxiliaries
- 2 Units Light Infantry
- 2 Units Medium Cavalry
- 2 Units Light Cavalry

Gallic/germanic Army

- 1 General
- 6 Units Warband
- 4 Units Light Infantry
- 1 Unit Heavy Cavalry
- 2 Units Medium Cavalry
- 2 Units Light Cavalry

Celtic Army

- 1 General
- 4 Units Chariots
- 6 Units Warband
- 3 Units Light Infantry
- 2 Units Light Cavalry

Late German/goth/hun Army

- 1 General
- 4 Units Medium Infantry
- 2 Units Light Infantry
- 4 Units Heavy Cavalry
- 5 Units Light Cavalry

Running Man The Home Game

Introduction

Board Game based on the 1987 SF Movie. One player is the Runners. The other is the Stalkers.

Winning

The Stalkers win if all of the Runners are killed. The Runners get a minor victory if 1 or more of them make it to the Rebel Hideout. The runners get a major victory if 1 or more of them makes it first to the Satellite Uplink and then the Hideout.

The game ends when all stalkers are killed or all Runners are either Killed or escaped.

The Runners

There are 4 Runners:

1. Ben Richards
2. Laughlin
3. Weiss
4. Amber

The Stalkers

There are 5 Stalkers:

1. Sub Zero
2. Buzz Saw
3. Dynamo
4. Fire Ball
5. Captain Freedom

The Game Zone

The Map or Board is also known as the Game Zone. The Board is an 8x8 grid. There are 4 main locations located in the corners: Runner Entry Stalker Entry Satellite Uplink Rebel Hideout. The 2 Entry points are in opposite corners. The center 4 squares are known as the Intersection.

In order to go from any corner location to any other corner Location, you must first enter an Intersection space. Runners and stalkers may not enter each others entry points. Stalkers may not enter the Satellite or rebel squares either.

Counters

Each runner and stalker has his own counter. Counters may Stack.

Hits & Damage

All Characters have Hits. Ben has 5 Hits. All the other runners have 2 Hits.

Captain Freedom has 4 Hits. All the other Stalkers have 3 Hits. Whenever a Character takes damage place a Damage Counter on it.

If a Character has more Damage Counters than Hits, it is killed.

Setup

Place the Ben, Laughlin, and Weiss counters on the Runner entry square. Place Subzero on the Stalker Entry Point. Runners go first (Head start).

Turn Sequence

Players take turns. Each turn has 3 Phases:

1. Run Phase
2. Action Phase
3. Hide Phase

Run Phase

Draw 3 cards and put them in your hand.

Action Phase

Use Move cards to move your units. A unit may make a max of 2 moves in a turn. The unit must move the entire distance described by the move card or not at all.

Runners stacked together may use a single card to move together.

K Move like a Knight in Chess.

Runners may never move into a space occupied by a Stalker. Runners may never move through a space occupied by a Stalker, except if It is a K card. All units may stack with each other.

Attack cards are used to make attacks against opposing units in the same space. Note: All attacks are (short range) within the same square. If runners are stacked, an attack against them will hit a random one.

A unit may make up to 2 attacks in a turn. Defense cards are played to negate an attack.

Character Entry

Amber enters the game on turn 4. If Sub zero is killed, both Dynamo and Buzz Saw immediately enter the Game Zone. If Sub Zero is not killed Dynamo and Buzz Saw enter on turn 6.

If both Dynamo and Buzz saw are killed, Fire Ball immediately enters, otherwise Fireball enters on turn 10. If Fire Ball is killed, Captain Freedom immediately enters play, otherwise Captain Freedom enters on turn 14.

Card List Notation

M Move
A Attack

Russia And The West

Introduction

Card game for 2 players. One player represents the West, the other Russia.

Premise

Since the Cold War has ended and the fall of the Soviet Union as a Superpower, Russia has maintained an active war-footing with the West, using every means Possible (covert, hacking, criminal, disinformation, hard force, etc.) to Subvert and destabilize the Western powers and the New world order. Their long term goal is to remain a major player in an illiberal, multipolar world.

History

The game starts in the year 2000. Each turn represents 2 years. The game ends in 2020. There are a total of 11 Turns.

Objective

- If any player wins 3 Hands in a row, they win the game.
- The winner of the first turn gets 1 Victory point.
- The winner of the second turn gets 2 Victory points.
- The winner of the third turn gets 3 Victory points and son.

The player with the most Victory points at the end of the game wins. Use pen and paper to record Victory points.

The Deck

Players share a common deck. Some cards can be used by both players. Some cards can only be used by

one side.

Turn Sequence

1. Players are dealt 7 cards each.
2. You may reveal a Spy card to look at your opponent's hand.
3. Players can discard up to 4 cards and draw replacements.
4. A player may discard an economic card to draw 2 cards.
5. A player may discard a military card to make his opponent discard a random card
6. A player may discard a political card to draw 3 cards and discard 2 cards.
7. A player may discard a culture card to gain 1 Victory point.
8. Players reveal their hands.
9. The player with the highest Force total wins the hand.

-Every card has a Force value. -A player can only count cards that match his side or that can be used by both players. -A player may only use 1 card of the same type, so for example, he could use one Military card toward his total but not two. This is the "One-Type-only Rule".

-If a player reveals a Crime card he may break the One-Type-Only Rule once unless His opponent plays a Law card. A card with the "Any" type may be assigned any type its owner wants (Political, cultural, etc.)

10. Discard all cards.

Russo-german War

Introduction

Board & card game for 2 players. WWII East Front very abstract simulation Each figure (unit) represents an army or armored division. One player is the Germans, the other is the Russians (Soviets).

Victory

Destroy all opposing units.

The Map

Use an 8x8 chessboard.

The Men

Use chits or miniatures to represent units. There are 2 types of units: Infantry and Armor The German player starts with: 3 Armor 5 Infantry The Russian player starts with: 4 Armor 12 Infantry

Setup

Each player places one unit on each square of his back two rows. Units may not stack.

The Cards

Players share a common deck.

Turn Sequence

Players take turns. Each turn has 4 phases: Orders Phase Move Phase Fire Phase Recruit Phase

Orders Phase

Draw 3 cards. If the deck runs out, shuffle the discard and draw from it. Max hand size = 5 cards.
Discard excess cards.

Card List

Card Name:	#	Use	Type	Range	Notes
Blitzkrieg	4	G	M	2	

Move Phase

Play (discard) a Move card to move one of your units. The move card has a number. This is the number of spaces the unit moves.

Moves can be diagonal or orthogonal. Instead of moving just one unit in any direction, you have the option of moving up to three units forward the indicated number of spaces using a single move card. A unit can move only once per turn.

Fire Phase

Play (discard) an Attack card to have a unit attack. The attack card has a number. This is the range of the attack.

Attacks can be diagonal or orthogonal. The enemy unit that is the target of the attack is automatically Killed and removed from the map. Your opponent may play certain Defense cards to negate your attack.

Recruit Phase

Players may play a Recruit card to gain back one lost unit. The unit starts in an empty space in that players back row.

Card List Notation

- M** Movement
- A** Attack
- D** Defense: Negate Attack card played by opponent
- G** Negate Attack (of Range = 1) card played by opponent and destroy attacker
- V** Destroy Attacker (of Range = 1) chit. (does not negate attack)
- N** Negate Move card played by opponent
- K** Recruit
- X** Opponent must discard 2 cards
- Z** Draw 2 cards
- Use** Which player can use the card
- G** German Player only
- R** Russian Player only
- T** Tank units only
- I** Infantry units only
- #** Number of this card in the deck

Moscow Option

Designate one space on the Russians second to last row to be Moscow. If Moscow is occupied for 2 consecutive turns by the Germans, the German player wins.

Summer/winter Offensives Options

Alternate every 6 turns to be Summer then Winter, starting with summer. In summer, cards referring to cold, freezing, winter and blizzards cannot be played. In winter the Luftwaffe and Air Superiority cards cannot be played.

Russo-turkish War

Introduction

Board & card game for 2 players. Abstract simulation of the Russo-Turkish War of 1877. (Russia's fifth war against Turkey (The Ottoman Empire) in the 19th Century) One player is the Turks, the other is the Russians.

Victory

Destroy all opposing units.

The Map

Use an 8x8 chessboard.

The Men

Use chits or miniatures to represent units. Each figure (unit) represents an army of 20,000 men. Each player starts with 12 units.

Each unit has 3 Hits.

Setup

Each player places one unit on each square of his back two rows. Units may not stack.

The Cards

Players share a common deck. The deck contains one of each listed card.

Turn Sequence

Players take turns. Each turn has 4 phases:

1. Orders Phase
2. Move Phase
3. Attack Phase
4. Recruit Phase

Orders Phase

Draw 3 cards. If the deck runs out, shuffle the discard and draw from it. Max hand size = 5 cards.

Discard excess cards.

Card List

Move Phase

Get one free move (one unit one space). For additional moves: Play (discard) a Move card to move one of your units one space. Moves can be diagonal or orthogonal. Instead of moving just one unit in any direction, you have the option of moving up to three units forward the indicated number of spaces using a single move card.

A unit can move only once per turn.

Attack Phase

Play (discard) an Attack card to have a unit attack an adjacent unit. Attacks can be diagonal or orthogonal. The enemy unit that is the target of the attack takes one point of damage.

A unit reduced to zero hits is destroyed and removed from the map. Your opponent may play Defense cards to negate your attack.

Recruit Phase

Players may play a Recruit card to gain back one lost unit. The unit starts in an empty space in that player's back row.

Card List Notation

Use Which player can use the card

T Turkish Player only

R Russian Player only

Number of this card in the deck

Sailor Moon

Introduction

Help Sailor Moon & the Sailor Scouts protect Earth from the Negaverse and the Negamoon.

Decks

One player uses the Space Scouts Deck. The other player uses the Nega Deck. Each deck has 60 cards.

Turn Sequence

Each turn has 5 phases: Draw Phase Transformation Phase Reveal Phase Battle Phase Discard Phase

Draw Phase

Each player draws 10 cards. If a players deck runs out, shuffle the reserve pile and draw from it.

Transformation Phase

Players may discard up to 5 cards and draw replacements.

Reveal Phase

Players reveal their hands. Hands are placed on the table face up. Summon cards allow you to take any one character from your deck and put it into play.

Battle Phase

Each player determines the battle total for his hand. Add up the Force value of all your cards. For each Character, you can count only one of his or her character cards.

The Nega player may only use either Negaverse or Negamoon cards and any minion or power cards. Cards that are not used or do not count do not add to your Battle Total.

Discard Phase

Compare the players Battle Totals. The player with the higher total wins the hand. All cards are discarded.

Object

The first player to win 3 hands is the Game Winner.

Card List Notation

- # Number of that card in the deck.
- SS** Sailor Scouts
- A** Ability
- C** Companions
- D** Device
- E** Enemy
- M** Minion
- SW** Shadow Warrior

Energy Orb	D	9	
Spaceship	D	5	Chamber of Mirrors
Time Travel	A	-	Summon

Game Designers Notes

A CCG of Sailor Moon exists. I have not seen any of the cards, but I'm sure they look great. I'm guessing a deck theme in the CCG would be one sailor scout and her powers, or one group of enemies. My non-collectible version crams a lot of characters into 60

cards.

Disclaimer

'Sailor Moon' is a copyrighted/trademarked property. This is just a Fan site.

Samnite Wars

Introduction

Wargame for 2-4+ players. Theme: Expansion of the Roman Republic. Each player on his turn takes the role of a Consul of Rome, trying to protect the Republic and expand its borders.

On other players turns, players are the enemies of Rome.

The Map

The map depicts the main regions of Italy in antiquity. Rome is in the Latin Region. The Region marked Gaul refers to those Celts inhabiting the Po Valley.

Umbria also includes Picenum.

Victory

The game ends when Rome controls 6 or more Regions and the current Consul declares the game to be over. The player with the most Prestige Tokens (PT) is the winner.

Prestige Tokens

Players share a common set of Tokens. Each player will accumulate their own pile of PT. A Players pile is known as his "Triumph".

There is no limit to the number of PT.

Glory Of Rome

Coins not owned by any player are kept in a pile off the map. This pile is known as the "Glory of Rome"

Gold Coins

Players share a common set of Coins.

Tax Base And Treasury

Coins are owned by Rome and not individual players. Coins not owned by Rome are kept in a off-map pile called the "Tax Base" Coins owned by Rome are kept in a pile known as the "Treasury" Treasury coins are kept on the Map (by Sardinia). During his turn, the current first Consul has access to the Treasury.

Coins spent are returned to the Tax Base.

Dice

Six and ten sided dice are needed.

The Fate Deck

Players share a common deck. The Fate deck is kept face up. The discard is kept face down.

Control

To show that Rome controls a Region, place a PT on it on the map. The Samnites must have 3 Tokens to be controlled.

Setup

Place a PT on the Latin Region on the map. Each player starts with 1D6 PT in their Triumph pile. The Treasury starts with 1D6 Coins.

Players roll high on 1D10 to see who goes first.

Turn Sequence

Players take turns. On his a turn a player controls Rome and has the title of First Consul. All other players are referred to as the Foes.

Each turn has 7 Phases:

1. Fate Phase
2. Taxation Phase
3. Strategy Phase
4. Event Phase
5. Resolution Phase
6. Prestige Phase
7. Etcetera Phase

Fate Phase

All players fill their hand to 10 cards. The Fate deck is kept face up. The discard is kept face down.

Taxation Phase

Place 2 + X Coins into the Treasury.

X The Number of Regions controlled by Rome including the Latins.

Strategy

The current player (The Consul) may pay X Gold to draw X cards and put them in his hand

Event Phase

The Consul rolls on the Event Table.

The Event Table

1D10	Event:
1	Revolt
2-4	Peace (Pax Romana)
5-7	Raids
8-0	War

Resolution Phase

Resolve the current Event.

Revolt

If you get the Revolt event, there is a Rebellion in a Region controlled by Rome. If Rome only controls the Latins, then a Latin city revolts. If there is more than one Region, a region other than the Latins revolts.

The Foes (all players except the Consul) decide which Region Rebels. The Consul decides which other Player will take the role of the Rebels. If there are 4+

players, the Roman player may pick one player to be his ally.

That player must give the Consul 2 cards from his hand. Likewise the Rebels may pick another player to be his ally. The Consul and the Rebels simultaneously play 1 or more cards face up to the table.

This is known as a "War Effort". A War Effort can contain a maximum of: 1 Ally card, 1 Strategy Card, 1 Troop Card, 1 Weapon Card, 1 Battle Card Each player totals up the Force value of his played cards. The side with the highest value wins. If tied roll players roll high on 1D6 to break the tie.

If the Consul wins, he gains 3 PT. If the Rebels win, the Consul loses 6 PT and roll 1D6: On a roll of 1-3 the Region frees itself from Roman Control: Remove the PT from it on the map. In revolts, Rome is the attacker, and the Rebels are defenders.

Peace

If you get the Peace event, the Consul has 2 options he may pick from:

1. Pax Romana
2. Campaign

If he chooses Pax Romana, he gains 1 Prestige Token (PT). If he chooses Campaign, he spends 2 Gold and must pick a Region to invade. The target Region must share a border with a region Rome already controls.

The Consul decides which other Player will take the role of the Defenders. If there are 4+ players, the Roman player may pick one player to be his ally. That player must give the Consul 2 cards from his hand.

Likewise the defender may pick another player to be his ally. The Consul and the Defenders simultaneously play 1 or more cards face up to the table. This is known as a "War Effort". A War Effort can contain a maximum of: 1 Ally card, 1 Strategy Card, 1 Troop Card, 1 Weapon Card, 1 Battle Card Each player totals up the Force value of his played cards.

The side with the highest value wins. If tied roll players roll high on 1D6 to break the tie. If the Defenders win, the Consul loses 6 PT.

If the Consul wins, he gains 1D6 PT and 1D6 Gold, and a Conquest card may be played. If the Consul does not have a conquest card, another player may play a conquest card. If there are several, players roll high on 1D6 to see who gets the honor. The player who plays the Conquest card gains PT according to the card and a PT is placed on the newly conquered Region to show that Rome now controls it.

If no one has a conquest card, then the Region was defeated but remains free.

Raids

Enemy Regions are Raiding the Republic. If you get the Peace event, the Consul has 2 options he may pick from:

1. Fortify
2. Campaign

If he chooses Fortify, he spends 1D6 Gold from the Treasury. If he chooses Campaign, he spends 2 Gold and must pick a Region to invade. The target Region must share a border with a region Rome already controls.

The Consul decides which other Player will take the role of the Defenders. If there are 4+ players, the Roman player may pick one player to be his ally. That player must give the Consul 2 cards from his hand.

Likewise the defender may pick another player to be his ally. The Consul and the Defenders simultaneously play 1 or more cards face up to the table. This is known as a "War Effort". A War Effort can contain a maximum of: 1 Ally card, 1 Strategy Card, 1 Troop Card, 1 Weapon Card, 1 Battle Card Each player totals up the Force value of his played cards.

The side with the highest value wins. If tied roll players roll high on 1D6 to break the tie. If the Defenders win, the Consul loses 6 PT.

If the Consul wins, he gains 1D6 PT and 1D6 Gold, and a Conquest card may be played. If the Consul does not have a conquest card, another player may play a conquest card. If there are several, players roll high on 1D6 to see who gets the honor. The player who plays the Conquest card gains PT according to the card and a PT is placed on the newly conquered Region to show that Rome now controls it.

If no one has a conquest card, then the Region was defeated but remains free.

War

If you get the War event, an enemy Region attacks the Roman Republic. Roll on the Region Table to determine which. If you get the Latins, treat it as a Revolt instead of a War result.

If you roll a region not adjacent (sharing a Border) to the Republic, then use the result in Parenthesis instead. If you roll a Region that Rome already controls, treat it as a Revolt of that Province instead. The Consul decides which other Player will take the role of the Attacker.

If there are 4+ players, the Roman player may pick one player to be his ally. That player must give the Consul 2 cards from his hand. Likewise the attacker may pick another player to be his ally.

The Consul and the Attacker simultaneously play 1 or more cards face up to the table. This is known as a "War Effort". A War Effort can contain a maximum of: 1 Ally card, 1 Strategy Card, 1 Troop Card, 1 Weapon Card, 1 Battle Card Each player totals up the Force value of his played cards. The side with the highest value wins.

If tied roll players roll high on 1D6 to break the tie. If the Consul wins, he gains 2D6 PT. If the attackers win, the Consul loses 2D6 PT, Rome loses half its Treasury (Round down) and roll 1D6: On a roll of 1-3 one (non-Latin) Region controlled by Rome regains its freedom. Remove the PT from it from the Map. The Consul chooses which region.

The Region Table

1D10	Region:	Notes:
1	Latins (Revolt)	Civilized
2	Etruscans (Peace)	Civilized; Hellenized
3	Samnites (Peace)	Semi-Civilized
4	Campanians (Peace)	Civilized, Hellenized
5	Gauls (Etruscans)	Un-Civilized
6	Umbrians (Samnites)	Semi-Civilized
7	Messapians (Samnites)	Semi-Civilized
8	Lucanians (Peace)	Semi-Civilized
9	Bruttians (Peace)	Semi-Civilized
0	Tarentines (Peace)	Civilized; Hellenized

Prestige Phase

The Current Consul gains PT equal to the amount of Gold in the Treasury.

Etcetera Phase

All players may discard up to 5 cards from their hands. If the Treasury ever has more than 20 Gold, it immediately loses 1D10 Gold from Corruption.

Losing Battles

A consul may not choose to campaign if Rome lost a Battle the previous turn. This rule may be negated by playing the Recruitment or Conscription cards.

Ally Cards

Ally cards are worth 3 Force if you are currently in the role of that Region. They are worth 2 Force if you are the Consul and Rome controls that Region. Otherwise they are worth 1 Force.

Use Of Cards

Many cards have the "Only" condition. The Consul may use cards specific to non-Roman regions if Rome controls them. For instance, if Rome controls Gaul, the Consul may use the Chariot card.

Victory Cards

These are used to modify the PT gained or lost by the Consul after a Battle that Rome has won. These can be played by any player.

Defeat Cards

These are used to modify the PT gained or lost by the Consul after a Battle that Rome has lost. These can be played by any player. If a Defeat card is played, the entire Treasury is lost.

Peace Cards

These are played by the consul during a Pax Romana Event.

The Game Crafter

Samurai Quest

Introduction

Board game for 2+ players. Each player controls a Samurai adventuring in the countryside.

Victory

Be the first player to accumulate 20 Honor points. If a Samurai ever has wound markers equal to or greater than his Strength Attribute level, he is killed, and the player must start over with a new Samurai.

The Board

The Board is a circular track divided into 36 spaces. Every sixth space is a Fortress.

Attribute:	Notes
Skill	Personal Physical fighting ability
Strategy	Leadership Ability on the Battlefield
Wit	Ability to outwit opponents
Will	Fighting ability vs spirits & resistance to magic
Court	Courtly etiquette
Honor	Deeds befitting a Samurai
Strength	Ability to resist wounds, poison, disease
Command	Number of retainers allowed

Setup

For your Samurai roll 1D6 for each attribute to determine its starting level. Keep track of Attribute levels on a piece of paper. Each Samurai starts at a different Fortress.

Encounter Deck

- The Encounter deck has 4 types of cards:
- F** Foes
 - L** Locations
 - C** Companions
 - I** Items

Turn Sequence

Players take turns. On a players turn he rolls 1D6 and moves that many spaces in either direction. If he lands on an empty space, he draws 1 card from the Encounter Deck.

If he lands on a space with a card, he follows the rules on the card. If he lands on a Fortress space, nothing happens. If he lands on a space occupied by another Samurai, they will Duel.

Figures

Use a miniature or pawn to represent your Samurai.

Dice

Six sided dice (D6) are needed.

Decks

There are 2 common decks: The Encounter Deck, and the Spell Deck.

Attributes

Each Character has 8 Attributes:

Spells

Normal Spell Hand size is zero. Some companions & Items can increase this. At the beginning of your turn fill up your spell hand from the spell deck.

Spells are cast when appropriate. Spells are discarded as soon as they are used.

Encounters

If a Samurai lands on an empty space, he draws 1 card from the Encounter Deck. This card is placed face up on the space. It will remain there until it is destroyed.

If it is a Foe there will be a battle. If it is a Location, follow the rules on the card. If it is a Companion, the Companion will join the Samurai if The Samurai does not already have companions equal to his Command level.

If it is an Item, attach it to your Samurai or a companion. If a companion or Item is not taken, leave it in the space.

Locations

Every time a location is visited roll 1D6. On a roll of 6 the Location card is discarded.

Companions & Items

Companions & Items improve one or more of your Samurai's Attributes or provide some Other special benefit or ability.

Fighting Foes

The Foe will fight using one Attribute indicated on the card. Roll 3D6 & add the Foes level to get the Foe Attack Level Roll 3D6 & add the Samurai's level to get the Samurai Attack Level If the Samurai's Attack level is equal or greater, the Samurai Wins. Discard the Foe and gain 1 Honor Point or 2 Honor Points if The foes initial Attribute level was greater.

If the Foes attack level was higher, the Foe wins. If

the Foe wins, the Samurai must gain 1 Wound marker or lose 1 Companion. The Winning Foe card is not discarded.

Dueling Samurai

If a Samurai lands on a space occupied by another Samurai, they will Duel. The Samurai whose turn it is may choose which Attribute is used in the Duel. Any Attribute may be used except Honor.

Each Samurai rolls 3D6 & adds their level in the chosen Attribute to get an Attack Total. If it is a tie, no one wins. The Samurai with the higher Attack total wins.

The Loser loses 1 Honor. The Winner gains 2 Honor.

Items

A Samurai can only get the benefit from one Katana (Sword) & one Armor at a time.

Encounter Deck Card List

Card Name	Type	Level	Notes
Dojo	L	-	Gain Skill +1

Samurai Warfare

Introduction

Card game for 2-4+ players.

Victory

The first player to amass 5 Victory Tokens (VT) wins the game.

#	Type:	Notes:
1.	Shogun	Noble Leader/General
2.	Terrain	Battlefield Conditions
3.	Samurai	High Class Warriors

Victory Tokens

Players share a common set of Victory Tokens (VT).

Shogun Sword

A toy Katana is used to indicate who the current Shogun is.

Setup

The oldest player gets the Shogun Sword. Shuffle the Deck.

Turn Sequence

Each turn has 7 Phases:

1. Preparations Phase
2. Strategy Phase
3. Tactics Phase

Type:	Effect:
Shogun	Look at next 5 cards in deck and put 1 of them into your hand.
Terrain	Steal 1 random card from target player.
Samurai	Draw 3 cards and discard 2 from your hand.
Ashigaru	Draw 2 cards.
Strategy	Draw 1 card and look at target player's hand.
Special	Target player must discard 1 random card.

Battle Phase

Players take turns playing 1 card each. Cards are played face up to the table in front of their owner. Some cards have Battle Actions as described in the card list. When played in this Phase, the Battle Action immediately takes effect.

This continues until all players have played all cards they possibly can. A Player may have a max of 1 of each card type in play.

The Deck

Players share a common deck. The deck has 6 card types:

#	Type:	Notes:
4.	Ashigaru	Peasant Soldiers
5.	Strategy	Tactics, Plans, Formations
6.	Special	Unusual Circumstances

4. Battle Phase
5. Victory Phase
6. Shogun Phase
7. End Phase

Preparations Phase

Each player fills their hand to 8 cards. If the deck ever runs out, shuffle the discard and draw from it.

Strategy Phase

Each player may discard up to 3 cards and draw replacements.

Tactics Phase

Starting with the Shogun and going clockwise, each player may in turn play (discard) 1 card. The type of card discarded will determine what effect is produced:

Victory Phase

Each player adds up the Force values of all his cards in play. The highest score wins and gains a Victory Token. All played cards are discarded.

Shogun Phase

The winner of the turn gets the Shogun Sword.

End Phase

Players may discard up to 1 card from their hand if they have any cards in their hand.

Top 10 Samurai

San Juan Hill

Introduction

Spanish American War 1898. Card Game for 2 players. One player gets the American deck.
The other player gets the Spanish deck.

The Decks

Each deck is composed of 32 cards. Each card has a name, type, and force value.

Object

- Players play 8 hands.
- If both win 4 hands, the game is a draw, and history unfolds as in the books.
 - If The Americans win 5+ hands, then they take the hill with fewer casualties.
 - If the Spanish win 5+ hands, the Americans suffer a military disaster & retreat.

Turn Sequence

- Each hand (Turn) has 4 phases:
1. Draw Phase
 2. Reserve Phase
 3. Attack Phase
 4. Withdrawl Phase

Card Type Chart

Abbreviation	Meaning
U	Infantry Units
A	Artillery
L	Leaders
M	Morale

Abbreviation	Meaning
E	Equipment
T	Terrain
S	Special

CARD LIST American forces

Unit Name	Type	Force	Notes
Rough Riders	U	5	
Lieutenant Colonel Teddy Roosevelt	L	5	
Artillery	A	2	
US Regiments	U	3	
Infantry	U	3	
Dismounted cavalry	U	2	
Gatling Guns	A	2	
Sims-Dudley dynamite gun	S	1	Eliminate opposing Terrain
Volunteer formations	U	1	

Drawphase

Each player draws up to 8 cards from their own deck. If a deck runs out, shuffle the discard and draw from it.

Reserve Phase

Each player may discard up to 2 cards and draw an equal number of new cards. The American player may discard his Observation balloon card to look at the Spaniard's hand after the Spaniard does reserves, and before the American does.

Attack Phase

Players may play one card, from their hand, of each of the 7 types of Cards listed in the Card Type Chart. The American player may play up to 2 Infantry Units (U). The Spanish player may play up to 2 Terrain cards (T).
Some cards can eliminate others. Discard target eliminated card. Each player adds up the force values of his played un-eliminated cards. The player with the higher force value wins the hand.
Tied hands remain tied. Played cards are discarded.

Withdrawl Phase

Players may discard up to 3 cards from their hands.

Santas Workshop

Introduction

Card game for 2-4+ players. Each player is one of Santa's Elves helping to make toys for Christmas. The Elf who makes the most Toys by games end wins.

Game End

The game ends when there are no cards left in the deck, and all Player's hands are empty.

Victory

The player with the most points worth of cards in his Toy pile at the End of the game wins.

The Deck

The deck has 9 Suites of Toy Cards and 6 special cards. Each Suite has 7 cards numbered 1 through 7. A card's number is its point value.

Setup

Players cut the deck: Highest cut goes first. Each player is dealt 5 cards. Play proceeded clockwise.

Turn Sequence

Players take turns. Each turn has 4 Phases: Draw Phase Event Phase Meld Phase Pass Phase

Card List

Card Name	#
Balls	7
Dolls	7
Toy Soldiers	7
Puppets	7
Sleds	7
Nut Crackers	7

Draw Phase

Draw 3 cards from the deck. If the deck runs out, shuffle the discard and draw from it.

Event Phase

You may play one Special card from your hand. Once played, a Special card is removed from the game. If you play a Coal card, a target player must discard 2 Random cards from his hand.

If you play a Naughty card, steal 2 random cards from A target player's hand. If you play a Nice card, draw 2 cards from the deck and put them in your hand.

Meld Phase

Play one meld from your hand. A Meld consists of 1 or more Toy cards from the same Suite. These cards go to your Toy pile.

Pass Phase

Max hand size is 7 cards. Give excess cards of your choice to the next player clockwise to you.

Satan's Folly

by Dana Darby sz3d@yahoo.com

Introduction

This is a simulation of the War in Heaven from John Milton's Paradise Lost. In it, the forces of Satan fight the forces of God in a battle for control of Heaven before the Son defeats them and they are cast out of Heaven and into Hell.

Contents of rulebook:

1. Map and chits
2. Victory conditions
3. Set-up
4. Unit descriptions
5. Turn sequence-with break down of how to play the game
6. Optional rules
7. Designer notes
1. MAP & CHITS

The following items are needed for play:

1. Hex grid map.
2. Cardboard counters either commercial or home-made from poster board.
3. Dice for all players.
2. VICTORY

Satan player: You must have achieved a moral victory by the end of turn 20 or eliminate all of Heaven's forces first. A moral victory is achieved by eliminating 40 points of power. Keep track of the units killed by the Satan player. On the start of turn 20, if the total

of power from these dead unit equals 40 or more, then Satan has a moral victory.

Force of Good player: Prevent Satan from achieving his goal by the end of turn 20.

3. SETUP

The map should be drawn as follows: Satan's forces assemble in the "Quarters of the North" and build a palace. On the top one third of the map, draw 8 "city hexes" to represent the palace of Satan. The Satan player may place a wall around the entire city. Just draw a dark line around the city hexes. The rest of the map may have forests, hills, plains, rivers and mountains. Each player can take turns drawing a terrain feature on the map or the players can mutually agree on a map before hand.

4. UNIT DESCRIPTIONS

POW Power points

MOV Movement points

C Carry 1 unit

C2 Carry 2 Units

R Ranged Attack up to two hexes away

R3 Ranged Attack up to three hexes away

F These units can fly.

Breach = Unit automatically moves through walls destroying them

Draw the following units on the cardboard counter. Place a mark to represent either Satan or Forces of Good on the counters to avoid confusion, as to whose counter belongs to who.

ANGELIC FORCES (available to both sides)

UNIT	POW	MOV	NOTES
Seraphim	1	3	See designer notes at the end of rules.
Cherubim	2	3	
Thrones	2	3	
Dominions	3	3	
Virtues	3	4	
Powers	3	4	
Principalities	4	4	
Archangels	4	4	
Angels	4	4F	

Note: Each side draws from a pile of 27 chits. Make three chits per type of angelic unit. Alternate drawing the chits until all of them are gone. This will leave one side with an extra chit. Discard that chit so the forces

are equal.

LEADERS (one each of the following) The rebel angels:

UNIT	POW	MOV	NOTES
Satan	6	5F	leader of the rebels
Belial	4	4F	became the god of luxury

UNIT	POW	MOV	NOTES
Beelzebub	4	4F	second in command of the rebels

Leaders of God's forces:

UNIT	POW	MOV	NOTES
The Son	8	6F	became the Messiah, enters on turn 16
Gabriel	5	4F	guardian of Eden
Michael	5	4F	leader of God's forces during the great battle
Abdiel	4	3F	stood up to Satan in Book V and fought in the battle

Available Rebel units

UNIT	POW	MOV	NOTES
Infernal Engines	XR3	1	Power Points = 1D6-1; Reroll for each attack;
	-	-	(5 available)
	-	-	Cannot move & attack on the same turn
	-	-	Available after turn 8.
Lens Towers	3R3	0	Located on edges of city;
	-	-	(4 available)
	-	-	Create deadly beams of Light & Heat
Flying Machines	3	4FC	-
	-	-	(3 available)

Available Divine units

UNIT	POW	MOV	NOTES
Juggernaut	5	2C	Breaches wall automatically
UNIT	POW	MOV	NOTES(5 available)

5. TURN SEQUENCE

Draw Phase Movement Phase Attack Phase Advance turn marker

The following sequence is done in order for each turn. Eight turns equal one day in Heaven. Historically the war was fought for three days.

5-1: Draw Phase

Each player draws to replenish a max hand of 3 spell chits. Unflip and unrotate unit chits from previous turn.

5-2: Movement Phase

Each unit is given a MOV value. This is the total number of movement points the unit has each turn it is in the game. Players take turns moving units until all units have moved once.

Rotate units to indicate that they have moved. Units may move up to a number of hexes equal to their movement rate. Units may move in any direction as long as they pay the movement cost.

Units do not have to use their entire movement allowance. Terrain features may cost more to enter, consult the terrain section for more information. Unless otherwise noted, all units can move at least one hex per turn.

F These units can fly.

5-3: Terrain

Even with penalties the minimum movement rate = 1 hex per turn Clear = Costs 1 Move point to enter City spaces = Costs 2 Move points to enter. +1 Power to defense rolls for defending units Forest = Costs 2 Move points to enter. +1 Power to defense rolls Mountains = Costs 3 Move points to enter. +1 Power to defense rolls Rivers = Separate adjacent hexes. Costs 2 Move points to cross. Units being attacked from across a river get +2 Power to defense rolls. Walls = Separate adjacent hexes. Costs 3 Move points to cross, unless breached, then it costs 0 points. Flyers do not receive move penalties, they can move up to their full MOV value at only 1 point per hex.

5-4: Stacking & Carrying

Only one unit may occupy a space unless it is carrying other units. Carried units attack at -1 Power to a minimum of 1. Carried units cannot be attacked.

If a unit is destroyed all units it is carrying are also destroyed. Units carrying other units cannot be carried.

5-5: Attack Phase

Each unit is given a POW value. This is the total power the unit has when either attacking or defending. Units may attack only once per turn. They may defend as many times as necessary. Players take turns

attacking target units until all units have attacked.

Units may combine their attacks against a single target. Units can attack targets in an adjacent hex. Units with ranged attacks can target defenders within two hexes.

The attacker rolls 1D6 for every point of power used in the attack. This is the attack roll. The defending unit rolls 1D6 for each of its power points. This is the defense roll. If the attackers total is higher, the target is destroyed, otherwise the defender survives.

Spells may contribute power points to the attackers or the defenders. Flip units to indicate that they have attacked or cast spells. NOTE: Remember to add any power points from terrain if defending or any points from spells cast.

Example: A unit with a POW of 3 attacks a unit with a POW of 4.

- The attacker rolls 3 dice and gets a 3, 2, 5 for a total of 10.
- The defender rolls 4 dice and gets a 4, 3, 3, 1 for a total of 11.
- The defender survives. The attacker flips his unit over to show that it has attacked this turn.

5-6: Spells

The spell pile mix should be 1 chit for each of the spells listed below. A leader can cast one spell per turn. Each player has a hand of 3 spell chits they replenish in Draw Phase.

A player casts a spell from his hand through a leader unit he controls. Once spells are cast they are discarded unless they are to be used as markers. Unless otherwise noted spell have a range of 2 hexes.

Spells- Notes

- Shield- Unit gets +3 Power Points on Defense roll. Cast at beginning of Attack phase
- Haste- Unit gets +2 Move Points. Cast at beginning of move phase
- Fly- Unit Flies at Move Points = 4 this turn. Cast at beginning of move phase
- Aid- Unit gets +2 Power Points. Cast at beginning of Attack phase
- Inspire- All adjacent friendly units get +1 Power points this turn. Cast at beginning of Attack phase
- Rage- Unit gets +3 Power Points on Attack roll. Cast at beginning of Attack phase
- Fireball- Range = 2 attack for 4 Power Points
- Lightning Bolt- Range = 3 attack for 3 Power Points
- Invulnerability- Unit cannot be Destroyed. Cast at beginning of Attack phase
- Negate- Negate the effect of spell just cast within 3 hexes
- Mesmerize- All adjacent enemy units cannot attack. Cast at beginning of Attack phase
- Winds- Negate all nonmagical ranged attacks against target. Cast before Defense roll made

- Wall of Fire- No unit may enter 1-3 adjacent target hexes targeted by caster within 3 hexes of caster. Cast at beginning of move phase
- Earthquake- 3 Adjacent hexes within 3 hexes of caster. Ground units in these hexes attacked for 2 Power Points
- Poison Gases- Unit -2 Power Points. Cast at beginning of Attack phase
- Summon- Move any Friendly unit from anywhere adjacent to caster
- Teleport- Caster or Friendly unit adjacent to caster can move to any empty hex
- Control- Take control of unit this turn. Cast at beginning of Attack phase
- Fear- Move enemy unit. Unit cannot end move adjacent to one of your units. Cast in move phase before unit moves

6. OPTIONAL RULES:

Command control: Units cannot move or fight unless they are within 3 hexes of a friendly leader. It is recommended that you get some experience first with the game before you try this rule.

No spells: Eliminate the spell rules. This will make the game more like a regular wargame and less "colorful."

Prince of Lies: The Satan player must recruit his forces before the game. Each angelic unit will follow Satan on a roll of 5 or 6 on a 6 sided die. The Satan player can add 1 to the die roll up to a maximum of 6 times.

This will simulate the fact that he can make an extra effort to get some classes of angels over other classes.

7. GAME DESIGNERS NOTES

The information for this game from Books V and VI of Paradise Lost. Additional sources were consulted for information on the units involved. Historically this battle is lost by Satan on the third day when the Son casts him and his followers out of Heaven after a crushing defeat in which Satan's cannons are buried under mountains.

Here is a run down of the events in the book: Day One: Both sides meet on a plain outside Satan's palace in the "Quarters in the North." They both form a giant phalanx and advance on one another. Michael cleaves Satan's right side off and Satan and his followers retreat.

Day Two: After a council of war, Satan decides to build cannons or infernal machines to fight with. These cannons take Michael by surprise and wreak havoc on Heaven's forces. Then they regroup and throw mountains on top of the cannons to bury them.

Day Three: The Son arrives per God's will and rides a chariot into battle and defeats Satan and his forces. The rebels retreat to the Gates of Heaven and are cast out.

The main problem with this game is the lack of detailed information. We are told that the forces line up in a classic Greek style formation and face off. But there are also chariots and cannons and some Roman style tactics.

But not much in the way of detail. We are not told exactly what the angels are capable of doing in a fight, so much of this is speculation. Consulting the internet for information, we find that the angel are grouped by "choirs" and that there are nine classes of angels. Hence the angelic units in the game. The combat capabilities are purely arbitrary and were done to provide favor between the classes. The spells were added to

give the leaders added ability against the "common angel" and can be considered an optional rule if need be. The extra "non-angelic" units are added to make the game more fun. The infernal engines are , of course, historically accurate, the rest is speculation.

Book VI

Satsuma Rebellion

Introduction

Card Game for 2 players. Theme: The Satsuma Rebellion in Japan in 1877. The Modern Imperial Army destroyed the last of the Samurai.
One player is the Samurai. The other player is the Imperial Army.

Victory

The game ends when the Samurai player has accumulated 9 Casualty Markers. At that point, the last of the Samurai have been wiped out. Victory is a function of how many casualties the Samurai were able to inflict on the Imperials.

Imperial Casualties:	Victory:
7 or less	Greater Imperial Victory
Exactly 8	Historically Equivalent
9 or more	Greater Samurai Moral Victory

Terminolgy

The terms hand and turn are equivalent.

Strategy Phase

Each player may discard up to 3 cards and draw replacement cards.

Casualty Markers

Players start with no Casualty Markers. The loser of every hand gains 1 Casualty Marker.

Attacker & Defender Rule

One player is the Attacker and the other is the Defender. In the first turn of the game, the Samurai player is the Attacker. On all subsequent turns, the player who won the previous hand is the attacker.
One exception to this is the Escape rule: If the Samurai player used an Escape card the previous hand and won the hand, he remains the defender.

The Decks

- There are 2 decks:
1. The Samurai Deck
 2. The Imperial Deck
- Each card has a Strength value. There are 8 suites:
1. Force
 2. Reserves
 3. Leader
 4. Attack
 5. Defense
 6. Morale
 7. Weapons
 8. Escape

Clash Phase

Players reveal their hands. Each card has a Strength Value. Each player adds up the Strength values of all his Useable cards.
A player may only use 1 card from each suite. The Attacker may not use Defense cards or Escape cards. The Defender may not use Attack cards.
The player with the highest total Strength is the winner. The loser gains 1 Casualty Token. If tied, both players gain 1 Casualty Token and both retain Their Attacker/Defender status for the next turn.
All cards are discarded at the end of the phase.

Setup

Players pick who will be the Samurai and who will be the Imperials. Players shuffle their respective decks.

Card List Notation

- F** Force
R Reserves
L Leader
A Attack
D Defense
M Morale
W Weapons
E Escape

Turn Sequence

- Each turn has 3 Phases:
1. Logistics Phase
 2. Strategy Phase
 3. Clash Phase

Logistics Phase

Each player draws 7 cards from their own deck. If a deck ever runs out, shuffle the discard and draw from it.

Scooby Doo Mystery Game

Introduction

Solve Mysteries with Scooby Doo & the gang of Mystery Inc. Card game for 2+ players.

Disclaimer

Scooby Doo is a licensed, trademarked, copyrighted property. This is merely a fan site.

Winning

The first player to solve 3 Mysteries is the winner.

The Deck

Players share a common deck

Setup

Shuffle the deck. The youngest player goes first.

Turn Sequence

Players take turns. Each turn is divided into 4 phases: Mystery Phase Find Clues Phase Chase Phase Capture Villain Phase

Mystery Phase

Lay the top eight cards of the deck face up on the table. These are known as clue cards.

Find Clues Phase

Players (starting with the current player) take turns taking one clue card and Putting it into their hand. Continue until all 8 clue cards are taken. Max hand size is 13 cards. Discard excess cards. Special cards take effect (played & discarded) as soon as they are picked.

Chase Phase

Any player may discard 2 of a kind from their hand to draw 2 cards from the top of the deck and put them into their hand.

Capture Villain Phase

Any Player may solve a Mystery. To solve a Mystery, you must play from your hand the following combination of 7 cards: 1 Scooby card 1 Shaggy card 1 Fred card 1 Velma card 1 Daphne card 1 Villain card 1 Location card

Card List

Card Name:	#	Type
Scooby Doo	8	Scooby (Character)
Shaggy	8	Shaggy (Character)
Freddy	8	Freddy (Character)
Daphne	8	Daphne (Character)
Velma	8	Velma (Character)
Zoinks	1	X = Opponent must discard 1 random card
Scooby Snacks	1	X = Draw 2 cards
Mystery Machine	1	X = Draw 3 cards and discard 2
Jeepers	1	X = Opponent must discard a Character card
Mystery Club Convention	1	X = Take a Location clue card & go again
The Van Breaks Down	1	X = Opponent must discard a Location card
Scrappy Doo	1	X = Counts as Velma & Fred
Gypsy Woman	1	X = Look at next 8 cards in deck & go again
Secret Identity	1	X = Opponent must discard a Villain card
Velma loses her glasses	1	X = This card does nothing
The Malt Shop	1	X = Discard all Character Clue Cards
Best Pals	1	X = Counts as Scooby & Shaggy
Chase Scene	1	X = Counts as any card type for Chase Phase

Card Name:	#	Type
Pull off the Mask	1	X = Draw a card & go again
The Girls	1	X = Counts as Daphne & Velma
I have a Plan	1	X = Take 2 Clue Cards

X Special

Score

Introduction

Scenario for WarpQuest. for the [Warpquest Core Rules](#)WarpQuest Core Rules. Each player takes the role of a teenager looking to "Score" on a Saturday night.

Variant Rules

There is only one Module. There is no Artifact. The journey on the board is a one way trip.

Spaces on the board represent time not distance. There are 6 types of challenges: Alcohol, Sex, Drugs, Music, Trouble, Fight Each player starts with 6 skills. If a card lists two types pick one.

If you fail the challenge discard the card (no one gets wounded or killed). If you win the Challenge, keep the card. The player with the most cards in the most challenge types wins.

If you win a "fight" with an opponent take any one of his cards.

Skill Table

1D6	Skill	Notes
1	Stupidity	+1 to Trouble Challenges
2	Smooth Talking	+1 to Sex Challenges
3	Tough Guy	+1 to Fight Challenges

Game Designers Notes

Aspirations of my younger days... My "Score" was never that high :)

Scortch

Introduction

Module for the Warp Empires system. You must use the Warp Empires system to play this game. Based on the animated film WIZARDS by Ralph Bakshi.

Wizards is a trademarked, licensed property. This is merely a fan site. One player is the good Wizard Avatar. The other player is his evil brother Blackwolf.

Both battle for world domination. On Avatar's side is Magic, Elven Races, and Faerie Folk. Blackwolf's armies are filled with Mutants, Demons, and Ancient Technologies.

Scortch

Location	Type	Notes
Black World Mountains	H	North
Glass Wastes	H	South
Bogs	D	West
Steam Lake	X	West
Cnidair River	D	West
The Spine Mountains	H	Southeast
The Crypts of Doom	2	Scattered
The Greater Crater	X	Central
The Glass Wastes	H	Central
The Black River	H	West Central; Terrible Smell
The Hot Lands	H	East & Central
The Great Depression	H	North Central
Hellmouth	2	North; One Demon unit per turn costs -1
Scortch-1	3	Capital city; Blackwolf's starting Location
Skir	0	Fishing Village; Faerie sympathizers
Theca	0	Village; Hunters & Trappers; Faerie sympathizers
Queenston	1	City; One Technology unit per turn costs -1
Phyte	1	City; On the Black River
Accked	1	City; One Mutant unit per turn costs -1

Montagar

Location	Type	Notes
City of Montagar	2	Capital City
Breeding Wye	2	Mining Town; One Dwarf unit per turn costs -1
Rana Bottom	1	University Town
Seaport	2	Coastal Town
Summer Home	0	Town; Avatars Starting Location

Map

The land of Halcionia is divided into two main areas: Scortch and Montagar. Scortch is southeast of Montagar. Note: Rivers may cross multiple spaces.

Location Types

- 0-3+** Revenue generated by the site
- H** Hostile terrain: Units must stop when entering this space
- D** Difficult terrain: Units must stop when entering this space
- X** Barrier: No units may enter this space

Location	Type	Notes
Perthswale	2	Trading Town
Wendl	1	Trading Post
Blossom	1	Faerie Town
Toothache Mountain	H	East: Runs North South
Footprint Lakes	D	North
Salamander River	D	Surrounds the city of Montagar
Novay Onwl River	D	Central
Lostwoods	D	Central
No Return	H	Cliffs; Borders Scortch
Whisper Falls	D	One Faerie unit per turn costs -1
Western Highlands	D	Southwest
Faun's Shoulder	0	Landmark for sailors
Fog Dragon Downs	D	North
Ariath River	D	Bridged in several places

Victory

Blackwolf must destroy all opposing units to win. The Avatar player automatically wins if Blackwolf is destroyed.

Setup

- The Evil player starts with Blackwolf and 15 random units.
- The Evil player distributes his units throughout Scortch.
- The Good player starts with Avatar and 7 random units.
- The Good player distributes his units throughout Montagar.

Action Deck

Players have seperate action decks.

Revenue Phase

You cannot generate income from enemy cities. (You only deprive your opponent of the income.)

Blackwolf Unit List

Unit Name	#/Speed	Type	Force	Notes
BlackWolf	1F	L	15	Wizard
Lich General	2F	L	10	Demon
Demon Warlord	1F	L	8	Demon Armies get Force +1
Demon Technomage	2F	L	5	Technology units get Force +1
High Mutant Officers	4M	L	6	Mutants
Toadies	2M	A	3	Mutants
Low Mutants	4M	A	3	Mutants
Reich Henchmen	2M	A	4	Mutants

Recruit Phase

Montagar units may start in any non-hostile, non-difficult space in Montagar. (Their populations are spread out) Scortch units must start in Scortch-1 (the City)

Move Phase

Flyers can move up to 4 spaces. Flyers can jump over enemy units, hostile and difficult terrain.

Battle Phase

Towns & Cities give defending units +1 Force each.

Bewilder	1	Battle: Spell; Opposing armies get Force -2
Scouts	1	Look at top 5 cards of opponents deck
Breakdown	1	Battle: Discard opposing Technology Card
Weather Dragon	1	Look at top 4 cards of opponents deck & discard 2
Rescue	1	Search Unit pile for a Leader and put it in play
East Elfland	1	Recruit an Elf unit for Free
Blue Elf Saboteurs	1	Opponent gets -3 Revenue this turn
Use Captured Weapons	1	Battle: Armies get Force +2
They've Killed Fritz!	1	Discard opposing Mutant Army
Fight the Good Fight	1	Recruit a unit for Free
Felsing the Wise	1	Look at Opponents hand
Scouts	2	Look at target Stack

Note: Only Wizards, Mages, Elf armies & Faerie armies can cast spells.

Warp Empires Ruleset

Introduction

Generic ruleset for a series of empire building/conquest games.

Map

The map depicts an irregular, interlocked set of territories.

Control Markers

Use chits to represent control markers.

Units

Use chits to represent units. Units include Leaders & non-leader units.

Deck

Players share an action deck. In some games, each player will have their own action deck. The action deck cards allow you to move your units.

Setup

Most Leader units will be in play. Others will be mixed into the unit chit pile. Each player will start with several non-leader units in play.

Starting points of units will be determined by the scenario.

Turn Sequence

- Players take turns. Each turn has 7 phases:
- Draw Phase

- Move Phase
- Battle Phase
- Revenue Phase
- Recruit Phase
- Upkeep Phase
- Control Phase

Draw Phase

First discard any cards you don't want. Each player draws 5 action cards. Max hand size = 7. Discard excess cards.

If the deck runs out, shuffle the discard and draw from it.

Move Phase

Use Action cards to move stacks or units in stacks. A Fast unit can move 1-3 spaces. A Medium speed unit can move 1-2 spaces.

A Slow unit can move 1 space. Units can move into but not through opposing stacks. Fortifications cannot move (Move = 0).

Your opponent can only look at the top unit of your stacks

Battle Phase

When two opposing stacks occupy the same territory there will be a battle. Each unit has a force value. Add up the total Force values for each side.

Players may play action cards to increase their force value. If one stack has a Leader and the other does not, the stack with the leader gets an additional 5 Force. The side with the highest force value wins.

The losing stack must retreat one space. The losing stack loses half of its units. The winner picks the first unit lost, the loser picks the remainder. Fortification units in the losing stack are destroyed automatically.

The winning stack loses units with a force equal to at least half the force total lost by the losing stack. The

winner decides which units are lost. Destroyed units are returned to their chit pile. Captured leaders are set aside and not returned to the chit pile.

After a battle both sides replenish their hands to 7 cards.

Revenue Phase

Gain revenue points for every revenue generating territory you control.

Recruit Phase

Draw 5 random units from the unit chit pile. Purchase units. A units cost is equal to its Force value. If you purchased all the drawn units, draw another 1D6 random units.

Revenue may be saved from turn to turn. Discard unpurchased units back to your unit chit pile. Units start in any revenue generating territory you control.

Upkeep Phase

Number of Units that automatically receive upkeep = 5 x total Revenue. Discard excess units. Example: You generate 10 revenue points per turn...

You may have up to 50 units.

Control Phase

Place a control marker on every revenue generating territory occupied by one of your units. Only one control marker per space.

Unit Deck Abbreviations

S Slow

M Medium speed

F Fast

F Force

F Fortification

Number of that unit in the chit pile.

Sea Battles

Abstract WWII Naval Strategy Game

Ship Types

#	SHIP	MAX	MAX	MAX	MAX	-	-
SHIPS	TYPE	HITS	MOVE	RANGE	DAMAGE	ATTACKS	NOTES
1	PT Boat	1	6(x2)	1	6	1	Torpedo
1	Submarine	2	3	2	6	1	Torpedo, Underwater
2	Destroyer	3	5	3	3	1	
1	Frigate	4	4	4	4	1	
1	Cruiser	5	4	4	5	2	
1	Battleship	6	3	5	6	2	
1	Carrier	6	3	4(x2)	6	3	

Battlefield Map

Use an 8 x 8 or larger square or hex map. All ships can move and shoot vertical and horizontal but not diagonal. Each side starts with 1 of each ship and 2 destroyers for a total of 8 ships.

Turn Sequence

1. INITIATIVE- Roll high to see who goes first
2. COMMAND ROLLS- Roll 6D6. These scores are the players command rolls for this turn. A roll cannot be used for less than its value
3. MOVE- Use up a command roll to move a ship that many spaces in one direction
4. ATTACK- Use up a dice roll to set the Range of the attack and another to determine the Damage in Hits Inflicted

Sample Move

A player rolls 1, 3, 3, 4, 6, 6. He moves a destroyer forward 1 space (He could have used a 3 or a 4, but not a 6; The maximum move of a destroyer is 5) He removes the die showing 1. He Fires to the right at a range of 3 (Maximum range for a destroyer is 3) and hits a battleship for 3 Damage. He removes both dice showing 3's. The Battleship is reduced to 3 Hits for the rest of the game (He would have liked to do 6 damage which would sink the battleship, but the maximum damage a destroyer can do is 3). He uses the roll of 4 to move his cruiser to the left. He is unable to use the two rolls of 6 for anything useful so they are wasted.

Terrain

On the Sea map mark several spaces as land obstacles. Ships cannot move over land but they can shoot over it. Torpedo attacks cannot be made over land.

Pt Boats

Fast and maneuverable, PT Boats can move twice in a turn. Example: A player uses a command roll of 6 to move the PT forward 6 spaces and a second roll of 2 to move it left 2 spaces.

Submarines

Since they are underwater and hard to detect, other boats can only attack subs if they right next to them, range = 1.

Carriers

Attacks (Up to 3 per turn) made by carriers are really made by their fighters and bombers which have much longer ranges than ship artillery. 2 command rolls can be used to determine the range of the attack. Example: A roll of 3 and a roll of 4 can be combined to hit a ship 3 to the left and 4 back. (4 is the max for either roll)

Objective

Completely destroy all enemy ships.

Variants

Increase the number of ships per side. Roll 4D6 instead of 6D6. Allow diagonal movement and attacks. Destroy opponents carrier to win. Rolls of 6 can be used to repair 1 point of damage.

Counter Set

The following amazing counter set was created by Janne Thorne: jan.thorne@mail.bip.net Janne has also

made counters and cards for Blitz, Midway, & Cannonade.

??[Download Sea Battle Counters](#)

Sea Intercept

Introduction

Card game for 2 players. Modern Naval Warfare Theme.

Game End

The game ends when a player goes to draw a card, and there are no cards left in the deck.

Victory Conditions

The player with the most deployed units at the end of the game wins. Bases & Carriers count as 2 units each.

The Deck

Players share a common deck. There are 4 types of cards mixed into the deck: Unit, Detect, Attack, Counter

Setup

Each player is dealt 9 cards. Determine who goes first.

Turn Sequence

Players take turns. Each turn has 7 phases:

1. Reserve Phase
2. Deployment Phase
3. Mission Phase
4. Detection Phase
5. Attack Phase
6. Counter Phase
7. Orientation Phase

Reserve Phase

The active player draws 3 cards. Max hand size is 9 cards. Discard excess cards.

Deployment Phase

The active player may put up to 2 unit cards from his hand into play. Units put into play are put face up in front of the player. A player may put Attack, Counter, and Detection cards in play face down, under units that can use them.

Unit Card List

Cards stacked under units are called Option cards. Note that deployed units stay in play from turn to turn for the rest of the game unless that unit is destroyed.

Mission Phase

If your opponent has no units in play, he must discard 1 random card and you may draw 1 extra card from the deck. The active player decides if he wants to attack a target unit of his opponent. If a unit is chosen, this unit is the defender.

The active player picks which of his units is attacking. This unit is the attacker.

Detection Phase

The active player must play a Detect card that can be used by the attacker, and that can target the defender. The Detect card can come from the players hand, or be one of the attackers option cards.

Attack Phase

The active player must play an Attack card that can be used by the attacker, and that can target the defender. The Attack card can come from the players hand, or be one of the attackers option cards.

Counter Phase

The opposing player may play a Counter card that can be used by the defender, and that can target the attacker, the attack card, or detect card. The Counter card can come from the opposing players hand, or be one of the defenders option cards. If no Counter card is played, the defender and all its options are destroyed (discarded).

If a counter card is played, the defender survives and remains in play. All Detect, Attack, and Counter cards played are discarded after being played.

Orientation Phase

The active player may attack with a second unit repeating the mission, detection, attack, and counter phases. The turn ends when the active player has no more units he can or wants to attack with.

Search For El Dorado

Introduction

Card game for 2+ players. Search for El Dorado Theme.

Victory

The player with the most Discovery points at the end of the game wins.

End Game

The game ends when the deck has been run through twice.

The Deck

Players share a common deck. There are 6 card types: Leaders Followers Motivation Search Hazards Discovery

Setup

Shuffle the deck. Each player is dealt 7 cards. Flip a coin to see who goes first.

Turn Sequence

Players take turns. Each turn has 4 Phases:

1. Passage Phase
2. Legend Phase
3. Expedition Phase
4. Search Phase

Passage Phase

If you already have exactly 7 cards in your hand, you may Discard your entire hand.

Legend Phase

Fill your hand to 7 cards. The first time the deck runs out, shuffle the discard and draw from it.

Card List

Name:	Type:	Notes:
Lake Guatavita	D	DP = 1
Muisca Tribe	D	DP = 1
Golden Temple	D	DP = 2
Sacred Lake	D	DP = 1
Rich Gold Mine	D	DP = 2

Expedition Phase

You may play an expedition. An Expedition consists of a meld of 3 cards: 1 Leader, 1 Follower, and 1 Motivation Stack these in a staggered pile face-up in front of you. Place 3 Tokens on top of the Expedition.

The Expedition stays in play until it is destroyed, or It makes a Discovery.

Search Phase

For each of your expeditions in play, pick 1 card from an Opponents hand. Depending on what you draw:

1. Discovery: Place the Discovery card in your Victory Pile:

It counts towards winning the game: Discard the Expedition.

2. Hazard: Discard it. Remove one Token from the Expedition.

If the Expedition has no Tokens, it is lost: Discard the Expedition.

3. Search: Discard it. You may pick again.
4. Motivation: Remove one Token from the Expedition and Pick again.
5. Leader: Discard it. Look at one opponents hand.
6. Follower: Discard it. Look at the next 3 cards in the deck.

Sector Control

Introduction

Board and Card game for 2-4 players. Space Conquest Theme.

Victory

The first player to amass 500 Victory Points (VP) is the winner.

1. Economic Sector	OOTSG Economic Bonus +1 FECF
2. Research Sector	OOTSG Research Bonus +1 FECF
3. Military Sector	OOTSG Military Bonus +1 FECF
4. Espionage Sector	OOTSG Espionage Bonus +1 FECF
5. Exploration Sector	OOTSG Exploration Bonus +1 FECF
6. Culture Sector	OOTSG Cultural Bonus +1 FECF
7. Logistics Sector	OOTSG Hand Size +1 FECF. Also Draw Bonus +1
8. Strategic Sector	OOTSG +2 VP in Control Phase FECF
9. Hazard Sector	No one may build Colonies in this Sector

OOTSG = Owner of this Sector gets
FECF For each Colony Present in the Sector.
Sectors that share a side are adjacent. Sectors diagonal to each other are not adjacent.

Colony Counters

Each player get a set of counters of a unique color. These represent his colonies. Colonies can be built and destroyed, but they cannot be moved.

Occupation And Control Of Sectors

If you have at least 1 Colony in a sector you are said to occupy it. If you have more Colonies in a sector than any other player, you are said to Control it. The terms own and dominate can also be used. If 2 or more players occupy a sector and no one controls it, the Sector is said to be disputed.

Victory Points

Players record VP they accumulate with paper and pencil.

Random Advance Table

1D6	Attribute Level Increase:
1	Exploration +1
2	Economics +1

Sector Map

The map is a 6 X6 grid composed of 36 Tiles. Tiles are also referred to as Sectors and Spaces. There are 9 types of Tiles and 4 Copies of each:

Civilization Attributes

Players have levels in 6 attributes: Exploration Economics Culture Military Espionage Research Players start with a base level = 0 in each attribute Use paper and pencil to keep track of attribute levels

Dice

Six sided dice (D6) are needed

Setup

To set up the Map, shuffle the tiles and randomly draw them out of a pile One at a time, forming a 6 X 6 grid one row at a time. Hazard Spaces may not occupy corners. Each player starts with 3 Colonies in one corner Sector of the Board.

Each player rolls 6 times on the Random Advance Table Each player selects a colored set of colony counters. Each player names his race/civilization. Players roll high on 1D6 to see who goes first

1D6	Attribute Level Increase:
4	Military +1
5	Espionage +1

1D6 Attribute Level Increase:

3 Culture +1

Turn Sequence

Players take turns Each turn has 5 phases:

1. Logistics Phase
2. Trade Phase
3. Action Phase
4. Control Phase
5. End Phase

Logistics Phase

Draw 3 cards from the top of the deck and add them to your hand. If the deck ever runs out, shuffle the discard and draw from it. Occupation of Logistics Sectors allows you to draw 1 extra card for each such Sector you occupy.

Trade Phase

All players may trade cards with each other. Limit this to 2 minutes.

Action Phase

You may make one or more Melds. A meld consist of two or more cards with the same Attribute (plus your level In that attribute) giving a combined level of 20 or more. (For example: Lets say you are trying to make a Military Meld: You have a Military level = 5 and you have the Empire card = 10 and The Fleet Action card = 8 for a combined score = 23) Discard the cards of a Meld after it is made.

Exploration Meld

An Exploration meld lets you put a new colony in a Sector where you do not Already have a colony. It must be adjacent to a sector you already occupy.

Economics Meld

An Economics Meld will allow you to gain an extra Colony in any one Sector you already occupy. There is

Espionage Table

1D6	Action	Notes
1	Infiltration	Look at opponent's hand and steal 1 card of your choice
2	Compromise	Opponent must discard his entire hand
3	Neutralize	Opponent must skip his next Action Phase
4	Insurrection	Steal 1 target Colony (Like a Cultural Meld)
5	Sabotage	Destroy 1 target Colony anywhere
6	Secret Agenda	Draw 4 Cards

Control Phase

Gain 1 VP for every Colony you own. Gain 2 VP for every Sector you occupy. Gain an additional 1 VP for every Sector you dominate.

1D6 Attribute Level Increase:

6 Research +1

no limit to the number of colonies that may be in one sector.

Military Meld

A Military meld will destroy all enemy colonies in any one Sector you occupy or in a Sector adjacent to a Sector you occupy. Remove those colonies from the Board. To prevent this, your opponent may immediately play a Card-only defensive Military Meld with a level of 8 or higher.

Alternatively, you can use a Military Meld to transport 1 Colony to an adjacent sector. You may both move the colony to a sector you don't already occupy and you may completely abandon one you do.

Cultural Meld

A Cultural Meld will cause you to take control of one enemy colony in Any one sector you occupy. Remove the colony counter and Replace it with one of your own. To prevent this, your opponent may immediately play a Card-only defensive Cultural Meld with a level of 8 or higher. Alternatively, a Cultural Meld can be used to gain 5 Victory Points.

Research Meld

A Research Meld allows you to make 1 roll on the Random Advance Table. These rolls permanently increase your levels in those Attributes.

Espionage Meld

An Espionage Meld will allow you to make one roll on the Espionage Table. To target an opposing player, you must share at least 1 sector with him. To prevent the results of an Espionage Roll, your opponent may immediately Play a defensive Espionage Meld with a level of 12 or higher.

Alternatively, an Espionage Meld can be used to search the deck for any one Card, and put it in your hand.

End Phase

Max hand size is 8 cards. Max Hand size is increased by 1 for each colony you have in a Logistics Sector. Discard excess cards.

Automatic Melds

If by Research bonuses and colony bonuses alone you have a total bonus of 20 or more in an attribute, you get 1 automatic Meld every turn for that attribute. Bonuses above 20 apply to a second Meld each turn. For example if you were +25 in Espionage, you would

get 1 automatic Espionage Meld each turn and +5 towards a second Espionage Meld each turn.

Sector Tiles Prototypes by Jimmy

Sengoku Alliance

Introduction

Board and card game for 2-8+ players. Theme: Sengoku Period of Japan.

THE MAP Board The Board depicts a map showing Provinces in Medieval Japan Each province is given a red number that denotes its Victory Point Value. Provinces with colored dots are the Homelands of the six clans. Blue lines indicate connections between

Provinces separated by Water.

The 15 numbered track on the bottom is used to keep track of what Round it is. The six large dots are used to stack Honor Tokens for each of the six clans.

Clans

There are 6 Clans:

#	Clan:	Token Color:	Starting Province:
1.	Shiba	Red	Red Dot
2.	Hatakeyama	Blue	Blue Dot
3.	Hosokawa	Green	Green Dot
4.	Yamana	Yellow	Yellow Dot
5.	Ouchi	Orange	Orange Dot
6.	Akamatsu	Black	Black Dot

Clan Tokens

Each Clan has a set of Tokens of a unique color. Set size is not limited. These are used to indicate control of Provinces.

Honor Tokens

There is a set of White Honor Tokens used by all the Clans.

Castle Tokens

There is a set of Brown Castle Tokens used by all the Clans.

Round Marker

This is placed on the 15 numbered track on the bottom of the map to keep track of what the current Round is.

The Decks

There are 2 Decks:

1. The Faction Deck
2. The Battle Deck

The Faction Deck

There are 3 cards for each Clan in the Faction Deck.

The Battle Deck

The battle deck has 60 cards. The deck has 1 copy of each card described in the card list.

Setup

Shuffle the Decks. Place the Round marker on the #1 of the Round Track. Each Clan gets 4 Honor Tokens stacked on the Colored Spots on the Board.

Each player gets 4 Honor Tokens. Place a Clan Token in each Home Province with a matching color. Each Home Province gets 1 Castle Token.

Each player draws 3 cards from the Faction Deck. (If there are 8 players, draw 2 cards instead) These cards are your Allies. If you have 2 Faction cards of the same Clan it is a Double Ally.

If you have 3 Faction cards of the same Clan it is a Triple Ally. Players keep their Ally Identities secret from each other. Each player is dealt 2 cards from the Battle Deck.

Place 1 Token for each Clan on their Starting Location as indicated by the colored dots on the Map. Draw straws to determine who is first Shogun.

Turns, Rounds, & Shoguns

A round is when all players have taken 1 turn. The Shogun Player goes First. Play proceeds clockwise.

At the beginning of a New round, the player to left of the last Shogun becomes the new Shogun. Use a special Token to indicate who is the Shogun. The Clan with the most Provinces at the end of a Round gains 2 Honor Tokens.

Turn Sequence

Players take turns. Each turn has 4 Phases:

1. Muster Phase
2. Intrigue Phase
3. Conquest Phase
4. Honor Phase

Muster Phase

Draw 5 cards from the Battle Deck and put them in your hand.

Intrigue Phase

Event cards are played in this Phase.

Conquest Phase

You may play 1 or more Melds. A Meld consists of 1 or more Clan cards of the same clan and up to 1 Daimyo card and 1 Samurai card. Add up the Force value of all the cards in the Meld to get a Total Force value.

You may take control of adjacent Provinces with a total Province value equal or less than the Total Force value of the Meld. Note that these provinces are conquered one after the other, thus (generally) increasing the number of adjacent provinces. For example: Lets say you had a Total Force value of 7. You could take control of a province of value 3 and then another two of value 2 each. Provinces with Castles require 2 extra Force to Conquer.

Any opposing player may play a Defense Card from his Hand to prevent certain Clans from being attacked or to eliminate Samurai and Daimyo cards from Melds. A Clan that loses its Home Province gives 1 Honor Token to the Clan that took it. When a Clan conquers a Province place one of its Clan Tokens on the map in that province and remove any Clan Token that was already there.

A Province may have a maximum of 1 Clan Token on it.

Hosokawa	C	5	
Yamana	C	1	
Yamana	C	2	
Yamana	C	3	

Honor Phase

Max hand size is 2 cards. Discard excess cards.

Rebel Return Rule

If a Clan is completely removed from the board, they may come back at any time by attacking with a Meld of that clan into either their own Home Province, or any other Province that is not the Home Province of an Opponent (or adjacent to one).

Game End

A Full game ends at the end of 15 Rounds. Players may agree to a shorter (or even a longer) game.

Victory

At the end of the game, the player with the most Victory Points wins. A Player gets Victory Points equal to the value of the Provinces occupied by the Clans he is allied with according to his Faction cards. He also gets VP for each Honor Token he and his Allies have. A double ally scores double, and a triple Ally score triple.

Treachery	V	-	Draw 1 Faction card and Discard 1 Faction card
Betrayal	V	-	Draw 1 Faction card and Discard 1 Faction card
Spy	V	-	Look at one Random Faction card of Opponent
Geisha	V	-	Look at one Random Faction card of Opponent
Poetry	V	-	Target Clan gains 1 Honor Token
Literature	V	-	You gain 1 Honor Token

The Treaty Card

The attacker may break the treaty, and attack anyway, if so, the attacking Clan loses 1 Honor Token. If the Attacker abides by the Treaty and does not attack or attacks a different Clan, the Clan gains 1 Honor Token.

The Attacker may use his Meld to attack a Different Clan at no penalty.

The Ninja Card

The player who plays this card loses 1 Honor Token.

The Ransom Card

The attacker may break the treaty, and attack anyway, if so, the attacking Clan loses 2 Honor Tokens.

The Duel Card

The Attacker may decide to not discard his Samurai card. If he does not, he must discard 2 Honor Tokens.

The Honorable Wife Card

This cannot be used to target a Clans Home Province or last remaining Province.

The Rebel Monks Card

This cannot be used to target a Clans Home Province or last remaining Province.

Card Set Map

BGG Link

Seven Samurai Skirmish

Introduction

Simple tactical skirmish rules. Based on the classic movie Seven Samurai.

Counters

Use cardboard counters to represent: Men, Horses, Guns, Armor, Wounds.

Victory

The Bandits win if all the Samurai are killed. The Samurai win if the Leader, lieutenants, and 15 bandits are killed. The remaining bandits will flee.

The Map

Use a hex map. The map is of the village and its immediate surroundings. The village is a maze of 20 houses and a few other structures (Well, fences).

A stream borders one side of the village. The terrain outside the village is a mix of clear and forest plus a few outlying houses.

Stacking

Units may not stack.

Terrain Types

*Clear *Forest: Units in forest cannot be shot at except by adjacent units. Units cannot shoot through

Unit Stats

Type:	Force	Move	Notes
Villagers	1	2	
Samurai	4	3	Can make 2 attacks per turn
Bandits	2	2	
Lieutenants	3	3	
Leader	4	3	Can make 2 attacks per turn

Turn Sequence

Players take turns. On a players turn each of his men can move once and attack once.

Moving

It costs a unit one move to enter a clear space. Units cannot move through other units. It costs a unit one move to get on or off a horse (you cannot ride it until next turn).

forest hexes. It costs horses two moves to enter a Forest space.

*Houses: HTH attack rolls into or out of houses get Force -2. Units have no penalty when shooting out of houses. Only units adjacent to houses may shoot into them. (Roll at Force -1) It costs an extra move to enter or leave a house.

Horses may not enter houses. The average house will occupy 4-6+ spaces. *Stream: It costs units two moves to enter a Stream space.

Attack rolls at units in streams get Force +1 *Fences: It costs units one move to climb a fence. Horses are blocked by fences.

Samurai Setup

The Samurai player sets up first. The 7 Samurai and 40 villagers are in the village. The Samurai have swords.

The villagers have spears. One Samurai has a gun. Three Samurai have armor.

Bandit Setup

The bandits are placed anywhere on the edges of the map. There are 37 Bandits with assorted hand weapons. 20 of the Bandits have Horses.

10 of the Bandits have guns. There are two Lieutenants with swords, armor and horse. There is one Leader with swords, armor and horse.

The bandits get the first turn.

Horses

A horse can move 9 spaces per turn. Villagers and wounded men cannot ride horses. If thrown from a horse you cannot get up and back on until next turn.

A horse without a rider will not move.

Hand To Hand Attacks

These are made against adjacent opponents. The attacker rolls a number of 6 sided dice equal to his force score. The attacker gets +1 to the roll for every

friendly unit adjacent to the defender.

The defender rolls a number of 6 sided dice equal to his force score. If the attackers total is greater, the defender loses 1D6 Force points. A unit with 0 or fewer force points is killed.

Stack Wound counters under the wounded man to indicate his Force reduction. If the defender is on a horse, he takes no damage on a roll of 1-3 on 1D6, but is instead thrown from his horse. (lands in same space) Further attacks against thrown riders are at +1 Force until the end of the turn. If the defender is wearing armor, he takes no damage on a roll of 1-3 on 1D6.

Gun Attacks

Guns have a range of 10 spaces. Attacks past 6 spaces are at -1 Force. The shooter rolls 1D6.

If the roll is equal to or less than the attackers Force the target is hit. The defender loses 1D6 Force points if hit. Terrain features and other units will block line of sight.

Guns require one turn to reload. Once fired flip the gun counter over. The gunner may reload (flip the counter up) if he does not move or attack.

A unit may pick up the gun of a dead man in the same space.

Morale

If a villager is in the open and adjacent to any bandit the villager will Panic on a roll of 1-3 on 1D6: A Panicked villager will not attack and will run away if possible. Add 1 to the roll if the villager is next to a samurai. A villager will cease to panic if an adjacent Samurai uses up a move to Yell exhortations at him.

Seven Years War

Introduction

2 player Card Game simulation of the Seven Years War. This was a Global Conflict from 1756 to 1763. One player represents the coalition of Britain and Prussia.

The other player represents the coalition of France and its Allies.

Campaign Grid

This a Chart divided into 4 Campaign Areas. The Areas are:

1. Europe
2. North America
3. India
4. West Indies

Areas 2-4 are collectively referred to as Colonial Areas.

Game Length

The game lasts 7 turns. Each turn represents one year.

Medals

Each player gets a unique set of 28 Medals. Medals can be in the form of counters, tokens, coins, etc.

Victory

There are 3 ways of achieving Victory:

1. If you win the European Campaign you automatically win the game.
2. If you have won more colonial campaigns than your opponent at

The end of the game, you win the game.

3. If campaign wins are tied, the player with the most medals on the

Grid at the end of the game wins.

The Deck

Players share a common deck. Some cards will have multiple copies in the deck. Each card has a Force value ranging from 0 to 7.

Some cards can only be used by one of the coalitions. Some cards can only apply their force to certain Campaign Areas. Some cards produce special effects in addition to their Force value.

Turn Sequence

Each turn is divided into 7 Phases: Plan Phase Execute Phase Turmoil Phase Conflict Phase Difficulty Phase Resolve Phase Aftermath Phase

Plan Phase

Each player fills his hand to 9 cards. If the deck runs out, shuffle the discard & draw from it.

Execute Phase

Players may discard up to 5 cards and draw replacements.

Turmoil Phase

Some cards allow you to draw additional cards. Some cards force your opponent to discard random cards. Players take turns using these types of cards.

Flip a coin to see who goes first.

Conflict Phase

Flip a coin. The loser goes first. Players take turns laying one card at a time, face up, onto any 1 of the 4 Campaign Areas. Players continue until they run out of cards or do not want to lay any more.

Difficulty Phase

Some cards cause an opposing card in the same Area to be discarded. These discards occur in this phase.

Resolve Phase

For each area, for each player, add up the total Force of all their Cards played into that Area this turn. The Player with the highest total force in an area wins that Area and gets to place 1 of his Medals in it. In case of a tie, no one gets a Medal.

Aftermath Phase

Medals remain in place. Discard all cards in the Campaign areas. The player with the most total medals in play is known as the "Winning" player.

(Certain cards designate winning and losing players) If you ever have 3 medals in excess of your opponents in an Area, you Automatically "Win" that Campaign. If a Campaign is won, no further cards can be played to it for the rest of the game.

Card List Notation

Shared Universes

Introduction: Shared Universes is an addition to the universe of wargaming and roleplaying. Gamers are often very creative and talented people. Unfortunately there is often nowhere to go for the amateur writer or artist. Poems get buried away never to be seen again. The doodles never get turned into paintings. Ideas die, never having been fully explored. Most gamers have a few drawings and adventure ideas hidden in old folders. Shared Universes is an attempt to give this raw undeveloped talent a place to go, to grow, to be seen, and to communicate. In Shared Universes, like-minded artists band together, for inspiration and support, in organizational units called journey groups. Players may decide to work on group projects together called, appropriately, shared universes. Artifacts, such as drawings and stories, not only have their own intrinsic value but also contribute to a larger work of art, the shared universe. As players build up their portfolios and the groups archives grow, the players and the group will move onto continually more sophisticated and fulfilling projects.

Shared Universes is a gaming system that provides players with a framework in which to create their own art and literature. The rules give guidelines and starting points for the creative process. Players are not just playing a game, they are producing permanent records of their ideas in writing and in art. As players refine their skills the game becomes richer and more rewarding.

The Journey: All players are considered to be on a journey. A journey of imagination, self exploration, learning, creating, experience, ideas, growth, sharing, and mastery.

Journey Names: Every player should take a journey name. These names should be descriptive and fanciful. Some examples include: Earthborn, Starbright, Dreamdancer, Lost Angel, Birdman. The journey name is one of the players' many alter egos. Players should draw a picture of the physical incarnation of their journey name. A player, of course, may use different names for different journeys.

Journey Groups: Every artist and writer needs an audience. This is the primary function of the journey group. Groups may be composed of just several friends or they may be larger, community based, clubs or organizations. Journey groups are called J-groups for short.

Journey Group Names: Every journey group should give itself a name. Some sample names: The Ghost Writers; Anonymous Artists Political Action Group; Sidereal Messengers; Prometheans; The Underground; Undead Poets Society; The Fellowship; Futurians; Tech Hombres Gang; The Journeymen.

Journey Sessions: When a journey group meets it is called a session. Formal sessions may occur once a week, once a month, or whenever convenient. A session is broken down into two main parts: show and tell, and brainstorming. During show and tell, players take turns showing off and reading out loud whatever art and writing they have done since the previous session. During brainstorming players work on group projects and give feedback about each others personal projects.

Guardian of Knowledge: Abbreviated GK, this individual is the groups' leader, organizer, record keeper, and judge. The actual responsibilities of the GK may be spread among several people. This position has more responsibility than authority as most decisions of a group will be arrived at democratically.

The role of the GK includes the following tasks:

- Inspire players
- Maintain interest or call for a change of topic
- Mediate disputes; Keep the peace; Negotiate compromises
- Call Votes
- Award Story Teller Points
- Offer suggestions and advice
- Maintain the archives
- Provide focus and organization if and where it is needed.

Artifacts: Artifacts are another name for anything created for a journey universe. Drawings, songs, stories, and jewelry are all artifacts. Artifacts also include events such as performances and festivals.

Special Projects: A player or group may decide to do a special project. Special projects, in the most general sense, are collections of artifacts, usually with a unifying purpose or theme, displayed together. An example of a special project would be a series of books, each containing a collection of short stories and illustrations. A special project may incorporate work from many universes.

Universes: The concept of the 'Universe' is central to the Shared Universes game. A universe is simply a fictional background that players use as a framework for creating artifacts. Artifacts help to detail a universe and detailed universe gives inspiration for the creation of more artifacts. Imagination is the only limit to the number of possible universes. Universes may be of several types: shared, closed, personal, and parallel.

Shared Universe: Everyone in the journey group may use a shared universe. The GK may keep a file in which anyone who wishes may keep a copy of their work. All players should have full access to the GKs Shared universe files.

Closed Universe: In this universe only certain people may contribute under certain conditions. Players

should make a charter document detailing who has access to the universe.

Personal Universe: This includes very personal, private work of a single player.

Parallel Universe: This is material that supplements another universe but is kept separate for whatever reason. For example, if a player creates an artifact for a specific universe and the other players do not feel it belongs there, the GK may decide to put the artifact in a parallel universe file. The most common use for a parallel universe is as a place to keep rough draft material which will outnumber finished artifacts.

Archives: An archive is a collection of artifacts. Players will have their own personal archives and the GK will keep the journey groups archives. Artifacts of a single universe may be kept together in what is known as a single "library". To help keep the archives organized, individual artifacts should be recorded, cataloged, and labeled with the creators name, the date of creation, the artifacts title, the universe it was created for and any other important information.

Possession: They say possession is nine tenths of the law. No player is under any compulsion to give their work to another player. Avoid potential problems by making copies of your work. Players should avoid plagiarizing published authors. Always include references and credits where necessary.

Story Teller Points: Story teller points or STPs are an abstract measure of productivity, quality, and ideas generated by players. The GK awards STPs either during or after a Journey session. The GK's award may be influenced by players opinions. Players keep track of their STP totals from session to session. As players accumulate STPs they increase in level and

STPs	RANK	TITLE
0	0	Initiate
100	1	Novice
200	2	Aspirant
300	3	Adept
400	4	Artisan
500	5	Artist
600	6	Seeker
700	7	LOREMASTER

Journey Roleplaying & Storytelling Resolution: Many of the shared universes will, after some development, become ripe settings for roleplaying. In Shared Universes style roleplaying the distinction between players and game master is blurred. Players are collectively creating a story and have some control over all elements of the story. Players resolve events, actions, and plot lines by debating what result would be the most dramatic and appropriate to the story. If it improves the story, players may change events that occurred earlier.

SHARED UNIVERSES The following universes are available as starting points to any player and any group. These suggestions are by no means exhaustive.

corresponding title. An artifact may be used to acquire points only once in a particular Journey group. If a player belongs to more than one group that player will have different STP totals and ranks in each.

Awarding Story Teller Points:

- 1 for attending a Journey session
- 1 for being a GK at a Journey session
- 1 for a quick Sketch
- 1+ for a Poem, story outline, or character concept
- 1+ per page of writing
- 1+ for a really good idea
- 1+ for creating a new Universe
- 5+ for a detailed Illustration
- 5+ for a Short Story or Essay
- 5+ for a game design or set of RPG rules
- 10+ for a detailed Painting
- 20+ for a Book or Novel
- 5+ for a Comic Strip
- 1+ for a Photograph
- 5+ for completing a special project
- 1-20+ for Craft items: Metalwork, Sculpture, Jewelry, Glass, Costumes, Clothing, etc
- 5+ for Acting, Orations, Speeches, Monologues
- 10+ for putting on a Play, Concert, or Festival
- 5+ for a Song or Instrumental piece
- 10+ for an Album or Video
- 1+ for attending Craft or Renaissance Fairs
- 1+ for selling an Artifact
- 10+ for having your work published or displayed in public
- 10+ for having your own Webpage
- 1+ for every 1,000 hits A single artifact or project may acquire points in several categories.

STP Rank & Title Table:

STPs	RANK	TITLE
800	8	Dreamspeaker
900	9	Shaman
1000	10	Oracle
2000	11	Prophet
3000	12	Demi-God
4000	13	Lesser God
5000	14	Greater God

Discover and explore new universes:

ANIME MAYHEM Japanese animation is stereotypically postapocalyptic, violent and intensely sexual. Common elements include big eyes and transformers. Players may enjoy taking turns drawing sequential scenes for an action sequence. Artifacts: Character sketches; Storylines; Technical diagrams; Haikus; Film festivals; and of course, merchandising.

FANTASY ARMIES Two player-generals draw 10 or more units that are in their armies. The GK draws a map of the battlefield. Other players determine the result of the confrontation. Artifacts: First hand written accounts of the battle by soldiers and commanders; maps depicting troop movements; General's bat-

tle plans; Historian's notes; and drawings of the battle in progress.

PERSONAL MYTHOLOGY This concept is best suited for a personal universe. Examine your own psychological landscape. Depict personal problems as battles between heros and monsters. Transform places in the real world into legendary lands. People become gods and titans. Goals become quests. Sorrow becomes the destruction of nations. Anger becomes earthquakes and tidal waves. Obstacles become mountains. Love is a golden age. Minutes become eras

ART HISTORY Get Some books on an artist, such as Picasso. First try

duplicating some of their paintings, then try making some new paintings in the same style. This journey will be the most rewarding if the players have adequate supplies (paints, brushes, canvasses) on hand.

STELLAR LANDSCAPES Draw, or preferably, paint a landscape of one of the planets or moons in our solar system. Some are rocky, some are volcanic, some are icy, some have atmospheres, some do not. This journey will be most rewarding if you first do some research on the heavenly bodies you are depicting. From Triton you can see the rings of Saturn. If you run out of places in our solar system do landscapes of alien planets.

FLOORPLANS OF A SPACESHIP Make a detailed technical diagram. Types of ships might include: research vessels, space stations, colony ships, fighters, battleships, world ships. If everyone in the group does a few, you may have enough for a whole fleet. Tie this in with Space Fury. Artifacts: Captains logs; Ship recognition manuals; Histories of each ship class.

INN OF THE GOURMET GORGON The Inn is located in Findell, a fantasy realm filled with magical creatures of every description. The house specialty is Dragontail steak and Fireberry wine. Artifacts: Menu; Recipes; Actual edible meals; Bistro magic; and short stories.

LANTASIA A classic fantasy realm complete with elves, dwarves, orcs, wizards, knights, dragons, and mighty spells.

FANTASTIC ARCHITECTURE Using the laws of physics, magic, and aesthetics, players design buildings. Mix ancient with modern styles. Experiment with materials, cultures, and locations. Artifacts: Exterior and interior views; Floorplans.

FUTURE HISTORY Players speculate about what changes in science, medicine, technology, transportation, culture, government, art, sports, computers, agriculture, energy, entertainment, economics, work, and human evolution will occur in the next 25, 50, 75, 100, 200, 500, 1000 years. Artifacts: Essays; Histories; Timelines.

DREAM LOGS Players make records of their dreams. After doing this for awhile players might try lucid dreaming. Artifacts: Dream journals; Dream catchers

RAYGUNS & ROCKETSLEDS This universe is straight from 1930's science fiction comics. Be sure to include bubble helmets, jetpacks, and cliffhangers. Ar-

of a thousand years. Artifacts of this soul searching include: Poetry; Fables; Pantheons; and fine art.

MYSTIC JOURNEYS Players create artifacts with mystical, occult, spiritual and religious themes. The goal is for players to create a personal religion for themselves. Through the meditative and reflective act of creating artifacts players discover what they really believe in. Artifacts: Rituals; Holy symbols; Scriptures on Universal truths, Mans relationship to the universe, the structure of the cosmos, Self actualization, and the nature of God.

tifacts: Serial adventure comics. **GIANT ASPARAGUS FROM PLANET X** This universe is that of the 1950's B-movies. Common elements include: earth invasions, mutant monsters, and mad scientists. Artifacts: Movie posters; Short films in black and white.

KUNG FU FIGHTERS This universe is that of contemporary martial arts movies and arcade games. Common elements include gratuitous death and special moves. Artifacts: Character descriptions, high scores.

EXPLORERS Human exploration of the galaxy is still incomplete after hundreds of years of missions. The history logs are filled with thousands of incredible accounts of first contacts. This shared universe is particularly good for short stories. Artifacts: Survey crew logs.

PRIMEA An alternate universe of human and dinosaur evolution on planet Earth. Dinosaurs still exist and several races of hominids have built civilizations. The cities of Cro-Magnon, Homo Erectus and the Neanderthals live in a delicate balance of competition and coexistence. Artifacts: Maps; Descriptions of the relationships between the races of man; Dinosaur based technology.

CHILDRENS BOOKS Players create stories and illustrations for childrens books and fables. A lot of great art has been created since the mid 1800's for childrens books. Artifacts: Illustrated Fairy tales.

UNDERGROUND This is the universe of 1960's under-ground comix. Common themes are sex, drugs, rock n roll, changing morals, psychedelia, political protest, and dark humor. Players should experiment with the possibilities of the comix format.

CITY PLANNER Players design in detail a utopian city that they create using current technology. This should also include the cities government and legal system.

NATURALISTS Players make collections of natural phenomenon. This can turn into a very satisfying pastime and a nice change from wargames. Artifacts: Rock and crystal collections; Pressed leaves; Insects; Seashells; Bird watching; Camping trips; fishing trips.

BEATNIK SCENE Players dress in black, make some coffee, and read some homegrown poetry. As extra incentive give the hippest cat a prize, dig. Make sure to have some jazz in the background.

FILKING Players write songs and music for their favorite novels. This is a sign of a real fan.

SCIENCE FANTASY THEATER Costumed players enact scenes from their favorite works of fiction. Big STP's for this category, especially for long performances.

DRAGONBAIT Do a RPG in a cartoon style with gags, puns, mayhem, and punchlines. Artifacts: Character sketches, strips.

NOVA A science fiction universe where human empires fight using every weapon of war and every form of treachery at their disposal.

HISTORIAN Players do projects using their favorite historical period as subject matter. This may require some research. The possibilities for Historical Roleplaying are very rich.

MUTOG This universe details the years and centuries on planet earth after a nuclear holocaust. Menaces include radiation, mutants, and rebuilding civilization.

HORROR SHOW Save your scariest and strangest stuff for this universe. Stories may or may not be unconnected.

CONSPIRACIES In this universe there is some truth behind most conspiracy theories. Watch your back.

THE PUZZLING Players create mathematical, word, and visual puzzles to confound each other.

BROKEN LANDS The broken lands is a fantasy setting populated with savage barbarians, beautiful amazons, foul beasts, filthy cities, constant warfare, and exotic locations. Magic is ritualistic and diabolic. This is a good universe for artists who love drawing muscles, and writers who love describing fierce, grisly combats.

D-TRAVELERS D-Travelers is a universe in which dimension travelers have both high tech and magic at their disposal.

SUPERHEROS A universe where super heros and supervillans are behind every nook and cranny.

CYBERPUNK In the not so distant future

EROTICA Players Artifacts: Drawings, Letters, Photos, Sculpture, Experiences.

LOVE BONDS This is a closed universe shared by two lovers.

HISTORICAL WHAT IFs Players recreate history. What if the Roman Empire did not fall?

NEW SPORT Players design a new type of team sport. Artifacts: Rules; Playing equipment; Demonstration game.

ANATOMY Players produce artifacts describing human, animal and monstrous figures.

SCAVENGER HUNT The GK creates an elaborate scavenger hunt, puzzle or mystery for the players to solve.

COSMIC BALANCE Demons, Titans, Gods, Deities, and Avatars are locked in an eternal struggle for control of the multiverse. Artifacts: Epics

ALL THE QUEENS MEN Set in the Victorian era, intrepid English scientists and their companions explore the hollow earth, the planets, and other fantastic places.

VEHICLES Players produce designs for fantastic vehicles. Artifacts: Blueprints

WESTERNS Players pay tribute to the legends of the old west.

COMPUTER ART Players produce artwork using computers.

THE SIMULATORS What do humans of the 5th millennium do for entertainment? They engage in highly elaborate holographic simulations. The simulation controllers easily mix historical and fantastic elements in the most bizarre combinations possible. Roleplayers will often find themselves in very awkward situations.

Game Designers Notes

This 'gaming system' was written before the advent of the Internet & the Web.

Sharpe's Adventures

Introduction

Scenario for WarpQuest. for the [Warpquest Core Rules](#) WarpQuest Core Rules. Each player is a British Officer in Spain circa 1809.

Based on the Sharpe's Rifle Series of Books and Films by Bernard Cornwell.

Disclaimer

"Sharpe" is a copyrighted property. This is merely a fan site.

The Scenario

The map spaces represent time. The pawn represents the Officer and his men. There is no Artifact.

Officer Attribute Table

1D6	Skill:	Notes:
1	Endurance +1	The Ability to withstand Wounds
2	Brawling +1	Hand to Hand Combat Armed & Unarmed
3	Shooting +1	Speed & Accuracy with Firearms
4	Tactics +1	Battlefield Strategy
5	Intelligence +1	Capacity for Intrigue
6	Leadership +1	Charisma, Honor, Oratory

Wounds

Every time an officer is wounded his Endurance is reduced by 1D6. An Officer reduced to zero or less Hits is killed.

Challenges

The Module is set up to show what skill rolls are required by the Challenge and What happens if you succeed or fail. If you go back or go ahead as a result of a card do not draw a new card from the Challenge Deck

Confrontations

If a player's pawn lands on an opposing officer, they will have a confrontation. Randomly select a Skill on

There is only one Module. The track is 30 spaces long. Upon reaching the end your officer is promoted! (One Promotion = one Campaign) Try to keep your officer alive long enough to be promoted.

Campaign

Each player starts out as a Sergeant. First Promotion is to Lieutenant. Second Promotion is to Captain.

Third Promotion is to Major. All wounds are healed in-between campaigns. After each promotion gain 2 rolls on the Attribute Table.

Officer Attributes

A Sergeant starts with 10 Endurance and 12 rolls on the Attribute Table.

the Skill Table (Reroll Endurance). Both players make a Skill roll. The lower roll moves back 1D6 spaces.

Card List Notation

- C** Challenge
- A** Aid
- W** Wounded (Lose 1D6 Endurance)
- R** Retreat (Go back 1D6 Spaces)
- V** Victory (Go ahead 1D6 Spaces)
- B** Brawling
- S** Shooting
- T** Tactics
- I** Intelligence
- L** Leadership
- Diff** Difficulty Modifier (Added to Challenge roll)
- Suc** Succeed
- Heal** Gain Back 1D6 lost Endurance

Rotation Cardlist

This is meant to keep the main cardlist fresh. If you get bored with the regular cards simply take some out and replace them with some rotation cards. You can change the ratio of Challenge cards to Aid cards to increase or decrease the difficulty.

Playing Without Cards

*By Salo:

At least in solo....

The mechanism is simple. Just make a list of all challenge cards with excel (or whatever spreadsheet you prefer) and randomize the list. Then print it out.

Now, when you face a challenge, roll 1d10. If you get 7, you face the seventh challenge on the list. When you have dealt with the challenge, mark it used. When you face another challenge, roll the 1d10 again. If you get a 10, then you face the 10th UNMARKED challenge on the list.

Just make sure, that there are 10 more challenges in the list than there are spaces on the game board.

The challenges that top the list happen more often than those at the bottom of the list. This property can be used without randomizing by the game designer.

Hope you get what I mean.

*By Tom:

Another way of doing this, though it would intro-

duce more instances of a thing/event goes something like this.

Make a table of all the cards in a deck, number them. Each card now as a unique number (cardnumber)

- Take the Number of Cards in the list, divide that number by 100.(totalcards/100)
- Each card is then given a Percentile Number

Card	Percentile
1	14
2	28
3	42
4	57

equal to (cardnumber)*(totalcards/100)

When you are asked to draw a card roll a percentile (2d10 the first die being 10's the second die being 1's or use the 2d6 method descibe in countermoves issue 2) and consult the card table

Say you have a deck of 7 card (total-cards/100)=14.28

Card	Percentile
5	71
6	85
7	99

#	#	#	#
you would get	card 1	on a percentile rool of	14 or less
	card 2	-	15 thru 28
	card 3	-	29 thru 42

* By Zak:

I use a simple trick to test some of the Lloyd productions before creating the real cards: i set for each card a number and then i put on a cup a number of numerical markers correspoing to the card # - i own a lot of boardgames so i have a full collection of numerical markers but in any case is very easy to create a

generic set of such a counter.

With this mechanism you can have the random distribution of the deck (one instance of every card - or more if needed) and you don't need the printed card since you simply index the card list with the numbers in your "hand". Nothing special but it works.

Sherwood

Introduction

Card game. Three Decks. One player is Robin Hood, stealing from the rich to give to the poor. The other player is the most evil Sheriff of Nottingham.

Object

Accumulate the most victory points by acquiring cards from the Prize Deck.

Prize Deck List

#	Card Name	Victory Points
1	Peasants	0
6	Fat Merchant	1
5	Tax Collector	2
4	Nobleman	3

#	Card Name	Victory Points
1	Tournament	4
1	The Kings Messenger	5
1	Prisoners	6
1	Maid Marion	7

Number of such cards in the deck

Robin Hood Deck List

#	Card Name	Force Value	Notes
30	Arrows	0	
5	Woodsmen	5	
10	Merry Men	10	
5	Yeomen	15	Can shoot 2 arrow cards in Arrow Phase
1	Friar Tuck	20	
1	The Moor	30	
1	Little John	30	
1	Sir Ivanhoe	40	
1	Robin Hood	50	Can shoot 3 arrow cards in Arrow Phase
5	Heal Wounds	0	

Sherwood Sheriff Deck List

#	Card Name	Force Value	Notes
10	Crossbow Bolts	0	
10	Shieldmen	5	Negates one arrow card in Arrow Phase
10	Guards	10	
15	Halberdiers	15	
5	Knights	20	
5	Chivaliers	25	
1	Sheriff of Nottingham	30	
4	Trap	0	

Setup

One player has the Sheriff deck, the other has the Robin Hood deck. The Prize Deck is placed between them off to one side. All decks have their own discard piles.

The Sheriff starts with 6 cards. The Robin Hood player starts with 3 cards.

Turn Sequence

1. Draw Phase
2. Prize Phase
3. Ambush Phase
4. Arrows Phase
5. Melee Phase
6. Victory Phase

7. Recovery Phase

Draw Phase

Each player draws 3 cards from their deck.

Prize Phase

Draw 1 card from the Prize deck. Place it in the center of the table between the players.

Ambush Phase

Character cards are any cards that have a Force value greater than zero. Each player selects from his hand which Character cards he wants to participate in the ambush. A player may choose zero cards, or up to all of the Character cards in his hand.

These cards are placed face down behind a barrier so the other player cannot see them. The selected Character cards are called the Combatant cards. When both players are done with this, the Combatant cards are then simultaneously revealed face up on the table.

Arrows Phase

Skip this phase if there are no combatants. The Robin Hood player may play (discard) Arrow cards. The Sheriff player may play (discard) Crossbow Bolt cards.

A player may play one arrow or bolt card per combatant played in Ambush phase. Each arrow or bolt card played kills one enemy combatant. Killed Combatants are discarded. A player decides which of his combatants are killed by enemy arrows or bolts.

Melee Phase

Each side adds up the Force values of all of their remaining combatants. These are known as the Melee totals. The higher total wins.

All combatants of the loser are discarded. The winner keeps cards with a total force value equal to the difference between the winning and losing sides melee totals. The winner always keeps at least one combatant.

For example: Winner = 70, loser = 50, difference = 20. The winner may keep combatants with a total melee value of 20 or less, or any one unit, even if it has a force value greater than 20.

Victory Phase

If there are no combatants discard the Prize card and start a new turn. If only one player has combatants left, than that player keeps the Prize card. Each player keeps a Victory pile with the Prize cards they have won.

Recovery Phase

The player who won the Prize card may place his surviving combatants back in his hand.

Game End & Victory Determination

The game ends when the last Prize card has been won or discarded. Each Prize card has a Victory point value. The player with the most Victory points in his pile wins the game.

The Trap Card

The Sheriff player may include this card with his combatants in Ambush Phase. If used, skip the Arrows Phase and go directly to Melee Phase.

The Heal Wounds Card

The Robin Hood player may use these cards in Recovery Phase to put one of his combatants discarded this turn back into his hand.

The Tournament Card

If this Prize card is played, skip the Ambush and Melee phases. The player who plays the most arrows or bolts wins the card. Such cards are revealed simultaneously. Discard the Tournament if there is a tie.

Ships Of The Line

Introduction

Card game for 2 players. Players are rival 15-18th century Warships trying to sink each other.

Object

Destroy your opponents ship by reducing any one of his stats to zero.

Ship Stats

Each ship has three stats:

1. Hull
2. Rigging
3. Crew

Each stat has a starting value of 7 points. Cannon attacks will reduce these starting values. If the Hull stat goes to zero the ship will sink.

If the Rigging stat goes to zero the ship can no longer move. If the Crew stat goes to zero, then all aboard have perished.

Deck

The Deck has 56 cards. Players share a common deck. There are 7 types of cards.

The deck contains 8 cards of each type.

Card Type List

North Wind South Wind East Wind West Wind Cannon Balls Chain Shot Grape Shot

Turn Sequence

Play is simultaneous. Each turn has 5 phases:

1. Load Phase
2. Reload Phase
3. Sail Phase
4. Fire Phase
5. Retire Phase

Load Phase

Each player is dealt enough cards to fill their hand up to 7 cards. If the deck runs out, shuffle the discard and deal from it..

Reload Phase

Each player may discard up to 4 of his cards. Players are dealt replacement cards.

Sail Phase

Players simultaneously reveal none, one, or more Wind cards. The wind cards revealed may not include opposites. North and South are opposites.

East and West are opposites. For example, you can play a South and a West card together. You may play more than one of the same Wind card.

For example, you can play 2 North cards and 3 East cards. The player with the most Wind cards is said to be the Advantaged player. The player with fewer Wind cards is said to be the Disadvantaged player.

If tied, both players are said to be Equals. Discard all played cards.

Fire Phase

The Advantaged player may attack. The Disadvantaged player may not attack. If Equals, both players may attack.

An attacker may reveal attack cards of only one type. For example, a player may reveal one or more Cannon Ball cards, but cannot also reveal Chain and Grape Shot. Each Cannon Ball card will reduce the opponents Hull Stat by one.

Each Chain Shot card will reduce the opponents Rigging Stat by one. Each Grape Shot card will reduce the opponents Crew Stat by one. Discard all played cards.

Retire Phase

Players may discard up to 3 cards.

Shot, Shell & Grape

Introduction

Two player Card game depicting Napoleonic era warfare.

Victory

The first player to be routed from 3 of his 5 forward positions loses.

The Decks

There are two common decks: The Battalion deck and The Tactics deck. The Battalion deck has 2 of each card in the list. Battalion cards are also referred to as units.

The Tactics deck has 1 of each card in the list. Six and eight sided dice are needed.

Setup

Each player is dealt half the Battalion deck. Each player forms a line of five stacks of cards. The opposing lines face each other.

These stacks are called: -Left Flank -Left Center -Center Center -Right Center -Right Flank Additionally each player has a Reserve stack. The Reserve stack is placed behind the line. Place Battalion cards face up in each stack.

Line Infantry and Artillery may be placed in Center stacks. Cavalry and Light Infantry may be placed in any stacks. Horse Artillery are considered as cavalry for the setup purpose.

Any troop type may be in the reserve stack. Center stacks must contain at least 3 cards. Flank stacks must contain at least 2 cards.

Players can look at their cards and then create the stacks.

Turn Sequence

Players take turns. Each turn has 5 phases:

1. Draw Phase
2. Reinforce Phase
3. Attack Phase
4. Morale Phase
5. Terrain Phase

Draw Phase

Draw 2 Tactics cards. Maximum hand size = 7 tactics cards. Discard excess cards.

If the deck runs out, shuffle the discard and draw from it.

Reinforce Phase

You may move up to 2 battalions from one of your stacks to an adjacent stack. Reinforcements are placed on the bottom of the stack. This type of movement is called a reinforcement.

Alternatively, battalions can be moved within the same stack. Your Reserve is adjacent to all of your other stacks. You may move any card in a stack. (You are not limited to the top one)

Attack Phase

Each of your stacks gets one basic attack per turn. You get one free additional attack per turn that can be made by any one of your stacks. Your battalions are the attackers.

Your opponent's battalions are the defenders. To attack, pick the top card of one of your stacks. The reserve stack never attacks.

The defender is the card in the opponent's line opposite to the attacking card. Both players roll one eight sided die. These are called the Combat rolls. The attackers combat roll is called the Attack roll.

The defenders combat roll is called the Defense roll. The opponent's card is destroyed on a combat roll of 7 or higher. Line Infantry vs cavalry and light infantry get -1 to their attack roll. (They ride/run away) Line Infantry vs non-flanking cavalry get +2 to their defense roll.

Cavalry vs Artillery or Light Infantry get +1 to their attack roll. Line Infantry vs Light Infantry get -1 to their defense roll. Artillery vs Line Infantry get +1 to their defense roll.

Heavy battalions get +1 to their combat rolls. Elite battalions get +2 to their combat rolls. Shock cavalry get +1 to their combat rolls vs other cavalry.

Militia get -1 to their combat rolls. Destroyed battalions are discarded. Surviving battalions are placed face down on the bottom of their stack.

Tactics cards that modify the Attack roll are played before the roll is made. Tactics cards that allow Defenders an extra attack are only used if their first attack misses. Tactics cards are discarded immediately when played.

A Battalion can be used as an attacker only once on its owners turn.

Flank Attacks

If you destroy all the cards in one of your opponents stacks, the battalions in your stack facing the empty stack get to flank attack the enemy stacks adjacent to the empty stack. Battalions making Flank attacks are

+2 to their Attack roll and may attack the enemy reserve stack. Cavalry battalions making Flank attacks are +3 to their Attack roll and may attack any enemy stack.

Defense rolls against flankers are at -1. If you flank stacks on two sides, this is called a double envelopment, and you get an additional +1 to Flanking Attack rolls.

Morale Phase

Every time you destroy an opposing battalion roll 2D6. This is called the Morale check. On a roll of 10+

all of the battalions in the destroyed battalion's stack rout and are placed in the reserve stack.

If the reserve stack routs, all of those battalions are discarded. A stack rolls at +1 if it contains any Militia. A stack rolls at -1 if it contains any Elite units.

A stack rolls at +1 if an Elite unit was destroyed.

Terrain Phase

You may play a Terrain card onto an appropriate stack. Terrain cards remain in effect until a Maneuver card is played to remove them.

Battalion Card List

Card Name	Type
Grenadiers	Line (Elite)
Dragoons	Cavalry
Lancers	Cavalry (Shock)
Hussars	Cavalry
Skirmishers	Light
Cuirassier	Cavalry (Heavy)
Musketeers	Line

Blunderbussars	Light (Militia)
Partisans	Light (Militia)
Legere	Line
Jagers	Line
Congreve Rkts	Artillery

Tactics Card List

Card Name	Effect
Square Formation	Cavalry vs Line Infantry are -3 to their attack roll.
Second Volley	Defending Infantry battalion gets 1 extra attack
Fire at Will	Get 1 extra attack with any unit on your turn.
Sabers & Pistols	Attacking Cavalry battalion gets 1 extra attack
Rapid Deployment	Get +1 Reinforcement move.
Forced March	Get +1 Reinforcement move (Move infantry only).
Frontal Assault	Line Infantry get +2 to their attack roll and are +1 to be hit.
Bayonet Charge	Line Infantry get +2 to their attack roll and are +1 to be hit.
Rifles	Light Infantry get +1 to their combat roll.
Probe	Get 1 extra attack with any Light Infantry in any of your stacks.
Screen	Defense roll +1 vs attacking Light Infantry
Counter Attack	Defending Cavalry get +2 to their defense roll.
Dismounted	Your Cavalry battalion is considered to be Infantry this turn.
Limber	Get +1 Reinforcement move (Move Artillery only).
Double Canister	Artillery get +2 to their defense roll.

Card Name	Effect
Cansiter	Artillery get +1 to their defense roll.
Round Shot	Artillery get +1 to their attack roll.
Cannon Ball	Artillery get +1 to their attack roll.
Shrapnel	Attacking Artillery brigade gets 1 extra attack
Spherical Case	Attacking Artillery brigade gets 1 extra attack
Fusillade	Any Line Infantry gets 1 extra attack.
Sniper	Cause a stack to make a morale check in its Morale phase.
Commander	Morale check at -1.
Esprit de Corps	Morale check at -1.
Disordered	Line Infantry get -1 to their attack roll.
Wheel about	Morale check at -1.
Rearguard Action	Get +2 Reinforcement moves from reserve.
Attack Column	Get +2 to attack roll.
Lost Orders	Opponent gets one less Attack this turn.
Column	Get +1 Reinforcement move.
Overrun	Unit making Flank attack gets a second attack.
Take Prisoners	Routing battalion is discarded.
Fighting Withdrawal	Defender gets +1 to defense roll.
Difficult Terrain	Opponent gets one less attack this turn.
Field Officer	Morale check at -1.
Lost Cohesion	Morale check at +1.
Refuse Flank	Negate attacking units Flank attack bonus.
Conscripts	Morale check at +1.
Enfilade fire	Get +1 to combat roll.
Crossfire	Battalion may attack top unit in stack diagonal to it.
Bombardment	Get 1 extra attack with any artillery in any of your stacks.
Confusion	Opponent gets -1 Reinforcement move this turn.
Advancing Line	Get 1 extra attack with any Line Infantry in any of your stacks.
Scouts	Look at opponent's hand
Blocking Terrain Left	Terrain: Attacks vs left Flank at -1 on attack roll.
Blocking Terrain Right	Terrain: Attacks vs right Flank at -1 on attack roll.
Redoubt	Terrain: Attack vs. center stack is at -1 on attack roll.
High Ground	Terrain: Get +1 to combat roll. Artillery gets +2.
Maneuver	Discard Terrain card (3 in deck)

Army Specialties: Optional Rules

Before play starts each player rolls once on the table below. The indicated benefit lasts the entire game.

1D6	Ability	Notes
1	Superior Discipline	Morale checks at -1
2	Genius Commander	Maximum hand size +2
3	Fire Drill	Line Infantry combat rolls at +1
4	Advanced Artillery	Artillery combat rolls at +1
5	Elite Cavalry	Cavalry combat rolls at +1
6	March Drill	Get +1 Reinforcement move per turn

Silk Road

Introduction

Board game for 2-4+ players. Players are caravan merchants carrying goods back and forth between China and Arabia.

Victory

The first player to accumulate 25 coins is the winner.

Coins

Money in the game is counted in units of coins.

The Deck

Players share a common deck. There are four main types of cards: Imports (Goods from Arabia) Exports (Goods from China) Road (Terrain along the Silk Road) Special (Obstacles and Opportunities)

The Board

The board consists of a track 9 spaces long. The leftmost space is Arabia. The rightmost space is China.

Arabia and China are referred to as destination spaces. The 7 intervening spaces are called road spaces.

Pawns & Caravans

Each player has a unique pawn representing their caravan. Note: A Caravan can carry a max of 5 Goods (cards). These goods are not part of your hand.

Goods can be played onto a caravan when it is at the destination that matches the type of goods. (Imports for Arabia and Exports for China)

Setup

Players' pawns start in China. Each player starts with 10 Coins. Each player is dealt 5 cards from the deck.

The player with the most Trade cards goes first. If tied, the player with the most Guard cards goes first. If still tied, flip a coin. Play proceeds clockwise.

Free Trade Rule

Players at any time may trade cards from their hands with each other.

Turn Sequence

Players take turns. Each turn has 6 Phases:

1. Draw Phase
2. Buy Phase
3. Travel Phase
4. Bandit Phase
5. Sell Phase
6. End Phase

Draw Phase

Draw 3 cards and put them into your hand. If the deck runs out, shuffle the discard and draw from it.

Buy Phase

Note: A Caravan can carry a max of 5 Goods (cards). If you are in Arabia, you may place Import cards of One type (Gold, Silver, or Gems) onto your Caravan. If you are in China, you may place Export cards of One type (Silk, Tea, or Spices) onto your Caravan.

Each card of goods costs 1 Coin to buy. Note: You can have different types of goods on your caravan, but you can only buy one type per turn. If at a destination, you may discard a Trade card to draw 3 cards.

Travel Phase

You may play (discard) a Road card to move 1 Space on the track. You may play multiple road cards, but they must all be of one type. For example: You may play 3 Deserts, but not a Desert and a Mountain.

Caravans that share the same space may trade goods. You may discard a Guard card to move 1 extra space.

Bandit Phase

The player to your left may play (discard) a Bandit card on you. You may play (discard) a Guard card to negate this. If you do not negate it, you must discard 1 of the goods cards on your Caravan of your choice.

Sell Phase

If you are in Arabia, you may sell all the Export goods on your Caravan. If you are in China, you may sell all the Import goods on your Caravan. You get 2 Coins per good card sold.

Get an extra coin if you sold 2 types of goods. Get 2 extra coins if you sold all 3 types of goods. You may play (discard) a Trade card to earn an extra coin for each good you sell of 1 type.

Sold goods cards are discarded.

End Phase

Max hand size is 7 cards. Discard excess cards.

Card List Notation

I Import

- X Export
- R Road
- S Special
- # Number of copies of that card in the deck

Card List

Name	Type	#	Name	Type	#
Silver	I	6	Tea	X	6
Gold	I	5	Spices	X	5
Gems	I	4	Silk	X	4
Steppes	R	12	Bandits	S	5
Desert	R	10	Guards	S	5
Mountains	R	8	Trade	S	5

Optional Rule — Personalities

Make up a card for each personality. At the beginning of the game, each player gets to draw 1 personality

card.

Personality:	Notes:
Guide	You may draw 1 extra card in Draw phase if you are on a Road
Trader	Your hand size is +2
Merchant	All your Goods earn 1 extra coin when sold
Caravan Master	Your Caravan can hold up to 3 extra goods
Captain of the Guard	You are immune to Bandits

Silver Surfer

Introduction

Card Game with Silver Surfer Theme.

Disclaimer

The Silver Surfer is a copyrighted, licensed property. This is merely a Fan site.

Victory

Have the most Plot Points at the end of the game. The game ends when the deck runs out.

The Deck

Players share a common deck. There are 7 cards types:

- SK** Surfer Skill
- SE** Surfer Energy Attack
- SA** Surfer Allies
- SS** Surfer Speed
- ST** Surfer Toughness
- SB** Surfer's Board
- SC** Surfer Action
- V** Villains
- F** Foes
- X** Superpowers (Used by Villains)
- L** Locations
- P** Plots

Every card has a Plot Point (PP) Value.

Setup

The most brooding, cosmic, dramatic player goes first.

Card List

Card Name:	Type	PP
Cosmic Endurance	ST	5
Impervious to Elements	ST	5
Cosmic Blast	SE	8
Flying Board	SB	4
Space Born Skill	SK	9
Double Back	SS	6
Searing Energy	SE	8
Sky Rider	SK	9
Board Attack	SB	4

Turn Sequence

Players take turns. Each turn has 5 phases:

- Fate Phase
- Action Phase
- Resolution Phase
- Plot Phase
- Recovery Phase

Fate Phase

Draw cards from top of deck to Fill Hand to 8 cards.

Action Phase

Discard up to 4 cards and draw replacements.

Resolution Phase

You may play a Meld. A Meld is a card combo that must include:

1. Exactly one Foe or one Villain
2. Up to two Surfer cards* with PP \geq to the Foe or Villain
3. Up to one Location card
4. Up to one Superpower card if a Villain was played
5. One or two Plot cards.

* The Surfer cards cannot be of the same type.

Plot Phase

If you played a Meld gain PP = Total PP of the cards you played in the Meld.

Recovery Phase

You may discard any unwanted cards. Maximum ending hand size is 4 cards. Discard excess cards.

Card Name:	Type	PP

Simulchess

Objective

Capture the opponents King.

Setup

Normal chess setup. Paper & writing instruments needed.

Turn Sequence

Players take their turns simultaneously.

1. Write Move Orders in secret.

Indicate piece you want to move and where you want it to go.

2. Reveal Orders Simultaneously.
3. Move & Capture.

Special Rules

If opposing pieces are ordered into the same square, both are 'captured'. A piece cannot move this turn if it made a capture last turn. You can never order a piece to move into a square occupied by one of your own pieces.

Sin City

Introduction

Card game based on the Frank Miller Comic Sin City. 2+ Players. Common Deck.

Disclaimer

Sin City is a copyrighted, licensed property. This is merely a fan site.

Victory

The first player to accumulate 100 Sin Points is the winner.

Sin Points

Sin Points are referred to as Sins. Use Change to keep track of Sin Points.

The Deck

Players share a common deck. The deck has 2 card Types:

1. Characters
2. Events

Character Cards

Characters have 2 main stats: Fighting & Sinning.

Event Cards

Event cards are played when appropriate and are then discarded.

Dice

Six sided dice (D6) are needed.

Setup

Each player is dealt a hand of 7 cards. The most evil player goes first. (or roll high on 1D6)

Turn Sequence

Players take turns. Each turn has 5 Phases:

- Luck Phase
- Help Phase
- Sin Phase
- Kill Phase
- End Phase

Luck Phase

Draw 2 cards. If the deck runs out, shuffle the discard and draw from it.

Help Phase

You may put Character cards into play from your hand. Character cards are placed face up in front of you.

Sin Phase

Gain Sin Points equal to the Sinning Stat of each of your Characters in play.

Kill Phase

You may attack an opposing target Character with one of your Characters. The attacker must first roll 1D6: (The Find Roll)

#	Result
1-3	The attacker cannot find the Target.
4+	The attacker finds the Target and may attack.

Next both Characters roll dice equal to their Fighting Stat. The higher score lives. The lower score dies. In case of a tie, both die.

Killed Character cards are removed from the game. A Character may only attack once per turn.

End Phase

Max hand size is 7 Cards. Discard excess cards.

Heroes

Hero Characters cannot attack Victims. Heroes earn 10 Sin Points for killing Crime Bosses and Psychopaths.

Victims

Victim Characters cannot attack. They can defend of course.

Psychopaths

Psychopath Characters can only attack Victim Characters. They can even attack Victims controlled by the same player. Victims instead of being killed outright are captured and tortured.

Roll 1D6 at the end of each turn for each victim:

#	Rule
1-2	The Victim is killed (The Psychopath earns 1 extra Sin Point)
3-5	The Victim is tortured (The Psychopath earns 1 extra Sin Point)
6+	The Victim escapes

If the Psychopath is killed, all victims escape. If a Hero is defeated in combat by a Psychopath, he is treated like a Victim but gets a +1 to rolls on the above table. Note: Obviously Characters that are captured by a psychopath cannot Attack or generate sin points or conduct any other actions.

Criminals

Criminal Characters can attack Victims, Heroes, Agents and other Criminals. They earn 1 Sin Point for every Character they kill.

Agents

Agent Characters can attack Criminals, Crime Bosses, Heroes and other Agents. They earn 2 Sin Points for every Character they Kill.

Crime Bosses

Crime Bosse Characters cannot attack. A Crime Boss can only be attacked if the controlling player has no other Agents or Criminals in play. A player may only have one Crime Boss in play at a time.

#	Result
1-2	Look at an Opponents hand
3-4	Look at the next 1D6 cards in the deck.
5-6	Get +2 to a Find roll in Kill Phase this turn

Tough

If a Tough Character is killed, roll 1D6:

#	Result
1-3	Killed: Remove from game
4+	Survives: Put in Discard pile

Common Deck Character Card List

Card Name:	Type	Fight	Sin	Notes:
Dame	V	1	1	
Thug	C	2	1	
Private Investigator	H	3	1	Investigation
Serial Killer	P	4	3	Tough
Prostitute	V	2	1	
Model	V	1	1	
Photographer	V	1	1	Investigation
Assistant	V	1	1	

Doctor

Character Trait. When one of your characters is killed roll 1D6. On a roll of 6 the Character is not killed.

Defender

A Character with this Trait cannot attack. (But may defend)

Law

Character Trait. Instead of Attacking the Character may roll 1D6: On a roll of 6+ the target Character is apprehended by the police and Thrown in Jail: Discard the target character.

Investigation

If you have a character with this trait, you may in your Sin Phase roll 1D6:

Sino-japanese War

Introduction

Three Player Wargame. The first player is the Japanese. The second player is the Nationalist Chinese. The third player is the Communist Chinese.

The Map

Use a hex map of mainland China. Include about 20 cities on the map. Also include mountains and rivers.

Setup

All sides start with 20 armies. Use counters to represent armies. The Communists start in the Northwest. The Nationalists start in the Southwest and South. The Japanese start in the North and East.

Victory

The game ends after 9 years. Keep track of the year (turn number). The game starts in 1939 and ends in 1945. The Game ends right before the Atomic bombs are dropped. The player controlling the most cities at the end wins.

Yearly Turn Sequence

- Each year is divided into 4 phases:
1. Reinforcement Phase
 2. Japanese Action Phase
 3. Nationalist Action Phase
 4. Communist Action Phase

Reinforcement Phase

Each player gains a number of armies equal to: 1 Free Army + 1 Army for every 2 cities the player

controls. New Armies are placed in or adjacent to a controlled city.

Action Phase

During his action phase a player may move and attack with his armies. A player gets 20 action points (AP) at the beginning of his phase. Every time he moves an army or attacks with an army he must discard 1 AP. An individual unit may move and attack multiple times. Unused AP are discarded at the end of the turn. Armies may not stack. It costs 2 AP for an army to move into a Mountain hex. It costs 1 AP for an army to cross a River. All players may attack all other players.

Battles

The active player may attack an adjacent opposing army. Both players fill their hands to 10 cards. Players may discard up to 4 cards and draw replacements. Each card has a force value. Players add up the Force value of all their cards. Each player is limited to the number of cards of a certain type that he can Use in his hand. See the Card limit Tables. For instance the Nationalist player could use 8 Infantry max, but the Japanese player could use only 4 Infantry max. The Higher Force Total wins the battle. An Army attacking across a river gets -1 to its Force Total. An Army that already fought a battle this turn gets -1 to its Force Total. An Army defending in a city or mountain gets +1 to its Force Total. The defender wins ties. The losing army is destroyed. Used cards are discarded. Unused cards may be discarded or kept in the players hand to be used in later battles.

Nationalist Card Limit Table

Card Type:	Max:
Infantry	8
Tanks	1
Artillery	1
Fighters	1
Bombers	0

Card Type:	Max:
Tactics	2
Morale	2
Strongpoint	1
Leader	1

Communist Card Limit Table

Card Type:	Max:
Infantry	6
Tanks	1
Artillery	1
Fighters	1
Bombers	0

Card Type:	Max:
Tactics	3
Morale	3
Strongpoint	1
Leader	1

Japanese Card Limit Table

Card Type:	Max:
Infantry	4
Tanks	2
Artillery	2
Fighters	2
Bombers	1

Card Type:	Max:
Tactics	2
Morale	2
Strongpoint	1
Leader	1

The Deck

Card Name:	#	Force
Chinese Infantry	20	1
Infantry	20	1
Tanks	10	2
Artillery	10	2
Fighters	10	2
Flying Tigers	5	3

Card Name:	#	Force
Bombers	5	2
Tactics	10	2
Morale	15	2
Strongpoint	10	3
Leader	5	3

Number of that card in the deck.
Strongpoint cards can only be used by a defending army. The Flying Tigers count as Fighters. Flying Tigers can only be used by the Nationalist armies

against the Japanese.
Chinese Infantry count as Infantry. Chinese Infantry can only be used by Chinese armies.

Ski Race

Introduction

Card and Board game for 2-4+ players. Alpine Ski Race theme.

Victory

First player to reach the Finish line is the winner.

The Board

The board is a track 100 spaces long. The first space is the starting gate. The last space is the finish line.

Each space is assigned a random number from 1 to 10. When making a board roll 1D10 for each space. The starting space has a value of 2.

Pawns

Each player has 1 pawn representing their Skier.

The Deck

Use a common deck of cards. Aces have a value of 1. Jacks are wild cards: They are equal to the number of the space you are on.

Discard a Queen to draw 3 cards and keep 1. Discard a King to draw a card and look at your opponent's hand.

Setup

Players cut the deck. High cut goes first. Each player is dealt a hand of 4 cards.

Turn Sequence

Players take turns. Each turn has 2 phases:

1. Downhill Phase
2. Gate Phase

Downhill Phase

On your turn, you must play a card that is within 1 of the number of The space you are on. For example, if you are on a 4, you may Play either a 3, 4, or a 5. Move your pawn forward a number of spaces equal to the value of The card you just played. If you cannot play an appropriate card, you do not move, instead Discard your hand and Draw 4 new cards. (This is called "Missing the Gate") If after drawing 4 cards, you still do not have one can play, you are considered to have "crashed" and automatically lose the game.

Spaces with a value of 10 are jumps. On a jump space, you may play a card of any value.

Gate Phase

Draw 1 card from the deck. If the deck runs out, shuffle the discard and draw from it. If you landed on an opponents pawn this turn, you must look at their hand, and then immediately take another turn.

Skyie

Introduction

Fantasy with an arial bent.

Tactical Rules

Click [Fantasy Fliers: Small Unit Aerial Combathere](#) for the tactical rules.

World Background

The details of the war of the wizards is forever lost in time. The results of that war still afflict us and forever will. Eons later the residues of their mighty magics are still at work. Whole continents shattered into tiny fragments float in or above a sea of burning blood. The only way the isolated survivors could travel, trade, or communicate was by flying.

Everything that could fly was forced into service by whomever found it first. Things that should never fly were made to by magic and ingenuity. The landscape is still in ruins but the skies are filled with the most marvelous beasts and wondrous contraptions as never existed before. Men still travel, trade, and make war, but now they do it in the air on the backs of their creatures and creations in this world we now call Skyie.

Sights Of Skyie

Some of the remaining solid earth rises from the boiling blood sea, however, most of the land fragments (or rocks) float in the air at a variety of elevations. These fragments are moving or stationary. Some tumble. Some rise and fall into the sea. Smaller ones can

be pushed around. Most are land. Some have springs of pure water. Some have waterfalls that shower the fragments beneath. Some are balls of shimmering water or muddy swamp. Some are barren and others have giant trees. Some are giant veins of precious metals with mining towns forming scaffolding all around and underneath. The city-states have many fragments connected together by stone bridges. Far above these are the cloud cities of the Djinn and the Giants. Very isolated fragments are the roosts of hawkmen and hideouts of pirates. Great ships and swarms of flyers lay siege to Floating Castles that are held aloft by powerful spells. Tribal humanoids defend their tunneled-out rocks with great tenacity. There are rocks of solid Ice and others of burning sand. Small frags are the lairs of mythical monsters, hermits and even families. Great schools of flying fish are pursued by magical whales and the vessels of flying fishermen. Tremendous Storms, Magical Vortexes, and plumes of Fire may send fragments spinning out of their orbit.

The ruins of pre-cataclysm cities can be found exposed on the surface of many rocks. Artifacts of the ancient wizards still remain to be found. The faeries of the woods and waters have all sprouted wings and taken to the air. Insects have been magically bred into giant forms to serve as steeds. Demons and their horrible mounts rise from the depths burning sea in search of victims. Undead riders move from rock to rock killing the inhabitants and using the corpses to swell their ranks. Lawless barbarian raiders of all races take every chance to terrorize and pillage their neighbors. Skyie is a world of great beauty and even greater danger.

Sleep

Introduction

Card Game 2+ players. Players are trying to see who can get the best nights rest.

Game End

The game lasts 16 turns. Each turn represents Half an Hour. This would correspond to a full nights sleep of 8 hours.

Victory

The player with the most Sleep Tokens at the end of the game wins.

Sleep Tokens

Use a common pile of Tokens (counters, chits, markers, coins, etc) Players accumulate these during play.

Sleep Track

Each player has a Sleep Track. A Sleep Track has 5 Stages:

- Stage 0 (Awake)
- Stage 1
- Stage 2
- Stage 3
- Stage 4 (Slow Wave Sleep = Delta Sleep)
- Each player has a Pawn to show which Sleep Stage they are on.

Setup

Each player is dealt a hand of 2 cards. Each player starts at Sleep Stage 0.

Turn Sequence

Each turn is divided into 6 Phases:

- Draw Phase
- Sleep Phase
- Wake Phase
- REM Phase
- Score Phase
- End Phase

Card List

Card Name	Type	Notes
Sleeping Pills	F	

Draw Phase

Each Player draws 2 cards. If the deck runs out, shuffle the discard and draw from it.

Sleep Phase

Each player may Play (discard) a Sleep card to advance 1 Stage on the Sleep Track to a Deeper Level of Sleep (Towards stage 4) Each player may play up to 2 Sleep cards in this Phase.

Wake Phase

Each player may Play (discard) 1 Wake card to cause an opponent To move backwards 1 Stage on his Sleep Track. A single player may only be hit with 1 Wake card per turn.

Rem Phase

If you are at Stage 2 or deeper Sleep you may play (discard) 1 REM card. If you do this, move yourself back to Stage 1 Sleep. (You will score extra Sleep Tokens for this) You may play an REM card on an Opponent.

Score Phase

Each player gains Sleep Tokens equal to the Sleep Stage they are at. For Example: If you are at Stage 4 you would get 4 Tokens. If a player played a REM card this turn, he gets an extra 6 Tokens for A Total of 7 Tokens (1 for being at Stage 1 plus the bonus 6)

End Phase

Max hand size is 3 cards. Discard excess cards.

Card List Notation

- S** Sleep Card
- W** Wake Card
- F** Fall Asleep: Sleep Card: Can only be used in Stage 0.
- R** REM Sleep Card
- Z** Can be used as either a F card or a W card

Slimed

Introduction

Ghostbuster Backgammon. One player is the Ghostbusters (GB). The other player is the Ghosts.

Rules

Use a regular backgammon board. Same Rules as backgammon except for the following differences: The Ghostbuster player has on only 5 pieces. In setup these are placed one each on the last 5 points on his side of the board.

The Ghost player has 20 pieces. In setup these are placed in 4 stacks of 3 on the last 5 points on his side of the board. When a Ghostbuster piece captures a ghost piece it is sent to the bar.

The bar is called "The Containment Field". Ghosts cannot escape the bar. If a ghost captures a ghost-

buster the GB is "slimed".

A slimmed GB remains where it is trapped under the ghost that caught it. If the ghost moves, the GB is un-slimmed and may move. Any number of Ghosts may stack onto a slimmed GB.

If only one Ghost is slimming a GB, another GB may land on the Ghost and capture it, setting the first GB free. The GB wins when all the Ghosts are put in the containment field. The Ghosts win if all the GB are slimmed.

Pieces never "end-off" the board, they keep going around. Pieces continue to circle the board until the victory conditions are met.

Disclaimer

Ghostbusters is a copyrighted, trademarked property. This is only a fan-site.

Smart Gaming

by Themcganndoctor@aol.com

Smart Fundamental Rules - Simple Miniature Adventure Rules And Tactics

Introduction

These miniature rules may be used for fantasy or medieval miniature war gaming, but can easily be adapted to any genre. These rules were inspired from Little Armies by H. G. Wells and Kriegspiel.

Components

You will need plastic or metal miniatures (or counters) and, if you wish, some terrain (expensive, fancy terrain, or simple paper cutouts). You will also need a twenty sided die (d20).

Players

In addition to however many players are playing armies, one should follow the classic idea of having a Judge ("Time Keeper" or "Umpire"), to make rulings on combat resolutions. This is a simple game, and interpretation of rules will be an issue.

Scale

In the fundamental rules, one may use a 100:1, 10:1 OR 1:1 scale. All that matters is that the scale is constant for each and every unit.

The Rules

Set Up

Set up the table top as each player sees fit.

The Turn

1. THE MOVE

Each player rolls a d20. The highest number moves their miniatures first, then the next highest roll, and so on. FOOT SOLDIERS AND SMALL OR MEDIUM MONSTERS (goblins, skeletons, fairies, etc) move 6 inches in one turn. KNIGHTS AND LARGE MONSTERS move 12 inches.

The Judge will have to decide how terrain barriers, such as bushes and low walls affect movement rates. Obviously high walls and trees are complete barriers to one's path of movement.

2. PROJECTILES

Beginning with the first player (he who rolled the highest in the move phase), projectile combat is resolved (e.g., bows, crossbows, slings, etc.) The effective range for projectiles is 30 inches. For each inch past 30 inches, a +1 modifier is added to those units COMBAT ROLL.

The COMBAT ROLL IS RESOLVED BY THE PLAYER ROLLING A D20 FOR EACH UNIT FIRING. The base chance to hit an opponent is a roll of 11 or higher. Each +1 penalty for range is added to that base chance. So an archer aiming at a target 50 inches away must roll a 12 or higher in order to hit. If there is intervening terrain in the way of the target, one must roll a d20 if the combat roll is successful. If one rolls a 1-10, the arrow or bolt hits that obstacle instead. If one is firing into hand-to-hand combat, the same roll is made. On a roll of 1-10 one hits their own unit instead of the target.

The projectile phase continues with the Second Player, the Third, and so on till each player has a chance to fire their bows or crossbows.

3. HAND-TO-HAND

When two or more units approach 1 inch of each other they may engage in hand-to-hand combat. For the first turn of that combat the player with the longest weapon goes first, then the one with the second longest, and so on. Combat between units with equal sized weapons is simultaneous. If the units continue to fight each other in subsequent turns, then the order is reversed: the shortest weapon goes first.

The COMBAT ROLL IS RESOLVED BY ROLLING A D20. The chance to hit is a roll of 11 or higher. If one hits, then they score 1 point of damage. The armor that is worn by the unit is considered into this damage, by its ABSORPTION LEVEL. Each piece of armor may absorb one (1) point of damage for each level it has:

Leather Or Padding 1

Shield 2

Chain Mail 3

Plate 4

When there is no absorption level left for that unit, then the unit itself receives the next point of damage, and is defeated.

Dungeon Ideas

The Judge can arrange dungeon setting and labyrinths with wall terrain, to create a dungeon adventure for the players. Players may play a 1:1 scale,

working together to battle monsters that the Judge attacks them with.

Special Rules

Large Monsters

For Dragons and other large and powerful monsters, one may wish to give the monster an absorption level of 5, to represent its large size and tough hide. For dragons one may give it a special attack in the Projectiles phase with its dragon breath. Dragon breath may affect an area of 3 inches by 3 inches in front it, dealing out 5 points of damage to each unit in that area. In my NARNIA campaign, I give each unit a chance to make a FAITH role to avoid all damage from dragon breath or magic. If the unit rolls 11-20 on a d20 it avoids all damage from dragon breath or magic.

Coming Soon: Smart Basic Rules

- Skirmish rules
- unit experience
- tough monsters
- magic rules

Introduction

These rules are expansions to the SMART FUNDIMENTAL RULES. Unlike the FUNDIMENTAL RULES, these focus more on the Fantasy genre.

Experience

The experience rules provide a way to increase the effectiveness of veteran units. These rules can be used for any scale, whether it is 1:1 or 1:100, or more. When a unit defeats an enemy unit, it receives experience points (xp). As that unit accumulates more experience, its level rises. All units are considered to be 1st level when they enter a player's army. These rules are only for human units (infantry, archers and knights). The level of monsters should be always at a level decided by the Judge.

Unit Experience Levels

LEVEL	XP
1st level	0
2nd level	24
3rd level	54

The formula for xps needed to advance in level: levelxlevelx6

Unit Xps Awarded

LEVEL	XP
1st level	1
2nd level	4
3rd level	9

The Formula for xps awarded for defeat a unit: level squared (levelxlevel)

The Effects Of Experience

Combat (projectile And Hand-to-hand)

The target to hit is still the same (11-20 on 1d20). To hit a target, the unit rolls the 1d20 adds that attacking units Experience level to the roll, and subtracts the defending unit's experience level from the roll. If the modified score is 11-20, it is a hit. Other wise, no damage is inflicted.

Damage

The unit inflicts 1 damage point per level. A unit can absorb (after armor has absorbed as much damage as it can) as many damage points in a battle as it has levels (e.g., a 3rd level knight, after his plate armor and shield have absorbed their maximum damage, can receive 3 damage points before being defeated).

Sample Monsters And Their Levels

Examples are from my NARNIA SMART CAMPAIGN:

First Level Monsters

- goblins
- giant bats
- skeletons
- sprite demons

Second Level Monsters

ghouls hobgoblins magician (can cast two spells per battle) giant snake zombie

Third Level Monsters

- giant centipedes
- dwarf
- elf (can cast three spells per day)
- gnome

Very Simple Magic System

A creature, who can cast spells, has a range in inches equal to its level. If the battle is on a 1:1 scale, then its area of effect has a diameter equal to the spell caster's level. If the battle is not a skirmish (i.e., the scale is greater than 1:1, then the area of effect is 1 unit). The spell causes 1 point of damage per spell caster's level.

In my NARNIA CAMPAIGN, I give the good guys a FAITH roll to avoid all magic damage. The unit rolls 1d20: if the roll, with the unit's level added to it, is 11 or greater, they avoid all magic damage or effects. A fair Judge should also devise some sort of magic resistance roll for victim units.

Coming Soon: Smart Intermediate Rules

- More powerful sample creatures
- A larger experience list (so you don't have to do

the calculations yourself

- The importance of terrain (and tips on really inexpensive terrain!)

Soap Box

Introduction

Game of Oration. Players pretend to be USA presidential candidates.

Player Roles

There are 3 types of Player Roles:

1.	Candidates	At least 2 players
2.	Judge	One player only
3.	Citizens	All remaining Players

Setup

Players decide what roles they want to be. Determine how much time is available to play. The Judge picks which issues he wants to cover in the allotted time.

Sample Issue List

1.	Global Warming
2.	Over Population
3.	Stem Cell Research
4.	Middle East Peace Process
5.	Racism
6.	Abortion Controversy
7.	Domestic Economy
8.	Election Reform
9.	Term Limits
10.	Campaign Fundraising
11.	Star Wars Missile Defense

Sequence Of Play

The Judge picks one issue. Each candidate gets 2-5 minutes to address the issue. The Judge determines speaking order, rules of conduct, and watches the clock.

Candidates should explain how they as president of the USA would solve the problem. After all candidates speak on an issue, the Judge and the citizens vote to see which of the candidates they most agree with on that particular issue. The candidate that gets the most votes for that issue gets an "Electoral Vote".

If the Issue vote is a tie, neither candidate gets an Electoral Vote. At the end of the gaming session, the player with the most Electoral Votes wins the presidential election.

1.	Global Warming
12.	Iraq
13.	Education
14.	Energy Development
15.	Space Exploration
16.	Immigration Policy
17.	War on Drugs
18.	Foreign Relations with China
19.	Health Care
20.	AIDS

Solar Invasion 2100

Introduction

The year is 2100. Human beings have been intensively colonizing the solar system for the last 70 years in relative peace.

The Map

Each player gets an identical space hex map. Place a counter representing Earth in the center. Place the L4 and L5 space stations 15 spaces from earth on either side.

Place the moon 10 spaces from Earth. NEOSTAT or Near Earth Orbit Station is adjacent to Earth and moves 1 hex per turn in orbit clockwise. GEOSTAT-5 or Geo-synchronous Orbiting Station is 2 hexes from Earth and moves 1 hex per turn in orbit clockwise.

There are many more space stations and satellites in Earth orbit, however these are the only ones with weapons.

Victory

The Earth wins if all of the Mother Ships are destroyed. The fighters are not jump capable, and will self destruct. The Aliens win if Earth is destroyed.

Counters

Use counters or chits to represent units and Attack markers.

Setup

Units may stack. The Human player sets up first. The shuttles are located on Earth or NEOSTAT.

5 Transports are located at each of these 4 sites: NEOSTAT, the Moon, L-4, L-5. The Alien Fleet starts within 2 hexes of any 1 side of the map.

Reinforcements

Every 3rd turn the Earth gains the ability to launch one additional Missile per turn. 8 Transports arrive from Mars on turn 4. 2 Transports arrive from Venus on turn 6.

8 Excavators arrive from the Asteroids on turn 8. 6 Solar Sails arrive from Mercury on turn 10. 6 Ramjets arrive from Jupiter on turn 12.

Nuclear Warheads

The governments of Earth have more than 20,000 nuclear warheads in storage left over from earlier arms races. At the start of the invasion the earth can only

launch 8 per turn from Ground based launchers. Missiles launched from Earth and NEOSTAT are large ICBMs.

Missiles launched from shuttles & transports are smaller & have shorter ranges.

Lasers & Mass Drivers

The giant lasers on L-4, L-5, and GEOSTAT are for pushing Solar Sails around. There are other giant lasers in the solar system, but they are not effective weapons at this range. Numerous other stations have less powerful lasers, also for the same purpose. Solar Sail ships are capable of concentrating and redirecting these laser emissions.

The Tycho base Mass Driver is normally used to send materials mined on the moon to other locations. Special 'Catcher' Transport ships are used to recover the shipments. The excavator ships from the asteroid fields are actually small hollowed out asteroids filled with refineries. Small Mass drivers on board can be used for propulsion and as weapons. There are other mass drivers in the solar system, but they are not effective weapons at this range.

Ramjets are able to fire directed bursts of ionic plasma from their engines. Ramjets scoop up gasses from the outer atmospheres of the gas giants. The Mercury Solar Array collects solar energy from the sun. This energy is beamed to collector dishes at other far away stations in the form of Infra-red radiation.

The Aliens

The Kathar are still a young race: aggressive, and impetuous. They have conquered numerous other less militant races. They are currently fighting wars on several fronts.

Initial reconnaissance of Earth mistook us for a peaceful race. There was no reports of Nuclear Weapon stockpiles. A small task force was sent to enslave us.

The Kathar ships use antimatter energy weapons.

Turn Sequence

Both players go simultaneously. Each turn has 2 Phases:

1. Action Phase
2. Resolution Phase

Action Phase

Each player moves his units and places his attack markers on his own map. Players cannot look at each others maps. Each unit can move a number of spaces up to its speed rating.

Units may stack. If a unit is attacking, place an Attack Marker on the target space. The target space must be within the units range. U = Unlimited range.

Rotate counters 180 degrees to indicate that they have moved and attacked. All Shuttles and Transports start the game unarmed. Up to 7 Shuttles and/or Transports can be loaded with Missiles per turn in near earth orbit.

Once armed these units have enough missiles for the rest of the battle. Alien Ships may not move onto moons, planets, or stations.

Resolution Phase

Players look at each others maps. If an attack marker occupies the same hex as an enemy unit, than

that unit takes 1 Hit of damage per attack marker. Remove the Attack markers from the board once resolved or leave them stacked on the Target to keep track of damage.

Any unit that takes damage equal to or in excess of its hits is destroyed and removed from the board. If there is more than 1 enemy unit stacked in the space, all are hit by the attack.

Alien Counter List

Unit Name	#	Speed	Range	Hits	AMN
Mother Ship	6	3	E/10	5	24
Fighters	60	6	E/5	1	60

Each Mother ship can make 4 attacks per turn.

Number of that type of unit in the fleet

E Energy weapons

U Unlimited

AMN Attack markers needed

Human Counter List

Unit Name	Number	Speed	Range	Hits	AMN	Loc
Shuttles	20	2	M/4	1	20	Earth
Transports	30	4	M/4	1	30	Earth, Moon, Mars, Venus, L-4, L-5
Solar Sails	6	5	L/5	1	6	Mercury
Excavators	8	4	R/3	1	8	Asteroids
Ramjets	6	8	E/2	1	6	Jupiter
L-4 Colony	1	0	L/U	15	1	L-4
L-5 Colony	1	0	L/U	15	1	L-5
Tycho Base	1	0	R/U	20	R	Moon
Earth	1	0	M/12	30	8	Earth
NEOSTAT	1	1	M/20	10	2	NEOSTAT
GEOSTAT-5	1	1	L/U	5	1	GEOSTAT-5
Mercury Solar Array	1	0	L/U	-	1	Mercury: Off Map

Note: the Mercury Solar Array is off the map and cannot be attacked. Earth can launch 8 Missiles per turn and NEOSTAT can launch 2.

Number of that type of unit available

M Missiles

L Lasers

E Energy weapons

U Unlimited

AMN Attack markers needed

Loc Starting Location

Single Board Variant

Use just one hex map. All units from both players are on the same map. Attack counters are unnecessary if the attacks are resolved immediately.

Players take turns moving and attacking. The Aliens go first. To resolve an attack roll a six sided die: On a roll of 1-3 the attack misses.

On a roll of 4-6 the attack hits.

Solar Racers

Introduction

Card game. Space race game for 2+ players.

Winning

The first player to travel 100 AU (Astronomical Units)

The Deck

Players share a common 65 card deck

Card Types

There are 4 major card types:

- 1. Propulsion
- 2. Difficulty
- 3. Breakdown
- 4. Repairs

Setup

Each player is dealt a hand of 7 cards. Youngest player goes first.

Turn Sequence

Players take turns. Each turn has 4 Phases:

- 1. Astrogation Phase
- 2. Propulsion Phase
- 3. Breakdown Phase
- 4. Repair Phase

Astrogation Phase

Draw 1 card from the top of the deck and put it in your hand. If the deck runs out, shuffle the discard pile and draw from it.

Common Deck Card List

#	Type	Title:	Notes:
7	P	Solar Sail: Solar Wind	Travel 5 AU
5	P	Solar Sail: Solar Flare	Travel 10 AU
3	P	Solar Sail: Orbital Lasers	Travel 20 AU
7	P	Ramscoop: Space Dust	Travel 5 AU
5	P	Ramscoop: Ion Cloud	Travel 10 AU
3	P	Ramscoop: Stellar Gas	Travel 20 AU
7	P	Slingshot: Planetoid	Travel 5 AU
5	P	Slingshot: Planet	Travel 10 AU
3	P	Slingshot: Gas Giant	Travel 20 AU

Propulsion Phase

Every propulsion card has an AU (Astronomical Units) value of distance. There are 3 types of Propulsion every players ship is capable of:

- 1. Solar Sail
- 2. Ramscoop
- 3. Slingshot Effect

Play one or more cards of a single type. Your ship travels the combined distance in AU's. Your opponent may play a Difficulty card to negate one of your Propulsion cards of the appropriate type.

Record the distance you traveled this phase.

Breakdown Phase

You may put a breakdown card from your hand onto one of your opponents. That opponent cannot play Propulsion cards of the indicated type. The breakdown stays in play until it is repaired.

Repair Phase

You may play a Repair card to discard a Breakdown card of the indicated type that Is affecting your own ship.

Card List Notation

- # Number of copies of that card in the deck.
- P Propulsion
- D Difficulty
- B Breakdown
- S Repairs

#	Type	Title:	Notes:
2	D	Sunspot	Negate Solar Sail Card
2	D	Empty Space	Negate Ramscoop Card
2	D	Navigation Error	Negate Slingshot Card
2	B	Micro-meteor Damage	Cannot use Solar Sail Cards
2	B	Reactor Meltdown	Cannot use Ramscoop Cards
2	B	Superstructure Cracks	Cannot use Slingshot Cards
2	R	Panel Refit	Fix Micro-meteor Damage
2	R	Core Stabilization	Fix Reactor Meltdown
2	R	Robotic Soldering	Fix Superstructure Cracks
2	R	Space Station	Fix any Breakdown

Cardset Available

Cool Set! Thanks ShaunGamer. From Paper Worlds

Solitaire Conquest

Introduction

Solitaire board and card game with a fantasy conquest theme

The Board

Draw a map of a continent with 12 connected regions. Name them if you like. Each region must be large enough to hold one stack of cards.

The Decks

There are two decks: The Foe deck and the Ally deck. The Foe deck has 44 cards.

Setup

11 of the 12 regions are dealt 4 cards each. These stacks of 4 cards are called 'Hordes'. Horde cards are face up.

Place a pawn in the empty space. The pawn represents your army.

Turn Sequence

Each turn has 4 Phases: Raise Army Phase Reinforcement Phase March Phase Conquest Phase

Raise Army Phase

Draw 3 cards from the Ally deck.

Reinforcement Phase

You may draw one card from the Ally deck. You may repeat this phase.

Horde Card List

Card Name	Force	Type	#
Hill Giant	1	G	2
Stone Giant	2	G	2
Ice Giant	3	G	2
Fire Giant	4	G	2
Cloud Giant	5	G	1
Storm Giant	6	G	1
Titan	7	G	1
Kobold Mob	1	H	2
Goblin Warparty	2	H	2
Orc Warband	3	H	2

March Phase

You may move your pawn one or more regions. You must end your move adjacent to a region with a horde.

Conquest Phase

You may destroy one Horde in region that is adjacent to your pawn. Your army must have a higher Force total than the target Horde. Each card has a Force value.

A Horde gets +1 if it has two cards of the same type. A Horde gets +2 if it has three cards of the same type. A Horde gets +3 if it has four cards of the same type.

Discard the destroyed Horde. Discard all your Ally cards.

Winning

If you destroy all the Hordes you win. Defeating all the Hordes scores 10 points. Every card left in your Ally deck scores an additional point.

Losing

If you are unable to destroy all the Hordes you lose.

Card List Notation

- G** Giants
- H** Humanoids
- U** Undead
- D** Dragon
- #** Number of that card in the deck

Card Name	Force	Type	#
Skeletons	1	U	2
Zombies	2	U	2
Ghouls	3	U	2
Ghasts	4	U	2
Wights	5	U	1
Wraiths	6	U	1
Vampire	7	U	1
Fire Drake	1	D	2
Wyvern	2	D	2
White Dragon	3	D	2

Card Name	Force	Type	#
Hobgoblin Riders	4	H	2

Monks	1	H	2	
Zealots	2	H	2	
Crusaders	3	H	2	
Clerics	4	H	2	
High Priest	5	H	1	Other Holy Men get +1
Paladin	6	H	1	+1 vs Undead
Saint	7	H	1	+2 vs Undead

FAQ's 1) Does the player's army have any force value? —Yes of course. An army of a Monk(Force = 1), a Hero(Force = 7) and Elf Warriors(Force = 3) would have a total force = 11 (13 vs a Horde with 1 or more Dragons) 2) Can you use all of the allies in your hand in a given battle? —You have to use all of them. 3) The first phase allows you to draw 3 allies, the next phase allows you to draw 1 and then another 1. If you can always draw 5 allies what is the purpose of having 2 phases? —You can draw as many as you like. The 2 phases was supposedly to avoid confusion (Oh well) 4) You lose if you don't defeat all the Hordes. That implies that you only go through the ally deck once. Correct?

—Absolutely correct.

5) There is a point bonus for conserving allies. Is there any standard to evaluate the quality of victory? That is, if you get only the bare 10 points it's a marginal victory, if you have 15 points it's a great victory, if you have 20 points it's a spectacular victory, etc. By the same token, is there any standard to evaluate the quality of defeat? That is, if you have only 1 region left unconquered it's a temporary defeat, if you have 3 left unconquered it's a campaign defeat, if you have 5 left unconquered it's a catastrophic defeat, etc. —Sounds good to me.

Solo Crusade

by zak965

Ver 1.1 Solo Crusade is a simple set of rules to play a solo adventure with your favourite RPG. The underlying idea is very simple: one or more pools of "tiles" are used to represent the map, the encounters, the events and in general every possible obstacle/help during your quest. Using a pool of tiles rather than simply roll some dices to create the adventure has a some major of advantages

- visual representation of your travel: the tiles played on the table are much more "satisfactory" than a never-ending sequence of dice rolls.
- Better control of the random factor: you can have tiles that can be drawn only once, tiles that are replaced when played

Game Material

- Your favourite RPG rules
- (www.opengamingfoundations.com)
- Paper and pencil
- A good number of tiles

To create the tiles I personally use 3x3 cardboard counters where I paint a simple icon: with this technique I can add tiles very quickly and at zero cost. Alternatively you can use create some images with your computer or re-use old CCG cards.

Character Creation And Advancement

You can choose any character you like: only a small list of skills will be used (Climb, Search, Wilderness Lore, Jump, Gather Information) so you should reduce the skill points available. For the advancement you can use the CR of the monsters and traps: another mechanism is to set a fixed XP value for each adventure.

Pool Composition

Normally the adventure include one basic pool (Travel Pool) that represent the terrain you're moving trough: this pool include

- basic terrain (ex: Plains)
- encounters
- help (ex. healer)
- interesting places (village, market)
- obstacles
- the destination of the travel
- an intermediate location

Each adventure will describe the exact nature of the tile: as an example one Obstacle could be represented by a "Wrong Path" tile where you must test your scout skills to progress in the adventure or suffer the

negative effects. Basic terrain tiles roughly represent 1 day of travel without specific encounters: these tiles make possible to heal (at the usual rate) and eventually camp (spending more than one day on a place without travelling - needed to heal quickly). Some basic terrains can include a side effect: as an example on a

Encounters can be fixed (a tile represent a specific foe) or random: in this case you can have a specific pool that include the different enemies or use a dice to generate a random enemy. Obstacles normally will need a skill check (climb, search, dex) to avoid them: if the skill check is not successful you will suffer a negative outcome, normally a loss of hit points (wound, disease, poison) or a forced reshuffle of the tiles already played. Intermediate locations are used to create a longer path to the final destination: in this case at the first reshuffle the Travel Pool will include the intermediate location and not the final destination. When you reach the intermediate location you remove this tile, put the final destination tile on the Travel Pool, reshuffle the pool and continue your travel. A typical intermediate location is the "Stair" tile on a dungeon: every time you reach a Stair tile you can go down one level in the dungeon (where enemies will be stronger and treasures richer); depending on the depth of your dungeon you will have to draw a number of Stairs tiles (going trough the pool obviously) before meeting the Dungeon Boss.

Leaving An Adventure

You leave the adventure normally to fully recover your health without the need for camping or if you want to equip yourself. Since you're supposed to follow the same path backward (and now you know the obstacles on the way home) you don't need to draw any tile: some adventures will allow to leave the quest automatically while sometimes you will need to check for any encounter on the way home.

Healing

You can normally heal at the standard rate only on the basic terrain tiles: you can alternatively camp on the same tiles to speed up the healing with less risk. Each adventure define the probability of an encounter while camped.

Adventure Format

I will use the d20 rules as a base for the Encounters, Traps and Treasure. Skill checks: a skill check is written in the following format

Skill Name (DC)

Where DC is the standard Difficulty Class of the d20 rules. As usual, to pass a skill check roll 1d20 and add the skill value: this value must be greater or equal to the DC. Reshuffles: a formula R(x) means that you must take at least x played tiles, put them on the relative pool and reshuffle. R(*) means that all the tiles must be reshuffled. Unless specified otherwise

the selected tiles must include, if possible, at least one encounter or obstacle tile; unless specified otherwise you cannot choose a "positive" tile.

Adventure #1

The wilderness (lev.1) Pool #1 (Travel)

#	Icon	Description
7	Plain	-
2	Obstacle	Climb(10) or R(3)
2	Encounter	roll on the encounter table
1	Wrong Path	Wilderness Lore (10) or R(*)
1	Bandit Camp	Final destination: 1 Bandit Leader + 1d3 bandits
1	Trail Lost	Wilderness Lore (8) or R(*)
1	Recent tracks	Intermediate location
-		replace with Bandit camp and R(*)

At the adventure start remove the Bandit Camp tile: when the Recent tracks tile is drawn replace it with Bandit Camp and reshuffle. Healing and camp are only possible in the Plain tiles.

Camp

Roll 1d6: on a result of 6 you face 1d2 bandits. Add +1 to the roll for every consecutive day spent without travelling. Leaving the Wilderness You can leave the adventure in any moment - roll 1d6 following the camp rules and, after defeating any enemy, you can leave the Wilderness. Encounter Table (1d10)

D10	Result
1	Bandit
4	Darkmantle
5-6	Viper

D10	Result
7-8	Wolf
9	1d3 bandits
10	Boar*

* Boar charge: if the initiative roll of the Boar is twice or more your roll then the Boar gain a +3 on the first attack and double any damage. Treasure Only bandits have a treasure: roll on the Level 1 treasure table for Coins and divide by 10 the result. Once on

the Bandit camp you can roll for a full Level 1 treasure plus a roll the full gold (this represent the Leader gold).

Adventure #2

The Hobgoblin forest (lev 1) Pool #1 (The forest)

#	Icon	Description
10	Forest	-
2	Encounter	Roll on the encounter table
1	Trap(Pit)	Search(10) or 1D6 hits
1	Closed Area	Wilderness Lore(8) or R(*)
1	Trail Lost	Search(15) or R(3)
1	The Lair	Final destination: you can now use pool #2

Pool #2 (the Lair)

D6	Result
1-4	hobgoblin
5	2 Hobgoblin
6	3 Hobgoblin

#	Icon	Description
7	Empty	(corridor or empty room)
2	Trap(Pit)	Search(10) or 1D6 hits
1	Dead End	R(*)
1	Main Room	Final destination. Roll 1d6:

Main Root:

If the first tile drawn is the Main Room take another tile, put the Main Room back on the pool and reshuffle. Encounter Table (1d8)

D8	Result
1-4:	Hobgoblin
5:	Darkmantle
6-7:	Goblin
8:	Dire Wolf

Treasure

No treasure for the enemies in the forest: roll once for a standard treasure once in the Main Room of the

Lair. Camp (only on the Forest tiles) Roll 1d6: on a result of 6 you face 1 hobgoblin. Add +1 to the roll for every consecutive day spent without traveling. Leaving the Forest You can leave the adventure in any moment - roll 1d6 following the camp rules and, after defeating any enemy, you can leave the Forest.

Adventure #3

The Hobgoblin forest (lev 2): the hunt for the tribe Pool #1 (The forest)

#	Icon	Description
10	Forest	
3	Encounter	Roll on the encounter table
1	Trap(Pit)	CR 1; no attack roll necessary (1d6);
-		Reflex save (DC 20) avoids; Search (DC 15)
1	Closed Area	Wilderness Lore(8) or R(*)
1	Trail Lost	Search(15) or R(3)
1	The Lair	Final destination: you can now use pool #2

Pool #2 (The Lair)

#	Icon	Description
10	Empty	(corridor or empty room)
2	Trap(Pit)	CR 1; no attack roll necessary (1d6);
-		Reflex save (DC 20) avoids; Search (DC 15)
1	Dead End	R(*)
2	Encounter	Roll 1d6:
-		1-4 = 1d2 Hbgoblins,
-		5-6 1d3+1 Hobgoblins
1	Secret Passage	Search(DC 10): if successful take the next 2 tiles and
-		skip one of the tiles and use the other OR
-		use both tiles in the desired order
1	Stair	Replace with Main Room and R(*)
1	Main Room	

Final destination. 1 Hobgoblin leader, 1 Ogre, 1d3 Hobgoblins When entering the Lair remove the Main Room tile: when the Stair tile is drawn replace it with

Main Room and reshuffle. If the first tile drawn is the Stair take another tile, put the Stair back on the pool and reshuffle. Encounter Table (1d8)

D8	Result
1-3:	Hobgoblin
4:	2 Hobgoblins
5:	Darkmantle

D8	Result
6-7:	1d3 Goblins
8:	Dire Wolf

Treasure

No treasure for the enemies in the forest and in the Dungeon: once on the Main Room roll once for a Level 2 treasure and once for a Level 1. Camp (only on the Forest tiles) Roll 1d6: on a result of 5-6 you face 1d3 hobgoblin3. Add +1 to the roll for every consecutive day spent without traveling. Leaving the Forest You can leave the adventure in any moment - roll 1d6 following the camp rules and, after defeating any enemy,

you can leave the Forest. Roll twice if you are in the Lair.

Adventure #4

The Black Pit (lev 2-3) The Black Pit is an old dungeon where a wizard was used to experiment the creation of unholy creatures. A lot of treasures are kept well secured by the inhabitants of these dark places. Pool #1 (level 1)

#	Icon	Description
6	Corridor	-
2(3)	Encounter	Roll on the Encounter table. Use 2 tiles in the 1st level and 3 tiles on the 2nd level.
1	Library	Roll 1d100: 20% of finding one random Minor Scroll
1	Laboratory	Roll 1d100: 20% of finding a random Minor Potion
3	Room	Draw a tile from the Rooms pool
1	Trap	Roll 1d6:
-		1-4 (arrows) CR 1; +10 ranged (1d6/x3 crit); Search (DC 20)
-		5-6 (pit trap) CR 1: Search (DC 15);
-		if you fail the roll you fall on a pit with 2+1d3 Rats.
-		To leave the pit: Climb (DC 10) - on a roll of 1-2 you
-		suffer 1d4 hits for the fall.
1	Trap	Roll 1d6:
-		1-3 (poison arrow) CR 1; Search (DC 20) - no roll for damage:
-		automatic 1d4 hits and poison (Injury DC 11,
-		intial and secondary damage: 1d2 Dex)
-		4-6 (scything blade) CR 1; +8 melee (1d8/x3 crit);
-		Search (DC 21)
1	Stair	Replace with Main Room and R(*)
1	Main Room	Final destination: roll on the Encounter Table
1	Dead End	R(*)
1	Secret Passage	Search(10): if successful take the next 2 tiles and
-		skip one of the tiles and use the other OR
-		use both tiles in the desired order

Pool #2 (Rooms)

#	Icon	Description
3	Empty Room	-
1	Item	Roll 1d100: 20% of finding one random Mundane item
1	Gem	Roll 1d100: 20% of finding one random gem
1	Trap	(arrow) CR 1; +10 ranged (1d6/x3 crit); Search (DC 15)
1	Potion	Roll 1d100: 20% of finding one random Minor Potion
1	Gold	Roll on the level 1 gold column
1	Weapon	Roll 1d100: 20% of finding one random Minor Weapon

Note: on Level 2 the percentage to find any treasure is 30% When entering the dungeon remove the Main Room tile: when the Stair tile is drawn replace it with Main Room, add the third encounter tile and reshuffle

If the first tile drawn is the Stair take another tile, put the Stair back on the pool and reshuffle. Encounter Table (1d8)

roll	Level 1	roll	Level 2
1	Ogre	1	Ogre
2	Monstrous Spider (medium)	2	Monstrous Spider (Huge)
3	Monstrous Scorpion	3	Monstrous Scorpion
4-5	Worg	4-5	1d3 Worg
6-7	1d4 Gnoll	6-7	1d3 Monstrous Centipede
8	HellHound	8	1d3 HellHound

Treasure

No treasure for wandering monsters the Dungeon: once on the Main Room roll once for a Level 3 treasure and once for a Level 2.

Camp

You cannot camp inside the dungeon. Leaving the Black Pit You can leave the adventure in any moment - roll 1d6: on a result of 6 roll on the Encounter Table; add +1 to the roll if you're on Level 2.

Solo Rules For Mythos

Objective

Rules for common deck Solo play.

To Win

Complete any one Adventure card you have drawn. You immediately lose the game if your investigator is ever reduced to zero or less sanity.

Setup

Take all of your Mythos cards and shuffle them together in a common deck, including adventure cards. Add and remove cards to suit your tastes. Pick an investigator. You start with no cards in your hand.

Draw and discard cards until you get a location card. Put that location into play.

Turn Sequence

When you have nothing else you can do draw a card. Some cards have to be played immediately, others can be put in your hand. Maximum hand size is 13 cards. Discard excess cards.

If you draw a location card of the same region as your current location immediately put it into play and discard the previous location. If you draw a location card from a different region, you may go there if you discard an appropriate travel card from your hand, otherwise put the location card in your hand. You can always go to Dream locations from anywhere.

From a Dream location you can to any other location. If you draw an ally, tome, or artifact card you may put it into play if you are at a matching location, otherwise put it in your hand. If you draw a corrupt cultist you are immediately attacked by it.

If you draw a monster while at a gate site you are immediately attacked by it, otherwise discard it. Ignore joining. The strength of an attacker causes a loss

of that many sanity points, or points worth of allies. Allies receiving any damage are discarded. If you draw a spell card you may attach it to an appropriate card, otherwise put it in your hand.

Spell cards are discarded as soon as they are cast. If you draw a phobia card it effects you. If you draw an adventure card set aside in a separate pile. If you complete this or any adventure card you draw, you win the game.

A "round" now means the next three draws. A "turn" now means until the end of all responses to the next draw. If you draw a great old one it immediately goes into play and replaces the previous great old one.

Reinterpretation Of Cards

Many cards that target your opponent, will have no affect in solo play. For example: "Curse of the Rat thing" does nothing. The "Tiara of Opulent Fantasy", "Ambush", and "Mist of R'lyeh" do nothing.

Cards that increase the value of your threat now instead decrease the strength of attackers. For example: "Unaussprechlichen Kulten" decreases the the strength of living dead by 1. Other cards now target the last card drawn instead of your opponent. For example: "Yithian Mental Contact" can be used to negate a card just drawn and "Instability in the Mythos" can negate an attacker just drawn.

Spells that target opponent's allies now target attacking corrupt allies. Some event cards now target you instead of your opponent. For example: "Townfolk Riot" targets your investigator. Event cards now target your allies instead of your opponents allies. For example: "Influenza" and "Hound of Tindalls" target your allies.

In addition to these examples, many more cards have to be reinterpreted, a task left to the eager investigator.

Somalia 93

Introduction

Card game for 2 players. Theme: The US Mogadishu Operation in Somalia on October 3, 1993. One player is the Americans. The other player is the Somalis.

Decks

One player uses the American Deck. The other player uses the Somali Deck. Each deck has 45 cards. Each deck has 3 suites and 15 cards in each suite. The 3 suites in the American deck are:
S Soldiers
W Weapons and Vehicles
T Tactics
The 3 suites in the Somali deck are:
C Combatants
F American Friction (& Blunders)
T Tactics & Weapons
Each card has a Force Value from 1 to 5.

Turn Sequence

Each turn has 5 phases: Logistics Phase Deployment Phase Contact Phase Combat Phase Casualty Phase

Logistics Phase

Each player draws 7 cards from his own Deck. If the deck runs out, shuffle the Reserve pile and draw from it.

Deployment Phase

Each player may discard up to 5 cards to their Reserve pile and draw replacement cards. If the deck runs out, shuffle the Reserve pile and draw from it.

Contact Phase

Both players reveal their hands. They place their cards face up on the table.

American Card List

Card Name	Type	Force
Medics	S	3
Sergeant	S	2
Sniper	S	4

Combat Phase

Each player determines their Combat Force Total (CFT) for their hand: The American Player adds up the Force Values of all Soldier cards and adds 1. This is the Soldier Total (ST). The American Player adds up the Force Values of all Weapon cards and adds 1. This is the Weapon Total (WT). The American Player adds up the Force Values of all Tactics cards and adds 1. This is the Tactics Total (TT).
 $American\ CFT = ST \times WT \times TT$
The Somali Player adds up the Force Values of all Combatant cards and adds 1. This is the Combatant Total (CT). The Somali Player adds up the Force Values of all Friction cards and adds 1. This is the Blunder Total (FT). The Somali Player adds up the Force Values of all Tactics cards and adds 1. This is the Tactics Total (TT).
 $Somali\ CFT = CT \times FT \times TT$

Casualty Phase

If the Somalis have a higher total, the Americans suffer 8 casualties. If the Americans have a higher total, they suffer 2 casualties. Flip a coin if there is a tie.

Object

If the Americans win 3 hands in a row, they are able to extract their comrades and escape. The game ends when this happens. Count the total number of American casualties. Compare this to the actual number of casualties (91). The American player "wins" if his total is less. The Somalis "win" if the total is more.

Turn By Turn

The American player draws 8 cards in the first 2 turns because of surprise. The Somali player draws 8 cards on turns 5-14 because of superior numbers. On turns 15+ the American player draws 9 cards because of the arrival of the Armored Column.

Sopwith

Introduction

Dice game for 2 players. WWI theme. Ariel Dogfight. One player is a British Sopwith Camel.

The other is a German Fokker Triplane.

Dice List

DX	Stat:	Sopwith	Fokker
20	Visibility	+2	-
12	Speed	+1	-
10	Maneuverability	-	+1

Visibility

20 Sided Die. The Sopwith pilot had better visibility.

Speed

12 sided Die. The Sopwith had less drag, and was faster than the Triplane. The Sopwith pilot, having more visibility and speed than his Opponent, could often choose if and when a fight would happen.

Maneuverability

10 Sided Die. The Triplane had greater wing surface and hence more Lift than the Sopwith. The Triplane was less stable and so, more maneuverable than the Sopwith.

The Triplane, with greater Lift and maneuverability, often had an advantage in a Dogfight.

Hit Table

1D8	Result:	Notes:
1	Pilot Killed	Plane crashes
2	Bail Out	Pilot Parachutes out or makes crash landing
3	Engine Hit	Speed -2
4	Steering Hit	Maneuverability -1
5	Pilot Wounded	All Stat Rolls -1
6	Smoke	Visibility -2
7	Structural Damage	Defense -1
8	Fire	All Stat Rolls -1

Stalling

On a natural Roll of 1 on the Maneuver roll the plane stalls. Roll 1D6: On 4-6 the Sopwith regains

Victory

Shoot your opponent out of the skies.

Dice

Each player has a set of 5 dice of a unique color.

DX	Stat:	Sopwith	Fokker
8	Firepower	-	-
6	Defense	-	+1

Firepower

8 Sided Die. Both fighters had similar armaments

Defense

6 Sided Die. The Triplane was sturdier and could take more damage.

Turn Sequence

Both Players roll their 5 dice. (Get +1 to all rolls if you were the Attacker last turn) The player with the higher visibility score is the Attacker. The other player is the Defender.

If the Defender has a higher Speed, he may choose to escape, and end the turn. If the Defender has a higher Maneuverability, he becomes the Attacker, and his Opponent is now the Defender. If the Attacker has a higher Firepower score than the Defender's Defense score, the Defender is hit, and must roll on the Hit Table:

control and does not crash. On 5-6 the Triplane regains control and does not crash.

Ace Pilot Skill Table

1D6	Result:	Notes:
1	Speed Demon	Speed Roll +1
2	Natural Spotter	Visibility Roll +1
3	Barnstormer	Maneuverability Roll +1
4	Marksman	Firepower Roll +1
5	Survivor	Defense Roll +1
6	Dogfighter	Player may reroll one of his rolls each turn

Sorcerers

Introduction

Card game for 2 Players. Based on the movie "Sorcerers Apprentice". One player is the good Merlinians. The other is the evil Morganians.

Disclaimer

Sorcerers Apprentice is a licensed, copyrighted property. This is merely a fan site.

Victory

The Merlinian player has 2 ways to win:

- 1. Destroy Morgana: Defeat her by 7 or more power in a Combat.
- 2. Prime Merlinian Succession: Keep Dave Stutler in play for 7 consecutive turns. The Morganian player has 1 way to win:
 - 1. Cast the Rising Spell: Keep Morgana in play for 5 consecutive turns. Both players may win by the following method:
 - 1. Army of Sorcerers: Have 6 more Sorcerers in play than your opponent in End Phase. Note: when counting Consecutive turns, the count is made in Event phase.

Time Markers

Use these to keep track of turns in play for Dave and Morgana.

The Deck

Players share a common deck. There are 7 card types:

- Merlinian Sorcerers
- Morganian Sorcerers
- Spells
- Amplifiers
- Objects
- Events
- Defense

Setup

Shuffle the deck. Both players draw 5 cards. The Merlinian player starts with Balthazar in play and the Grimhold which is equipped to Balthazar.

The Morganian player starts with Horvath in play.

The Grimhold

The Grimhold is a special object. It starts in play and can never be discarded, however it can be stolen.

The FIRST time any of the following Sorcerers are played, the player playing them must control the Grimhold, that is, it must be equipped on to one of his Sorcerers: Morgan Le Fay, Sun Lok, Abigail Williams, Veronica Gorloisen

Dice

These are helpful for randomly selecting Sorcerers in Encounter phase.

Cards In Play

Only Sorcerer and Object cards are considered to be "In Play". These cards are not immediately discarded at the end of the phase in which they are played. They remain face-up on the table in front of the player that controls them until some combat or spell effect causes them to be discarded. Objects must be equipped (or attached) to a Sorcerer. They are placed touching or overlapping the sorcerer card.

A sorcerer may have up to 3 Objects attached. If a Sorcerer is discarded in a Duel, the Sorcerer who dispatched him gets his Objects. If that Sorcerer has too many, discard the excess. The Grimhold must be kept. It cannot be discarded and must be kept in play, even if there are no sorcerers remaining, in which case it will automatically equip to the next sorcerer to come into play on any side.

Turns

Turns can represent any period of time from a few seconds to years.

Turn Sequence

Each turn has 6 Phases:

1. Lore Phase
2. Recruit Phase
3. Event Phase
4. Encounter Phase
5. Duel Phase
6. End Phase

Lore Phase

Both players draw 2 cards from the deck. If the deck is empty, shuffle the discard and draw from it.

Recruit Phase

You may put one Sorcerer into play from your hand and any number of objects. Your sorcerers may give their objects to each other (Max 3 Objects per Sorcerer). Excess objects are discarded.

The Merlinian player may only recruit Merlinian Sorcerers. The Morganian player may only recruit Morganian Sorcerers.

Event Phase

Starting with the Merlinian player, players may take turns discarding cards with Event Abilities to activate and immediately resolve those abilities.

Encounter Phase

Each player randomly picks one of their Sorcerers. Use Dice to facilitate this if necessary.

Duel Phase

Also called Combat Phase. The two Sorcerers who have encountered each other will now fight.

FIRST Each player will make an Attack Combo: Attack Combos are revealed Simultaneously. For their Attack Combo each player may play:

- One Spell
- One Event
- Up to 3 Amplifiers

All cards have a Power Rating. Some cards will cause certain opposing cards to be discarded or be reduced in Power.

SECOND Derive a Power Total for each Sorcerer: Add the Sorcerers power (Innate power as listed on his card) plus his equipped objects plus his Spell plus any played Event and/or Amplifiers.

THIRD Each player may play up to one Defense Negation Card. These will cause certain opposing cards to be discarded, thus changing the Power Totals.

FOURTH Determine Combat Winner The Sorcerer with the Higher Power Total is the Combat Winner. The losing Sorcerer is discarded. (Not necessarily dead, but stunned, trapped, unconscious, hurt, etc.)

FIFTH Use of Protection Spells The Combat Loser may play a Protection spell. This Prevents the losing Sorcerer from being discarded and his objects from being stolen.

SIXTH Combat Result The winner takes the losing Sorcerers objects AND looks at his opponents hand AND then steals one target card from his opponents hand. Note: Even if loser played a protection spell, you still get to look at his hand and take a card. If the Power Total is tied, nobody wins or loses, nobody is discarded.

Important: If a sorcerer did not have a spell card in the combat, he cannot play any Amplifier cards, but Objects and Events still count, as will as the Sorcerers innate power. If a spell card is negated, any amplifiers played still count.

End Phase

Max hand size is 5 cards. Discard excess cards. Check for Victory Conditions. Record Time Markers.

Card Special Abilities

- First to Fight: Instead of picking a random Sorcerer in Encounter phase, you may play this Sorcerer instead.
- Prime Mover: If this character is defeated, he is not discarded, but is immediately shuffled back into the Deck.
- Nemesis: This Sorcerer will always win a Duel against his named nemesis.
- Charisma: All you other Sorcerers in play get +1 Power.
- Repurpose: This Sorcerer when in a duel may use a Spell card as an Amplifier.
- Greater Amplification: All Amplifiers played by all your Sorcerers get +1 Power.
- Amplification: All Amplifiers played by this Sorcerer gets +1 Power.
- Confidence: This Sorcerer when in a Duel will get +X Power where X is equal to the number of other Sorcerers you have in play.
- Experience: When Chosen in an Encounter (and not replaced) immediately draw 2 cards.
- Charlatan: If this Sorcerer is defeated in a Duel, your opponent must immediately discard his entire hand (Before taking a card from you).
- Researcher: If in play draw an extra Card in Lore Phase.
- Repository: If in play your maximum hand size is +2 Cards.
- Betrayer: When in a Duel, may discard one Morganian (but not Morgan) in play for +5 power. Do this during the Simultaneous Reveal.
- Illusionist: This Sorcerer when in a duel may use an Amplifier card as a Spell.
- Conjurer: This Sorcerer when in a duel gets +5 Power is he uses a Creature Spell
- Innocent: When Chosen in an Encounter (and not replaced) opponent must immediately discard 1 Random card.
- Deal with the Devil: Once every Lore phase, you may discard X cards to draw X replacement cards.
- Hard to Kill: If defeated by less than an excess of 5 power, do not discard him (He still loses his objects).
- Inquisition: If he wins a Duel he will steal an extra card from opponents hand.
- Protect: If defeated, this Sorcerer is not discarded, nor are his objects lost, however the winner still gets to look at his hand and take a card.
- Negate: Target opposing revealed card during Duel does not count and is discarded. Event Ability (EA): Discard this card in Event Phase to get its special effect.
- Scry: Look at Opponents Hand.
- Divination: Look at next 7 cards in Deck.
- Track: Discard to search deck for 1 card of the

indicated type and put it in your hand. Shuffle deck afterwards.

- Find: Discard to search discard for 1 card of the indicated type and put it in your hand.
- Sacrifice: At the moment of Simultaneous Reveal say "Sacrifice". Both Sorcerers are discarded.
- Drain: When played, steal 1 Random card from opponents Hand
- Up in smoke: Discard target non-Grimhold object.
- Imbue: Sorcerer gets the stated ability

Common Deck Card Notation

- G** Merlinian Sorcerers
B Morganian Sorcerers
S Spells
A Amplifiers
O Objects
E Events
D Defense
P Power
EA Event Ability
PE Play in Encounter Phase

Common Deck Card List

Name:	Type	Power	Notes:
Grimhold	O	+1	Special
Balthazar Blake	G	10	First to Fight; Prime Mover
Dave Stutler the Apprentice	G	5	Nemesis Morgan; Prime Mover
Veronica Gorloisen	G	9	Charisma

Dragon Ring	O	+2	-
Bronze Bull	S	8	Creature
Concrete Eagle	S	9	Creature

Sorcery Chess

Welcome Knave!

The premise of sorcery chess is that the king is also a powerful wizard. The rules are that of normal chess plus the following differences.

Spell Acquisition & Spell Books At the end of a players turn, that player makes one roll on the Spell Table. The player records the spell on a record sheet called the spell book. Both players may look at each others spell book.

5's the Limit A player can have no more than 5 spells in their spell book. If by the end of the turn the player has acquired more than 5 then that player must cross off (forget) spells of his choice until only 5 are left.

Move or Magic On your turn you may move a chess

piece normally or cast a spell. Most spell merely modify the way a piece can move.

Optional Rule: Magic Chivalry Players cannot check or checkmate on a turn they cast a spell.

Skipping If a piece is given the power to skip it can jump over pieces like a king in checkers. Pieces that are jumped are not captured.

Events These are not spells. They occur immediately.

Artifacts These behave like permanent spells. A player may only have 1 of each type of artifact.

Optional Card Version Make 1 card for each spell on the list. Instead of rolling on the list draw 1 card. Hands are played face up.

Maximum hand = 5 spell cards.

Spell Table

D100	Spell
01-02	Lordly Standing: Knight moves like a King
03-04	Masonic Secret: Rook moves like a King
05-06	Divine Authority: Bishop moves like a King
07-08	Squires Errand: Pawn moves like a King
09-10	Feebleness: Opponent forgets 2 spells of his choice
11-12	Arcane Study: Roll again Twice on Spell Table
13-14	Counterspell: Negate an opponents spell as it is cast
15-16	Teleport: Move one of your pieces anywhere except capture or check
17-18	Pawn Skip: Pawn can skip
19-20	Queen Skip: Queen can skip
21-22	Rook Skip: Rook can skip
23-24	Knight Skip: Knight can skip
25-26	Bishop Skip: Bishop can skip
27-28	King Skip: King can Skip
29-30	Probability shift: Reroll a diceroll
31-32	Knight Templar: Move knight like bishop
33-34	Holy Ground: Move rook like bishop
35-36	Divine Moment: Move king like bishop
37-38	Monks Deliverance: Move Pawn like Bishop
39-40	Pilgrimage: Move bishop like rook
41-42	Charge: Move knight like rook
43-44	Trade Fair: Move pawn like Rook
45-46	Kings Highway: Move King like Rook
47-48	Queen's Revenge: Move Queen like Knight
49-50	King's Battle: Move King like Knight
51-52	Juggernaut: Move Rook like Knight
53-54	Paladin: Move bishop like Knight
55-56	Strength of the Common Man: Move pawn like Knight

D100	Spell
57-58	Knight Moves: Move Knight like King. No Capturing.
59-60	Bulwark: Move Rook like King. No Capturing.
61-62	Intercession: Move Bishop like King. No Capturing.
63-64	King of Thieves: Move pawn like King. No Capturing.
65-66	Procession: Move Queen twice. No capturing
67-68	Joust: Move Knight twice. No capturing
69-70	Pilgrimage: Move bishop twice. No capturing
71-72	Siege Tower: Move Rook twice. No capturing
73-74	Forced March: Move Pawn twice. No capturing
75-76	Master Stroke: Move king twice. No capturing
77-78	Follower: Move 2 pieces this turn one after the other.
79-80	Transferral: Switch locations of two pieces you control.
81-82	Call Defender: Move any one of your pieces to an unoccupied square adjacent to the king
83-84	Knighting Ceremony : Promote any pawn to a Knight
85-86	Opponent forgets one spell of your choice.
87-88	Antimagic: Event. No one can cast spells on their next 3 turns.
89-90	Steal Magic: Steal one of opponents Spells.
91-100	Roll on Wild Magic spell table

Wild Magic Spell Table

D100	Spell
01	Fey magic: Forget all current Spells and roll for new spells equal to the number you had.
02	The Meek Shall inherit: Event. All pieces move as pawns on both players next 3 turns.
03	Shield: Target piece cannot be captured by pawns on opponents next 3 turns.
04	Invulnerability: Target piece cannot be captured on opponents next turn.
05	Hand of Fate: Cause opponent to reroll a Spell roll immediately after it is made. Cast on Opponents turn.
06	Kings Crown: Artifact. You may have an extra spell in your spellbook.
07	Hex: Target unoccupied space cannot be moved into or through for both players next 3 turns.
08	Petrify: Target non king piece cannot move or be captured for next 3 turns of both players.
09	Plague: Event: Each player must destroy one of their pieces.
10	Eldritch Barrier: Target piece cannot be target of spells for next 3 of both players turns.
11	Exchange: Players exchange Spellbooks.
12	Mirror Image: One row or column is reversed this turn.
13	Excommunicate: One of opponents Knights is turned into a pawn.
14	Thief: Steal one of opponents artifacts.
15	Merlins Staff: Artifact: You may change your Spell roll by +1 or -1.
16	Magical Vortex: Event. Both players forget all their spells.
17	Drain: Destroy an artifact
18	Dispel: Destroy a spell that lasts longer than 1 turn

D100	Spell
19	Hallucinatory terrain: Shift whole column or row over 1 square distance this turn. Cannot cast if this results in a captures or figures going off board.
20	All the Kings Men: You may move some or all of your pieces this turn.
21	Battle Frenzy: Move 2 pawns this turn.
22	Invisibility: Piece is removed from board. Its moves are recorded on paper in secret. Piece may capture or be captured. Piece may move this turn. Lasts for next 3 of both players turns.
23	Death Spell: Forget 2 Spells and Destroy target non king piece.
24	Mystic Ward: Opponent may not cast spells on his next 3 turns.
25	Barring Ways: Prevents a normal move. Opponent must do something else. Cast on opponents turn.
26	Resurrection: One of your captured pieces reenters play on an unoccupied space on your back row.
27	Reverse Time: Undue the last 2 turns. This spell is forgotten. (No time loops)
28	Word of Recall: Send target piece to its original starting square if the space is not occupied.
29	Translocation: Switch places of one of your pieces with opponents piece of same type.
30	Father to Son: Switch places of your king and one of your pieces.
31	Black Magic: Force opponent to cast one of his spells this turn. You choose the target and the spell results.
32	Old Tricks: Event. Regain a spell you previously cast.
33	Major Arcana: Event. Gain any one spell.
34	Possession: Play on opponents turn. Opponent must make a normal move of your choice.
35	Spellbind: Neither player may make a normal move on their next turn.
36	Banish: Destroy target pawn.
37	Hold: Target nonking piece cannot move next turn.
38	Confusion: Switch location of two of opponents pieces.
39	Cursed ground: Mark a box of 4 squares. Any pieces remaining within after opponents next 3 rounds are destroyed.
40	Destiny: Opponent must capture next turn.
41	Tempest: Move any 4 of opponents pieces like kings
42	Chaos: Move six of opponents pieces this turn.
43	Weird: Move any or all of your pieces like kings this turn. No capturing.
44	Mislead: Move an opponents nonking piece twice this turn.
45	Cowardice: Opponent must move a piece backwards twice next turn.
46	Delude: Move an opponents piece like a king this turn.
47	Turn the tides: Opponent may not move any pieces forward on his next 2 turns.
48	Phase: Move one of your rooks. It may move through 1 figure.
49	Ritual: You may cast this and two other spells this turn.
50	Wrap: Move one of your pieces. It may move off the side of the board and reenter through the opposite side.
51	Morganas Orb: Artifact. Roll for 2 spells and pick one.
52	Kings Scepter: Artifact. You may have an extra spell in your spellbook.
53	Excalibur: Artifact. King may move like a Knight.
54-100	Roll again or create your own spells.

Space 1889 Empires

Introduction

Space 1889 Theme. Module for the Warp Empires system. You must use the Warp Empires system to play this game.
Various Victorian Powers fight for control of Mars.

Disclaimer

Space 1889 is a licensed, copyrighted property. This is merely a fan site.

Map

Map of Mars divided into Territories. When creating a random Map roll on the Territory Type Table:

Race:	Special Ability:
British	Air Supremacy: All Ships get Force +1
German	Ground Supremacy: Battalions & Forts get Force +1
Canal Martian	Established: Start the Game with 4 Cities
High Martian	Raiders: Gunboats get Force +1 & Speed +1
French	Traders: All Cities get Income +1
Russian	Cheap Goods: All Units cost 1 less
American	Fast Going: All Units get Speed +1
Belgians	Tricky: Draw +1 card per Turn
Japanese	Strategists: Max hand size = 10

Common Unit List

Unit Name	#	Force	Speed	Notes
Ground Battalion	20	2	S	Required to control a City
Fortifications	10	4	-	Cannot Move
Gunboats	15	2	VF	(Martian Screw Galley)
Aerial Cruiser	10	4	F	(Martian Cloudship)
Aether Battleship	5	8	M	May carry 1 Battalion

Setup

Each player starts with a City with 5 random units and a hand of 5 cards.

Units & Action Deck

Players share a common Action deck and Unit chit pile.

Territory Type Table

1D6	Type:
1	City
2-4	Flats
5	Ravines
6	Peaks

Note: No Units may Enter Peaks. Ground Battalions may not enter Ravines.

Victory

You win if you control 50% the Cities on the Map

Powers

Each player picks a Power:

Draw Phase

First discard any cards you don't want. Each player draws 3 action cards. Max hand size = 7. Discard excess cards.
If the deck runs out, shuffle the discard and draw from it.

Move Phase

Use Action cards to move stacks or units in stacks. A Very Fast unit can move 1-4 spaces. A Fast unit can

move 1-3 spaces.

A Medium speed unit can move 1-2 spaces. A Slow unit can move 1 space. Units can move into but not through opposing stacks.

Revenue Phase

Each City Generates 4 Income Units per Turn.

Action Deck Card List

Card Name:	#	Notes:
Minor Move	15	Move 1 Stack
Major Move	10	Move 2 Stacks
Grand Move	5	Move 3 Stacks
Wind & Steam	5	Move 1 Stack of all Ships
Surprise	2	Battle: Attacker gets Force +10
Trap	2	Battle: Defender gets Force +10
Out Maneuver	2	Battle: Stack gets Force +5
Machine Guns	2	Battle: Each Unit in Stack gets Force +1
Big Guns	2	Battle: Battleships & Cruisers in Stack get Force +3
Rams	2	Battle: Martian Ships in Stack get Force +2
Close Combat	2	Battle: Battalions in Stack get Force +3
Armor	2	Battle: Human Ships in Stack get Force +2
Swift Attack	2	Battle: Gunboats in Stack get Force +3
Guided Torpedo	1	Battle: Destroy Target Ship
Evasion	2	Battle: Negate Battle Card
Sandstorms	2	Negate Move
Adventurers	1	Steal 2 random cards from opponent
Treaty	2	Opponent may not attack this turn
Sabotage	1	Destroy Random Unit in target Stack
Spies	2	Look at opponents Hand
Scouts	2	Look at target Stack
Resupplied	2	Draw 3 cards
Martian Treasures	2	Gain 10 Income Units

Warp Empires Ruleset

Introduction

Generic ruleset for a series of empire building/conquest games.

Map

The map depicts an irregular, interlocked set of territories.

Control Markers

Use chits to represent control markers.

Units

Use chits to represent units. Units include Leaders & non-leader units.

Deck

Players share an action deck. In some games, each player will have their own action deck. The action deck cards allow you to move your units.

Setup

Most Leader units will be in play. Others will be mixed into the unit chit pile. Each player will start with several non-leader units in play.

Starting points of units will be determined by the scenario.

Turn Sequence

Players take turns. Each turn has 7 phases: Draw Phase Move Phase Battle Phase Revenue Phase Recruit Phase Upkeep Phase Control Phase

Draw Phase

First discard any cards you don't want. Each player draws 5 action cards. Max hand size = 7. Discard excess cards.

If the deck runs out, shuffle the discard and draw from it.

Move Phase

Use Action cards to move stacks or units in stacks. A Fast unit can move 1-3 spaces. A Medium speed unit can move 1-2 spaces.

A Slow unit can move 1 space. Units can move into but not through opposing stacks. Fortifications cannot move (Move = 0).

Your opponent can only look at the top unit of your stacks

Battle Phase

When two opposing stacks occupy the same territory there will be a battle. Each unit has a force value. Add up the total Force values for each side.

Players may play action cards to increase their force value. If one stack has a Leader and the other does not, the stack with the leader gets an additional 5 Force. The side with the highest force value wins.

The losing stack must retreat one space. The losing stack loses half of its units. The winner picks the first unit lost, the loser picks the remainder. Fortification units in the losing stack are destroyed automatically.

The winning stack loses units with a force equal to at least half the force total lost by the losing stack. The winner decides which units are lost. Destroyed units are returned to their chit pile. Captured leaders are set aside and not returned to the chit pile.

After a battle both sides replenish their hands to 7 cards.

Revenue Phase

Gain revenue points for every revenue generating territory you control.

Recruit Phase

Draw 5 random units from the unit chit pile. Purchase units. A unit's cost is equal to its Force value. If you purchased all the drawn units, draw another 1D6 random units.

Revenue may be saved from turn to turn. Discard unpurchased units back to your unit chit pile. Units start in any revenue generating territory you control.

Upkeep Phase

Number of Units that automatically receive upkeep = 5 x total Revenue. Discard excess units. Example: You generate 10 revenue points per turn...

You may have up to 50 units.

Control Phase

Place a control marker on every revenue generating territory occupied by one of your units. Only one control marker per space.

Unit Deck Abbreviations

- S** Slow
- M** Medium speed
- F** Fast
- F** Force
- F** Fortification
- #** Number of that unit in the chit pile.

Space Base

Introduction

Players control rival commercial colonies on a small piece of stable crust on a volcanic moon.

Equipment

The map is a 10 x 10 grid. Map spaces must be large enough to hold a card. Two ten sided dice are needed.

Each player will need a set of colored control tokens. Paper & pencil to keep track of Credits. The deck consists of 120 cards

Setup

Each player starts with 50 credits. Each player begins with one Outpost card. Players place their Outpost cards in opposite corners, within 2 spaces of the corner space.

Turn Sequence

Players take Turns. Each Turn is divided into several Phases. When each player has taken a Turn, that is the end of the Round.

1. Transfer Phase
2. Repair Phase
3. Meteor Phase
4. Production Phase
5. Control Phase
6. Draw Phase
7. Build Phase

Transfer Phase

By playing (discarding) a Transfer card a player may:

1. Move a site he controls to any other space adjacent to a site he also controls, or . . .
2. Switch the location of any two site cards he controls.

Repair Phase

Repair sites damaged by meteors. Pay 1 credit to remove 1 point of damage.

Meteor Phase

Each turn a meteor hits a random space. (How convenient) Roll two ten sided dice to determine the X and Y axes. If the space contains an installation, it receives 1D10 points of Damage. Damaged sites are considered to be "defunct".

Empty spaces and resource spaces are unaffected. Shield generators and installations adjacent to shield generators are unaffected.

Production Phase

Some installations produce income (credits). If an installation meets all of its functional requirements, then it is functional and produces income. If an installation cannot meet all of its functional requirements, then it is considered defunct.

Defunct sites produce no income. For example, a Spaceport must be adjacent to a Colony, a High tech industry, and a Power source. To be functional, all of the adjacent required sites must also be functional.

Installations may meet requirements using adjacent sites controlled by opponents.

Control Phase

By playing (discarding) a Control card a player may:

1. Replace the control marker on an opponents site with one of your own markers.

The target site must already be adjacent to one of your sites. Or. . .

2. Look at opponents hand and steal one card.

Draw Phase

Draw one card. If a player has 9 or more cards in his hand he must discard down to 8 cards.

Build Phase

A player may place one or more "site" cards onto the map. One site card per space. A site may be placed in an empty space orthogonally adjacent to a site you control.

Place one of your control markers onto any site you place.

Resource Sites

There are three types: Metals, Radioactives, Ice + Organics. These are called resources or ores.

Extractors

These mine raw materials from all adjacent resource sites, even resources of different types.

Outpost

Each player starts the game with one of these. Outpost cards are removed from the deck before play. Outposts are power sources.

Outposts are also extractors.

Refineries

These process the raw ores collected from all adjacent extractors, even resources of different types. To be functional these must be adjacent to an extractor, which is adjacent to any resource site.

Solar Panel Array

These catch solar energy that can power all adjacent installations.

Geothermal Plant

These catch geothermal energy that can power all adjacent installations. To be functional these must be adjacent to a volcano site.

Volcano

These are not considered to be resource sites. In build phase these may be placed in any empty space.

Reactor Core

These produce nuclear energy that can power all adjacent installations. To be functional these must be adjacent to a refinery, which is adjacent to an extractor, which is next to a Radioactives resource site.

Factory

These are producing manufactured goods. To be functional these must be adjacent to a refinery, which is adjacent to an extractor, which is next to a Metals resource site.

Hydroponic Dome

These are producing food, water, and Oxygen. To be functional these must be adjacent to an extractor, which is next to an Ice + Organics resource site.

Colony

These contain relatively large populations of enterprising colonists. To be functional these must be adjacent to a hydroponic dome.

Transport Hub

All sites adjacent to the hub are also considered to be adjacent to each other. This applies only to people and materials. This system does not transmit power or shielding.

Research Station

These are studying the local geology, biology, meteorology, and astronomy.

Shield Generator

The generator and all adjacent sites are immune to meteor hits.

High-tech Industry

These are producing sophisticated electronics, vehicles, computers, robots, etc. To be functional these must be adjacent to a Colony, and a Factory

Bio-med Labs

These are producing new drugs derived from the native life-forms. To be functional these must be adjacent to a Colony, and a Research Station

Space Port

Centers of trade and commerce. To be functional these must be adjacent to a Colony, and either a High-Tech Industry or Bio-Med Lab

Card List

The number of that type of card in the deck.
Income = Credits produced in Production Phase

I Installation site

IP Installation site that produces power

R Resource site

V Volcano site

A Action Card

#	Name	Type	Income	Requirements
4	Outpost	I	1	None, Produces Power, Functions as Extractor
8	Volcano	V	0	None
9	Metal	R	0	None
6	Radioactives	R	0	None
9	Ice + Organics	R	0	None
8	Extractor	I	1	Power, Resource sites
8	Solar Panels Array	IP	0	None; Produces power
6	Geothermal Plant	IP	0	Volcano; Produces power

#	Name	Type	Income	Requirements
4	Refineries	I	2	Power, Extractor (Any Ore)
4	Reactor Core	IP	3	Refinery (Radioactives); Produces power
5	Hydroponic Dome	I	2	Power, Extractor (Ice + Organic ores)
5	Factory	I	3	Refinery (Metals)
4	Transport Hub	I	0	Power
4	Shield Generator	I	0	Power
4	Research Station	I	1	Power
4	Colony	I	3	Power, Hydroponic Dome
3	High-Tech Industry	I	4	Power, Colony, Factory

2	Space Port	I	5	Power, Colony, High-Tech Industry or Bio-Med Lab
10	Transfer	A	-	Play in Transfer Phase
10	Control	A	-	Play in Control Phase

End Of Game

The game ends when the last card is drawn from the deck.

Victory

The player with the most credits at the end of the game is the winner.

Space Blast

Introduction

Backgammon variant on a circular board with cards and a sci-fi theme. One player is the Terran Defense Force. The other player is the Evil Empire.

Object

The first player to occupy all four planet spaces is the winner.

The Board

The board is in the shape of a circular track. The circle is divided into 28 spaces also known as sectors. One space represents Planet Earth. (Space #1) The opposite space is Planet X, home of the Evil Empire. (Space #15) Moving clockwise from Earth, Space #8 is the Planet Nimrod.

Moving clockwise from Planet X, Space #22 is the Planet Cygnus-7. All other spaces are known as Deep-Space sectors. The deck and the discard pile (the vortex) can be kept in the interior of the circle.

Also in the interior there is an area called the scrap heap where destroyed units are kept.

Pieces

Each side has 15 pieces or units. Make them using cardboard counters (or chits). Use blue chits for the Terran Defense Force units.

Use red chits for the Evil Empire units. Chits should be marked with their force value, a number between 1 and 5.

The Deck

Both players share a common deck. The deck contains 2 of each card on the list.

Setup

Each player starts with 5 cards. Each player puts all 15 of his units on his homeworld.

Turn Sequence

Players alternate turns. The player whose turn it is, is known as the attacker, the other player is the defender. The Evil Empire goes first.

Each turn has 5 phases:

1. Draw Phase
2. Roll Phase
3. Build Phase
4. Move Phase

5. Fight Phase

Draw Phase

Draw two cards. If the deck runs out, shuffle the discard and continue. Base maximum hand size = 6.

Discard excess cards. Max hand size +1 if you control Nimrod. Max hand size +1 if you control Cygnus-7.

Max hand size -2 if you are not in control of your Homeworld.

Roll Phase

Roll two six sided dice (2D6). Cards can be used to modify these dice rolls.

Build Phase

If a player rolls doubles (two sixes, snake-eyes, etc.) he may place one of his destroyed units back into play onto his homeworld (Earth or Planet X). He may only do this if he currently occupies (controls) his homeworld by having one or more of his units on his homeworld space. The player still uses the die rolls for movement.

Move Phase

As in backgammon, move one or two of your units a number of spaces indicated by the dice. Both dice can be assigned to one unit, or each die roll can be assigned to two different units. Die rolls (from roll phase) must be used.

Terran units move clockwise. Evil Empire units move counterclockwise. A unit cannot use the second die if, as a result of its first roll, it lands on a space containing enemy units.

Cards can be used to modify which units move and by how much. Played cards are discarded. Rolling doubles does not allow you to move four times as in normal backgammon rules.

Fight Phase

Each unit has a force value. See the Unit Lists. If a space contains opposing units there will be a fight. Each side adds up the force value of all of its units present to get a force total.

The attacker may play attack cards to increase his total. The defender may play defense cards to increase his total. Played cards are discarded.

The higher total wins. All units of the loser are destroyed and sent to the scrap heap. The winner keeps units with a total force value equal to the difference between the winning and losing sides force totals.

The winner always keeps at least one unit. For example: Winner = 7, loser = 5, difference = 2. The winner may keep units with a total force value of 2 or

less, or any one unit, even if it has a force value greater than 2.

Terran Defense Force Unit List

#	Force	Unit Name
1	5	Sol-1
2	4	Stellar Navy
3	3	Space Marines

Number of units (chits) of this type.

Sol-1: Flagship of the Terran Defense Force. Commanded by the heroic Captain Stark Raving. Stellar Navy: Two main fleets of battlecarriers, and their escorts.

Space Marines: Three battle groups of zero-g power armor commando troops and their heavily armed trans-

#	Force	Unit Name
4	2	Solar Scouts
5	1	Planetary Patrol

ports. Solar Scouts: Also called the Space Rangers. Squads of fast, stealthy ships for reconnaissance and ambush. Planetary Patrol: Also called the Star Guard. Local law enforcement and rescue operations. Armed to deal with pirates and criminals. Also includes a variety of ships pressed into military service.

Evil Empire Unit List

#	Force	Unit Name
1	5	Vindicator
2	4	Star Cruisers
3	3	Imperial Enforcers

Vindicator: Personal Dreadnought of Emperor Phlebotamus. Star Cruisers: Massive Hulks bristling with armor and weapons and filled with divisions of elite shocktroops. Imperial Enforcers: An unsavory lot of alien mercenaries, cyborg bounty hunters, and mutant

#	Force	Unit Name
4	2	Robot Drones
5	1	Clone Troopers

raiders.

Robot Drones: An assortment of probes, androids, drone ships, and death machines. Clone Troopers: Swarms of expendable ground troops and space fighters. Best for terrorizing civilians.

Deck Card List

Card Name	Notes
Ion Thrusters	Add +1 to one die roll
Warp Overdrive	Add +2 to one die roll
Maximum Burn	Add +3 to one die roll
Hyper Jump	Roll one additional die in Roll Phase
Strategic Move	Use one die roll to move all units in one space
Space Combat Tactics	Use one die roll to move backwards
Defend the Homeworld	Move target unit directly to your homeworld
Hold Position	Do not use one die roll
Battle Computers	Cause one of your die rolls to be rerolled
Continuous Wave Laser	Attacker +1 Force
Plasma Generator	Attacker +2 Force
Disruptor cannon	Attacker +3 Force
Antimatter Missiles	Attacker +4 Force
Nova Bomb	Attacker +5 Force
Surprise Attack	Attacker +1D6 Force
Plasteel Armor	Defender +1 Force. *
Electronic Countermeasures	Defender +2 Force. *
Inertial Force Field	Defender +3 Force. *
Evasive Maneuver	Defender +4 Force. *

Card Name	Notes
Ablative Energy Shields	Defender +5 Force. *
Ambush	Defender +1D6 Force. *
Espionage	Look at opponents hand. Play on opponents draw phase.
Jam Transmission	Target enemy unit cannot move this turn. *
Reinforcements	Rebuild one extra destroyed unit in build phase.
Major Offensive	Discard 2 cards and take another turn.

Notes: Unless specified otherwise, all cards target your own units during your own turn. * Play on opponents turn.

Space Cruisers

Introduction

Very simple space ship combat.

Equipment

Use a hex map (large hexes) with a starfield background. 10 and 6 sided dice are needed. Ship figures and stands are needed.

The Micro-Machine Star Trek line works nicely.

Systems Table

1D10	System
1	Phasers (or cargo bay if playing with fighters)
2	Phasers
3	Photon Torpedoes
4	Drives
5	Shields
6	Armor
7	Scanners
8	Security Team
9	Cloaking Device
0	Elite Crew

System Notes

Phasers: Range = 6. Damage = 1D6. Hits on roll of 5+. Phasers can be fired into a 120 degree arc in front of the ship. Photon Torpedoes: Range = 4. Damage = 2D6. Hits on roll of 7+.

Torps fire in a straight line. Drives: Each level of drives can be used to move a ship one space forward or make one 60 degree turn per turn. For each Drive add 1 to the ships initiative roll.

Shields: Attacks that do 4 or less points of damage are negated. Attacks that do 5+ damage are negated, but destroy a shield. Armor: Each level of armor gives the ship 10 more hull points.

Scanners: Each scanner gives one attack per turn +1 to hit. Security Teams: Each security team can attack one adjacent uncloaked ship per turn that has no shields. Roll 1D6. On a roll of 1-2 the team is destroyed.

On a roll of 5-6 the target ship is destroyed. Cloaking Device: A ship may decide to cloak for the turn. Cloaked ships cannot attack. Cloaked ships are -3 to be hit.

A ship will only ever have 1 Cloaking Device. Reroll duplicate rolls. Elite Crew: For each elite crew add 1 to the ships initiative roll. Each elite crew allows the ship to attempt to evade 1 attack per turn.

The target attack is evaded on a roll of 1-3 on 1D6.

Basic Military Hull

Every military ship has the following basic features: 10 Hull points 1 Phaser 3 Drives 1 Shield

Additional Systems

In the Basic rules every ship has 5 additional systems. Roll 5 times on the System table to see which systems a ship has.

Setup

Each side should have an equal number of figures. Or each side should have an equal number of construction points if using the advanced rules.

Turn Sequence

Each turn has 4 phases: 1 Cloak Phase 2 Initiative Phase 3 Move Phase 4 Attack Phase

Cloak Phase

Ships with cloaking devices may cloak.

Initiative Phase

Each ship rolls 1D10. This is the ships initiative number.

Move Phase

The ship with the lowest initiative moves first. The next lowest moves next and so on. Reroll tied initiatives.

Only 1 ship per hex.

Attack Phase

The ship with the highest initiative attacks first The next highest attacks next and so on. For each attack roll 1D10. This is the To hit roll. Phasers hit on a roll of 5 or more.

Torps hit on a roll of 7 or more. Scanners & cloak-ing modify the To hit roll. Security teams may also attack.

Critical Damage Table

1D10	Effect
1-2	1 Weapon system destroyed (reroll if none left)
3-4	1 Drive destroyed (reroll if none left)
5-6	Warp Core
7-8	Life Support
9-0	Super Structure

If the Warp Core is hit twice the ship explodes. If Life Support is hit twice the entire crew is killed. If the Super Structure is hit twice the ship breaks apart.

Basic Rules Sample Ships

Ship Name: 5 Additional systems The Courageous: Shields, Torps, Security, Drives x2 The Victorious: Scanners, Armor x2, Shield, Elite Crew The Noblesse: Elite Crew, Shield, Torps, Drives, Scanners The At-lantea: Phasers, Drives, Shields x2, Cloak

Advanced Rules

Shipbuilding

The basic military hull is worth 2 construction points. Each additional system is 1 construction point. Small ships have 0-3 additional systems.

Corvettes, escorts, gunships, raiders Medium Ships have 4-6 additional systems. Destroyers, frigates, cruisers Large ships have 7-10+ additional systems. Battle Ships, capitol ships, dreadnaughts, carriers

Basic Commercial Hull

The basic commercial hull is worth 2 construction points. 10 Hull points 2 Drives 3 Non military systems Non military systems include: Cargo bays, Science Labs, Mining equipment, Passenger accommodations, etc.

Space Station Hulls

The basic Space station hull is worth 2 construction points. Space stations have no drives 20 Hull points 4 Non military systems. All weapons mounted on Space stations fire out of any arc.

Expanded Critical Damage Table:

If an attack hits, a ship may try to evade if it has an elite crew. Security teams may be evaded. If an attack hits, and it is not evaded, roll for damage.

Shields will absorb damage. Too much and the shields blow (are destroyed). If the ship has no shields, each point of damage destroys one hull point.

If a ship has negative hull points, every phaser hit it takes requires 1 roll on the Critical Damage Table. Torp hits require 2 rolls.

Fighter Hulls

The basic fighter hull costs 2 construction points. They have 1 hull point. Any roll on the critical damage table will destroy them.

They have 5 drives, 1 phaser, 1 elite crew Up to 5 fighters can be carried by a ship for every cargo bay the ship has. Fighters can have a maximum of 3 additional systems

Rule And Equipment Supplement

By: Andrew (rebel_explorer@hotmail.com)

Crew Points:

All cruisers start with 10 crew points. Boarding attacks are done at the same distance, however roll 1d6 for both ships. This is the number of crew point casualties you inflict on the opposing crew. Subtract that total from their Crew Point total. If that number reaches 0, then that ship is captured. All ships can board, security teams now only give a +5 to Crew Point totals now. If the attacker loses all crew points and defender does not, the attacker's ship is captured by the defender.

Ramming: When a ships captain is using desperate tactics they might choose to ram their enemy. When this occurs they slam their ship into their foe's. This is done during the movement phase. Damage done to rammed ship: 2D6+(# of Drives ramming ship has) Hull Point Damage, 2D6 Crew Point damage, and one roll on critical hit table Damage done to rammer's ship: 2D6-(# of Shields still operating on rammed ship) Hull Point Damage, 1D6 Crew Point damage, all sheilds go down, and one roll on critical hit table

1d10	Effect
1-2	1 weapon system is destroyed, attackers choice (reroll if none are left)
3-4	1 Drive is destroyed (reroll if none left)
5	Warp Core damaged
6	Life Support damaged
7	Super Structure damaged
8	Ordinance Bays hit and explode. Roll 2 more times on Critical Damage table. 1d6 crew point casualties.
9	Sensors Damaged. Targeting is more difficult. -3 on To Hit rolls
10	System Shock: Cannot move or fire weapons for 1d3 turns.

Damage Control Parties:

Engineers on your cruiser that are trained to fight fires and repair damage during a battle. Roll a 1d8 and look at the Damage Control Table. You must say out loud to other players which system which one you are trying for, THEN roll if you fail on that roll, you

continue to roll for that system unless you wish to change to another system. And must again declare what you are trying to fix. You can roll once a turn as long as you have crew points. This is done during the cloaking phase. (Can repair 1d4 Hull Points per day after battles after all systems that aren't totally destroyed have been repaired.)

Damage Control Table

D8	RESULT
1-5	Total Trashed. Must be replaced from Starport or Spacestation.
6	No progress made, make another attempt next turn.
7	System requires two turns to complete repairs.
8	Minor damage, system repaired.

Escaping Battle:

Sometimes discretion is the better part of valor, and surrendering isn't much better than death. So escape is an option for tacticians and cowards alike. To retreat a ship from the battle, firstly it must have a "Warp" or "Hyperspace" drive systems, so larger ships and long range scouts only. And it must have functioning drives, and no ships on opposing sides can have a functioning ship with interdicting fields active. If these requirements have been met, then escape can be attempted. Roll a 1d10, and on 8-10 the ship managed to charge it's jump engines and escape. On a roll of 1, the ships "Hyperspace" drive completely fails and must be repaired before you can attempt again.

Critical Hits:

When a natural 10 (no modifiers made it a 10) is rolled an attack automatically hits, and does double its damage. And if a natural 1 is rolled, the attack automatically misses.

Elite Crew Evasion:

When a 6 is rolled on the evasion roll, a critical hit happens against the ship because the crew messed up and dodged INTO the blast rather than away from it.

New Equipment - And New Units

More Crew: This upgrade grants a ship 10 more crew points.

Nuetron Cannon: These weapons only inflict damage on crews on ships. And only if the target ship has no more functioning shields. Otherwise their shields soak up the radiation. Stats: Range: 5 Damage: 1d8 vs Crew To Hit: on 6+

Heavy Marine Armor: This upgrade gives your crew armor to help resist weapons fire during boarding actions. Prevents 1 Casualty to your crew during boarding operations.

Heavy Weapons and Explosives: This upgrade gives your crew better weapons to inflict more casualties on opposing crews. +2 to Casualty Roll.

Automated Defense Systems: This is a computer controlled weapon and containment system helps keep enemy boarding parties at bay. Inflict +1 on Casualty Roll, and -2 to your Casualties. Counts as two (2) systems. A ship will only ever have one Defense system.

Teleporters: This gives your ship a means of teleporting troops onto enemy ships at range, as long as their shields are down. Stats: Range: 6 Effect: Counts as Boarding action, however repelling boarders cannot capture attackers ship this way. (Unless defending ship also has a teleporter.) A ship will only ever have one Teleporter.

Mines: There are 2 different system versions: Mines can be targeted, a successful hit explodes it. Remote Detonation: You deploy a radio controlled mine at your current location that will stay there until you detonate it. Stats: Damage: 1d8 To Hit: +7 Radius of Effect: All Hexes immediately surrounding the mine.

Proximity: Same as the Remote Detonation mines,

however rather than being controlled by a player, they go off if ANY ship passes within a hex of it.

Fighter Squadrons/Strike Craft: 5 Different Types - All fighters/strike craft can dock with carriers to replenish ammunition and ships to the squadron (explained below). Drones: Doesn't require crew points to man them. However they are specialized equipment and can't be replaced during battle. Carries only a light gun pod. Stats: Drives: 5 Range: 3 Damage: 1D4x2 To Hit: 6+ 120 degree fire arc Hull Points: 5 Ammo: 3 Attacks before needing to dock.

Interceptors: Counts as two systems. These fighter planes are designed to intercept and destroy other strike craft. They have give a +5 to Crew Points For the purpose of manning the squadron. The squadron is short range and cannot "warp" or "hyperspace" away. If the squadron isn't totally destroyed, you can refit it with Crew Points from its parent space ship/carrier. This pulls points from the carrier and puts them into the squadron and refits the squadron up to its full 5 again. Carries a dual gun pod and a concussion missile. Also has "Elite Crew" system for the squadron. Stats: Drives: 5 Range: 3 Damages: 1D4x3 with Gunpod; 1D8 with Concussion Missile ToHit: 6+ 120 degree fire arc with gunpod H.P.: 5 Ammo: 3 / 1 Attacks before needing to dock for more ammo.

Bombers: Counts as two systems. These specialized strike craft are specifically designed to attack larger ships. They give a +5 to Crew Points for the purpose of manning the squadron. The squadron is short range and cannot "warp" or "hyperspace" away. If the squadron isn't totally destroyed, you can refit it with Crew Points from its parent space ship/carrier. This pulls points from the carrier and puts them into the squadron and refits the squadron up to its full 5 again. Carries a Photon Torpedo and Light Gunpod. Also has "Elite Crew" system for the squadron. Stats: Drives: 4 Range: 4/3 Damages: 2D6 with torpedo; 1D4x2 with Gunpod To Hit: 7+ / 6+ 120 degree fire arc with gunpod. H.P.: 5 Ammo: 1 / 3 Attacks before needing more ammo.

Gunships/Corvettes: Counts as three systems. These are a heavier strike craft designed to fight other strike craft, and be rapid assault craft against larger ships. They give a +5 to Crew Points for the purpose of manning the craft. This ship is short range and cannot "warp" or "hyperspace" away. If the ships crew isn't totally killed, you can refit them from its parent ship. This pulls points from the carrier puts them into the smaller craft, and refits them upto its full 5 again. Carries ONE of two different packages. The Anti-Strike Craft, and the Anti-Large Craft. The strike craft version is 2 turrets that each have 2 gun pods and a concussion missile pod. The bomber version is 1 turret with 2 gun pods and 2 torpedo tubes. Also has "Elite Crew" system. Stats: Strike Craft Version: Drives 5 Range: 3 Damages: 1D6x2 (two different attacks) with gun pods; 1D8x2 Concussion missiles. To hit: 6+ H.P.: 5 Ammo: 4 / 2 before needing more ammo. Bomber Version: Drives: 5 Range: 4/3 Damages: 2D6x2 with torpedo; 1D2x4 with gunpod To Hit: 7+ / +6 120 degree fire

arc with gun pod. H.P.: 5 Ammo: 2 / 4 before needing more ammo.

Heavy Fighters/Long Ranger Fighters: Counts as independent vessel/squadron, but can be refit exactly like other fighters. Designed to be long range scouts, and hit 'n run attackers. Has its own 5 Crew Points for the purpose of manning its ships. Its a long range squadron and CAN "warp" or "hyperspace" away. If the squadron isn't totally destroyed you can refit like other squadron up to its full 5 again. Carries 1 phaser 2 torpedos and a Fighter Shield. The Fighter Shield is a weaker version of larger ship shield array. It soaks damage 1-3, but 4+ shuts the shield down and the ships are exposed to damage as normal. Also has "Elite Crew system. Stats: Drives: 5 Range: 6 / 4 Damages: 1D6 with Phaser; and 2D6 with torpedo To Hit: 6+ / 7+ 120 degree fire arc with gunpod H.P.: 5 Ammo: 2 attacks with torpedo before needing more ammo.

Nanotech Repair Module: These single use expendable droid and standard part supply kits can instantly repair one system on your vessel that as been destroyed or damaged including critical damage. Or restore 1d8 Hull Points. But it can only be used ONCE per battle. Do this during Cloaking Phase.

CIWS Point Defense Cannons: This system is used to fire at incoming missile and torpedo attacks. Negates the torpedo or missile attack on 7+.

"Battle Hammer" Naval Mass Driver Cannon: Counts as 2 systems. These large guns are used to pound and smash their way through ships armor and shielding. Using APDS rounds fired through magnetic rails, these are impressive weapons. Range: 10 Damage: 2D6 To Hit: 6+ 120 degree Fire Arc.

Missile Batteries: This weapon system fires salvos of missiles at ships and fighter squadrons. Only has 2 salvos. Decent IFF targeting software and guidance technology. Range: 6 Damage: 2D4/ salvo To Hit: 5+ 120 degree fire arc.

Expanded Missile Racks: This upgrade adds two more salvos to a particular missile pod.

Rapid Fire Missile Racks: This upgrade allows a missile pod to fire two salvos at once but at -2 accuracy.

Salvaging/Mining Operations: (For use with roleplaying and different scenarios) A module to mine asteroids, melt down and extract the different resources for construction and repairs. As well as salvaging wrecks for supplies such as ammunition, fuel, food, etc.

Science Labs: Astrometrics, Biology, Chemical, etc (For use with roleplaying and different scenarios) Different scientific equipment for studying different phenomena, mapping space, life forms, minerals, chemicals, etc.

Advanced Hydroponics: (For use with roleplaying and different scenarios) Growing enough food for your crew between stops is a challenge with out this module. But with it you can setup operations deep into space, and even help in the construction of space stations and colonies.

Advanced Factories, Manufacturing Bays, and Materials Processing: (For use with roleplaying and different scenarios) Generally mobile shipyards and space stations would have these for building ships and supplies at the frontlines to help support fleets. Building anything from uniforms, parts, and ammunition all the way up to Strike Craft and Destroyers and Frigates. These bays are also wonderful to help with the construction of space stations and colonies as long as raw material is available.

Expanded and Enlarged Cargo/Flight Bays Large Bays in ships designed for carrying large amounts of cargo, fighters, and troops and their equipment from point to point.

Interdictor Field Generators: These field generators destabilize jump fields, and prevent the use of "warp" or "hyperspace" in the area. All ships that were in "warp" drop out, And are in normal space again. All attempts to re-enter "warp" again will fail until the generator is deactivated, or the ship in which the system is housed

is crippled or destroyed.

Advanced Fleet Command Module: This advanced communication and sensor suite gives a battle group commander near-complete information concerning all ships at his or her command. This equipment allows this commander to make decisions faster and more accurately. Effect: +2 to initiative for all ships in that fleet. A battle group will only have one Commodore or Admiral, and will only have one suite like this.

Repair Beams: Counts as 3 systems, and has turret built in. Repairs 1d3 Hull Points or roll 1d10 on 9,10 Make a roll on Damage Control Table. This is fired like a gun but it always hits. Stats: Range: 2 360 degree fire arc.

Advanced Medical Treatment Center: (For use with roleplay or certain scenarios.) This treatment center has highly trained personel and the best technology available to help treat injured. Its advanced equipment can even bring back recently killed personel. After a battle roll 1d4. Treatment Effect Table:

#	Result
1-2	No effect the dead were too far gone.
3	1 Crew Point saved, added back to a ship of choice.
4	1d3 Crew Points saved, added back to ship(s) of choice.

Repeating Ion Beam Cannon: This weapon is used for quantity of fire, not quality. This weapon is used most often by pirate bands who want to scare civilian ships into surrendering. While not harmless, its more of a back up weapon. Stats: Range: 4 Damage: 1d2x3 ToHit: 4+ 120 Degree fire arc.

Improved Directional Thrusters: This array of thrusters helps improve movement by allowing the ship to move side ways one hex, at the cost of 2 movement points, and backwards one hex at the cost of 2 movement points.

"Trident" Grand Cannon: Counts as 3 systems. This huge partical beam cannon fires like a torpedo, down a row of hexes. However its beam is so large that it envelopes ships and continues past them firing all the way through its range until the beam dissapates. The energy drain on it is so intense that a failure roll must be made everytime before it fires. Roll 1d6 1-3 it fires normally, 4-5 gun overloads and shuts down(Counts as destroyed, but can be repaired) On a 6, it explodes destroying the gun, and make a Critical Hit roll and the gun may NOT be repaired. It may fire every 2 turns. This weapon continues to do damage to each ship until all damage points used. For example, if it did 12 damage, and a target ship has only 2 shields, then both shields fail at 5 damage points, and 2 damage is carried over into the Hull Points. Stats: Range: 9 Damage: 4d6 ToHit: 7+ Fires only forward.

Ionized Torpedos: These special torpedos ionize the armor on them allowing them to slip through the shields of ship unmolested and detenate on the hull of the targeted ship. The equipment to create the effect is bulky in the torpedo and reduces the warhead size. Stats: Range: 6 Damage: 1d4+1 ToHit: 7+ Fires

in straight line like other torpedos. CIWS Point Defenses gain a +2 tohit vs these torpedos because of the emissions created by the ionization.

Battle Platforms: Counts as 2 systems. These immobile weapon platforms are deployed like a mine, however it is crewed, houses its own shield, and a battery of weapons. Contains 7 Crew Points of its own. If fighters are launched from this platform, the Crew Points must be pulled from it. Mounts 1 shield system, and one of these weapon systems:

- 1 Phaser
- 1 Repeating Ion Beam Cannon
- 1 Missile Battery
- 1 Interceptor Squadron
- 1 Bomber Squadron
- 1 Photon Torpedo

Space Cruisers Material

by Geo Gibson (techromancer@wncol.net)

Here's that extra stuff I'd done for Space Cruisers. It's mostly been used in solo games, so I can't say it's been extensively playtested :) Some of the modifications have been left out, either because they aren't in any kind of usable form yet or else because they only make sense in scenarios.

Extra "space Cruisers" Rules

These are the extra rules I've been using for some solo games. I use miniatures on a hexless surface (two sections of posterboard that have a starfield painted on them); each hex is assumed to be 1 inch on the

table. Two inches might work better if you have the space.

Fighters: Fighters are fielded in squadrons (usually 2-5 fighters); each squadron moves as a unit and rolls one initiative die. Hits are always assigned to any damaged fighters first. Fighters do not have to move between turnings (see below).

Movement (additional): Ships cannot usually turn twice; some forward movement must occur in between. A ship may turn twice (without a move in between), but the second facing change costs 2". Fighters ignore this rule.

Extra Systems

Enhanced Battle computer: allows Critical rolls to be modified by plus or minus one. A ship with an EBC only suffers -2 when targetting a Cloaked Ship.

Tractor Beams (all Military ships have one): Range is 3". A ship can use its tractor beam to latch onto another vessel (same size or smaller) to tow it. Towed ships remain within 3" of the other vessel; the towing ship loses 1" of movement while the beam is engaged. Ships with operable drives cannot be towed unwillingly. Stations cannot be towed and fighters cannot possess tractors. If a second tractor is added, a ship can tow a vessel one size larger at a cost of 1 extra inch of movement (a small vessel with 2 tractors could tow a medium vessel at -2" to its move, or a large vessel if it had three tractors, though it would then be at -3" movement). These usually have a 120 degree rear arc.

Self-destruct

Sometimes a Captain will destroy his/her/its own ship rather than allow it to fall into enemy hands (or tentacles, etc.). Self-Destruction is announced during the Cloaking phase and replaces the ship's Movement Phase (on its initiative). Normally, a ship will self-destruct on a 10 or less on a d10 (automatic success). For each Critical it has taken the roll is at a penalty of 2 (so a ship that has taken 3 criticals will only self-destruct on a 4 or less).

If the die roll is made, the ship is utterly destroyed. Nearby vessels may take damage as well. This is equal to 1d6 for each two of the following systems the vessel had intact when it exploded: Weapons, Fighter Bays, Drives. This damage is rolled (seperately) against each vessel within 1"; for every further inch the damage drops by a die. A self-destructing fighter does no damage to anyone else, as the explosion is too small.

Damage Control Parties

All ships and stations (but not fighters) have crew that can attempt to repair ship damage. Each vessel

has 1 roll per Size Category (small ships 1, medium ships 2, large ships 3) per turn. This roll is made after the Cloaking Phase and before Initiative. Shields and criticals can be repaired; hull points can be repaired between games. The specific damage that is to be repaired must be declared before the die is rolled (repairs Shields or Drives or Phasers, etc.). Repairs are rolled on 1d6 as follows: for shields 5-6, for Criticals, destroyed drives or weapons systems 6.

The following is used for my pseudo-campaign, where a day or two may pass between battles and I want damage to carry over. Assume each Damage Control party not otherwise occupied can repair d3 hull points per day, though never more than half the original hull points of the vessel (without access to a shipyard, repair dock, etc.). Access to a friendly base adds +1 to chances of success and number of hull points repaired. Larger bases (or repair docks, etc.) probably repair ships faster. Note that since a space station is usually a base, it always gets the +1 bonus.

Space Crusiers- Custom Version

by Rabbidgerbal@aol.com

I added a few systems and possibilities in your critical hits section and wanted to share them with you... here's my version.

Space Cruisers

Introduction

Very simple space ship combat.

Equipment

Use a hex map (large hexes) with a starfield background. 10, 20, and 6 sided dice are needed. Ship figures and stands are needed.

The Micro-Machine Star Trek line works nicely.

Basic Military Hull

Every military ship has the following basic features:

- 10 Hull points
- 1 Phaser
- 3 Drives
- 1 Shield

Additional Systems

In the Basic rules every ship has 5 additional systems. Roll 5 times on the System table to see which systems a ship has.

Systems Table

1D20	System
1	Phasers (or cargo bay if playing with fighters)
2	Phasers
3	Photon Torpedoes
4-6	Drives
7-9	Shields
10-11	Armor
12	Scanners
13	Security Team
14	Cloaking Device
15	Elite Crew
16	Chain guns
17	Ion shockwave
18	Targeting computers
19	Jump plasma turbine
20	choose your own from above, limitations in systems still valid

System Notes

Phasers: Range = 6. Damage = 1D6. Hits on roll of 5+. Phasers can be fired into a 120 degree arc in front of the ship.

Photon Torpedoes: Range = 4. Damage = 2D6. Hits on roll of 7+. Torps fire in a straight line.

Drives: Each level of drives can be used to move a ship one space forward or make one 60 degree turn per turn. For each Drive add 1 to the ships initiative roll.

Shields: Attacks that do 4 or less points of damage are negated. Attacks that do 5+ damage are negated, but destroy a shield.

Armor: Each level of armor gives the ship 10 more hull points.

Scanners: Each scanner gives one attack per turn +1 to hit.

Security Teams: Each security team can attack one adjacent uncloaked ship per turn that has no shields. Roll 1D6. On a roll of 1-2 the team is destroyed. On a roll of 5-6 the target ship is destroyed.

Cloaking Device: A ship may decide to cloak for the turn. Cloaked ships cannot attack. Cloaked ships are -3 to be hit. A ship will only ever have 1 Cloaking Device. Reroll duplicate rolls.

Elite Crew: For each elite crew add 1 to the ships initiative roll. Each elite crew allows the ship to attempt to evade 1 attack per turn. The target attack is evaded on a roll of 1-3 on 1D6.

Chain guns: may fire twice at a range of one hex or less. 7 or better hit each shot 1d6 damage each. 120 degree

Ion shockwave: range one hex, 360 degree arch blast count one hex circle. Disable each ship 1d6 on a six for the rest of this turn and next turn. that damaged ship may not move or fire.

Missiles: range 3 or less. 2d6 damage 360 degree field of fire. roll 7+

Target computer: +1 from each weapons to damage. reroll duplicate rolls

Jump Plasma Turbine: 1 use, may move 5 hex. Roll 1d6=6 critical hit self

Setup

Each side should have an equal number of figures. Or each side should have an equal number of construction points if using the advanced rules.

Turn Sequence

Each turn has 4 phases:

1. Cloak Phase
2. Initiative Phase
3. Move Phase
4. Attack Phase

Cloak Phase

Ships with cloaking devices may cloak.

Initiative Phase

Each ship rolls 1D10. This is the ships initiative number.

Move Phase

The ship with the lowest initiative moves first. The next lowest moves next and so on. Reroll tied initiatives.

Only 1 ship per hex.

Attack Phase

The ship with the highest initiative attacks first The next highest attacks next and so on. For each attack roll 1D10. This is the To hit roll. Phasers hit on a roll of 5 or more.

Torpedoes and Missiles hit on a roll of 7 or more. Scanners & cloaking modify the To hit roll. Security teams may also attack.

If an attack hits, a ship may try to evade if it has an elite crew. Security teams may be evaded. If an attack hits, and it is not evaded, roll for damage. Shields will absorb damage.
Too much and the shields blow (are destroyed). If

the ship has no shields, each point of damage destroys one hull point. If a ship has negative hull points, every phaser hit it takes requires 1 roll on the Critical Damage Table.
Torpedo + missile hits require 2 rolls.

Critical Damage Table

1D10	Effect
1	1 Weapon system destroyed (reroll if none left)
2	1 Drive destroyed (reroll if none left)
3	Warp Core
4	Life Support
5	Super Structure
6	Targeting Computer hit all weapons fire at negative one.
7	maneuvering thruster damage may choose a turn OR fly straight a turn
8	weapons internal damage -1 damage and -1 range all weapons
9	malfunctions roll 1d6 before each movement/weapon fire on a 6 fail.
10	laugh it off it only took out the ships restroom!

If the Warp Core is hit twice the ship explodes. If Life Support is hit twice the entire crew is killed. If the Super Structure is hit twice the ship breaks apart.

Basic Rules Sample Ships

- Ship Name: 5 Additional systems
- The Courageous: Shields, Torps, Security, Drives x2
 - The Victorious: Scanners, Armor x2, Shield, Elite Crew
 - The Noblesse: Elite Crew, Shield, Torps, Drives, Scanners
 - The Atlantea: Phasers, Drives, Shields x2, Cloak

Advanced Rules Shipbuilding

The basic military hull is worth 2 construction points. Each additional system is 1 construction point.

- Small ships have 0-3 additional systems.
- Corvettes, escorts, gunships, raiders
- Medium Ships have 4-6 additional systems.
- Destroyers, frigates, cruisers
- Large ships have 7-10+ additional systems.
- Battle Ships, capitol ships, dreadnaughts, carriers

Basic Commercial Hull

The basic commercial hull is worth 2 construction points.

- 10 Hull points
- 2 Drives
- 3 Non military systems

Non military systems include: Cargo bays, Science Labs, Mining equipment, Passenger accommodations, etc.

Space Station Hulls

The basic Space station hull is worth 2 construction points. Space stations have no drives

- 20 Hull points
- 4 Non military systems.

All weapons mounted on Space stations fire out of any arc.

Fighter Hulls

The basic fighter hull costs 2 construction points. They have 1 hull point. Any roll on the critical damage table will destroy them. They have 5 drives, 1 phaser, 1 elite crew Up to 5 fighters can be carried by a ship for every cargo bay the ship has.

Fighters can have a maximum of 3 additional systems

Space Freighters

Introduction

Card game for 2-4+ players. Space Trading Theme. Deliver goods to far flung worlds for mega credits.

Victory

The player with the most Mega Credits (MC) at the end of the game wins.

Game End

The game ends at the end of the turn that the last card was drawn from the deck.

The Deck

Players share a common deck. There are 4 card types:

- 1. Goods
- 2. Worlds
- 3. Events
- 4. Aid

Goods Cards

There are 4 types of goods:

- 1. Organics
- 2. Tech
- 3. Luxury
- 4. Materials

Mega Credits

Use coins to keep track of Mega Credits (MC)

Setup

Pick one player to go first. Play proceeds clockwise.

Turn Sequence

- Players take turns. Each turn has 4 phases:
- 1. Draw Phase

- 2. Trade Phase
- 3. Delivery Phase
- 4. End Phase

Draw Phase

Flip over the top card of the deck. If it is an Event card resolve it immediately. If it is a World, Good, or Aid card, put it in your hand.

You can play (discard) an Aid card from your hand to negate a negative Event card.

Trade Phase

Players may freely trade cards in their hands.

Delivery Phase

You may make a delivery of goods to a World. Each World will pay a certain amount of MC for specific types of goods according to its text. To make a delivery you must play (discard) a World card and One or more Goods cards from your hand.

The goods cards can be of the same or different types. If you sell more than one card of the same exact type of good, you must sell it at a Discount: The second card earns 1 less MC, the third card earns 2 less MC and so on. You can only deliver to one world in Delivery Phase.

End Phase

Max hand size is 7 cards. Discard excess cards.

Card List Notation

- O** Organics
- T** Tech
- L** Luxury
- M** Materials

Value = MC Bonus when sold

SRT Skip the Rest of this and next Turn

Nebula Vortex	Energy Hazard. Discard 3 Random Cards

Space Fury

<body>

Introduction

Quick & Dirty Tactical Space Fighter Combat Rules. Special rules for pilots: 10 Skills, Panic, Quirks, Special maneuvers. Very easy ship construction system.

Custom Space Fury

Check out these cool mods by Erick Iwasenko at: Custom Space Fury

Supplies

A space hex map is required. Use painted miniatures or chits to represent ships. 10 and 6 sided dice are used

Turn Sequence

1. Stealth Phase: Cloaking
2. Detection Phase: Detect Cloaked Fighters
3. Tactics Phase: Determine who goes first in movement phase
4. Movement Phase: Normal movement or attempt Special Attack Maneuvers
5. Special Maneuvers Phase: Offensive or Defensive
6. Missile Launch & Move Phase: Move Missiles, Declare targets of Missiles & Rockets
7. Gun Declaration Phase: Declare Targets
8. Gun Resolution Phase: Roll ToHit & Damage
9. Missile Resolution Phase: Roll ToHit & Damage
10. Morale Phase: Taunting, Panic checks, Rally checks

1. STEALTH PHASE

Ships with cloaking devices may cloak or uncloak. Ships that attack or communicate immediately uncloak. Cloaked, undetected fighters cannot be attacked.

2. DETECTION PHASE

A fighter with basic sensors will detect cloaked fighters up to 10 hexes away on a roll of 1-2 on D10 A fighter with the scanner enhancement will detect cloaked fighters up to 20 hexes away on a roll of 1-4 on D10 Detected fighters can be attacked

3. TACTICS PHASE

Each player rolls 1D10. This is the Initiative roll. The high roll gets to move last in Movement phase. Actions in all other phases are considered simultaneous.

Pilots with Tactics skill add 1 to their sides initiative roll.

4. MOVEMENT PHASE

Fighters have a base Speed =4 For each point of speed a fighter may move forward 1 space or change its facing one hex face (60 degrees). Fighters with a Jump drive and that are in a jump point may jump to another star system. Any number of units may occupy the same space

5. SPECIAL MANEUVERS PHASE

Fighters may attempt special offensive maneuvers. See corresponding Tables.

6. MISSILE LAUNCH & MOVE PHASE

A fighter can launch some or all of its missiles & rockets. Missiles move like fighters. They begin in the same space with the same facing as the ship that launched them. Missiles persist from turn to turn until they hit a target, are lost, or are shot down.

Rockets only last one turn. They can be aimed at targets in a 60 degree arc extending from the front of the fighter. Rockets launched from the same pod in the same turn must be aimed at the same target. Place the rockets in the same hex as the target.

7. GUN DECLARATION PHASE

Guns in standard fixed mounts may fire at targets in a 60 degree arc extending from the front of the fighter. Fixed Guns may also fire at targets in the same hex that were in the hex from a previous turn or that entered the hex this turn from one of the 3 hexes the fighter is facing. Guns in turrets may fire in any direction.

Guns may be aimed at fighters, missiles, or rockets.

8. GUN RESOLUTION PHASE

All attacks are considered simultaneous Use the To Hit Table for each attack Roll on the Damage Table for attacks that hit

9. MISSILE RESOLUTION PHASE

Missiles & Rockets not shot down may roll to hit

10. MORALE PHASE

This phase is divided into 3 segments: Taunt, Cool, and Rally. Taunt Segment : Pilots with taunt skill may taunt target opponent pilots within 10 Hexes. Target is taunted on a roll of 1-5 on D10.

Cool Check Segment: Pilots whose ships have been hit or who have been taunted must save on 1-6 on D10 or roll on the Panic Table. Rally Segment: Pilots with leadership skill can attempt to rally another pilot that failed a cool roll or is already panicked. The chance to rally is 1-5 in D10. Rallied pilots do not panic.

Rally range= 20 hexes

Factions

1	Colonial Federation
2	Terran Empire
3	Andromeda Alliance
4	Corporate Mercenaries
5	Fringeworld Pirates
6	Templars of the Church of Mankind

1	Colonial Federation
7	Independent Warlords
8	Rebel Worlds
9	Planetary Defense Force
10	Alien Invasion Force

Fighter Construction

In single session games ship enhancements are determined randomly using the Primary Enhancements Table. For 11 enhancements add 11 to the cost; for

FIGHTER COST	ENHANCEMENTS
20	0
21	1
23	2
26	3
30	4
35	5

12 add 12, and so on. This is the law of diminishing returns.

The better its made the more it costs. Pilots must also be purchased. Their cost is equal to their number of experience points.

FIGHTER COST	ENHANCEMENTS
41	6
48	7
56	8
65	9
75	10

Basic Systems

All fighters have these systems built into their cost:

- Hull- Contains all other systems. Affords minimal protection. Base Armor Modifier = 0
- Cockpit & Life support- 1 pilot. 1 week of Oxygen
- Reactor Core- Converts Fuel into energy
- Fuel Reserve- Enough fuel for 4 days of cruising, or 5-30 minutes of sustained weapon fire at maximum speed.
- Power grid- Distributes power to all systems

- Standard Engine- Base Speed = 4
- Directional thrusters- Base Maneuver Modifier = 0
- Central Computer- Controls all systems
- Targeting- Base ToHit Modifier = 0. Pilot may fire at one target per turn
- Sensors- Passive & Active. Used for detection, targeting, and navigation
- Weapon- All off the rack fighters come with one Laser (Range =5, Damage +0, ToHit +0, Gun)

Primary Enhancements Table

D10	ENHANCEMENTS	NOTES
1	Targeter	ToHit Modifier +1 with one weapon vs one target
2	Engines	Speed +1
3	Thrusters	Base Maneuver Modifier +1
4	Missile Rack	2 Missiles: Speed =6, Maneuver +4, ToHit +1, Damage +4
5	Extra Laser	Range =5, Damage +0, ToHit +0
6	Special Weapon	Roll on Subtable
7	Armor	Base Armor Modifier +1
8	Deflector Shield	Absorbs 1 Hit, then blown
9	Special System	Subtable
10	Pick 1 Result	

Special Weapon Table

All guns contain enough ammo or active materials to fire about 50 times

D10	SYSTEM	NOTES
1	Turbo Laser	Range =3, Damage +1, ToHit +1, Gun
2	Particle Accelerator	Cost =2 Enhancements; Range =8, Damage +1, ToHit +0, Gun
3	Rail Gun	Cost =2 Enhancements; Range =6, Damage +3, ToHit -1
4	Chain Gun	Range =2, Damage +2, ToHit +1; HE shells

D10	SYSTEM	NOTES
5	Ion Gun	Range =4, Damage +X, ToHit -1;
-		A nondeflected hit causes System shock
6	Rocket Pod	Range =6, Damage +2, ToHit +0; Contains 8
-		Rockets; 1-4 may be fired at one time.
7	Plasma Generator	Range =1, Damage +0, ToHit +2, Gun
8	Nuclear Missile	Cost =2 Enhancements, Like normal missile but Damage +25
9	Turret	Attached weapon may fire in all arcs & target
-		Missiles & Rockets
10	Pick 1 Result	

Special Systems Table

D10	SYSTEM	NOTES
1	Jump Drive	Allows travel between stars
2	Escape Pod	If fighter explodes, pilot escapes in pod (Speed =2)
-		on a roll of 1-3 on D6
3	Cloaking Device	Cost =2 Enhancements; Ship may Cloak
4	Jammer	Missiles are -1 ToHit this fighter or any adjacent fighters
5	Scanners	Enhanced Sensors; Detection +2, Detection Range +10
6	Streamlining	Non-streamlined Ftrs in Atmospheres: speed -1 & maneuver -1
7	Copilot	Cockpit accomidations & Life support for a copilot
8	Afterburner	Speed +4; can be used once; Costs 1 to replace
9	Storage Space	Doubles fuel capacity or may be used to carry cargo
10	Pick 1 Result	

To Hit Table

D10	RESULT
1-4	Miss (Missile Lost)
5-6	Near Miss
7-10	Hit!

All attacks use the same table

- Defending Fighter Maneuver Bonus -1
- Missiles are +1 to hit
- Missiles & Rockets are -1 to be hit
- Attacking Pilot Accuracy Skill +1
- Defending Pilot Evasion Skill -1
- Defender moved 4+ Hexes -1
- Attacker moved 4+ Hexes -1
- Defender Stationary -1
- Attacker Stationary -1

To Hit Roll Modifiers

- Attacking Fighter Targeting system Enhancements +1

Damage Table

D10	RESULT
1-3	Deflected (No Damage)
4-6	Minor Structural Damage; +1 to next Damage Roll
7-8	Moderate Structural Damage; +2 to next Damage Roll
9+	Critical Damage Table

Damage Roll Modifiers

- Attackers Weapon Bonuses +X
- Defending fighter Armor Enhancement -1
- Defenders Accumulated Structural Damage +X
- Defender has Deflector Shield: Attack is automatically deflected & shield is destroyed (Blown).

Critical Damage Table

D10	RESULT: NOTES
1	System Shock: Ship can do nothing on its next turn except launch escape pod
2	Weapon Destroyed: Roll 1D6: on 1-3 attacker picks, 4-6 defender picks
3	Engines Hit: Speed -1
4	Thruster Hit: Maneuver -1
5	Targeting Damaged: -1 to all ToHit rolls with Guns
6	Special System Destroyed: Roll 1D6: on 1-3 attacker picks, 4-6 defender picks
7	Reroll: 1D6 on this table
8	Basic System Destroyed: Roll on the Basic System Destroyed Table
9+	Ship Explodes

Basic System Destroyed Table

D10	SYSTEM	RESULT
1	Cockpit	Pilot Killed
2	Life support	Pilot Killed
3	Communications	Detection -2
4	Sensors	ToHit -2, Detection -4
5	Antigravity	Maneuver -1
6	Fuel Reserve	Ship Explodes
7	Reactor Core	Ship Explodes
8	Power Grid	Permanent System shock
9	Computer	ToHit -2, Detection -2, Maneuver -1, Ship cannot Jump
10	Reroll	-

Types Of Play

There are several ways to play space fury. These include:

1. Duel- One ship versus another. Single playing Session.
2. Squads- One squad versus another. Single playing Session.
3. Scenarios- Several sample scenarios are included at the end of the rules. Single playing Session.
4. Campaign Missions- This is several connected

scenarios where the results of one scenario affect the next scenario. This level of play requires a gamemaster. Multiple playing Sessions.

5. Roleplaying- The gamemaster will have to develop nonpiloting skills and quirks. Adventure possibilities may include rescue missions, exploring systems in the neutral zones, first contacts, diplomatic missions, hunting down spies and pirates, dangerous reconnaissance missions, and sabotaging enemy bases.

Pilot Level Table

Level	Experience(XP)	Skills	Reputation	Cool
1	1	1	Green	3
2	3	2	Green	4
3	6	3	Regular	5
4	10	4	Regular	6
5	15	5	Regular	7

Level	Experience(XP)	Skills	Reputation	Cool
6	21	6	Regular	8
7	28	7	Veteran	9
8	36	8	Veteran	9
9	45	9	Veteran	10
10	55	10	Elite	10

Notes: First level skill is always Basic Combat Pilot.

Experience Points Table

ACTION	XP AWARDED	NOTES
1 Year of Training	1	Academy quality
Minor Battle	1	7 or less ships per side

ACTION	XP AWARDED	NOTES
Major Battle	2	More than 7 ships per side
1 Kill	1	Defenseless or very inferior
	-	targets do not count

Terran Defense Force Officer Ranks

Pilot Rank	Prerequisites	Pilot Rank	Prerequisites
Private	Level 1	Lieutenant	Level 6 & Leadership skill
Corporal	Level 2	Major	Level 8
Sergeant	Level 4 & Tactics skill	Captain	Level 10

Pilot Skills

D10	Skill	Notes
1	Accuracy	+1 to hit with one gun attack
2	Speed	+1 Speed
3	Evasion	+1 Evasion
4	Stunts	+1 to attempt Special Maneuvers
5	Tactics	+1 to Initiative rolls. A pilot cannot be a
-		wingleader unless he has this skill
6	Engineering	Required to do Repairs at Dock
7	Taunting	+1 to Taunt & +1 to Cool Rating
8	Navigation	Required for hyperspace Jumps
9	Lucky	Each level of luck allows the pilot to reroll
-		any 1 Dieroll he makes during a battle.
10	Leadership	+1 to Rally

Quirk Table

Quirks have a strong Roleplaying element. Players should have their pilots act out their quirks, moments of panic, and heroism in the spirit of the game. Sometimes pilots will develop personality quirks and particular flying styles.

At every level increase on a roll of 1 on D6 a quirk will manifest itself. When roleplaying, pilots' quirks and personalities are much more complex and characters may develop multiple quirks to varying degrees. Characters quirks will change and evolve over time.

Characters may roll under their cool rating om D10 to control their quirks.

D100	QUIRK
1-5	Foolhardy: will charge large groups of enemies. Cool +3. Saves at -3 versus taunts.
6-10	Creep up: will not fire weapons until within 3 hexes. Tactics +1
11-15	Focused: Will only attack 1 enemy at a time and will not change targets until that enemy is destroyed. Speed +1
16-20	Dutiful: Will never leave a comrade at the expense of the mission. Will be the last to leave a battle. Wingmen are Cool +1.
21-25	Uncontrollable: Will not stay in formation. Speed +1.
26-30	Over cautious: Will hang back and fire from a distance. Likes to cloak. Evasion +1.
31-35	Fixated: Will go for the mission goals at the expense of everything else. Evasion -1 Speed +1 Accuracy +1.
36-40	Safety in Numbers: -2 Cool when not in formation. +2 cool when in formation. Tactics+1.
41-45	By the Book: Will not do special maneuvers. Tactics +1 Leadership +1.

D100	QUIRK
46-50	Sneaky: Will always try to get behind enemies and tail them. Accuracy +1
51-55	Hot Dogger: Will attempt special maneuvers whenever possible. Stunts +1
56-60	Trigger Finger: Will fire all missiles as soon as possible.
61-65	Dogfighter: Cool -2 if ganged up on. Evasion +1.
66-70	Intimidating: Taunt+1 Must be a veteran.
71-75	Superiority Complex: Taunt +1. Don't expect much backup.
76-80	Straight Runs: Accuracy +1 Cannot end a move with a turn.
81-85	Responsible: Will not do Special maneuvers. Wingmen are Cool +1.
86-90	Proximity sensitive: Will always attack the nearest opponent over other targets.
91-95	Speed Demon: Moves at full allowance when not in formation. Speed +1
96-100	Taciturn: Cool +1, Cannot Taunt.

Panic Table

Roll on the panic table when a pilot fails a cool roll.

1D10	Pilot Reaction
1-	Revenge: The pilot must attack with all weapons if possible, one of the ships that attacked it.
2-	Rout: The pilot turns around and flees off the map as quickly as possible for the rest of the game.
3-	Freeze up: The pilot maintains same speed and course next turn and cannot do anything else.
4-	Stop Everything: The pilot cannot move next turn.
5-	Yikes!: Pilot must attempt a special maneuver next turn if an enemy is within 5 hexes.
6-	Distracted: Pilot is -1 on all rolls next turn.
7-	Systems Check: Pilot cannot attack next turn.
8-	Keep your distance: Pilot will try to stay at least 3 hexes away from enemy craft.
9-	Shaken: Pilot -1 on all cool rolls for rest of battle.

10- Help!: A nearby friendly ship will move to put itself between the

panicked ship and its attackers next turn.

Special Maneuvers

Pilots with stunt skill add 1 to their rolls on the special maneuver success tables. Attack & defense maneuvers use the same table:

Special Maneuver Success Table

D10	RESULT
1-2	Failed miserably. You may not attack this turn. Speed -2 next turn.
3-4	Failed & Off Course. Accuracy -2.
5-7	Failed, you Hesitated. You may attack normally.
8+	Maneuver Successful.

Attack Maneuvers

1. Strafe- Accuracy +1. Must have moved a minimum of 3 hexes in a straight line.
2. Tail- Accuracy +2 vs enemy fighter you are directly behind within 1 Hex and facing their rear arc.
3. Dive- Fighter must have moved at maximum speed. Move forward 1 Hex.
4. Revolver- Weapons can fire out of any arc. Only if fighter has not moved this turn.

5. Careful Aim- Accuracy +1, Only if fighter has not moved this turn.
6. Loop- Perform this maneuver only if you have not yet moved this turn. Move backwards 3 or 4 Hexes.

Defensive Maneuvers

1. Roll- Slide ship to the right or left on space.
2. Dodge- Evasion +1, Easy maneuver: +1 on Defensive maneuver success roll.

3. Brake- Evasion+2, Move backwards 1 or 2 Hexes
4. Hard Turn- Evasion +2. No attack this turn. Change facing 1 hex to the left or the right.

Formations

A formation is a group of 2 or more fighters flying together with the same facing & within 1 hex of

another formation member. The wingleader of a formation gets Tactics +1. There can be only 1 Wingleader. The wingmen get Detection +1.

All fighters in the formation get Accuracy +1 and Maneuver -1.

Sample Fighter Descriptions: Human Designs

#ENH	TYPE	SYSTEMS
4	Interceptor	Turbo Laser, Speed +1, Maneuver +2, Targeter +1
3	Defense Fighter	2 Rocket Launchers, Laser, Shield
4	Light Fighter	Laser, Speed +2, Maneuver +2
5	Scout	1 Laser, Scanners, Cloak, Streamlining,
-		Jump, Storage
6	Assult Fighter	4 Lasers, Jump, Shield, 1 Missile
5	Escort Fighter	1 Particle Accelerator, 1 Ion Gun, Jump,
-		Armor, Shield
10	Gunship	Copilot, Chain Gun+Turret, Rail Gun, 2 Armor,
-		2 Shields, 2 Missiles,
10	Heavy Bomber	Laser+Turret, Shield, 4 Nukes
7	Fighter Bomber	4 Missiles, 2 Lasers, Maneuver +1, Armor
3	Symbiote Fighter	2 Copilots, 2 Lasers

SAMPLE SCENARIOS: Skirmishes Roll 1D6 + The total number of fighters. Each side has this many levels worth of pilots.

D6	SIDE A	SIDE B
1	2 Fighter Bombers	4 Interceptors
2	3 Defense Fighters	3 Light Fighters
3	4 Assault Fighters	2 Escort Fighters & 1 Gunship
4	3 Assault Fighters	5 Light Fighters
5	2 Scouts	1 Heavy Bomber
6	2 Interceptors	2 Symbiote Fighters + 1D6 extra levels of pilots

Game Designers Notes

Vietnam Air Fury Variant

Joe Nixon <commander1@yahoo.com> has created a Vietnam version of Space Fury: Check out the [Vietnam Air Fury: By Joe Nixon. Variant Of Space Fury](#) Vietnam Air Fury</L> Link.

Yes, I rewrote it again, but this version kicks butt!

Space Hole

Introduction

Solo Dice & Card game. The player must defend and build up his Space colony.

Space Junk

Six sided dice are needed. Tokens to indicate damage and power are needed. Pen & paper to record Megacredit totals are needed.

The Deck

The deck has 4 types of cards mixed in: Events, Invaders, Defenders, and Structures.

Base

You start with your base card in play. The Base has the following attributes: It can take 10 hits of Damage before being destroyed. It has a built in laser turret: It attacks with one die every battle turn.

It generates 5 power points every turn. A Base allows you to have two defenders.

Setup

You start with your base, zero Megacredits, and no cards.

End Of Game

The game ends at the end of the turn when the last card has been drawn from the deck. If your base is ever destroyed the game ends immediately and you lose with a score = 0.

Scoring

Your score is equal to your Megacredit total at the end of the game.

Turn Sequence

Each turn has 5 Phases:

1. Space Karma Phase
2. Event Phase
3. Build Phase
4. Power Phase
5. Income Phase

Space Karma Phase

Draw 1 card. If it is an Invasion or Event card it is resolved in Event Phase. Otherwise, keep it in your hand.

Max hand size is 5 cards. Discard excess cards.

Event Phase

An Invasion or Event card drawn last phase is resolved now. For Event cards just follow the instructions on the card. Discard the Event card after it is resolved.

For Invasion cards are resolved through Battle Rounds. In a Battle Round the Invader attacks, and your Defenders & Laser Turrets attack once each.

Roll 1D6 for every level of Force an Invader or Defender has. A roll of 1 will do one point of damage to the opposing side. Use counters placed on the cards to record damage.

Each damage counter so placed reduces the cards Force by one point. An Invader or Defender card reduced to 0 Force is destroyed. Destroyed cards are discarded.

When the invaders inflict damage a random defender card will be hit first. If there are no defender cards, Force domes will be attacked next. Force Domes can take 3 Hits before being destroyed.

If all force domes are destroyed, Laser Turrets (Force = 1) are next. If all Laser Turrets are destroyed, then the Base card will be attacked next. The Base card can take 5 hits and it has a built in Laser turret that can make a one die attack every round.

Build Phase

You may play one Structure card or one Defender card from your hand. The played card is placed face-up on the table in front of you. Note: You cannot have more Defender cards than your structure cards allow.

Excess are discarded.

You cannot play a structure if you can't provide it a power token this turn in power phase.

If you did not play a card you may remove all the damage tokens on one of your cards.

Power Phase

Your Base and Solar Array cards generate power points. Other Structure cards use up Power Points. Some structures also need the presence of other structures to be maintained.

For example: Each Colony requires one power point plus the food output of one Agrodome. Note: One

Agrodome could not support 2 Colonies. Place a Power Token on every structure that is able to meet all of its upkeep demands.

Income Phase

Some structures generate income. If such a structure has a power token on it then it is able to generate all of its income this turn. Otherwise it generates no income.

Record all income generated from all structures. At the end of this phase discard all Power tokens.

Structure Card List

Card Name:	#	\$	P	D	Notes:
Base	1	0	0	2	Generates 5 power/turn
Solar Array	7	0	0	0	Generates 5 power/turn
Agrodome	6	1	1	0	Supports Colony
Colony	4	3	1	1	Requires 1 Agrodome
Mine	8	1	1	0	Supports Refinery
Refinery	4	2	1	0	Requires 2 Mines
Factory	1	3	1	0	Requires 2 Refineries
Starport	1	5	2	1	Requires 2 Colonies
Research Labs	2	1	1	0	
Stargate	1	7	3	1	Requires 1 Lab
Command Center	1	0	1	1	Hand Size +2
Laser Turret	4	0	1	0	Force = 1
Force Dome	2	0	1	0	3 Hits

Number of that card in the deck

\$ Number of Megacredits generated each turn

P Amount of Power used up per turn

D Number of Additional Defender cards that may be in play.

Defender Card List

Card Name:	Force	Notes:
Space Rangers	2	Discard at end of turn to look at next 1D6 cards in deck
Astro Guard	2	
Space Marines	3	
Space Navy	4	
Battle Station	4	
Space Knights	3	
Star Fighters	3	
Space Hero	5	Can only take 1 Hit
Star Force	3	
Space Patrol	2	
Space Scouts	2	Discard at end of turn to look at next 1D6 cards in deck
Space Troopers	3	
Alien Artifact	5	Play & use only if you have a Lab

Invader Card List

Card Name:	Force
Alien Predators	3
Imperial Stormtroopers	4
Berserker Robots	6
Alien Invaders	3

Card Name:	Force
Space Pirates	3
The Warstar	6
Alien Parasites	4
Dalek Exterminators	5

Card Name:	Force
Corporate Mercenaries	3
Cyborg Collective	6
Little Green Men	4
Alien Brainsuckers	5
Mutant Space Zombies	3
Cylon Raiders	4

Card Name:	Force
Space Monster	5
Romulan Warbirds	4
Vampiric Space Beavers	3
Starmada	6
Time Warp Fugitives	3
World Eater	7

Event Cards List

Card Name:	Notes:
Solar Flare	Randomly distribute 2 points of damage to your defenders
Reinforcements	Take 1 defender from your discard & put it in your hand
Lost in Space	Discard 1 random Defender
Supernova	Discard your hand
Lab Explosion	Discard 1 Lab
Core Instabilities	Discard 1 Mine
Terraform	All Agrodomes income +2 for rest of game
Black Hole	Discard 1 random Defender
Emergency Repairs	Discard all Damage counters
Seismic Events	Generate no income this turn
Intergalactic War	Discard 1 random Defender
Sabotage	Discard one random structure*
Dilithium Crystals	Gain 10 Megacredits per Mine
Space Traders	Gain 3 Megacredits per Structure
Planet Bombs	Discard one random structure*
Meteor Swarm	Discard one random structure*
Space Virus	Discard 1 Defender or Colony
Discovery	Gain 50 Megacredits if you have a Lab
Merchant from Venus	Gain 20 Megacredits per Colony
Cosmic Con Artist	Lose half of your Megacredits
Interstellar Tax Men	Lose 2 Megacredits per Structure
Repairs	Take 1 structure from your discard & put it in your hand

* If Base is hit, it takes 1 Damage counter.

Babylon 5 Variant

By C. Gerard Luft Babylon 5 for spacehole. Uses the same rules as spacehole, only the names of some cards have changed. The player tries to operate b5 while defending against invaders.

B5 Structure Card List

Card Name:	#	\$	P	D	Notes:
Hull	1	0	0	2	Generates 5 power/turn
Fusion reactor	7	0	0	0	Generates 5 power/turn
Garden	6	1	1	0	supports b5
Living quarters	4	3	1	1	requires 1 garden
Loading bay	8	1	1	0	supports refinery
Factory	1	3	1	0	requires 2 refineries
Landing bay	1	5	2	1	requires 2 living quarters
Research lab	2	1	1	0	

Card Name:	#	\$	P	D	Notes:
Hyperspace jumpgate	1	7	3	1	requires 1 lab
Command and control	1	0	1	1	+2 hand size
Ppg turret	4	0	1	0	Force = 1
Hull armor	2	0	1	0	3 Hits

Defender List

Card Name:	Force	Notes:
Ranger Observers	2	Discard to look at 1d6 cards in deck
Security	2	
Marines	3	
Jeffrey Sinclair	4	Ranger Commander
Michael Garibaldi	4	Security Chief
Ranger Strike Team	3	
Star Fury Fighters	3	
Co Capt John Sheridan	5	can only take 1 hit
Susan Ivanova	2	xo lt cmd
Ranger Marcus Cole	2	discard to see 1d6 cards
White Star	3	
Alien Artifact	5	only if lab present

Invaders List

Card Name:	Force	Card Name:	Force
Centauri agents	3	Drazi sunhawk	3
Minbari colonial fleet	4	Vorlon cruiser	6
Minbari expeditionary fleet	6	Centauri colonial fleet	4
Minbari agents	3	Centauri battle fleet	5
Narn agents	3	Minbari battle fleet	5
Narn expeditionary fleet	6	Space pirates	4
Psi corp telepathic military	4	Night watch	3
Narn battle fleet	5	Centauri expeditionary fleet	6
Secret police	3	Rouge soul hunter	3
Narn colonial fleet	4	Shadow ship	7

Event List

same as in spacehole.

Space Insurrection

Introduction

"The Universe is Mine! Mine! All Mine I tell you!"
—Lord Phallius, Space Tyrant—

Map

Draw 10 Planets indicated by circles. Devise names for all the planets. Make each circle large enough to hold a dozen or more chits. The terms: Planet, World, and System are interchangeable.

Setup

Each player starts with a base on one loyal world and 7 random Unit chits in his reserve pile. All other worlds are neutral.

Victory

All Worlds loyal to your side at the end of the turn, or Elimination of all of your opponents units from the board.

UNITS	TYPE	ACTIONS
Assassin	EP	Kill (Public Personality)-3
Security	PP	Kill (Espionage Personality)-3; Deploy Personality-3
Star Cruiser	M	Transport Troops; Attack Cruiser-3; Blockade; Bombardment-3
Troops	M	Attack (Troops, Rebels, Installation)-4; Control World-3; Subdue Uprising-4
Diplomat	PP	Incite uprising-3; Control World-3; Deploy Personality-4
Agent	EP	Surveillance, Spy-4; Deploy (Personality, Rebels)-3
Sabateur	EP	Sabotage (Military unit)-3; Sabotage (Installation)-4
Governor	PP	Recruit-5; Deploy (Personality, Troops)-5; Subdue Uprising-3
Rebel Leader	EP	Deploy (Rebels)-5; Incite uprising-4
Rebels	M	Attack (Troops or Installation)-3, Incite uprising-3; Deploy Rebels-4
Base	MI	Deploy (Troops, Star Cruiser, Installation)-5
Force Field	MI	Planet Immune to Bombardment
Ion Gun	MI	Attack Star Cruiser-3
Loyal World	–	Recruit-5; Deploy Base-4; Deploy Personality-4; Repair-2

Worlds are part of the Map. TYPES: PP = Public Personality Unit; EP= Espionage Personality; M = Military Unit;

MI Military Installation

Turn Sequence

1-Recruit Phase 2-Blockade Phase 3-Surveillance Phase 4-Movement Phase 5-Action Phase

Counters

Each player needs a set of 10 "Loyal World" counters of a color unique to that player. Each player needs a set of 30 blank "Identification" counters of a color unique to that player. Identify your units by placing your Identification counters under them.

Recruit Pile

Chit Mix: Make 10 of each unit type. Force Fields & Ion guns only 5 each. Include 1 or 2 each of each of the special chits. When making chits write the name of the unit and an identification number #1-10.

Recruit Phase

Draw 1 chit from the recruit pile per successful recruit attempt by Loyal Planet and Governor (on a loyal planet) you control. Only 1 governor per planet gets this benefit. If the planet is blockaded by enemy Star Cruisers the ability of Loyal Planets and Governors becomes Recruit-3.

Worlds disrupted by bombardment cannot recruit. Governors on worlds disrupted by bombardment cannot recruit. Recruited chits go into your reserve pile.

Neutral worlds and worlds with uprisings do not recruit chits. You can have a maximum of 7 chits in your reserve before you must discard back to the recruit pile.

Blockade Phase

Star cruisers may declare they are blockading the world they currently orbit.

Surveillance Phase

Non-wounded Agents have two different actions they may take:

1. Observe-2 an opponents reserve pile.
Observe-2 means that the observation succeeds on a roll of 1-2 on D6.

2. Observe-2 an enemy unit. If successful, The controlling player must declare that units' movement orders immediately. The agent gets observe-4 if he is in the same system as the unit.

Movement Phase

All players write down movement orders for all of their units. A unit can move to any world on the map from any other world. Blockading Cruisers may not move.

Players reveal their orders. Example Order: Move Agent#3 to Cassioia. Players move their units. All movement is considered simultaneous.

Rebels, Ion Cannons, Shields, and Bases do not move (Rebel Leaders may move). Troops can only move if a Star cruiser transports them. Example Order: Move Star cruiser #1 and Troops#2 to planet Jungla.

Units not given written orders do not move. Smugglers rule: Every enemy personality trying to get on or off a blockaded world must roll D6: On a roll of 1-2 they are destroyed. Disrupted & wounded units may move.

Action Phase

Wounded Personalities can take no other action except heal Disrupted units, installations, and worlds

can take no other action except repair. Conduct all the actions on one planet before moving to the next. Go in Alphabetical order by planet.

Players with units on the World take turns. In a turn, one unit takes one action. The Player with more units in the System goes first.

Blockading Cruisers may not do any further actions. Worlds disrupted by bombardment cannot deploy. Units on worlds disrupted by bombardment cannot deploy.

Governors may only deploy on loyal Worlds. A unit may only attempt to control a world if no enemy troops are present. An agent that acted in surveillance phase may not act in this phase.

Wounded/disrupted units that are wounded/disrupted again are eliminated.

Determining Action Success

All actions are written in the form: Action-X For example: Sabotage-3 This means the sabotage action is successful on a roll of 1-3 on D6. Sabotage-4 means the sabotage action is successful on a roll of 1-4 on D6

Explanations Of Unit Actions

Actions can only be taken against units in the same system. A unit may only undertake one of the following actions if the action is listed in the units description.

ACTION	SUCCESS
Deploy	Put target chit from your reserve pile into same system
Attack	Roll D6: on 1-4 Target Destroyed; on 5-6 Target Disrupted
Kill	Roll D6: on 1-3 Target Killed; on 4-6 Target Wounded
Sabotage	Roll D6: on 1-2 Target Destroyed; on 3-6 Target Disrupted
Bombardment	Target Military Units/Installations; Roll D6: 1 = Destroyed; 2-6 = Disrupted
Bombardment	Target a Worlds Industry. The World becomes Disrupted.
Heal	Remove Wounded result from personality. All personalities have Heal-3
Repair	Remove Disrupted result from unit. All nonpersonality units have Repair-3
Control World	World (not in Uprising) becomes loyal to your side.
Incite Uprising	The world becomes Uncontrolled and Hostile to all players Indicate with an 'Uprising' marker.
Subdue Uprising	Remove 'Uprising' marker, World becomes loyal to your side.
Spy	All further actions this turn against target of espionage are at +1 to the success roll For example: Kill-3 becomes Kill-4; Only 1 such bonus allowed vs target.

Installations

Only one of each type of Installation can be deployed on a world.

Gaining Control Of Worlds

Only Diplomats & Troops can gain the loyalty of worlds. The world must first be rid of all enemy Troops & Installations. Once a world becomes loyal to you, put any rebels on it you control into your reserve.

You cannot Deploy rebels onto a world you control.

Optional Sample Special Chits

Betrayal- Play as an action. Gain control of target personality. Sabotage- Play as an action. Automatic success. Any Military target. Deploy Rebels- Play as an action. Automatic success. Any target planet.

Careful Planning- Personality gets an extra Action this turn. Tactical Superiority- Military unit gets an ex-

tra Action this turn. Assassination- Play as an action. Automatic success. Any target Personality.

Quick Recovery- Play as an action. Target unit healed or repaired. Deploy Personality- Play as an action. Automatic success. Any target planet. Incite Uprising- Play as an action. Automatic success. Any target planet.

Subdue Uprising- Play as an action. Automatic success. Any target planet. Diplomacy- Play as an action. Automatic success. Any target neutral planet comes under your control.

Game Designers Notes

Similar to Emporex but cleaner & more elegant. Its like getting to be both the rebels & the evil empire. Special thanks to Lorenzo Hernandez & Dan S. for pointing out several flaws in the rules (which have been "fixed")

Counters & Planet Maps

The following amazing sets were created by David Ashton: david.ashton@chesdatasys.co.uk David has also made counters and cards for Stratastar.

To view the Planet Maps at David's site

Space Nazi Skirmish

Introduction

Board & card game for 2 players. Abstract Skirmish level space combat.

Disclaimer

Based on the Iron Sky Movie. This is merely a fan site.

Premise

In 1945 Nazis, using flying-saucers, escaped to and colonized the Dark side of the moon. They call themselves the Fourth Reich. Ever since, and unknown to us, they've been plotting their return. Their Fleet is currently in Low Earth Orbit, bombarding New York With large Moon rocks and sending down waves of Attack saucers.

Unknown to the Nazis and to each other, each of the major Earth Nations has secretly weaponized their communication and science Satellites. These have now banded together to fight off the Nazi Invasion Fleet.

Victory

Complete destruction of the opposing Fleet.

Ship Special Card Table

Ship:	Notes:
Gotterdamurung Battleship	Mega Cannon: A = 4 (Does 3 Damage)
Siegfried Zeppelin Carriers	Broadside: A = 2
Flying Saucer Squadron	Swarm: A = 1

Nazi Fleet Notes

The Gotterdamurung can make up to 4 attacks per turn.

United Nations Fleet Unit Table

Ship Origin:	Type	Hits
USA Flagship	L	6
Chinese Warship	L	6
Russian Cruiser	L	6
Indian Warbarge	M	5
British Bomber	M	5

The Map

Use an 8x8 chessboard.

The Units

Use chits or figures or miniatures to represent units. Units can also be referred to as Ships or Squadrons.

Table Terminology

- D** Dreadnaught
- C** Carrier
- F** Flying Saucer Squadron (40 Fighters)
- L** Large Ship
- M** Medium Ship
- S** Small Ship
- Adj** Adjacent
- Dam** Damage
- Foe** Enemy Unit
- LOS** Line of Sight
- OPP** Opponent (Opposing Player)

Nazi Invasion Fleet Unit Table

Ship Type:	Type	Hits
Gotterdamurung Battleship	D	40
Siegfried Zeppelin Carriers	C	5
Flying Saucer Squadron	F	1

Ship Special Card Table

Ship:	Notes:
USA Flagship	Directed Energy Weapons: A = 2 and A = 3
Chinese Warship	Missile Salvo: A = 3 and Adjacent A = K
Russian Cruiser	Sturdy: Defense or Damage +1 to an attack it makes
Indian Warbarge	Warhead Barrage: A = 4
British Bomber	Bombing Run: M = 2 and then A = K
German Spacesub	Stealth: Defense or M = K
French Frigate	Point Defense: Defense or A = 2
Australian Gunboat	Chainguns: A = 1
Japanese Mecha	Reflex Gun: M = 1 and then A = 3
Italian Corvette	Speedy: Defense or M = 5

Un Fleet Notes

Large ships can make up to 2 attacks per turn. Small ships can make up to 2 moves per turn. In Scenarios the UN will have 1 ship of each nationality.

Setup

Each player places one unit on each square of his back two rows.

Stacking Rules

Friendly Units may stack. Ships in the same space are targeted separately. Important Note: Saucer Squads stacked with carriers are Not considered to be "onboard" during the battle.

The Cards

Players share a common deck.

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Tactical Phase
2. Move Phase
3. Fire Phase

Tactical Phase

Draw 3 cards. Max hand size = 5 cards. If the deck runs out, shuffle the discard and draw from it.

Discard excess cards.

Card List

Card Name:	#	Range	Type	Notes:
Slow	6	1	M	-
Medium	5	2	M	-
Fast	4	3	M	-
Slide	3	K	M	-
Sustained Burn	2	4	M	UN Ships Only
Infiltrate	2	K	M	Nazi Squads Only

Move Phase

Play (discard) a Move card to move one of your Units. The move card has a number. This is the number of spaces the unit moves.

Moves can be diagonal or orthogonal. "Knight" type move cards allow a unit to move like a knight in chess. Units may move through (past) other units.

Fire Phase

Play (discard) an Attack card to have a unit attack. The attack card has a number. This is the range of the attack.

Attacks can be diagonal or orthogonal. "Knight" type attack cards produce an attack with a range like a knight in chess. Every attack does a base of 1 Damage (Target loses 1 Hit).

Use Chits or coins to record damage. A unit reduced to 0 Hits is Destroyed. Your opponent may play Defense cards to negate your attack.

Units may attack through (past) other units.

Card List Notation

M Movement

A Attack

D Defense

S Special

K as a Knight would move in Chess

Type Purpose of card

Card Name:	#	Range	Type	Notes:
Plasma Weapons	4	1	A	-

Evasive Maneuver	2	-	D	-
Battle Computers	4	-	D	UN Ships Only
Heavy Armor	2	-	D	Nazi Big Ships Only
Multiple Targets	2	-	D	Nazi Squads Only
Ship Special	5	-	S	Per Unit Rules

Invasion Scenario

The Nazis have 5 Zeppelins. There are 5 Saucer Squadrons stacked with each Zeppelin. Opposite, the USA ship is in the lead.

Moon Scenario

The Nazis have just launched the Gotterdamurung. Each UN ship starts with 1 Damage.

Aftermath Scenario

The Nazis have been defeated. Each UN ship starts with 2 Damage. The UN Fleet has discovered vast amounts of Helium 3 stored at The Nazi Moon Base. They all start to attack each other in a Big free for all.

UN ships are scattered randomly around the board. On a players turn, he may control any ships and may attack any ships. A player gets 1 Victory Point for every point of Damage he inflicts.

Space Opera Campaigns

Explore the mysteries of outer space with your trusty ship and intrepid crew.

Setup

Randomly determine and record the 6 systems from the SHIP SYSTEMS TABLE, for your ship. Randomly determine and record the skills of your 6 crew mem-

bers. Your Captain has 3 skills, one from each skill table.

Your Science Officer has 2 skills, one from Command and one from Science table. Your Chief Engineer has 2 skills, one from Command and one from technical table. You have 3 Specialists each with one skill each. Roll 1d6 (1-2 Science, 3-4 Technical, 5-6 Ship Systems)

COMMAND	SKILLS TABLE	SCIENTIFIC	SKILLS TABLE
1D6	Skill	1D6	Skill
1	Integrity	1	Physical Science
2	Diplomacy	2	Medical
3	Cunning	3	Biological Science
4	Security	4	Communications
5	Combat	5	Psychology
6	Roll on Ship Systems table	6	Roll on Ship Systems table

TECHNICAL	SKILLS TABLE	SHIP	SYSTEMS	TABLE
1D6	Skill	1D6	1-4	5-6
1	Engineering	1	Ship Shields	Physical Science
2	Computers	2	Ship Weapons	Security
3	Astrogation	3	Ship Speed	Bio Science
4-5	Roll on Ship Systems Table	4	Computers	Cunning
6	Pick	5	Astrogation	Diplomacy
-		6	Pick one	Pick 1&roll again

Turn Sequence

- 1. Mission Phase
- 2. Action Phase
- a. Threat
- b. Mishap
- c. Failure

Object

Complete 10 missions in the shortest time possible.

Mission Phase

If you decide to remain at Starbase, you may replace any killed Crewmembers and repair any Ship damage Roll once on the Mission Table. Roll twice on the Aid Table, aid results increase your skills.

Mission Tables

Action Phase

a) If you decide to go on the mission, you must first encounter 1D6-3 threats. Roll on the threat table for each threat. The threats are resolved one at a time.

b) For each threat, roll twice on the Mishap table. Mishaps decrease your skills. The mission may be resolved after all threats are successfully overcome. If your crew and ship have skills and systems that match those of the threat/mission, you automatically overcome/complete it successfully.

c) If you do not have the required skills you fail the threat/mission. If you fail, roll on the Failure Result Table. If you fail, your turn ends immediately. Keep track of all successfully completed missions.

I	Requires	II	Requires
1-Deliver Vaccine	Medical	1-Evacuate Colony	Speed X2
2-Chart Star Cluster	Astrogation X2	2-Nebula Gas Samples	Physical Science
3-Strange New World	Biology & Physical Science	3-Diplomatic Mission	Diplomacy X2
4-Prisoner Transfer	Security X2	4-Mediate Dispute	Diplo & Commo
5-Peace Talks	Diplomacy & Integrity	5-Trade Negotiations	Diplo & Cunning
6-Repair Satellite	Engineering	6-First Contact	Commo X2

Drax Campaign

The final conflict to decide who will rule the galaxy, has begun!

Setup

As per the Standard game but all Ships systems come from the WARTIME SHIP SYSTEMS TABLE. In addition, the player also receives TWO additional ships that form his fleet. One Destroyer-class ship with 2

systems from the WARTIME SHIP SYSTEMS TABLE.

One Light Cruiser-class with 4 systems from the WARTIME SHIP SYSTEMS TABLE. Your Science Officer can be replaced with a Tactical Officer who has 2 skills from the Command table. You have 3 Specialists each with one skill each. Roll 1d6 (1-3 Technical, 4-6 Ship Systems) Your other two ships do not have extraordinary officers.

All three ships may combine their abilities to successfully defeat threats and accomplish missions.

Wartime Ship Systems Table

1	Ship Shields
2	Ship Weapons
3	Ship Speed
4	Combat

1	Ship Shields
5	Cunning (Flag Bridge)
6	Pick one

Object

Successfully complete your missions in order to defeat the Drax. The WAR TIMELINE tracks your victory and defeats, with each one affecting the final outcome of the war. The WAR TIMELINE begins at the center display. At the end of every mission phase, update the WAR TIMELINE.

For every completed mission, advance the WAR

TIMELINE by one. For every failed mission, lower the WAR TIMELINE by one. When a WAR TIMELINE display shows a number, the player rolls 1d6. If the result falls between the displayed numbers, the war ends with victory going to the displayed side.

DRAX	DRAX	DRAX	MINOR	MINOR	STALEMATE
(1-3)	(1-2)	(1)	LOSSES	LOSSES	-

WAR	STALEMATE	MINOR	MINOR	PLAYER	PLAYER	PLAYER
-	-	VICTORY	VICTORY	(6)	(5-6)	(4-6)

Mission Phase

If you remain at Starbase, you may replace any killed Crewmembers and repair damage to one ship, or

replace a ship lost in battle. Roll once on the WARTIME Mission Table. For each ship in the player's fleet, roll once on the WARTIME Aid Table.

Wartime Mission Tables

I	Requires	II	Requires
1-Negotiate Alliance	Diplo & Cunning	1-Rescue Prisoners	Cmbt&Cunning
2-Border Patrol	Shield & Wpns	2-Escort	Speed&Wpns
3-Distress Signal	Commo&Spd	3-Border Raid	Spd & Wpnx2

6-Starbase Assault	Wpnx3&Shldx2&Cunning	6-Piracy	Spdx2&Cmbtx2

Wartime Aid Tables

I	Skill or Ability	II	Skill or Ability
1-Mark V Torpedo	Weapons	1-Starfighter Squadron	Spdx2&Wpn
2-Tactics	Speed	2-Double Front	Shield
3-Surprise Attack	Combat&Cunning	3-Red Alert	Security&Shld
4-Turbolasers	Weapons	4-High Command	Cunning x2
5-Deflector Array	Shields x2	5-Destroyer	Shield&Wpns
6-Destroyer	Shield&Wpns	6-Marines	Cmbtx2&Cuning

Action Phase

All mission have 1d6/2 threats, use the WAR TIME THREAT TABLE Mishaps only occur on a roll of (6) for each threat. Use WARTIME FAILURE TABLE for failure verses WARTIME THREATS only.

War Time Threat Tables

1d6) 1-3 use Table I, 4-5 use Table II, 6 use Standard Threat tables

I	ENEMY	II	ENEMY
1-Drax Battlecruiser	Shlds&Wpns x2	1-Drax Battlecruiser	Shlds&Wpns x2
2-Drax Fighter Squadron	Spd x2 & Wpn	2-Space Pirates	Secty & Cmbt
3-Drax Task Force	(Shld&Wpn)x2	3-Traitor	Integrity&Psycho
4-Drax Flotilla	(Shld&Wpn&Spd)x2	4-Assassin	Secty & Cmbt
5-Drax Legion	(Cmbt & Cunning)x2	5-Rebel Saboteur	Secty&Eng
6-Drax Fleet	(Shld&Wpn&Spd)x3	6-Nemesis	Cunning&Psycho

Wartime Failure Table

If all the systems aboard a ship are lost, then the ship is considered destroyed.

1D6	Result	Effect
1-4	One Ship Damaged	1-3)Player's Ship, 4-5)Light Cruiser, 6)Destroyer loses 1d6/2 systems
5-6	Crewmember Killed	1 Random Crewmember killed

A Long Way Home

One lone Starship begins a desperate journey across the cosmos searching for a way home ...

Setup

As per the Standard game: 1 ship with 6 systems, a Captain, a Science Officer, a Chief Engineer, and 3 Specialist.

Object

To successfully return HOME. For each successfully completed mission, you gain 1 Journey Point. For every 6 Journey Points you accumulate, you may roll on the JOURNEYS END TABLE, with a +1 bonus every additional 6 Journey points. The cost to roll and the bonus received is subtracted from your accumulated total.

Journeys End Table

2.	Catastrophe!! (roll twice one the Threat Table, failure results in loss of ALL Journey Points)
3.	Lone wolf (next TWO missions get no AID)
4.	Darkest days (roll once on Threat table, failure results in -1 Journey Point)

2. Catastrophe!! (roll twice one the Threat Table, failure results in loss of ALL Journey Points)
5. Too much for some (one random crew member out of action until revived)
6. Dangerous ground (next mission has 1d6-1 Threats)
7. Your Journey continues ...
8. Never give up, never surrender (next crewmember to be revived gets +2 roll)
9. Clear sailing (next mission has no Threats)
10. A Friend in need (roll once on the Aid table, permanently add to your ship's abilities)
11. A New Hope (roll once on Threat Table, success means +1 Journey Point, roll again on this table)
12. All Good Things. . . (roll once on Threat Table, success means you've made it HOME!!)

Mission Phase

Because you are far from home, your ship's systems can not automatically be repaired. And new crew members must be drawn from the members of the crew. For each ship system you try to repair roll 5+, add +1 for each Engineer skill and +1 for the matching skill (ie. Weapons skill to repair Ship's Weapon ability) Crew members may be revived on a one-time roll of 6, add +1 for each Medical, Computer, or BioSci skill. Replacement crewmen come from your 3 Specialist, pick the one your promoting and have them role once on the appropriate crew skill table (ie. Science table if replacing the Science Officer).

A replacement Captain comes from either your Science Officer or Chief Engineer with an additional role on the Command table. Surviving crew members earn new skills after each successful mission on a roll of 6. A new skill may come from ANY crew skill table. Attempted repair and crew replacement does not penalize the player with a missed turn.

Roll once on the JOURNEY MISSION Table. Roll twice on the AID Table.

Action Phase

No change from the Standard game.

Journey Mission Tables

I	Requires	II	Requires
1-Restock supply	Medical	1-Evacuate Colony	Speed X2

6	Lost in the Dark	Lose 1 Journey Point

A Campaign Of Terror

A Horror from beyond the Galaxy threatens to devour all Life!!

Setup

No change from the Standard Game.

Object

To defeat the Alien Horror threatening the Human Colonies before they fall to the invaders. But to defeat the Alien's, you must first develop the means to defeat

them. For every successful mission you get 1d6 Victory Points, add the total to your running tally. Once your score reaches 30, you've found the key to defeating the Alien terror and victory is yours!!

Mission Phase

No change to Standard Game except that the longer the Alien terror has to expand its reach into our galaxy, the greater its threat and the fewer resources are available to help you. The following chart shows the AID rolls and THREAT rolls for missions during the current turn.

TURN	AID	THREAT (Terror wins)
1	2 rolls	1d6-3
3	2 rolls on 2-6	1d6-2
6	2 rolls on 3-6	1d6-1
9	2 rolls on 4-6	1d6

TURN	AID	THREAT (Terror wins)
12	2 rolls on 5-6	1d6
15	2 rolls on 6	1d6 (1)
18	1 roll on 6	1d6 (1-2)

6-Planetary Infestation	Biology & Security	6-Crew Parasite	Integrity&Psycho

Space Program

Introduction

Card game for 2+ players. Each player represents a National Space Program. Players acquire technologies, perform Missions, and develop Space Industries.

Victory

The player with the most Prestige Points (PP) at the end of the game wins. The game ends when players have gone through the deck twice.

Turns

Each turn represents a Decade.

The Deck

Players share a common deck. There are 8 card Types:

Type:	PP
D	0
L	1
M	2
N	3

- D** Disasters (Catastrophic failures that setback space programs)
- L** Lift Capability (Escape Earth Orbit)
- N** Near Earth (Space Stations & Bases close to the Earth and Moon)
- M** Missions (Requiring only Lift Capability to pursue)
- Z** Zero-G Industries (Industries that can take place in Near Earth Space)
- S** Stellar Transport (Technologies used to travel to other Planets)
- P** Projects (Missions requiring Stellar Transport)
- I** Industry (Mining Operations requiring Stellar Transport)

Prestige Points

Each time you put a card into play, you get a number of Prestige Points (PP) According to the type of card:

Type:	PP
Z	4
S	5
P	6
I	7

Card Limits

- D** There is no limit to the number of Disasters you can get stuck with.
- L** Basic Technologies upon which all Space programs depend
- M** You cannot play more Mission cards in a turn than you have Lift cards
- N** You cannot have more Near Earth cards in play than you have Lift cards
- Z** You cannot have more Zero-G cards in play than you have Near Earth cards
- S** You cannot have more Stellar cards in play than you have Near Earth cards
- P** You cannot have more Project cards in play than you have Stellar cards
- I** You cannot have more Industry cards in play than you have Stellar cards

Logistics Phase

Take X cards from the top of the deck and place them face up on the table.

- X** 2 x Number of Players.
- The cards are called Bid cards at this stage. Going clockwise, Players take turns picking one Bid card and putting it into their hand. The player with the fewest PP picks first. (or random player if PP totals are tied) Continue until all cards are picked.

Implementation Phase

Each player may put up to 2 cards into play. If you were forced to take a Disaster card, you may not put any cards into play this turn. You cannot put into play more than one card of a single type.

(For example: Only one Lift card not two) Cards you put into play are placed face up in front of you.

Prestige Phase

Keep a running total of the PP value of all cards you have in play.

Maintenance Phase

Max hand size is 5 cards. Discard excess cards.

Turn Sequence

Each turn has 4 Phases:

- Logistics Phase
- Implementation Phase
- Prestige Phase
- Maintenance Phase

Common Deck Card List

Type	#	Card Name
L	4	Multi-Stage Rockets
L	4	Space Shuttles
L	4	Space Planes (Scramjets, etc.)
L	2	Space Elevator
M	2	Unmanned Deep Space Probes
M	2	Space Telescope
M	2	Atmospheric Penetrator Probes
M	2	Orbital Probes
M	2	Manned Space Expeditions
N	2	LEO Station (Low Earth Orbit)
N	4	GEO Station (Geosynchronous Orbit)
N	1	L-4 Space City (Lagrange Point)
N	1	L-5 Space City (Lagrange Point)
N	2	Moon Base (Lunar Colony)
Z	1	Zero-G Manufacturing
Z	1	Zero-G Materials Research
Z	1	Giant Space Solar Panels
Z	1	Zero-G Pharmaceuticals
Z	1	Zero-G Tourism
S	2	Ion Engine
S	2	Sling Shot Effect
S	2	Solar Sail
S	2	Ramscoop
S	2	Nuclear Powered Spacecraft
P	1	Generation Ship
P	1	Inner Planet Bases (Mercury, Venus)
P	1	Alpha Centauri Probe
P	1	Mars Terraforming Project
P	1	Outer Planet Outposts (Uranus, Neptune, Pluto)
I	1	Moon Mining
I	1	Asteroid Belt Mining
I	1	Jupiter Atmospheric Extractor
I	1	Saturn Ring Mining
I	1	Mars Mining
D	1	Malfunction
D	1	Fuel Leak
D	1	Explosion
D	1	Equipment Failure
D	1	Meteorite Impact

Space Scouts

Introduction

Card and Bookkeeping game. Explore the mysteries of outer space with your trusty ship and intrepid crew.

The Cards

Players draw from a common deck that includes: Mission, Threat, Mishap, and Aid cards.

Setup

Randomly determine and record the 6 systems on your ship. Randomly determine and record the skills of your 6 crew members. Your captain has 3 skills. You have two officers with 2 skills each, and 3 crew with 1 skill each. When determining crew skills, you may roll on any of the 3 Skill determination Tables.

Turn Sequence

- Players take turns. Each turn has 3 phases:
1. Draw Phase
 2. Action Phase
 3. End Phase

Object

Have the most mission and threat cards in your Completion Pile by the end of the game.

Draw Phase

Draw one card from the deck. The game ends when a player goes to draw a card and there are none left.

Action Phase

You may decide whether to go on a mission or return to Starbase. If you return to Starbase you may replace any killed Crewmembers and repair any Ship damage. If you go on a mission, play a mission card onto the table face up.

Your opponent may play a Threat card from his hand. If your crew and ship have skills and systems that match those on the threat card, you have overcome the threat successfully. Place threats you have overcome in a separate Completion pile.

You may also play Aid cards to give your crew and ship extra skills. Your opponents may play Mishap cards to cause your crew and ship to lose skills. Aid and mishap cards effect only the current threat or mission.

Discard Aid and mishap cards as soon as they have been played. If you do not have the required skills you fail the threat. If you fail the threat, discard the threat card and the mission card and roll once on the Threat Failure Result Table.

Your opponents may keep playing threats until they run out or you fail one. You may play threats on yourself. If you overcome all the threats you may try the mission.

If you have the required skills, you complete the mission and get to keep the mission card. Keep your completed mission cards in your Completion pile. If you fail the mission discard it. You do not have to roll on the failure table.

End Phase

Discard cards in excess of 10 cards from your hand. Scan cards may be played in this phase.

Crew Member Command Skill Determination Table 1

Card Name	Skill Lost:
Malfunction	Engineering
Mathematical Error	Astrogation
Unknown to Science	Physical Science
Medical Error	Medical
Xenophobia	Communication
Alien Power Drain	Ship Shields

Solo-play Rules

Only keep Aid cards in your hand. You must face missions and threats as you draw them. You may only go to Starbase in End phase after you have failed a mission.

Mishap cards apply to the next drawn mission or

threat, then discard the Mishap.

Optional Rule - Experience

After completing a mission roll 1D6. On a roll of 1-2 one random crewmember gains one random skill.

Game Designers Notes

You may want to name and draw pictures of your ship & crew members before play starts.

Alternate Rules For Space Scouts

7 set Missions with threats. An action deck with only Aid & Mishap cards.

Decks

There are 3 decks: Mission Deck: Mission cards only Threat Deck: Threat cards only Action Deck: Aid & Mishap cards

Setup

Each player works up a ship & crew as normal. Draw 7 Mission cards. Place them face up on the table.

For each mission draw 2 threat cards & place them face up on top of the mission. The Mission & Threat Decks are not used for the rest of the game. Start with no cards in your hand.

Object

The game is over when all 7 missions have been completed. The player with the highest Victory Total at the end wins the game. Missions in your Completion Pile are worth 2 VP.

Threats in your Completion Pile are worth 1 VP.

Draw Phase

Draw one card from the Action Deck.

Action Phase

You may decide whether to go on a mission or return to Starbase. If you return to Starbase you may replace one killed Crewmember or repair all Ship damage. If you go on a mission, target any one of the missions on the table.

You must first overcome any Threat cards on the Mission, the topmost first. If your crew and ship have skills and systems that match those on the threat card, you overcome the threat successfully. Place threats you have overcome in a separate Completion pile.

You may also play Aid cards to give your crew and ship extra skills. Your opponents may play Mishap cards to cause your crew and ship to lose skills. Aid and mishap cards effect only the current threat or mission.

Discard Aid and mishap cards as soon as they have been played. If you do not have the required skills you fail the threat. The failed threat card remains on top of the mission. If you fail the threat, roll once on the Threat Failure Result Table.

If you have overcome the threat you may stop, or try the next threat. If you overcome all the threats you may try the mission. If you have the required skills,

you complete the mission and get to keep the mission card.

Keep your completed mission cards in your Completion pile. If you fail the mission roll on the Failure table. The failed mission remains in play.

A player may attempt only one mission per turn.

End Phase

Discard cards in excess of 10 cards from your hand. Scan cards may be played in this phase.

Non-card Version Of Space Scouts

Introduction

Dice and Bookkeeping game. Explore the mysteries of outer space with your trusty ship and intrepid crew.

Setup

Six and 10 sided dice are required. Randomly determine and record the 6 systems on your ship. Randomly determine and record the skills of your 6 crew members.

Your captain has 3 skills. You have two officers with 2 skills each, and 3 specialists with 1 skill each. When determining crew skills, you may roll on any of the 3 Skill determination Tables.

Turn Sequence

Players take turns. Each turn has 2 phases:

1. Mission Phase
2. Action Phase

Object

Be the first to complete 10 missions.

Mission Phase

Roll once on the Mission Table.

Action Phase

You may decide whether to go on the mission or return to Starbase. If you return to Starbase you may replace any killed Crewmembers and repair any Ship damage. If you decide to go on the mission, you must first encounter 1D6-3 threats. Roll on the threat table for each threat.

The threats are resolved one at a time. The mission may be resolved after all threats are successfully overcome. For each threat/mission roll twice on the Aid table and twice on the Mishap table.

Aid results increase your skills. Mishaps decrease your skills. If your crew and ship have skills and systems that match those of the threat/mission, you automatically overcome/complete it successfully. If you do not have the required skills you fail the threat/mission.

If you fail, roll on the Encounter Failure Result Table. If you fail, your turn ends immediately. Keep track of all successfully completed missions.

Crew Member Command Skill Determination Table 1

1D6	Skill	1D6	Skill
1	Integrity	4	Security

Card Set Available

Thanks Zak for another great card set!

Space Station Alpha

Introduction

Bidding & Placement Game. Each player represents a space agency: NASA, European Union, Russia, Japan, etc. Players are working together to build the ISS (International Space Station).

Players add Modules and score points.

Objective

The game ends at the end of the turn when all 60 modules have been placed. The player with the most victory points at the end of the game wins.

The Board

Use a Chessboard. The center 4 spaces of the board represent the Core Command & Control Module. The Core Module is a self supporting active vehicle with the following capabilities: Propulsive control, Piloting station, Main Engine, Gyrostabilizers, Fuel storage, Assembly area, Operational quarters, Multiple module docking ports, Life support Monitoring systems, Environmental controls (Energy, Electrical, Temperature, Atmosphere)

Player Markers

Each player has a set of 40 blank counters (markers) of a unique color

Module Counters

Players share a Build pile (cup) of 60 cardboard counters representing Space Station Modules. The Build pile contains 4 of each of the 15 types of modules in the list.

The Event Deck

Players share a common deck.

Setup

Each player starts with a hand of 6 randomly dealt cards.

Turn Sequence

Each turn is divided into 5 phases: Planning Phase Bidding Phase Deployment Phase Scoring Phase Event Phase

Planing Phase

Take X random Module counters out of the pile and place them to the side of the board face up.

X number of players.

If there are modules remaining from previous turns, only enough New Modules are drawn to have X Modules up for bidding.

Bidding Phase

Players bid on the Module counters using Funding Cards from the event deck. Bids are made secretly, and then simultaneously revealed. Note the funding cards have different values.

In case of ties, players cut the deck, the highest funding value revealed wins. If you lose a bid put your funding card(s) for that bid back in your hand. If a Module receives no bids, it remains to be bid on next turn.

The winner of a Bid (highest bid) gets to deploy that module next phase.

Deployment Phase

Place the modules you won last phase into play (0, 1 or more modules). A module can be placed on any space on the board adjacent to another module (or Core). Place a marker (of your color) next to the module to show your ownership of the module.

Maximum of one Module per space. The player who bid the most Funding last turn deploys first, followed by the next most, and so on.

Scoring Phase

Gain one VP (Victory Point) for every Module you place. If you place 4 or more of your own modules in a row (orthogonal or diagonal), gain 3 VP. Gain 1 additional VP for each of your Modules in a row in excess of 4 modules.

Play event cards that allow for additional special scoring. Owners of Truss Exterior Frameworks gain 1 VP every time a module is built (O or D) adjacent to it. Owners of External Stowage Platforms gain 1 VP every time a problem is played.

Event Phase

Each player draws 3 cards from the Event Deck. Max hand size = 10 cards. Discard excess cards. If the deck runs out, shuffle the discard and draw from it.

End Of Game Scoring

Earn extra VP at the end of the game: The player with the most modules a single type gets 1 VP (check

for all 15 types) The player with the most Research modules gets 5 VP. The player with the most Service modules gets 5 VP. The player with the most Modules gets 3 VP.

Module Counter List

Module:	Type	Notes
Multi-Purpose Logistics	S	Reusable Cargo Module; Carried by Shuttle
External Stowage Platform	S	Trash, Food, Water, Oxygen, Fuel, Equipment
Living Quarters	S	Crew Compartments, Galley, Hygiene, Exercise
Truss Exterior Framework	S	Structural Component
Unity Node	S	Pressurized Mating Adaptor, Control Moment Gyros
Photovoltaic Module	S	Solar Panel Array plus Batteries, Radiators
Air Lock	S	EVA Capability
Remote Manipulator System	S	Cargo Crane plus Robotics, Moveable Truss
Docking Platform	S	Universal, Emergency Crew Return Vehicle
Communications	S	Radio Antennae, Computers, Telemetry
Astrophysics	R	Observatory, Spectrophotometers, Radio Telescopes
Bioastronautics	R	Biochemistry, Hydroponics, Medical Monitoring
Engineering	R	Materials Technology, Electronics, Physical Sciences
Earth Observation	R	Meteorological, Oceanographic Research
SPACEHAB	R	Habitable Experimental System Rack Storage

Space Swarm

Introduction

2-4+ player board & card wargame. Each player controls an Advanced Spacefaring Alien Civilization

Victory

There are 2 ways to Win:

1. Control all the Star Cluster spaces in play
2. Occupy the most spaces when the deck runs out.

The Board

Use a Hex grid. Each Hex (space) has a terrain type. Randomly distribute the following terrain types (roll 1D20):

#	Result
1	Alien Ruins - First visitor here gets to draw 1 card
2	Star Cluster - A Race occupying this space gets Production +1
3	Nebula - Stacks in this space get Defense +1
4	Super Nova - Stacks may not enter or move through this space
5	Black Hole - A stack entering this space must stop
6	Dark Matter - Enemy Stacks in this space may be passed through
7	Quasar - Any Stack that ends its turn here has 1 Fleet destroyed
8	Worm Hole - Any Stack in this space may move to any other Wormhole
9	Asteroid Field - Stacks in this space get Attack +1
10+	Deep Space - No effects

Auto Map Generator Available!!!

Thanks Peter!!

Pieces

Each player starts with a set of counters of a unique color or design. The counters are called Fleets. A stack of Fleets in a space is called a "Stack" or "Armada".

When referring to all your Fleets use the term "Race".

Attributes

Your Race has the following six basic attributes (traits): Initiative, Attack, Defense, Movement, Production, Strategy

- Each Race has a base Attack value = 1
- Each Race has a base Defense value = 1
- Each Race has a base Movement value = 1
- Your Race has a base Production level = 1
- Your Race has a base Strategic level = 1
- Your Race has a base Initiative level = 1

The Attack value is how much damage a Fleet can inflict in attack phase. The Defense value is how much damage a Fleet can take before being destroyed. The Movement value determines how many spaces a Fleet (or stack) may move.

The Production Level is the number of new Fleets you get each turn. The Strategic Level is how many stacks or partial stacks you may move per turn. The

Initiative level determines which stack attacks first in Attack Phase.

As you gain cards, the values of your attributes will increase. Certain terrain types will give attribute bonuses to your Race or occupying stacks.

The Deck

Players share a common deck. There are 2 Types of cards: Technology cards and Event cards. Technology cards are played in Research Phase only and stay in play.

Event cards are played in other Phases and are discarded when played. The bonuses/effects of Event cards last only the current Phase. The deck contains one of each card described in the card list.

Setup

Each player starts with three Fleet counters on one Cluster space. Players should start in opposite corners (or as far apart as possible). Each player draws 2 cards.

If a player has no Technology cards in his draw it is a Mulligan: He reveals the cards, discards them and draws 2 new cards.

Turn Sequence

Players take turns. A round is when all players have had a turn. Turn order is determined at the

beginning of a round in the Round Bid.

Each player's turn has 5 phases:

1. Development Phase
2. Production Phase
3. Move Phase
4. Attack Phase
5. Research Phase

Round Bid

In the first round, a random player goes first followed by the other players going clockwise around the table. In later rounds the player with the highest Initiative picks his place in the turn order of the round. For example: If there are 4 players, the high Init can pick to take his turn either first, second, third, or fourth in the Round and this cannot be overturned by another player later in the Round Bid.

This is followed by the player with the next highest initiative and so on. If Initiative is tied the race with the highest Strategic Level picks next. If Strategic Level is tied the highest Movement rating picks next.

If Movements are tied go in clockwise order. Record current Turn Order so no one forgets.

Development Phase

Place one Technology card from your hand face up on the table in front of you. Your race immediately gets the ability or attribute bonus indicated on the card you just played. These Technology cards remain in play permanently.

Max hand size is 2+ your Strategic score. Discard excess cards.

Production Phase

Gain a number of new Fleet counters equal to your Production attribute. Place the new Fleets on top of your existing stacks.

Move Phase

You may move up to a number of stacks equal to your Races Strategic level. This includes partial stacks if you are breaking up a larger stack. A stack may be moved up to a number of spaces equal to your Races Move trait.

Common Deck Card List

Card:	#	Type:
Attack +1	7	T
Defense +1	7	T
Movement +1	7	T
Strategic +1	7	T
Production +1	7	T
Initiative +1	7	T

You may move your stacks into (but not through) spaces occupied by enemy stacks. 2 or more of your stacks in the same space at the end of the phase will automatically combine to form 1 stack. As a Stack Moves, it may pick up or drop off Fleet counters (same player's) in the spaces it moves into/through.

On a turn, a given Fleet counter may not move a total number of spaces greater than that controlling player's move trait.

Attack Phase

If two or more opposing stacks occupy the same space, they will fight. The Stack with the highest Initiative Attacks first. Attacks by Stacks with the same Initiative are simultaneous.

If there is more than one opposing stack present choose one to target. Each stack inflicts damage = The Races Attack Value x The number of Fleets in the Stack. A Fleet can take as much damage as its Defense value before being killed.

Excess damage not enough to kill a Fleet is ignored. The phase may end with stacks from more than 1 player occupying the same space.

Example Of Combat

Joe's Race has a total Attack = 1 and Defense = 1
 Ron's Race has a total Attack = 1 and Defense = 2
 Ron has a stack of 3 Fleets & Joe has a stack of 5 Fleets in the same space. Ron inflicts 3 damage, so 3 of Joe's Fleets are killed. Joe inflicts 5 damage, so 2 of Ron's Fleets are killed.

(Each of Ron's Fleets can take 2 damage: it would take 6 damage to kill all 3)

Research Phase

Draw 2 cards from the deck and put them in your hand. If no cards remain, the game ends.

Using Technology Cards As Event Cards

You may at any time during your turn or another players turn discard an Technology card from your hand to give your Race the indicated Bonus/Ability for the remainder of the current turn (or Bid).

Card:	#	Type:
Attack +2	2	E
Defense +2	2	E
Movement +2	2	E
Strategic +2	2	E
Production +2	2	E
Initiative +2	2	E

Space Warriors

Introduction

Basic Science Fiction Tactical Skirmish Combat game for 2+ players.

Victory

Vaporize your enemies into small piles of plastic and pewter.

Warriors

Use plastic warriors from Kid’s toy-sets. Ruleset appropriate for Aliens, Science-Fantasy, and Space Opera. Warriors are also referred to as Units.

The Board

Large Hexes. Big enough for vehicles and oversize units. Max one Unit per space.

Dice

Six and ten sided dice are needed.

Cards

Use Cards from Candyland: 6 Colors: Equal numbers of. . . Red, Orange, Yellow, Green, Blue, and Purple. If the deck ever runs out, shuffle the discard and draw from it.

Card Actions

Card Color	Action
Red	Move 1 Space
Orange	Move 1 or 2 Spaces
Yellow	HTH Attack into Adjacent Space (Range = 1) and Hit on 1-2
Green	Defend against an attack on 1-3
Blue	First Special
Purple	Second Special

Movement

Use Red and Orange Cards. Facing does not matter. You can Move through (past) other friendly Units.

Flying

Flying units can fly over and attack over any ground unit.

Stacking

Generally, it is 1 unit per space. You can have more, but only as many figurines as will reasonably fit in the

Action Tokens

Use glass stones or pebbles. These are used to keep track of which units have had their turn.

Damage Tokens

Use Poker Chips. This keeps track of how much Damage the unit has taken.

Setup

Place Warriors onto the map according to the scenario.

Turn Sequence

Place an Action Token next to each unit. Players roll high on 1D6 to see who goes first. Players take turns activating one unit at a time.

When you activate one of your Units, remove its Action Token. Then draw 2 Cards for the current Unit. Use these cards to have the Unit Move and Attack.

Note: A Unit may make multiple Moves and Attacks per turn. Discard cards when used or if they are un-useable. Continue to the next unit until no units have any Action Tokens.

space. Sweep, Grenade, and Bomb attacks will effect all units in a space.

Attacking

Use Yellow Cards. When you attack roll 1D6 to see if you hit If you roll a 1, 2, or 3, you hit and the target Unit takes 1 Damage. You cannot attack through other units.

Defending

When a Unit is hit, it may immediately draw 1 card to try to defend. If it is a Green card, roll 1D6. On a roll of 1, 2, or 3, the attack is negated and no Damage is taken.

This represents a Dodge.

Passive Abilities And Traits

> Slow: Slow Units can move a maximum of 1 space per turn. The unit is also less able to dodge so only defends on a roll of 1-2 using a Green card.

> Skilled: Whenever this unit draws cards it gets to

draw 1 extra card. Numerous: Armies with this trait get 50% more credits to spend.

> Drain: Whenever this unit kills an adjacent enemy unit, they Immediately get to take an extra turn.

> Double: This ability costs 2 credits.

> Half: This ability costs 0.5 Credits.

> Pilot: Sometimes required to operate Vehicles.

The Random Trait

If a Unit has the random trait, roll once on the Random Trait table (before the battle) to see what ability they have.

Random Trait Table

1D10	Trait
1	HTH Specialist
2	Armor
3	Tough
4	Small Arms Specialist
5	Skilled

1D10	Trait
6	Psionic
7	Stealth
8	Balanced Fighter
9	Flyer
0	Heavy Weapon Specialist

Special Cards

Depending on the identity of the Unit and its Equipment layout Special cards will have a variety of Effects including Attacks, Defenses, Movement, and More.

Damage

Most Units have only 1 Hit, that is, 1 point of Damage is enough to destroy them. Important Heroes and Large Units will have extra Hits.

Unit Type X Special Card List Notation

>Attack 1 (1-4) = Attack of Range = 1 and Hits on roll of 1, 2, 3, or 4

>Indirect 2 (1-3) = Attack of Range = 2 and Hits on roll of 1, 2, or 3 Indirect Attacks can be made over other Units in the way Note: All Grenade Attacks are Indirect.

>Bomb = Units adjacent to the target will be hit on a roll of 1-2 on 1D6

>Defend (1-2) = Negate an Attack on a roll of 1 or 2

>Parry (1-3) = Negate an HTH Attack on a roll of 1,2, or 3.

>Move 3 = Unit can move 1, 2, or 3 spaces

>Stun 1 (1-4) = An Attack of range 1 that does no damage. If unit is Hit on a roll of 1, 2, 3, or 4 it loses its Action Token and does not get Another Action Token next turn. Stunned Flying units will crash (They will suffer 1 hit on a roll of 1-4 on 1D6)

>Vaporize 1 (1-3) = Attack of Range 1 and Hits on roll of 1, 2, or 3. A Vaporizing Attack cannot be defended against with Armor or Toughness.

>Push 3 (1-4) = Range 1 and Hits on roll of 1, 2, 3, or 4. A Pushed unit must move backwards 1 space into an empty space. If it cannot, it suffers 1 Hit.

>Sweep 1 (1-3) = 2 Attacks of Range 1 against 2 enemy units that are adjacent To both this Warrior and each other. Attacks hit on a roll of 1, 2, or 3.

>Inspire 3 (1-4) = Target Friendly Unit up to 3 spaces away is inspired on a Roll of 1, 2, 3, or 4. An Inspired Unit draws 1 extra card on its turn. A Unit can be Inspired a max of once per turn.

>Rally 3 (1-3) = Target Friendly Unit up to 3 spaces away is Rallied on a Roll of 1, 2, or 3. A Rallied Unit draws 1 extra Action Token on its turn. A Unit can be Inspired a max of once per turn.

>Restore (1-3) = Return a killed unit back to life. Unit must have been killed this or Last turn. Healer must be adjacent to empty space where unit was killed. Or can be used to regain 1 lost hit on a unit with multiple hits.

>Repair (1-3) = Like restore but for Robots, Androids, and Vehicles.

>Flying 3 = Unit can move 1, 2, or 3 spaces. It can move over other Units.

>Trap 1 (1-3) = Attack of Range = 1 that hits on a roll of 1, 2, or 3. A Trapped Unit takes no Damage, but must use its next turn to try to escape on a roll of 1-4 on 1D6. If it fails, it must try again the following turn.

Unit Type X Special Card Activation List

Unit Type:	Blue Card:	Purple Card:	Notes:
Fast	Move 3	Move 4	
Frag Grenade	None	Attack 2 (1-3)	Bomb
Stun Grenade	None	Stun 2 (1-5)	Half
Plasma Grenade	None	Vaporize 2(1-4)	
Martial Arts	Parry (1-4)	Attack 1 (1-3)	HTH
Crushing Attack	Attack 1 (1-3)	Attack 1 (1-3)	HTH
Vibro Knife	Attack 1 (1-2)	Attack 1 (1-4)	HTH
Neuro Knuckles	Stun 1 (1-5)	None	HTH
Chain Sword	Attack 1 (1-4)	Parry (1-3)	HTH
Plasma Sword	Attack 1 (1-4)	Vaporize 1(1-3)	HTH Double
Electro Whip	Stun 1 (1-4)	Attack 1 (1-2)	HTH
Nano Filament	Vaporize 1(1-5) None	HTH	
Space Mace	Stun 1 (1-3)	Stun 1 (1-4)	HTH Half
Power Glove	Stun 1 (1-3)	Attack 1 (1-3)	HTH
Vibro Axe	Sweep 1 (1-3)	None	HTH

Force Rifle	Push 2 (1-3)	Push 3 (1-2)	
Sonic Rifle	Stun 2 (1-3)	Stun 3 (1-2)	Half
Web Rifle	Trap 2 (1-3)	Trap 3 (1-2)	
Sniper Rifle	None	Attack 5 (1-5)	
Laser Bazooka	None	Attack 6 (1-4)	Heavy
Auto Cannon	Attack 3 (1-4)	Attack 4 (1-3)	Heavy
Missile Launcher	None	Indirect 5(1-3)	Heavy Bomb
Plasma Projector	None	Sweep 3 (1-3)	Heavy
Disintegrator Ray	None	Vaporize 4(1-4)	Heavy
Force Beam	None	Push 3 (1-5)	Heavy
Stasis Beam	None	Stun 5 (1-5)	Heavy
Armor	Defend (1-4)	None	
Power Armor	Move 2	Defend (1-3)	
Tough	Defend (1-2)	Defend (1-2)	
Force Field	Defend (1-3)	Defend (1-4)	Double
Wings or Flyer	Flying 3	Flying 4	
Arrest or Tentacles	None	Trap 1 (1-4)	
Small	Move 1	Defend (1-3)	
Stealth	Defend (1-3)	Attack 1 (1-4)	
Cloaking	Defend (1-5)	Attack 1 (1-4)	Double
Leader	Inspire 3 (1-4)	Rally 3 (1-3)	Double

Unit Type:	Blue Card:	Purple Card:	Notes:
Medic or Heal	None	Restore (1-3)	Double
Mechanic	Repair (1-3)	None	
Regenerate	Defend (1-3)	Regain 1 Lost Hit	
Charm	Stun 2 (1-3)	Trap 2 (1-2)	
Psionic	Blue Psi Power	Purple Psi Power	Double

Unit Notes

A Unit can have multiple Abilities. For Example A Single Unit might have a Chainsword, Flying, and Armor, so A special Card (Blue or Purple) could be used by it for any of those effects.

Heavy Weapon Penalty

A unit equipped with a Heavy Weapon also gets the slow trait. This can be mitigated by paying 1 credit to remove the penalty.

Pistols

Any weapon listed as a Rifle may be taken as a pistol instead. Pistols cost half the price of a Rifle. Treat a pistol like a rifle except that it cannot use purple cards.

Treat Shoulder mounted turrets like pistols.

Psionic Power List

Power:	Cards	Notes
Psionic Blast	B/R	Attack 3 (1-4)
Paralyze	B/O	Stun 2 (1-5)
Mind Control	B/Y	Control 2 (1-3) target unit for 1D6 turns
Madness	B/G	Trap 3 (1-4)
Telekinesis	B/B	Push 2 (1-4)
Levitation	B/P	Self or Adj Target: Move 4
Cause Panic	P/R	Push 1 (1-5)
Fields of Force	P/O	Self or Adj Units gets Force Field for 3 Turns
Misdirection	P/Y	Target Foe 3 (1-5): Move 3
Sonic Scream	P/G	Stun (1-4) Affects all units within 2 Spaces
Psychic Heal	P/B	Restore (1-3)
Psychic Storm	P/P	Attack 4 (1-3) Adj units stunned (1-3)

Army Types

There is a great variety of troop types in the far reaches of Space.

Space Pirates

Irregular Forces. Heavily Armed and Ready for a Fight. Arrrrgh! All units get HTH Specialist and Small Arms Specialist.

Robots

Heavy Hitters with a Heavy Chassis. All units get Armor and Heavy Weapon Specialist.

Free Weapon Abilities

> HTH Specialist: Unit is equipped with a HTH hand weapon for free. ALSO when attacking with a Yellow Card unit hits on 1-4.

> Balanced Warrior: Unit is trained and equipped for close range combat. Unit gets a free HTH weapon and a free Pistol and all attacks with a Pistol hit with a Purple Card on a roll of 1-3.

> Small Arms Specialist: Unit comes with a Rifle for free and all attacks with a rifle get -1 to the roll to hit.

> Heavy Weapon Specialist: Unit gets a free Heavy Weapon and all attacks with a Heavy Weapon get -1 to the roll to hit.

Psionic Powers

For a Unit to use a psi power, it must first play a Blue or Purple card, then It must play a second card. The combination of the 2 cards will Determine what power is activated.

Androids

More Sophisticated than Robots but still with a hard shell. All units get Power Armor and are Skilled.

Space Marines

Known for their Power Armor, but otherwise they're a mixed bag of specialists. All units get Power Armor and Random. If you get Armor on Random, pick the result you want.

Space Orcs

A common menace of the space lanes. All units get Random and are Balanced Fighters. If they get Balanced Fighter twice on Random reroll the result.

Space Elves

Effete but not afraid to mix it up. All units are Skilled and are Balanced Fighters.

Space Dwarves

Short humans that have evolved to live on Heavy gravity worlds All units get Armor and Tough.

Mini Men

Diminutive humans engineered for life on resource poor colonies. All units get Small and Stealth.

Greys

Cryptic aliens with more Brains than Brawn. All units get Psionic and are Small Arms Specialists.

Little Green Men

Small but still in the Conquering business. They are Small and Numerous.

Hawkmen

These guys love to go into battle with their shirts off. They have Wings and are Balanced Fighters.

Ameoboids

Not big on personality, individual Blobs will have random abilities. All units get Random and Drain.

Predators

Badass Alien Hunters who like to go mono-e-mono. All units get HTH Specialist and Stealth.

Mutants

They opened up the genetic can of worms with these guys. All units get 2 rolls on the random table. Treat duplicate Random rolls as a result of Fast.

Psychics

An 'awakened' population. Usually they just want to be left alone. All units get Psionic and Stealth.

Cyborgs

Half Man, Half Machine. All Kickass. All units get Tough and Random. If you get Tough twice on Random Table treat result as Crushing Attack.

Space Rangers

Exploring the frontiers of space and loving every minute of it. All units get Tough and Small Arms Specialist.

Astro Guards

Space Cops. Call for Backup! All units get Tough and Arrest.

Exo-exterminators

Defending the homeworlds from all manner of Alien scum. All units get Small Arms Specialist and Balanced Fighter.

Space Mercs

Corporate and freelance mercenaries. Hired Guns. All units get Small Arms Specialist and Skilled.

Space Bugs

Hive Minds. Alien Infestations. Usually the correct choice is Orbital Nukes. They are Fast and have Crushing Attack.

Cat People

when you hear the purring its too late. All units get Stealth and are Skilled.

Dog Men

This type of crossbreeding afforded immunity to a particularly bad alien plague. All units get Tough and Fast.

Space Vixens

Like Supernova hot. Va-Va-Voom! All units get Charm and Balanced Fighter.

Bounty Hunters

A fearsome cast of highly armed and highly motivated Cretans. All units get Tough and Skilled.

Clone Soldiers

What Space Empires are built on. They are numerous and are Small Arms Specialists.

Big Brains

Eggheads. Occasionally floating in jars and with robotic appendages. Self-important. All Units get Psionic and Random. If you get Psionic twice, That's 2 Brains! Treat result as Skilled.

Space Zombies

Hard to Kill even in Space. All units get 2 Hits and Regeneration.

Lizard Men

They still made it to space even with their pea sized brains. All units get Tough and are HTH Specialists.

Transhumans

Suffer from Major Superiority Complexes. Other humans are just jealous. All units get Skilled and 2 Hits.

Psychic Vampires

It's hard to suck blood through a space suit. All units have Psionic and Drain.

Space Troopers

For Empires who can't afford clones. All units have Armor and are Small Arms Specialists.

Space Rebels

All those Space Troopers have to be fighting somebody. All units have Stealth and are Small Arms Specialists.

Psi Knights

Veterans of the Psychic Wars. All units get Psionic and Skilled.

Space Colonists

A rag-tag, riff-raff band of homesteaders defending their acre of dirt. These independent militia units are Numerous and Random.

Space Miners

Asteroid Mines, Volcano Worlds. Radioactive Zones. Dangerous Work. All units are tough and are Heavy Weapons Specialists (Modified Mining Equipment).

Space Simians

Planets of the Apes. These big guys get 2 Hits and Crushing Attack.

Space Squid

Space Calamari, Molluscs in space. Hard Shells and Tentacles. All units get Armor and Tentacles.

Crab Men

Space Crustaceans. Exoskeletons and Claws. These Bad Boys all get Armor and Crushing Attack.

Space Inquisitors

Classic Xenophobic pseudo-religious order. Cleansing Worlds. Purification by Fire. All units get Armor and are Balanced Fighters.

Space Raiders

Spec-OPS, Commandos, Smugglers, Slavers, Nomads, Spice Raiders, Away Teams. Sneaky Gits. All units get Stealth and are Balanced Fighters.

Noble House Troops

The private armies of Futuristic Feudal Dynasties. They are numerous and are Balanced Fighters.

Go Gang

Most of these lower class, quasi-criminal groups have a need for speed: jet packs, Hover boards, Gravity Belts, Hover Discs, and so on. All units get Flyer and are Balanced Fighters.

Space Goons

Local Organized Crime. This crew is Tough and are Balanced Fighters.

Vehicle Rules

All armies have access to vehicles. Light Vehicles give their users the Fast or Flying trait. Light vehicles include Motorcycles and Hover bikes, etc.

If a unit on a light vehicle is hit, there is a 1-3 on 1D6 chance the Vehicle is destroyed instead and the rider unscathed. Medium Vehicles will be fast or Flyers, have Armor, 1-3+ Hits, and may support 1 or more Heavy Weapons. Medium Vehicles include Battle Pods, Air Cars, Ornithopters, Crawlers, etc.

Medium Vehicles must be destroyed before the pilot and passengers can be individually targeted. If a vehicle is destroyed, those inside will take 1 Hit on a roll of 1-3 on 1D6. The pilot can also operate 1 Vehicular (attached Heavy) Weapon per turn.

If there are more weapons, they would have to be operated by passengers.

Equipment Transfers

Units can loot the bodies to get better weapons and equipment. a Transfer takes a full turn to accomplish. Armor is usually not transferable.

Units can also give equipment to adjacent units. Likewise, abandoned Vehicles can be pressed into service.

Sample Non-weapon Equipment

- Medikit: Unit gets Heal Ability.
- Psi Torc: Unit gets Psionics.
- Cloaking Device: Unit gets Cloaking
- Defense Belt: Unit get Force Field.
- Commanders Helmet: Unit gets Leadership.
- Jump Pack: Unit gets Flying.
- Scout Suit: Unit gets Stealth.

Credits And Building Armies

Armies are purchased with Credits. Each Warrior costs a base of 4 Credits. Each additional Ability, Weapon, Item, or Extra Hit costs 1 or more Credit.

Light Vehicles cost 2+ Credits. Medium Vehicles cost 8-12+ Credits. Each Seat costs 1 Credit. Not including vehicles, additional abilities should count for about a quarter of the cost of an army.

Sample Warrior Builds

- Space Simian(4) with Missile Launcher(1), Skilled(1) and Stealth(1). Total Cost = 7
- Space Ranger (4) with Leadership (2). Total Cost = 6
- Space Marine (4) with Chainsword (1) and Bolter Pistol (0.5). Total Cost = 5.5
- Space Orc (4) with Vibro Axe(1) and Force Shield (1). Total Cost = 6
- Cat Person (4) with Needler Rifle (0.5) and Blaster

Pistol (0.25). Total Cost = 4.75

- Space Rebel (4) with Frag Grenades (1). Total Cost = 5
- Little Green Man (4) with Laser Rifle (0.5). Total Cost = 4.5
- Gyro Tank: Medium Vehicle with 5 Hits (5), Fast (1), Armor (1), Twin-Autocannons (2), and can hold 1 Pilot (1) and 2 Passengers (2). Total Cost = 12

Combo Warriors

These have a base cost of 5 or 6. They are a combo of 2 Unit Types. Samples:

- Space Orc Raiders(5): Balanced Fighter, Random, and Stealth.
- Little Green Space Bugs (6): Small, Crushing Attack, Numerous, and Fast.
- Big Brained Robots (6): Armor, Heavy Weapon, Psionic, and Random!

Spanish Armada

Introduction

Solo card game using a regular deck of cards. Based on the Failure of the Spanish Armada to invade England in 1588. The Armada had 122 Ships. The English 66.

The English sank 2 Spanish Ships and were able to disperse the Armada. The dispersed Armada drifted into the North Sea and had to circle around Ireland in treacherous weather to return home. On the journey home 39 transports foundered or ran aground.

Setup

Split up the deck into 2 halves: Red Half (Spanish Armada) Black Half (English Squadrons)

Turn Sequence

Each turn has 3 Phases:

1. Straggler Phase
2. Maneuver Phase
3. Engagement Phase

Straggler Phase

Flip over the top 4 cards of the Red deck. These are called Straggler cards. Draw cards from the Black Deck to fill your hand to 5 cards.

These are called Raider cards. If the Black Deck runs out, shuffle the discard and draw from it.

Maneuver Phase

You must play (discard) exactly 1 Black card for a special effect:

- Ace = Flip over another Red card and draw another Black card
- Deuce = All your other cards are worth +2
- Three = Shuffle 1 target Straggler back into the Red Deck

- Four = Shuffle 1 random Escaped card back into the Red Deck
- Five = Look at the next 7 cards in both decks and draw another Black card
- Six = Automatically Disperse one Random Straggler
- Seven = Draw 3 cards and keep 1
- Eight = All Stragglers are at -3
- Nine = Disperse any target Straggler card
- Ten = Shuffle all Stragglers back into deck and flip over 4 new Stragglers
- Jack = Discard your Hand and draw 5 new Black cards
- Queen = Disperse 2 target Stragglers of total value 10 or less
- King = Draw 2 Black Cards

You cannot play more than 1 card in this phase to get a special effect.

Engagement Phase

Discard a Raider card to disperse a Straggler of equal or less value. You may combine 2 Raider cards to disperse a single straggler of equal or lesser value. Put dispersed straggler cards into your Victory pile.

Put any Stragglers you didn't disperse into the Escape pile.

Aces 1; Jacks = 11; Queens = 12; Kings = 13.

Scoring

The game ends when there are no cards left to draw from the Red deck. Your score equals the combined value of the cards in your Victory Pile:

- Total victory = 150+ (Armada Sunk)
- Partial victory = 125+ (Historical victory)
- Marginal escape = 100+ (Armada thwarted)
- Dismal Failure = 99 or less (The Spanish conquer England)

Spanish Civil War

Introduction

Card game for 2 players. Simulation of the Spanish Civil War 1936-9. One player is the Nationalists (Rebels).
The other player is the Republicans (Loyalists).

Victory

You win if you reduce your opponent to zero Territory Tokens or Morale Tokens.

The Decks

Players share a deck. Some cards can be used by only one Player. Card Types include: Units, Leaders, Air Power, Strategy, Defense, Offense

Territory Tokens

Each player starts the game with 5 Territory Tokens (TT).

Morale Tokens

Each player starts the game with 10 Morale Tokens (MT).

Turn Sequence

Players take turns. The current player is referred to as the active player. The other player is the Defender.
The Nationalist Forces go first. Each turn is divided into 4 Phases:
1. Recruit Phase
2. Event Phase
3. Attack Phase
4. Logistics Phase

Recruit Phase

Both players fill their hands to 8 cards. (If a deck runs out, shuffle the discard and draw from it) Next,

players may discard up to 4 cards and draw replacement cards.

Event Phase

Event cards are played in this Phase. Players take turns, the active player first. Event cards are discarded when played.

Attack Phase

Players simultaneously reveal the cards they want to play. A player may play some, none, or all of his cards. Each card has a Force value.
The player with the highest Force total wins the hand. If a player uses a Leader card and his opponent does not, he gets +5 to his total. If a player uses an Air Power card and his opponent does not, he gets +4 to his total.
If a player uses a Strategy card and his opponent does not, he gets +3 to his total. The active player may play Offensive cards (not Defense). The defender may play Defense cards (not Offensive).
The loser loses one Morale Token (removed from play) If the Active player won, he may take a TT from the defender. All played cards are discarded.

Logistics Phase

Players must discard down to 3 or fewer cards.

Card List Notation

Wikipedia Spanish Civil War

Spanish Empire

Introduction

Card game for 2-4+ players. Theme: The Spanish Empire: 15-18th Centuries. Each player is a Noble Family in Spain, trying to serve the Crown by arranging the loans and manpower to fight the Wars and Discover, conquer, and exploit new lands in the name of Empire.

Victory

At the end of the game players add up the Victory Points from all The Empire and Exploitation cards they own. The player with the most Victory points is the winner.

Game End

The game ends, when all the War and Colonization cards in the Empire deck have been claimed.

The Decks

There are 2 decks: The Empire Deck The Spanish Deck

The Empire Deck

There are 27 cards in the Empire Deck: 9 War Cards 9 Colony Cards 9 Event Cards

Setup

All players are dealt 3 cards from the Spanish Deck. Flip a coin to see who goes first.

Turn Sequence

Players take turns. Each turn has 7 phases:

1. Empire Phase
2. Event Phase
3. Viceroy Phase
4. War Phase
5. Conquest Phase
6. Exploitation Phase
7. End Phase

Empire Phase

If there are not 2 Empire cards face up, flip over 1 or 2 Empire cards until there are 2 Empire cards face up. These are called Opportunity cards.

Event Phase

If 1 or 2 Empire cards are Event cards, they take effect in the order They were drawn. They are then discarded.

Viceroy Phase

Draw 1 card from the Spanish Deck and put it in your hand. You may discard an Investment card to draw 2 Spanish cards. You may discard a Politics card to cause a target Opportunity card to be Shuffled back into the Empire Deck.

War Phase

If one of the Opportunity cards is a War card you may claim it. To claim it you must discard 3 cards consisting of: 1 Investment Card or Support Card 1 War Card or Fight Card or Ship Card 1 Politics Card or Support Card Discard the Spanish cards. Put the War card face up in front of you.

Conquest Phase

If one of the Opportunity cards is a Colonization card you may claim it. To claim it you must discard 3 cards consisting of: 1 Investment Card or Support Card 1 Discovery Card or Ship Card 1 Conquest Card or Fight Card Discard the Spanish cards. Put the Colonization card face up in front of you.

Exploitation Phase

If you control a Colonization card you may attach an Exploitation card to it. To do this you must also discard a Manpower Card or Support Card. The Exploitation card is placed next to the target Colonization Card.

A Colonization card may have a maximum of 1 Exploitation card attached.

End Phase

Max hand is 5 cards. Discard excess cards.

Spanish Saint Augustine

Introduction

Card game for 2-4 players. Theme: Survival and Accomplishment in the Florida City of St. Augustine. St. Augustine was founded in 1565 by Pedro Menendez. It is the oldest, continuously inhabited European Settlement in North America. For the first 200 years of its existence, it was controlled by Spain. The town itself was always very small and poor, but it held an important strategic position. It helped defend the treasure Fleets on their way back to Spain by preventing the English and French from building their own settlements along the Gulf stream. Players actively recruit Townsfolk, earn Gold, gain Military Glory, and build Structures while being mercilessly subjected to Hurricanes, Raids, Disease, and Hostile Indians.

Turns & Game End

Each turn is equal to about a Decade. The game ends after 20 Turns, at which point, historically the British take control of the City.

Victory Points

The player with the most Victory Points (VP) at the end of the game wins.

Player Mats

Each Player gets a Player Mat. Each Mat is divided up into 7 Boxes:

1. Government
2. Churches
3. Forts
4. Population
5. Gold
6. Glory
7. Victory Points

Government, Churches, and Forts are collectively called Buildings. Population, Gold, and Glory are collectively called Resources.

Tokens

Players share a common set of tokens. Tokens are placed in the Boxes on Player Mats to keep track of each player's Score in that Category.

The Decks

There are 2 Common Decks:

1. The Event Deck
2. The Action Deck

The Event Deck

One Random Event occurs each year.

The Action Deck

The Deck has 4 Suites:

1. Economic (Types: Industry, Agriculture, Trade)
2. Military (Types: Fight the French, Fight the English, Control)
3. Population (Types: Indians, Blacks, Europeans)
4. Buildings (Types: Government, Churches, Forts)

Each suite has 3 Types of card. There are 4 cards for each Type. In addition the Deck has 4 Leader (Wild) cards.

Setup

Each player gets 7 Population, 5 Gold, and 3 Glory. Shuffle the Decks.

Turn Sequence

Each turn is divided into 7 Phases:

1. Draw Phase
2. Trade Phase
3. Meld Phase
4. Building Phase
5. Event Phase
6. Score Phase
7. End Phase

Draw Phase

Each Player fills their hand to 10 Action Cards. If the deck runs out, shuffle the discard and draw from it.

Trade Phase

Players may trade Action cards with each other. Players may also trade Tokens on their Player Mats.

Meld Phase

Players may make Melds. A Meld consists of 1 or more cards of the same Type. You can make a max of 4 Melds, one from each Suite.

A Meld can have a Maximum of 4 Cards. One card in a Meld may be a Leader. One card in a Meld earns 1 Token.

Two cards in a Meld earns 3 Tokens. Three cards in a Meld earns 6 Tokens. Four cards in a Meld earns 10 Tokens.

Tokens from a Population Meld go into the Population Box. Tokens from a Economics Meld go into the Gold Box. Tokens from a Military Meld go into the Glory Box.

Tokens from a Government Building Meld go into the Government Box. Tokens from a Church Building Meld go into the Church Box. Tokens from a Fort Building Meld go into the Fort Box.

Building Phase

Buildings provide bonus Resources. The Player with the highest Church Score gets 4 Population. The Player with the second highest Church Score gets 2 Population.

The Player with the highest Government Score gets 4 Gold. The Player with the second highest Government Score gets 2 Gold. The Player with the highest Fort Score gets 2 Glory.

The Player with the second highest Fort Score gets 1 Glory.

Event Phase

Flip over the Top card of the Event Deck. The Event affects all Players. If the Event is a Raid: All players lose 1D6 Population, 1D6 Gold, 1D6 Glory, and 1D6 Buildings If the Event is a Hurricane: All players lose 1D6 Population and 1D6 Buildings If the Event is a Disease: All players lose 2D6 Population If the Event

is an Indian Revolt: All players lose 1D6 Population, 1D6 Glory, and 1D6 Buildings If the Event is Piracy, each player loses 1D6 Gold.

Each player rolls the dice separately for his own Losses. When you lose Building Points roll 1D6 to see which type:

1-2 Government

3-4 Church

5-6 Forts

Score Phase

Players gain VP in Score Phase: Gain VP = 1 X Your Population Gain VP = 2 X Your Gold Gain VP = 3 X Your Glory

End Phase

Players may discard their Action hands down to zero cards. Each player loses one-half his Gold rounding down. Each player loses all his Glory.

St Augustine

Spawn

Introduction

2 Player Shibumi Set Game.

Equipment

Shibumi Set: 4 x 4 Board. 3 sets of 16 Red, White, and Black Balls.

Rules

Players take Turns. On your turn:

FIRST place 1 Red Ball, 1 White Ball, and 1 Black Ball. All three Balls you place must be touching each other. (At least 1 Ball must be touching the other 2. This may be a line or cluster and may be all on one level or multiple levels.) For purposes of this game balls on the same level that are orthogonally or diagonally adjacent are considered to be touching.

If you ever run out of balls of one of the colors, then only place two balls of the remaining two colors. If you ever run out of balls of two of the colors, then only place one ball of the remaining color.

THREE BALL BAN: A Ball when placed may NOT be DIRECTLY touching 2 or more balls of the same color as itself. (For example: You place the Red Ball: It may be touching a max of 1 other Red Ball.)

SECOND Remove 1 Ball from the Board of any color. It may not be one of the three balls you just placed. It may be a ball that is one lower than the highest currently built level allowing for a ball immediately above it to drop into its space.

It may not result in a situation that breaks Three Ball Ban Rule. (Skip the Second Action on the first turn of the game.)

Visibility Rule

If a ball is completely buried (hidden from view), it does not count towards placement rules. If it is later revealed, it then counts.

Aim

If you are unable to place your balls you lose and the other player wins. If you ever break the Three Ball Ban Rule you lose and your opponent wins.

- If you complete the pyramid on your turn you win.

Haiku

Red White Black Balls Stack Three to Place One
to Remove

- Avoid Three the Same

Spectrum

Introduction

Gin Rummy variant with novel deck. Poker variants are possible of course.

The Deck

52	cards:	Notes
7	Red	
7	Orange	
7	Yellow	
7	Green	
7	Blue	
7	Indigo	
7	Violet	
1	Infra-Red	Wild card for Red, Orange, or Yellow
1	Ultra-Violet	Wild card for Blue, Indigo, or Violet
1	Prism	Wild card for any color

Color Order

A prism divides white light into a rainbow that has the colors in the following order: ROYGBIV.

Play

The most colorful player goes first. Players start with 7 random cards. Players take turns drawing one card from the deck or discard and then discarding one

card face up.
The first player to get a combo wins.

Combos

3 of a kind & 4 of a kind.
"A kind" = all of one color (all red, all green, etc) or colors in order (ROY or GBI or OYGB, etc)
7 of a kind (all blue, all yellow, etc) or 7 in a Row (ROYGBIV)

Speed Racer

Introduction

Go Speed Racer! Go! Pick your Driver, Car, Modifications, and go!

Disclaimer

Speed Racer is a licensed, copyrighted, trademarked property. This is merely a fan site.

Victory

It takes 50 Speed Points to cross the Finish line. Determine 1st, 2nd, and 3rd place.

The Decks

- There are 5 Decks:
- The Driver Deck
 - The Car Deck
 - The Equipment Deck
 - The Action Deck
 - The Episode Deck

The Action Deck

- The Action Deck has 4 types of cards:
- Foe Cards
 - Obstacle Cards
 - Villain Cards
 - Aid Cards

Setup

Each player Draws 1 Driver, 1 Car, and 3 pieces of Equipment. Place these cards face up in front of you. Each player starts with a hand of 5 Action cards. Players roll high on 1D6 to see who goes first. Draw 1 card from the Episode deck to see who the Villain is this game.

Turn Sequence

- Players take turns. Each turn has 3 phases:
- Draw Phase

- Threat Phase
- Speed Phase

Draw Phase

Draw 2 cards from the Action Deck. Max hand size is 7 cards. Discard excess cards.

Threat Phase

You may play a Villain card on yourself or any opponent may play one Villain, Foe, or Obstacle card on you. These are collectively referred to as 'Threat' cards. Each Threat card has a Threat Level. Roll 1D6 and add the Threat Level of the Threat card to get the Total Threat Value. The Threat has one of several Descriptors: Fight, Jump, Turn, etc. Roll 1D6 and add any bonuses you have from your Driver, Car, or Equipment in the Indicated Descriptor. This is the Total Skill Value.

You may also play Aid cards of the appropriate type for additional bonuses. If the Total Skill Value is equal to or greater than the Total Threat Value, you Overcome the Threat. If not, you fail the Threat. Threat and Aid cards are discarded.

Speed Phase

If you overcame the threat from Threat phase roll 1D6 and add any Speed bonuses you have. Add this value to your running Speed Point Total. If you failed the Threat, you get no Speed points. If you were not challenged by a Threat you may roll with an extra bonus of +2.

The Villain

Every time a Villain card is played, you have to face the Threat described on the Episode card. The third time a Villain card is overcome means the Villain is finally, totally defeated, andNo one can play any more villain cards. The player that defeated the Villain for the third time gains 1D6 Speed points.

Race Car Deck Card List

Card Name	Notes
Mach 5	Jump & Speed +1
Mach 5 Formula One	Speed +2
Mock Mach 5	Jump & Speed & Turn +1

Card Name	Notes
Shooting Star	Speed +1 (Spiffy Black & Yellow)
Black Tiger	Turn +1 (Number 4)
Car 13	Jump +1 (Yellow)
Car 001	Repair +1 (Red)

Auxiliary Motors	Turn +1
Rotary Saws	Rough Terrain +3
Safety Cockpit	Repairs +3
Super Headlights	Darkness +3
Submersible	Water +3
Homing Robot	Hand Size +1

Card Name	Notes
Special Brakes	Turn +1
GRX Engine	Speed +1
Retractable Wings	Jump +1
Jet Engines	Speed +1
Oil Slick	Fight +1
Mizmo Raygun	Fight +1
Super Charged	Speed +1

Episode Deck Card List

Card Name	Notes
Monster Car	Jump +2 (Laser Tank created by the Mad Dr McFife)
Mammoth Car	Speed +4 (Cruncher Block: Crime Lord)
International Assassins	Fight +2 (Professor Anarchy: Evil Mastermind)
Race Rudolph Elegantor	Jump +2 (Notorious Aristocratic Mastermind)
Ace Deucey	Fight +2 (Mercenary)
Mr. Cumulus	Navigate (Maniacal Villain with Atomic Bomb)
Tongue Blaggard	Fight +2 (Unscrupulous Crime Boss)
Kadar	Turn +2 (Greedy Villain)
Jack Rival	Fight +2 (Unethical CEO of the Rival Motor Company)

Action Deck Card List: Aid Cards

Card Name	Notes
V-Gas Drug	Speed +2
Go Speed Racer! Go!	Speed +2
Driving Skill	Turn +2

Card Name	Notes
Smoke Bombs	Fight +2
Overtake the Pack	Speed +2
Short Cut	Speed +2

Card Name	Notes
Elude Danger	Turn +2
Quick Reflexes	Turn +2
Martial Arts	Fight +2
Calculate Speeds	Navigate +4
Navigation Whiz	Navigate +4
Natural Talents	Turn +1 or Jump +1
Fearless	Jump +2
Expert Marksman	Fight +2

Card Name	Notes
Sparky	Repair +2
Pops	Repair +2
Chim Chim	Fight +2
Spritle	Fight +2
Pit Stop	Repair +2
Trixie	Navigate or Fight +2
Inspector Detector	+2 vs Villain

Action Deck Card List: Foe & Obstacle Cards

Card Name	Notes
Villain Cards	7 in Deck
Motorcycle Bandits	Fight
Skull Duggery	Fight (Enemy Driver)
Axle Spikes	Speed
Zoomer Slick	Speed (Enemy Driver)
Henchmen	Fight
Alpha Team	Turn (Enemy Drivers)
Assassins	Fight
Grudge Match	Speed
Zero Visibility	Darkness
Spin out	Turn
Thugs	Fight
Dirty Tricks	Turn or Fight
Gunman	Fight
Falling Rocks	Turn
Log Trap	Speed
Night	Darkness
Chasm	Jump
Bridge Out	Jump or Water

River	Water
Maze	Navigate

Card Name	Notes
Jungle	Rough Terrain or Navigate
Blizzard	Darkness or Navigate
Underground Base	Fight
Avalanche	Turn
Lava Flow	Speed
Rubble	Jump
Ramp	Jump
Pile of Flaming Wrecks	Jump
Mud Slide	Turn
Foliage	Rough Terrain
Sabotage	Repair
Mechanical Failure	Repair
Engine Problems	Repair
Flat Tire	Repair
Quicksand	Jump or Turn
Remote Control Car	Fight
Road Block	Rough Terrain
Flooding	Water
Icy Road	Turn
Signposts Altered	Navigate
Detour	Navigate

Spellfire Ccg

Objective

Rules for common Deck play. These changes are based on the first edition rules.

To Win

Raze all of your opponents' Realms. The game is a tie if all Realms of all players are razed in the same turn.

Realm Deck

Put one of each Realm in this deck.

Common Deck Construction

Take all the other cards and shuffle them together in a common deck. There are no Realms in this deck. Put in one of each unique card.

All Champions, Holdings, and Artifacts are considered unique. Add other cards in numbers to suit your tastes.

Setup

Players are dealt 6 Realms from the Realm deck. Arrange these into rows as per the normal rules. The Realm deck is not used again for the rest of the game.

Each player takes 40 random cards from the common deck. These 40 cards are their play deck. During a game, players use their play deck, not the common deck.

After the game, the play decks are mixed back into the common deck.

Rules Modifications

In Step 2 Players cannot automatically rebuild a razed Realm. Realms can only be rebuilt as a result of the abilities of another card. Players cannot attack on their first turn.

There is no limit to hand size. Champions cannot be used directly from your hand to attack or defend in Step 4. Each Realm may attach one dungeon Spellfire Link

Theme Decks I have made: Ravenloft with holdings & artifacts Undead deck with Unarmed combat cards Undead deck with Allies Dragonlance with holdings & artifacts Wizards Forgotten Realms Wizards with holdings & artifacts Greyhawk Wizard with holdings & artifacts Dragon Wizards Monster Wizards Priests Greyhawk Priests with holdings & artifacts Forgotten Realms Priests with holdings & artifacts Dragon Priests Heroes with Swords Heroes with Unarmed combat cards Allies Dragons with Unarmed combat cards Dragons with Allies Thieves AD&D Giants with holdings & artifacts Psionics Deck Psionics/ Dark Sun with holdings & artifacts Monsters Underdark with holdings & artifacts Swimmers Dwarf/Gnomes Elf/Halflings with Magic items Flyers Auto-defeat

Spelljammer

Introduction

Battle between Good & Evil in the SpellJammer Universe. Based on the AD&D RPG by TSR. Card game for 2+ players.

Disclaimer

Spelljammer is a licensed, copyrighted product. This is merely a fan site.

Victory

Control the most Locales when the deck runs out.

Alignments

At start each player must pick whether they are going to be Good or Evil. A good player can control Good & Neutral Ships. An evil player can control Evil or Neutral Ships.

2 Player Game

One Good player vs One Evil Player.

4 Player Game

2 Good players vs 2 Evil Players.

Odd Number Cutthroat Game

Teams optional. Any player can control any type of ship.

Deck

Players share a Common Deck. The Deck has 8 types of cards mixed in: Locales, Ships, Monsters, Equipment, Crew, Characters, Events, Combat The discard pile is called the "Void".

Tokens

Use tokens for: Gold, Jam tokens Six, eight, and ten sided dice are needed.

Setup

Select teams and alignments. Players start with a hand of 7 cards drawn from the deck. Players start with 10 Gold.

Jamming

Normally the cards in play you control will be on the table, vertically face-up, in front of you (Normal Position). To 'Jam' a card rotate it horizontally onto its side (Jammed). To Unjam a card that is jammed, rotate it back to the normal (unjammed) position.

Turn Sequence

Players take turns. Each turn has 6 phases:

1. Unjam Phase
2. Explore Phase
3. Trade Phase
4. Recruit Phase
5. War Phase
6. Control Phase

Unjam Phase

Unjam (or remove a Jam token from) all of your jammed cards. A card with Jam tokens cannot be unjammed.

Explore Phase

Draw one card and put it in your hand. Maximum hand size = 12. Discard excess cards. You may put one Locale card in play under your control.

Jam an Explorer ship card to Draw an extra card.
Jam an Explorer ship card to put one Locale card in play under your control.

Trade Phase

Gain 1D6 Gold. Jam your Locales to gain gold from them equal to the amount of gold indicated on the card. Jam a Trader ship card to gain 1 Gold.

Jam a Pirate ship card to gain 1D6 -3 Gold.

Recruit Phase

Purchase Ships from your hand. Ships come into play unjammed. You may also buy Equipment, Crew, and Characters.

Attach these cards to target unjammed ships If you buy a Carrier Ship, you may attach one Scout for free.

War Phase

You may Jam one or more ships to attack a target Locale. (Attacking Fleet). Your opponent may Jam ships to defend the target (Defending Fleet). The Fleet with the most Scout ships may look at the opponents hand and gets Tactics +2 for the rest of the phase.

The Battle proceeds in a series of rounds. Each round roll once on the Battle Table (The Battle Stat Roll). The ship stat indicated by the roll is the Primary Stat for the current round.

The fleet with the highest combined total of the primary Battle Stat gains a Combat Advantage of +1. Players may play (Discard) Combat cards to increase their score in the Primary stat or decrease their oppo-

nents score. The fleet with the highest total Cost gains a Combat Advantage of +1 (or +2 if its Cost total is over twice the opponents fleet). Next each fleet rolls 1D6 and adds its Combat Advantages (Combat Roll).

The side with the highest combat total wins. (reroll ties) The losing fleet must discard a Ship card. Repeat this process until one side is destroyed or flees. After each round of Battle either player may choose to retreat his fleet.

Fleets

A fleet may contain ships of only one race unless you play an Ally card.

Battle Table

1D8	Battle Stat:	Notes:
1	Range	Catapults, Cannons, Ballistae, Jettisons, etc.
2	Impact	Blunt Rams, Piercing Rams
3	Speed	Helm, Rigging, Maneuverability
4	Crew	Boarding Actions, Marines
5	Hull	Size, Hits
6	Armor	Wood, Metal, Stone, Crystal, etc.
7	Tactics	Initiative, Command, Surprise, Invisibility
8	Magic	Wizards, Clerics, Bards, Spells, Magic Items

Control Phase

If you destroyed or routed the defenders in War phase, you take control of the target Locale.

Spelljammer Skirmish

Introduction

Board & card game for 2 players. Takes place in the Spell Jammer Universe. Pick your Fleet: Humans, Neogi, Elves, Beholders...

Abstract skirmish level Ship combat. Each figure represents a single Ship (unit).

Disclaimer

'Spell Jammer' is a copyrighted/trademarked property. This is just a fan site.

Victory

You win if you Destroy the opposing Flagship.

The Map

Use an 8x8 chessboard.

The Ships

Use chits or miniatures to represent Ships.

Fleet Table Notation

Number of that type of Ship you start the game with.

Hits Number of Hits that type of Ship has.

Scro Fleet Table

#	Type	Hits	Class
1	Battlewagon	3	Flagship
2	Mantis	2	
5	Scorpion	1	

Notes: Ship Effect Card: Catapults & Bombards (Attack range = 4) for Battlewagon Ship Effect Card: Grappling Rams (Attack range = 2) for Mantis Ship Effect Card: Ram Claws (Attack range = 1) for Scorpion Race Effect Card: Orc Marines (Attack range = 1) for all Ships. Fleet Effect Card: Metal Plates (Defense) for all Ships.

Mind Flayers Fleet Table

#	Type	Hits	Class
1	Dreadnaught	3	Flagship
2	Octopus	2	
5	Nautiloid	1	

Notes: Ship Effect Card: Mind Flayers!!! (Attack range = 1) for all Ships Race Effect Card: Illithid Magic (Attack range = K) for all Ships. Fleet Effect Card: Pool Helm (Move range = K) for all Ships

Neogi Fleet Table

#	Type	Hits	Class
1	Black Widow	3	Flagship
2	Deathspider	2	
5	Mindspider	1	

Notes: Ship Effect Card: Grappling Rams (Attack range = 2) for all Ships. Race Effect Card: Umber Hulks (Attack range = 1) for all Ships. Fleet Effect Card: Urchin Swarm (Attack range = K) for all Ships.

Beholder Fleet Table

#	Type	Hits	Class
1	Tyrant Ship	3	Flagship
2	Tyrant Ramship	2	
5	Tyrant Scout Ship	1	

Notes: Ship Effect Card: Beholder Circuit (Attack range = 4) for Flagship. Ship Effect Card: Ram (Attack range = 1) for Ramship. Ship Effect Card: Magic Missiles (Attack range = 2) for Scouts.

Race Effect Card: Magical Eye Beams (Attack range = 3) for all Ships. Fleet Effect Card: Orbus (Move range = K) for all Ships.

Elven Fleet Table

#	Type	Hits	Class
1	Armada	3	Flagship
2	Monarch	2	
4	Man-o-War	1	
1	Radiant Ship	1	

Notes: Ship Effect Card: Flitter Swarm (Attack range = K) for Armada & Monarch. Ship Effect Card: Maneuverable (Move range = K) for Man-o-War. Ship Effect Card: Blind (Attack range = 2) for Radiant Ship.

Race Effect Card: Elven Magic (Attack range = 5) for all Ships. Fleet Effect Card: Living Hull (Defense) for all Ships. Fleet Effect Card: Flitter Swarm (Attack range = K) for Armada & Monarch.

Wa Fleet Table

#	Type	Hits	Class
1	Tsunami	5	Flagship
7	Locust Swarms	1	

Notes: Ship Effect Card: Huge Size (Defense) for Tsunami. Ship Effect Card: Rudder of Propulsion (Move range = K) for Locusts. Race Effect Card: Samurai (Attack range = 1) for all Ships.

Fleet Effect Card: Ki Power (Move range = 3) for all Ships.

Shou Lung Fleet Table

#	Type	Hits	Class
1	Dragon Ship	3	Flagship
2	Flaming Dragons	2	
5	Junks	1	

Notes: Ship Effect Card: Fire Cannons (Attack range = 2) for all Ships Race Effect Card: Extra Warriors (Attack range = 1) for all Ships. Fleet Effect Card: Rockets (Attack range = 4) for all Ships.

Goblin Fleet Table

#	Type	Hits	Class
1	Triop	3	Flagship
2	Porcupine Ships	2	
5	Blades	1	

Notes: Ship Effect Card: Lateral Fins (Move range = 4) for Triop. Ship Effect Card: Ram Mines (Attack range = 1) for Porcupine Ship. Ship Effect Card: Kamikaze Ram (Attack range = 1) for Blade.

Race Effect Card: Lots of Ballistae (Attack range = 3) for all Ships. Fleet Effect Card: Expendable Goblin Horde (Defense) for all Ships.

Vodoni Fleet Table

#	Type	Hits	Class
1	Vodoni Diamond	3	Flagship
2	Hunter Killer	2	
5	Nightwolf	1	

Notes: Ship Effect Card: Spire Ram (Attack range = 1) for Diamond. Ship Effect Card: Attack Ship (Attack range = 1) for Hunter Killer. Ship Effect Card: Spy ship (Move range = K) for Nightwolf.

Race Effect Card: Were Wolves (Attack range = 1) for all Ships. Fleet Effect Card: Lycanthropes (Defense) for all Ships.

Dwarf Fleet Table

#	Type	Hits	Class
1	Citadel	6	Flagship
2	Stoneship	3	

Notes: Ship Effect Card: Blunt Ram (Attack range = 1) for all Ships. Fleet Effect Card: Stone Construction (Defense) for all Ships. Race Effect Card: Siege Engines (Attack range = 4) for all Ships.

Human Fleet Table

#	Type	Hits	Class
1	Cuttle Command	3	Flagship
2	Battle Dolphin	2	
5	Squid Ship	1	

Notes: Ship Effect Card: Mages (Attack range = 5) for all Ships. Fleet Effect Card: Dragonfly Squadron (Attack range = K) for all Ships. Race Effect Card: Sailors (Move range = 2) for all Ships.

Lizardman Fleet Table

#	Type	Hits	Class
1	Bloat Fly	3	Flagship
2	Turtleship	2	
5	Hammership	1	

Notes: Ship Effect Card: Ballistae (Attack range = 3) for Bloatfly. Ship Effect Card: Hard Shell (Defense) for Turtleship. Ship Effect Card: Hammerhead Ram (Attack Range = 1) for Hammership.

Fleet Effect Card: Wasp Squadron (Attack Range = K) for all Ships. Race Effect Card: Rugged Ships (Defense) for all Ships.

Giff Fleet Table

#	Type	Hits	Class
1	Clipper	3	Flagship
1	Clipper	3

Notes: Ship Effect Card: Living Crystal Hulls (Defense) for Leaf Ships. Ship Effect Card: Suicide Run (Attack Range = 1) for Thorn Ships. Fleet Effect Card: Crystal Throne (Move range = 3) for all Ships.

Race Effect Card: Thri-kreen Warriors (Attack range = 1) for all Ships.

Setup

Each player places one Ship on each square of his back row. Ships may not stack.

The Cards

Players share a common deck.

Turn Sequence

Players take turns. Each turn has 3 phases: Orders Phase Maneuver Phase Fire Phase

Spelljammer Card List

Notes: Ship Effect Card: Jettisons (Attack range = 2) for Eagle Ships. Ship Effect Card: Loop Maneuver (Defense) for Corbinas. Fleet Effect Card: Speed (Move range = 3) for all Ships.

Race Effect Card: Aerodynamics (Move range = K) for all Ships.

Orders Phase

Draw 3 cards. Max hand size = 5 cards. If the deck runs out, shuffle the discard and draw from it.

Discard excess cards.

Maneuver Phase

Play (discard) a Move card to move one of your Ships. The move card has a number. This is the number of spaces the Ship moves.

Moves can be diagonal or orthogonal. "Knight" type Move cards produce an attack with a range like a knight in chess. Instead of moving just one Ship in any direction, you have the option of moving one or more Ships forward the indicated number of spaces using a single move card.

Fire Phase

Play (discard) an Attack card to have a Ship attack. The attack card has a number. This is the range of the attack.

Attacks can be diagonal or orthogonal. "Knight" type attack cards produce an attack with a range like a knight in chess. You cannot attack through other ships.

Every attack does 1 point of damage. Use Chits or coins to record damage. A ship reduced to 0 Hits is destroyed and removed from the board.

Your opponent may play (discard) Defense cards to negate your attack.

Card List Notation

M Movement

A Attack

D Defense

X Special

K as a Knight would move in Chess

Type Purpose of card

Dam Damage (inflicted or prevented)

Number of that card in the Deck.

Card Name:	#	Range	Type	Notes

Divination	1	-	X	Look at next 7 cards in deck

Spells And Swords

The Basic Rules

Basic Game

These are also referred to as the Basic Rules or the D20 Easy Rules. These rules are very different from the standard rules. In some ways they are incompatible. The Basic Game is designed to speed up play in all ways. The Basic game is even more Epic. It relies on the GM's judgement to an even greater degree.

- Character Generation and advancement is simply a Matter of drawing cards from the Trope Deck.

- All Randomization is resolved by using the Fate Table.
- For a truly Basic Experience, Do everything as Mind's eye.
- PURPOSES OF THE D20 EASY RULES
- For a new GM to gain Confidence.
- For an intermediate GM to get things going quick.
- For very tired GM's who don't have their stuff ready.
- For experienced GM's just winging it and concentrating on the story and imaginative descriptions.

Fate Table

#	Result
1	Terrible Failure
2-5	Failure
6-15	Success

#	Result
16-19	Heroic Success
20+	Super Heroic Success

Purpose Of The Fate Table

- Use the Fate Table to help determine the results of anything that requires some randomization.
- Everything else is at the whim of the GM.
- Players can argue their case. The GM may take it under consideration.
- The GM's decisions are final.
- Rolls on the Fate Table may apply to a group or individual.
- Have a Roll Off: Foes roll high on D20 to see who wins.

Critical Accompaniments

-Friends, Dice, Miniatures, Maps, Food, Atmosphere, Soundscapes, Props, etc.

Bring Your Buddies

-Friends: This is not a Solo game. A GM and a single player is sufficient.

Atmosphere

-A Theatrical Room appearance can be amazing.
-How to spend your hard earned Money. Don't spend all your money on Rule Sets. Your Money and Effort is better spent on other things.

-Do up a room: Get a Video of a burning log. Get Shadows going in the Room, Skulls, Flickering Candles, Large Fantasy Monster Models, Wooden Game Table, Shields & Weapons mounted on the Walls, Lava Lamps, Tankards for Ale (Punch), A Chest full of Glittering Treasure, Mounted Demon Heads, Mist gener-

ator, Lightning Globe, Maps, Dusty Tomes, Cobwebs, Sand Timer, Daggers, Staves, Costume Closet with Robes, Cloaks, etc. Shelves with Helmets, Orbs, Rubber Masks, Potion Bottles, Scrolls, etc.

Food And Drinks

-Prepare some themed Dishes: Dragon Balls, Gelatinous Cubes, Turkish Delight, Golden Apples, Serpent Skewers, Kobold Cookies, Gingerbread Golem Men.

-Be sure to have some themed drinks ready too: Beer or Near Beer in Tankards, Flagons of Nectar or Cherry Juice, Goblets of Punch or Wine Coolers, Mugs of Grog or Spiced Cider. Make it part of the experience. Make sure the Drinks are age appropriate.

Auditory Stimulus

- Sound Effects!!! The GM should not be embarrassed. This can be good fun.
- Mood Music. A lot of really good stuff is available on the Internet.
- Voices. Not everybody is a Voice actor. Practice helps but Sometimes you need to nip this one in the bud.

Gaming Table Props

- Tiny but cheap and fun: Plastic and Metal Figs, Terrain, Cool Dice, etc.
- Hand Drawn and colored Maps and Art, Documents, Doodles of Foes, Items, and Locations, etc.

Storytelling

-Some beloved RPG themes will happily repeat themselves: Heroism, Self-sacrifice, Sword & Sorcery, Chainmail Bikinis, Guys with big Swords and Helmets, Mighty Magics, Fantastic Beasts, all in just 1-2 hours.

Danger And Imagination

-If the PC is killed just start again... This time I'm thinking of a Wizard... -The GM wants to be super descriptive: Our Wizard is inscribing Runes on floating sword but is attacked by a gelatinous creature out of nowhere, looking to fill it's belly with Fresh Meat and Magic. Having barely survived, our Wizard gets another surprise Attack, This time by a Treacherous Planar Spider he thought was his friend. As revenge he impales the Alien Arachnid in the Thorax. He is burned by the Ichor but he also receives a new Rune. Now he must go on a Quest to discover what the rune does.
-The GM has the power of the Gods: They reward your Heroism with 1 extra Wound after death. They get another Chance. -Let the players add details: For a Tactical Advantage, the player wants The Room to have a large stone block in the middle. The GM says this is Ok.

Basic Combat

- Use Fate Deck to Attack.
- Defense Subtracts from Damage Rolls.
- Basic Attacks do 1D10 Damage.
- Heavy and 2-H Weapons do +2 Damage.
- Armor subtracts from Damage Rolls.
- Fighters have 30 Wound Levels.
- Rogues and Priests have 20 Wound Levels.
- Mages have 10 Wound Levels.
- Minor Minions have 5 Wound Levels.
- More Important Monsters and Foes have 5 or 10 Wound Levels per Size Level.
- Getting Reduced to zero or less Wound Levels results in Death.
- Base Movement Rate = 6

Trope Card Types

Types	Description
Classes	A PC may have max 3 (Multi-Class Character. A PC must start with at least 1 Class. If one is not drawn, discard a card and pick a Class card from the Deck)
Races	A PC may have max 1 (If no such card is drawn in Character Generation, the Character is considered Human and remains Human)
Relics	A PC may have max 5 (More interfere with each others Magic)
Ability	A PC may have max 3 (There is only so much you can be good at)
Companion	A PC may have max 3 (Those in excess get on each others Nerves)

- Zone of Control: When using a Map and you are adjacent to a Foe, you can only move 1 Space.

Magic Use

-A single Arrow or Sword Strike can cause Death. Likewise a single spell has the potential to Damage, Kill, or Incapacitate. Taking this to its natural conclusion means that Mages and Priests should be able to Attack with Magic every round, much like Fighters and Rogues can. To reflect this, Spells with the * denotation, do not cost any PP to cast.
-Priests get 5 PP per Day (Note: If your PC has 2 Priest Classes, that would be 10 PP)
-Mages get 10 PP per Day (Note: If your PC has 2 Mage Classes, that would be 20 PP) (Note: If your PC has 1 Priest and 1 Mage Class, that would be 15 PP)

The Nitty Gritty

-As play proceeds in the Basic rules Mode, the GM and the Players will probably, at numerous points, want more guidance and options in the Rules System.
-At this point the GM can start slowly, piece by piece, adding more Rules from the Standard (Advanced) Game Rule System to the ongoing Basic Rules Play.
-The GM may need to implement some Standard rules even in the first Session.

The Trope Deck

-This is used for Character Generation and Progression. These Cards describe the Powers and Possessions of the Characters. -A Starting Character Draws 2 Cards from the Deck. -At the end of the first Session, If the PC survives he gets to draw 1 more Card.
-At the end of an Important or Eventful Session the PC may earn an extra Trope Card. The Resolution of a Quest, Module, or Adventure should also earn another Trope Card. -Notes: Death Save: If a PC is about to die, roll 1D20: On a Heroic Success result they live. Once per day. -Notes: Slay: If the indicated type of Character is Hit it takes an extra 2D10 Damage.

Types	Description
Magic Talent	A PC may have max 1 (More interfere with each other)

Trope Card List

Card	Description
Wizard	Class: Mage: Lists: Wizard. Energy Magic

Spells And Swords Gm Advice

Game Master Advice And Options

- Gygax Maxim: Players should be in real danger 25% of the time but feel in danger 75% of the time.
- It's Ok for the GM to remind players of things that are Common Knowledge, or of Facts that their Characters would personally know or should know.
- Remember that the GM and players are engaging in a piece of shared fiction.
- Most players go off the Rails. They prefer a Sandbox Campaign to being Railroaded.
- The GM should ask for Feedback from players during and in-between sessions.
- Find out what players like: Combat, Role Playing, Problem Solving, etc.
- Players should be rewarded for problem solving and Teamwork. Getting past a Trap without having to make a Risky Skill Roll or Saving Throw is always preferable.
- After every move, the GM should ask "What do you do?"
- Players should Roll for their Actions first. Next the Players can describe their Success or Failure based on the Roll.
- If a player says his character does something, he does it. No takebacks.
- If a player does not react in time neither does his character.
- Players and the GM may share secrets the other players don't know.
- Introduce Moral Dilemmas: What to do with cute baby Kobolds? What to do when captured Foes beg for Mercy. Do you make deals with Monsters? Is there more to life than looting, seducing, and murdering? Are all Humanoids irredeemably evil?
- Baby Sitter NPC's are disliked by players for good reason. They take away their agency and give it to the GM. The GM may introduce a weak NPC,

the Shepard, who has info relating to the Quest or Adventure at hand. Instead of the baby sitter doing everything for the PC's the Shepard would require protection.

- Some players dislike the presence of too many Party Members. The GM will have to balance this carefully.
- Some players will think you are lazy if you don't do certain minimum things, such as having a few miniatures available or having a detailed map of the dungeon, or a colored map of the region.
- Some players really like the idea of mysterious Lone Wolf PC's. The GM can have these rotate in at pivotal Story points only to suddenly disappear, but otherwise the Player should also control a Character who is more of a team player.
- Random Encounters for their own sake can be an unnecessary time waster. The same goes for Random Dungeons. A Dungeon should, story-wise, have some reason to exist.
- Things that aid in Character development: PC Interactions with each other. Humor. Meaningful progression. Gaining Lands, Titles, Armies, Buildings, Settlements, Artifacts, Followers, Powers, etc.
- Advanced Storytelling: Meaningful Sidequests that revolve around the Character's Backstories, Sense of Exploration, World Maps, Geo-politics, Discovering Secrets
- Each session should answer some questions and ask new ones.
- The First session should establish the World, The Characters place in the World, and why the Characters are traveling together.
- Name your Campaign.

Story Telling Tropes

Ultimate Weapons, Puzzle Bosses, Team-up with previous Foe, Recurring Foes, Betrayal, Treachery, Lies, Hidden Identities, Friends and Family Members

in Disguise, Big Bad controlled by even Bigger Bad or Ambitious Villain. Friends or Family Member is really Villain, Artifact is valuable for a different reason, Find Murder, Death of Father Figure, Plot Twist in storyline, Unknown, unrevealed motivations, Need of Rescue, guilt and innocence, Fake Death, Blackmail, Great Curse, Dependents, Find Map, Key, Timer on Death Trap, pending Disaster, Acquire Leverage, Complications, Tremendous Risks, Martyr, Unexpected Ally, Mysterious Stranger, Elaborate Disguise, Reveal Clue, Not Believed, Earn Trust, Follow up Leads, Risk Ritual to get Info, Captured, On the Run, Hidden Agenda, Romance, Marriage, Birth, Turn back Time, Elaborate Caper, Sea Voyage, Demi-God, Seventh Son of Seventh Son, Family Heirloom, Ancestral Castle, Prophecy, Latent Powers, Chased by Secret Society, Hunted, Great Discovery, etc.

How Players Meet

You meet in a Tavern, Prisoners, Refugees, From same Village, Town, Academy, Hired by plotting Noble, Sent by King, Recruited by Wizard Friend, On Crusade Together, All are Pilgrims, Agency or Military Mission, All are Survivors, Veterans of the Psychic Wars, Hired by Thieves Guild, Secret Society Intrigues, etc.

Storyline Flowchart

The GM can set up a Campaign Decision Tree. The players, after every completed scenario, will have to decide what to do next: Protect the Town, Investigate the Haunted Tower, Explore the Mist Filled Swamp. Every decision will have consequences: If the players visit the Tower, the Town is overrun by Zombies and the Swamp has a Black Dragon make its Lair there. There will be missed opportunities as well as Heroic Accomplishments.

Dealing With Overpowered (op) Items, Spells, And Pc's

- What has been given can be taken away.
- Magic Items are easily used up, stolen, broken, confiscated, and the like.
- Disagreeable power (munchkin) gamers can just as easily be poisoned, disintegrated, or fall down a Bottomless Pit.
- Spells can be banned, or modified if need be.
- Some effects that may at first seem difficult to handle, will reveal their weaknesses. For example: Invisibility: The Invisible foe can be covered with water, paint, mud, or dust. Detect Invisibility Spells are available. Animals with enhanced senses can find them. Area Attacks can often hit an invisible Foe.
- Another hard ability for a novice GM to deal with may be Flight. Flying Units are easily spotted and are vulnerable to ranged Attacks. Flyers will also attract the attention of some potentially very strong Flying Monsters.

Clocks And Timers

Timers count Down. The GM has something happen when the Timer reaches Zero, such as: They get Trapped in the room, The Guards arrive, The Volcano Erupts, the Tower Collapses, The Princess drops into the Pit, The Dragon Awakes, etc. The GM assigns a number of Ticks to the Timer. A Tick will go off based on Time (For Example: 1 Tick per Minute) or based on some other event such as: Failing a Skill Check, Killing a Guardian, Allowing another Piece to be added to the Clockwork Relic, For each Crack in the Magic Crystal, etc. Ticks can be added to the timer, representing the event being delayed, such as sticking your finger in the Dyke.

Multiple Characters For Each Player

Most of the Drama in the Game comes from the possibility of your Character getting Killed. This is mitigated by each player playing 2-3 Characters. New Characters in the S&S Ruleset are also quick to make. New Characters can also be easily recruited in Town, on the Road, or even in Dungeons as liberated Captives and Slaves. Players can also Share Characters, so if a Party gets separated, the players can all shift to Characters within one of the Parties until they all meet up again. If a player is having trouble keeping track of more than one Character at a time, the GM can take over, treating the extra Characters more as Followers and Companions of the main Characters. The PC's may want to expand their Entourage of Followers even further.

This can be accomplished by Charm Spells, Hiring Mercenaries, and Recruiting Retainers with promises of Fame, Fortune, and Revenge. It is very possible however, that an Adventuring Party of 40 Members will attract some extra unwanted attention (Skirmishes will be turned into small Wargaming Battles).

Lifespan Of Gaming Groups

Some groups last years, or even decades. Sadly, most fizzle out rather quickly. People start off enthusiastic but quickly lose interest. Some people just don't get along. There will be creative differences, and playstyle differences. People have bad days: You may be boring that day, or irritable, or just not into it. Real life gets in the way: People move away, get sick, get new jobs, new friends.

When introducing new people to your game, keep it light, maybe play for just a couple of hours, with a total of 4 players. After the RPG, you can play a quick regular Board game or Eurogame that you think they might like as a way to break them in gently.

Crafting: 2-d Mapping

The easiest way to create a Dungeon Map. You should already have a small version of the Map drawn out on an index Card or Graph Paper. You will need a 1 inch square Vinyl Game Mat and a Non-permanent

Marker. The marker ink can be wiped off the Mat with a damp cloth. Simply draw in Walls and other Map features. Use Miniatures to show locations of Characters and Foes on the Map. You could use Counters or small tiles to represent things like chests, furniture, pits, stairs, pillars, secret doors, statues, etc. instead of drawing them in.

Ready Made Modules

Most modules can be easily fixed to work with any Rule-System. So if you have or find one you like, feel free to use it in full or in part. Most modules concentrate on a single location, or small area, so your current campaign setting can be easily incorporated. Maps of Settlements are Great. The functions of buildings and Names of NPC's and locales can be readily changed to suit your needs. If you are looking for a Dungeon crawl, practically any premade Dungeon can be made to work out perfectly. First of all, premade Dungeons almost always look really nice. Second, as long as the rooms are numbered and not too many disparate details are written on to the map itself, a room can be anything you want it to be. You fill in the contents: the Traps, Puzzles, Treasures, and Foes to your liking.

Crafting: Making Your Own Gm Screen

Use 2 School folders staples together so that the screen is 3 pages long. A reinforced Central Page with a left and right Flap. To the side facing the Players, fasten some appropriate color artwork to the 3 pages. To the side Facing the GM fasten some useful Tables and Charts from the Combat and Adventuring Rules Sections. If you are anything like me, you have at least 30+ Modules, each with its own GM screen: Art, Adds, and Module Text on the players side and Maps on your side. Some opaque tape can hide the Adds and Text, and you are ready to go.

Crafting: The Joy Of Index Cards

Compact, Tough, Convenient, Multi-purpose. Can be kept in Index Card Boxes. Some things you can do with them:

- Maps of Mini-Dungeons or Dungeon Levels made up of 5 or so rooms.
- Encounter Notes containing NPC and Monster Stats.
- To be used as Map Features directly on the Table. A 3x5 Card easily translates to 3x5 Spaces. Draw in (Birds Eye View) Walls, Doors, Chests, Pillars, Pools, Stairs, Statues, Coffins, Tables, Thrones, Barrels, Shrines, Rubble, and other Room Features.
- Use as Character Record Sheets (its a little tight, but it works).

Combat Rules

Combat Rules

Combat Rounds

In a Combat Round one side gets to attack first, then the other. A Combat round is about 10 Seconds.

Sides

A side may consist of a single Combatant or many. There are usually exactly 2 Opposing Sides though more are possible.

Surprise

If one side is hidden by Stealth or Invisibility, they may try to attack first with Surprise. Roll 1D20 and add the lowest Stealth Bonus of the Attacking Group, then subtract the highest Alertness Bonus of the Group being Attacked. If the total is 11 or more the attackers get Surprise. The side with Surprise gets +2 Attack Bonuses in the First Round. A Surprise Attack can also be referred to as an Ambush.

Initiative

If neither side has Surprise, then each side rolls 1D20. The High Roll attacks first. This order continues for the remainder of the Combat. Each side adds their lowest initiative Bonus to the Roll.

All combatants on the same side make their Attacks Simultaneously. When dealing with the Player Characters, simply go around the table Clockwise.

Combat Round Actions

Below is a list of common Actions that might be taken during Combat.

Combat Round Actions List

- Walk - Move at Normal Speed
- Run - Move at Double Speed. Will Result in Fatigue.
- Hide - Requires Stealth Check
- Lookout - Hard Skill check Modified by Alertness to find Hidden Foe and sound Warning
- Sneak - Move while Hidden. Half Speed
- Disengage - Fighting Withdrawal or Flee
- Hack and Slash - Continued Attack for HTH (No Movement. Get Attack +1)
- Mighty Blow - Continued attack for HTH. (No Movement. Get Damage +1)
- Defensive Stance - Continued attack for HTH. (No Movement. Get Defense +1)
- Aimed Shot - Continued attack for Ranged Attack. (No Movement. Get Attack +1)
- Close to Attack - Move at Normal Speed and Attack
- Charge - Move at Double Speed and Attack. See Charge Rules.

- Hurling Charge - Throw Weapon while Charging. It gets Damage +1
- Sneak Attack - Move while Hidden and Attack.
- Leap Attack - (Pounce) From Above. Attack and Damage +1. If attacker misses he fumbles.
- Change Facing - Free Action/Reaction. Cannot change Facing if Surprised
- Stand Up - Easy Skill Check Modified by Swift. Get -2 per Adj Foe and for Slippery Ground
- Pick up Dropped Item - Easy Skill Check Modified by Search. Get -2 Penalty per Adjacent Foe
- Mount - Or Dismount from Steed
- Battle Cry - Effects last 1D2 +1 Rounds
- Cast Spell - No Moving. Make Spell Check
- Rally - Target Panicked Units in Range. Hard Skill Check Modified by Leadership
- Set to Receive Charge - Requires Spear or Pole-Arm. Attack First after Foe Moves on his Turn
- Go into Overwatch - Requires Ranged Weapon. Attack First after Foe Moves on his Turn
- Feint - Get Defense +2 on Foes next Attack and Attack +2 on your next Attack
- Defensive Stance - Get Defense +4 on Foes next Attack
- Light Fuse - On Gunpowder Bomb
- Apply Poison - One Topical Dose to Weapon Surface
- Rummage - Find specific Item in Pouch, Bag, Sack, Backpack
- Quaff - Drink Potion
- Stop Bleed - Use Bandages. Bind Wound
- Intimidate - Target Foe
- Taunt - Target Foe

Reactions

- There are several situations in which a Character can Act during a Foe's Turn. These usually
- Have a Defensive Nature, or Allow you to attack after a Foe moves but before he Attacks.
- Counterspell - Quickly cast this spell to negate a

- Spell just cast by a Foe before it takes Affect.
- Shield Spell - Before Foe makes attack roll Quickly cast this to increase your Defense.
- Catch Missile - If Foe's Attack does not hit make a Hard Skill Check to grab the object out of
- Thin Air. You must have at least one level of Catch Missile Skill to Attempt this.
- Receive Charge - Charging Foe runs straight into your Weapon. You must have taken Set to
- Receive Charge as your previous Action. You attack after a Foe moves but before he Attacks.
- Fire from Overwatch - Shoot Foe with Ranged weapon after he moves but before he Attacks. You must have taken Go into Overwatch as your previous Action.

Zone Of Control Rule

When engaged with a Foe in HTH you cannot move except to Disengage. Exception: You are 3+ Size Classes bigger than opponent.

Attacking

Combatants for the most part get a single attack per Round of Combat. If they attacked last Round and they are attacking again this Round, and are not moving, this is referred to as a Continued attack. Attack will be with chosen Weapon.

An Attacker picks his target and rolls 1D20 on the Attack Table. The Attacker adds his Attack Bonuses and Subtracts the Targets Defense Bonuses.

The Brawl Rule

This only applies to Humans, Demi-Humans, and Humanoids who are attacking each other. There is 50% (1-10 on 1D20) a Melee Attack will become a Random Brawl Attack instead of using a Weapon in hand. Roll for this before making the attack Roll. See the Random Brawl Table.

Attack Table

1D20:	Result:	Notes:
1	Auto Fumble	Attacker Rolls on Fumble Table
2-3	Fumble	Attacker Rolls on Fumble Table
4-8	Miss	Attack Fails
9	Weapons Locked	Attack Fails; Foe gets Attack -2 next round
10-19	Hit	Attack Succeeds
20+	Critical Hit	Get +4 Damage Bonus

Attack Table Modifiers

Situation:	Mod:	Notes:
Attacker Prone	-2	Lying on the Ground

Situation:	Mod:	Notes:
Defender Prone	+2	-
Attacker Blinded	-6	Both Eyes
Defender Blinded	+6	-
Attacker has Surprise	+2	Unseen, Unknown, Unaware
Attacking from Behind	+2	May be Chasing Defender
Attacker making Flank Attack	+1	From Side
Defender Smaller	-1	2 Size Classes or more
Defender Larger	+1	2 Size Classes or more
HTH Range (Ranged Weapon)	-	Point Blank. Too Close to use Ranged Weapons
Close Range (Ranged Weapon)	+1	Phalanx Long Pikes (2-5 Meters)
Sort Range (Ranged Weapon)	-	Most Thrown Weapons (5-20 Meters)
Medium Range (Ranged Weapon)	-	Short Bow, Javelins (21-50 Meters)
Long Range (Ranged Weapon)	-	Long Bow, Arbalest (51-150 Meters)
Far Range (Ranged Weapon)	-1	Catapults, Ballista (151-400 Meters)
Defender Surrounded	+1	On at least 2 Sides (2-4+ Foes)
Defender Immobilized	+3	Defender unable to Move or Attack
Defender Partially Immobilized	+1	Entangle Attack or Grab
Attacker Partially Immobilized	-2	Entangle Attack or Grab
Defender being Grappled	-	50% you will hit other grappler
Attacker has Longer Weapon	+1	Does not apply to Longer attacks
Attacker has Height Adv	+1	On Slope, Stairs. Looking Down
Attacker on Difficult Ground	-2	Mud, Slippery, Steep Slope, Jagged Rocks
Attacker in Tight Position	-2	Low Ceiling, Narrow Walls
Attacker Reduced Visibility	-2	Fog, Mist, Smoke, Clouds, Dusk, Dust, Snow, Rain
Attacker Fatigued	-1	Exhaustion
Attacker Encumbered	-1	Weighed Down
Defender Good Cover	-4	Ranged Attack by Attacker. Behind Parapet
Defender Partial Cover	-2	Ranged Attack by Attacker. Behind Low Wall
Defender Good Concealment	-3	Ranged Attack by Attacker. Jungle Surroundings
Defender Partial Concealment	-1	Ranged Attack by Attacker. Tall Grass
Defender Moved on last Action	-1	Ranged Attack by Attacker. Foe Running Away
Attacker makes Hard Maneuver	-2	During Swashbuckling type acts: Swinging, Sliding
Defender has Small Shield	-1	Buckler, Target (Defend vs Max 1 Attack per Turn)
Defender has Medium Shield	-1	Round, Kite (Swift -1)
Defender has Large Shield	-2	Wall (Swift -2)

Fumbles

Fumble Table:

Rule of Thumb: People are Clumsy. They have a tendency to fall and drop things. Roll 1D8 on the

Fumble Table (hth Weapon)

1D8	Result:
1	Drop Weapon or Item. Or Weapon Stuck (In Door, Tree, Ribcage, etc.)
2	Weapon or Shield or Item Breaks.
3	Body Part Hurt: Roll on Random Body Part Table.
4	Trip or Knocked Down: Go Prone. Initiative -1 next Round.
5	Disorientated: Do nothing on your next Round.
6	Stagger: Cannot Move next Round and get -1 Defense Penalty.
7	Friendly Fire: Accidently Attack Ally instead of Foe.
8	Injure Self: Roll on Light Wound Table

Fumble Table (ranged Weapon)

1D6	Result:
1-3	Drop Weapon or Ammo. Initiative -1 next Round.
4-5	Weapon or Ammo Breaks. Initiative -1 next Round.
6	Friendly Fire: Accidentally Attack Ally instead of Foe.

Damage

If an Attack hits, it will do Damage. The Successful Attacker rolls 1D20 on the Damage Table. The Attacker

adds his Damage Bonuses and Subtracts the Targets Armor Bonuses.

Damage Table

1D20:	Result:	Notes:
1-4	Superficial Wound	Get 1 Wound Marker. Minor Wound
5-7	Superficial Wound	Get 1 Wound Marker. Foe Rolls 1D6 on Fumble Table.
8-10	Light Wound	Get 2 Wound Markers. Flesh Wound
11-13	Light Wound	Get 2 Wound Markers. Roll on Light Wound Table
14-16	Heavy Wound	Get 3 Wound Markers. Major Wound
17-18	Heavy Wound	Get 3 Wound Markers. Roll on Major Wound Table
19+	Instant Death	Foe Suffers Immediate Gory Death. Mortal Wound

Damage Table Modifier List

Situation:	Mod:	Notes:
Large Weapon	+2	Two Handed. Great Sword. Battle Axe, Pole Arm
Lesser Weapon	-1	Knife, Club, Dart, Heavy Rock
Light Weapon	-2	Shiv, Torch, Stick, Stone, Cesta, Bola
Brawl Attack	-3	Unarmed Strikes, Grappling
No Damage Weapons	xx	No Damage. Usually Entangling. Net, Lasso, Man Catcher
Helmet	xx	All Armor comes with a Helmet (Alertness -2)
Very Light Armor	-1	Leather, Hides, Padding, Quilted, Aketon, Gambeson
Light Armor	-2	Studded Leather, Ring Mail, Piecemeal (Swift -1)
Medium Armor	-3	Chain Mail, Half-Plate, Brigandine (Swift -1 Stealth -1)
Heavy Armor	-4	Scale, Splint, Lamellar (Initiative -1 Swift -1 Stealth -1)
Very Heavy Armor	-5	Panoply, Laminar (Initiative -1 and Swift -1 Stealth -2)
Super Heavy Armor	-6	Full Plate Mail (Initiative -1 Swift -2 Stealth -4)

Wounded Condition

A Unit with more Wound Markers than half their Wound Level gets a -1 to all Rolls. Wound Markers can also be referred to as Wound Counters.

minimum of Armor +1).

Helmet Rule

If you have no Armor except a Helmet get Armor +1.
If you have Armor but no Helmet get Armor -1 (to a

Light Wounds

These take 1D4 Days to Heal on their own. Be careful of Infections.

Light Wound Table

1D6	Complication:
1	Knocked Out (Unconscious And Prone and Drop Weapon) for 2D6 Rounds.
2	Body Part 75% Hurt or 25% Broken.

1D6	Complication:
3	Roll 1D6 on Fumble Table.
4	Dazed: Miss next Attack.
5	Stun: Get -2 to all Rolls for 1D6 Rounds)
6	Bad Scar: Permanent. -1 to Appearance.

Major Wounds

These take 1D4 Weeks to Heal on their own. Most Major Wounds will Cause the victim to be knocked

Prone and miss their next Action per GM. Unless Unconscious or missing a Leg the Character can keep on fighting.

Major Wound Table

1D8	Complication:
1	Broken Body Part: Roll on Random Body Part Table. (Break)
2	Lose 1 Eye. Partial Blindness.
3	Skull Crack: Knocked Out (Unconscious) for 1D2 Hours.
4	Lost Limb: Permanent. Move -4 or loss of Arm or Hand. (Amputation)
5	Bleed: Victim will Die in 2D10 Minutes if Bleeding not Stopped
6+	Break from Blunt Weapon. Amputation from Cut. Bleed from Impale.

Bleeding

Actually stopping a Bleed is quite simple. Bandages and pressure will do. At the beginning of every Round

you start with one or more Bleeds, Roll once on the Bleed Table:

Bleed Table

1D6	Effect:
1	Life Blood Draining Out: Get 1 Wound Marker
2	Not enough Blood to Brain: Pass out (unconscious) for 2D6 Rounds
3	Hazy: Roll on Fumble Table
4	Dizzy: Get -2 to all Rolls next Round
5+	Weakened: Strength -1

Death By A Thousand Cuts

A Heroic Player Character that has as many or more Wound Counters then their Wound Level will die in 2D6 Rounds. They require Healing that will increase their Wound Level to at least 1 to prevent Death. Non-Heroic Foes and Creatures will just die immediately.

Body Parts regenerate in 1D6 Minutes. Broken Body Parts regenerate in 3D20 Minutes.

Burn Damage cannot be regenerated.

Instant Death

Eviscerations, Beheadings, Cut in Two, Crushed Skulls, Heart Impaled, etc.

Harmfull Conditions

Stunned

Often Result of Blunt Weapon Attacks. Character Gets -2 to All Rolls.

Healing

Without any assistance a Character will heal 1D2 Wound Counters per Day. If the Character remains at full rest they will heal an additional 1D2 Wound Markers. It takes 1D8 Days to heal a Hurt Body Part. It takes 6-8 Weeks to heal a Broken Body Part.

Care by a Herbalist will double Healing Rates. Mag-ical Healing can be Instantaneous.

Distracted

Result of Illusion magic, Ventriloquism, Thrown Rocks, etc. The Distracted Character be preoccupied with the Distraction and will not notice other threats or what's going on around them. They are easy (+5) to Ambush or Sneak Past.

Regeneration

Units that can Regenerate Remove 1 Wound Counter at the end of every one of their rounds. Hurt

Blinded

Both Eyes. Darkness. Blinding Powder. Flash Spell. Character gets -6 to all Rolls requiring Sight. Movement Halved or Less. This may be Temporary or Permanent.

Partial Blindness

One Eye Damaged or Destroyed. Character has a Blind Spot and gets -1 to all Rolls requiring Sight.

Chill

From Cold and Freeze Attacks. Move at Half Speed and Get -1 to all Rolls during and 2D10 Minutes after Attack. If Cold exposure continues, the effects of the Chill will Continue with it.

After a long exposure, Hypothermia and or Frostbite might set in to be handled as the GM sees fit. Hypothermia: -3 to all Rolls and save every hour vs Death and Confusion. Frostbite: Save or loose fingers or other extremities.

Shock

From Electrical and Lightning Attacks. Get -3 to all Rolls on Next 1D2 Rounds. The Shocked Character

must Save or be Knocked Out for 1D4 Hours.
Characters in Metal Armor receive no Bonuses from it when facing a Shock Attack.

Burn

From Fire and Acid Attacks. Automatically Roll for Damage again next Turn at Damage -1.

Sickened Or Stench

Severe Nausea, Vomiting, Retching, Coughing, Dizziness. This counts as 2 Sickness Penalties: Total of -2 to all Rolls for as long as it lasts. Usually 2D20 Minutes.

Confusion

Roll 1D10 on the Confusion Table every Round you are Confused. Confused Characters get no Dodge Bonus and are +2 to be hit by Opponents.

Confusion Table

1D10	Actions or Inactions:
1.	Stand in Place. Stare Blankly. Mumble.
2.	Go Prone. Sit Down. Yawn. Moan & Groan.
3.	Move in random Direction at Half Speed.
4.	Drop Items. Remove Clothing. Contortions.
5.	Yell or Ask Questions. Anxious.
6.	Attack Random Adjacent Target. Throw Things.
7.	Laugh or Cry Uncontrollably. Repetitive Behavior.
8.	Jump up and down and Point. Gibberish
9.	Move in random Direction at full Speed.
10.	Play with Object. Write on Walls. Break Stuff.

Madness

Curses Mostly. Like Confusion, but instead of Checking every Round, check every 1D10 Minutes or 1D2 Hours.

Knocked Back

Push. Wind. Mighty Blows. Shield Bash Unit pushed back 1D2 Spaces or More. A Unit pushed this way could get impaled on a Spike or Fall off a ledge. If thrown against a Wall, roll for Damage -1.

Knocked Down

Gust of Wind Spell. Dragon Wings Buffett. Character is Prone. There is a 50% the Character will Drop whatever he is holding. Prone Characters get a -2 to all Combat related Rolls. It takes a full Round to get back up.
He is +2 to be hit by Opponents.

Choke

Choke Hold. Choking Gas. Spore Clouds. Chain. Rope The Character must Save vs Death or be Knocked out for 1D10 Minutes. If Character was knocked out, Save vs Death again or Choke to Death. He is +1 to be hit by Opponents and -1 to all rolls while choking but not yet Knocked out.

Knocked Out

Sleep Spell. Wounds causing Skull Crack. Character completely unconscious, immobilized. This could be for Rounds, Minutes, Turns, or Hours.
If not otherwise stated Foe is knocked out for 2D6 Rounds. He gets no Dodge Bonus and is +3 to be hit by Opponents.

Disarmed

Disarm by Weapon. Disarm by Brawl. Damage Table Result. Target Loses his Weapon. Drops within 1D3 Meters. 1 Round to retrieve. A character can use a regular Weapon based Attack to Disarm an Opponent.
Such an attack does no Damage. Attack -4. If Attack hits Foe Disarmed.

Entangle

If you see the Term Entangled by itself it can mean either Immobilized or Partially Immobilized. The GM rule which is the actual outcome.

Immobilized

Paralyzation Spell. Web Spell. Vine Spell. Grapple Attack Character cannot move. Character still aware of his surroundings. He gets no Dodge Bonus and is +3 to be hit by Opponents. In some cases Character may be able to break free. This may require a Strength Test or Escape Artist Test according to the GM.

Random Body Part Table

1D10	Part:
1	Hand
2	Foot
3	Arm
4	Leg
5	Knee

Partial Immobilization

Grab, Net, Chain, Man Catcher, Pincer Staff. Entangle Attack One or more limbs remain Free. Depending on which ones, the Character may still be able to Move or Attack. Also referred to as being Pinned or Grabbed. He gets no Dodge Bonus and is +1 to be hit by Opponents.

Body Part Hurt

Roll 1D10 to Determine Random Body Part. The Character will get -1 to All Rolls for any Hurt Part. For Legs, Knees, Groin, and Feet get Move -2.
A Hurt Head will also be Stunned for 1D4 Rounds. A Hurt Arm or Hand will give an additional -1 Penalty for all Rolls necessitating that part.

1D10	Part:
6	Head
7	Neck
8	Groin
9	Chest
10	Guts

Body Part Broken

Roll 1D10 to Determine Random Body Part. The Character will get -2 to All Rolls for any "Broken" Part. For Legs, Knees, and Feet get Move -4.
A Broken Head counts as a Skull Crack. A Broken Neck is Instant Death. A Broken Arm or Hand make those parts unusable.
A Broken Chest refers to Broken Ribs. Gut and Groin Damage can be interpreted as internal Injuries. It takes 6-8 Weeks to heal up a Break

Hand gets -2 to all Rolls when using a Weapon or Tool in it. An Injured Chest or Gut gives Toughness -1

Permanent Injuries

Sometimes (25%) a "Break" never quite heals right. The individual is considered to be Lame or otherwise Injured. A Head Injury gives a permanent -1 to all Rolls.
A Lame Leg, Knee, or Foot results in Swift -1 A Lame Arm or Neck gives Strength -1 A Lame Groin gives Dodge -1 and is useless in the Bedroom. A Lame

Alternate Wound Table Results

The Light and Major Wound Tables are best suited for Humans, Demi-Humans, and Humanoids fighting each other with Melee Weapons. Many other situations are possible. For example: A Fire Ball or Lightning Bolt would produce very different results. If a Wound Table produces a result that is wildly inappropriate to the nature of the attack, the GM may simply substitute a different result of his own making. Creative (and Funny) Solutions are Best. If at a loss for Ideas, The GM may simply assign an additional Wound Marker or a roll (at -2) on the Fumble Table.

Monster Fumbles

The Fumble Tables apply poorly to most Monsters. For more Generic Results roll 1D6:

1D6:	Result:
1	Monster misses next Action (Head Stuck in Crevasse)
2	Monster misses next Attack (Loses track of tiny Foes)
3	Monster get Attack -2 to its next Attack
4	Foes get Attack +2 to next attack vs Monster
5	Foes get Damage +2 to next attack vs Monster
6	Monster Knocked Down (Trips over self while giving Chase)

Large Creature Attacks

Large creatures are often unstoppable. Movement and attacks combine into one. They can simply Push into you, Drag you around, Envelop you, Step on you,

with no particular effort. To avoid these types of Attacks Save vs Crush using Swift and Dodge Bonuses and move your Character just enough Spaces to get out of the way.

Disengage

A character may take this action to escape or to gain a better Battlefield Position. This comes in several flavors: -Fighting Withdrawal: Move Backwards at half-speed while facing your opponent. Attacks you make are at -2. Get Defense +1 while Doing this.

-Flee: Move away from Foe at full speed with your back to foe. He may chase you to get the bonus for attacking from behind. You retain your Weapon and shield while Fleeing. -Rout: Having Failed a Fear or Morale Saving Throw you drop your Weapon and Shield and Run away from Danger at Swift +2 until you are Fatigued. Pursuers get +2 Attack.

Dual Wield

The Character has a Weapon in each hand, and attempts to make one Attack with each. The Attacks can be against the Same or a Different Target. Without this Skill, Both Attacks are at Attack -2 and Damage -1.

With the Skill there are no Penalties. Dual Wield Cannot be combined with the Skills of Sweep or Extra Attacks. In Dual Wield the first weapon is usually a Blade of some sort. The Off-Hand weapon is usually a Dagger, but just as often, it can be a Cloak, Torch, or other Improvised Weapon.

Charge Rules

Characters may charge into HTH Combat. This may be combined with a Battle Cry, but not with Ambushes, Surprise Attacks, or Backstabs. They get Attack +1, Swift +2, Damage +2, and Defense -4 for 1 Round. This usually happens only on the first turn of a Combat, However in a lengthy Combat when a combatant is not adjacent to any Foes, he may make an additional charge.

A Combatant who is Fatigued, Encumbered, or has a Hurt or Broken Leg, Knee, or Foot may not Charge. Other Conditions (Difficult Ground) may prevent Charges according to the GM's discretion. If the Defender has a Longer Weapon and sees the Charge coming, he will automatically be able to get an attack in First even if it is out of order.

Mounted Combat

Mounted Combat requires a character have a skill of Ride +2 or Greater. The Mount (Steed) is usually referring to a Horse, however in a Fantasy setting, many other types are Available: Dragons, Griffons, Pegasi, Pterodactyls, Wargs, Unicorns, War-Rhinos, Giant Mastiffs, Giant Bats, Giant Wasps, Giant Spiders,

Centaur, etc. For every level of Ride you have, your mount gets Swift +1 and Save vs Fear +1.

Versus Unmounted Foes you get Attack and Damage +1. If your Mount is Moving get Damage +1 from Momentum.

Underwater Combat

Terrestrial Bipeds move at half speed in Water. Armor gives an extra Swift -2 and Dodge -1. Shields give an extra Swift -1 Blunt, Swinging, Cutting, Slashing, and Slicing Weapons are ineffective underwater. They get penalties of Attack and Damage -3.

Only Thrusting, Piercing, and Impaling Weapons work Properly. These include: HTH: Spears, Daggers, Punch Daggers, Tridents, Forks, Man Catchers, Pincer Staffs, Claws, Short Swords, Spike and Razor Armor Mods, Garrotes, Hooks, Nets Ranged: Thin Javelins, Slender Darts, Spear Guns, All-Metal Bows and Crossbows The Range of all Ranged Weapons is halved.

Dog Pile

Combat Tactic of Smaller races vs Larger ones. A Character may find he is surrounded by a Dozen Goblins or Kobolds who are all trying to Grapple him at once. Treat this as a single Grapple Attack. This combined attack gets Brawl +1 for every 2 Attackers that throw themselves on the Pile. A Successful Break will scatter them all. Assume that 2 Runts can fit into a single space.

Horde Attack

Like a Dog Pile but attackers are using weapons, and are not necessarily trying to grapple. The combined attack gets Attack +1 and Damage +1 per 2 Attackers. If the Attack fails they are scattered.

Weapons And Morale

Skirmish Scale Morale Rules

When and if to make a Morale Check is in the GM's providence. As a rule of thumb, a Check may Be warranted if any of the Starred Conditions on the Modifier List are Met. The Unit making the Check is called the Affected Unit. If the unit makes the Morale Check it may continue to act and Fight as normal. If the affected unit fails the check, it is said to be panicked.

NF Never Fails Morale Checks

Treat a Morale Check as a Saving Throw with the following Modifications:

Morale Check Modifier List

Condition:	Mod:	Notes:
Against Overwhelming Odds*	-2	4 to 1 or More
Affected Unit has Wounded Status*	-1	6+ Wound Counters
Ally Fails Morale Check*	-1	-
Facing Superior Foe*	-2	Immune to Normal Weapons, etc.
50% or More of Allies Killed*	-2	-
Affected Unit is Runt or Smaller	-2	Also Animal Herbivores
Affected Unit is a Coward	-2	Green Troops
Affected Unit is a Hero	+6	Also Giants, Dragons, Angels
Affected Unit is a Player Character	+6	-
Affected Unit is a Fighter	+2	-
Affected Unit is a Mage	-1	-
Affected Unit is Charmed	NF	Or Possessed, Controlled, etc.
Affected Unit is Undead	NF	Also Slimes, Spirits, Swarms
Affected Unit is Elemental	NF	Also Animated Units
Affected Unit is a Demon	+4	Also Monsters
Affected Unit is a Beast	+3	Also Carnivores, Large Animals
Affected Unit is Elite	+2	Also Veterans, Experienced Troops
Affected Unit is Fearless	+/-X	Due to Skill, Spells, Items

Failed Morale Checks

A Panicked Unit must roll on the Failed Morale Check Table:

1D4	Result:	Notes:
1	Rout	Run at Swift +2. Drop Shield and Weapon
2	Flee	Run. Keep Items
3	Fighting Withdrawal	Move Backwards. Half Speed. May Still Attack
4	Surrender	Throw yourself at their Mercy

Notes: The Panic Condition will wear off after 2D6 Minutes.

Rally Check

A Leader may attempt to Rally Panicking Units that can hear him (Medium Range). This is a Hard Skill Check Modified by the Leadership Skill.

Weapon Abilities (optional)

Weapon:	Notes:
Arrow or Bolt	Impale. Variable Range
Bastard Sword	Cut. Impale. If 2-H get Dam +1
Battle Axe	Cut. 2-H. Dam +2. Heavy
Blow Gun	Impale. Dart. Damage -2. Short Range
Bola	Blunt. Dam -2. Entangle. Stun. Short Range Throw
Boomerang	Blunt. Dam -1. Medium Range Throw. Returns to Thrower
Broad Axe	Cut. Tool. If 2-H get Dam +1
Broad Sword	Cut. Impale. Def +1 (Basket Hilt)
Bullet	Impale. (Arquebus)
Crescent Knife	Cut. Impale.
Club	Blunt. Dam -1
Cutlass	Cut. Impale. Armor +1 (Solid Hand Guard)
Dagger	Impale. Short Range Throw. Save vs Death +2
Dart	Impale. Dam -1. Short Range Throw
Flail	Blunt. Ignore Foe's Shield

Weapon:	Notes:
Garotte	Grapple. 2-H. Choke
Great Sword	Cut. 2-H. Impale. Dam +2. Heavy
Hammer	Blunt. Tool
Hand Axe	Cut. Tool. Short Range Throw
Heavy Armor	Blunt. Brawl Strikes Dam -2
Hook Sword	Cut. Get +1 to Disarm or Grab
Hurlant	Blunt. Medium Range. Solid Heavy Sphere Ammo. Knocked Out
Javelin	Impale. Med Range Throw.
Knife	Cut. Dam -1. Impale. Short Range Throw. Save vs Death +4
Knights Sword	Cut. Impale. Attack +1 (Vikings Sword, Arming Sword)
Long Sword	Impale. 2-H. Dam +2. Heavy. Attack +2 vs Heavy Armor
Mace	Blunt. Stun
Man Catcher	Blunt. 2-H. Dam -3. Entangle
Main Gauche	Impale. Dam -1. Save +4 or break Foes Weapon
Maul	Blunt. 2-H. Save vs Knockdown
Morning Star	Impale. Save vs Stun (Spiked Club, Thorn Club)
Net	No Damage. Close Range Throw. Entangle
Pike	Impale. 2-H. Init +3. Long Reach. Heavy
Pole Arm	Cut. 2-H. Impale. Dam +2. Heavy. Init +2. Long Reach. (Halberd)
Powder Blower	Close Range. One Dose.
Rapier	Impale. Dam +1 If Foe does not have Med or Hvy Armor
Scimitar	Cut. Ignore Light Armor (Falchion, Sabre, Tulwar)
Shield	Blunt (Bash). Dam -2
Short Sword	Cut. Impale. Save vs Bleed (Gladius)
Sling Stone	Blunt. Long Range
Small Sword	Impale. Defense +1 (Court Sword, Dress Sword. Light and Quick)
Spear	Impale. Long Reach. Init +1. Med Range Throw. (Blade Staff)
Spiked Armor	Impale. Brawl Attacks. Dam -1
Spiked Shield	Impale (Bash). Dam -1
Spring Knife	Impale. Short Range. Dam -1. Spring Loaded. Fires Blade
Staff	Blunt. 2-H. Defense +2 (Quarter Staff)
Throwing Disc	Cut. Medium Range Throw.
Trident	Impale. Long Reach. Init +1. Short Range Throw (Two Pronged Spear)
War Club	Blunt. Knockback.
War Hammer	Blunt. Save +4 or break Foes Shield or Hemet
War Pick	Impale. Attack -1. Ignore Foe's Armor
War Whip	Entangle. Ignore Foe's Shield.
Whip	Entangle. Dam -2

Using 2-h Weapons One Handed

Get Attack and Damage -2. Exceptions: Weapons with Long Reach Set to receive Charge. These are often braced against the defenders foot, while he holds a sword or shield in the other.

Sweep Attacks

The Sweep skill allows for multiple adjacent Foes in HTH to be Attacked. A Regular size Weapon (Long Sword) will reach a max of 2 Foes. A Large Weapon (Great Sword, Halberd) will reach all adjacent Foes in HTH range.

Thrown Objects And Weapons

A number of Weapons are considered to be in the Thrown Category. These Include: Daggers, Knives, Spears, Javelins, Darts, Hand Axes, Bolas, Small Bombs, Runestones, Flasks, Vials, Nets, Lassos, Throwing Stars, Boomerang, Rocks, Throwing Stick, Atlatl, etc. Some of the Above can also be used as Melee Weapons. If you have Skill in one of these As a Melee Weapon you are also considered to be just as skilled when Throwing it. Thrown weapons listed above will reach Short Range. Javelins and Atlatl will go to Med Range If you have the Skill Thrown Weapon, the Attack Bonus applies to all the Weapons listed above but only when thrown, not when used in Melee.

Damage done by Thrown Weapons are affected by

the users Strength. Most Melee Weapons such as Swords and Battle Axes are not meant for throwing but can be thrown anyway out to Close Range. They get Attack -1 and Damage -1.

Sample Improvised Weapons

All Improvised Weapons get Damage -1. These are Additional Penalties:

- Lit Torch (Damage -1. Burn)
- Hot Branding Iron (Or Fireplace Poker. Attack -1. Burn)
- Lantern (Smashes on contact. Burn One time)
- Cloak (No Damage. If hits Foe gets Attack-2 to Next Attack)
- Flagon (Damage -1. Cold Liquid)
- Broken Bottle (Damage -1. Fragile: If Hits 50% Bottle Shatters)
- Metal Helmet (Damage -1. Can then be Worn)
- Frying Pan (Damage -1. Hot Liquid one time)
- Kitchen Cleaver (Damage -1. Axe Skill applies)
- Kitchen Knife (Damage -1. Dagger Skill applies)
- Thrown Rock (Short Range. Damage -1. Save or be Knocked out for 2D10 Minutes)
- Large Rock (2H. Crush Skull. Dam +2. Attack -1. Drop after Attack. 1 Round to pick up)
- Shovel (Attack -1 unless used 2H)
- Climbing Spike or Caltrop (Impaling)
- Broom (Damage -1. Fragile: If Attack Hits 25% Broom Breaks)
- Length of Rope (Grapple only. Attack +1. Save or 25% Entangle or 25% Disarm or 25% Choke)
- Length of Chain (Close Range. Save or 25% Entangle or 25% Disarm or 25% Choke)
- Splash Foe with Cold Liquid in Face (Close Range. No Dam. If hits Foe loses next Action)
- Splash Foe with Hot Liquid in Face (Close Range. Damage -1. Burn)
- Bar Stool (Damage -1. Fragile: If Attack Hits 50% Stool Breaks. Stun)
- Smack Foe's Head Against Wall (Brawl Grab Maneuver. Stun)
- Entangle Foe in Curtains (No Damage. Entangle)

Firearms

The only available Firearms in Spells and Swords are Matchlocks. These require a lit fuse (Both Ends) to be carried by the Gunner. The Gunner also needs Gunpowder, Priming Powder, Wadding, and Lead Bullets.

They are very Loud when Fired. This ruins stealth but can scare away some Foes. Once Fired it takes 1D4 +2 Rounds to reload the Gun. Damage done by guns are not affected by the users Strength.

All Guns (Hand Cannons) get Attack -1 and Damage +1. Sometimes used in Duels. There are Several types available:

1. Pistol: Short Range. Favorite of Pirates, Some Rogues, and Nobles.

2. Blunderbuss: Short Range. Hits 1D3 Adj Foes. Favorite of Gnome Homesteaders.
3. Arquebus: Long Range. Favorite of Halfling Militias and Some Dwarf Mercenaries
4. Musket: Large Arquebus. Long Range. Found in Human Troop Formations.

For various reasons, Guns are not particularly common amongst Humanoids.

Crossbows

Expensive and complicated to make compared to most Bows. Damage done by crossbows are not affected by the users Strength. Repeating Crossbows take 6 Rounds to Reload once emptied.

They come in several types:

1. Pistol Crossbow: Medium Range. 1 Round to Reload. Damage -1.
2. Repeating Pistol Crossbow: Short Range. 4 Shots/Round. Dam -2. Holds 12 Bolts

Many Rogues like a Blade in one Hand and a Repeater pistol in the other.

3. Light Crossbow: Long Range. 2 Rounds to Reload. Favorite of Orcs and Hunters.
4. Repeating Light Crossbow: Med Range. 4 Shots/Round. Dam -1. Holds 20 Bolts

This is a Favorite of Gnomes and Goblins.

5. Arbalest Heavy Crossbow: Long Range. Damage +2. 6 Rounds to Reload.

The Arbalest is a Favorite of Dwarves and Castle Defenders.

6. Dart Thrower: Short Range. Spring Powered. 1 Round to Reload.
7. Hurlant: Blunt. Medium Range. 2 Rounds to Reload. Solid Sphere Ammo.

Bows & Arrows

The most common ranged Weapons of the Age, for War and Hunting. Some are made in simple process, others require great skill in their Manufacture. Unlike Crossbows and Guns, Damage done by Bows are affected by the users Strength.

For Recurved Bows and Long Bows to reach Long Range requires the Shooter to have At least a Strength +1, otherwise they will only fire out to Medium Range. They come in several types:

1. Short Bow: All races smaller than men (except Elves) are restricted to Short Bows (Medium Range). Favorite of Wood Elves.
2. Recurved Bows: Finely made Bows used by Nomads and Horse Peoples.

(Long Range. Attack & Damage +1). Also called Composite or Reflex Bows.

3. Long Bow: (Long Range) Self Bow, made of one piece of Wood.
4. Flange Bow: (Medium Range) Made of Fish Bone. Can be used Underwater.

Arrows (Arrow Heads) can come in Many Types, the most common being:

- 1. Bodkin (Armor Piercing Spikes: Negate +2 worth of Armor Bonus. Not Toughness)
- 2. Broadhead (Good for Hunting and against Unarmored Foes)
- 3. Barbed (Gets Stuck Good. Will do Damage upon Removal. Used for Fishing)
- 4. Blunt (Target Practice or for hunting small Game)

Slings

Favorite Weapon of Halflings, who by the way, are also great Throwers and Skippers of Stones. Lightweight, Compact, Easily Hidden, They are often kept as a backup by many types of Rogues And Lower Class or Primitive Fighter Types. Even some Priests and Mages will keep one tucked Away. Ammunition consists of Rocks of a certain Size or Manufactured Metal Bullets (Dam +1). Damage done by Slings are affected by the users Strength. Projectiles will sometimes have humorous inscriptions carved into them. They can reach Long Range. Larger projectiles can

be used such as Runestones and small Bombs, But normally only out to Medium Range.

Unarmed Combat
Hand To Hand Randomness

Fighting in Melee can be truly Chaotic. Combatants easily lose Weapons and often An Unarmed Attack presents itself as the best seeming Option. For purposes of your Typical Skirmish Swordfight there is a 50% that every attack made by a PC, Human, Demi-Human, or Humanoid will not be with their chosen weapon but rather, will be a Random Brawl Attack as listed in the Random Brawl Attacks Table. Note that this Table Is very much subject to GM interpretation. For example, If the attacker is holding a Weapon And Shield, some of these attacks may be considered unavailable, such as Grapple Attacks, in which case the GM may substitute those with a result above or below it. Note that 2H requires 2 Free Hands. An Unmodified Brawl Attack is Damage -3.

Random Brawl Attacks Table

1D60	Type:	Notes:
1	Wild Swing	Attack -2 and Damage +1
2	Basic Punch	50% Foe gets Initiative -1 next Round
3	Foot Stomp to Knee	If Hits Foe has Broken Leg
4	Dislocate Shoulder	If Hits Foe has Hurt Arm
5	Groin Shot	If Hits Foe goes Prone and is Distracted for 1D6 Rounds
6	Poke in the Eye	If Hits Foe has Partial Blindness 50% Permanent
7	Thumbs in Both Eyes	2H. If Hits Foe is Blind Permanent
8	Solar Plexus	If Hits Foe Stunned for 1D4 Rounds
9	Break Jaw	If Hits Foe has Broken Head and cannot Speak
10	Foot Stomp	If Hits Foe has 50% Broken or 50% Hurt Foot
11	Jab	Attack +2 and Damage -1
12	Slap	If Hits Foe Stunned for 1D3 Rounds
13	Gut Punch	If Hits Foe cannot Attack Next Turn
14	Choke Hold	2H. Grapple. Attack +1 If Hits Foe Subdued and Choke
15	Bear Hug	2H. Grapple. Damage +1 If Hits Foe Subdued
16	Head Butt	Attack +1 Attacker and Foe Stunned 1D3 Rounds
17	Disarm	No Damage. Attack -1 If Hits Foe Drops Weapon
18	Pommel Strike	No Weapon Bonuses. Damage +1
19	Basic Grab	If Hits Foe is Grabbed
20	Bite	Attack -1 Damage +1. 25% Foe loses Finger or Ear
21	Break Nose	If Hits Foe's Nose is Broken. Appearance -2
22	Black Eye	If Hits Foe Partial Blindness for 1D10 minutes
23	Scratch	Damage +1. If Hits Foe Appearance -1
24	Improvised Weapon	Wall, Rock, Helmet, Bottle, etc. Damage +1
25	Throw Sand in Eyes	No Damage. If Hits Foe Blind for 1D6 Rounds
26	Push	If Hits Foe 50% Knocked Down 50% Knocked Back
27	Shove	Attack +1. If Hits Foe Knocked Down
28	Trip	Damage -1. If Hits Foe Knocked Down
29	Pull Hair	Attack +1. If Hits Foe is Grabbed

1D60	Type:	Notes:
30	Arm Lock	Grapple. If Hits Foe is Subdued and Arm Hurt
31	Finger Lock	If Hits Foe is Grabbed and Hand Hurt
32	Flip	If Hits Foe Knocked Down + Lands on other Side of Attacker
33	Throw	If Hits Foe Knocked Down + Lands on other Side of Attacker
34	Bash in Skull	Damage +1. If Hits Foe gets Skull Crack
35	Basic Kick	Damage +1
36	Elbow Strike	Attacker may make an additional Attack at Attack -1
37	Leg Sweep	If Hits Foe is Knocked Down
38	Knee Strike	This may be declared a Strike or Grapple by Attacker
39	Wrestle	2H. Grapple. If Hits Foe is Subdued
40	Pick up and Throw	2H. Grapple. Smaller Foe or Str +2. If Hits Foe Knocked Down
41	Throat Punch	If Hits Foe gets Minor Wound and Choke
42	Strangle	If Hits Foe Grabbed and Choke
43	Roundhouse Kick	Attack +1 then you get Def -1 until your next Attack
44	Body Slam	Attack +1 Damage +1. If Hits Foe Knocked Down
45	Intimidate	No Damage. Make Intimidation Attempt
46	Taunt	No Damage. Make Taunt Attempt
47	Wink	No Damage. If Hits Foe Misses Next Attack
48	Drag	If Hits Foe goes Prone and is Grabbed
49	Clinch	No Damage. Get +2 Defense vs Next Attack
50	Headlock	Grapple: If Hits Foe Knocked Out
51	Axe Kick	If Hits Foe Dazed
52	Face Claw	If Hits Bad Scar: Permanent. -1 to Appearance.
53	Body Blow	If Hits Broken Rib (Chest)
54	Box Ears	If Hits Foe Dizzy
55+	Opportunity Attack	Pick one Result from this Table

Rules For Brawling

There are 2 basic Brawl Attack Types: Strikes and Grappling. For both types, Brawl Attacks are Damage -3. Strikes are like regular weapon Attacks. They also include all HTH fighting Maneuvers that are not specifically Grapples or Grabs, so this includes things like Shoves, Trips, Disarms, Improvised Weapons, Pommel Strikes, Flips, Throws, etc.

If the Attacker is wearing Gauntlets the Brawl Damage Penalty is only -1. If the Main Attack is a Brawl attack the Attacker may pick any one feasible Attack type listed on the Random Brawl Attacks Table.

Grapple Rules

The intent of a Grapple is to Subdue your Opponent. A subdued Foe is immobilized and Can only act to try to Break the Hold. A successful Grapple attack results in a Subdual. The Subdued Foe may on his next move attempt to break the Hold. This is a Basic Skill Check Modified by Strength and Brawl Skill Bonuses. If the Hold is not broken the Subducer May automatically do one of the following things on his next action:

- 1. Let go. Break the Hold. Set the Defender free.
- 2. Simply maintain the Hold, but nothing more. Or talk to them: Persuasion +2
- 3. Apply Pressure: Automatic Hit. Roll on the Damage Table with Damage +1
- 4. Hurt or Break a Hand or Arm.

- 5. Disarm the Subdued Foe.
- 6. Outright Kill the Subdued Foe: Snap Neck, Suffocation, Strangulation, Dagger through Gap in Armor, etc. The Foe may save vs Death.

Grabs

The Attacker grabs the Foe with One Appendage. This is not considered a proper Grapple, The Grabbed Foe may attempt to Break free of the grip. The means of the Break can Have much more variety than breaking from a Subdual. For instance: Cutting off you own Hair, Cutting Opponents Hand Off, etc. While Grabbed, the Foe cannot move, but the Attacker can drag the Foe around at half speed, if the Foe is same size or smaller. The Attacker gets Attack +3 to his Next attack. The grabbed Foe gets +1 to his next Attack vs Attacker. A Monster that successfully grabs a Foe will maintain the Hold and will then next turn make an attack of a type that would be a logical next step to its attack sequence, such as Bite, Swallow, Squeeze, Sting, or a further mauling (Claws, Talons)

Brawling While Prone

Many of the Brawl Attacks are either impossible or very unlikely while you are prone (or your Opponent) at the GM's discretion. If this is the case, 50% no attack

is possible. 50% substitute the Random Brawl Roll for a Basic Kick or Basic Grab.

Magic Rules

Magic

-There are basically 2 ways to generate and control Magic.

- 1. The first is through the direct casting of Spells.
- 2. The second is indirect and can be either safer or much more dangerous:
 - The safer way is to use Relics and Magic Items.
 - The more dangerous and powerful Method is to Summon Spirits, Elementals, Demons, and other

- creatures who will cast Sells for you.
- Read the Sections on Summoning to better understand how this is done.

Cost Of Casting A Spell

Casting a Spell costs 1 Power Point (PP).

Spell Checks

Everytime you are casting a Spell you must make a Spell check. Magic is a fickle thing, and asking favors from a God even more so. Roll 1D20 on the Spell Check Table.

Spell Check Table

1D20	Result:	Notes:
1	Auto Failure	Roll on the Spell Failure Table. Natural Roll of 1.
2-4	Spell Failure	Roll on the Spell Failure Table.
5-6	Spell Success	Exhaustion: Caster gains a -4 Fatigue Penalty.
7-8	Spell Success	Unconscious: Caster Knocked out for 1D4 Hours.
9+	Spell Success	No further Complications.
20	Auto Success	Natural Roll of 20.

Spell Check Modifiers

Situation:	Mod:
Caster Wounded	Per Wound Penalties
Caster Confused	-4 Penalty
Caster Distracted during casting	-3 Penalty
Magical Focus Item used	+1 Bonus or More
Spell Cast from Magic Item	+4 Bonus
One PP Spent by Caster	+4 Bonus
Casting from Book an unknown Type of Magic	-8 Penalty (or Scroll)
Casting Lightning Bolt during a Storm	+2 Bonus (Environmental)
Casting a Healing Spell on Holy Ground	+2 Bonus (Locational and Alignment)
Per 7 Levels known in Magic Lists	+1 Bonus

Types Of Magic

Examples: Fire Magic, Healing Magic, etc. These are also known as Lists. A player that knows at least one Spell in a Type of Magic is said to know that Type.

Spell Success

The Spell produces the intended affects.

Spell Failure Table

1D20	Result:
1-5	Fizzle: Spell Does not Work. Lose 1 PP and use of that spell for the Day.
6-9	Spellburn: Fizzle plus Caster Suffers 1 Wound Marker.
10-13	Missfire: Wrong Target(s). Wandering Spell. Ricochet.
14-17	Chaos: Spell does something Weird, Unexpected, or otherwise Damaging.
18-20	Corrupt: Permanent: Caster Mutated, Marked, Tainted, Changed, Magic Signature.

Divine Disapproval

Priests get Disapproval instead of Fizzle. They have angered their God(s). In order to get the Spell back,

they must repent. Repentance may include: Prayer, Fasting, Rituals, Self Flagellation, Alms, Sacrifice, Hair Shirts, Pilgrimage, Crown of Thorns, Quest, Confession, Self Mutilation, etc. Punishment can be for days, weeks, months, or even years.

Power Points (pp)

Calculating Total Pp

These are the Total number of PP the Character has. Power Points are Generated in 4 Ways: (To get Total PP add all of these together)

1. Total Level in all Magic Types Known (For Example: Carl knows Wizardry = 5 and Illusion = 3 so total is $5 + 3 = 8$)
2. Certain Magic Items give a PP Bonus (For Example: Carl has a Ring that provides PP +1)
3. Number of Magic Skills known by Caster (1 PP each no matter what the Skill Level) (For Example: Carl knows Arcane Lore and Raw Power so total is $1 + 1 = 2$)
4. Bonus: Per 7 Levels known in Magic Lists (For Example: Carl knows Spell Lists at Level 8 so he gets PP +1)

-Carl has a Grand Total of $8 + 1 + 2 + 1 = 12$ PP

List Of Magical Skills

Raw Power, Wild Magic, Arcane Magic, Faith, Piety, Astrology, Planar Lore, Alchemy, Rune Lore, Wisdom, Meditation, Fortune Telling. These all contribute to generating PP.

Power Point Uses

A Power Point can be used by a Spell Caster to cast a Spell or to Enhance a Spell he just Cast in one of the Following Ways as permitted by the GM:

Power Point Uses List

1. Cast a Spell the Caster already knows.
2. Double Duration of Spell being cast
3. Spell Does Damage +1
4. Foes Save at -4 vs Spell
5. Get +4 to the Spell Check Roll
6. Double Number of Adjacent Foes Affected by Spell
7. Increase Quality or Quantity of Summoned Creatures
8. Improve Quality of Information Received by Spell
9. Increase Number of Allies Affected by Spell
10. Increase Bonuses or Penalties Delivered by Spell
11. Expand possible Targets: Self to Allies. Allies to Foes
12. Increase Range of Spell one Step (Touch - Short - Medium - Long - Far)

Recovering Power Points

Get all your PP back after an 8 hour Sleep. A one hour Short Rest will restore 1 PP. The Short Rest must

be in the FORM of Sleep unless the Player is an Elf or has the Meditation Skill.

Important Note: Getting PP back will NOT reset how many times a particular Spell can be cast per day.

Spell Discussion Topics

Spell Lists Known

- Unlike Skills, Spells are not learned individually.
- Instead, you learn a level of Magic in a List that contains that Spell.
- For example: Instead of Learning the Light Spell, what you are actually doing is learning one level in the Solar Magic List.
- If you have one or more levels in a list, you know and can cast any spell on that list (If you currently have the PP to do it).

Max Number Of Magic Types Knowable By Caster

- For simplicity this is known as the Prodigy Number.
- This starts at 3.
- If the Caster has the Magic ATTRIBUTE get +1
- If the Character has either the Faith or Arcane Magic SKILL get +1
- If the Caster has the Magic Prodigy ADVANTAGE get +1
- Some Relics allow their owners to know another Specific List.

Spells Per Day

- A Spellcaster can cast each spell he knows up to once per day. (He will run out of PP long before casting every spell he knows.)
- Exception: Those marked with ** can be cast 3x/Day.
- Exception: Those marked with * can be cast 7x/Day.
- Some spells imply greater time periods than 1 day in between castings: Focus and Ritual spells in particular.

Focus Spells

-Focus Items or Creatures are summoned/created by certain Spells. You can't replace a Focus Item or Focus Creature until the current one is destroyed.

Ritual Spells

Ritual Spells often have very special requirements such as:

1. Expensive or Incredibly Rare Components.
2. Long Incantations.
3. Casting at special times of the year. (Conjunctions, New Moons, Eclipses)
4. Multiple Casters working together. (Circles, Covens, Covenants)

- 5. Multiple Castings.
- 6. Casting at special Locations. (Groves, Holy Sites, Ley Lines, Nexus Points)
- 7. Lots of Research. Knowing Rare Lore such as True Names. Deciphering Ancient texts.
- 8. Human or Monster Sacrifices.
- 9. Extra PP used up during Casting. (May need a large Source: Battery, Rifts, etc.)

Limits Of Magic Item Usage

- Many Magic Items with Spell-like effects can be used multiple times Per day according to their description.
- A Scroll contains 1 Spell that is used up when cast.
- Some Magic Items allow you to Store Spells. The Spell is used up when cast.
- A Caster may attempt to cast a Spell directly from a Book (Tome, Grimoire). If he does so he gets -4 to his Spell Check roll.
- Some Items have Charges. Each casting uses up a Charge. Recharging requires the use of certain Spells, or other Items.

Creative Spell Usage

Players will often think of alternative uses for Spells to solve problems at hand. The GM should allow for this at his discretion. Examples using Ice Mage Spells: Using the Wall of Ice Spell to create an Ice Sculpture, or a Slippery Floor, or Freeze Over the surface of a Lake. The Players may wish to Tone Down the Power of a Spell. For example using the Blizzard Spell to create a gentle Snowfall or a Winter Wonderland Or using the Ice Shards Spell to create a Harmless but Distracting Barrage of Snowballs.

List Of Curses

1D30	Curse:	Notes:
1	Vanity Curse	In love with your own image. Save or Stare for 1 Hour.
2	Bad Luck	Get -2 to all Rolls
3	Lose Voice	Communication Difficulties
4	Clumsy	Missed Attacks always result a Fumble
5	Misfortune	If something bad is going to happen, it targets you
6	Laughter	Inappropriate Uncontrollable Laughter
7	Illness	Roll once on the Disease Table
8	Jinx	Ally suffers Bad Luck or Misfortune
9	Warts	Appearance -3 Penalty
10	Obese	Move, Dodge, and Appearance -2
11	Lycanthropy	Change into a Werewolf
12	Vampirism	Change into a Vampire
13	Madness	Confusion Penalty

Specialization

- If you have 2+ levels in a list, Spell-Fires on this List become Fizzles.
- If you have 3+ levels in a list, you may, when casting a Spell from this list, apply any one PP effect to that spell. (Example: double duration)
- If you have 4+ levels in a list, Miss-Fires on this List become Spell-Fires.
- If you have 5+ levels in a list, you may, when casting a Spell from this list, apply any two PP effects to that spell. (Example: double duration and increased range)
- If you have 8+ levels in a list, Chaos Results on this List become Miss-Fires.
- If you have 9+ levels in a list, you may, when casting a Spell from this list, apply any three PP effects to that spell. (Ex: double dur, incr range, Damage +1)

Focus Items

-Certain Spells will allow the caster to construct a very specific Magic Item. The item created is unique. The Caster may make a replacement if the Item is destroyed, but he cannot make more than 1 copy of the Item.

-The primary example of this is the Witch: She can have 1 Familiar, 1 Cauldron, 1 Crystal Ball, and 1 Broom.

-Note that even though it is a living creature, and it is summoned not Crafted, a Familiar are also considered to be a Focus Item. This also applies to Spirit Totems.

Curses

Magical Maledictions. Curses are usually Permanent. Curses that affect more than one individual are called Hexes.

Breaking a Curse often requires a difficult Quest.

1D30	Curse:	Notes:
14	Eternal Sleep	Break Curse to Wake up
15	Poverty	Lose all Wealth, Valuables
16	Haunting	Ghosts, Shades, Specters, Apparitions, Haunts, etc.

21	Slimy	Dripping. Easily Tracked. Appearance -4. Escape Artist +4
22	Hairy	Abnormally Hairy. Appearance -3
23	Sex Change	Become opposite Sex
24	Color Change	Something Unusual: Green, Purple, Blue, etc.
25	Untrustworthy	Others do not trust you. Social Interactions -5
26	Obsession	GM picks what Character is obsessed about
27	Transformed Body Part	Atrophied, Clawed, Oversize, Tentacle, etc.
28	Age Gain	Turns very Old
29	Age Loss	Turns into Baby
30	Blindness	Blindness Penalty

Enchanted Items

These are created by the Enchant Item Spell. Classes that start with the Enchant Item Spell include the Enchanter, Artificer, and Rune Master. These Enchantments last only 1 Day. The nature of the Enchantment depends on what Item the Spell Caster is Targeting.

Enchanted Items List

1. Give Weapon Attack +1 and Damage +1
2. Give Weapon Attack +2 or Damage +2
3. Give Armor Suit Armor +2
4. Give Boots Swift +2
5. Give Shield Defense +2
6. Give Cloak Stealth +3
7. Give Arrow or Bolt Attack +5 or Damage +5
8. Give Saddle Ride +2
9. Give Ring Saving Throw Rolls +2
10. Give Amulet 2 Power Points

Lost Spells

Some Spells are Forgotten, Unknown, or Lost to Time. Some Spells are not really Lost, they are just hard to learn or find. Assume Gods and some other immortal Casters have full access to this list.

Through Arduous Research or the finding of Rare Tomes, they can be rediscovered. A partial list of such rumored Spells includes:

- Resurrect Spell (25% the Target cannot be brought back and never will again)
- Eternal Winter Spell (Entire Kingdom Afflicted. Chill)
- Fire Storm Spell (Large Area. Set a Castle Ablaze. Save or Damage +1. Burn)
- Blight Spell (Entire Kingdom Afflicted with Dead Plants)

- Plague Spell (Entire Kingdom Afflicted with Disease)
- Hex Spell (Entire Kingdom Afflicted. Various Effects: Speaking in Tongues, etc.)
- Flood Spell (Can Inundate an entire Kingdom)
- Multiplier Spell (Target Spell is x100. Ex: Animate Spell will animate 100 Swords not 1)
- Maelstrom Spell (Long Range. Large area. Dam +1. Knock Down Foes. Wreck Structures)
- Conjure Building Spell (Inn, Castle, Tower, etc. Only 1 can exist at a Time)
- Whirlpool Spell (Long Range. Ship must Save or be Sucked Down)
- Earthquake Spell (Collapse Tower or Castle Wall. Those nearby Save or Roll on Dam Table)
- Divine Intervention Spell (The Target God is summoned and will actually Show up)
- Permanency Spell (Lost. Makes Durations Permanent)
- Meteor Swarm Spell (Lost. Army, City, Fleet Killer)
- Volcanic Eruption Spell (Lost. Army, City, Fleet Killer)
- Exchange Bodies Spell (Lost)
- Wish Spell (Lost)
- Miracle Spell (Lost)

The Art Of Summoning

- Summoning is a 3 part process.
- The First part is Summoning the Target Creature.
- The Second part is Protecting the Caster from the summoned Creature.
- The Third part is Compelling the summoned Being to Fight or Cast Spells.

What Can Be Summoned

- Anything can be Summoned.

- Any Creature off the Monster List can be Summoned.
- It will not be a specific creature unless a true Name is known.
- The ones we are most interested about here are the Creatures who are intelligent, Who are most likely to break free, and who are casters in their own right.
- These include: Powerful Spirits, Guardian Spirits, Demons, Devils, Elemental Spirits, Alien Mages, Vengeful Spirits, Horrors, Paradox Spirits, Banshees, Liches, Dragons, Dragon Spirits, Storm Spirits, Abominations, and Chaos Spirits.

Pentagrams

- If the intention is to summon a Combatant, the Summoner cannot cast a Pentagram on it.
- If there is a Pentagram, Either the Creature will be trapped within it, or the Caster will put himself inside it where he will be protected.
- Pentagrams are Force Fields that will prevent a creature from attacking the caster that tried to summon it.
- Pentagrams are Ritual Spells (2D2 Hours to Draw) and Calligraphy +5, and so must be cast way before the actual Summoning.
- The Caster can create several Pentagrams. (Limited to The Prodigy Number)
- Pentagrams are used for Summoned Spell Casters, not Combatants, as their Spells and Attacks will not penetrate the Pentagram.

Failed Spell Checks When Summoning

Evil Creatures will be Mad. If there is no Pentagram, they will immediately attack the Caster of the Summon Spell. If the Caster is missing, the creature will go on a rampage and attack everyone nearby (in the same room). If there is a Pentagram, they will try to break the Pentagram.

Compulsion

- At this point the Summoner can designate his guest to be either a Combatant (Or undertake some more complicated Mission) or use him as proxy for Spell Casting.
- The Combatant will immediately start Fighting.
- A Proxy Spell caster must either be compelled by a successful act of Social Persuasion or a Charm, Dominate, or Control Spell.
- Note that the Summoner can still target a Summoned creature within a pentagram with Spells. Banish Spells get a Spell Check at +8.

Summoned Combatants

- Most Summoned Creatures will fight for a single Combat and then return to Wherever it was they came from.

- Generally the methods of their attacks are unspecified. It is simply presumed that they either make physical attacks or just fight to the best of Their ability to kill their intended targets.
- However this can be modified to specify both The attack Modes (Grapple instead of Bolts) and the intention (Entrapment instead of Death).

Summoned Spell Casters

- Up to every other round, the Summoned Proxy Spell caster can cast a Spell it knows.
- If there is no mention of it in the Bestiary give the Creature 1D6 +9 PP.
- When it gets to zero PP, the Creature will immediately Attempt to break free.
- Proxy Spell casters can only cast spells at the request of their Summoner. They do Not decide what Spells to cast.

Breaking Free

-If a Combatant is fighting something that is immune to it, it will try to Break Free. A Proxy Caster will try to break free every 1D6 +9 Minutes. A Creature who breaks free will immediately attack his Summoner.

Super Powerful Beings

-Aside from Demons and Devils, Creatures such as Sphinx and Djinn can also be summoned. Depending on their personality and Mood they may or may not be Helpful.

-Creatures of Good Intent: Angels, Devas, Cherubs, Archons, Ancestral Spirits, Friendly Ghosts and others can also be summoned. They will resist non-good casters as much as possible. Good casters they are much more likely to assist or at least not do harm to.

-Entities such as Kaiju, Eldrazi, and Godlings and Gods can also sometimes be summoned. These require long and costly Rituals. These Beings cannot be controlled by the Caster. They will act according to their own will once they get here.

Types Of Magic

Types Of Magic = Magic Lists

Notation

- * This Spell can be used 7x/Day
- ** This Spell can be used 3x/Day

Air Magic

- Gust of Wind Spell* (Long Range. Knock back Arrows. Foes go Prone. Lasts 1D4 +1 Turns)Tornado Spell (Like Storm Mage)

- Disintegrate Spell (Foe, Item, Door. Save or be Destroyed. Medium Range)
- Scroll Spell (Imbue a Scroll with a Spell. Requires Special Inks and Parchment)
- Wizards Eye Spell (Floating Eyeball. Roams around. Caster can see through it. Lasts 1 Hour)
- Unseen Servants Spell** (2D6 for Light Housework. Same Room. Distract. No Attack. 1 Hour)

Skills And Saves

Saving Throws

Unlike premeditated Skill Checks, Saving throws are Reactions to particular Magical Attacks or Life threatening Situations. In some cases GM may decide to handle these as Skill Checks. Roll 1D20 on the Saving Throw Table.

Saving Throw Table

1D20	Result:
1-12	Failure
13+	Success

Note: a Natural roll of 1 is always a failure and a Natural roll of 20 is always a success.

Save Modifiers

Humans get to reroll 1 Failed Saving Throw per Day
Dwarves get +4 vs Poison, Charm, Cold, Acid, Smells, Crushing Traps
Gnomes get +4 vs Mechanical Traps, Lies, Earth type Magics
Elves get +4 vs Disease, Paralyzation, Sleep, Aging, Fairy Magic
Halflings get +4 vs Death, Madness, Missiles, Drain, Blade Traps
Fighters get +4 vs Fear, Petrification, Breath, Gaze, Blindness,
Swallow Priests get +4 vs Control, Curses, Confusion, Polymorph,
Fire Rogues get +4 vs Falls, Blasts, Illu-

sions, Capture Traps
Mages get +4 vs Spells, Fire, Rods, Staves, Wands, Scrying
Monsters get +X to all Saves, where X = their Total Armor Bonus

Skill Checks

- Players will encounter many non-combat situations requiring Skill Checks.
- All Classes will start with a few non-combat Skills.
- Note that a number of primary Combat Skills such as Strength, Toughness, And Dodge can be used as Skill Checks in certain Situations.
- Roll 1D20 to make a Skill Check:
- A Roll lower than the Target Number indicates outright Failure or a partial (Mixed) Success.
- A Roll that is equal to or higher is a Success.
- A Natural roll of 1 is always a failure.
- A Natural roll of 20 is always a success.

Skill Check Table

Difficulty:	Modified Roll required to Succeed (Target Number)
Easy	5
Moderate	10
Hard Skill	15
Heroic	20

Skill Check Terminology

- The proper Terminology for describing a Skill Check:
 - Example 1: Make a Hard Skill Check Modified by Leadership
 - Example 2: Make an Easy Skill Check Modified by Swift

Modifying Skill Check Rolls

- Levels in a Skill will add to the Roll.
- Some Attributes will add to a Skill Roll.
- Some Spell effects and Magic Items will add to a Skill Roll.

Skill Failure Interpretations

- Examples of Bad results (Mishaps):
- You were crafting something and it breaks.
 - The Seduction went poorly. You won't get another chance.
 - They Catch you in an Obvious Lie.
 - You attempt to jump the Chasm but fall in.
 - You burn the Turkey in the Oven.
 - You totally do not see the Poison Needle trap.
 - You try to Bend the Iron Bars of the prison, but they won't budge.

Skill Partial Success Interpretations

The GM may allow for this as a way to mitigate a Failure result. The Attempt succeeds or can be retried

but at a cost. The character must now deal with a troublesome Condition or Complication such as:

- You don't know the Lore off the top of your head, but you can research it.
- Fool some of the people some of the time.
- You jump the Chasm and barely catch the Ledge. Another Climbing or Strength Check is required to pull yourself up.
- A Work in Progress: Several more Craft Checks required to build the item.
- You fiddle with the Lock but you hear the guards approaching. You will have To Hide and try again later.
- You notice the Needle trap a second too late. Make a Dodge check to Avoid the Poison Needles flying up at you.
- You make a Strength Check and are able to Lift the Heavy Gate, but you strain your Back in the Process

Skill Success

You get it on the first try. You know your stuff.

Contested Skill Tests

This is where 2 Individuals are directly struggling over a single result. Lets say they are Haggleing. One Character has Haggle +5. The other Has Haggle +3. Both roll 1D20. The first Characters adds +5 to his roll. The other Character adds +3 to his roll. The Character with the higher Total Wins the Contest.

Detection Type Skills

Skills used for Discernment, Perception, Observation:

- The most noticeable of these is the Search Skill. It is the bread and butter of Dungeon Crawlers. Search is used for finding Traps, Secret Doors, and Hidden Treasure.
- The Alertness Skill is very much combat related and is used for detecting Foes, Hidden or not, in any environment.
- Herbalism and Mycology are specialized. They are used to find and identify Useful/Magical Herbs and Mushrooms, usually in Wild Settings.
- The Track skill is used to find Men and creatures by following their trails.
- Woodcraft and Survival Skills have a pathfinding component where the Quickest, easiest, and safest Route is sought.
- The Investigation Skill is used to find Clues, and then piece them together.

Random Npc Disposition Table

1D6	Attitude:	Modifier:
1	Hostile	-2
2	Skeptical	-1
3-4	Neutral	-

Social Skills

A typical Roleplaying session may involve several combat skirmishes. It is also inevitable that Players will meet NPC's and Monsters who would rather Talk than Fight. Combat rules can become highly detailed. Likewise, Negotiations and acts of Persuasion can also be more complex than a simple Skill Roll. Below is a list of Skills/Abilities that can affect the outcomes of prescribed Social Interactions: Appearance, Jest, Seduction, Haggle, Etiquette, Streetwise, Diplomacy, Carousing, Disguise, Guile, Preach, Leadership, Debate, Inspiration, Intimidation, Interrogation, Gossip, Intrigue, and Taunt

Persuasion

After dealing with Attitude Adjustments, ultimately the players will have to make a roll to persuade the NPC to give them what they want. This could include: Information, Secrets, Lore, Rumors, Access, Favors, Money, Help, Reduced Prices, Something for Free, To Borrow or Have an important Object, Guidance, Directions, Release from Imprisonment, A Vow, A Promise,

- The Maze skill is used to find the exit or locations within a Labyrinth.
- The Puzzle skill is used to figure out a puzzle that is delaying the players.

Social Interactions

Role Playing is not Method Acting. Dice rolls are a valid way to resolve a Social Encounter.

Npc Disposition

This describes the NPC's opinion of the Characters. It will not be Obvious Persuasion Rolls will be modified by this Initial Attitude. A successful Insight Check will reveal the Disposition of an NPC. The Characters can try various things (Checks) to improve this Initial Reaction.

For example: Carousing, Jestng, Performing, Gifts, Streetwise, Etiquette, etc.

1D6	Attitude:	Modifier:
5	Open	+1
6	Friendly	+2

Employment, Recruitment, Gold, Skipping the Line, etc.

Persuasion Rolls

The PC has to determine which Social Skill he is going to use to try to Persuade the NPC. This requires some strategizing to pick the most appropriate one. For example: The PC could be using Intimidation to Threaten and Shake-down the NPC. The PC uses Streetwise to show the NPC they have much in Common. PC uses Jest to Lighten the Mood and win the day with Wit. The PC uses Gossip as a way to share not so Trivial Information in a Casual way. The PC uses Etiquette to impress with the right combination of Manners. The PC uses Guile to get what he wants using a carefully built structure of Lies. The PC uses Intrigue to weasel his way into a Situation. The PC uses Interrogation to Force the NPC into telling what he knows. The PC uses Haggle to get a better price. The PC uses Disguise to Trick an unsuspecting NPC. The PC uses Seduction to Distract the NPC or Lure them away. The PC may use Inspiration to get a group of Crusaders to join them on their Quest.

Modifiers To Persuasion Rolls

Mod:	Example:
+2	Bribery (A Good Bribe or simply a fair compensation)

Mod:	Example:
+4	Leverage (A Favor Owed. Family Ties)
+6	Blackmail (Threaten to reveal a Secret)
-8	Caught in a Lie
-2	Disturbing Appearance
+/-	Unknown NPC Motivations
-6	Using an inappropriate Social Skill

Persuasion Impossible

Some Guys just cannot be negotiated with. Having a Theological Debate with the Evil High Priest is not going to get him to change his evil ways. You may succeed in Distracting him for a Moment (Go for the Kill!) but that would be all.

Experience Rules

Character Progression Via Adventuring

Unlike many games, Characters in S&S do not have class Levels.

-Most Individual Skills however do have Levels that can be improved upon. (Note: Some do not: They are one Shots: either you have them or you don't).

-Some Skills and Abilities are learned relatively quickly during the Intense life and Death Antics of Adventuring and Dungeon Crawling.

-So for instance, in the last session the GM notices that a surviving Character spent most of his time Looking for Traps, Fighting, and Hiding. As a Reward, the

GM gives him Search +1, Stealth +1 and Long Sword +1 (Attack Bonus). - Most skills are improved incrementally. You get +1 not +2 at a time.

-In General, most Skills cannot exceed a total of +5 and a few hover lower than that such as Strength at +3 and Toughness at +4.

-Many Skills and Abilities require both Experience and Training to advance all the way to the max of +5. Tutors can make for interesting NPC's.

-Other Skills are quickly learned by Adventuring. These include: Climbing, Swimming, Alertness, Shield, Heavy Armor, Hagglng, Carousing, and Swiftng. - Mages can sometimes learn a Spell quickly if they see it cast up close during a fight and then have time to study a written copy of it found in a Scroll, Tome, or Spell Book.

Character Progression Via Training And Non-adventuring Experience

A Character can also learn Skills, Abilities, and Spells by Training.

-This is usually much slower and more expensive than Level gains through Adventuring. However, there are many Skills you can just not learn in a Dungeon. There are few opportunities to practice Dance or Study Geography in the Underworld.

-Training also has its limits. Combat skills can rarely be increased beyond +3 by this method. Most

Skills require an experiential component to reach levels +4 or +5.

-For example: A Mage may require 8 years of Class-room and Library study to get to Arcane Lore +4, but to get to +5 might require the actual act of visiting another Dimension or Three to get a true understanding of what is out there.

-Learning a Spell could take 1-2+ years by Study alone.

Availability Of Starting Skills

So lets say a Character is trying to get to Attack +5 with Long Sword. They will undoubtedly notice that many of the Character Classes have Starting Skills such "All Weapons +1" or "Blades +1" or even "Swords +1". All of these Starting Skills include Long Sword Skill in addition to many other Weapons. However, many starting skills like these are not available once classes have been Chosen, So the Player is stuck learning Long Sword at +1 increments.

The more levels a player has in a skill, the more Experience and Training he'll need to get to the next level. Figure double the time, expense, and effort. The GM will have to determine which Starting Skills (especially Combat ones) are available after the fact and in what situations.

Beginning And Unlikely Heroes

-You may wish to start a character as a young, up and coming, inexperienced individual, not a Full Fledged Hero. They would have fewer Skills and Spells and Skills at lower Levels. They would have titles such as: Page, Apprentice, Squire, Adept, Disciple, Acolyte, and Student.

-You may also wish to recruit civilian types as adventurers. This would include individuals that may be older but have few Adventuring type Skills such as: Farmers, Shepherds, Fishermen, Cooks, Stable Hands, Laborers, Scholars, and Craftsmen.

Multiclassing

-A Class (or Career type) is basically just a collection of Skills. If a Character has some or all of those skills, he can basically pass himself off as a member of that class. Some skills require years of study and practice to develop so this may not always be quick or even desirable goal.

-Individuals who lack the necessary skills or trap-pings are referred to as Charlatans, or simply as inept examples of their profession.

Qualitative Experience

- Instead of giving out 5XP or 1,500XP at the end of a session, like in many Game Systems, the GM and players Should make a record of what Skills were used.
- For Example: In this Session Nine Fingered Pete the Thief killed two Orcs with a Dagger, Lied to a Guard, Courted a Tavern Wench, Caroused in a Tavern, Lost at Gambling, and Pickpocketed a Nobleman.
- It doesn't matter if the attempt was a success or failure, what matters is that the Action had consequences. Sometimes we learn more from our mistakes.
- The same also Applies to Spellcasting. The GM will award Skill and Magic Type level advancements based on these qualitative records.

Improving Social Class

Improving one's social class requires some combination of Heroic Actions, Wealth, Luck, Timing, Political Maneuvering, Recognition, Acceptance, Divine Intervention, Magic, Connections, and oftentimes Treachery, be it subtle or outright. Each of the Four Class Archetypes: Fighter, Mage, Rogue, and Priest follows a different path to Worldly Fame And Fortune. The Leadership and Governance of populations will surely change the nature of Your Campaign. Players may even wish to avoid it. Eventually though someone caves. The Lure of Worldly power and influence is too great. At this point, skills like Politics, Intrigue, Administration, Etiquette, Administration, Strategy, Leadership, Logistics, and Guile will start to become more important and the rules in the War and Politics Section will become a much more prevalent part of the Game.

Progression As An Imperial Agent

Agents gain Military Ranks much like Soldiers do. Successfully completing Field Missions is the quickest way to advance. Agents can give orders to lower ranking Soldiers and have the power to commandeer equipment, positions, and operations. Higher Ranking Agents can lead teams of lesser Agents and Soldiers. As rank increases, they are given more responsibility and authority as well as access to the War Rooms and Secrets of their Peers. At this point, they can be found directing major operations and assigning Missions to multiple Teams of agents. They can also request Desk jobs where they are a Department Head at one of the Academies. Above that they may become Academy Controllers or even make direct reports to the Senate or the Emperor Himself.

Feudal Noble Birthright Table

Knights And Nobles Feudal Progression

-Knights start as lower class Nobility in a Feudal Society. They start off as Pages and then become Squires in service to a knight. Knighthoods can be purchased or awarded.

-Some own no land. Un-landed Knights are usually in the Service of a greater Noble as part of his personal Army. Some are Crusaders, going to the nearest or worst conflicts with Evil Invaders. Some are Knights Errant or Quest Knights, seeking adventure.

-Templars and Hospitalers defend the strongholds and carry out the duties of their Orders.

-Some Knights are Landed Knights. This is often a grant of Vassalage by a Count, but can also be bought. The Landed Knight has a small Fortified Manor house and will be in control of one Village (Sometimes more).

-The Landed Knight will nominally be in control of all of the local fighting forces, such as the Militia, and any Levied Troops. If he is wealthy he may retain up to a dozen or so mercenary Soldiers. Also the Count may install a small garrison that includes a handful of Non-landed Knights, to either spread his authority around or protect a vulnerable area.

-The Next step up would be to become a Count. A Count conveniently owns/controls an area the size of a Hex. This can be a grant in return for loyal service, or more likely a gift to a Relative or an inheritance. The Hex may contain scores of Settlements, as well as mines, and other Resources. He has the power to Tax the populace and Levy Troops. At this point, his holdings are referred to as Estates.

-Above the Count is the Baron, who might control 6 or more Counties. Exceptional Service is needed to be rewarded with this Rank.

-Above the Barons are the Dukes. A Rank requiring a flair for intrigue and politics to attain. Dukes will serve the King as Generals, Admirals, and Stewards in his absence. A Duke may oversee as many as a Dozen or more Counties.

-Above the Dukes is the King himself. In a tiny kingdom, 1-6 Hexes, there may not even be any Ranks between a Knight and a King, except of course for the King's favored knights and Subjects. In a Kingdom of 30+ Hexes, or with large populations, the other Noble Ranks will become apparent. In some cases, depending on it's history, a kingdom may not have certain ranks, such as Baron or Duke, or some ranks may have larger or smaller Estates, or employ a different naming scheme, such as Barons being called Earls.

-Characters of the Noble Class are usually guaranteed to have an Estate. They are born into the Aristocracy or Royalty, and it is their birthright. Roll on the Noble Birthright Table:

1D12	Situation:
1	Child of Minor Nobility. First in line. Your parent is Gentry
2	Child of Minor Nobility. First in line. Your parent is a Knight
3	Child of Lesser Nobility. First in line. Your parent is a Count or Countess
4	Child of Major Nobility. First in line. Your parent is a Baron or Baroness
5	Child of Greater Nobility. First in line. Your parent is a Duke or Duchess
6	Child of Royalty. First in line. Your parent is a King or Queen
7	Get in Line. Roll 1D6 again. 1D3 older siblings have precedence over you
8	Usurped. Roll 1D6 again. Your title and lands have been stolen. Fight to get it back
9	Title for Sale: You have bought the Title of Gentry or Knight but have no Holdings
10	Gentry: You have a modest Estate equivalent to that of a Landed Knight
11	You are a Count or Countess. Roll for the Contents of your Estate.
12	You are a Baron 75% or a Duke 25%

The Contents Of Your Estate

- The Contents of your estate. Roll up the description of each Hex you control
- For a Hex, this includes Primary Terrain Type, Populace Size, and Presence of Mines
- These Rules can be found at the end of the World Building Rules Page
- If your Estate is limited to a single Village, the Rules on the World Building Page should be sufficient to give a quick description of it.

Mage Progression

-Alchemists can start off immediately with a small laboratory. As they progress the lab will get larger, get more workers, and have a higher output of potions. The usual constraints are competition, demand, and access to rare ingredients.

-Artificers are in a very similar situation to alchemists except they are crafting relics in their Workshops. This goes for inventors as well. Sometimes multiple Artificers and Tradesmen will combine forces in large arsenals or shipyards to make large magical flying ships and enchanted artillery.

-Libraries. Many Mages will find the tasks of working in and for Magical Libraries perfect for their mild temperaments. Head Librarian in the Mage World is a highly prestigious position. Scholars, Sages, and Savants, in particular will be attracted to this kind of work.

-Witchcraft. Witches and Warlocks with a social bent will join and form Covens. These are groups of Witches found in multiples of 13. Their combined powers increase with each such multiple. Each Witch gains an additional 1D3 Power Points, and they get to cast Spells they otherwise would not know.

-Bestiaries. Some Mages like to gather Animals and Monsters with which to experiment on. Chaos Mages in particular. Aviaries specialize in Birds. Aquariums in Aquatic Creatures.

-Greenhouses. For those Mages with a Green Thumb. Plants, Herbs, and Fungi, can be grown and used for a variety of purposes: As Guards, Pets, for Healing, as Spell components, and sometimes purely for collecting.

-Catacombs and graveyards. Found beside and beneath settlements. The perfect places for Necromancers to collect bodies for experimentation on and raising the Dead.

-Towers. Located at Ley Line Nexus points, Rifts, or other Magical anomalies. Wizards and Mages of all types will make their homes here to collect the extra Power Points that concentrate in these spots. They can also be used to power large Magical Relics.

-Portals. Found or made. Rare Portals are often claimed by Mages for different purposes. Some stick around to make sure they remain Sealed. Some use them as jumping off points for their adventures. Some act as Toll Keepers, charging others exorbitant fees to use them. Some Mages use them to get easy access to otherwise rare resources and knowledge. Some portals offer a source of powerful Creatures useful for building an army of defense or conquest.

-Universities. Some Mages are interested in teaching the next generation of Magic Users. They can be Teachers and Deans in charge of molding young minds.

-Mage Orders. Groups of like minded Mages will often band together for some greater purpose. Usually this is to fight some Major Foe or Set of Foes. They will go on self imposed missions and spend much of their time recruiting new members and hiding the targets of their enemies.

-Chantry. A Safehouse (or Fraternity House) for 2D6 Allied Mages and their companions. Often has some of the Features available in the other listings mentioned above.

Priest Progression

The Gods will require certain worldly actions of their most Devoted Followers. A Priest may just know instinctively what he has to do. A spiritual or mental communication may show the way. A Dream or Omen or Vision may clarify that which needs to be done. Usually the activity must be completed before another Task is presented. Some Activities have nothing to do with what the rest of the party is doing, and will take the Priest away from their company for anywhere from days to even years. If so, a replacement Character will be needed while the Priest is away doing his God given Chores.

Priest Progression List

1D40	Task:
1-	Repair Church: Damaged by Raid, Disaster, Fire
2-	Run Chapel: Tend to the everyday needs of the Flock
3-	Finish Cathedral: Large, costly structure requiring years of skilled Labor
4-	Take Vow: Silence, Celibacy, Poverty, Homelessness, Suffering
5-	Conduct Ceremony: Sanctify, Consecrate, Funeral, Birth, Marriage, etc.
6-	Preach: Gain a certain number of new followers. Spread the Word
7-	Rebuild Congregation: Casualties of War, Plague
8-	Pray: And Lead others in Prayer. Prayers energize the Gods
9-	Meditate: Achieve higher Mental, Spiritual States
10-	Show Mercy: Where others would show none
11-	Receive Prophecy: Divine Proclamation, Important Omen. Religion altering.
12-	Bring Gifts, Offerings: To newborn Messiah, Far away Holy Man, Scion, etc.
13-	Make Sacrifice: That others will not make. Martyrdom
14-	Help Individual on Quest: Retrieve Holy Texts
15-	Study: Gain Skill Levels in Religion, Theology, Faith, Wisdom
16-	Teach: Inspire receptive Minds
17-	Fight Chaos Cult: Destroy their Unholy places
18-	Transcribe for Celestial: Write down new Commandments, Holy Laws, Decrees
19-	Banish Demon: A Blight set lose upon the Overworld
20-	Destroy Undead: Rest their Souls. Put them out of their Misery
21-	Exorcise Spirit: Save someone's Soul. Exorcise possession
22-	Aid Inquisition: Assist in their Holy Purge
23-	For the Holy Record: Witness Event, Miracle, Inspiring Deed
24-	Collect Tithe: Monies for the Church Coffers
25-	Build Temple: Where there was none before
26-	Ordain Worshipper: Lay person becomes member of the Clergy
27-	Join Monastery: In Brotherhood with the Monks and Friars who already live there
28-	Missionary work: Preach to strangers who live far away
29-	Go on Pilgrimage: A long Journey to visit a Holy Site
30-	Undertake Crusade: Fight the Armies of Evil and Chaos
31-	Advise Noble: Keep them from falling into Temptation
32-	Climb the Ranks: An Increase in God given Authority and Responsibility
33-	Reform the Church: Purge it of Corruption
34-	Heal the Sick: Travel Far and Wide to Cure Diseases and perform Miracles
35-	Recover Holy Relic: Chalice, Arms, Icon, Artifact lost or in the wrong hands
36+	Lead, Guide, Admonish: Keep fellow Adventurers on the Straight and Narrow

Imperial Progression

-A player should at some point acquire one of two critical stepping stone Classes:

1. Noble (Aristocrat)
2. Government Official (Minor or Major)
 - The typical goal is to become either a Gladreon Senator or General.
 - As an elected Senator he and his faction can either try to assassinate the Emperor or defeat him in a Political Arbitration or Vote of no Confidence. He can then slip into the Sandals of the new vacancy.
 - As a Victorious and Popular General he can march on Gladreous for a full out Military Coup, taking the position of Emperor by Force.

Dwarven Progression

-Dwarven Fighters usually follow a slow progression, starting off as Heroes, Bodyguards, Generals, or closely related Nobles.

-If for any reason the current line is wiped out, which is not that unusual, he may be asked to become the next Dwarven Lord (King).

Barbarian Or Viking Progression

-A Politically Ambitious Barbarian may start off as a Bodyguard or Huscarl to the current Chief. If the Chief is killed or defeated in Battle, Old Age, or a one on one Duel, the Player may easily take his position. If the Barbarian is a Noble, related to the Chief, he be next in line, or just take it by force, as may be his

right.

-A Chief may rally other tribes to his side, thus becoming either a King or War Chief leading a Great Horde of Barbarians against their enemies.

-Nomads will sometimes follow a similar path. The names of their leaders will be different altogether: Hetman, Khan, etc.

-Gypsies too can also take this Route. They are more of a Mercantile bent though, with titles such as Horse Master or Elder.

-Bandits are the least loyal of all these groups and will splinter apart while even in small numbers. However you can find those who fashion themselves to be Chiefs or even Kings.

Rogue Progression

- Rogues have a handful of ways to progress:
- They may become Guild Masters of Thief and Assassins Guilds.
- They may become Spy Masters for Espionage type Agencies.
- They may become Mob Bosses of Thuggish Criminal Family Mafias.
- As Duelists they may open Fencing Schools.
- As Thugs they may run their own Enforcer/Bodyguard Agencies.
- They may rise in the Ranks of the Eastern Ninja Clans.
- In areas known for Begging, the Sale of Information and Rumors, Plague, or unusual Traditions one individual may earn the title of Beggar King.
- Sometimes a demented, sewer-dwelling, individual will organize the local orphans into bands of Pick-Pockets and Cut-Purses. They will claim the Title of King of Thieves.
- Pawnshop Owners usually fill the role of public fences.
- Artistic Criminals can function as Forgers and Counterfeiters.
- Of course great monies can be made in the trade of Slaves, Drugs, and Dark Magics. Some of this may be as Smugglers or even at public or private auction if the Law, or absence of Law allows.
- Rebels and Renegades can amass great power depending on the number and quality of followers they can attract.

Pirate Progression

- The lowly Pirate may work himself into the position of First Mate.
- Through Mutiny or the rules of Succession he might find himself wearing the Captains hat.
- If he tries to go legit he might become a Privateer.
- He might also become the Mayor of a secluded Pirate Town.
- Truly Ambitious Pirates will build up a Marauding Fleet and Become Pirate Kings.

Aeronaughts

- Aeronaughts of a piratical bent will organize themselves as Pirates.
- Likewise, Mercantile types will organize as merchants, and so on.
- Airships are rare and expensive, so any groups the player joins or forms will be on the smallish side.

Merchant Progression

- Merchants, if their businesses are successful, will acquire Shops, Warehouses, Caravans, Trade Ships, Trade Fleets, Guild Master Positions, , Charterships, Mines, Factories, and Lucrative Deals.
- These benefits may come from different Countries. They may also be awarded Noble Titles and Official Government Positions
- If they are Explorer types, they may own ships of Exploration and Discover new Trade Routes to New Lands to which they are given first rights to settle and exploit.

Bard Progression

- A catchy tune, a well-turned phrase, a well-told Tale. These are the claims to fame of a Bard. This is their Legacy, their path to immortality.
- Finding Lost Lore, Recording Heroic Deeds, Writing Books, Poems, and Sagas of Mythic Figures. Such deeds a Bard finds greatly satisfying.
- There do exist Bardic Schools where a player may find and rise in position. A player may even want to found his own School of Bardic Skills, Magic and Knowledge.
- Other Entertainer Types (Dancers, Musicians, Singers, etc.) can follow a similar path, possibly with a greater emphasis on fame and fortune.

Campaign Setting

S&s Campaign Setting: The Empire Of Gladreon

-For those GM's that are interested, a Campaign Setting is Provided.

-The Campaign is called The Empire of Gladreon.

-It is Basically a Fantasy setting juxtaposed over a map of the Mediterranean during the Roman Empire.

-Humans are most common, but there are also large populations of Elves.

Prehistory

Mud Men Magic And Mutation

The Great Creator Spirit of the Early Earth created all of the plants and animals out of the one thing he had plenty of, in excess, in the beginning, namely Mud. After this initial burst of divine inspiration, the excess of Magical energy infused in the young planet

began to mutate the handful of Mud Men, Plants, and Beasts into a great variety of forms, many of which are still recognizable today. All of the Demi-humans and Humanoids in their most primitive forms, took shape in these Days: Humans, Elves, Dwarves, Goblins, Orcs, Kobolds, etc. Trees and Flowers, Birds and bees, and monsters of every sort, all made their first appearances.

Dragons

Many Creatures have alternate origins as compared to the Early Mud Beings. Dragons are some of the most ancient beings in the Universe. Planets are merely nurseries for them. They Fly through Space with the greatest of ease at speeds far greater than that of light, hopping from one Galactic wonder to the next, feeding on Cosmic Whales and other interstellar prey. The females, after mating, will settle on a young planet to raise their Brood. When old and fast enough the entire Pod will head back off into space.

Giants

Several Planes of Existence lie in close contact to the Prime Material Plane. These include the Elemental planes of Fire, Earth, Air, and Water. From here all sorts of Elemental Creatures can make their way to magically imbued planets. Many Giants, such as Frost or Sea Giants, are a proper 50/50 mix of the Prime Material and Elemental Energies.

Spirits

In some places the connections to the Spirit world are strong and the Spirits that manifest nearly every thing, being, and location are able to be communicated with and make their presence and powers known.

Fey

Like the Elemental and Spirit Planes, there are also the planes of Fairy. Fey creatures with all their quirks love to explore and meddle with the worlds they can reach.

Demon Dimensions

Demons and Devils will access worlds by means of Portals. When possible their intent is to conquer and destroy the inhabitants of vulnerable planets. This is always made easier when chaos Cultists, power hungry Mages, and evil Priests invite them in.

Positive Planes

Angels, Devas, and Cherubs will always be on the watch for Demon Invasions. They will do what they can to protect the innocent and stop the spread of Demon Kind.

Early Religion

-Before the rise of the Pagan Pantheon Religions (Greek, Norse, Celtic, Sumerian, etc.) in the three major Continents of the Hemisphere (Afratan, Urto, Sybitus) religious practices were a primitive combination of Elemental, Spirit, and Ancestor Worship.

-The main practitioners of this form are known as Animists. They can still be found in desolate and far removed Wildernesses applying their beliefs just as their ancient ancestors did.

Pagan Gods

If humanoids exist on a planet, eventually some Pagan Gods will arrive as well, looking for worshippers. The Prayers of the faithful restore their Divine Energies. They will invite themselves in and set up shop. The Pagan Gods will further alter the world to suit the purposes by populating it with their closest servants, namely monsters and creatures that already embody the culture and ideals they represent.

The Earliest Groups And Settlements

First came primitive Tribes, followed by Barbarian Chiefdoms. With the Domestication of the Horse came the Nomads. The invention of agriculture led to the first Settlements. The first small cities predated written history, but with the introduction of Writing and Pagan religion came the first Ancient Civilizations, namely the Proto-Celtic, Norse, Greek, Sumerian, and Egyptian peoples. Some of the earliest Cities still stand, but with new names, changed demographics, and different governments.

Gladreon

-The Country of Gladreon is equivalent to the Roman Republic. It is peopled by Men and a large population of Iron Elves: A Stern Lot: Stoic Warriors, Law Makers, Industrious Engineers, and Noble Historians, with a streak of Hedonism, and a penchant for Mystery Cults and Arena spectacles.

-The Current Emperor is the Human Lord Longinus the Pious. His other Immediate family members include his wife Lady Longinus and their 4 Daughters. His Mother, is a famed Oracle who still Lives, but his Father was killed fighting an Orc Warlord over a Century ago (It was Foretold but he accepted this as a noble fate).

-The Empire is split into 6 Provinces. Each maintains 1 to 3 Legions or Fleets, as well as contingents of native troops.

Inhabitants Of Gladreon

-The lower classes wear simple Togas, Cotton or Woolen, and Leather sandals. The upper classes wear fine clothing: Velvet Togas dyed Purple or Red, Embroidered with Gold fringes and tassels, Laurel Leaf Crowns, and Rich Jewelry.

-In the Lower Classes both Men and Elves take on the roles of Free Servants, Workers, Soldiers, Skilled Craftsmen, Innkeepers, Millers, Bakers, Butchers, Street Performers, Tutors, Mercenaries, Free Gladiators, Courtesans, and Imperial Agents.

-Weaker Humanoid Slaves such as Goblins and kobolds do Farming, Construction, Herding Rag Picking, Rat Catching, Street cleaning, food tasting, and other Menial Tasks.

-Strong Humanoid Slaves such as Orcs and Gnolls, and captive Monsters, Beasts, and Giants are reserved for the Arenas. The Gladreons have a Blood thirsty side and the Arenas help satisfy this Craving. Slaughters involving captured Drow are especially favored.

-The Gladreons speak a language called Antiquin. this is the official Language of the Empire. It is precise and technical, well suited to such fields as Law, Economics, Government, and Engineering. It is accepted as the Common Tongue of the Empire.

Religious Practices Of Gladreon

-The Gladreons long ago adopted the Greek Pantheon. Since their language is different from that of the Grecos Peoples, the names of the Gods are different as well. They are linguistically referred to as the Gladric and Grecos Pantheons.

-The Planets and the Months of the year are conveniently named after the Gods.

-The Empire is Rife with underground Cults. These are shared by Elves and Humans alike. Some are Demon Worshippers. Others are imports from foreign Lands. The most popular is the Cult of Mithar the Gleaming God, a Good Warrior Deity, but not sanctioned by the State. Druidism and Witchcraft are also popular amongst some of the poorer Inhabitants, while Vampire Cults can be found amongst the rich and powerful.

Hedonism In The Empire

-There are of course, those serious individuals (Some Senators) that encourage the pursuit of Philosophy, Law, and Religion instead, but they are mostly ignored.

-The bulk of Gladreons prefer to spend their time at Feasts (with Vomitorium's), Sports, Circuses, Passion Plays, Cult Gatherings, Orgies, Torture Sessions, Brothels, Drug Dens, Arena Combats, Chariot Races, Victory Parades, Hunting Trips, Gambling, Brothels, Slave Auctions, Public Tortures, and Executions, and Festivities of any kind where they can overindulge in wine and witness the sufferings and degradations of others first hand.

-Should they tire of these diversions, some look for activities involving much more personal Risk, such as Politics, Adventuring, Soldiering, becoming Imperial Agents, or even entering the Hippodrome as a Charioteer or the Arena as a Gladiator.

Seas And Oceans

The Middle Ocean (the Midoc)

Barely larger than a Sea. Bad storms are relatively rare. The Midoc is Safe for frail rowed vessels such as biremes and triremes. Often joked about as a Gladreon Lake. To the Far west are the Straights of Gax which leads to the Western Ocean, home of the Western Islands.

The Attic Sea

The Middle Sea connects to Attic Sea which separates Gladreon from Grecos. It is a narrow, shallow Sea.

The Ageis Sea

The Midoc also connects to the Ageis Sea, which in turn connects to the isles and city States of Grecos.

Grecos

-The Greek Lands are East of Gladreon are populated by Men and Golden Elves: They are Lovers of Poetry, Mythology, Dance, Wine, Music, Philosophy, and Heroics.

-The basic unit of Government in the Region is the Independent City State.

-Popular garb includes simple white Togas, Sandals, and Jewelry.

-In Sports and a number of other public activities they prefer nudity.

-The Region is Coastal, Rocky, and mostly unsettled Wilderness. Monsters of a Greek flavor are very Common. Most City States will have Centaurs, Satyrs, Fauns, and Nymphs living just outside the walls. Temples to Dionysus will often have all of these congregating openly to indulge in Wine and Frolicking.

Religions Of Grecos

-Both the Golden Elves and the Humans worship the many Gods of the Greek Pantheon. It is interesting to note that the Gods will appear before Elves as Elvish beings, and before Men as Human Beings. Every race perceives a God as one of their own.

-The Gods themselves very much enjoy visiting their worshippers in various disguises. The evidence of this is the many Demi-Gods that can be found also walking the Earth.

-Each City state will have its own Patron God. The Gods offer protection and Aid in return for Prayers, Libations, and Sacrifices.

Grecos And Empire

-In times of War the inhabitants of Grecos will be the first to join the fight, fielding Armies and Navies composed of Arthenion Fleets, Spartos Hoplites, Corithon Phalanxes, Centaur Cavalry, and the occasional Charmed Monster, led by Heroes, Enchanters, and Demi-Gods.

-The main exports of Grecos are Fish, Olive Oil, Wine, and Pottery. The Inhabitants of Grecos are famed Sailors and Mariners. Their Fishing, Trade, and War Fleets are second to none.

-Amongst their secret weapons include Greek Fire and Large Mirrors that concentrate light into beams of energy that on a sunny day can burn through ships.

Locations In Grecos

-The large Island of Cretos sits close to Gyptos. It is ruled by King Midiac, a sorcerer who can turn his Foes into statues of Gold. Needless to say, Cretos is a rich land. It is also known for having a large population of Minotaurs with their Labyrinthine Lairs. A small population of Brutish, primitive Humans called the Cretans make their home in the Hills.

-The Island of Theras. An Island ring surrounding a Giant Active Volcano. This can blow at any time, but the Salamander inhabitants have not fled as of yet.

-The Island of Cyclos. Inhabited by a tribe of Cyclops. They are Sheep herders and Man-eaters. For sport they throw boulders at passing ships, but they rarely hit. A great Artifact known as the Golden Fleece is said to be hidden on the island, luring Heroes to their Doom.

-The Straights of Hartoon, home to a Clan of Sea Sirens, famous for wrecking ships and devouring their crews.

Beginning Of The Empire

-250 Years Ago there was a great invasion of the Overworld by the Denizens of the Underworld. It was led by the Demon Overlord Korash the Conquerer.

-The Overworlders were on the Verge of Defeat, but were Rallied by The Kingdom of Gladreon. The Underworlders were driven back and the Overworlders were Victorious. Korash himself was slain by a mighty ritual unsummoning spell cast by a Circle of Gladreon Enchanters who gave their lives to empower the Spell. As Tribute, many surviving Good Kingdoms declared Gladrien their Overlord and thus began the Gladreon Empire.

-The Empire encompasses most of the lands surrounding the Middle Sea. There are Six Provinces: Gladreon, Grecos, Gyptos, Levantis, Spanika, and Northern Afratan

Military And Empire

-The Empire taxes its members and maintains 7 Legions, 2 Naval Fleets and 1 Airship Fleet for its protection. A Legion has about 10,000 Troops. -Each Legion is composed of 85% Soldiers and 15% Auxiliary Troops. The Empire also Recruits Hero Types called Imperial Agents to go on special Missions.

Imperial Agents

-Player Characters in this Campaign can be Imperial Agents. They are granted great Independence to

pursue Investigations and Mission goals however they want.

-Missions of Imperial Agents include: Investigating suspected Cults, Escorting Diplomats and Inquisitors, Monster Hunting, Pursuing Fugitives, Recovering Relics, Rescuing Captives, Clearing-Out Dungeon Sites, Quelling Rebellions, Hunting Bandits and Pirates, Breaking up Assassins Guilds, etc.

-Agents are usually assigned to a particular Legion or Province. Some larger Cities contain Imperial Academies. There are 3 Main Academies found in the Capitol cities of Gladreon (Gladreon), Athenos (Grecos), and Gizan (Gyptos).

-These Impressive Fortified Structures contain Armories, Training Grounds, Libraries, Workshops, Laboratories, Government Offices, Classrooms, Dormitories, Officer Residences, Hospitals, and large numbers of support personnel.

Non-imperial Agent Player Characters

-Some possible Starting Scenarios for PC's who are not Imperial Agents include:

-New Agents: Characters are straight out of the Academy and are trying to pass the trials to become Agents. They are not agents yet. They are randomly assigned bunks together. The 7 Trials will last 7 Weeks. Trials test Magic Ability, Fighting Ability, Leadership, Stealth, Strategy, Diplomacy, Investigation, and Survival Skills.

-Characters are Champions of a Feudal or Dwarven Kingdom with its own concerns. They may be a Band of Knights or Dwarven Defenders off to deal with a Major Foe.

-Characters are Rogue types pursuing semi-criminal activities in the inner coastal cities. They may be Pirates, Thieves, Scoundrels, Thugs, and other unsavory types.

-Characters are a mixed bag of surviving Refugees from a Humanoid Raid. They were not previously adventuring types, but they lost almost everything in the Raid. Now, They have a Map, some found equipment, and are looking for adventure and revenge.

-Characters were once Imperial Agents or soldiers, but have long since retired. Some are gnarled veterans. Others did little of interest during their careers. Now they are out on their own, trying to make their own fortunes, without the Empire's interference, as independent adventurers and mercenaries. They may have skills/abilities greater than the typical starting Character.

Northern Lands

The Dwarven Kingdoms Of Skandar

-Far North of the Borders of the Empire, especially in the mountainous regions, on the Icy Sub-continent of Skandar are the Kingdoms of the Dwarves.

-Over the Centuries the Dwarves have carved entire Cities into the Mountains. This mining and digging

has resulted in great wealth. Every Dwarven City is a major source of Iron, Gold, and Gems. Their Craftsmen are unrivaled in forging objects of great beauty and power.

-These Kingdoms, however, are always under threat from the Evil Inhabitants of the Underworld. Many a Kingdom has fallen to invasion from below. Some of these have been reclaimed, but many still remain the desecrated abodes of Orcs, Dragons, and things even more sinister.

-Those Dwarves who, in their greed, have gone too far down into the underworld have been transformed into degenerate forms such as the Dour Duergar, the Magically insane Derro, and the Elemental Azaer as described in the Bestiary.

-There are a Dozen Large Northern Dwarf Kingdoms, and Scores of Smaller ones. Dwarves do not share their homes with Elves or Humans, but they will occasionally reside near Gnomes. They dislike Elves, finding them arrogant, and worse.

-Dwarves will Ally with Humans and other Demihumans when Evil spreads across the land.

-Dwarves will trade with peaceful humans who live near the Mountains. Human Foodstuffs, Cloth, Fabrics, and Wood in exchange for Base Ores, Gems, Gold, and Crafted Items.

Norse Culture

The Northern Regions are dominated by the Norse Pantheon, worshipped by Dwarves and Men. The Norse Gods appear as Dwarves to their Dwarven Worshipers. the main religious advocates of Humans are Priests, Bards, and Druids. For Dwarves the Myths are taught by Bards, Sages, and Rune Masters.

Northern Men

-Men in landlocked Northern locations are primarily Barbarians. Those in coastal regions are akin to Viking Sea Raiders. The Northern Barbarians are not to be underestimated. Their Hordes number in the tens of thousands, and their Fighting Skills are Legendary. They live and die by the sword. They Raid the Humanoids surrounding them with great ferocity. Tribes of Barbarians stretch all the way from the Eastern edge of Skandar to the Western Ice Fields, The Frozen Wastes of Sibexia, Down into the Lands of Rus and Slav, and even into the Great Forest itself. In the Plains regions they are notable horsemen and charioteers.

-There are also groups of Humans who worship the Finnish Pantheon. These more peaceful tribes are composed of Ice fishers, Seal hunters, and Reindeer herders. They are found scattered in the Western regions of Skandar. They will attempt trade before war. An occasional Celtic Tribe can also be found in the far north, a testament to the great range of Celtic culture when it was at it's height.

Northern Monsters

-As if the weather were not terrible enough, there are many other Dangers that make their home in the Far North. White Dragons and Frost Giants are amongst the larger threats. -Beasts, Undead, and Fey run amok in the northern Forests and Marshes. Tribes of Orcs and Gnolls make large areas of Skandar their hunting grounds.

-In the Arctic Regions Polar Krakens and Devil Whales push icebergs out of the way to get at their favorite meals of Giant Squids and Great White Sharks.

-The Ice King, a powerful Ice Mage and Necromancer has been collecting the bodies of Barbarians and underworld humanoids for decades. He has amassed a great army of undead and is almost ready to release them upon the heart of the Empire. The Empire has foreseen this with Divination Magics, and an entire Legion has stood at the edge of the Great Forest ready for many years waiting to repel them.

-The Ice Queen (Yes, they are Married) lives in an Ice Palace farther North than her husband. She guards her Domain with Ice Elementals, Ice Giants, Snow Goblins, and Winter Wolves. It is thought she controls a Portal to the Elemental Plane of Ice and plans to use it to power a great Spell that will cover the Earth in a never ending Winter.

Gnome Settlements

-Gnomes with a natural bent occupy Hilly Regions and Forest Grottos. Urbanized Gnomes set up Ghettos in the Larger Cities. Like Halflings, their settlements are on the small side, rarely larger than small Towns, or underground Keeps.

-Like Dwarves, Gnomes will settle underground. Like Elves they have distant Fey origins. Like men, they are highly adaptable and inventive, and like halflings they know how to have a good time.

Old Norn

-Gnomes are not interested in Religion. The only being they come close to worshipping is an Ascended Gnome Prankster that goes by the title Old Norn.

-Old Norn will show up to protect a Gnomish community in need, or to pull off a particularly clever Prank. He is Immortal and has over 100 levels in Skills and Magic. He has a Home in the far North; Part of a snow-bound Gnomish village. From there he entertains the other inhabitants with Illusions, Pyrotechnics, Inventions, and Magical Toys he makes in his giant workshop. The Town (Norn's Village) is periodically attacked by Snow Goblins, but they are easily driven off by Norn and the local Militia.

The Central Lands

The Central Lands

-These are mostly Wild lands. The largest feature being The Great Forest which extends in a continuous

swath throughout all the Kingdoms and Domains of the Region. It is so extensive that whole armies, and entire migrating tribes can pass through without even being noticed by the permanent inhabitants.

-Immediately North of the Central Feudal Kingdoms are large Celtic and Norse Barbarian Tribes. They live in the Taiga regions of the Great Forest and are separated from Skandar by The Jarlfjord Sea.

Celtic Lands

-Before the arrival of the Brotherhood and Krell the Savior, Most inhabitants of the Central Regions worshiped the Gods of the Celtic Pantheon. Their Religious leaders are Pagan-Priests, Healers, Witches, Shamans, and Druids.

-In most places on the continent the Older Celtic Tribes have been absorbed by the Krellian Feudal Kingdoms. The main exception to this is the Large Western Islands known as Albion, which retain a vibrant and culturally rich group of Celtic Chiefdoms and Kingdoms.

The Feudal Kingdoms

-Many of these have developed into Monarchy and Renaissance style Societies. They are not part of the Empire, but most have strong trade and Military alliances with it. These Realms are primarily composed of Humans with small numbers of Demi-Humans.

The Brotherhood And The Savior

-In the past millennium several Feudal Kingdoms have developed based on a newer Religion called The Brotherhood, and its Ascended Leader Krell the Savior. The presence of the Brotherhood has given rise to the Arthurian Legends. These two forces have provided the Moral and Mythic basis for the Medieval style of these centrally located powerful Feudal Kingdoms. Its Religious Leaders include Holy Priests, Friars, Clerics, Paladins, and Inquisitors.

Danizod

Danizod - A Northern Region of the Great Forest.

- Notable for the presence of Norse influences and Barbarians.
- Home to several Port Cities and Raider Fleets.
- Also present are Dwarven Trade Embassies with large Walled-in Warehouse Complexes.
- They ply the Northern Seas in Stout Cogs and are known as the Sea Dwarves.

Nethay

Nethay - The North West Corner of the Great Forest.

- Known for it's constant flooding and the building of Dykes, Water-mills, Canals, Locks, Levees, Flood plains, and rich Top Soils.
- Industrialized with Ports, Linens, Canning, and Shipbuilding.

- The Feudal Kingdoms there have built formidable Fleets for trade and war.
- Ancestors were Sea Raiders and Vikings.

Findel

Findel - The Western portion of the Great Forest.

- Site of Camelot and the descendants of King Arthur's Court. Multiple small Kingdoms all showing Fealty to Lord Artain, the current Liege who sits at the at the head of the Round Table.
- Lord Artain is a Scholar King steeped in History, Religion, Chivalry, Mythology, Politics, and Economics. He is frequently visited by the great Wizard Merlyn where they indulge in Feasts, Hunts, Friendly Tournaments, and long discussions Flavored by Honied Ale. It is hard to leave the Kings presence without being graced with a Fresh Quest.
- The Celtic Roots of the Region are strongly upheld in these otherwise Feudal and Brotherhood controlled Lands.
- The Fey have an incredibly strong presence here. The dimensional Barriers between here and the Fairy lands are exceedingly thin at best.

Clovine

Clovine - Rolling Hills. The Heart of the Great Forest, but also with lots of Rich Farmland.

- King Clovis is seen as an equal to the rest of the Aristocrats. The other Nobles are very powerful and are constantly bickering amongst themselves. The upper classes live in a never ending state of political Intrigue. This often breaks out into open Warfare (Knightly Skirmishes and short Sieges) that actually affects the lower and middle classes very little. Many Tournaments include Duels to the Death.
- The Upper classes also abide by a very strong self imposed code of Chivalry.
- Hidden in the Hills and towering Trees are numerous clans and tribes of the smaller types of Giants: Hill, Spriggan, Ettins, Fomorian, Firbolg, etc.

Tolis

Tolis - Southern Section of the Great Forest. Right above the Imperial Province of Gladreon. The trees are giving way to Farmland, Valleys, Scrubland, and arid Hilly regions of Broken Lands studded with low Flat-Topped Mountains, themselves festooned with Small but heavily fortified Castles.

- Famous for their many fine Sword Smith's and Artisan Armorers.
- Tolis also boasts some of the Worlds most excellent Vineyards.
- A Strong Imperial presence is felt here, especially in Trade.

- Underworld Demon incursions are also a thing here. Exorcisms, Demon Hunting, Cult Activity, and Inquisitor operations are steadily on the rise.

Pruse

Pruse - decentralized trade dragons

Lithany

Lithany - hobgoblins raids plains

Ukar

Ukar - Gothic undead brotherhood

Bosh

Bosh - valleys reform wars schism

Slovek

Slovek - Orcs mud mishmash

Auster

Auster - Goblins hills political rebellion

Swekia

Swekia - Mercenaries mountains

The Renaissance Cities

-More Recently, in several independent Human Chartered Cities, there have been stunning advances in Philosophy, Art, Invention, and the Sciences. No new major Religions have arisen, but these cities have taken on a distinct Renaissance personality, attracting gifted artisans from everywhere and from every race.

Humanity And The Problem Of Evil

-More so than most Demi-Humans, Humans have the potential for great Evil. In many times and places in their history, they have fallen prey to worshipping Demons, Devils, and Gods of Chaos and Darkness. Historically this has led to the downfall and utter destruction of several Human Kingdoms. In most places that humans dwell in numbers, one can be sure to find the influence of Evil Forces.

Halfling Enclaves

-Halflings find small secluded valleys to carry out their idyllic, pastoral lifestyles. However more adventurous types can be found throughout the Continent.

-Halflings depend on the bigger races for their protection and existence. They settle within their realms as far as possible from Evil Lands. Their settlements are small Villages and Hamlets, with their Homes built into the Ground, sticking out like tiny Moss-covered Hills dotted with round Windows and Doors. Most

Halflings prefer this rural environment, but many can be found in Towns and Cities, flourishing in diverse occupations.

Religion And Halflings

- As far as religion goes, they take their cues from the bigger folk that surround them:
- Lightfoot Halflings will worship the same Gods as any nearby Elves.
- Hairfoot Halflings will worship the same Gods as any nearby Humans.
- Stout Halflings will worship the same Gods as any nearby Dwarves.

The Halfling Pantheon

-Halflings do have their very own, albeit small Pantheon:

- Ergo Proudfoot: Creator of the Halfling Race. He used the leftover primordial clay originally used to make the Human Race.
- Etta Proudfoot: Mother in all things to the Halfling Peoples. The Great Provider: Crops, Cooking, Children, and Cheer. Animals and Health. She is worshipped more than all the others put together.
- Ardo Tallfellow: Protector of the Halflings: God of Slings and Stones. God of Trickery, Adventure, Fighting, and Thieving. Handsome and a Good Dancer.
- Flenny Fleetfoot: God of Fishing, Carousing, Pipeweed, Music, and Long Naps.
- Religious Leaders can include Healers, Druids, Lay Priests, and even Bards.

The Southern Lands

Gyptos

-The Egyptian Lands are populated by Men and the Copper Elves: Known for their Decadent Mages, Necromancers, and Priests of great power. they use their Slaves to build great pyramids and Temple Complexes filled with Statues and Monoliths of Power.

-The current Leaders of Gyptos are the Pharaonic Dynasty of the Ra-Patra, headed by the Pharaoh Antekan Ra-Patra, a powerful Human Mage of Necromancy and Desert Power.

-The Gyptos make extensive use of Servants and Slaves from other races, including Arkadian Humans, Chained up Undead Skeletons, but mostly Humanoids such as Sand Goblins, Jackal-Men, and Lizard Men, who are set to work building Pyramids, Palaces, Temple Complexes, and other Monolithic Architecture. Note: Skeletons disintegrate after a few hard years in the hot sun.

Religions Of Gyptos

- Most Gyptos worship the Gods of the Egyptian Pantheon in Massive Temples.
- There are also the not so secret Cults devoted to the worship of Djinn or Sphinxes.
- The Sphinx will have lavish Observatories and Libraries.
- The Djinn will have intricately carved Mosques with towering Minarets.
- These places of worship are often occupied or visited by the said entities themselves.
- To gain Favor, worshippers of the Sphinx must solve Riddles and Puzzles and those of the Djinn must impress with the finest of Storytelling.
- Djinn Cultists hope the Djinn favor them with Wish magic. This is popular with Rogues and Fighters hoping to find a shortcut to fame and fortune.
- Followers of the Sphinx hope to learn more of the mysteries of the Universe. This is popular with Mages, Sages, and Priestly types.

Necromancy In Gyptos

-Over the millennium, Gyptos Spell Casters have become obsessed with the concept of Death. Some will start to dabble in Necromancy and wind up converting themselves into some sort of Undead creature: Lich, Mummy, Vampire, or Ghoul, at which point they retire from all connections they had with the living world, hiding themselves in Tombs, Mausoleums, Underworld Catacombs, and Pyramid Crypts. Some actively hunt the living and are themselves then hunted down and killed. With the use of Control Undead Spells some of these lost souls are spared to be used as Guards and Soldiers.

-Other devote themselves to the priesthood. Some place their souls into Statues to find peace within the Stone. Still others polymorph themselves into fish, birds, reptiles, and other animals, to live out the remainder of their lives wild, naked, and free.

-Those who worship Djinn or Sphinx may polymorph themselves into such beings, however, they are almost never accepted as equals by other creatures of this type.

Gyptos And Empire

-Gyptos contributes huge amounts of wheat to sustain the Legions of the Empire. They also contribute large numbers of Infantry, led by Fearsome Stave wielding Jackal Men and Nimble Light Charioteer Archers. They also employ mercenary Light Cavalry from the many desert Nomad Tribes. Their Fleets are composed of large, oared, artillery-laden, War Barges.

-Except for the all important river deltas, large portions of Gyptos are composed entirely of desert. The shifting sands hide the massive ruins of earlier ages.

-Treasure hunters will find much to pick from. The ruins are filled with Undead and Demon Cults. Many make full contact with the Underworld. Above ground,

adventurers will have to contend with Heat, Thirst, and Sand Storms. Sand Giants, Nomads, Scorpion Men, Serpent People, and Giant Scorpions prowl the Dunes, looking for their next victims.

Levantis

- A Province of the Empire.
- This refers to the Desert Lands just north of Gyptos. It contains about 20 small to medium size cities, Two of which are on a large Island called Syprez.
- They have the Middle Ocean on one side, and the Arkadian Empire on the other.
- These lands are Holy. Gladreon Temples, Djinn Mosques, Krellian Churches, and Junite Synagogues dot the landscape at Holy sites found nowhere else. This land is considered to be the birthplace of the Junites, The Djinn Worshippers, and even the Brotherhood.
- The area is populated by small tribes and Kingdoms of Desert Elves and Humans. There is even a Clan of Desert Dwarves in the Region. Gladreon keeps 2 Legions in the area to counter any moves made by the Arkadians.
- Levantis provides a Combined Crusader Army equivalent to a Legion, However they are more interested in crusading against Underworld threats than fighting the Cataphracts and Heavy Chariots of the Arkadians.

Spanika

- A much ignored Province of the Empire.
- The westernmost part of the Continent of Urotan is the Land known as Spanika.
- At its Southern Edge are the Red Cliffs of Gax. The wild central lands are hilly and rocky and overrun with all manner of Humanoids and Giantkind: Goblins, Ogres, Hill Giants, Orcs, and Lizard Folk.
- The North is occupied by several Feudal Human Kingdoms (Casteon, Leonis, Portus, etc.) and Celtic Tribes. The Far South is held by a Desert Elf Kingdom of Djinn Worshipers known as Moortan. The Moortani are known for their splendid Architecture and Equestrian skills.
- The Empire is content to let the current inhabitants of Spanika deal with the central Humanoid and Giant Threats. In time of War, however, the Empire will heavily recruit mercenary forces from this area, including Skirmishers, Light and Heavy Cavalry.

Northern Afratan

- A Desolate Province of the Empire.
- Across the straights of Gax and leading all the way to Gyptos, the desert stretches all the way to the edge of the Sea. This rugged coastal Land is

comprised of a series of minor Ports, Fishing villages, Colonies, Trading Outposts, Hidden Pirate Dens, and Sea-side Towns.

- One of the more interesting locations is the Ruins of the City of Carthune. It was here that the Demon Lord Korash met his fate 500 years ago. The City is still full of mindless Demons and Chaos Abominations. Carthune was a Rich Port City and it is widely believed great treasures and relics can still be found there by anyone brave enough to come close.
- Afratan Mercenaries come to the Empire usually by way of Gyptos.

The Eastern Lands

The Arkadian Empire

-Outside the Gladreon Empire resides the Arkadian Empire, Commanded by the Bronze Elves, Sometimes called the Desert Elves. (They substitute for the Persian Empire). Arkad is Ruled by a single Warrior Priest King; Persod the Third. The Empire is composed of dozens of Vassal states who pay large tributes. They share a large border with the Gladreon Empire so the two will often be trading and skirmishing at the same time in different places.

-The Main Religions of the region are the Summerrian and Babylonian Pantheons. Djinn and Sphinx cults, like in Gyptos, are prevalent as well. Other major cults include the Zorians and the Junites, both mostly observed by Humans.

-The Zorians worship a Good Fire God who Fights a never ending war with a Being of Great Evil.

-The Junites worship a Good Earth God whose main spheres of influence include Creation and Law.

-Humans comprise over half the population of Arkad. They are often treated with more respect and hospitality than by their peers in the Gladreon Empire.

-Bronze Elves who feel the pull of Evil will often try to overcome this by throwing themselves into religion, often spending decades as minor Temple servants and officials in order to reestablish inner peace and humility.

Hitani Minor

North of Levantis is the Rocky Region known as Hitani Minor. It is currently under the control of the Arkadian Empire. It is saturated with Ruins of a previous civilization known as the Hitani. Their broken Statues of Strange and forgotten Gods are everywhere to be found. The Coastal areas are studded with City States, Port Cities, Pirate Towns, and Fishing Villages. The interior is filled with Giants, Dragons, Orc warbands, and Amazon Tribes.

The Underworld

The Underworld

Simply put, the Overworld describes what is above Ground and all those that live there. Below Ground is

the Domain of the Underworld filled with the Denizens of the Dark. The Underworld is much more extensive than most Overworlders realize.

Giant Caverns house underground Seas and Cities. Empires of Humanoids who have never seen the light of Day wage Wars that last hundreds of years. The lowest Depths are home to fearsome Demons, Undead, Elementals, and unimaginable Horrors. Overworld Heroes are often lured into the Underworld by the promise of easily found Treasure and Ancient Magics. Underworld Creatures are often pushed up and out into The Overworld to escape their stronger neighbors. Underworlders also often raid the Overworld for Slaves, Animals, Food, Wood and other useful Materials. Features of the Underworld:

1. Caverns: All Sizes, All Types, Filled with all Manner of Monster
2. Humanoid Underground Dwellers: Orcs, Goblins, Rat-Men, Duergar, Drow, Derro, Kobolds, Bugbears, Ogres, Trolls, Minotaurs, Troglodytes etc.
3. Underground Lakes: Home of Aquatic Humanoid Races and the Greatly Feared Aboleths
4. Underground Rivers: Lead to the Seas. Plied by Slaver Ships brimming with Slaves
5. Underground Seas: Filled with Albino Fish, Sea monsters and plied by Pirates.
6. Outposts: Guard vulnerable areas such as crossroads and Wide Passageways
7. Strongholds: Fortifications of wary Populaces filled with Traps and Armories
8. Cities: Home to many Humanoid Underworld Dwellers: The Drow's are most Magnificent
9. Portals: Source of Demons, Elementals, and Alien Beings: Mind Flayers, Beholders, Xorn
10. Fungal Forests: Source of Food, Medicinals, and even Building Materials
11. Giant Swarms: Main Food Source for many Denizens: Megalopedes, Giant Cockroaches, Giant Rats, Giant Bats, Giant Worms, Giant Crabs, Demon Larvae, Giant Fireflies
12. Florescent Fungus: Many Colors and Varieties. Lights the Underworld
13. Ancient Ruins: Lost Human and Demi-Human Cities filled with Catacombs of the Undead
14. Lava Tubes: Miles of Natural Mazes and Labyrinths.
15. Temples and Shrines: Sites of Portals. Priests and Fanatic Cultists
16. Thriving Trade Towns: All manner of Goods, particularly Slaves
17. Monster Lairs: Dragons, Purple Worms, Giant Spiders, Lurkers, Slimes, Umber Hulks, etc.
18. Volcanic: Magma Lakes, Lava Fissures. Fire Resistant Creatures of all types.
19. Mines: Gold, Gems. The Greed of many Races knows no end. Worked by thousand of Slaves
20. Giants: Stone, Earth, Rock, Fomorian and others are quite comfortable in the Underworld

Natural Cave System Encounter Table

1D40	Encounter:
1	Stalagmite Forest: Nothing
2	Lost in Maze of Caverns: Delay
3	Blind Moths: Nothing
4	1D4 Giant Millipedes SL = 6. Armor = 1
5	Explorer: Skeletal Remains
6	Stalactite Cave: Nothing

8	Chasm: Fly or Climb or Delay
9	Giant Worm SL = 9
10	Crevice: Save or Fall for 2D6 Damage
11	1D6 Big Black Beetles SL = 3. Armor = 2
12	Dropped Item: Treasure
13	1D4 Albino Crabs SL = 4. Armor = 3
14	Dead End: Delay
15	1D6 Luminous Scorpions SL = 2. Poison
16	Rat Swarm: 1D6 Damage
17	Dripstone Cave: Nothing
18	Mushrooms: Mycology
19	Stone Arches: Nothing
20	3D6 Kobold Ambushers

1D40	Encounter:
21	Terraces: Nothing
22	Gap: Jump Required
23	Shaft: Climb Skill Check or Fall to Death
24	Cave In: All Save or Damage +2
25	Underground River: Save or Swept Away
26	3D6 Cave Goblins
27	Ravine: Fly or Climb or Delay
28	Flying Bloodsuckers: Swarm.
29	Narrow Passages: Delay
30	2D6 Dwarf Adventurers: Neutral
31	Lofty Caverns: Nothing
32	Briny Pools: Blind Fish: Fishing Opportunity
33	Stone Staircase: Nothing
34	Phosphorescent Fungus: Nothing
35	Uneven Ground: Save or Break Leg
36	Xorn: Three Armed Rock Eater SL = 8
37	Stone Bridge over Chasm: Nothing
38	Drafty Cave: Cave Bear: Animal
39	Blocking Boulder: Remove or Delay
40	Beholder: Evil Eye Monster Floating About

Dungeon Building

Discussion

The GM can use these tables to create a dungeon while the in the middle of play. This can be impressive but is less than ideal. More likely the GM will use these tables to help quickly prepare a dungeon beforehand.

Dungeon Room Encounter Table

- 1. Special(Roll on Table)
- 2. Trap (Roll on Table)
- 3. Stress (Roll on Table)
- 4. Secret Door
- 5. Find Captive (Roll on Table) and roll again
- 6. Treasure (Roll on Table) and roll again
- 7. Debris(Roll on Table)
- 8. Creature (Roll on Table) Wandering
- 9. Creature (Roll on Table) Lair
- 10. Trap (Roll on Table) and roll again
- 11. Creature (Roll on Table) and roll again
- 12. Intact Furniture (Roll on Table) and roll again
- 13. Secret Door and roll again
- 14. Intact Furniture (Roll on Table)
- 15. Debris (Roll on Table) and roll again
- 16. Thing (Roll on Table)
- 17. Nothing
- 18. Treasure (Roll on Table)
- 19. Thing (Roll on Table) and roll again
- 20. Roll Twice on this Table

Room Number Of Exits Table

Secret, Locked, And Stuck Doors

If you don't find the secret Door or you can't open the Stuck or Locked Doors, you must backtrack and face 2 additional encounters in the Dungeon.

Delays

If you are delayed use up a Ration and face 2 additional encounters in the Dungeon.

Separation

If unstated 1 party member is Separated. Both Groups will find each other after 1D4 Encounters

Trap Trigger List

1D6	Trigger:
1	Opening a Door
2	Stepping on a Pressure Plate
3	Tripwire

Cursed Items

Make sure a few of the Magic Items are cursed ones. These situations have good roleplaying potential.

Gm At Work

The GM will determine the exact details of things like numbers of Foes, Magic Items, Riddles, Puzzles,

apart.

Traps

In most cases only the first Character to come across a trap has a chance to detect it before it is sprung. Often this is one of the Characters in the Front Rank.

Trap Triggers

Roll on the Trap Triggers list to see what sets off a Trap.

1D6	Trigger:
4	Opening a Chest
5	Picking up an Object
6	Magical Proximity Detection

etc.

General Use

The Basic Dungeon can be used in conjunction with any of the more specific Encounter Tables below. The GM might alternate roll on two or more tables.

Ruined Castle Encounter Table

1D40	Encounter:
1	Throne room with Skeletal Remains: Nothing
2	Armory: Find 1D4 x 1D20 Armor and Weapons

18	Gravitic Anomaly Puzzle: Physics Skill Check or Delay
19	Storage Area: Search for Minor Technomancy Device
20	Experimentation Room: Flesh Golem Attacks

Quests And Portals

The Wayfarer System

The Wayfarer System gives some tools and options to Game Masters who need to create an adventure on the Fly. Basically it is a series of Encounter Tables that allows the GM and Players to start playing with Minimal Preparation. It is intended that the GM roll secretly on these tables, and then have the players roleplay the results.

1D6	Starting Location:
1	Wilderness
2	Village
3	Town

Steps In The Wayfarer System

- Address the Following steps in order.
- 1. Character Readiness
 - 2. Determine Adventure Type
 - 3. Determine Distance to Adventure Site

I. Character Readiness

If the Characters do not have characters generate New ones. Or use already established experienced Characters. The GM may need to randomly determine their starting Point:

1D6	Starting Location:
4	City
5	Castle
6	Temple

Ii. Determine Adventure Type

1D10	Type:
1-2	Classic Dungeon
3-4	Major Foe
5-6	Other World

1D10	Type:
7-8	Quest
9-10	Geopolitical

Or pick one. For lower level characters, new players,

or a quicker start pick the Classic Dungeon Option.

Iii. Determine Distance To Adventure Site

1D10	Distance
1	You're there already. How Convenient!
2	1 Wilderness Trek
3	2 Wilderness Treks
4	1 Sea Voyage then 1 Trek
5	1 Trek then 1 Portal

1D10	Distance
6	1 Trek 1 Portal 1 Trek
7	2 Treks 1 Portal 1 Trek
8	1 Trek 1 Sea Voyage 2 Treks
9	1 Sea Voyage 1 Trek 1 Portal 1 Trek
10	3 Treks

Classic Dungeons

Once you have navigated the wilderness Treks, Sea Voyages, and Portals, you can enter the Dungeon! To complete the Dungeon will require 3D6 consecutive encounters on the Basic Dungeon Encounter Table.

Major Foes

Determine who the Major foe is at the beginning of the Adventure by rolling on the Major Foe Table. After completing the Treks and Dungeon you will meet, fight, and hopefully defeat the Foe. Like all encounters the GM will have to provide the details on the Major Foe. Major Foes are listed on a separate Page.

Other Worlds

You need magic or a Portal to get There. The GM picks or Roll on the Other Worlds Table to see where you are going. The GM will have to Make up encounter

Portal Difficulty Table

1D8	Difficulty:
1	Portal in Dungeon
2	Portal Hidden
3	Must Solve Puzzle to Access Portal
4	Portal Magically Sealed

Tables suitable for these alien worlds. Other Worlds are listed on a separate Page.

Quests

These are usually Provided to the Player Characters by a meddling Non-player Character. The GM will have to Flesh these out. Quests are listed on a separate Page.

Geopolitical

For Higher Level Characters with Holdings. Defend your Kingdom, Start Wars, Manage your resources, build your Empire.

Portals

A portal could place you in a different Climate Zone, Planet, or even a different Dimension. Most Portals are hard to find, have guardians, and may be within dungeons. Roll 1D3 times on the Portal Difficulty Table:

1D8	Difficulty:
5	Portal Broken (Must be Repaired)
6	Portal Trapped
7	Portal Guarded on This Side
8	Portal Guarded on Other Side

Portal Guardian Table

1D10	Guardian:
1	Living Statues
2	Tentacle Monster
3	Slimes
4	Carnivorous Plants
5	Gargoyles

1D10	Guardian:
6	Golems
7	Elemental
8	Undead
9	Spirit
10	Demon

Wilderness Treks

Several Wilderness Trek Tables are Available depending on the Terrain Type. Pick the desired or most

Appropriate Table or roll on the Master Table. To complete a Trek will require 1D8 consecutive encounters.

The Tables themselves are located on their own separate page.

Wilderness Treks Master Table

1D12	Wilderness Type:
1	Temperate Forest
2	Jungle
3	Desert
4	Frozen
5	Sylvan Forest
6	Plains

1D12	Wilderness Type:
7	Mountainous
8	Hills
9	Volcanic
10	Swamp
11	Savannah
12	Badlands

Note: A City by Itself is a source of much Adventure. The Cosmopolitan City Encounter Table could substitute for a Wilderness Trek.

Quests

Adventures include Basic Dungeons, Major Foes, Other Worlds, and Quests. This Section details Quests.

If you complete a Quest within a Certain Time Frame, you will gain an Double XP. There may be additional good and bad consequences to completing a Quest such as Friendships forged, Enemies made, and Treasures earned. Note: A Geas is a Magical Quest that

the Character is compelled to complete.

Pick a Quest from the Table or Roll Randomly. These are Rarely straight-forward affairs. Multiple Steps are often required including multiple Treks, Searches, Encounters, Interactions, and Battles.

Quests Table

1D100	Quest:
1	Major Quest
2	Slay a Monster
3	Rescue a Child

92	Solve a Great Puzzle
93	Explore an Unknown Territory
94	Escort a Monk to his Destination

1D100	Quest:
45	Aid Survivors of a Natural Disaster
46	Escort a Diplomat
47	Rescue Shipwreck Survivors
48	Defeat Pirates
49	Aid a Castle Siege
50	Spy at the Royal Court

Major Quests

These are multi-step, complicated affairs. The Character(s) must first find and then free, ally with, or reunite 1D6 +2 Pieces (Objects or Beings) of Great Power (Importance). This is usually followed by a Showdown with an Epic Foe. Objects can include: Relic Fragments, Crystal Shards, Weapons, Forces, Essences, Seeds, Pearls, etc.

Beings might include: Spirits, Wizards, Oracles, Giants, Sages, Goddesses, Dragons, Djinn, Sphinx, Angels, etc. Each object will of course be located in a different, far-away Dungeon. The Epic Foe will be Awesomely Tough, even after reuniting all the Pieces. If Major Foe would be for example an Adult Dragon, an Epic Foe would be an Elder Dragon or something even tougher.

Major Foes

A sample List of Big Bads and where to find them.

- Dark Lord: High Level Evil Wizard (Dark Tower)
- Black Knight: High Level Knight (Blocking Bridge)
- Chaos Lord: High Level Chaos Warrior (Bastion of Bedlam)

16	Thin Air: All take 1D6 Damage
17	Village in the Sky
18	Freefall: Save or Disappear
19	Shard Archipelago
20	Sky City

Adventuring Rules

Adventuring

Below are various things the GM and players must be aware of upon entering as dangerous an environment as a Dungeon.

Marching Order

The players and GM must always be cognizant of the Parties Marching Order: Who's in front and Who's in Back. Every Space wide a corridor is will allow Another party member to join the Front Rank. The GM needs to know who Approaches a Door first and who is the first to enter a room. When entering a Room or Facing

off for a Combat Encounter in a Room the players may

want Or need to alter their Rank arrangements.

Movement Rates

Speed:	Notes:
Sprint	Swift +4
Run	Swift +2
Normal	Per Movement Rate
Cautious	Swift -2 (Can still make Search Skill Checks)
Crawl	Move Rate = 1

Noise

Players in conversation can be heard by Foes on the other side of a door. Players in Heavy Armor do not tread quietly. Combats can be extremely loud. Accidentally breaking or dropping things may tip off prospective enemies. Many Monsters have acute hearing. They know you are coming. If the players are arguing, this means that their characters are also arguing.

Light

- Some Underground settings have fluorescent Fungi or glow stone to light The way. Others leave the Characters in utter Blackness. Some Characters will have Infravision, most others require a light Source.
- Players must state who is holding a Torch or a Lantern.
- The GM and players must keep track. Oil and torches get used up. These are usually counted in terms of Days Supply, such as a Days worth of Torches, or a Days worth of Lamp oil.
- Some will flicker out during a Combat (They can later be relit).
- Some Spells and Magic Items provide Light.
- Light Sources can be seen from great Distances by your Foes but the Opposite is not true. Characters without light will be Blinded. Blinded Characters have a tendency to panic.
- Quality of Light is also an issue. A Torch may light up a small room Sufficiently, but in a larger room the ceiling and corners may be Hidden in shadow.

Opening Doors

A successful Lock picking Skill Check might do the trick, but sometimes Brute Force is required. A Flask of Acid will corrode and weaken a Lock Mechanism. Bombs and Exploding Rune Stones work great. Certain Spells are extremely effective: Knock and Lock, Disintegrate, Lightning Bolt, Tunnel, Energy Bolt, etc. Physical means will also work eventually: Hammers, Picks, Crowbars, and even Kicks and Body Slams. Many of these Methods are very Noisy and are sure to attract attention, especially from Anyone on the other side of the door.

Dungeon Time

Lingering in Dungeons is never recommended. The GM should check for Wandering Monsters every hour at least, more if the party is Doing things to attract attention to themselves like being noisy or lighting Up the place. Figure a base 25% of one showing up.

Resting

Short rests (30 Minutes) will allow recovery from Fatigue and Exhaustion. Long Rests (8+ Hours) are required to replenish Spells. Successful Long rests are unlikely due to the presence of wandering monsters.

Wandering Monster Table

1D10	Threat:
1-4	Nuisance Encounter
5-7	Weaker than Party
8-9	Equal Strength to Party
10	Stronger than Party

Searching

Cautious and Paranoid Players will spend lots of Time (Real and In-Game) using the Search Skill to thoroughly examine their surroundings in search of traps, treasures, and secret doors. This can entail an excessive amount of Dice Rolling and secrecy as the GM will not want to tell Players outright that they have failed Skill Checks. One possible Solution to streamline this process is to treat the Party as a single individual. For each hidden thing make one Hard Skill Check modified by Search. Use the highest Search skill of the party (Do not lose your Rogues). The GM can then simply pick which characters find what. This seems to work OK, unless you like rolling lots of dice.

Fatigue Rules

After Several Minutes of Extreme Physical Activity, Individuals will Tire. Running, Fighting, lifting heavy loads can all produce this effect. Fatigue kicks in after 2D4 + X Minutes, where X is the Characters Toughness. The basic Fatigue Penalty is -1 to all Rolls. Another Penalty will be earned every 1D3 + X minutes after the first. For penalties after the first the Character must save or Pass Out for 1D3 Hours.

Encumbrance Rules

Characters have a tendency to weigh themselves down with too much Stuff. Each Encumbrance Penalty

will give a -1 to all Rolls involving Physical Activity and -1 to Movement. #EP = Number of Encumbrance Penalties

Items Carried:	#EP	Notes:
Fully Equipped	0	Armor, Shield, Helm, Full Pouch, Rations, Gear, 2-4 Weapons
Extra Set of Equip	1	Enough for a Another Adventurer
Large Treasure Bag	1	Filled with Gold, Jewelry, Coins, Magic Items
Something Heavy	1	Saddle, Canoe, Table, Barrel, Human Body, War Drum, Crate

Jumps And Leaps

A Character can jump straight up 1.5 times his height. With a running Start a character can clear a 10 Foot Gap (+1 Foot per level). Skill Check: Add Swift Bonus. -1 for Halflings. -2 for Dwarves and Gnomes.

Leaping Attack: Often a Character will Jump off a ledge, Wall, Tree branch, etc. to attack a Foe beneath him. The Attacker gets Attack +2 and Damage +2. There is a 50% the Leaping Attacker will hurt himself also in the Maneuver: Suffer a Light Wound and roll on the Light Wound Table.

Chases

When Chasing a Fleeing Foe, each round, each participant in the Chase rolls 1D20 and Adds their Swift (or Ride) Bonus. The Highest Roll moves farthest. The Run-Away starts with a slight lead. If a pursuer beats the Roll of the Run-Away 2 rounds in a row, he catches him.

If the Run-Away out-runs a pursuer 2 rounds in a row, that pursuer gets too far behind and drops out of the chase. The GM may of course modify aspects of this depending on the details of the Chase. For instance, the Run-Away may have a much larger Head Start. The Pursuers, if far behind, may want to continue the Chase for minutes or hours. If the Run-Away gets out of sight, the Pursuers may require Tracking Skill Checks. Difficult Terrain and obstacles such as running through a crowded market may become an issue for both sides. One side may acquire mounts. Pursuers may not be friendly towards each other. A Wagon may lose a Wheel.

Complications and combat during the Chase will make things more interesting.

Swimming

- A Character can hold his Breath for 2 Minutes.
- The Beginning of Every Minute After that Save vs Death or Drown.
- Get -1 to each consecutive Roll. Add Toughness and Swim Bonuses to Roll.
- A Character with Swim Skill can hold their breath for 3 Minutes.

- A Character without Swim Skill moves at half Speed when Swimming.
- A Character with Swim Skill moves at regular Speed when Swimming.
- A Diving Character gets Swift +2 on the round he dives in.

Climbing

A Character who Fails a Climbing Skill Check will Fall. Rope gives Climb +1. Spikes give Climb +1 Rope and Grappling Hook gives Climb +2. Characters Climb at half their normal move rate.

Make one Climbing Check per 20 Feet or Less. Straight Walls give Climb -2. Ice Walls give Climb -1.

Smooth, Slippery Walls give Climb -2 Rough, Cracked Walls give Climb +1 Walls with Ledges give Climb +1 Sloped Walls or Trees give Climb +1

Falling

Incremental Damage Rule: Every 10 Feet or less after the first adds Damage +1. If a Character Saves vs Fall ignore the Incremental Damage Rule. The Slow Fall skill adds to the Saving throw as long as the Character is able to grab things on the way down.

Consuming Rations

A ration is one days food. Most Settlements will have plenty of food available for a few coins. A small Dungeon may only require a couple of Days to clear.

An expedition to the Underworld could take weeks. A normal load carried by an Adventuring Character would be around 10 Rations.

Diseases

Effects: When you catch a Disease roll 1D3 times on this Table. Incubation Period: The effects of a Disease will begin in 2D20 Hours. A Disease will last 1D4 Weeks.

The Sickness Penalty is a -1 to all Rolls, Saves, and Checks.

List Of Disease Effects

1D20	Disease Effect:	Notes:
1.	Blindness	Blindness Penalty
2.	Deafness	Communication Difficulties
3.	Speed Loss	Move -2
4.	Muscle Weakness	Strength -2
5.	Endurance Loss	Toughness -2
6.	Need for Sleep	18 Hours a Day
7.	Lethal	Save vs Death on Days 2, 3, and 4
8.	Vomiting/ Dizziness	Sick Penalty
9.	Feverish	Sick Penalty
10.	Malaise	Sick Penalty
11.	Delirious	Confusion Penalty
12.	Paralysis	Immobilized
13.	Pain/ Cramps	Sick Penalty
14.	Headaches	Sick Penalty
15.	Lose Voice	Communication Difficulties
16.	Diarrhea	Sick Penalty
17.	Coughing	Sick Penalty
18.	Pox/ Boils	Sick Penalty
19.	Itching/ Rash	Sick Penalty
20.	Shortness of Breath	Strength, Toughness, and Move -1

Recurring NPC's

There is always a chance one of these guys will just randomly show up to make the Parties Day better or worse. Better or at least more interesting than a Wandering Monster. These, of course, are just a sample of what's possible. You never know when your players are going to Develop an unexplained interest in a minor NPC.

Recurring NPC List:

1. Minor Villain - Will harass the party from a distance. Get them to walk into Monster Lairs, Traps, and minion infested Areas. Likes to trick them. Makes Sport of it.
2. Competing Adventure party - Mirror Image of the Party, but more Evil. Will fight them, Steal from them, Intimidate them, and leave them to die every time they have an advantage
3. Halfling Burglar - Nicest little guy ever. However he has a bad habit of stealing Relics From the Party, especially the overpowered ones. If caught will escape.
4. Trouble maker - Unbeknownst to this individual, he accidentally makes trouble for the Party even before they get where they are going. A Merchant or Rogue usually.
5. Love Interests - Meddling. Some cuter than others. Dependents or even Hero types.
6. Bard - Latch on to Party. Looking for inspiration for Stories and Songs. Also Safety in numbers when traveling at night on the roads.
7. Mercenary - Always getting left behind, Separated. Bad Luck. Not too bright.
8. Traveling Merchant- Always asking top dollar. Will make a pretty penny on the Party.

9. Explorer will Exchange Rumors - Filling in empty spaces on his Maps and in his Journals
10. Runaway Princess - She didn't want to get Married.
11. Scoundrel being chased - Lawmen not far behind. Hide me!
12. Duelist with a Vendetta - Always harassing the same Character.
13. Lone Wolf - May have Competing Missions. Might help momentarily or try to Get the Party to leave. Might need help but rarely admits to it.
14. Peaching Priest - Will Heal party in hopes of getting Converts.
15. Alchemist looking for Ingredients - It's just on the top of that Ridge!
16. Ranger with Dire Warnings - Over Dramatic.
17. Quest giver - Wizard, Spy, Noble. Sometimes has Maps, Keys, and other useful items To give those who will do their dirty work for them.
18. Gnome Sky Captain - Balloon Airship. Gnome Crew. Taxi for hire.
19. The Giant Slayers - Will trade relics. Especially Armor that doesn't fit them, and spellcaster Stuff they cannot use. They have Beer! Party of Adventuring Dwarves.
20. Madman speaking nonsense - The occasional good Clue, Rumor, or Warning

Barriers And Obstacles:

Below is a sample List of Actions your party may need to do to navigate or clear a path through a Dungeon. Some are hard. Some are Easy. Some are obvious. Some are not obvious at all. Consequences vary. Some require skill checks, or Spells, or the use of particular items. Some are in the form of puzzles,

traps, tricks, or Creature encounters.

Sample Actions

- put together pieces of map
- find hidden writings on document
- use glasses with multiple colored lenses
- use compass to find cardinal directions underground
- use key in door with 20 magic locks
- burn away cobwebs
- knock ladder lose
- shoot switch
- press switch at bottom of pool
- open covered shaft
- bomb bricked up opening
- crawl through hole
- climb wall sideways
- climb vines
- spiral stairway
- open chest
- break barrier by jumping onto it with all your weight
- find secret passage in grave in wall
- push lid off sarcophagus
- use lever to open sewer grate
- use bolt cutter to break chains
- slide down metal cable using grappling hook
- swing on chandelier to get to balcony
- pull levers up or down
- deflect missile aimed at you
- unbar doors
- jump from moving platform
- climb up chasm
- rotating stone bridge
- use figurine as key
- blocking vines fall limp at smell of pipe-weed
- replace object with one of same exact weight
- open door in spiked wall moving towards you
- jump past swinging axes by learning pattern
- use math to calculate frequency needed
- do not step on trap activating floor stones
- use lasso, whip, or vine to swing across pit
- use floor switch to change height of platforms
- use crystal staff in conjunction with floor map and beam of sunlight
- use mirror to reflect light beam onto light sensitive switch
- light torch to open door
- jump from exact spot
- use portal on floor of pit
- use sliding block to help climb
- needed object behind block in wall
- ring gong or giant bell X number of times
- lower water level to use raft
- shoot embossed metal plate in wall or doorframe

- drop marked block onto target
- fix exposed wiring in contraption
- set dials on apparatus to zero to activate
- align a series of magnets
- set off domino type chain reaction
- place metal discs in specified order on machine
- play correct melody on glass organ
- pick correct cylinder recording for automatic symphony
- Find missing Cog for mechanism
- revive puppet boy to get clues
- animated hands on walls will move you up or down shaft
- use technology skill to decipher control panel
- maneuver block to use as part of a bridge
- reduce light or cross area before false floor tiles become visible
- defeat foes in a certain order to get a hint
- get large foe to trap his head in a small opening
- kill foes before they become fully activated
- foe afraid of water. swim to safety
- get horde to fight you in narrow tunnel
- use maze skill to figure out where hidden passages should be
- sneak past guards

World Building

Alignments And Religion

There are basically 2 Alignments: Good and Evil. Each has a vast assortment of Higher Powers that can Worshipped. Most all Player Characters are considered to be of the Good Alignment.

Priests in particular must specify the exact Entities they Worship and draw their Powers from. Other classes may call upon any number of Beings without expecting any Divine Interventions.

Good Aligned Powers include: The Lords of Light, Gods of Nature, Angels, Devas, Solarians, Cherubs, Lords of Law, Good Dragons, The Good Gods of Various Pantheons, Saints, Gods of Mercy, Gods of Justice, Gods of Vengeance, Ascended Souls, Holy Spirits, Dwarven Ancestors, Demi-Gods, Celestials, Eternal Champions, etc.

Evil Aligned Powers include: Demon Lords, Devil Princes, Cosmic Horrors, Dead Gods, Lords of Darkness, Lords of Chaos, Outer Gods, Elder Gods, Alien Gods, Evil Dragons, Insane Gods, Gods of Death and the Underworld, Greater Abominations, Bestial Gods, Shadow Lords, Nether Lords, Gods of Disease, Pestilence, War, Destruction, etc.

Traveling Speeds

Journeys, Voyages, Quests. Speed = Distance Covered per Day in Miles

Method:	Speed:	Notes:
Foot, Marching Troops	20	
Wagon, Cart	25	Donkey, Mule
Elephant, Camel	25	Large Pack Animals
Large Monsters	25

Galleon, Man-of-War	60	
Slow Flyers	100	
Medium Flyers	150	
Fast Fliers	200+	

Cost Of Hirelings And Followers

Hirelings Table

Type:	Cost:
Desperate Civilians	These will pay you for Protection. Trainable
Gullible Humanoids	1-3 Gold per Day. Not welcome in Civilized Lands
Low Quality Hirelings	4-5 Gold per Day. Hazard Pay. Poorly Equipped
Former Brigands	6-7 Gold per Day. Treacherous. Low Morale
Typical Mercenaries	8-10 Gold per Day. Reduced Share in Treasure
Better Mercenaries	11-15 Gold per Day. Reduced Share. Well Equipped
Hero Quality Retainers	16-20+ Gold per Day. Equal Share in Treasure
Charmed Persons	Nothing. May be Poorly Equipped. Always Loyal
Fanatics, Zealots, Cultists	A Pittance. Will only Follow Religious Leader
Knights, Honorable Fighters	Varies. Less if Vow or Oath of Service Involved
Page, Squire, Adept, Disciple	Simple Upkeep. Promise of Training, Knowledge
Slave or Prisoner Soldiers	Nothing. Threats and Brutality keep them in Line

Quick Villages And Towns

These will be located at Crossroads. Most will have a large Stream or small River running through them. The 3 Main Establishments will be a Mill, a Church, and an Inn. The Houses and Shops of Merchants and Craftsmen will be located near the center of town. Farms, Orchards, and Pastures will be located farther out. The next Settlement will be a days travel (20 Miles away)

Holidays, Holy Days, Feast Days, Trade Days, Festivals, And Fairs

These can be Major or Minor. They may have a Religious, Historical, Agricultural, or Economic origin. Many are Seasonal: Fall, Winter, Spring, Summer For example: A Market Day may be in the Fall, post-Harvest.

A Courting (May-pole) Festival might take place in the Spring. Festive Activities may include: Cooking, Decorating, Contests, Music, Singing, Dancing, Sto-

rytelling, Ceremonies, Acrobats, Jugglers, Bonfires, Plays, Fireworks, Masks, Gift Giving, Rituals, Processions, and Parades.

Contests And Tournaments

Activities include: Games, Sports, Races, Feats of Strength, Archery, Equestrian Skills, Hammer, Spear, Discus Throws, Boxing, Wrestling, Jumps, Debates, Pie Eating, Jousting, Knightly Melees

Craft Guilds

Craft Guilds are found in Large Towns and Cities. They demand that practitioners join the Guilds and pay the Dues. They will provide apprenticeships to younger members. Each Trade skill will be represented by its own unique Guild.

Merchant Guild

A Merchant Guild is found in Large Towns and Cities. They demand that practitioners join the Guilds and pay the Dues. Members will own Shops, Warehouses, Caravans, and Trade Ships.

They can provide Armed Escorts, Bodyguards, Insurance, and Banking Services.

Thieves Guilds

Basically Criminal Organizations. You better pay your dues. Actively engaged in Theft, Smuggling, Contraband, Fencing, Racketeering, Protectionism, Collections, Spying, Gambling, Begging, and Assassinations. Some specialize, others have their hands in every pot. Many prefer to recruit young street orphans.

Fighter Orders

There can be a great variety in these. For example: Companies of Free Lances, Mercenary Troops, Bodyguards, Marines, The Holy order of Templars, Hospitalers, Gladiator Schools, Fencing Schools, Dojos, Knightly Orders, Fighter Academies, Rangers of the North, The Red Riders, etc.

Mage Orders

These are fewer in number than Fighter Orders: Wizard Schools, The Circle of Good Mages, Alchemists Guild, The Great Library. Most Mages are highly secretive and may never pass on their hard earned knowledge. Others may only take on one apprentice at a time, or in a lifetime. Mages can be hired to cast Spells, brew potions, and Forge Magic Items.

Cosmopolitan City Encounter Table

Temples, Cults, And Churches

Usually one Celestial power and his/her followers dominate the worship in a City. In others, one may find a Temple Row, devoted to a plethora of Pantheons. Shrines devoted to the powers of Chaos and Evil can always be found, but these are always well hidden. Primitive tribes will have Shamans, and the sacred groves of Druids can be found deep in most Forests and other Terrains as well.

City Temples will actively collect tithes and indulgences. They will also charge handsomely for casting Spells that heal and cure.

Law And Order

- In most cases the Whims of a Noble is the Law. Might makes Right.
- Usually the local Nobility will be in charge of keeping the peace as well as a maintaining a Military Garrison, and possibly a Private Army.
- The local Law enforcement may be divided into several organizations: City Guard, Night Watch, Port Authority, Bureau of Monster Hunting, Department of Undead Control, Ghost Busters, etc. Many of these groups will be more or less corrupt or only competent enough to handle the local pickpockets.
- Every place will have its own set of obscure Laws that usually benefit the powers that be. There will also be enough Religious Laws, Magical Mandates, Royal Decrees, and Military Proclamations, that the party may want to invest a few Skill Levels in Law just to avoid them.
- Lawyers (Barristers) can always be hired in Lieu of breaking out of Jail.
- Imprisonment is a common punishment, but the party will also encounter: Dismemberment, Public Humiliation, Branding, Torture, Fines, Ball and Chain, Quarry Work, Sale into Slavery, Trial by Combat, the Gladiator Pits, and Death Sentences.
- Jails may range from tower accommodations with fine dining to Dark, Muddy Pits with nothing but cockroaches to eat. Characters who repeatedly escape imprisonment will, upon recapture, be given increasingly harsh sentences including magical restraints.
- Tax Men will be accompanied by a Chest of coins and a Dozen Soldiers Each. Tariffs are collected at the gates, at the docks, and in the streets.

-		Roads, Post Offices, Fire Stations, Aqueduct
10	Gatherings	Festivals, Fairs, Circuses, Carnivals,
-		Competitions, Feasts, Tournaments, Holy Days

World Hex Map Generator

First draw the outlines of 1D4 Continents on a Hex Map

Hex Features

20 miles across. 1 days travel. what's in a Hex?

Primary Terrain Of A Hex (table)

#	Description
1	Coastal or Island: or roll again or pick one
2	Large River or Delta: or roll again or pick one
3	Mountains, Crag
4	Hills
5	Desert, Salt Flats, Dunes
6	Forest, Woods, Groves, Glades
7	Plains, Steppes, Heath, Farmland
8	Swamps, Bogs, Marsh Fens, Estuary
9	Cold, Tundra, Arctic, Taiga, Glacial
10	Barrens, Wasteland, Badlands, Brokenlands
11	Jungle, Rainforest, or Fungal or roll again
12	Sylvan Woods or Savanna or roll again
13	Volcanic or roll again
14	Large Lake: or roll again or pick one
15	Valley (Guaranteed 1 River)
16	same as last roll or pick one
17-20	GM picks

Hex Population Table

#	Description
1-4	Wilderness - Sparse 1D20 x 1D10
5-7	Light - Villages 1D20 x 100
8-9	Medium - Villages and Towns 2D6 x 1000
10	Heavy - Villages and Towns and City 2D6 x 10,000
11-12	Monstrous - Ruins, Humanoids, Dragon, Giants

Water Sources

#	Description
1-2	River
3-4	Small Lakes
5-7	Streams, Creeks
8	Deep Wells (by Settlements only)

Notes: Cold climes will usually have Snow and Ice plus roll 1D3 times Swamps are their own water sources plus roll 1D3 times For Deserts roll (1D3 -

1D3) times plus 50% for an Oasis For Volcanic roll (1D4 - 1D3) times. For Jungle roll 2D4 times For Forest and Farmland roll 1D6 times. For Coastal roll 1D4 times For Plains, Savannas, Hills, and Mountains roll 1D3 times For Broken Lands roll 1D2 times

Mine Type Table

1. Copper
2. Silver

- 3. Gold
- 4. Tin
- 5. Iron
- 6. Iron
- 7. Gems
- 8. Sulfur
- 9. Mercury
- 10. Crystal

Note: Most Hexes have the potential for a few (1D3) Small Mines. 1D6 Larger Mines will be found in Mountains and Hills.

Quarry Type Table

- 1. Granite
- 2. Sandstone
- 3. Marble
- 4. Limestone
- 5. Slate
- 6. Basalt
- 7. Quartzite

Geo-political Event Table

1D20	Event:
1	Goblin Raiders becoming a major nuisance
2	Orc Marauders Terrorizing Countryside
3	Flooding: 1 Hex from River or Sea
4	Blight: 1 Hex
5	Plague: Entire Region
6	Pestilence: 1 Hex
7	Drought: Entire Region
8	Harvest Time: Food and Income
9	Holy Day: Major Religion
10	Festival: Minor Holiday
11	Peace in our Time
12	Prosperity

14	Pirate Raids: All Coastal Hexes
15	Bandits: 1 Hex
16	Brigands: 1 Hex
17	Minor Monster on the loose: 1 Village
18	Major Monster running Amok: 1 Hex
19	A Minor Hero offers Services
20	Horse People Invasion
21	Earthquake: 1 Hex
22	Volcano: 1 Mountain Hex
23	Tidal Wave: 1 Coastal Hex
24	Blizzard or Heat Wave or Storms: 1D6 Hexes
25	Tribal Migrations: Tens of Thousands of People
26	Receive Trade Delegation
27	New Trade Route Opportunity
28	Merchant Shipping getting Pirated
29	Trade Caravans getting Attacked
30	Assassination attempt on major Personage

- 8. Gneiss

Note: Stone of 1 type can always be quarried in Mountains, Hills, and Barrens. Salt is always available on Coasts, Islands, and Salt Flats.

War And Politics

Geo-politics

Geopolitical Sessions occur when characters are high enough Level to have their own holdings. This can also be done quickly At the beginning or ending of an evening involving a more Typical Quest or Dungeon Crawl. If a War is being fought, this Could easily take up a whole evening. Roll once on the Geo-Political Event table to see what is happening in the Kingdom. In general Roll once per month per Superhex (1 Hex and surrounding 6 Hexes). Some results are innocuous. Others can lead to the downfall of A once prosperous kingdom.

1D20	Event:
31	New Dungeon Discovered
32	New Portal Discovered
33	A New Major Foe Sets-Up Shop
34	Peasant Uprising: 1 Hex
35	Heresy in Major Religion
36	Land Dispute: Neighboring Kingdom
37	Trade Dispute: Trade Partner
38	Major Raids: Nearby Nation
39	Border Skirmishes: Neighboring Kingdom
40	Major Artifact Unearthed: Continent
41	Major Fire: One City
42	Feuding Noble Families: Internal
43	Major Foe Attacks
44	Declaration of War: By Neighboring Kingdom
45	Regional War: Two Nearby Kingdoms
46	Asked to Join War as Ally: Nearby Kingdom
47	Nearby Kingdom Destroyed/Conquered
48	Court Intrigue
49	Royal Wedding
50	Promising Noble comes of Age
51	A Noble is Born
52	Crusade or Jihad is Called
53	Technological Improvement
54	New Fashion
55	A Great Work of Art/Literature/Music is Produced
56	A New Temple is built
57	A New Religion gains many followers

91	Subversion: Troops join Enemy
92	Refugees: Increase your population
93	Emigration: Population losses
94	Land is Degraded: Becomes Desert, Swamp
95	Racial Tension: Riots, Killings
96	Religious Tension: Riots, Killings
97	Economic Downturn: Depression, Recession
98	Madness: Noble goes mad
99	Spoilage: Stored Crops
00	Haunting: Castle, Countryside

What Rulers Do

Besides from dealing with events and Crises, you get to Collect Taxes! Basically you get 1 Gold per Population per Year in taxes. A village will have average 300 people. A County (1 Hex) will have around 60,000 people. Severe Taxes would be double this or More.

A Basic Soldier is paid 1 Gold per Month. Gold can be used to build Armies, Fleets, Castles, Arenas, Aqueducts, Irrigation, Harbors, Lighthouses, Libraries, Bridges, Roads, Walls, Outposts, etc. as well as paying For soldiers, officials, and other retainers. This can also Go to the funding of the Magical manufacture of Relics. Other possibilities include:

- Throwing Parties and Feasts
- Hosting Tournaments, Jousts, and Contests
- Spending quality time in your Harem
- Bribing the Masses with Bread and Circuses
- Holding Lavish Courts to impress Nobles and Foreign Dignitaries
- Deploying Spies, Moles, Saboteurs, and Assassins
- Training Troops and Underlings
- Raiding your Neighbors
- Going to War with your Neighbors
- Resolving Judicial Matters
- Signing Papers

- Arguing with your Advisors
- Purging Traitors and Banishing Undesirables
- Improving Basic Services: Law, Fire, Sewage
- Improving your Agriculture and Industry
- Issuing Decrees of questionable merit
- Granting Titles and Lands to new or existing Nobles
- Hiring Retainers for important court positions
- Adding to the Aviary or Bestiary or Trophy Room
- Brooding, Fiddling, or Ranting and Raving

Morale For Large Battles

During Regular Combat (Not the direct result of Spells or Magic) Characters and Troops may Panic (25% Surrender 25% Fighting Withdrawal 25% Flee 25% Rout). Morale Checks can be made multiple times during a Battle and for different reasons:

1. Facing Overwhelming Odds.
2. Foes are Monstrous or Magical. Immune to Normal Weapons
3. Your Side has taken many Casualties.
4. Allies are Fleeing or Routing.

Commanders may make Leadership Skill Checks to Rally Panicked Troops. Panicked Troops will lose Cohesion and become Disordered. They lose Formation Bonuses.

Mass Battle Unit Combat Factor List

CF	Unit Type:
4	Peasant Rabble, Kobold
5	Levied Troops, Imp, Halfling, Gnome, Goblin, Wolf
6	Militia, Dwarf, Elf
7	Soldiers, Orc, Hobgoblin
11	Sprite

CF	Unit Type:
12	Gnoll, Lizard Man, Human Cavalry
17	Clay Golem, Zombie
18	Bugbear
20	Hero, Spellcaster
20	Minotaur
22	Ogre, Treant, Werewolf, Medusa
24	Hill Giant
25	Centaur, Warg, Unicorn
27	Mountain Troll
30	Manticore
32	Vampire
42	Young Dragon
44	Stone Giant
47	Lich
49	Sphinx
52	Fire Giant, Frost Giant
62	Tentacle Monster
64	Adult Dragon
75	Cloud Giant
85	Large Hydra
89	Storm Giant
99	Pit Fiend
115	Titan
120	Legendary Dragon
148	Kraken

Mass Battle Rules

Mass Battles are Fights between large numbers of Combatants. An individual Combatant is referred to as a Troop. A group of Troops is referred to as a Unit.

Each Troop has a Combat Factor (CF). Refer to the Unit List. In General, all Troops in a Unit are identical and have the same CF. The Total CF (TCF) of a Unit is equal to the ((Number of Troops in the Unit) x (Their CF))

Example: A Unit of 1000 Soldiers. Each Soldier has a CF of 7. The TCF of the Unit = 7000.

Example: A Unit of 200 Ogres. Each Ogre has a CF of 22. The TCF of the Unit = 4400.

Battles take place in Battle Turns. Two opposing Units face off in a Battle Turn. In this example the Soldiers are Fighting the Ogres.

During a Battle Turn each Fighting Unit makes a 1D10 x 10 Battle Roll and converts this to A Percentage. They then multiply this with the TCF to get a Battle Damage Total (BDT). Subtract the BDT from the Foe's TCF to get a new TCF for the Foe.

For example: The Soldiers make a Battle Roll of 70%. Their BDT = 0.7 x 7000 = 4,900. This BDT is more than the TCF of the Ogres, so they are completely wiped out.

The Ogres make a Battle Roll of 50%. Their BDT = 0.5 x 4400 = 2200. The TCF of the Soldiers is reduced to 7000 - 2200 = 4,800. In terms of numbers of Troops they are reduced from 1000 Troops to 686 Troops.

Unit Movement

Players Roll high on 1D20 to see which side moves its Units first each Battle Turn. Add the Leaders Strategy Skill to the Strategic Initiative Roll. Units can Move up to 2 Spaces per Battle Turn.

Fast Units can move 3 Spaces. Flying Units can move 4 Spaces and ignore Terrain Modifications. A Unit can Fight any Adjacent Enemy Unit at the cost of 1 Movement Point.

A Space containing Difficult Terrain costs 2 Movement Points to Enter. It costs 1 Movement Point to Change a Formation or put a Unit in Formation. Defensive Formations cannot Move.

Formations

Troops that are capable of it can form up in Formations. Formations are usually established at the beginning of a Battle Each Troop gets +2 CF when in an Attack Formation. Each Troop gets +3 CF when in a Defense Formation.

Formations must have a minimum of 30 Troops. A Unit that fails a Morale Check becomes Disordered and goes out of Formation. Sample Attack Formations: Attack Column, Marching Phalanx, Skirmish Line, Advance by Ranks, Wedge, Checkerboard, Pincer, Assault Sample Defense Formations: Square, Circle, Defensive Line, Fortified Position

Strategic Skill Contests

Before the Battle Rolls are made, opposing Leaders may make a 1D20 Strategy Roll. Add the Leaders Strategy Skill to the Strategy Roll. The Winner gets +10 to his own Battle Rolls.

The Loser gets -10 to his Battle Rolls. Make a New Strategy Roll at the beginning of each Battle Turn.

Sea Voyage Table

1D50	Encounter:
1	Desert Island: Nothing
2	Sargasso Sea: Delayed
3	Doldrums: Delayed
4	Lost: Delayed
5	Monsoon: Storm
6	Tidal Wave: Storm
7	Hurricane: Storm
8	Tropical Paradise: Resupply
9	Ghost Ship: Pirates
10	Sea Serpent: Monster
11	Kraken: Monster
12	Leviathan: Monster
13	Merfolk: Sea People
14	Cursed Ship: Pirates
15	Skeleton Crew: Pirates
16	Port: Resupply
17	Harbor: Resupply
18	Cannibal Island: Dangerous Resupply
19	Sea Devils: Sea People
20	Safe Passage: Counts as 2 Encounters
21	School of Fish: Resupply Rations
22	Tritons: Sea People
24	Shipwreck Survivors: Add Crew
25	Spoilage: Out of Rations
26	Mutinous Crew: Mutiny

Sea Voyage Monsters

You will have to fight these. Cutting off a Few Tentacles, Hurting an Eye, or Feeding them a Few Crew Members is Often enough to send them on their way.

Pirates

A Pirate ship will have average 50 Crew. If less they may Offer you to join their crew. Outrun them if you can. Some you have to fight. Some it may just be better to Surrender to.

Sea People

Some races are nicer than others. Often they just want to trade. If you look weak and they are strong, they will attack.

For Each Day Without A Ship Table

Wilderness Treks

Sea Voyages

These can be perilous. To cross the sea will require 1D8 consecutive encounters. Roll 1D50 on the Sea Voyage Table:

1D50	Encounter:
27	Sirens: Monster
28	Giant Octopus: Monster
29	Sea Dragon: Monster
30	Crab Men: Sea People
31	Buccaneers: Pirates
32	Corsairs: Pirates
33	Undead Sea Rovers: Pirates
34	Fishing Village: Resupply
35	Pirate Town: Dangerous Resupply
36	Reef: Damage Hull
37	Rocks: Damage Hull
38	Shallows: Damage Hull
39	Giant Whirlpool: Storm
40	Dolphins: All Gain Luck +1
41	Strong Headwinds: Delay
42	Sea Turtles: Resupply Food
43	Whale Sighting: Nothing
44	Dinosaur Island: Dangerous Resupply
45	Flying Fish: Resupply Fish
46	Calm Sea: Nothing
47	Driftwood: Nothing
48	Stowaway: Add Crew
49	Giant Squid: Monster
50	Flotsam and Jetsam: Nothing

Delays

Each Delay has a 50% chance of using up all your rations. At the end of every encounter without rations there is a 25% the Crew will Mutiny.

Resupply

Fill up on Rations and Water. Medical Help may be available. Regain Power Points and Luck Points.

Storms & Hull Damage

If you lose the Ship you are shipwrecked. Drowning, Sharks, and Dehydration are now options. It is assumed the Survivors are on A raft or grabbing onto some Flotsam and Jetsam. Roll 1D6 on the For each Day without a Ship Table:

1D10	Result
1	Someone Dies of Dehydration
2	Storm: Someone Drowns
3	Possible Hypothermia or Heat Stroke
4	Shark Attack
5	Picked up by a Fishing Boat

1D10	Result
6	Picked up by a Merchant Vessel
7	Captured by Sea People
8	Washed up on a Friendly Shore
9	Washed up on a Dangerous Shore
10	Picked up by Pirates

Arial Encounter Table

1D60	Encounter:
1	Dragon

Starting Classes

Introduction

RPG Fantasy Rules.

Character Creation

The Player must pick a Class for his Character. The Class List will show all starting Skills, Abilities, and Spells. The player also needs to Name his Character.

Starting Traits

- All Characters Start with a Wound Level (WL).
- For Humans, Half-Orcs, Dwarves, and Elves the Starting Wound Level is 4.
- For Halflings and Gnomes the Starting Wound Level is 3.
- The Toughness Skill will increase a Character's Wound Level.
- All Characters Start with a Movement Rating (MR).
- For Humans, Half-Orcs, and Elves the Starting Movement Rating is 6.
- For Dwarves, Halflings, and Gnomes the Starting Movement Rating is 4.
- The Swift Skill will increase a Character's Movement Rating.

Heroic Attributes

There are 9 possible Heroic Attributes.

- First, pick one Attribute that the Character will definitely have.
- Second, Roll 1D3 +1 to see how many more attributes the Character gets (Total 3-5).
- Third, Roll for each of these on the Attribute Table to see what they are.

There are no levels in Attributes. Either you have it or you don't. Reroll Duplicates. Keep track of what attributes you have.

1D10	Attribute:	Notes:
1	Spirit	Get +1 to all Morale and Social Interaction Rolls
2	Magic	Get 2 Advantages of your Choice (on the Background Page)
3	Body	Get +1 to Strength and Toughness
4	Mind	Get +1 to all Lore Skill Rolls and Spell Checks
5	Will	Get +1 to all Skill Rolls not affected by other Attributes
6	Speed	Get +1 to Defense and Swiftness
7	Fate	Get +1 to all Saving Throws
8	Wits	Get +1 to all Detection type Skill Rolls
9	Prowess	Get +1 to all Attack Rolls
10+	Pick One	Players Choice

Character Class Archetypes

There are 4 Basic Class Archetypes: Fighter, Rogue, Mage, and Priest. Below are the classic examples of each of the 4 Class Types:

Warrior/mercenary (fighter)

- Skills: Toughness +2 (Added to Wound Level), Melee Weapons +2 (Attack Bonus),
- Strength +2 (Damage Bonus), Shield +1 (Defense Bonus if using a Shield),
- Heavy Armor (Wear Heavy Armor with no Penalties), Initiative +1,
- Dual Wield (Use 2 Weapons with no Penalties), Dodge +2 (Defense Bonus),
- Brawl +2 (Attack Bonus to Unarmed Attacks: Strikes and Grappling),
- Tactics +1 (Allies attacking same Foe as you get +1 Attack Bonus),
- Leadership +4 (Bonus to Rally, increase Morale), Swift +1 (Move Speed)
- Starting Items: Medium Armor, Dagger, Two Melee Weapons, Cloak, Medium Shield

Thief (rogue)

- Skills: Stealth +5 (Bonus to Hide, Sneak, Surprise), Climb +5 (Walls),
- Dodge +2 (Defense Bonus), Pick Pocket +5, Escape Artist +4 (Slip Bonds),
- Backstab +4 (Damage Bonus when attacking from behind), Swift +2 (Move Speed),
- Locks +4 (Pick Locks), Search +5 (Find Traps, Secret Doors, Treasure),
- Streetwise +5 (Rumors, Favors, Contacts, Dangers), Dagger +1
- Starting Items: Leather Armor, Dagger, Sap, Cloak, 10 foot pole, Rope and Grappling Hook (Climb +2), Lockpick Kit

Cleric (priest)

- Magic: Clerical List = 4, Healing List = 2
- Skills: Shield +1, Heavy Armor, Religion +5 (Concentration on own Religion),
- Preach +4 (Convert the Heathen. Often takes Several Successful Attempts in a Row),

- Blunt Weapon +1 (Attack Bonus), Wisdom (Get GM's Opinion)
- Starting Items: Medium Armor, Medium Shield, Mace, Holy Symbol, 1D4 Vials of Holy Water

Thaumaturge (mage)

- Magic: Thaumaturgy List = 7, Cantrip List = 2
- Skills: Staff & Dagger +1 (Attack Bonus), Arcane Lore +5 (Theory of Magic)
- Starting Items: Robes, Hat, Dagger, Staff, Spell Components, Spell Book, Spy Glass, Wax, Starch, Chisel, Crucible, Tinder Box

Racial Classes

Some Classes are associated with particular non-human Races. Several examples are given below:

Halfling Burglar (rogue)

- Skills: Dodge +2, Stealth +4, Sling +2, Short Sword +2, Climb +4,
- Gardening +4, Fishing +4, Cooking +4 (Tasty and Nutritious),
- Pipeweed +4 (Identify, Grow, Uses. Produce Short Range Smoke Rings),
- Luck (Once per day get +5 to one Target Die-Roll),
- Cheer +5 (Raise Spirits of Allies. Remove Anger and Frustration),
- Alertness +4 (Detect Hidden or Distant Foes), Locks +5, Search +5
- Starting Items: Dagger, Short Sword, Cloak, Sling & Stones, Pipe & 1D6 Weeds, Regular Clothing, Bag of 10 Rations, Cooking Gear, Flint & Tinder, Lockpick Kit

- Skills: Toughness +3, Martyr (Receive Attack directed at Adj Ally), Strength +1,
- Shield +1, Heavy Armor, Mining +4, History +4, Song +4 (Haunting, Sad Ballads),
- Hammer +2, Pick +2, Axe +2, Sword +1, Crossbow +1, Carousing +5 (Famed Drinkers),
- Search +3, Climb +3 (Mountaineering, Spelunking)
- Starting Items: Heavy Armor, Med Shield, Cloak, Hammer, Dagger, Crossbow & Bolts

Gnome Prankster (rogue)

- Skills: Guile +5, Pickpocket +5, Gossip +5, Locks +5, Search +5
- Climb +3, Carousing +5, Pranks +5, Taunt +5, Jest +5, Luck, Stealth +5,
- Alertness +5, Streetwise +5, Wits +5 (Solving Puzzles), Riddles +4,
- Dodge +3, Ventriloquism +5, All Weapons +1
- Starting Items: Lockpick Kit, Cloak, Brace of Daggers Rope and Grappling Hook (Climb +2), Bag of Tricks (Pranks +1)

Character Background

Players may want to fill in some Background notes on their Favorite Characters. The Following Page gives ideas for Background Histories, Motivations, (Dis)Advantages, and Personality Traits:

Each player starts with 5 Motivations, 1 Disadvantage, and 1 Advantage. Each player starts with 0 Destiny Points. Personality Traits are optional. They are good for NPC's.

Background Histories are not required, but they are fun. It is recommended each player starts with 1 Background History (Picked or Random).

Starting Item Variants

Characters start with 20 Gold Pieces in a small Pouch and a standard set of starting items depending on their Class. The GM may let the Player alter this. For instance the player has a cool miniature of a Fighter with a Bow and Arrows. The GM may allow for these instead of a second Melee weapon for the Players Warrior Character.

Languages And Literacy

Chance Of Having The Literacy Skill

Lower Class Humans (25%). Middle and Upper Class Humans (85%). Most all Demi-Humans are Literate (90%).

Chance Of Knowing A Language

- Most Humans, Demi-Humans, and Fey speak a version of Common (95%).
- Most Humans speak a second Ethnic Language (75%).
- All Demi-Humans speak a second Racial Language (95%).
- Wood Elves and Gnomes can speak Fey (85%).
- Most Humanoids and Giants speak a version of the Dark Tongue (95%).
- Most Humanoids and Giants speak a second Racial Language (75%).
- Most Humanoids and Giants also speak a smattering of Common (75%).
- Demons speak a Language called Infernal and either Common or Dark Tongue (85%).
- Dragons speak a Language called Draconian and either Common or Dark Tongue (95%).

Lifespans

Halflings live twice as long as Men. Dwarves and Giants live twice as long as Halflings. Elves live twice as long as Dwarves.

Gnomes fall between Halflings and Dwarves. Humanoids live half as long as Men.

Racial Bonuses

Most all of the Classes above were created with Humans in Mind. Some Classes are particular to a specific Race such as the Halfling Burglar or Gnomish Prankster. However many Classes are available to different Demi-Humans. To make Demi-Human version of a Class simply add the indicated Bonus:

Humans

Gossip +2

Great Men (wild Men)

Strength +1

Hairfoot Halfling

Cook +2

Stout Halfling

Brew +2

Lightfoot Halfling

Cheer +2

High Elf (northern)

Wild Magic +1

97	Fear, Anger, Rage, Wrath
98	Oath, Promise, Vow, Resolution
99	Boredom, Ennui
00	Want a Specific Artifact, Relic

Destiny Points

Pick 5 Motivations from those listed above for your Character. Fulfilling all Character Motivations gets you a Reward- get 1 Destiny point. Fulfilment can either be by satisfying the Motivation or Eliminating it, whichever is more appropriate. You may save up Destiny Points.

Use up a Destiny Point to pick the result of 1 Diceroll. After you earn a Destiny Point pick 5 new Motivations.

Gods Worshipped

The Character may worship some, none, or all of the Gods. Most characters will be assumed to be of

the Good (Lawful) Alignment. Players should ask the GM what Gods he is making available.

Worship may range from a token affinity to Priestly devotion.

Dependants

These are living Friends and Relatives you still see on a regular basis and Who depend on you in some way. You may be especially close. They may Need financial Support. They may need Supervision or Protection. They May be worried about you or expect you home for dinner. You are Wanted and needed. You have both support and obligations. Pick freely off this List and/or Roll 1D6 - 2 Times on the Table to determine what dependents you have:

Dependents Table/list

1D30	Dependents
1	Parents
2	Mother
3	Father
4	Sibling(s)
5	Brother(s)
6	Sister(s)
7	Husband or Wife
8	Children
9	Grandparent(s)
10	Aunt and/or Uncle
11	Cousin(s)

1D30	Dependents
12	Girlfriend/Boyfriend
13	Childhood Friend(s)
14	Drinking Buddies
15	Orphan(s) or Prostitutes
16	Villager(s) or Tribe
17	Substitute Family
18	Partner(s)
19	Pet or Monster Friend
20	Mentor
21-25	Small Family
26-30	Large Extended Family

Family/clan

What Family and/or Clan you belong to. This will also determine other things like Social Class, Dependents, and Background Story. a powerful family can mean that in addition to wealth and other Resources, you have obligations and enemies as well. In real life you can't pick your family, but in RPG's you can, so

have fun with it and be creative.

Social Class

Every culture type will have its own set of Social Class Designations. The Profession a player has chosen will limit his choices. Once players start adventuring their social class will often change dramatically

according to their fortunes.

Adventurers are often considered outsiders and will be rejected by parts of the existing social order. Players

are with the GM's permission free to choose any starting Social class they like. The GM may have players pick a result or simply roll on the Class Table:

Class Table

1D8	Social Class (Medieval):
1	Slave or Escaped Slave: Humanoids, Beggars
2	Lower Criminal Class: Rogue, Pirate, Gypsy
3	Lower Working Class: Peasant, Servant, Musician, Mercenary, Soldier
4	Middle Monied Class: Craftsman, Merchant, Miller, Inn Keeper
4	Middle Learned Class: Scholar, Mage, Priest
6	Minor Nobility: Knight, Gentry, Official, Courtesan
7	Major Nobility: Count, Baron, Senator, Guild Master
8	Greater Nobility: Duke, Admiral, General, Royalty, Imperial

Wealth And Possessions

Starting Characters get only what the GM gives them per their Class Description. Different worlds will have very different class systems and measures of wealth. In general most Adventurers can expect to start things off with only the clothes on their back, a couple of weapons, and a handful of Coins in a pouch.

The player may be a Landowner. His Estates will have value and will generate incomes. Only some of a Characters wealth may exist in liquid form: Gold Coins and equivalents. Servants and slaves have value. Magic Items are certainly of great rarity and value.

Reputation

This is highly variable. It will be limited to a time and place. It may be good or bad. It will incur a Charisma Bonus or Penalty. It is possible for a Character to have multiple Reputations in different locales. For some professions, like entertainers, reputation, or Fame, is extremely important. Many men spend a great deal of time, money, and effort cultivating their Reputation.

Character Relationships

Use the table below to quickly determine a relationship between two characters or groups. This can be used for starting relationships between PC's.

Established Relationship Table

1D60	Relationship:	1D60	Relationship:
1	Mutual Trust	31	Exasperated
2	Strangers	32	Intimidated
3	Acquaintances	33	Idolized

17	Brotherly	47	Arrogant
18	Protective	48	Bitchy
19	Bullying	49	Commiserating

1D60	Relationship:
20	Nagging
21	Impatience
22	Codependent
23	Envious
24	Domineering
25	Passive Aggressive
26	Take for Granted
27	Polite
28	Conversational
29	Comradery
30	Avoidant

1D60	Relationship:
50	Complaining
51	Secretive
52	Withdrawn
53	Allegiance
54	Blood Debt
55	Comedic
56	Mean
57	Stubborn
58	Shared Passion
59	Low Opinion
60	Congenial

Alignment

The Characters Alignment will usually match that of his Gods. There is one Primary Axis: Good (Law) - Evil (Chaos) Alignment on any Axis can change de-

pending on the Characters actions. The Primary Axis is necessary for many purposes, however other Secondary Axes can Flesh out a Characters Personality. There are multiple possible Secondary Axes:

#	Descr
Realist	Imaginative (How you deal with Information)
Rational	Passionate (How you make Decisions)
Extravert	Introvert (How you are Focused)
Judgmental	Flexible (How you Live your Life)
Disciplined	Wild (Your Degree of Self-Control)
Super Ego	Ego (Do you care more about yourself or Others)

Advantages

A Starting Character picks 1 Advantage. These are similar to Skills, but harder to come by. You are usually born with them, but occasionally you can acquire them later in life. Purchase like Skills.

These are sub-specialties of available Trade Skills. The GM has to approve their creation.

- Example #1: The Trade Skill is Weapon Smith. A Specialized Trade is Swords.
- Example #2: The Trade Skill is Armorer. A Specialized Trade is Shields.

Monster Rules

Comparative Sizes

This Chart gives players some Idea of how big things are compared to each other.

WL Wound Level

#	Size:	WL:	Examples:
1	Diminutive	1	Insects, Bugs
2	Tiny	1	Mouse, Frog, Fairy, Brownie
3	Little	2	Cat, Dragon Hatchling, Imp, Sprite
4	Runty	3	Dog, Kobold, Dragon Whelp, Red Cap, Lynx
5	Small	3	Halfling, Gnome, Goblin, Faun, Wolf, Pixie
6	Short	4	Dwarf, Elf, Pony, Hell Hound, Panther
7	Human	4	Orc, Hobgoblin, Satyr, Snake Man, Clay Golem
8	Tall	5	Gnoll, Lizard Man, Werewolf, Brick Golem, Lion
9	Large	6	Bugbear, Angel, Dire Wolf, Stone Golem, Tiger, Chimera
10	Big	7	Horse, Centaur, Minotaur, Unicorn, Warg, Manticore
11	Giant	10	Ogre, Mountain Troll, Young Dragon, Treant, Rhino
12	Hulking	15	Hill Giant, Mature Dragon, Horned Demon, Elephant
13	Enormous (1)	20	Stone Giant, Adult Dragon, Sphinx, Mammoth, T. Rex
14	Huge (2)	30	Fire Giant, Elder Dragon, Tentacle Monster, Whale, Roc
15	Immense (3)	40	Cloud Giant, Ancient Dragon, Large Hydra
16	Gigantic (4)	50	Storm Giant, Epic Dragon, Pit Fiend
17	Gargantuan (5)	100	Titan, Colossus, Legendary Dragon, Tarrasque
18	Vast (6)	200	Behemoth, Kraken, Leviathan, Kaiju, Eldrazi, Bewilderbeast

Notes On Undead And Mindless Foes

Undead, Animated Foes, Elementals, and Slimes are Immune to magics and attacks such as: Charm, Sleep, Read Mind, Fear, Confusion, Blind, Paralysis, Control, Petrification, Poison, Stun, Gaze Attacks, Hurt Body Parts, Feeble Mind, Forget, Illusions.

Weapon Immunity

Regular Weapons have no effect, but Magical ones do. A Monster may be susceptible to Other specific Non-magical Substances: Silver, Steel, Wrought Iron, Wood, Bone, Stone, Crystals, etc.

Minion Concept

Optional Rule. Speeds up Combat. Designate some minor Foes as Minions. Minions come as Levels 1, 2, and 3.

- A Level 1 Minion is killed outright by any 1 Hit (Goblins and Kobolds)
- A Level 2 Minion is killed outright by any 2 Hits or any 1 Light Wound (Orc)
- A Level 3 Minion is killed outright by any 3 Hits or any 1 Heavy Wound (Bugbear)

Folklore Type Monsters

-A Regular RPG Monster is downed by regular means. A Folklore type monster is more like solving a puzzle. The Monster will have many Immunities but also a few stand-out Weaknesses that can be used to take it down quickly. It will also have a number of quirks needed to activate a Weakness. A Folklore type monster will hunt the PC's down, on it's own territory, one by one, in a brutal horrific fashion, until the problem it poses is solved. Often the Party will itself be hunting down the Folklore monster. The PC's may or may not know of all of its Immunities, Weaknesses, activations, and actions that will lure it out into the open.

- An Immunity gives a Monster complete protection from an Attack Type.
- An Activated Weakness will immediately kill or disable the Monster if it hits.
- Below is a list of 30 Attack Types. The Folklore Monster will have Immunities to 4 + 1D6 of them and Weaknesses to one or two.

D30	ATTACK TYPE TABLE
01.	Cold (Ice, Freeze)
02.	Fire (Heat, Burn)
03.	Earth magic (Petrification)
04.	Air magic
05.	Water magic (Drowning)
06.	Lightning (Shock)
07.	Acid (Corrosive, Dissolve)
08.	Poison
09.	Normal Weapons

D30	ATTACK TYPE TABLE
10.	Blunt Attacks (Stun, Dizzy, Dazed)
11.	Impaling Attacks (Pierce, Bleed)
12.	Slashing Attacks (Cut, Lost Limb)
13.	Mind Magic (Mental Blasts, Forget, Feeble Mind)
14.	Light Attacks (Radiant Energy)
15.	Energy Attacks (Plasma, Disintegration, Magic Missile)
16.	Darkness Attacks (Shadow)
17.	Fear (Horror, Panic)
18.	Chaos magic (Corruption, Mutation)
19.	Death magic
20.	Drain Attacks (Wither, Weakness)
21.	Illusions (Glamour)
22.	Curses
23.	Control (Charm, Lure, Possession, Hypnotism)
24.	Paralysis (Hold, Pain, Torment)
25.	Sleep (Unconsciousness, Knockout, Skull-Crack)
26.	Entanglement (Grapple, Web, Net)
27.	Force magic (Telekinetic Attacks)
28.	Confusion (Madness)
29.	Polymorph (Transformation, Shrink)
30.	Temporal magic (Slow, Age)

Other Monster Weaknesses

The GM may roll on this table instead of the Attack Type Table to determine a monster weakness.

Monster Weakness Table

1D6	Weakness:	Notes:
1	Weak Point	Soft Underbelly, Open Maw, Blow Hole, Large Eyes
2	Unsteady	Unbalance a Foe by striking it a certain way.
3	Weak Moments	Creature has moments of Weakness where it can be Stunned
4	Favored Terrain	Knock Foe off its Favored Terrain. Knock off of Wall or Ceiling
5	Obvious Attack	Characters can see the Attack Coming
6	Blind Spot	Foe cannot see you at certain Angles

Activating A Monsters Weakness

- 1. Damage a particular organ, limb, location of Monster's Body
- 2. Change the Environment (Colder, Hotter, Wetter, Darker, etc.)
- 3. Special Weapon (Silver. Iron, Wood, Bone)
- 4. Cover Weapon or Monster with special Oils, Substances
- 5. Monster must inhale a specific Smell (Garlic, Wolfsbane)
- 6. Monster must eat a particular Item (Rotting Meat, etc.)
- 7. Monster must hear a particular sound (Song, Note, Bell)
- 8. Monster must be exposed to a particular Gas
- 9. Cast a particular Spell, Ritual on Monster or special Target
- 10. Monster must see or think it is seeing something in Particular
- 11. Monster must have a particular Condition (Burn,

- Freeze, Prone)
- 12. Another Monster must be defeated first, or other Event accomplished

Folk Monster Lures

- 1. Food (Rations, Wine, Candy, Specific Prey Items)
- 2. Blood offering (Smell, Trail, Spill)
- 3. Noise (Battle, Curses, Challenges)
- 4. Cries, whimpering of a Sacrifice (Animal, Slave, Child)
- 5. Gold (Treasure, Coin, Gem)
- 6. Magic (Item, Relic, Aura, Enchantment, Spell)
- 7. Violate Proximity (To something protected)
- 8. Recite Particular Song, Poem, Password
- 9. Breaking of a Curse
- 10. Finish a Ritual left Undone
- 11. Musical Instrument (Gong, Bell, Drum)
- 12. Presence of particular Individual (Ghost, Person)
- 13. Personal Item (Heirloom, Ring, Journal, Lock of

- Hair, etc.)
- 14. Read (Rune on Doorway, Note, Letter, Passage in Book)
 - 15. Bring Something Holy, Unholy, Religious
 - 16. Enunciate the Full Proper Name and Title of the Monster
 - 17. Bring and place a single perfect Rose, Sweep the Floor, Take the Urn
 - 18. Libation, Cover object, Fill vessel with particular Potion
 - 19. Unlock Box, Remove Dagger from Corpse, Light

- the Hearth (Candle, Lantern)
- 20. Look to the Ceiling, Under the Bed, in the Dresser, in the Cracked Mirror

Mutations

Exposure to Chaos Magic will cause Mutations in Living Creatures. Mutations are very hard to Conceal. Individuals with 3 or more Mutations are Considered to be Abominations and become Bestial, Murderous, and Insane.

Mutation Table

1D20	Mutation:
1	Claws, Talons (Attack and Damage +2)
2.	Bite, Maw, Tusks (Attack and Damage +3)
3.	Horns, Spines, Spikes (Attack and Damage +1)
4.	Tail, Tentacles, Extra Limb(s)(Extra Attack)
5.	Long Legs (Swift +4)
6.	Extra Eyes, Bug Eyes, Eye Stalks, Second Head (Lookout +4)
7.	Acid Attack, Spit Acid (Short Range. Damage +1)
8.	Fangs, Stingers (Attack becomes Poisonous)
9.	Spider Legs (Climb +5)
10.	Bat Wings, Insect Wings (Medium Flyer)
11.	Gills and Fins (Swim +5 and Water Breathing)
12.	Shell, Carapace, Scales, Rubbery Hide (Toughness +3)
13.	Psychic Blast (Like Spell 3x/Day)
14.	Webs (Like Spell 3x/Day)
15.	Bulging Muscles (Strength+3)
16.	Uncanny Dodge (Dodge +3)
17.	Flesh Molding (Unit can Regenerate)
18+	Repulsive Cosmetic Change (Intimidation +5)

Monster Special Abilities

- Effects that can be used as Special Abilities can be found everywhere Within the Rules.
- For Example: Spells, Combat Conditions, Skills, Monster Rules, Item Descriptions, Trap Effects, Folk Monster Immunities, etc.
- This List Explores ideas for abilities not found in other Sections.

Monster Special Ability List

- Ability - Notes:
- Acid Blood - Wounds will splatter. Resulting in Close Range Attack. Attack +1. Burn
 - Assault - If Monster attacks in HTH and Kills it may immediately move forward 1 Space.

8-9	Cache of 1D4 Bombs

Flying Ships

this includes all manner of Flying Ships, Airships, Sky Ships, Wind Ships

Getting It To Fly

Several types of Mage have various spells or resources at their disposal that can facilitate the Means of Levitation. Crafting a Flying Ship is a lengthy commitment. In the Chart below, the type of Mage is listed, along with what spell must cast, and how many times it must be cast to get the ship to move at slow Speed (It must be cast more for Medium and Fast Speeds). Finally the most common form of such ships is listed.

- Geomancer - Earth repulsion spell x 500 shard ship
- Hydromancer - Water repulsion spell x500 skiff
- Aeromancer - Breeze spell x1000 airship, zephyr, blimp
- Wizard - Animation spell x1000 converted Sailing ship
- Wizard - Levitation spell x1000 throne, barge, platform
- Alchemist - Flying Potion x500 catamaran
- Artificer - Create spell x500 ornithopter, whirlygig, flying machine
- Technomancer - Found and repaired vehicle
- Artificer - Power stone spell on Large Battery: Falling Star, Crystal Geode
- Priest - (Un)Holy Aura spell - chariot, personal cloud
- Gnome Inventor - Invention x500 contraption
- Dwarf Rune Master - Rune Stone spell x1000 Ironclad
- Elder Elf Mage - Tree spell x500 Glider Wind ship

1D20	Type:
20	Magic Item List 2

- Force Mage - Forcefield spell x500 Globe, Dome, Cone

Notes:

Remember all the Living and Undead flying mounts, steeds made available by Druids, beast masters, necromancers, etc.

Sea Going Vessels

In addition to a few flyers there are many times more waterborne ships and boats that ply the Middle Ocean. In every, Sea, River, and Lake they can be found. The great majority of these are non-magical, but their appearance can be quite fantastical, with every kingdom and Nation producing their own unique styles. Having a Mage, with the right Spells, onboard (Seamancers, Water Wizards, Air Mages) can greatly improve the performance of such a ship, in terms of speed and survivability.

Submersibles

These are quite rare. The presence of friendly water-breathing Demi- Human races make these mostly unnecessary. The only race that consistently produces and experiments with these are the few clans of Diving Gnomes with their Island Outposts. They use them for exploration, aquatic archeology, collecting, fishing, and trade. There are a handful of famous Pirates that have used submarines to great effect.

Inventions

The Invention Skill can produce many quirky but useful Non-Magical inventions. Gnomes and Goblins in particular are renowned Inventors. These Devices

have a reputation for being Strange and Unreliable.

A Short List of Examples is provided Below. Many of these need to be Refilled, Recharged, Reloaded, or Reset between uses. These can take a Months to Make.

Invention Table

1D30	Device (Notes):
1	Rocket Boots (Jumping. Short Flights)

1D30	Device (Notes):
2	Sprayer (Short Range. Acid, Pesticides, Poison vs 1D4 Adj Foes)
3	Flame Thrower (Short Range. Damage +4 vs 1D6 Adj Foes)
4	Invisibility Goggles (See Invisible)
5	Gas Grenade (Poison, Sleep, Paralyzation, Smoke. Fills Room)
6	Glider (Retractable. Requires Piloting Skill)
7	Extending Melee Weapons (1H becomes 2H)
8	Unicycle (Folds Up. Comes with Horn and Umbrella)
9	Oversize Blunderbuss (Medium Range. Damage +3 vs 1D2 Adj Foes)
10	Belt Fed Large Crossbow (Medium Range. 4 Shots per Round)
11	Super Lock Pick Kit (Locks +2)
12	Grappling Hook Gun (Long Range. Climb +3. With Motorized Winch)
13	Net Launcher (Short Range. Entangle 1D3 Adj Foes)
14	Rocket Launcher (Long Range. -2 Attack Penalty. Dam +4 vs 1D6 Adj Foes)
15	Spider Chair (4-8 Legs. Swift +2. Armor +1. 2 HTH Attacks at Dam +1)
16	Power Tool (Chainsaw, Jackhammer, Drill, Claw, etc.)
17	Fold Up Boat (Holds 2 Passengers. Comes with 1 Pair of Oars and Fishing Pole)
18	Gas Mask (Immune to Poison)
19	Very Large Magnet Gun (Medium Range. Disarm, Attract or Repulse Metal Objects)
20	Tin Alloy Helmet with Antennae (Long Range. Detect Spirits, Telepathy)
21	Goo Gun (Glob of Fast Acting Glue. Short Range)
22	Magic Goggles (See Magic)
23	Illusionary Goggles (See Illusions)
24	Night Vision Goggles (Infravision)
25	Telescopic Binoculars (See Details at Far Range)
26	Diving Suit (Air Tubes lead to Hand Driven air Pump at Surface)
27	Retractable Ladder (Opens and closes in 1 Round. 20 Feet Long)
28	Music Maker (Autonomous contraption combining 10 Musical Instruments)
29	Flare Gun (Long Range. Single Shot. Burning Flare. Attack -1 Damage +1 Burn)
30	Box of Fireworks (Like Pyrotechnics Spell. Single Use)

Technology

Non-Magical Artifacts from Other Worlds and Alternate Futures. These are found concentrated at certain Portals and Dimensional Rifts. Some are in good shape, most are broken, or inoperable due to Years of Neglect.

When they are found they are often ignored Completely, or sold as Curios. Very few individuals have the skill to Identify, much less repair these strange Relics. There are some Rare individuals called Technomancers who are avid Collectors and Are able to bring some of these Devices back to Life.

Tech Item List

1D30	Tech Item:
1	Energy Weapon: Laser, Plasma, Ion, Phaser, Blaster, Disruptor
2	Projectile Weapon: Bolt Gun, Slug Gun, SMG, Sniper Rifle, Needler
3	Light Source: Glow Globes, Flashlights, Lamp, Discoball

Rune Stones

Rune Stones are Single Use. When used they Shatter. They take a week to Make. They are usually Smooth Stones of a size that fits comfortably in the Hand. The way they are used varies: Some function exactly like Spells.

Some are used as Thrown Weapons. They affect 1D6 Adj Foes next to where they Land. You can think of them as Bombs or Grenades. Short Range. Some can be used as Traps. These are Proximity Traps that go off when someone gets within HTH Range. They affect 1D6 Adj Foes. They will not go off on the Spell Caster.

Trap Runes can be carved into much Larger Standing Stones or Stone Walls.

List Of Rune Stones

- 1. Healing Rune (Like Heal Spell)
- 2. Energy Rune (Thrown or Trap. Explodes for Damage +3 and Stun)
- 3. Fire Rune (Thrown or Trap. Damage +2 and Burn)
- 4. Ice Rune (Thrown or Trap. Explodes for Damage +3 and Chill)
- 5. Lightning Rune (Thrown or Trap. Explodes for Damage +3 and Shock)
- 6. Light Rune (Like Light or Flash Spell)
- 7. Fear Rune (Like Fear Spell)
- 8. Teleport Rune (Like Teleport Spell)
- 9. Shield Rune (Like Shield Spell)
- 10. Counter Spell Rune (Like Counter Spell)

Fetishes

The Create Fetish Spell is a starting Spell of the Shaman Class. This Spell produces Primitive Magic Items that often deteriorate over time or use. Fragile Items can be used 10 times before they become defunct.

Delicate Items last 3 Months before they lose their Powers. Many Fetishes can be made in a day, others may require weeks to carve. Some require particular components: The Voodoo Doll is custom made for its Victim and requires Hair, Skin, or Body Fluids from the Target to make.

List Of Fetishes

- 1. Voodoo Doll (Long Range. Save or Damage +1 to specific Target) Fragile
- 2. Stone Idol (Becomes Stone Golem for 1 Combat) Fragile
- 3. Guardian Totem (Becomes Wood Golem for 1 Combat) Fragile
- 4. Medicine Bag (Gain 1 Power Point per Day) Delicate
- 5. Divination Bones (Like Spell. Once per Day) Fragile
- 6. Poison Pot (2D6 Doses of Poison. Coat Weapons)
- 7. Astral Root (1D4 Doses. Like Astral Travel Spell)
- 8. Frog Fetish (Single use. Medium Range. Target Becomes Frog. Permanent)
- 9. Bad JuJu (Single use. Like the Raise Dead Spell)
- 10. Wolf Mask (Wearer becomes a wolf for as long as they want) Fragile
- 11. Peace Pipe (Like Calm Spell. Once per Day) Fragile
- 12. Feathered Cape (Like Fly Spell. Up to 3x/Day) Fragile
- 13. Shrunk Head (Answers 1 Question per Day) Fragile
- 14. Mummified Bear Claws (Strength +1) Delicate
- 15. Spirit Root (2D3 Doses. See Invisible or Spirits for 1 Hour)
- 16. Monkey Paw (Taunt +5) Delicate
- 17. Coup Stick (Tactics +1) Delicate
- 18. Snake Moccasins (Stealth +5) Delicate
- 19. Dream Catcher (Single Use. Cure Madness or Possession)

Bomb List

1D12	Type:	Notes:
1.	Explosive	Damage +1 (Gun Powder)

20. Turtle Charm (Defense +1) Delicate

Magic Beer List

These are the products of Dwarven Brewmasters. 1 Drink = 1 Dose. Small Keg = 10 Doses, Large Keg = 20 doses, Barrel = 40 Doses It takes a Week to Brew a Batch of Magic Beer.

A Brewmaster in Town with lots of Equipment can brew up to 5 Batches at a time.

Dwarven Magic Beer Menu

- 1. Berserkers Brew (Berserker for 3 Hours. 1 Batch = 1 Barrel)
- 2. Mages Mead (Gain 1 Power Point. 1 Batch = 1 Small Keg)
- 3. Fire Breathing Brew (Short Range. Fire. Attack +1. Burn. 1 Attack per Drink. 1 Small Keg)
- 4. Liquid Courage (Get +1 to all Rolls for 2 Hours. 1 Batch = 1 Large Keg)
- 5. Revival Ale (Like Resurrection Spell. 1 Batch = 1D2 Drinks)
- 6. Dwarven Stout (Strength and Toughness +2 for 1 Hour. 1 Batch = 1 Small Keg)

Bombs

These are items Fabricated by Inventors, Alchemists, and Artificers. Bombs are created by a variety of means. Any of the following combination of Skills and Spells may have been employed: Gun Powder, Invention Skill, Potion Brewing, Alchemy, Create Magic Item, and Technology Skill. Those on the List are considered to be Grenade Size and can be Thrown out to Medium Range where they will affect 1D6 Adj Foes next to the point of Detonation. Larger Bombs must be launched by Catapults or be placed and then Remotely Detonated. Remote Activation is Accomplished by Fuses, Being Struck by a Fire type Attack (Flaming Arrow), Wires attached to Plungers, or lighting Trails of Gunpowder. Larger Bombs will affect up to 2D6 Adj Foes. A Small Keg Size Bomb will do Damage +1, A Large Keg Damage +2, A Barrel Damage +3, Anything Bigger Will do Damage +4 and affect 4D6 Adj Foes. Character must Save to Avoid Damage. They take 2D4 Days to Make.

1D12	Type:	Notes:
8.	Stink Bomb	No Damage. Save at -2 or be Nauseated (Alchemy)
9.	Vortex Bomb	Save or Get sucked into the Void. Instant Death (Magic Item)
10.	Nude Bomb	No Damage. Lose everything you are Wearing (Magic Item)
11.	Poison Gas	Lingers for 2D4 Turns. Fills Small Room (Potion Spell)
12.	Gas Grenade	Potion Like Effect. Fills Small Room (Potion Spell)

Spheres Of Influence

Introduction

Board & card game for 1-5+ players. Pedestrian Glass Bead Game Variant.

Victory

Each Player scores Points at the end of each of his turns. The game ends when the Board is completely filled up. The player with the most accumulated points at the end of the game wins.

The Board

Use a 10 X 10 Grid. Each space must be large enough to contain a single card.

The Deck

Players share a common deck. The deck can be as large as you want, but must contain a minimum of 100 cards.

The Cards

Each card has a Title and one or more Descriptors. The owner and creator of the deck gets to determine what descriptors go to what Titles. Basic Descriptors: Person, Place, Thing, Idea, Symbol, Animal, Plant, etc.

Field (& Sub-Field) Descriptors: Philosophy, Religion, Physics, Art, Mathematics, Medicine, Politics, Mythology, Psychology, Literature, Chemistry, Biology, Poetry, Music, Exploration, Warfare, Sculpture, Agriculture, Economics, Cinema, Television, etc. Cultural Descriptors: Greek, Egyptian, American, English, French, Japanese, etc.

Setup

Shuffle the deck well. Determine turn order. Each player is dealt 5 cards.

Turn Sequence

Players take turns. Each turn has 5 Phases: Draw Phase

- Card Phase
- Place Phase
- Score Phase
- End Phase

Draw Phase

Draw 2 cards from the deck. If the deck runs out, shuffle the discard and draw from it.

Card Phase

Every card has a Special Ability (SA). You may discard one card to activate its SA.

Special Ability List

- A** Draw 2 cards
- B** All players discard their hands
- C** Look at next 5 cards in Deck
- D** Opponent must discard 2 random cards his hand
- E** Steal one random card from opponents hand
- F** Discard one target card from the board
- G** Take target card from the Discard and put it in your hand
- H** You may place an extra card this turn
- I** Score double points this turn
- J** Target opponent Scores half points on his next turn
- K** Negate an SA just played by your opponent (Play in Opponents Card Phase)
- L** Look at Opponents Hand
- M** Move one card on the board to any empty space (No points are scored for this)
- N** You may play two more SA this phase

Place Phase

Place one card from your hand face-up onto one empty space on the board.

Score Phase

Score one point for every descriptor the card you just placed has in common With any other Card it is adjacent to (touching orthogonally and diagonally) Use pen & paper to keep track of points scored. If there is a line of cards (3 or more) sharing the same descriptor, and the Card you just placed increases the length of that line, you earn an extra point.

Ad Hoc Descriptor Rule

A player may proclaim on his turn that the card he just placed, and an adjacent Card have some additional unwritten descriptor in common. The other players vote on this and may agree to award him an extra point. For Example: you may say "Both these cards are from the 19th century" Your Opponents may decide to award you a point for this observation.

End Phase

Max hand size is 7 cards. Discard excess cards.

Card List

Title:	SA	Descriptors:
Napoleon	A	Person, French, General, Head of State

Basic Variations

The above sample deck contains 100 cards. Players are encouraged to create additional cards, new Special Abilities, and to alter Descriptors as they see fit. When playing with young people, be sure to educate them on

the Topics of the cards and how they are related.

3-d Variant

With 125 cards you could do a three dimensional board that is 5 x 5 x 5.

Spice Raid

Introduction

Board & card game for 2 players. Man to man combat on the surface of Arrakis. Takes place in the Dune Universe.

Pick your force: Atreides, Harkonnen, Fremmen, Sardaukar Each figure represents one warrior.

Disclaimer

'Dune' is a copyrighted/trademarked property. This is just a fan site.

Victory

Kill your opponents Leader.

The Map

Use an 8X8 chessboard.

The Men

Use chits or miniatures to represent men.

Atreides Unit List

#	Unit Name	Hits	Notes
1	Captain of the Guard	3	Leader
2	Sword Master	2	
5	Atreides House Troops	1	

Harkonnen Unit List

#	Unit Name	Hits	Notes
1	House Assassin	3	Leader
2	Sleeper Troops	2	
5	Harkonnen House Troops	1	

Fremmen Unit List

#	Unit Name	Hits	Notes
1	Naib	3	Leader
2	Fedaykin Death Commandos	2	
5	Sietch Fremmen Warriors	1	

Sardaukar Unit List

#	Unit Name	Hits	Notes
1	Imperial Agent	3	Leader
2	Bashar	2	
5	Sardaukar Soldier Fanatics	1	

Setup

Each player places 1 man on each square of his back row. Men may not stack.

The Cards

Players share a common deck.

Turn Sequence

Players take turns. Each turn has 3 phases: Orders Phase Move Phase Fight Phase

Orders Phase

Draw 3 cards from your deck. If your deck runs out, shuffle the discard and draw from it. Max hand size = 5 cards.

Discard excess cards.

Move Phase

Play (discard) a Move card to move one of your men. The move card has a number. This is the number of spaces the man moves.

Moves can be diagonal or orthogonal. Instead of moving just one unit in any direction, you have the option of moving one or more units forward the indicated number of spaces using a single move card.

Fight Phase

Play (discard) an Attack card to have a Man attack. The attack card has a number. This is the range of the attack.

Attacks can be diagonal or orthogonal. The enemy man that is the target of the attack takes one point of damage. Use chits to keep track of damage.

A man reduced to zero hits is killed. Your opponent may play a defense card to negate your attack. If you use a Shield defense against a Lasgun, both target & attacker are killed.

The Fremmen player treats the Lasgun card as: Crysknife (Attack range = 1)

Card List Notation

- A** Attack
- M** Move
- D** Defense
- X** Special
- #** Number of that card in the deck.

Card List

Card Name:	#	Type	Range	Notes

Spider-man

Introduction

2 player card game. One player is Spiderman (Spidey). The other player is the Bad Guys.

The Decks

There are 2 decks: The Bad Guy Deck & The Spiderman Deck. The Bad Guy deck has 5 of each of the cards listed in the Bad Guy Card List & Bad Guy Attack Card List. The Spidey deck has 5 of each of the cards listed in the Spiderman Defense Card List & Spiderman Attack Card List.

Objective

Get all 50 plot Tokens.

Setup

Each player gets 25 plot tokens.

Turn Sequence

Players go simultaneously. Each turn is divided into 7 phases:

1. Plot Phase
2. Encounter Phase
3. Plot Thickens Phase
4. Maneuver Phase
5. Climax Phase
6. Attack Phase
7. Resolution Phase

Plot Phase

Each Player must put 2 Tokens in the pot (now referred to as the PLOT)

Encounter Phase

Each player draws 7 cards from his deck. If the deck runs out, shuffle the discard and draw from it.

Plot Thickens Phase

Starting with the Bad guys, each player may up Ante by up to 5 plot tokens. A Player may fold and concede the PLOT to his opponent.

Bad Guy Attack Card List

Maneuver Phase

Players can discard up to 5 cards and draw replacement cards.

Climax Phase

Starting with the Spiderman, each player may up the Ante by up to 5 plot tokens. A Player may fold and concede the PLOT to his opponent.

Attack Phase

Players reveal their hands. Calculate the value of each hand.

For the Bad Guys: Multiply the number of cards of a particular Bad Guy x The number of his attack cards. For Example: You have 2 Mysterio cards & 3 Energy Globes in your hand. This would score $2 \times 3 = 6$.

Lets say the other 2 cards in his hand are Vulture and Lightning Blast. No points are gained for either card. However, If the other two cards were Vulture and Swoop Attack that would be worth $1 \times 1 = 1$ point and the Total score would be $6 + 1 = 7$

For Spidey: Attack and defense cards that you only have one copy of do not count. Multiply the number of attack cards times the number of defense cards. For Example: You have 3 Jumps and 2 Punches and 1 Swing and 1 Tangle.

The Tangle and the Swing cards do not count. Multiply 3×2 to get your final hand value: $2 \times 3 = 6$.

Resolution Phase

Compare the point totals of the hands. The winner gets the PLOT. If tied, the PLOT carries over to the next hand.

Bad Guy Card List

Card Name: Mysterio Hobgoblin Vulture Dr. Octopus Chameleon Shocker

Card Name:	Associated Bad Guy:
Energy Globes	Mysterio
Goblin Grenades	Hobgoblin
Swoop Attack	Vulture

Card Name:	Associated Bad Guy:
Tentacle Attack	Dr. Octopus
Surprise Attack	Chameleon
Lightning Blast	Shocker

Spiderman Defense Card List

Card Name: Jump Swing Wall Crawling Backwards
Flip Spider Senses Web Wall

Spiderman Attack Card List

Card Name: Spin Web Tangle Sticky Strands Spider
Lasso Punch Leaping Kick

Spore Stages

Introduction

Card and Dice game for 1-5 players. Based on the Spore series of Videogames. Each player takes his race from Single cell to Spacefaring.

Disclaimer

Spore is a licensed, copyrighted property. This is merely a fan site.

Overview

Each player is control of his own race as it evolves and develops. The game plays in 5 Stages. Each stage has a separate deck of Cards.

Players move from one Stage to the next at different speeds. Players races do not directly interact until the last Stage, the Space Stage. Rules, Attributes, Mechanisms, and Terminology will change from Stage to Stage.

Game End

The game ends after any player has completed his 15th turn in the Space Stage.

Victory

When the game ends, the player with the most Victory Point Tokens wins. Ties stand.

Dice

Six and Ten sided Dice are needed.

Tribal Stage Characteristics

Characteristic:	Notes:
Aggressive	Get +1 to Fight Attribute
Friendly	Get +1 to Social Attribute
Industrious	Feed +1 (Agriculture, Fishing, Hunting, Gathering)

Civilization Stage Characteristics

Characteristic:	Notes:
Military	Get +1 to Fight Attribute
Religious	Get +1 to Culture Attribute
Economic	Get +1 to Economy Attribute

Space Stage Characteristics

Tokens

- Players share a common set of Victory Point Tokens (VT).
- Players share a common set of Food (Resource) Tokens (FT).
- Players share a common set of Hunger Tokens (HT).
- Players share a common set of Death Tokens (DT).

The Five Stages

1. Cell Stage
2. Creature Stage
3. Tribal Stage
4. Civilization Stage
5. Space Stage

Characteristics

At the beginning of each stage, each player chooses 1 characteristic for his Race.

Cell Stage Characteristics

Characteristic:	Notes:
Carnivore	Get +1 to Attack Attribute
Herbivore	Get +1 to Defense Attribute
Omnivore	Get +1 to Move Attribute

Creature Stage Characteristics

Characteristic:	Notes:
Predator	Get +1 to Fight Attribute
Social	Get +1 to Friend Attribute
Adaptable	Get +1 to Move Attribute

Characteristic:	Notes:
Bard	Get an extra +1 VT every Challenge you win
Ecologist	Terraform +1
Zealot	Policy +1
Diplomat	Diplomacy +1
Scientist	Think +1
Trader	Trade +1
Shaman	Redirect +1
Warrior	Conflict +1
Wanderer	Explore +1
Knight	Specialization +1

Setup

- Each player starts with 1 VT and 3 FT.
- Play starts in the First Stage, the Cell Stage.
- Each player picks 1 Cell Stage Characteristic.
- The most Evolved Player goes first.
- Play proceeds clockwise.

Basic Turn Sequence

Players take turns. Each turn has 5 Phases:

1. Mutation Phase
2. Event Phase
3. Selection Phase
4. Evolution Phase
5. Metabolic Phase

Mutation Phase

Draw 1 card from the Deck (of the Stage you are in). Draw 1 extra card for each level of Breed or Think your species has. If the deck runs out, shuffle the discard and draw from it.

Event Phase

Roll once on the Event Table (Specific for your Stage). Resolve the Event. For every level in Redirect your species has, you may Reroll the Event roll once per turn.

For Example: You have 2 Levels of Redirect. You don't like the first roll so you Reroll. You really don't like the second roll, so you Reroll again.

You don't like that one either so you Reroll a third time and must keep the result of that roll.

Selection Phase

Most Events are Challenges between your species and another Species that is either weaker, equal, or stronger than you. To resolve a Challenge first roll on the Challenge Type table to determine what Attribute will affect the Challenge. For every level in Instinct you have, you may Reroll on the Challenge Table once per turn (Just like Redirect in Event Phase).

Next Roll 1D6 (Attribution Roll) and add your level in the indicated Attribute. This is your Attribution Total. For every level in Pack (or Population) you have, you may Reroll an Attribution Roll once per turn (Like Redirect in Event Phase, but keep the highest Roll!).

Next roll 1D6, 2D6, or 3D6 depending on the Strength of the Challenger. This is the Challenge Roll. If the Attribution Total is greater than the Challenge Roll, you win the Challenge.

If it is equal or less, you lose the challenge.

Evolution Phase

You may gain 1 Trait. Play 1 Trait card from your Hand. The Trait card stays in play in front of you.

Pay its cost in Food or Resource Tokens.

Metabolic Phase

Discard 1 Food Token.

- If you have no Food Tokens gain 1 Hunger Token.
- If you have 2 Hunger Tokens, discard them and gain 1 Death Token. Max hand size is 5 cards. Discard excess cards.
- If you have 6 Trait cards in Cell Stage in play go on Creature Stage.
- If you have 8 Trait cards in Creature Stage in play go on Tribal Stage.
- If you have Won against 5 Villages in Tribal Phase go onto Civ Stage.
- If you have Won against 7 Nations in Civ Phase go onto Space Stage.

Evasion Option

You may attempt to Evade a Challenge. If you do so, add +4 to your Attribution Roll. However if you win, you get no reward.

Going On To The Next Stage

Set your old Trait cards aside in your Progress Pile. Except for VT, these do not apply to later stages. Select a new Characteristic for the new Stage.

Discard down to 2 FT or RT (equivalent).

Final Scoring

Gain 5 VT for completing the Civilization Stage and Entering the Space Stage. Add up the VT bonuses from all the Trait cards in your Progress Pile. Each Death Token counts as a -2 VT penalty.

Add all the lose VT earned in Events and Challenges.

Cellular Stage Event Table

1D10	Event	Notes:
1	Meteorite Fragment	Draw 1 Card
2	Easy Prey	Gain 1D6 FT
3	Nothing	Nothing
4-6	Prey	Challenge Strength = 1D6
7-8	Competitor	Challenge Strength = 2D6
9-10	Predator	Challenge Strength = 3D6

Cellular Stage Challenge Type Table

1D6	Challenge:
1-2	Move
3-4	Attack
5-6	Defense

Cellular Stage Challenge Result List

-	-	-	Result
Win	vs.	Prey:	Gain 1D6 FT
Lose	vs.	Prey:	Nothing
Win	vs.	Competitor:	Gain 1D6 +2 Food and Draw 1 Card
Lose	vs.	Competitor:	Lose all Food
Win	vs.	Predator:	Gain 1D6 +4 Food and Draw 1 Card
Lose	vs.	Predator:	Lose all Food; Gain 1 DT; Skip rest of Turn

Creature Stage Event Table

1D10	Event	Notes:
1	Skeletal Remains	Draw 1 Card
2	Migration	Gain 1D6 FT
3	Ice Age	Challenge Strength = 1D6
4-6	Prey	Challenge Strength = 1D6

1D10	Event	Notes:
7-8	Competitor	Challenge Strength = 2D6
9	Predator	Challenge Strength = 3D6
10	Epic Creature	Challenge Strength = 4D6

Creature Stage Challenge Type Table

1D6	Challenge:
1-2	Move
3-4	Fight
5-6	Friend

Creature Stage Challenge Result List

-	-	-	Result
Win	vs.	Ice Age:	Draw 1 Card
Lose	vs.	Ice Age:	Lose all Food; Gain 1 DT; Skip rest of Turn
	-	-	Note: The Warm Trait is The Attribute used in Ice Age Challenges.
	-	-	Add 3 to your Attribution Roll for each level of Warm you have.
Win	vs.	Prey:	Gain 1D6 FT
Lose	vs.	Prey:	Nothing
Win	vs.	Competitor	Move & Fight: Feed +1 and Draw 1 Card
Lose	vs.	Competitor	Move & Fight: Lose all Food
Win	vs.	Competitor	Friend: +2 VT
Lose	vs.	Competitor	Friend: -2 VT

-	-	-	Result
Win	vs.	Predator Move:	Draw 1 Card
Win	vs.	Predator Fight:	1D6 +4 Food
Win	vs.	Predator Friend:	+3 VT
Lose	vs.	Predator: Lose	all Food; Gain 1 DT; Skip rest of Turn
Win	vs.	Epic Creature:	+5 VT
Lose	vs.	Epic Creature:	Gain 1 DT; Discard 2 Random Cards

Tribal Stage Event Table

1D10	Event	Notes:
1	Agriculture	Gain 1D6 FT (Agriculture Roll)
2	Gathering	Gain 1D6 FT (Gathering Roll)
3	Fishing	Gain 1D6 FT (Fishing Roll)
4	Hunting	Gain 1D6 FT (Hunting Roll)
5	Babies	Population +1; Costs 5 FT
5	Domesticate Animal	Challenge Strength = 1D6
5	Gift Giving	Next Social Challenge +2; Costs 5 FT
5	Tool Making	Intuition +1; Costs 5 FT
5	Find Fishing Spot	Fishing +1
6	Weak Village	Challenge Strength = 1D6
7	Raiders	Challenge Strength = 1D6
8	Equal Village	Challenge Strength = 2D6
9	Strong Village	Challenge Strength = 3D6
10	Epic Creature	Challenge Strength = 3D6

Note: If you roll a 5 pick which 5 result you want.

Tribal Stage Challenge Type Table

1D6	Challenge:
1-3	Fight
4-6	Social

Note: Raiders are always Fight Challenges

Tribal Stage Challenge Result List

-	-	-	Result
Win	vs.	Weak Village:	Draw 1 Card
Lose	vs.	Weak Village Fight:	Gain 1 DT
Lose	vs.	Weak Village Social:	Lose 1 VT
Win	vs.	Domesticate Animal:	Gain 1 VT and Agriculture +1
Lose	vs.	Domesticate Animal:	Nothing
Win	vs.	Equal Village:	Draw 2 Cards
Lose	vs.	Equal Village Social:	Lose 1 VT
Lose	vs.	Equal Village Fight:	Gain 1 DT
Win	vs.	Strong Village:	Draw 3 Cards
Lose	vs.	Strong Village Social:	Lose 1 VT
Lose	vs.	Strong Village Fight:	Gain 1 DT
Win	vs.	Raiders:	Gain 1 VT
Lose	vs.	Raiders:	Lose 1D10 Food
Win	vs.	Epic Creature Fight:	Gain +2 VT & 1D6 Food
Win	vs.	Epic Creature Social:	Gain +3 VT
Lose	vs.	Epic Creature:	Gain 1 DT

Civilization Stage Event Table

1D10	Event	Notes:
1	Industry	Gain 1D6 RT (Industry Roll)
2	Agriculture	Gain 1D6 RT (Agriculture Roll)
3	Trade	Gain 1D6 RT (Trade Roll)
4	Taxation	Gain 1D6 RT (Taxation Roll)
5	New Mine	Industry +1; Costs 5 RT
5	Invention	Draw 1 Card
5	New Trade Route	Trade +1; Costs 5 RT
5	Build Wonder	VT +5; Costs 10 RT (Max 5)
5	Population Growth	Taxation +1; Costs 5 RT
5	Land Reform	Agriculture +1; Costs 5 RT
6	Bandits/Pirates	Challenge Strength = 1D6
7	Small Nation	Challenge Strength = 1D6
8	Equal Nation	Challenge Strength = 2D6
9	Large Nation	Challenge Strength = 3D6
10	Special	Roll on Civ Special Table

Notes: RT replace FT in this Stage. If you roll a 5 pick which 5 result you want.

Civ Special Table

1D10	Event	Notes:
1	Subdue Epic Creature	Gain 3 VT
2	Dark Ages	Discard Hand
3	Plague	Lose 1D6 RT
4	Renaissance	Draw 2 Cards
5	Discovery	Gain 2 VT and Trade +1
6	Reformation	Gain Culture +1
7	Enlightenment	Gain Think +1
8	Industrial Revolution	Gain 1D6 RT and Industry +1
9	Political Revolution	Gain Redirect +1
10	Great Leader	Play 1 Trait Card for Free

Civilization Stage Challenge Type Table

Notes: All Bandit/Pirate Challenges are Military

1D6	Challenge:
1-2	Military
3-4	Economic
5-6	Culture

Civilization Stage Challenge Result List

-	-	-	Result
Win	vs. Bandits/Pirates:	Gain 1 VT	
Lose	vs.	Bandits/Pirates:	Lose 1D6 RT
Win	vs.	Small Nation Military:	Gain 2 VT
Win	vs.	Equal Nation Military:	Gain 3 VT and Draw 1 Card
Win	vs.	Large Nation Military:	Gain 4 VT and Draw 2 Cards
Lose	vs.	Any Nation Military:	Lose all RT; Gain 1 DT; Skip rest of Turn
Win	vs.	Small Nation Economic:	Gain 1D6 RT and Agriculture +1
Win	vs.	Equal Nation Economic:	Gain 1D6 +1 RT and Industry +1

-	-	-	Result
Win	vs.	Large Nation Economic:	Gain 2D6 +2 RT and Trade +1
Lose	vs.	Any Nation Economic:	Lose 1D6 RT and 1 VT
Win	vs.	Small Nation Culture:	Gain 1 VT and Culture +1
Win	vs.	Equal Nation Culture:	Gain 2 VT and Economic +1
Win	vs.	Large Nation Culture:	Gain 3 VT and Military +1
Lose	vs.	Any Nation Culture:	Discard Hand

Space Stage Event Table

1D10	Event	Notes:
1	Excavation	Gain 1D6 RT (Excavation Roll)
2	Fabrication	Gain 1D6 RT (Fabrication Roll)
3	Energy Conversion	Gain 1D6 RT (Energy Roll)
4	Space Trade	Gain 1D6 RT (Trade Roll)
5	Directed Research	Draw 1 Card
5	Build Power Stations	Energy +1
5	Study Galactic Object	Gain 1 VT
6	Easy Mission	Challenge Strength = 1D6
7-8	Standard Mission	Challenge Strength = 2D6
9	Difficult Mission	Challenge Strength = 3D6
10	Space Raid	Conflict Challenge Strength = 1D6

Notes: If you roll a 5 pick which 5 result you want.

4	Find Route	Trade +1
5	Plant Monolith	Gain 3VT; Costs 5 RT
5	Crop Circles	Gain 1VT
6	Observation	Draw 1 Card
7	Scout	Next Conflict Challenge +3
8	First Contact	Next Diplomacy Challenge +3
9	Find Energy Source	Energy +1
10	Long Range Scan	Next Exploration Challenge +3

Notes: If you roll a 5 pick which 5 result you want.

Ck Notation

Victory Point Tokens (VT or VP)

- Food Tokens (FT)
- Resource Tokens (RT)
- Hunger Tokens (HT)
- Death Tokens (DT)
- Cost = In FT or RT depending on the Stage
- ATK = Attack Attribute
- DEF = Defense Attribute
- Milit = Military Attribute
- Econ = Economy Attribute
- Cult = Culture Attribute
- Conf = Conflict
- Diplo = Diplomacy
- Terra = Terraform
- Feed +1 = Whenever you gain FT add your Feed

Level to the Roll

- Redirect +1 = Used to Reroll Event Table Rolls
- Instinct +1 = Used to Reroll Challenge Type Rolls
- Policy +1 = Used to Reroll Challenge Type Rolls
- Breed +1 = Increases the number of cards you draw in Mutation Phase
- Think +1 = Increases the number of cards you draw in Mutation Phase
- Pack +1 = Allows you to Reroll Attribution Rolls
- Population +1 = Allows you to Reroll Attribution Rolls
- Specialization +1 = Allows you to Reroll Attribution Rolls
- End Stage = You cannot buy this Trait unless you have at least 6 Others. You may only have 1 End Stage Trait.
- Galactic Ban = Applying the Bonus of this Trait is Optional. Every time you do so lose 5 VT. You may have a max of 1 Galactic Ban Trait.

Squad

Introduction

Card game. Simulates small unit tactics in World War II.

Logistics

Use tokens to represent soldiers. At least two six-sided dice are required. A deck of cards unique to this game will have to be constructed before play is possible.

Setup

Each player starts with one squad of one of the five available nationalities. American squads start with 12 men. German, British, and Japanese squads start with 10 men.

Russian platoons start with 36 men. Opposing squads begin the game at long range from each other. Players take turns. Roll high to determine who goes first.

Shuffle the deck. Players start with 5 cards each. Each player may play one terrain card, if they have one in their hand.

All Fire Phases

Range in this game is the relative range between the two squads. Play attack cards that correspond to the relative range between the squads. For instance if you are at long range, you may attack with a mortar, but not a pistol.

Attack Cards are type (A) in the card list. Each attack lists what ranges it can be used at: PB (Point Blank), S (Short), M (Medium), and L (Long) You must play an Attack card to attack. Each attack card kills 1D6 - 1D6 enemy soldiers. (The attack roll) Roll two dice, subtract the second from the first.

A result of zero or a negative number means there are no casualties. The attack roll is modified by many cards, as expressed in the card list. Terrain cards (T) subtract their cover rating to the attack roll total.

For example: A Hedge Row would reduce 5 kills to 3 kills. Attack cards have built in modifiers. For example: A pistol(PB/S-1) inflicts one less casualty at short range. If your attack causes casualties, you may play a Commander Killed card.

Japanese squads may make one PB attack at short range instead, per turn.

Turn Sequence

Players take turns. Each turn has 9 phases:

1. Draw Phase

2. Morale Phase
3. Covering Fire Phase
4. Opportunity Fire Phase
5. Movement Phase
6. Position Fire Phase
7. Return Fire Phase
8. Rally Phase
9. Discard Phase

Draw Phase

German Squads draw four cards from the common deck. Russian Squads draw two cards from the common deck. Other Squads draw three cards from the common deck.

If you use up the deck, reshuffle the discard pile and continue playing.

Morale Phase

If your squad was fired upon last turn roll 1D6:

1D6	Result:
1-4	Nothing
5-6	Squad Pinned

This roll is called the morale check. American Squads get +1 to this roll. Japanese Squads get -1 to this roll.

Add 1 to the roll per man killed last turn. A pinned squad cannot move and its attack rolls are at -1. If the squad was already pinned, it routs: A squad that routs loses 1D6 - 1D6 men. (Roll 1D6 and subtract 1D6) Routed men are considered to be casualties.

Men that did not rout are still pinned. Cards that modify the Morale check are played before the roll is made. Pinned units remain pinned until rallied.

Covering Fire Phase

Declare whether or not your squad is going to attempt to move this turn. If you are going to move your squad this turn you may first attack with covering fire. (All attacks require the discard of 1+ Attack cards at the appropriate range.) Your attacks are at -2, because you are moving and firing.

American squads only have no penalty because they are equipped with semi-automatic M-1 rifles instead of bolt action rifles. You may also play a smoke card. If you play smoke your attacks are at an additional -2.

Declare if you are taking the Point man option.

Opportunity Fire Phase

If you are moving this turn your opponent may attack in this phase. Range is the same as last turn. If you provided covering fire, your opponents attacks are at -1.

If you play smoke your opponents attacks are at an additional -2. Your opponent may play an Ambush card to attack at +2. If you took any casualties this phase, and you took the Point man option, you take only one casualty, and you skip movement phase.

Movement Phase

To move your squad, play a terrain card. This replaces your old terrain card, which is discarded. You may also change the range by one step.

pb – s – m – 1

Changing the range is not required. The move may be lateral. Instead of playing a terrain card you may discard any card to move into an open terrain. Open terrain provides no cover modifier.

Your opponent may abort your move by playing a Blocking (B) card. Minefields and Barbed Wire Card are (B) cards. If a blocking card is played you must discard the new terrain card.

Your squad returns to the old terrain. A minefield will kill 1D6 - 1D6+2 men. A Combat Engineer card will negate a (B) card, allowing the squad to move.

If you are unblocked you may play a Mission Objective and/or Concealment card.

Position Fire Phase

You may attack. Your attacks are at -1 if you moved this turn. If you did not move and your opponent outflanked you last turn your attacks are at -1.

Card List

#	Type	Card Name	Notes
1	M Leadership	Rally roll +2	
1	M Fatalism	Morale check -1	
1	M Patriotism	Rally roll +2	
1	M Camaraderie	Rally roll +2	
1	M Determination	Morale check -1	
1	M Shell Shock	Morale check +2	
1	M Confusion	Rally roll -1	
1	M Exhaustion	Rally roll -1	
1	M Hesitation	Morale check +2	
1	M Fear	Morale check +2	
1	T	Pill Box	Cover -3
2	T	Line of Trees	Cover -1
2	T	Low Wall	Cover -1
1	T	Entrenchments	Cover -3
2	T	Building	Cover -2

Heavy weapons like mortars and machine guns may not be used to attack if you moved this turn. If you moved this turn and your opponent did not attack in opportunity phase, you have outflanked the enemy and get +1 to all your attacks this phase.

Return Fire Phase

Your opponent may attack.

Rally Phase

If a squad is pinned this turn roll 1D6:

1D6	Result:
1-4	Squad remains pinned
5-6	Squad is rallied (becomes unpinned)

This roll is called the Rally roll. Cards that modify the Rally roll are played before the roll is made. Americans & German Squads get +1 to this roll.

Discard Phase

If you did not move or attack this turn you may draw an extra card. If you have more than 5 cards in your hand discard the extra cards. Well trained German troops may keep 6 cards.

Poorly trained Russian units may only keep 4 cards.

Card List Abbreviations

- # Number of this card in the deck.
- M Modifier Card
- T Terrain Card
- A Attack Card
- B Block Card
- N National Trait Card

#	Type	Card Name	Notes
1	T	Gulley	Cover -3
1	T	Wheat Field	Cover -1
2	T	Hedge Row	Cover -2
1	T	Fox Holes	Cover -2
2	T	Thick Woods	Cover -2
2	T	Rubble	Cover -2
1	T	Hill	Cover -1/All your Attacks +1
1	A	Knife	PB/Kill one enemy maximum
1	A	Entrenching Tool	PB/Kill one enemy maximum
1	A	Bayonet	PB/Kill one enemy maximum
1	A	Rifle Butt	PB/Kill one enemy maximum
1	A	Bare Hands	PB/Kill one enemy maximum
1	A	Garrote	PB/Kill one enemy maximum
2	A	Take Prisoners	PB/ Play only if enemy squad is pinned
3	A	Pistol	PB/S-1
4	A	Grenade	S/Negates opponents terrain Cover modifier
2	A	Flame Thrower	S/Negates opponents terrain Cover modifier
2	A	Bazooka/Panzerfaust	M+2
4	A	Sub-Machine Gun	S+1/M-1
2	A	Carbine	S/M
4	A	Bolt-action Rifle	S/M/L
3	A	Semi-Automatic Rifle	S+1/M/L-1
2	A	Sniper Attack	L+1
2	A	Mortar	L+2/Cannot use if you moved/Position Fire only
4	A	Light Machine Gun	M+2/L/Cannot use if you moved this turn
1	A	Radio Artillery	L+3
1	A	Fire Section	S/M/L Covering Fire Phase only
1	A	Assault Section	PB/S Position Fire Phase Only
1	A	Fire Team	M/L Position Fire Phase Only
4	A	Scout	Look at next 5 cards in deck
1	A	Infiltration	PB+1 Position Fire Phase Only
10	N	National Trait	Effect varies according to squads nationality
2	M	Encircled	Cover +3/Attach to pinned opponents terrain
6	M	Mission Objective	Victory Requirement
5	M	Smoke	All Opportunity Fire attacks -1 this turn
5	M	Concealment	Cover -1/Attach to your Terrain
4	M	Ambush	+2 all atk rolls in Oprty Fire Phase this turn
3	M	Enfilade	+2 to all attacks made by Guns this turn
4	M	Flanking Fire	Add +1 to all attacks this turn
2	B	Minefield	Block and Attack
2	B	Barbed Wire	Block

2 M Combat Engineer Negates a Block card 2 M Commander Killed Opponents Hand size -1 The Commander Killed Card can be played on opponents squad, once only during the game, immediately after an enemy soldier has been killed.

Victory

There are two ways to win: Kill or rout all members of your opponents squad. Collect 3 Mission Objective Cards.

National Trait Cards

These can be used for different effects depending on the nationality of your squad. Americans can use a national trait card to do one of the following:

1. Same as Radio Artillery card
2. American Ingenuity: Discard to draw 2 cards.
3. Browning Automatic Rifle Attack: S+1/M+1

Germans can use a national trait card to do one of the following:

1. Tactics: Same as Flanking Fire card
2. Same as Light Machine Gun card

3. Professionalism: Rally Roll +1
4. Intimidation: Morale Check +1

Russians can use a national trait card to do one of the following:

1. Machine Pistol Attack: PB/S/M-1
2. Reinforcements: Gain 1 man
3. Commissar: Rally Roll +1
4. Human Wave: PB+1

British can use a national trait card to do one of the following:

1. Sharp shooting: M+1/L+1
2. Stiff Upper Lip: Morale roll +1
3. British Intelligence: Look at next 4 cards in deck

Japanese can use a national trait card to do one of the following:

1. Same as Concealment card
2. Booby Traps: Same as Minefield card
3. Same as Ambush card
4. Bonsai Charge: PB+2

Cardset

by Christian Martinez (at martinez@lyon.cci.fr) to download **??Squad Cardset**

More Cards!

Another set, this one by Janne Thorne Zip File: [Click Here](#) to go to his Site Thoth version: [Click Here](#)

Most Excellent Cardset

by Marcello [Click Here](#) Images from "Saving Private Ryan" Plus playtested rules variants.

Flanking Variant

by Christian Martinez (at martinez@lyon.cci.fr)
Flanking Fire: this rule replaces the one existing about "Flanking Fire" and "Encircled". In the deck replace the two Encircled cards with two more Flanking Fire cards. After you have (successfully) played a terrain card without changing the range (laterally), you can play a Flanking Fire card. That card stays in play.

These cards are cumulative : if you move again laterally and play another FF card, all stay in play(=encirclement) and add their bonus. If you move and do not play a FF card, all FF cards you have played are discarded. If your opponent (successfully) moves, all FF cards you have played are discarded.

Map Variant

Use a hex map. Remove the Terrain cards from the deck. Draw the terrain types onto the map before play.

Terrain types include those described on the cards plus clear or open terrain. A squad is represented by a pawn on the map. In move phase you can move your squad 2 hexes in open terrain or 1 hex if Entering a non-open terrain type.

Point Blank Range = 1 hex distance.

S 2 hexes, **M** = 3 hexes, **L** = 4 hexes

This variant would allow each player to have more than 1 squad. Each squad requires its own hand of cards.

Stakk Chess

Objective

Capture opponents King.

Setup

Use a normal chessboard. Each side has 1 King and 31 flat pawns. Stack your pawns in your back 2 rows as follows: 1 1 1 1 1 1 1

4 2 3 5 K 3 2 4

Pawns must be flat and stackable. Use checker pieces for pawns.

Rules

Players take turns moving. On your turn move your King, one pawn, or one stack. Moving onto an opponents stack or pawn captures all of those pawns.

A pawn or stack may move onto a friendly pawn or stack forming a bigger stack. One or more pawns may be moved off a stack into the same space adjacent to the stack. At least one pawn must remain from the original stack.

Pawns moved this way may not capture or checkmate. A stack may be up to 5 pawns high. Pawns & Kings move as in normal chess.

A stack of 2 may move as a knight. You may only have two knights at a time. A stack of 3 may move as a bishop.

You may only have two bishops at a time. A stack of 4 may move as a rook. You may only have two rooks at a time.

A stack of 5 may move as a queen. You may only have one queen at a time. Single pawns that reach the back row may move laterally on the back row one space. They may not capture.

Star Command

Introduction

Board & card game for 2 players. Battle between Buzz Lightyear and Evil Emperor Zurg. Takes place in the Buzz Lightyear Universe.

Each figure represents a main character or group of lesser characters.

Disclaimer

'Buzz Lightyear' is a copyrighted/trademarked property. This is just a fan site.

Victory

Capture the opposing Leader.

The Map

Use an 8x8 chessboard.

The Men

Use chits or miniatures to represent units.

Units Table Notation

Number of that type of unit each player has in setup.

Move The types of Move Cards the unit can use.

Range = The types of Attack Cards the unit can use.

Space Ranger Unit Table

Name	#	Hits	Move	Range	Notes
Buzz Lightyear	1	3	5	4	Captain Lightyear: Leader
Mira Nova	1	2	5	4	Tangean Princess
X-R	1	1	5	3	Robot: Experimental Ranger
Booster	1	2	5	2	Space Cadet
LGM	2	1	3	2	Little Green Men
Space Rangers	8	1	4	3	Delta Squadron
Space Cruiser	1	2	5	5	Andromeda Class
Alpha-2	1	2	5	4	Prototype Ship

Zurgariffic Unit Table

Name	#	Hits	Move	Range	Notes
Evil Emperor Zurg	1	3	4	4	Leader
Agent Z	1	2	5	4	Dark Warpmatter
Brain Pods	1	1	2	2	Lack-wit Lackeys
Hornet Robots	8	1	3	2	Robots
Cranial Dissector Bot	1	1	3	1	Robot
Slag Monster Mutant	1	2	2	1	
War Cruiser	1	2	5	5	
Planetary Defense Matrix	1	2	1	4	
Zurg Tower	1	3	0	5	

Space Ranger Unit Special Abilities

Name	Ability	Game Effect
Buzz Lightyear	Field Experience	Defense

Name	Ability	Game Effect
Mira Nova	Tangean Brain Squeeze	Attack = 1
X-R	Auxiliary Gear	Attack = 2
Booster	Bulk	Attack = 1
LGM	Uni-mind	Repair
Space Rangers	Hot Dogging	Move = 4
Space Cruisers	Laser Cannons	Attack = 6
Alpha-2	Stealth	Move = K

Zurgariffic Unit Special Abilities

Name	Ability	Game Effect
Evil Emperor Zurg	Ion Blaster	Attack = 3
Agent Z	Flame Thrower	Attack = 2
Brain Pods	Grey Matter	Repair
Hornet Robots	Expendable	Draw 1 card if destroyed
Cranial Dissector Bot	Dissection	Attack = 1
Slag Monster Mutant	Crater Vipers	Attack = 1
War Cruiser	Laser Cannons	Attack = 6
Planetary Defense Matrix	Space Mines	Attack = 1
Zurg Tower	Zurgatronic Megaray	Attack = 6-8

Unit Special Abilities

Discard a 'Special' card to activate a units special ability. The Repair ability puts a destroyed robot unit back into play next to the repairing unit. Repairs on your units are done at the end of your Battle Phase.

Setup

Each player places one unit on each square of his back two rows. Units may not stack.

The Cards

Players share a common deck.

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Orders Phase
2. Move Phase
3. Battle Phase

Orders Phase

Draw 3 cards. If the deck runs out, shuffle the discard and draw from it. Max hand size = 5 cards.
Discard excess cards.

Move Phase

Play (discard) a Move card to move one of your units. Units cannot move through other units except for: The

Alpha-2 uses its stealth technology to move through other units Mira Nova may use her Ghosting Powers to move through other units. The move card has a number.

This is the number of spaces the unit moves. The Unit tables list what type of Move cards each unit can use. Moves are diagonal or orthogonal.

Instead of moving just one unit in any direction, you have the option of moving one or more units forward the indicated number of spaces using a single move card.

Battle Phase

Play (discard) an Attack card to have a unit attack. The attack card has a number. This is the range of the attack.

Attacks are diagonal or orthogonal. The enemy unit that is the target of the attack takes one Hit point of damage. A unit reduced to zero hits is captured and is removed from the map.

Units cannot attack through other units. A player may discard a Defense card to negate an attack.

Card List Notation

M Movement

A Attack

Star Control

Introduction

Alliance vs Hierarchy. Space War Strategic & Tactical.

Disclaimer

Star Control is a licensed property. This is merely a fan site.

Victory

Destroy all enemy Starbases.

Galactic Starmap

Use a Hex Map. There are 3 Hex Types. When setting up roll for each hex:

1D6	Type:	Notes:
1-3	Void	Empty Space
4-5	Star	World type unknown until explored
6	Hazard	No Ships may enter this hex

Tactical Solarmap

Use a Hex Map. This map is used for fighting battles. If at a World Hex, put a Planet Marker in the Center Hex of the Map.

If at a Starbase, put a Starbase Marker in the Center Hex of the Map.

Dice

Six & 10 sided dice are needed.

Counters

Use counters to represent:

- Unexplored Stars
- Hazards
- Worlds
- Relics
- Installations
- Ships & Special Ships
- Starbases

Hierarchy Fleet Ship List

Race/Ship	Crew	Range	Speed	Turn	Dam	Aim
Ur-Quan Dreadnaught	10	8	2	1	4	6
Mycon Podship	4	2	2	2	3	8

- Damage (to Ships)

Starbucks

The basic Currency of both sides. Use Tokens to represent Starbucks.

Fleets

Each Player has 7 Types of Ships in his Fleets. A Fleet is a stack of Ships in Play on the Galactic Map A Fleet can have a Maximum of 7 Ships. A Hex may contain any number of Fleets.

Fleet Pile

This is a pile of all of a players ship counters that are not in play. A complete set of Ship counters has 10 Copies of each of the 7 types of ships.

Ship Stats

Each ship has 6 Stats: Crew, Range, Speed, Turn, Damage, Aim

Crew

This is a measure of how much damage a ship can sustain before being destroyed.

Range

The distance in hexes a Ships Weapons will reach.

Speed

The distance in hexes a Ship can travel in 1 turn.

Turn

The maneuverability of the Ship. This is subtracted from an opponents Aim when he is attacking.

Aim

Chance to hit on 1D10 when attacking.

Race/Ship	Crew	Range	Speed	Turn	Dam	Aim
Spathi Discriminator	6	6	4	4	1	8
Androsynth Guardian	4	4	1	2	2	8
Vux Intruder	4	6	2	2	2	7
Ilwrath Avenger	4	2	3	4	3	8
Umguh Drone	2	2	2	2	2	7

Special Hierarchy Ships

Race/Ship	Crew	Range	Speed	Turn	Dam	Aim
Ur-Quan Fighter Squad	1	2	4	4	1	8
Androsynth Comet	4	1	5	4	3	7

Ur-Quan Dreadnaught

Each Dreadnaught may launch 2 Fighter Squads during a Battle. A Fighter Squad must return to a Dreadnaught once every 4 turns or be destroyed.

Mycon Podship

Weapon: Tracking Plasmoid Long Range Attack Option: Range +2 Dam -1 Aim -1 Extreme Range Attack Option: Range +4 Dam -2 Aim -2 The Podship removes all damage after each battle.

Spathi Discriminator

Weapon: BUTT: Backwards Utilizing Tracking Torpedo

Androsynth Guardian

Weapon: Molecular Acid-based Blob This ship may reconfigure into the Comet form in End Segment if it did not attack this turn.

Androsynth Comet

Attack Mode: Direct Impact This ship may reconfigure into the Guardian form in End Segment. After 2 consecutive turns as a Comet the ship automatically goes back to Guardian Mode.

Vux Intruder

Weapon: Monstrous Optical Laser Secondary Weapon: Limpet: Range = 6, Aim = 8 If the Limpet hits the target takes no damage, But is Speed, Turn, & Accuracy -1 for rest of battle

Ilwrath Avenger

Weapon: Cloaking & HellFire Blast. Enemy ships must target another ship if one is in range.

Umguh Drone

Weapon: Antimatter Cone Cone Defense: If hit with a Missile roll 1D6. On a roll of 4+ the Missile is destroyed. Retro-Propulsion: Move +3, Aim +1, Speed +2 for one full turn Retro-Propulsion can be used up to once every three turns The turn after Retro-Propulsion the ship is Move -1, Dam -1, Speed -1

Alliance Fleet Ship List

Race/Ship	Crew	Range	Speed	Turn	Dam	Aim
Chenjesu Broodhome	8	8	3	1	4	6
Yehat Terminator	6	6	3	3	2	7
Mmrnmhm X-Form	4	4	1	2	2	8
Ariloulaleelay Skiff	2	1	2	4	2	8
Syreen Penetrator	4	6	3	3	1	6
Earthling Cruiser	6	8	1	1	4	7
Shofixti Scout	2	6	4	4	1	7

Special Alliance Ships

Race/Ship	Crew	Range	Speed	Turn	Dam	Aim
Mmrnmhm Fighter	4	8	4	4	1	6

Chenjesu Broodhome

- Weapon: Large Crystal Missile
- Missile Fragmentation Option: Damage -3 Aim +2 Range +1
- Secondary Weapon: DOGI's: Range = 6, Aim = 8
- If a DOGI hits, the target takes no damage, But is Speed, Turn, & Damage -1 for rest of battle

Yehat Terminator

- Weapon: pulse cannon fires twin energy Missiles.
- This Ship can make 2 attacks on its turn.
- Force Field Activation: Turn +2 & only get 1 attack next turn.

Mmrnmhrm X-form

- Weapon: Twin Lasers
- This Ship can make 2 attacks on its turn.
- This ship may reconfigure into the Fighter form in End Segment.

Mmrnmhrm Fighter Form

- Weapon: Long Range Missile Launcher.
- This ship may reconfigure into the X-Form in End Segment.

Ariloulaleelay Skiff

- Weapon: Auto-Aiming Lasers.
- Teleport Defense: If hit roll 1D6. On a roll of 4+ the skiff evades by teleporting in a
- Random direction (use 1D6 to determine direction from original hex) 1D6 spaces away.

Syreen Penetrator

- Weapon: Puny Missile
- Syreen Song Attack: Range = 2, Aim = 8, Dam = 2
- If the Song Hits, the Syreen remove 2 Damage from themselves.

Earthling Cruiser

- Weapon: Long Range Homing Tactical Nuclear Weapons
- Secondary Weapon: Point Defense Laser: Range = 2, Aim = 8, Damage = 1

Shofixti Scout

- Weapon: Energy Dart
- Glory Attack: Range = 1, Aim = 9, Damage = 4
- The Scout self Destructs in a Glory Attack.

Setup

Players pick which side they control (Hierarchy or Alliance) Set up the Galactic Map. Each Player places 1 Starbase marker onto an empty space (on opposite sides of the Galactic map). Each player starts with 4 random ships & 10 Starbucks.

Turn Sequence

Players take turns. Each turn has 8 Phases:

1. Movement Phase
2. Research Phase
3. Battle Phase
4. Starbucks Phase
5. Construction Phase
6. Build Phase
7. Besiege Phase
8. End Phase

Movement Phase

- At the beginning of this phase, you may rearrange the compositions of your fleets within each hex.
- A Fleet may Move 1 Hex.
- A Fleet that contains all ships with a speed of 3+ may move up to 2 Spaces.
- A Fleet cannot move into a space containing an enemy Fortress and cannot move from a space adjacent to an enemy fortress into another space also adjacent to an enemy fortress.

Exploration

When a Star is explored for the first time roll to determine the World Type:

1D6	Type:	Installation Type:
1-2	Mineral World	Mine
3-4	Life World	Colony
5-6	Dead World	Fortification

Finding Relics

When a Star is explored for the first time roll to determine if there Are any Precursor Relics present:

1D6	Relics:
1-3	None
4-5	Precursor Technology
6	Power Crystals (Gain 1D6 Starbucks)

If you found a Technology get an extra advance in Research Phase.

Research Phase

Get 1 Advance: One of your races (determined randomly) gains 1 level in 1 random Stat. This bonus affects all ships of that race for the rest of the game.

Random Race Table

1D10	Hierarchy:	Alliance:
1	Ur-Quan	Chenjesu
2	Mycon	Yehat
3	Spathi	Mmrnmhm
4	Androsynth	Ariloulaleelay

1D10	Hierarchy:	Alliance:
5	Vux	Syreen
6	Ilwrath	Earthling
7	Umgah	Shofixti
8+	Reroll	Reroll

Random (ship) Stat Table

1D6	Type	Notes:
1	Power Sources	Range +1
2	Defenses	Crew +1
3	Weapons	Damage +1

1D6	Type	Notes:
4	Engines	Speed +1
5	Control Systems	Turn +1
6	Targeting	Aim +1

Battle Phase

A Fleet may attack an enemy Fleet in an adjacent Hex. Use the Tactical Hex Map. The Type of Hex will be that of the Defending Fleet.

Planets may not be moved into or through. Set up opposing Ships at opposite ends of the Map. Ships may not stack.

The Battle proceeds in Battle Turns. Players take Turns. During a player's turn each of his ships may move once & attack once. To hit roll 1D10 (The Attack Roll). If this equal to or lower than The Attackers Aim Stat minus the Defenders Turn Stat, the Attack Hits.

(A natural Roll of 1 always hits & a roll of 0 always misses) The Target takes damage equal to the Damage Stat of the Attacker. Use counters to indicate damage. A Ship with more damage than crew is destroyed.

Resolve Battles between fleets one at a time. An individual Battle can only include 1 Fleet from each player. (An individual Fleet may take part in several Battles in this phase) At the End of Battle Phase all of your damaged ships are repaired.

Starbucks Phase

Gain 2 Starbucks for every Mine you control. Gain 1 Starbuck for every Colony & Starbase you control.

Construction Phase

You may pay 6 Starbucks to build a Starbase in a Void space occupied by one of your ships. A Starbase

may not be built adjacent to another Starbase. You cannot build a Starbase if you currently have more Starbases than Colonies or Mines You may pay 4 Starbucks to build a Colony on a Life World occupied by one of your ships.

You may pay 4 Starbucks to build a Mine on a Mineral World occupied by one of your ships. You may pay 2 SB to build a Fortification on a Dead World occupied by one of your ships. A world may hold only 1 Installation.

Build Phase

You may pay 2 Starbucks to purchase a Ship. Draw a Random Ship Counter from your Fleet Pile. Ships must be built at a Starbase.

A Starbase can build a max of 1 Ship per turn.

Besiege Phase

A Fleet may attack a Fortress in an adjacent Hex. Roll 1D10 for each attacking ship (Bombardment Roll). Any roll of 10+ destroys the Fortress The Ur-Quan Dreadnaught gets +2 to this roll.

If you occupy a Hex containing an enemy Starbase, Mine or Fleet, you gain control of it.

End Phase

You may scuttle any Ships you don't want (Get 1 Starbuck per ship scuttled).

Star Craft Spawn

Introduction

Two player card game set in the StarCraft universe.

Disclaimer

StarCraft is a licensed, copyrighted product. This is merely a fansite.

Decks

Each player gets one unique deck. For example: Terran Deck vs Zerg Deck.

Randomizers

Six sided dice are needed to play. Tokens to record damage are also needed.

Objective

Destroy your opponents Command Structure.

Setup

Every player starts with a hand of 5 cards. Every player starts with their Command Structure in play. Roll high on 1D6 to see who goes first.

Turn Sequence

Players take turns. Each turn has 4 phases:

1. Logistics Phase
2. Deploy Phase
3. Attack Phase
4. End Phase

Logistics Phase

Draw 3 Cards. If your deck runs out, you may shuffle your discard and draw from it. You may discard 2 cards from your hand to draw 1 card.

Deploy Phase

You may play (deploy) any 3 cards from your hand. Deployed cards are placed face up onto the table in front of you. Deployed cards stay in play until destroyed.

Some of your deployed cards may allow you to deploy additional cards. Instead of deploying a card, you may issue a Repair Order. A Repair Order removes 1D3 damage counters from your units.

Instead of deploying a card, you may draw a card from the top of the deck. Instead of deploying a card,

you may put the top card of the discard pile into your hand. Instead of deploying a card, you may issue a Battle Plan Order.

A battle Plan Order gives all of your units a +1 to either Move, Force, Range, or Armor. Instead of deploying a card, you may issue a Scout Order. A Scout Order lets you look at your opponents hand.

Attack Phase

All of your units with a move greater than zero may attack. Attack with one unit at a time. The target of the attack must be an Infantry unit, Hero, Vehicle, Starcraft, or Building.

Units with Stealth cannot be Targeted. The defender may block the attack with another unit if the blocker has a larger Move rating Or Range score than the attacking unit. The blocking unit becomes the target of the attack. Units with Stealth cannot be blocked except by special units.

Compare the Range score of the Attacking unit & Defending Target. The Higher Range score attacks first. A unit with Stealth always attacks first regardless of Range.

When attacking roll a number of D6 equal to your Force Score. Every roll of 1-3 on 1D6 causes a Damage Token to be placed on the opposing unit. If the number of Damage Tokens equals or exceeds the units Armor rating it is destroyed.

Damage tokens remain until repaired. Destroyed units are discarded.

End Phase

Max hand size = 6. Discard excess cards. All Zerg units automatically (regenerate) remove 1 Damage Counter.

Event Cards

Have a variety of uses, and are played when appropriate. They are discarded after they take affect.

Terran Card Type Notation Glossary

- B** Building
- S** Spacecraft
- I** Infantry
- V** Vehicle
- H** Hero
- F** Faction
- A** Advance
- E** Event

Detect = Negate Stealth ability of all opposing units in play. Control = Take control of Target Infantry Unit

Star Fiefs

Introduction

Card game version of Emporex. Opposing Noble Houses vie for domination in this quadrant of space.

Setup

Determine turn order by coin flips. Shuffle the common deck. Each Player starts with: 1 Homeworld card, 1 Leader Card, 1 House Troops Card, 1 Lesser Son Card. Each player starts with 4 Power tokens.

Each player draws a hand of 8 cards. Homeworlds and Leaders not used, are removed from play.

Victory

Players who lose their Homeworld are eliminated. A player may win by eliminating all of his opponents or... The first player to accumulate 8 Power Tokens is the winner and becomes the Governor of the Sector.

Turn Sequence

Players alternate turns. The player whose turn it is, is called the active player. A turn consists of the following 8 phases:

1. Draw Phase
2. Intrigue Phase
3. Duel Phase
4. Event Phase
5. Attack Phase
6. Production Phase
7. Recruit Phase
8. Discard Phase

Draw Phase

Draw 1 card. You may pay 10 Ecos to draw another card. If the deck runs out, shuffle the discard pile, and continue play.

Intrigue Phase

Leaders are considered to be personas. -You may put a card with the Seduction, or Intrigue trait back in your hand to spy: Look at opponents hand.

-You may put a card with the Psychic trait back in your hand to look at opponents hand and next card in deck.

-You may put a card with the Sabotage trait back in your hand: Target opponent must discard 1 random card from his hand. If the discarded card is a psypower or event the saboteur is discarded also.

-You may put a card with the Seduction trait back in your hand: Target opponent's male persona is put

back in his owner's hand. That male persona is immune to this effect for the rest of the game.

-You may put a card with the Assassination trait back in your hand: Discard the top card of the deck:

- If it is a Psypower or Event the Assassin is discarded.
- If it is a Persona, then a target opponent's persona in play is killed (discarded).
- If it is any other type of card than nothing happens.

A player may only make one Assassination attempt per turn. A player may discard a persona card from play or his hand to negate a successful assassination.

Event Phase

Certain Events and psypowers may be played during this phase. You may play a psypower card if one of your cards already in play has the trait of psychic. Discard these cards as soon as they are used.

Duel Phase

If you have a Duelist in play, he may discard a card to duel an opponent's duelist that is also in play. Leaders may not start Duels. A Leader may only duel (in Defense) if there are no other duelists on his side. Each player in turn discards the top card of the deck: The military value of the discarded card is that duelist's attack value.

Some duelists have a dueling value on the persona's card. This adds to their attack value. The duelist with the highest attack value wins. Certain event and psypower cards may be played to modify these values. If the cards are tied, then discard again.

The losing duelist is killed (discarded). A player may initiate a maximum of one duel per turn.

Attack Phase

The active player is the attacker. The active player may choose not to attack or to attack one target opponent player. Attacker chooses attack mode: Military (M) or Political (P). A card with the transport trait may be played to initiate an extra attack phase that is a military attack. The card is part of the attack.

A card with the intrigue trait may be played to initiate an extra attack phase that is a political attack. The card is part of the attack.

Military Attacks

The attacker must target a world controlled by his opponent. Both players may commit cards he has in play to the battle. Cards committed may include Leaders, Personas, and Armies.

The attacker must pay 1 Eco per such cards he commits. The defender must commit the attacked world. Defender cards can only be used by the defender.

A player may play a psypower card if one of his deployed cards has the trait of psychic. Events may be played if applicable. In a multiplayer game, other players may play cards in support of the attacker or the defender at their invitation.

Starting with the attacker, cards are committed until neither player wants to commit any more cards. The winner is the player with the highest total military value. Only cards in play (not discarded) count towards the total values.

In case of a tie the defender wins. If the Attacker wins he puts the target planet into his hand. If the Defender wins, he remains in control of the world.

The loser must discard one committed Army card. Other cards remain in play.

Political Attacks

The attacker must target one of his opponents. Both players may commit cards he has in play to the struggle. Cards committed may include any card with a Political value.

A player may play a psypower card if one of his deployed cards has the trait of psychic. Events may be played if applicable. In a multiplayer game, other players may play cards in support of the attacker or the defender at their invitation.

Starting with the attacker, cards are committed until neither player wants to commit any more cards. The winner is the player with the highest total political value. Only cards in play (not discarded) count towards the total values.

In case of a tie the defender wins. The loser must place one of his non-homeworld committed cards back into his hand. If the Attacker wins he gains control of one of his opponents Political power tokens.

Production Phase

The basic monetary unit is the Eco. Use coins to represent Ecos. (1 penny = 1 Eco) Gain a number of Ecos equal to the Economic value of all of your cards in play.

Recruit Phase

Put Armies, Personas, Worlds and Organizations into play. A card costs a number of Ecos equal to 1 + its combined Military, Political, and Economic value. If your Leader is dead, you may discard a Son card to bring him back into play for free.

Discard Phase

Pay 1 Eco for each army you control or place that army back in your hand. Maximum hand size is 10 cards. Discard excess cards.

Recurring Leader Rule

If your Leader is killed or discarded put him into your hand instead.

Card List

CARD NAME	VALUE	NOTES

Time expansion	—	Psypower/ Take another turn after this one
Dimensional Rift	—	Psypower/ Opponents discards 3 cards
Teleportation	7M	Psypower/ Transport
Precognition	—	Psypower/ Look at next 7 cards in deck
Cosmic Transference	—	Psypower/ Take 1 random card from opponent's hand
Molecular Disruption	9M	Psypower
Mind Slave	—	Psypower/ Take control of target personality
Psychic Persuasion	10P	Psypower
Clairvoyance	—	Psypower/ Look at opponents Hand
Telekinetic Maelstrom	—	Psypower/ Target Army destroyed
Domination	—	Psypower/ Take control of target army this battle
Sympathetic Convergence	—	Psypower/ Search deck for 1 card
Imperial Veto	7P	Event
Armageddon Virus	—	Event/ Destroy all armies in play

CARD NAME	VALUE	NOTES
Planetary Revolt	—	Event/ Take control of target World
Betrayal	—	Event/ Take control of target organization
Infiltration	—	Event/ Target organization goes back to owners hand
Traitor	—	Event/ Take control of target persona
Pax Imperia	—	Event/ No Military Attacks next 2 turns
Psychic Nexus	—	Event/ No Psypowers next 3 turns
House Bodyguard	—	Event/ Negate Assassination
Imperial Intervention	—	Event/ Negate a Duel
Poisoned Blade	—	Event/ Discard during Duel to get Duel +3
Progenitor Artifact	—	Item/ Psychic

Star Fleets

Introduction

Card game for two players. Battle between opposing fleets in the Star Trek Universe.

The Decks

Each player gets one unique deck.

Download Cardset

Thanks Zak. This set is awesome! Goto Zaks Site

Cards

Types of cards include: Ships, Personnel, Control, and Combat cards.

Fleet Total

Each player starts with a Fleet Total of 100 points.

Victory

You win if you reduce your opponents Fleet Total to zero points.

Ships

All ships are designated as Small, Medium, Large, or Fighters. All ships have an Attack Score and a Defense Score. Shield cards played with large ships get Defense +2 Shield cards played with small ships get Defense -1 Shield cards played with fighters get Defense -2 Evasion cards played with large ships get Defense -1 Evasion cards played with small ships get Defense +3 Evasion cards played with fighters get Defense +4 Ships with Initiative get to attack first in Combat.

Ships with Command give Initiative to any one ship every turn.

Turn Sequence

Players take turns. Each turn has 4 phases:

1. Warp Phase
2. Deployment Phase
3. Control Phase
4. Combat Phase

Warp Phase

Both players Draw 5 cards. If your deck runs out, shuffle the discard and draw from it.

Deployment Phase

Put all Ships you draw into play (face up in front of you). Place Personnel Cards into play onto Ships just deployed. A ship may have a maximum of 1 Captain, 1 Officers, and 1 Crew.

Control Phase

Ships with Detect allow you to look at your opponent's hand. If the hand contains Cloak cards you may discard one. Discard all Control cards played at the end of this phase.

Combat Phase

Declare a target for each of your ships. A target can be any opposing ship or the opponents Fleet. If the defender has any ships not being attacked, those ships may block any attacker they like.

A ship does damage equal to its Attack rating. Every ship has a Attack & Defense rating. Attached Personnel add to these ratings. Players may play Combat cards onto their ships to increase the Ship's Force & Defense ratings.

If the Attack total is greater than the target ships Defense Rating, the target is destroyed. The Attacking & Target ships simultaneously do damage to each other. Ships with "Initiative" get to apply their attack first.

If a ship is attacked by two or more ships, it applies its Attack rating to them in any combination it likes to the attackers. If a ship is attacked by two or more ships, the attackers combine their Attack ratings but not their Defense ratings. If the Fleet is attacked and the attacker is unblocked, subtract a number of Points from the Fleet Total equal to the Force of the attacking ship.

Discard all Combat cards played at the end of this phase. If a ship is destroyed, all of its fighters are destroyed too.

Card Type Abbreviations

- C** Combat (Play in Combat Phase)
- P** Personnel
- LS** Large Ship
- MS** Medium Ship
- SS** Small Ship
- F** Fighter
- X** Control Card (Play in Control Phase)

Emergency Repairs	1	X	-	-	Put ship in discard into your hand
Sensors	2	X	-	-	Ship gains Detect this turn
Reinforcements	2	X	-	-	Fleet Total +5

Faq's

1Q) Unblocked attack: only possible when there are no enemies or also in the case when the attacker has more ships than the defender? 1A)Or if you target opponents fleet and he declines to block. 2Q) The effect of a card must be applied (an then the card is discarded) or you can choose? As an example: shields; you can choose to use them or play the card to negate a boarding party card. 2A)You get all benefits of the card when you play it. If you play shields on your ship you get defense +3 & you negate a boardng party card if one was or is played against that ship.

3Q) Combat cards that do not have an effect clearly stated as "this turn ..." are left on the ship at the end of the turn if the ship is not destroyed or you must discard them in any case? 3A)Only Personnel remain from turn to turn. Combat cards are discarded.

Game Designers Notes

Need to get info on the Orions, etc.

Starfleet Games

Star Frontiers Missions

Introduction

Warp Quest Style adventure game. Based on the 1980's SF RPG by TSR.

Disclaimer

Star Frontiers is a licensed, copyrighted property. This is merely a fan site.

Victory

Be the first player to move your party to the last space and Win the Final Battle Ally Challenge.

Dice & Pieces

- Six and ten sided dice are needed.
- Each player has a pawn to represent his or her group of Explorers on the board.

Explorer Race Table

1D6	Race:
1-2	Human
3	Dralasite
4	Vrusk

The Board

- The board is a single winding path of connected spaces with a Start Space and an End Space. The path should be 70 Spaces long.
- The First Space represents the start.
- The End Space is where the Final Battle takes place.

The Decks

- There are 3 Common Decks:
1. Exploration Challenge Deck
 2. Battle Challenge Deck
 3. Aid Deck

If a deck ever runs out, shuffle the discard and draw from it.

Party Composition

Your Explorer Party starts with 8 Members. For each member, roll for their Race and one Skill. When an Explorer is killed, you lose his Skill bonus.

Skill Specialty Table

1D6	Skill:
1	Combat +1
2	Psychosocial +1
3	Medical +1

1D6	Skill:
4	Technical +1
5	Environmental +1
6	Pick One

The Last Space

Players stop permanently upon reaching the last space. Each turn while there, they must encounter a Challenge from the Battle Challenge deck (no more Exploration Challenges). Once a party has defeated 4 Battle Challenges they must take the Final Battle Ally Challenge on their next turn.

Final Battle Ally Challenge

This is simply an Ally +2 Challenge. If successful you win the game, otherwise you lose.

Setup

Each player creates their party of explorers. Each player starts with 5 Aid cards. Players roll high on 1D10 to see who goes first.

Play proceeds clockwise.

Turn Sequence

- Players take turns. Each turn consists of 4 phases:
1. Move Phase
 2. Aid Phase
 3. Challenge Phase
 4. End Phase

Move Phase

Roll 1D6. Move your pawn that number of spaces towards the end space. You automatically stop when you enter the end space. You may play a Travel card to add to your Move Roll.

Aid Phase

Draw 1 card from the Aid Deck. Place Aid cards in your hand.

Challenge Phase

Draw 1 card from the Exploration Challenge Deck. Challenge cards are encounters your party faces immediately. Each challenge card lists one or more skills. Your party will have to make a skill check vs each skill listed.

(The same skill may be listed twice or more, requiring that many skill checks) A Skill check consists of a Skill roll and Challenge Roll: Roll 1D10. This is the Skill roll. Add the skill bonuses of your party members to the roll. You may discard Aid cards for further

bonuses to the skill roll.

Next roll 1D10. This is the Challenge roll. Some Challenges have a DM (Difficulty Modifier). Add the DM to the Challenge Roll.

If the challenge roll is less than or equal to the skill roll you win the Skill check. If the challenge roll is greater than the skill roll you fail the Challenge. If you win all the Skill Checks, you win the Challenge.

The card may say what happens if you win or lose the Challenge. If the card does not give directions, then a random one of your Party members is killed.

End Phase

Max hand size is 7 cards. Discard excess cards. If one of your explorers was killed this turn, you may make a Medical +4 Challenge roll to revive them or if it was a Robot a Tech +4 Challenge roll.

Moving Onto An Opponents Pawn

If you land on an opponent's pawn move forward 1D6 Spaces.

Aid Deck Card List

Name:	Notes:
Elasticity	+2 to any Challenge (Requires Dralasite)
Lie Detection	+4 to Psych (Req Dralasite)
Education	+2 to any Challenge (Req Human)

Sathar Slither	Cbt +1	Lead Counterattack	Cbt +3
Defend Allies	Cbt +1 (Fail: Ally -1)	Sathar Cybodragon	Cbt +3

Star Trek

Solo card and dice game By C Gerard Luft

Introduction

Although my favorite Science Fiction RPG has, and always will be TRAVELLER (my favorite genre is Classic Space Opera; though DOCTOR WHO is always number one with me, I never classify it as a specific genre), I always had a soft spot in my heart for Roddenberry's utopian Star Trek. A veteran of the FASA STAR TREK RPG, The adventures I loved the most were the basic explore, first contact, go where no man has gone before on a Constitution Class Star Ship. This game captures that feel. Although I loved the FASA game, I am trying to be progressive, so I have used a VERY SIMPLIFIED system based off the new Decipher Star Trek RPG.

You will need 2 six-sided dice and a card deck composed of the STAR TREK CARD LIST below. I have also included a STAR TREK: THE NEXT GENERATION CARD

List, Star Trek: The Motion Pictures Card List, Star Trek: The Adventures Of

CAPTAIN SULU! CARD LIST and the crew from the ENTERPRISE-B in a STAR TREK: GENERATIONS CARD LIST (give Capt. Harriman a chance; he's just green).

The Turn

Each turn represents traveling at warp speed, orbiting and scanning, and beaming down to explore an unknown planet. You begin the game with the ENTERPRISE, KIRK, SPOCK and MC COY cards on the table. All the rest are shuffled up into one deck. Draw one card from the deck each turn.

SHORE LEAVE!: If the card you draw is a crew person, add that character to your other cards (representing your Landing Party/ Bridge Officers). The turn is then over, so proceed to the next planet.

FIRST CONTACT: If you draw a First Contact card, roll 2d6. If it is equal to or less than the score for the highest COMMAND OFFICER PROFESSION score of your cards in play, you succeed in making first contact. If you fail, the newly discovered aliens become hostile. Proceed to INVADERS below in order to resolve the conflict.

INVADERS: If you draw a KLINGON SOLDIER OR CAPTAIN, or a ROMULAN SOLDIER OR COMMANDER, a fight ensues (complete with Phasers and roundhouse punches)! You must roll on a 2d6 equal to or less than the score of the highest SECURITY PROFESSION score or MEDICAL PROFESSION score of your cards in play, in order to avoid a casualty. If you fail, you must discard a card from your characters in play. Security goes first (it's that red shirt thing), then command, then science, and finally medical.

SPACE COMBAT: If you draw a KLINGON or ROMULAN starship card, the ship attacks the ENTERPRISE:

- 1. The Klingon or Romulan ship goes first (it's a Star Fleet directive thing)**
ENEMY SHIP: roll 2d6 +6
ENTERPRISE: roll 2d6 + highest OPERATIONS OFFICER PROFESSION + 1 for each additional character in play with OPERATIONS OFFICER PROFESSION.
If the enemy's roll is greater than the Enterprise's roll, then the Enterprise is dead in space and the game is over.
- 2. The ENTERPRISE goes next**
ENTERPRISE: roll 2d6 + highest COMMAND OFFICER PROFESSION +1 for each additional card in play with COMMAND OFFICER PROFESSION.
ENEMY SHIP: roll 2d6 + 6
If the ENTERPRISE'S roll is higher than the ENEMY SHIP'S roll, then the

ENEMY SHIP is defeated. If not, return to step 1 and continue the combat.

To Boldly Go Where No Man Has Gone Before:

If you draw a TO BOLDY GO WHERE NO MAN HAS GONE BEFORE card, roll 2d6. If the roll is equal to or less than the card in play with the highest SCIENCE OFFICER PROFESSION or OPERATIONS OFFICER PROFESSION, then you succeed in a great dis-

covery. If you roll greater than the score, then the ENTERPRISE is disabled, and the game is over.

Winning

If you make it through the deck, you win!

Star Trek Next Generation Encounters

Introduction

Card game for 2-4+ Players. STNG Theme.

Disclaimer

STNG is a licensed, copyrighted property. This is merely a fan site.

Victory

The first player to resolve 10 Encounters is the winner.

The Decks

There are 2 Decks:

1. The Encounter Deck
2. The Enterprise Deck

The Encounter Deck

These are events, complications, and missions the players are Trying to resolve. All require 2-3 specific crew to complete.

The Enterprise Deck

These fall into 2 main categories: Ship Cards and Crew Cards. Some can be both and some can be used for special Actions.

Setup

Shuffle the Decks. Each player is dealt 4 cards from the Enterprise Deck. Flip the top 3 cards of the Encounter Deck over face up in a line.

These are the Available Encounter Cards. Flip the top 5 cards of the Enterprise Deck over face up in a line. These are the Bridge Cards.

Turn Sequence

The youngest player goes first. Play proceeds clockwise. Each turn has 5 Phases:

1. Ready Phase
2. Action Phase
3. Mission Phase
4. Penalty Phase
5. End Phase

Ready Phase

Fill your hand to 5 cards with cards drawn from top of the Enterprise Deck. If the Deck ever runs out, shuffle the Discard and draw from it.

Action Phase

You may take up to 3 Actions in this Phase. These can include:

1. Discarding a Card and Drawing a replacement from the

Top of the Enterprise Deck.

2. Switching a card in your hand for a Bridge Card.
3. Activating the Special Ability of a Bridge Card.

Mission Phase

You may Complete (Resolve) one of the Available Encounter Cards. To do this you must make a combo. A combo must include 5 Crew Cards and 1 Ship Card for a total of 6 Cards.

Five cards of the combo must be from your hand. The Sixth card must be one of the Bridge Cards. 2-3 of the 5 Crew must match the ones listed on the Encounter Card.

You cannot have Duplicate Crew Cards (You cannot play 2 Picards). If you are able to make the Combo, discard all the cards you used To make it and place the Encounter card into your Victory Pile.

Penalty Phase

If you did not resolve an Encounter this Turn you must take a Penalty. Each Encounter Card Lists a Penalty. Take the Penalty of the Farthest most Available Encounter Card. Penalty types include: Destruction: Discard your Hand. Lost: Miss your Next Turn. Delay: Get 1 less Action next Turn.

Death: Discard a Crew Card from your hand. Damage: Discard a Ship Card from your hand. Blocked: Next Turn you must solve this Encounter if it is still Available.

Retreat: Next Turn you cannot solve this Encounter Card. Reprimand: Discard 1 Card from your Victory Pile.

End Phase

If there are less than 3 Available Encounters, flip over a replacement from the Encounter Deck. Discard down to 3 Bridge Cards. Discard those Farthest down the line. Shift the remaining Bridge cards towards the end of the line.

Flip over 2 replacements from the Enterprise Deck to bring the total Number of Bridge cards up to 5.

Bridge Card Special Abilities

Whenever you use the Special Ability of a Bridge card you must discard it. Attack = Opponent must discard 2 random cards from his hand. New Mission = Discard an Available Encounter card and draw A replacement for it.

Provide Options = Draw 2 Cards and add them to the Bridge. Repair = Replace this card with a Ship card from the Discard. Reset = Discard your hand and

Draw 5 new Cards.

Extra Actions = Gain 2 Actions. Revive = Replace this card with a Crew card from the Discard.

Scan Look at Opponent's Hand, or next 2 Cards in the Encounter

Deck, or the next 5 cards in the Enterprise Deck. Steal = Target opponent must take a random card from his hand And add it to the Bridge Cards. Defend = Negate Penalty this Turn.

Encounter Deck Card List

Encounter:	Requirements:
Q Conundrum	Picard, Data, Troi (Blocked)
Borg Cube	Picard, La Forge (Destruction)
Edge of the Universe	Wesley, Picard (Lost)
Prime Directive	Picard, Data, Beverly (Reprimand)
Medical Mission	Beverly, Troi (Death)
Cloaked Romulan Ship	Picard, Riker, Worf (Damage)
Klingon Warship	Worf, Picard (Damage)
Ferengi Cruiser	Picard, Riker (Damage)
Holodeck Malfunction	Data, Picard (Delay)
Survival	Wesley, Picard (Death)
Time Loop	La Forge, Picard (Destruction)
Diplomacy Mission	Picard, Troi, Riker (Reprimand)
Science Mission	La Forge, Data, Wesley (Blocked)
Mirror Universe	Picard, Riker, La Forge (Lost)
God Like Entity	Picard, Troi (Blocked)
Mystery	Data, Riker, La Forge (Blocked)
Undercover Mission	Riker, Troi (Delay)
Legal Dispute	Picard, Data (Delay)
Ethical Dilemma	Picard, Troi (Death)
Study Anomaly	Wesley, La Forge (Retreat)
Rescue Mission	Riker, Worf (Death)
First Contact	Troi, Picard (Retreat)
Training Mission	Riker, Wesley, La Forge (Retreat)
Escort Mission	Troi, Beverly (Delay)
Colony Evacuation	La Forge, Data (Reprimand)
Death Trap	Picard, La Forge, Beverly (Destruction)
Matter of Honor	Worf, Riker (Death)
Dangerous Experiment	Wesley, La Forge (Destruction)
Cultural Taboo	Picard, Troi, Wesley (Delay)
Contain Plague Ship	Beverly, Picard (Death)
Kidnapping	Riker, La Forge (Blocked)
Rogue Supersoldiers	Picard, Troi, Worf (Damage)

Enterprise Deck Card List

Card:	Notes:
The Enterprise	Ship Card: 4 Copies in Deck
Captain Picard	Crew Card: 6 Copies in Deck
William Riker	Crew Card: 4 Copies in Deck

Card:	Notes:
Commander Data	Crew Card: 4 Copies in Deck
Ships Counselor Troi	Crew Card: 4 Copies in Deck
Chief of Security Worf	Crew Card: 4 Copies in Deck
Geordi La Forge	Crew Card: 4 Copies in Deck
Dr. Beverly Crusher	Crew Card: 3 Copies in Deck
Ensign Wesley Crusher	Crew Card: 3 Copies in Deck
Tasha Yar	Use as Worf or Defend
Dr. Pulaski	Use as Beverly or Revive
Guinan	Use as Troi or Provide Options
Transporter Chief O'Brien	Use as Crew or Extra Actions
Lieutenant Barclay	Use as La Forge or Repair
Technobabble	Use as Wesley or La Forge or Data
Psychobabble	Use as Troi or Provide Options
Real Boy	Use as Wesley or Data
Command	Use as Picard or Riker
Integrity	Use as Picard or Beverly
Cunning	Use as Riker or Provide Options
The Traveler	Use as Wesley or New Mission
Crushing It	Use as Wesley or Beverly
Leadership	Use as Picard or Provide Options
Phasers	Use as Ship or Attack
Photon Torpedoes	Use as Ship or Attack
Scanners	Use as Ship or Scan
Geordi's Visor	Use as La Forge or Scan
Tractor Beam	Use as Ship or Steal
Sickbay	Use as Ship or Revive or Beverly
Bridge	Use as Picard or Ship
Holodeck	Use as Ship or Reset
Away Team	Use as Crew or Reset
Ships Computer	Use as Ship or Data
Tricorder	Use as Revive or Repair
Ten Forward	Use as Ship or Crew
Engineering	Use as Ship or Repair or La Forge
Transporters	Use as Ship or Extra Actions
Replicators	Use as Ship or Provide Options
Shuttlecraft	Use as Ship or Extra Actions
Renaissance Man	Use as Picard or Data
Friends and Lovers	Use as Riker or Troi
Wormhole	Use as New Mission or Provide Options
Red Alert	Use as Ship or Crew
Probe	Use as Ship or Scan
Shields	Use as Ship or Defend
Hologram Personality	Use as Ship or Crew
Lovely Ladies	Use as Beverly or Troi
Impulse Power	Use as Ship or Provide Options
Tactical Station	Use as Ship or Worf or Attack
Empathy	Use as Troi or Scan
Warp Speed	Use as Ship or New Mission
Make It So	Use as Picard or Extra Actions

Star Trek Ship Engagements

Introduction

Card game for 2+ players. Star Trek Space Combat Theme. Each player controls 1 Ship.

Disclaimer

Star Trek is a licensed, trademarked, copyrighted property. This is merely a fan site.

Victory

Destroy your opponent's Ships.

Hits & Structure Points

A Ship is destroyed if it has accumulated as many or more hits than Structure Points. Use coins to represent Hits.

The Deck

Players share a common deck.

Setup

Each player picks an Empire and a Ship Class. Empires include: Federation, Klingon, Romulan, Etc. Ship Classes include: Gun Ship, Frigate, Cruiser, Capitol Ship In a 2 player game, players should pick same size ships.

Each player is dealt a hand of 5 cards. Flip a coin to see which side goes first.

Basic Ship Classes

Ship Class:	SP	MHS
Gun Ship	4	5
Frigate	6	6
Cruiser	8	7
Capitol Ship	10	8

SP Structure Points
MHS Max Hand Size

Note On Playing Cards

When you "play" a card, it is discarded.

Turn Sequence

Players take turns. Each turn has 10 Phases:

1. Tactics Phase
2. Sensors Phase
3. Declaration Phase

4. Surprise Phase
5. Attack Phase
6. Evasion Phase
7. Damage Phase
8. Security Phase
9. Event Phase
10. Bridge Phase

Tactics Phase

Draw 3 Cards. If the deck runs out, shuffle the discard and draw from it.

Sensors Phase

You may play an Examine card to look at your opponent's hand. You may play an Analysis card to look at the next 7 cards in The deck and either put them back in the same order or reshuffle the deck.

Declaration Phase

You may declare you are attacking. (You must have a Weapons Card or a Sabotage Card in your hand) Specify the opposing player you are going to attack. If the target player has less than 4 cards in his hand, he may draw 2 cards.

Normally, you may only make one attack per turn. If you are not attacking, skip to Bridge Phase.

Surprise Phase

You may play Surprise cards. Your target opponent may play Detect cards to counter you. If the value of the Detect cards is equal or greater than the Surprise cards, the Surprise is negated.

If the value of the Surprise cards is greater, the opponent is Surprised, and cannot play Evasion cards this turn.

Attack Phase

Play a Weapons Card or a Sabotage Card. If you play a Sabotage card, skip to Sabotage Phase.

Evasion Phase

Note that the Weapon Cards have a built in Accuracy Rating. You may play additional Accuracy (but not Weapon) cards. Your opponent may play Evasion Cards.

If the value of the Evasion cards is greater than the Accuracy/Weapon cards, the Attack Misses. If the value of the Accuracy/Weapon cards is greater, the

Attack Hits. If the Values are equal, flip a coin and call it in the air.

If the attack misses, skip to Bridge Phase.

Damage Phase

Note that the Weapon Cards have a built in Damage Rating. You may play additional Damage (but not Weapon) cards. Your opponent may play Shield Cards.

If the value of the Shield cards is equal to or greater than the Damage/Weapon cards, the Attack causes no damage. If the value of the Damage/Weapon cards is greater, the Attack Does a number of Hits (of Damage) equal to the difference between The Damage and Shield Values.

Security Phase

Skip this Phase if you attacked with a Weapon this turn. Your Sabotage card has a value. You may not play additional Sabotage Team cards.

Your target opponent may play Security cards to counter you. If the value of the Security cards is equal

or greater than that of the Sabotage cards, the Sabotage attempt fails. If the value of the Sabotage cards is greater, the Sabotage Does a number of Hits (of Damage) equal to the difference between The Sabotage and Security Values.

Event Phase

If you inflicted any Damage this turn, you may play a Critical Hit card on the damaged Opponent. You may play Engineering cards in this Phase.

Bridge Phase

Max hand size is determined by Ship Class. Discard down to Max hand size.

Card List Notes

The number of copies of that card in the deck. Only one Terrain card can be played per turn. The security officer card can allow you to make a second attack on Your turn, with a Weapon or Sabotage card. Teams also count as Crew.

Card List

Card Name:	#	Notes:
Impulse Power	1	Shields =1 or Damage =1 or Evasion =2
Full Power	1	Shields =1 or Damage =1 or Evasion =2
Auxiliary Power	1	Shields =2 or Damage =2
Divert Power	1	Shields =3 or Damage =2
Primary Weapon	12	Special: See Empire Lists
Secondary Weapon	8	Special: See Empire Lists
Primary Defense	4	Special: See Empire Lists
Empire Special One	1	Special: See Empire Lists
Empire Special Two	1	Special: See Empire Lists
Side Shields	2	Shields =2
Forward Shields	2	Shields =3
Engines Damaged	1	Critical: Evasion -1 for rest of game
Bridge Hit	1	Critical: Opponent must discard his hand
Secondary Explosions	1	Critical: Damage =2
Damage Control	1	Engineering: Repair 2 Hits
Small Moon	1	Terrain: Surprise =2 or Evasion =2
Space Station	1	Terrain: Surprise =2 or Evasion =2
Nebula	1	Terrain: Surprise =2 or Evasion =2
Ion Storm	1	Terrain: Surprise =2 or Evasion =2
Tractor Beam	1	Accuracy =3
Boarding Party	1	Team: Sabotage =4 or Security =2
Marine Squad	1	Team: Sabotage =4 or Security =3
Security Personnel	1	Team: Sabotage =3 or Security =3
Away Team	1	Team: Sabotage =3 or Security =2
Tactics	1	Surprise =2 or Evasion =2
Sensors	1	Detect =2 or Accuracy =2
Scanners	1	Detect =2 or Accuracy =2
Probe	1	Detect =3 or Examine

Card Name:	#	Notes:
Evasive Maneuver	1	Evasion =2
High Speed	1	Evasion =3
Captain	1	Crew: Security =3 or Draw 3 Cards
Security Officer	1	Crew: Security =4 or Get an Extra Attack
Chief Engineer	1	Crew: Shields =3 or Damage =3 or Repair =2
Helmsman	1	Crew: Evasion =3
First Officer	1	Crew: Security =3 or Accuracy =2
Science Officer	1	Crew: Detect =2 or Analysis
Communications Officer	1	Crew: Detect =2 or Examine
Ships Computer	1	Crew: Analysis or Examine

Empire Lists

Several cards in the list have alternate meanings depending on the Empire of the player that is using

them.

Federation

Card Name:	Title	Notes:
Primary Weapon	Phasers	Accuracy = 3 and Damage = 2
Secondary Weapon	Photon Torpedoes	Accuracy = 1 and Damage = 5
Primary Defense	Strong Shields	Shields = 3
Empire Special One	Precision	Detect = 2 or Accuracy = 2
Empire Special Two	Adaptability	Draw 2 Cards

Klingon Empire

Card Name:	Title	Notes:
Primary Weapon	Disruptors	Accuracy = 2 and Damage = 3
Secondary Weapon	Antimatter Missiles	Accuracy = 2 and Damage = 4
Primary Defense	Speed	Evasion = 2
Empire Special One	Aggression	Get an Extra Attack
Empire Special Two	Warriors	Team: Sabotage = 5

Romulan Empire

Card Name:	Title	Notes:
Primary Weapon	Disruptors	Accuracy = 2 and Damage = 3
Secondary Weapon	Plasma Torpedoes	Accuracy = 1 and Damage = 5
Primary Defense	Cloaking	Surprise = 3 or Evasion = 3
Empire Special One	Intrigue	Examine or Analysis
Empire Special Two	Sneaky	Surprise = 3

Multiplayer

Players can play on teams. For lots of players use 2 copies of the deck.

Star Wars Campaign

Introduction

Star Wars Theme. Module for the [Warp Empires: Basic Rules System And Campaigns](#) Warp Empires system. You must use the Warp Empires system to play this game.

Map

Over half the territories are empty space. Revenue generating spaces are planets. Coruscant is in the middle of the map.

Victory

The Rebels win if Coruscant and the Emperor, and Darth Vader are captured. The Empire wins if all Rebel

Leaders in play are captured.

Setup

The only leaders that automatically begin in play are Luke, Leia, the Emperor, and Darth Vader. The Empire player begins in control of Coruscant and starts with 5 random units. The rebel player starts on any planet on the edge of the map and goes first.

The rebel player starts with 4 random units.

Action Deck

Players share a common Action deck.

Planet List

Planet	Revenue
Tatooine	2
Alderaan Belt	1
Sullust	3
Kessel	3
Gamorr	2
Kashyyyk	2
Bespin	2
Bpfassh	2
Denab	3
Talus	2

Orto	2
Sluis Van	2
Hoth	1
Corellia	4
Yavin	1
Dagobah	1
Endor	1
Calimari	4
Coruscant	5

Unit Deck Abbreviations

- B** Bombardment units
- P** Point defense units
- T** Transport

Battle Rules

Units that are not Leaders or fighter squads are Capital Ships. The side with the most bombardment

units gets +2 Force. The side with the most Point defense units gets +2 Force.

You may only take control of a planet in control phase if The occupying unit has Bombardment, Transport, or Diplomacy traits. A Leader cannot be captured unless there is a leader in the opposing stack. Instead of being captured the Leader is put into the chit pile.

Leaders on the Winning side are never captured.

Imperial Unit Deck

Name	Move	#	F	Type	Notes

Action Deck

Card Name	#	Notes
Tactical Move	8	Move 1 stack
Operational Move	6	Move 2 stacks
Strategic Move	4	Move 3 stacks
Turbolasers	2	Battle: Capital ships get +1 Force
Ion Cannons	2	Battle: Target Capital ship reduced to 0 Force
Laser Cannons	2	Battle: Destroy target Fighter Squad
Weak Spot	2	Battle: Destroy target Capitol Ship
Stand Off	2	Battle: Capital ships with Bombardment trait get +2 Force
Strafing Run	2	Battle: Fighter squads get +2 Force
Bothan Spies	2	Rebels: Look at opponents hand or chits in target stack
Daring Rescue	2	Rebels: Put captured Leader back into play
Probe Droid	2	Empire: Look at chits in target stack
Imperial Agents	2	Empire: Look at opponents hand
Sabotage	2	Destroy target Fortification
Incite Uprising	2	Remove control marker from target planet
Use the Force	2	Battle: Force Aware character gets +7 Force.
Surprise Attack	2	Battle: Your side gets +5 Force.

Star Wars Dogfight

Introduction

Board & card game for 2 players. Battle between Rebel & Imperial Space Fighters. Takes place in the Star Wars Universe.

Each figure represents one Space Fighter.

Disclaimer

'Star Wars' is a copyrighted/trademarked property. This is just a fan site.

Victory

Destroy 5 enemy Fighters and the rest will flee.

The Map

Use an 8x8 chessboard.

The Fighters

Use chits or miniatures to represent Fighters.

Units Table Notation

Number of that type of unit each player has in setup.

Move The types of Move Cards the unit can use.

Range = The types of Attack Cards the unit can use.

Rebel Fighter Table

Name	#	Move	Range
A-Wing	2	6	3
B-Wing	2	4	4
X-Wing	2	5	4
Y-Wing	2	4	3

Empire Fighter Table

Name	#	Move	Range
TIE Fighter	6	5	3
TIE Interceptor	2	6	4

Setup

Each player places one Fighter on each square of his back two rows. Units may not stack.

Card List

The Cards

Players share a common deck.

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Vector Phase
2. Move Phase
3. Fire Phase

Vector Phase

Draw 3 cards. If the deck runs out, shuffle the discard and draw from it. Max hand size = 5 cards.

Discard excess cards.

Move Phase

Play (discard) a Move card to move one of your Fighters. Fighters cannot move through other units except for Knight type moves. The move card has a number.

This is the number of spaces the Fighter moves. The Fighter tables list what type of Move cards each unit can use. Moves are diagonal or orthogonal.

Instead of moving just one unit in any direction, you have the option of moving one or more units forward the indicated number of spaces using a single move card.

Fire Phase

Play (discard) an Attack card to have a unit attack. The attack card has a number. This is the range of the attack.

Attacks are diagonal or orthogonal. The enemy unit that is the target of the attack is automatically killed and removed from the map. Units cannot attack through other units except for Knight type attacks.

Card List Notation

M Movement

A Attack

D Defense

K As a Knight moves in Chess

Type Purpose of card

Number of that type of card in the deck

Card Name:	#	Range	Type	Notes
Maneuver	5	1	M

Star Wars Fleets

Introduction

Card game for 2 players. Star Wars Universe Fleet Actions. Rebel Fleet vs Imperial Fleet.

Disclaimer

Star Wars is a copyrighted, licensed, trademarked property. This is merely a Fan site.

The Decks

Each player has their own unique deck.

Cards

There are 4 types of cards: Capitol Ships Fighter Squads Personalities (captains or pilots) Action Cards
Note: Capitol Ships & Fighter Squads are collectively referred to as spacecraft.

Objective

Reduce your opponent to zero Fleet Points.

Fleet Points

Each player starts the game with 100 Fleet Points (FP).

Setup

Each player draws a hand of 7 cards. Draw a card to see who goes first. The highest Force ship wins.

Turn Sequence

Players take turns. Each turn has 3 Phases: Maneuver Phase Deployment Phase Attack Phase

Maneuver Phase

Draw 3 Cards from your deck. Max hand size is 10 cards. Discard excess cards. If the deck runs out, shuffle the discard and draw from it.

Imperial Unit Deck

Name:	#	F	Type	Notes
Star Galleon	1	2	C	Transport
Carrack Light Cruiser	1	3	C	+3 if Unblocked
Republic Dreadnaught	1	3	C	
Imperial Escort Cruiser	1	2	C	+3 if Blocking

Deployment Phase

Put Capitol Ships, Fighter Squads, and Personalities into play. Cards in play are put face up onto the Table. The cost in Fleet points to deploy a card is equal to its Force.

(For Example: to deploy the Death Star (Force = 25) would drop the Imperial players FP total from 100 to 75.) Personality cards must be attached to a spacecraft. Captains can only be attached to Capitol Ships. Pilots can only be attached to Fighter Squads.

If you deploy a Transport, draw a card.

Attack Phase

Spacecraft cannot attack the same turn they are deployed. You may attack with some, all, or none of your spacecraft in play. Each unblocked spacecraft does damage to your opponents FP Total equal to the Spacecraft's modified Force Total (Modified by Action cards and attached Personalities) Your opponent may block with his spacecraft in play.

Several spacecraft may combine to block one attacking spacecraft. Compare the Force total of an attacker and a blocker. The Spacecraft with the smaller Force is destroyed (discarded).

Action cards are discarded after they are used. Instead of targeting the opponents FP Total, spacecraft that are unblocked may do damage to any one enemy spacecraft (now considered to be blocking) in play.

Card List Notation

- C Capitol Ship
- F Fighter Squad
- P Personality
- J Jedi
- A Action Card
- # Number of that card in the deck

Name:	#	F	Type	Notes
Galleon	1	1	C	Transport
Super Star Destroyer	1	15	C	
Lancer Frigate	1	5	C	+3 vs Fighter Squads
Strike Cruiser	1	4	C	+3 if Attacking
Assault Transport	1	3	C	Transport
Interdictor Cruiser	1	2	C	+3 vs Capitol Ships
Victory Destroyer	2	4	C	
Victory II Star Destroyer	1	6	C	
Imperial Star Destroyer	1	5	C	
Imperial II Star Destroyer	1	8	C	
Death Star	1	25	C	
Tie Fighter Squad	7	2	F	
Tie Interceptor Squad	4	2	F	+2 vs Fighter Squads
Tie Defender Squad	3	3	F	
Tie Bomber Squad	3	1	F	+3 vs Capitol Ships
Darth Vader	1	+7	PJ	
Emperor Palpatine	1	+6	PJ	Captain
Grand Moff Tarken	1	+5	P	Captain, All Capitol Ships get +1
Boba Fett & The Slave-1	1	4	F	Cannot be Blocked
Veers	1	+4	P	Captain, +2 if Attacking
Piet	1	+3	P	Captain, +2 vs Capitol Ships
Jerjerrod	1	+2	P	Captain, +2 if Unblocked
Turbolasers	2	-	-	Capital Ship gets +5
Ion Cannons	2	-	-	Target Capital ship does no damage
Laser Cannons	2	-	-	Destroy blocked Fighter Squad
Critical Hit	2	-	-	Destroy blocked/-ing Capitol Ship
Stand Off	2	-	-	Blockers get +2 each
Close Assault	2	-	-	Attackers get +2 each
Strafing Run	2	-	-	Fighter Squad gets +5
Use the Force	2	-	-	Jedi gets +7
Surprise Attack	2	-	-	Spacecraft just deployed can attack
Reinforcements	2	-	-	Gain 7 Fleet Points
Strategic Maneuver	2	-	-	Draw 3 cards
Encirclement	2	-	-	Opponent discards 3 random cards
Treachery	2	-	-	Personality gets +5
Shields	2	-	-	Negate target attack vs Capitol Ship
Evasion	2	-	-	Negate target attck vs Fighter Squad
Breakthrough	2	-	-	Target spacecraft cannot be blocked

Rebel Deck

Name:	#	F	Type	Notes
Corellian Frigate	1	4	C	
Dauntless Cruiser	1	8	C	
Corellian Gunship	1	4	C	+3 vs Fighters
Liberator Cruiser	1	5	C	
Bulwark Battlecruiser	1	15	C	
Nebulon-B Frigate	1	3	C	+3 vs Fighters
Alliance Dreadnaught	1	3	C	+3 if Blocking

Name:	#	F	Type	Notes
Mon Calamari Cruiser	2	6	C	
Bulk Cruiser	1	2	C	
Bulk Transport	1	1	C	Transport
Medium Transport	1	1	C	Transport
Alliance Escort Carrier	1	2	C	All your Fighters get +1
Corellian Capitol Ship	1	4	C	+3 vs Capitol ships
Corellian Corvette	1	4	C	+3 if Unblocked
Assault Frigate	1	4	C	+3 if Attacking
Millennium Falcon	1	3	F	Cannot be Blocked
A-Wing Squad	4	2	F	+2 vs Fighter Squads
B-Wing Squad	3	4	F	
X-Wing Squad	5	3	F	
Rogue Squadron	1	5	F	Cannot be Blocked
Y-Wing Squad	4	2	F	+2 vs Capitol Ships
Luke Skywalker	1	+7	PJ	Pilot
Han Solo	1	+5	P	Captain
Princess Leia	1	+3	P	Captain
Admiral Akbar	1	+4	P	Captain, All Capitol Ships get +1
Obi-Wan-Kenobi	1	+6	PJ	Captain
Lando Calrissian	1	+2	P	Captain, +2 if Attacking
Turbolasers	2	-	-	Capital Ship gets +5
Ion Cannons	2	-	-	Target Capital ship does no damage
Laser Cannons	2	-	-	Destroy blocked Fighter Squad
Critical Hit	2	-	-	Destroy blocked/-ing Capitol Ship
Stand Off	2	-	-	Blockers get +2 each
Close Assault	2	-	-	Attackers get +2 each
Strafing Run	2	-	-	Fighter Squad gets +5
Use the Force	2	-	-	Jedi gets +7
Surprise Attack	2	-	-	Spacecraft just deployed can attack
Reinforcements	2	-	-	Gain 7 Fleet Points
Strategic Maneuver	2	-	-	Draw 3 cards
Encirclement	2	-	-	Opponent discards 3 random cards
Heroism	2	-	-	Personality gets +5
Shields	2	-	-	Negate target attack vs Capitol Ship
Evasion	2	-	-	Negate target attack vs Fighter Squad
Breakthrough	2	-	-	Target spacecraft cannot be blocked

Stargate Missions

Introduction

Dice & Card game for 2+ players. Based on the Stargate Universe.

Disclaimer

Stargate is a copyrighted, licensed property. This is merely a fan site.

Victory

The Game ends when there are no cards left to draw from the Mission Deck. At the End of the game each player calculates his Victory Score (VS):

VS TMP - PLK

TMP Total Mission Points of all Missions you have successfully completed.

PLK Personnel under your command that have been Lost or Killed.

(Main Characters are worth 2 PLK each)

Dice

10-sided Dice are needed.

The Decks

There are 3 common decks:

1. Personnel
2. Missions
3. Events

Personnel

Personnel are the Characters you control. There are two types of Personnel:

1. Main Characters
2. Support Personnel

In a Team, Support Personnel are always lost/killed before Main Characters.

Stats

There are 2 Basic Stats in the Game:

1. Brains (Logic, Intelligence, Observation, Imagination, Intuition)
2. Combat (Brawn, Fighting, Tactics, Shooting, Courage, Leadership)

Every Personnel will have a score of 0-3 in each stat. Missions and Challenges (MC) will require a Dice Test in one or both Stats.

Skills

There are 4 Skills:

1. Science (Physics, Astronomy, Mathematics, Chemistry, Computers)
2. Lore (Archeology, Literature, Languages, History)
3. Medical (Medicine, First Aid, Biology, Genetics)
4. Communication (Diplomacy, Charisma, Empathy, Presence, Persuasion)

Personnel with high Brains will have one or more Skills. Some Missions and Challenges (MC) will require the Team to have a specific Skill to succeed. Some MC will require double or Triple levels of Skill.

For example, a Mission may require Lore X2 meaning that at least 2 Personnel on the Team must have Lore to complete the Mission.

Event Deck

There are 2 types of Event cards:

1. Actions
2. Challenges

Challenges are played against other players in Challenge Phase. Action cards temporarily give skills, increase stats, and provide other benefits.

Setup

Players roll high on 1D10 to see who goes first.

Turn Sequence

Players take turns. Each turn has 6 Phases:

- Discovery Phase
- Recruit Phase
- Event Phase
- Challenge Phase
- Mission Phase
- Fate Phase

Discovery Phase

Draw the top card of the Mission Deck. Put it face up in front of you. This is the Active Mission.

Recruit Phase

Your Team must have 5 Personnel cards. If your Team has less than 5 Members, you may recruit members from 2 places:

1. Your Reserve Pile
2. The top card of the Personnel Deck

You may move personnel back and forth from your Reserve to your Team.

Event Phase

Draw 3 cards from the Event Deck and put them in your hand. Max hand size is 7 cards. Discard excess cards.

Challenge Phase

One opponent (nearest left) may play one Challenge card against you. Resolve the Challenge as you would resolve a Mission in Mission Phase.

Mission Phase

Your Team attempts the Active Mission. The Mission may require a Brains Test or Combat Test or Both. To resolve a Test make two rolls and compare them: To the first roll add the Stat level of the Mission. This is the Mission Total.

To the second roll add the combined Stat level of all

the Team Personnel. This is the Team Total. The Player may play (discard) Action cards to further increase his Team Total.

If the Team total is equal or higher the Test is a success. If less, the Test is a Failure. If the Team succeeds at both Tests and has the required Skills, the Mission is a success. If not, the Mission is a Failure.

Fate Phase

If the Mission was a success, put the Mission card into your Victory Pile. If the Mission was a Failure, discard the Mission card and one Random Team Member. This Personnel is said to be Lost/Killed.

End Phase

You may have a Maximum of 3 cards in your Reserve Pile (discard extras).

Personnel Deck Card List

Card Name	Brains	Combat	Skills
Archeologist	3	0	Lore/Communication
Doctor	3	0	Medical/Communication
Scientist	3	0	Medical/Science

Starmageddon

By Matt R., Wolfhvl@aol.com

Ships

TYPE	MOVE	HITS	WEAPONS	NOTES
Transport	1	10	2	Use for scenario victory conditions
Battle Station	0	100	20	Can carry 10 Fighter Squads/Scouts
Dreadnaught	1	80	16	
Battleship	2	60	12	
Carrier	2	40	4	Can carry 6 Fighter Squads/Scouts
Cruiser	3	40	8	
Destroyer	4	20	4	
Frigate	3	15	3	
Gunboat	5	10	2	
Scout	6	5	1	
Fighter Squad	6	5	2	Not Jump capable

Ship Descriptions

Move Number of spaces moved or hex facings turned

Hits Damage before ship is destroyed

Weapons = Number of Weapon Systems that can be mounted. (Note: a Size 2 Weapon counts as 2 weapons, a Size 3 weapon as 3 weapons, etc.) Fighters cannot have Weapons of greater than size 1. A Battle Station can repair 1 hit per turn to itself or to a friendly docked (in same space) ship.

Docked ships cannot attack. One move point can be used to move the ship forward one hex or for one 60 degree turn.

Turn Sequence

1. Initiative- Roll high to see which player goes first this turn.
2. Move ships.
3. Fire Weapons: Roll to hit & for Damage.
4. Next Player repeats steps 2 & 3.

To Hit Rolls

Attacks hit on a roll of 7+ on 1D10. The ranges listed are long range. Attacks at half this distance (rounded up) are +1 to hit.

Attacks into adjacent hexes (point blank) are +2 to hit. A ship can attack with all of its ranged weapons, once per turn. Ranges of weapons used by fighters are half of those listed.

Critical Damage Table

D12	System Damaged	Notes
1	Eng. Destroyed	Ship cannot move or change facing but can still attack
2	Pilot Shaken	Next turn ship moves full movement allowance w/out turning
3	Eng. Damaged	Move Rate -1
4-5	Weapon	1 Random system destroyed
6	Reactor Core	At the beginning of the turn
-		roll 1D6: On a roll of 1-3 nothing happens. Roll again
-		next turn. On a roll of 4-6 the unit explodes. Use the
-		bomb rules to see the effect of the explosion.
7	Computers	Ship is -1 to hit on all attacks
8-9	System Shock	Ship can do nothing on its next move

D12	System Damaged	Notes
10	Electrical Fire	Take 1D4 Damage at the beginning of every turn
11-12	No Effect	

Roll on the critical hit table whenever a hit does 10 or more points of damage.

Weapon Systems

Beam Weapons	SIZE	DAMAGE	RANGE	AMMO
Lasgun	1	1D4	6	U
Lascannon	2	1D8	9	U
Particle Accelerator	3	1D12	12	U

Missile Launchers	SIZE	DAMAGE	RANGE	AMMO
Small	1	1D10	12	6
Medium	1	2D10	18	3
Large	1	3D10	24	2
X-Large	1	4D10	30	1

OTHER SYSTEMS	SIZE	DAMAGE	RANGE	AMMO	NOTES
Armor	1	NA	NA	NA	+10 Hits
Bomb	1	6D10	All Adj	1	-
Targeting	1	NA	NA	NA	+1 to hit with one ranged attack
Missile Defense	1	NA	NA	U	-

Missile Defense System Notes

Roll 1D6 for each incoming Missile Attack. On a Roll of 4+ the Missile is destroyed. For every 6 spaces a missile has traveled add +1 to hit roll (distance lowers chances of a successful missile hit) For every missile after the 1st one, subtract 1 from hit roll (salvoes overwhelm the system) A single Missile defense system can intercept up to 3 incoming missile attacks in 1 turn.

Weapon Notes:

Plasma weapons can only be fired once every other turn. The Bomb is a self destruct mechanism. All

Ballistic Weapons	SIZE	DAMAGE	RANGE	AMMO
Chain Gun	1	1D6	4	12
Rail Gun	2	2D6	6	12
Rail Cannon	3	3D6	8	12

Plasma Weapons	SIZE	DAMAGE	RANGE	AMMO
Plasgun	1	1D10	2	U
Plasma Projector	2	2D10	3	U
Plasma Cannon	3	3D10	4	U
Fusion Cannon	4	4D10	6	U

Torpedoes	SIZE	DAMAGE	RANGE	AMMO
Small	1	1D8	8	8
Medium	2	2D8	12	8
Large	3	3D8	16	8

ships in an adjacent space take 6D10 Damage. All weapons attack into a 180 degree arc.

The arc is determined by the ship's weapon configuration. Arcs include: (F)orward, (L)eft, (R)ight, and (B)ack. The arcs overlap.

Scenarios

Each Fleet will have X number of Hits. All Ships will have a full complement of Weapons.

Starship Troopers

Introduction

Board & card game for 2 players. Battle between Human Troopers and the Arachnoid Threat. Each figure represents a Trooper or Insect(s).

Disclaimer

'Starship Troopers' is a copyrighted/trademarked property. This is just a fan site.

Victory

Kill the opposing Leader.

The Map

Use an 8x8 chessboard.

The Men

Use chits or miniatures to represent units.

Units Table Notation

Number of that type of unit each player has in setup.

Move The types of Move Cards the unit can use.

Range = The types of Attack Cards the unit can use.

Human Unit Table

Name	#	Hits	Move	Range	Notes
Troopers	7	2	4	5	
Commander	1	3	4	5	Leader

Arachnoid Unit Table

Name	#	Hits	Move	Range	Notes
Worker Swarm	8	1	2	1	
Warrior Bugs	7	2	3	2	
Queen	1	3	2	1	Leader

Setup

Each player places one unit on each square of his back two rows. Units may not stack.

The Cards

Players share a common deck.

Card List

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Orders Phase
2. Move Phase
3. Battle Phase

Orders Phase

Draw 3 cards. If the deck runs out, shuffle the discard and draw from it. Max hand size = 5 cards.

Discard excess cards.

Move Phase

Play (discard) a Move card to move one of your units. Units can move through other units only if they are making an Aerial Move. The move card has a number.

This is the number of spaces the unit moves. The Unit tables list what type of Move cards each unit can use. Moves are diagonal or orthogonal.

Instead of moving just one unit in any direction, you have the option of moving one or more units forward the indicated number of spaces using a single move card.

Battle Phase

Play (discard) an Attack card to have a unit attack. The attack card has a number. This is the range of the attack.

Attacks are diagonal or orthogonal. An attack does 1 point of damage. If the target unit is reduced to zero hit points it is destroyed.

Troopers may attack through other units, Arachnoids may not. The defender may play a Defense card to negate an attack.

Card List Notation

M Movement

A Attack

User Who can use the card.

T Troopers only

S Arachnoids only

D Defense

Type Purpose of card

Number of that type of card in the deck

Card Name:	#	Range	Type	User	Notes

Steampunk Safari

Introduction

Card Game for 2-4+ players. Spacefaring Steampunk Setting. Each player is a hunter on Safari. Safaris can take place on Earth, Venus, or Mars.

Victory

The Player with the most points when the Deck runs out is the winner.

The Deck

Players share a Common Deck. There are 6 card types: Hunters, Weapons, Special, Venus, Earth, and Mars. The Venus, Earth, and Mars cards are referred to as Trophy Cards.

Turn Sequence

- Players take Turns. Play proceeds clockwise. There are 3 Phases in a Turn.
1. Hunt Phase
 2. Safari Phase
 3. Trophy Phase

Card List

Card Name:	Type:
Professor Frutznutz	Hunter
Commandant Virkutzk	Hunter
Captain Topperbottom	Hunter
Lord Glockenshpiel	Hunter
Angus Esquire Steakum	Hunter
Pernicious Peabody	Hunter
Sir Fritterbatter the Third	Hunter
Count DeMone	Hunter
Baron Berilous Bizqwik	Hunter
Major Mac Muffin	Hunter
Disintegrator Pistol	Weapon
Wave Disruptor Gun	Weapon
Sub-Atomic Scatter Gun	Weapon
Energy Beam Projector	Weapon
Phlogiston Wave Emitter	Weapon
Atomic Death Ray	Weapon
Aether Oscillator Rifle	Weapon

Hunt Phase

Draw 4 Cards. Keep one card in your hand. Give 1 card to the person to your right.

If there are 3 or more people playing, give 1 card to the person to your left. Otherwise, place the card on the bottom of the deck. Discard the fourth card for a Special Effect: Hunter Card: Look at the next 5 cards in the deck and put 1 in your hand. Weapon Card: Your opponent must discard 1 random card. Then draw 1 card from the deck and put it in your hand.

Earth Card: Draw 2 more cards from the Deck and put them in your hand. Mars Card: Steal 1 Random card from your opponent's hand. Venus Card: Put any 1 card from the discard into your hand.

Special Card: Per Card Text

Safari Phase

You may play a Safari: A Safari consists of 1 Hunter, 1 Weapon, and 1 or more Trophy cards All of 1 type (All Earth, All Mars, or all Venus). Gain Points equal to the number of Trophy cards you played. All Played cards are discarded.

Trophy Phase

Max hand size is 7 cards. Discard excess cards.

Card Name:	Type:
Sonic Hand Cannon	Weapon
Mighty Melter Sidearm	Weapon
Electro-Static Vaporizer	Weapon
Venusian Banshee	Venus
Venusian Bandersnatch	Venus
Venusian Jub Jub Bird	Venus
Venusian Slithy Tove	Venus
Venusian Jabberwock	Venus
Venusian Manticore	Venus
Venusian Fly Trap	Venus
Venusian Spider Pig	Venus
Venusian Horse Fly	Venus
Venusian Moss Monster	Venus
Bugbladder Beast of Mars	Mars
Martian Collapsapod	Mars
Martian Stinkbug	Mars
Martian Ghilibeast	Mars
Martian Maneater	Mars
Martian Platypus	Mars
Martian Cat Dog	Mars
Martian Triskellion	Mars
Martian Centipede Tiger	Mars
Martian Weevil	Mars
Sasquatch	Earth
Chupacabra	Earth
Reclusive Snipe	Earth
Rare Albino Ape	Earth
Giant Anaconda	Earth
Elusive Big Foot	Earth
Abominable Snow Man	Earth
Giant Squid	Earth
Mysterious Sphinx	Earth
Questing Beast	Earth
Moon Soldiers	Special: All Opponents Discard 2 Cards
Dilettante Companion	Special: Counts as all 3 types of Trophy
Crash Landing	Special: Opponent Discards 3 Cards
Little Green Men	Special: Draw 5 cards, Keep the Mars cards
Venusian Savage	Special: Draw 5 cards, Keep the Venus cards
Native Guide	Special: Draw 5 cards, Keep the Earth cards

Steel & Crystal

by Zak
Rules version 1.1

Introduction

Steel and Crystal is an easy solo game of conquest on a fantasy land. You are the General of your Empire and your mission is simple: defeat the enemies of your Emperor. Every scenario states the initial forces that you have under your command and the objectives you must obtain to win.

Game Map

The game map represents one continent/region divided in different areas: every area has one base terrain type (Clear, Mountain, Forest etc..) and some optional elements (towns, dungeons...). You must mark on the map the current position of your army (use one counter/penny or draw your position with a pencil). For each area the (Area Table) of the Scenario specify:

- The GP produced
- The troops that you can recruit from this area.

Whenever you conquer a new area you must update the Game Chart adding the GP and increasing the Max column in the troop roster with the troops relative the newly conquered area: if the units are listed between parenthesis you cannot recruit them, hence you won't update the troop roster for these units (while you must fight against them in the conflict phase) Every area can be:

- Empire controlled: this area is under control of your Empire; you can collect Gold Points (GP) and troops only from this areas.
- Neutral: the local government controls the area.
- Enemy controlled: the area is under control of a Major Enemy of your Empire.

Major Enemies are capable of expanding their reign (see the Event phase). The main difference between Neutral and Enemy controlled is that the latter, being part of an enemy empire, cannot be explored (see the Exploration phase) and will be defended by the whole Enemy army (Neutral areas are always defended only the local forces). Depending on the scenario every Enemy initially controls some areas on the map;

during the Event phase the enemy could be able to add more area to his realm; when you enter an Enemy controlled area you will have to face the possibility of fighting against an army composed of ALL the troops controlled by the Enemy (i.e. not only the troops of the area where your army is located).

Setup

Copy in the Game Chart the current treasure and resources as defined by the scenario data. Copy in the Game Chart the list of the initial army composition as defined by the scenario data. Sequence of play

- Event phase
- Recruitment
- Movement
- Exploration
- Conflict
- Conquest

Event Phase

Roll 2D6 in the scenario Event Table and apply the results immediately. Roll one D6 for each enemy empire present (as for the scenario): on a result of 5-6 the selected empire extends his power; add +1 to the dice roll if you control 1/4 of the game area, add +2 when you control half or more of the game map. If an enemy empire has grown select the nearest (random) area to the enemy capital: mark this area as Enemy controlled area in the map.

Recruitment Phase In this phase you can collect the GP from all the area under your control: add this number to the current GP total in the Game Chart. You can then buy any unit provided that:

1. You have enough GP to buy it
2. The number of units you already have of the selected type is less than the

value in the corresponding MAX column Every area can produce a fixed number of units - every time you conquer a new area you increment the MAX column of every troop type listed in the corresponding Area Table; the MAX value represents the upper limit of units of each type you can recruit.

Unit Types

Type	Name	\$\$	CF	Notes
SK	Skirmish	1	1	+3 vs EL

Type	Name	\$\$	CF	Notes
LI	Light Infantry	2	3	
BD	Blades	3	5

Steel and Crystal

scenario #1: the Aidlon offensive

After 5 years of relative peace the Xy/tyan empire has newly started a series of offensive maneuver against the neighborhood kingdoms: the Isle of Aidlon is now menaced so you've been assigned to the defensive campaign.
Your base will be the town of Kherasa (area 1 in the map) while the Xy/tyan forces are known to be in the city-fortress of Hishimur (area 24), near to the southern desert.
Keep one eye to the region of Yss (area 10), ruled by the giant Worms, and to the Northern Hishimur plains (area 20), infested by the inhuman Giants of Flesh.

Initial Forces

You start the game in the town of Kherasa (area 1) with the following forces:

2SK 3BD 1SP 1HC 1LC

Your initial treasure: 0GP.

The initial resources: 5GP.

At the game start only the area of Kherasa is controlled by your empire.

Victory

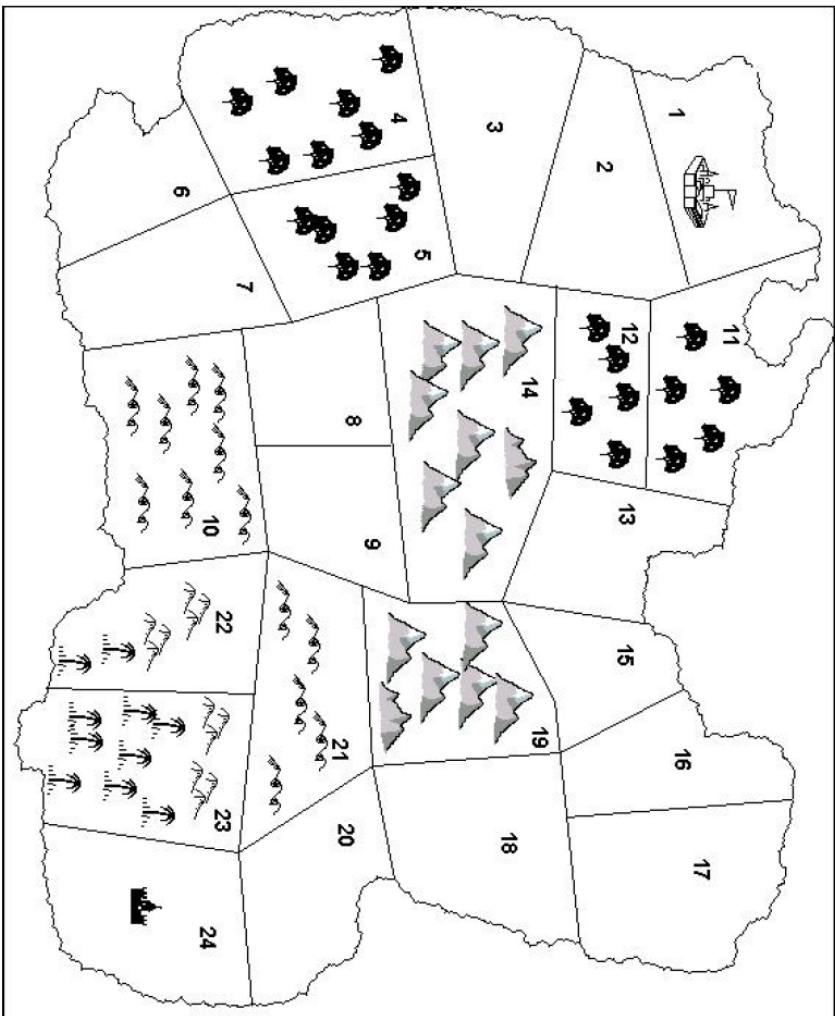

You win the game if you controls the city-fortress of Hishimur (area 24) at the end of any turn.

[Wizard Spells]

Revive	roll 1D6: on a result of 1-4 one unit lost in the last battle turn is put back in the game
Blast	roll 1D6: on a result of 1-4 one enemy unit is removed
FireBall	roll 1D6: on a result of 1-2 two enemy units are removed
Armor	roll 1D6: on a result of 1-3 one unit has his CF doubled in the current battle round
Weakness	roll 1D6: on a result of 1-3 one enemy unit has his CF halved in the current battle round

[Xy/tyan and mercenary wizard spell table]

DR		
1-2	Revive	One unit lost in the last battle turn is put back in the game
3-4	Blast	roll 1D6: on a result of 1-4 one enemy unit is removed
5	FireBall	roll 1D6: on a result of 1-2 two enemy units are removed
6	Evoke	roll 1D6: 1-2: no effect 3-4: 1BD is evoked 5: 1HC is evoked 6: 2SP and 1LC are evoked Evoked units are immediately put in the battle

[Exploration Table]	
1d6	Result
1	The information about the area was correct: no changes.
2	The area is richer than expected: add 1GP to the Resources of the Area
3	The area is poorer than expected: add 1GP to the Resources of the Area
4	Unexpected ally: the area became part of your empire without any need of combat
5	One random defending unit deserts: do not consider this unit in the combat against the defenders
6	The defending force is stronger than expected: roll 1D6 1-2: add 1BD 3-4: add 1SP and 1SK 5: add 1HC 6: add 1SK and 1EL

[Event Table]	
2D6+	Event
11-13	A donation of a good ally: +4 GP
14-16	Unplanned expenses: -4 GP
21-24	Unexpected enemy attack: roll 1D6 1: 3LL 2BD 2: 2SK 2LL 3: 2LC 1HC 4-5: 5MO/Orcs: 4 6: Wizard 5MO/Orcs: 4
25-26	Local guide: add 1MP to your army for this turn
31-33	Industrial growth: a region increase revenues by 1
34-36	Famine: a region decrease his revenues by 1
41-42	Epidemic: your army lose 1D3 random units.
43-44	Mercenary units join your army: roll 1D6 1: 1SK 2: 1LL 3: 1BD 4: 1SP 5: 1LC 6: 1HC
44-46	Unrest: a region doesn't produce any revenue this turn
51-53	Treason: a random region previously controlled became hostile (remove the GP and Troops)
54-56	New Ally: a random region adjacent to your realm became part of your empire (add the GP and Troops)
61-62	Bad weather: no movement in neutral/hostile territory is possible this year
63-64	Good Omens: in this turn you can benefit of 1 column shift to the right for the first 2 rounds of a battle
65	Poor Omens: in this turn you must suffer 1 column shift to left for the first 2 rounds of a battle
66	One kingdom ally to the Xyrian Empire (24): select the nearest random territory to the empire capital and mark it as controlled by this empire.

* Roll 2 dice and read as tens and units (e.g. 5 and 3 = 53)

Stellar Poker

Introduction

Poker variant Requires a special deck called the Earth Sun Moon deck

Earth Sun Moon Playing Card Deck

This deck has 52 nonstandard cards There are 4 suites. They are designated:

ORDER	CARD	NOTES
1	Sun	-
2	Mercury	Inner Planet
3	Venus	Inner Planet
4	Earth	Inner Planet
5	Moon	Inner Planet
6	Mars	Inner Planet
7	Asteroids	-

Turn Sequence

1- Shuffle deck. 2- One player is chosen as the dealer. 3- Players ante in.

4- Five cards are dealt to each player Cards are dealt face down unless house rules state otherwise. Play starts with the player to the dealers left and proceeds clockwise 5- In turn each player may discard up to 4 cards and receive replacement cards. 6- Players may now, in turn, raise the ante.

Other players must match the raise or drop out. 7- Players reveal their hands. The highest combination wins the pot.

Combinations

In order from lowest to highest:
Pair Two Pair Two Pair of adjacent planets (Example:

SUITE	SYMBOL
FULL	Black circle
NEW	White circle
WAXING	Black Crescent
WANING	White Crescent

Each suite contains 13 cards:

ORDER	CARD	NOTES
8	Jupiter	Outer Planet
9	Saturn	Outer Planet
10	Uranus	Outer Planet
11	Neptune	Outer Planet
12	Pluto	Outer Planet
13	Comets	

Jupiter & Asteroids) Two Pair of Earth & Moon Flush Straight Inner Planets Straight Outer Planets Straight Three of a Kind Full House Four of a Kind Four Moons & New or Full Earth Inner Planets Straight Flush Outer Planets Straight Flush

Notes

Use Comets as the first choice for Wild Cards (Asteroids second) The order of the Moon & the Earth are interchangeable when forming a straight The order of the Neptune & Pluto are interchangeable when forming a straight (Pluto's orbit is elliptical. It is sometimes closer to the Sun than Neptune is)

Cardset Available

Ooooooh Pretty

Stickin It To The Man

Introduction

Card game for 2+ players Based on the Blacksploitation films of the early 70's.

Disclaimer

Many card names are copyrighted properties or refer to living people. This is merely a fan site.

Winning

The player accumulates the most Cool Points (CP) at the end of 5 hands wins.

The Deck

Players share a common deck. The deck contains 7 Suites of cards:

- Character
- Cool
- Fighting
- Accessories
- Bad Guys
- Musician
- Actor

Turn Sequence

Each turn has 3 phases:

- Draw Phase
- Redraw Phase
- Meld Phase

Draw Phase

Each player is dealt 8 cards. If the deck ever runs out of cards, shuffle the discard and draw from it.

Redraw Phase

Each player may discard up to 5 cards and draw replacements.

Meld Phase

Each player makes a Meld using the cards in his hand. A Meld may contain 1 card from each Suite. Each card has a Cool Point (CP) value.

A player adds up the CP of all the cards in his Meld to get a CP Total. A player adds his CP total to that of his previous hands to get a Running Total.

Gender Rule

You can only play both an actor and character if they are of the same sex.

Stormbringer

Introduction

Two player card game depicting the struggle between Law & Chaos in Moorcock’s Elric Fantasies.

The Decks

- There are 2 decks:
- The Law Deck
 - The Chaos Deck
- Each player controls one deck.

Setup

Shuffle the decks. Each player draws 8 cards from his own deck. Each player starts with 4 Balance Tokens.

Victory

The first player to control all 8 Balance Tokens wins the game.

Turn Sequence

- Each turn has 5 phases:
- Fate Phase
 - Destiny Phase
 - Quest Phase
 - Struggle Phase
 - Balance Phase

Fate Phase

Each player fills his hand to 8 cards If a deck runs out, shuffle its discard and draw from it.

Destiny Phase

Each player may discard up to 4 cards and draw replacements.

Law Deck Card List

Card Name:	Type	Force	Notes:
Elric, Eternal Champion	E	9	
Elric, God-Slayer	E	9	Destroy 1 opposing God
Elric the Doomed Albino	E	8	

Quest Phase

Players may discard a Transport card to search their deck for and play any Item or Place card.

Struggle Phase

- Each player may play to the table, face-up, some, all, or none of his cards. Each played card has a Force Value. Each player adds up the Force Value of his played cards.
- The player with the highest total Force Value wins the turn. The Law player may only play:
- 1 Elric card, 1 Stormbringer card, 1 Lady card, 1 Spell card, 1 God card,
 - 1 Transport card, 1 Place card, 1 Item card.
- The Law Player may play any number of Hero and Army cards. The Chaos Player may only play:
- 1 Sorcerer or Villain card, 1 God card, 1 Transport card, 1 Place card,
 - 1 Special Item card, 1 Event card.
- The Chaos Player may play any number of Monster, Army, and Item cards.

Balance Phase

The turn winner gets to take a Balance Token from his opponent. All played cards are discarded. Players may discard some, none, or all of the cards in their hands.

Law Deck Card Types

- E** Elric
- SB** Stormbringer
- H** Hero
- A** Army
- P** Place
- L** Lady (Lover)
- B** Boon
- I** Item
- S** Spell
- T** Transport
- G** God

Stormtrooper

Introduction

Solo card game. WWI theme. You control a squad of 9 Stormtroopers attacking a section of the enemy line.

Gear

You will need tokens to keep track of your men. You will need tokens to keep track of enemy men. Six sided dice are needed.
There are 3 decks: Terrain, Enemies, and Stormtrooper decks.

Victory

Destroy all enemy unit cards in play.

Defeat

You lose if your squad is ever reduced to less than 3 men.

Map Setup

The Terrain deck contains 50 cards. Randomly lay out the Terrain cards face up to make a rectangle 10 cards long and 5 wide. This is the Board (or Map).
Each Terrain card is a space on the map. There is also an eleventh row, the starting row (German lines).

Setup: Enemy Deployment

The Enemy unit deck has 20 cards. Place the 3 machinegun unit cards on the 3 terrain cards that are of the 'Machinegun type'. The other 17 units are each placed randomly on the terrain cards of the 'Occupied type'.

1D6	Result:	Notes:
1-3	Nothing	
4	Counterattack	Move one non-machinegun Defender forward 1 space.
5	Pinned	You cannot move next turn.
6	Reinforcements	*

* Take a random destroyed enemy unit card and place it on an edge space on the far end of the map.

Assault Phase

Discard an Attack card to attack an enemy unit at the indicated range. The Enemy unit loses (1D6 men -

Stormtrooper Setup

Your squad is represented by a single pawn. During setup you may place it in any space of the starting row. Draw 4 cards. This is your starting hand.
You get +1 to casualty rolls on your first turn.

Turn Sequence

- Each turn has 4 phases:
1. Supply Phase
 2. Advance Phase
 3. Counterattack Phase
 4. Assault Phase

Supply Phase

Draw 1 card from the Storm Trooper deck. Max hand size = 5 cards. Discard extra cards. If the deck runs out, shuffle the discard and draw from it.

Advance Phase

You may move your squad to any adjacent unoccupied space. Cards that allow extra moves must be used in this phase. You cannot move into a space occupied by an enemy unit.

Counterattack Phase

If you come within range of an enemy unit the enemy attacks. Snipers have a range of 3. All others have a range of 2. Roll 1D6 for each attacking enemy unit card.
Machine gun units get to roll twice. Units with officers or 8 or more men get to roll twice. Add to the roll the Defense rating of the terrain your squad is in.
On a modified roll of 3 or less one of your men is killed. You may discard a Defense card to negate the casualty. Next roll once on the counterattack table:

the Defense value of the Space). This is the casualty roll.

Indicate surviving men on card with tokens. Discard an enemy unit card with no men left. Morale cards do not cause casualties (but they do have a range).

Terrain Deck Notation

Ocp Is this terrain occupied by enemy unit cards at the beginning of the game.

Y Yes. **N** = No. **M** = Machinegun unit.

Number of that card in the deck.

Terrain Deck

Card:	#	Ocp	Notes:
No Mans Land	10	N	-
Wire Entanglements	8	N	*
Pill Box	1	M	Defense = 2 (Bunker)
Machinegun Nest	1	M	Defense = 1 (Bunker)
Machinegun Emplacement	1	M	Defense = 1
Concrete Bunker	1	Y	Defense = 2
Blockhouse	2	Y	Defense = 2 (Bunker)
Trenches	10	Y	Defense = 1
Dug outs	3	Y	Defense = 1 (Trench)
Ruined Farmhouse	1	Y	Defense = 1
Destroyed Tank	1	N	Defense = 1
Splintered Trees	1	N	Defense = 1
Communication Trench	5	N	Defense = 1**
Shell Holes	5	N	Defense = 1 (Trench)

*Requires a Wire cutter card to be played to enter.

**You may move again this turn.

Rifles	2	2	
Sniper	2	3	
Light Flame Thrower	2	1	Bunkers and Pillboxes get no defense bonus
Demolition Charge	2	1	Bunkers and Pillboxes get no defense bonus

Card:	#	Range	Notes:
Bangalore Torpedoes	2	-	Play to enter a Wire space
Wire Cutters	3	-	Play to enter a Wire space
Camouflage	1	D	Defense card
Use Cover	1	D	Defense card
Open Formation	1	D	Defense card
Demoralized	1	(3)	Move one enemy unit back 1 space (Morale)
Terror	2	(2)	Move one enemy unit back 1 space (Morale)
Panic	2	(1)	Move one enemy unit back 1 space (Morale)
Cause Surrender	1	1	
Rush	1	-	Move 1 extra space this turn
Infiltrate	1	-	Move 1 extra space this turn
Trench Raid	1	-	Move 1 extra space this turn
Consolidation Team	1	-	Get 1 reinforcement (1 man)
Move up Reserves	1	-	Get 1 reinforcement (1 man)
Supply Team	1	-	Discard to draw 2 cards
Shells & Gas	1	X	Make a casualty roll vs any enemy unit.

Variants

Larger map (more Terrain cards) Larger squads or multiple squads.

Sub-machine Guns (kugelspritz)

These became available in small numbers in 1917+. 2 cards of Range = 1 & Casualty roll +1

Two Player Variants

Each player gets a squad and they share the same map. Players race to capture an enemy HQ space.

Faq

Q> Can you count diagonally for movement purposes and firing? A> Yes.

Q> Is there any blocking of line of site? For example: If I move adjacent to the machine gun emplacement which is followed in a straight line by the sentry followed by the sniper, do they all get to attack me or can

just the machine gun fire? A> LOS is not blocked, all may attack.

Q> What happens if you play Terror or Panic on an enemy unit in their own back row? A> Special Ruling: You must play a "Retreat" card on the most forward enemy elements possible. If the most forward is on the back row, it is removed from play.

Q> What happens when an enemy unit must retreat back onto another enemy unit? A> Both occupy the same space. When attacking a stack each attack damages only one (randomly determined) enemy unit.

Q> What happens when an enemy unit is respawned but the back row is already full? A> They stack. Both units may occupy the space. They do not hinder each other.

Q> Once a wire entanglement has been cut through is it passable for the rest of the game without another wire cutters or bangalore torpedoes? A> Yes, your men remember where the breach is.

Stratastar

Introduction

Space Empire building, Interstellar conquest. Build, maneuver, trade, and fight your way to Galactic supremacy. Minimal units and card mechanics make for quick turns.

Map Of The Galaxy

For the board use a 10 X 10 grid Make 100 map chits of the following composition: 4 Homeworlds 20 Worlds 4 Supernovas 4 Black Holes 8 Nebulas 60 Blanks

Map Setup

Each player receives a 'Homeworld' chit. Place the other map chits face down randomly on the board, one per space. Leave the corners empty.
Flip the chits over. Remove the blanks. Each players homeworld is placed in a different corner of the board. Players randomly determine who places their homeworld first.

If a Homeworld is closed in by Supernovas, Black Holes, and Nebulas then remove one of these hazards.

Empire Chits

Each player gets a set of chits in a different color. A set consists of 10 Fleet, 10 Stargate, and 20 colony chits.

Victory

Victory goes to the first empire to have colonies on 12 worlds or that captures an enemy homeworld.

Empire Setup

Each player starts the game with 4 Fleets and one stargate located on their Homeworld. Each player gets dealt 5 cards from the Galaxy Deck.

The Galaxy Deck

The deck contains 85 cards:

20	Attack
20	Move
20	Build
20	Trade
5	Research

If during play, the deck is used up, reshuffle the discard pile and continue.

Turn Sequence

Players take turns. The last player to place a Homeworld goes first and so on. Each turn is divided into 6 phases:

1. Draw
2. Trade
3. Support
4. Build
5. Movement
6. Battle

Draw Phase

Retooling: The active player may discard up to 3 cards. Next: Production: All players draw galaxy cards to fill their hands to maximum draw size. (Yes, you read it right, ALL players) Homeworld Production: The starting max draw size is 5 cards. Colonial Production: Max draw size is increased by 1 for every 3 colonies the player has.

Trade Phase

Free Trade: All players may freely trade cards with each other. External Trade: The active player may discard a Trade card to take a random card from an opponent. If the card is also a trade card, both are discarded. Internal Trade: The active player may discard a Trade card and X other cards to draw X +1 cards from the Galaxy deck. This may be done only once per turn.

Support Phase

Active player only. Defense Spending: Your Homeworld can support 2 Fleets. Defense Taxes: You may support an additional Fleet for every 2 colonies you have.

Military Cutbacks: Unsupported Fleets of the active player are removed from the map. Logistics: A Build card may be discarded to count as a colony for support purposes.

Build Phase

Active player only. Shipyards: A Build card may be discarded to build a Fleet at your Homeworld. Colonization: If you have a Fleet present at a world which has no colonies, you may discard a Build card to build a colony there.

Stargates: Three Build cards may be discarded to build a Stargate at a colony Terraforming: Five Build cards may be discarded to Terraform a world on which

you have a colony. Add an additional colony to the terraformed world.

Movement Phase

Active player only. Armadas: Multiple friendly Fleets in the same space may be stacked together as an Armada. (or Starmada) Free Move: You get one free move. Move one Fleet or Armada one space orthogonally (no diagonal moves) Hazards: Fleets & Armadas cannot enter spaces occupied by hazards: Supernovas, Black Holes, and Nebulas. Spaceflight: A move card may be discarded to move one of your fleets or Armadas one space. A Fleet or Armada can move multiple times per turn.

Beam me up: A Fleet or Armada at a stargate may move to any other friendly stargate as its move.

Battle Phase

Units: Fleets and Colonies are the two types of 'units' in the game. Battlefield: A battle occurs if opposing units occupy the same space and at least one player wants to fight. All units in the space must participate Resolution: The side with the highest force total wins. Each unit has a force value = 1.

Homeworlds have a force value = 4. Attack Cards have a force value = 1. Players simultaneously reveal the Attack cards they are using. (On the count of 3) This is done once. More Attack cards cannot be added later.

Players may use some, all, or none of the Attack cards in their hands. Attack cards used are discarded. Win: The winner suffers no casualties.

Lose: All units of the losing side are destroyed (including Stargates). Mutual Destruction: If the totals are tied then all units of both sides are destroyed.

Research Cards

A research card can be used like any other type of card. Basic Research: Discard a research card in your trade phase to draw 2 cards.

Optional Abilities

The following rules for spying, diplomacy, and retreat are optional, but recommended:

Spying

An Attack card may be discarded at any time to look at an opponents hand or to look at the next 5 cards in the deck.

Diplomacy

A player may discard 2 Trade cards during an opponents move to prevent any opposing fleets from moving into a target space occupied by one of that players units (or homeworld).

Retreat

During an opponents move phase, if an opponents fleet enters a space containing one of your fleets or armadas, you may discard a move card to move your fleet or armada to an adjacent space not containing enemy units. The opponent may pursue by discarding his own move cards.

Optional Rules

Exploration: The map chits are not set up at the beginning of the game. The identity of a space is not revealed (picked randomly from the pile) until a Fleet enters it. Discard a trade card for a unit to see into an adjacent space. Players cannot trade until their empires adjoin.

To the Death: The game lasts until only one player is left. Low Technology: Do not use stargates. Power cards: Draw a star on 4 build, 4 attack, 4 trade, and 4 move cards.

These are now worth two cards each.

More Optional Abilities

Before play starts determine which optional abilities and rules are to be used, by whom, and when.

Uneven Start: Players start the game able to use one optional ability not useable by the other players.

Breakthrough Technology: Discard 1 Research card and 4 build cards. You gain 1 optional ability that you could not already use. (Make cards for the Abilities listed in the Optional Ability List below.

When gaining a new ability select a random card)

Optional Ability List

Scout: Discard 2 Move Cards to move a Fleet 3 spaces.

Hyper jump: Discard 5 Move cards to move one fleet or Starmada to any nonhazard space on the map.

Defend the Homeworld!: Discard 4 Move cards to immediately move some or all of your fleets back to your Homeworld.

Expansion: Discard 2 Build cards to build a fleet at a colony.

Wormholes: Black holes can be used as one way gates to supernovas. This means that these spaces can be entered.

Piracy: Discard 2 Attack cards to make opponent discard a random card.

Planning: Discard 2 Build cards to put the top card of the discard pile into your hand.

Treason: Discard 5 Trade cards to replace an opponents unit with one of your own.

Allied Minor Race: Discard 4 Trade cards to build a colony on an empty world within 2 spaces of one of your units.

Treaty: Discard 5 Trade cards. You and an opponent cannot attack each other for the next 2 turns.

Nebulous Navigation: Discard 2 Move cards to enter a Nebula.

Border Raids: Discard 1 attack card. An enemy colony adjacent to one of your fleets is not counted on that player's next turn in his draw or support phases.

Warfleet: Discard 2 Build cards to build a Warfleet at Homeworld. Identical to regular fleet except that it generates 3 Force points and cannot build colonies. Indicate with a different kind of Chit.

Sabotage: Discard 3 Attack cards to negate a non-battle action just performed by an opponent.

Planet Buster: Discard 5 Attack cards to destroy any colony anywhere on the map.

Nova Mine: Discard 5 Attack cards to destroy any Fleet anywhere on the map.

Counters & Cards

This very cool counter & card set was created by David Ashton: david.ashton@cheshtatasy.co.uk David has also made counters and cards for Space Insurrection.

Stratego Shogun

Introduction

Stratego variant with a Japanese theme. There are 40 new pieces. The object is to capture all of your opponent's 4 fortresses.

Fortresses do not move. High rank units capture lower ranks. (A Daiyamo = 12 would capture Heavy Cavalry = 11) Equal ranks result in mutual destruc-

tion.

There are no bombs. Ninja can move diagonally. Ninja always win if they are the attacker.

Ranged units (R) always defeat infantry (I). Cavalry (C) always defeats ranged units. Certain infantry will defeat cavalry, if the cavalry is attacking.

Cavalry move like scouts.

Unit Name	#	Rank	Type	Notes
Fortress	4	0	-	
Ninja	3	0	-	Defeats all units in attack
Ashigaru Spearmen	3	1	I	Defeats Cavalry in defense
Ashigaru Gunners	3	2	R	Defeats Infantry
Bushi Spearmen	3	3	I	Defeats Cavalry in defense
Bushi Musketeers	3	4	R	Defeats Infantry
Bushi Spear Cavalry	6	5	C	Defeats Ranged Units
Warrior Monks	2	6	I	
Samurai Swordsmen	3	7	I	
Samurai Horse Archers	2	8	-	Defeats Infantry/Move like scouts
Samurai Archers	3	9	R	Defeats Infantry
Samurai Naginata	2	10	I	Defeats Cavalry in defense
Samurai Heavy Cavalry	2	11	C	
Daiyamo	1	12	C

Here's what I have for playing pieces for Shogun Stratego. These are to be put on the Stratego playing pieces from Hasbro. They would measure 5/8" wide by 7/8" high. The person who would use these would need to cut and paste a little to make them fit.

Also, the blue and red pieces are separated. The blue are on top, (the pieces are of blue colored nature),

and the same would go for the red pieces, (the pieces are of red colored nature), so to speak. People can do anything they want with the coloring, this is what I and my two sons decided on the coloring. There are extra pieces at the bottom, which were created by my son.

Stratego Links

[Ed's Stratego Page](#)

Stratego Wwii Naval

Introduction

Stratego variant with a WWII Naval theme. All spaces are sea spaces, except for 2 islands in the center of the board. There are 40 new pieces.

There are 2 ways to win:

1. Destroy all of your opponent's Carriers.
2. Have one of your Transports reach your opponents back row.

All units except mines move 1 or 2 spaces. There are no scouts. Mines are equivalent to bombs. High Rank destroys low rank.

For example: Battleships = 7 defeat Cruisers = 6. Every turn in addition to your normal move you may make one Air Mission. There are 2 types of missions: Reconnaissance & Bomber missions.

For a Reconnaissance mission choose an enemy unit and roll one six sided die:

1D6	Result:
1-3	Unit Identity revealed if it is not a sub or a mine
4-5	No sightings
6	Reconnaissance Plane shot down by AA guns/fighters

For a Bomber mission choose an enemy unit and roll one six sided die:

1D6	Result:
1-3	Target unit (not sub or mine) destroyed by bombs/torpedoes
4-5	Bomber misses
5-6	Bomber shot down by AA guns /fighters

Each player has 4 Reconnaissance Planes and 4 Bombers. If all planes of 1 type are shot down, no more missions of that type are possible.

Unit Name	#	Rank	Notes
Mines	6	-	Same as Bombs
Transport	4	1	
PT Boat	4	3	Defeats all units except mines when attacking
Mine Sweeper	2	2	Automatically defeat Mines
Destroyer	8	5	Automatically defeat Subs
Cruiser	4	6	
Battleship	4	7	
Carrier	4	4	
Submarine	4	-	Defeats all units except mines & destroyers

Counter Set & Map

The following counter set and map was created by Janne Thorne: jan.thorne@mail.bip.net Janne has

also made counters and cards for Blitz, Midway, Can-nonade, and others.

Street Fighter Arena

Introduction

2 player Card game based on the world of Street Fighter. It simulates a match between 2 characters.

Disclaimer

Street Fighter is a licensed, copyrighted property. This is merely a fan site.

Victory

Reduce the opposing fighter to zero or less hits.

Hits

Each character starts with 20 Hits.

The Deck

Players share a common deck. The Deck has 52 cards:

- 10 Punch cards (P)
- 10 Kick cards (K)
- 10 Grab cards (G)
- 10 Athletic cards (A)
- 6 Focus cards (F)
- 4 Link cards (L)
- 2 Warrior cards (W)

The Characters

17 Characters are available. Each player chooses one character at the beginning of the game. Each character has 2 Special Abilities.

Each character has a unique list of Fighting Techniques.

Techniques

Each technique has a name, a cost, and an effect. Some characters can use the same technique. The cost is in the number and type of cards that must be played to produce the effect.

The effects will be either offensive or defensive or otherwise. Offensive techniques, or Attacks, will cause Damage. Each point of Damage reduces the opposing character by 1 Hit.

A Defense will reduce the damage of an attack by an indicated amount.

Combo

Normally a Character can only make 1 attack on its turn. A combo effect will allow it to make an extra attack. The combo is prevented if the defender is able to negate or reduce the damage of the initial attack.

Stun

Some Attacks also produce a Stun effect. When a character is stunned, there is a 50% they will not be able to Attack until after their next turn.

Knock Down (kd)

Some Attacks also produce a Knockdown effect. When a character is Knocked Down, he must discard a Kick card on his next turn to get up (or 2 cards of any other type)

Injure

Some Attacks also produce an Injury. There is a 50% chance the targets Max Hand Size will be reduced by 1 for the rest of the Match.

Hold

Some Attacks also produce a Hold effect. When a character is Held, he must discard a Grab card on his next turn to break the hold (or 2 cards of any other type).

Setup

Some Attacks produce a Setup effect. This Character's next attack cannot be negated or defended against.

Unblockable

Some Attacks have the Unblockable effect. They cannot be negated or reduced.

Multi-strike

Some Attacks have the Multi-Strike effect. For every Grab card you discard the attack does an extra 2 points of Damage.

Distance

Some Techniques produce a Distance effect. If one is produced the combatants are too far away from each other except for ranged attacks. Either player on their

turn may play 1 Athletic card on their turn to negate the distance effect.

Throw Down (td)

Some Techniques produce a Throw Down effect: This is a combination of both a KD effect and a Distance effect.

Sub For Jump

Some techniques have the sub for Jump Defensive Option: Instead of paying the usual cost for the Jump maneuver, you may pay the cost as listed for this Technique. You negate their attack and 50% immediately use this Attack against them. However this costs 1 extra Focus card to do so.

Counter Air

Some Techniques have the Counter Air Option: You can use this Technique during your opponent's turn

if they use an Air Technique against you: You negate their attack and 50% immediately use this Attack against them. However this costs 1 extra Focus card to do so. Your Attack also gets the KD effect if it didn't already have it.

Dizzy Rule

If you make 2 or more combos in one turn you are stunned until the end of your next turn.

Jumping Attack Option

You can make any Basic Attack an Aerial (Air) Attack by playing an extra Athletic Card: The attack does Damage +1.

Basic Techniques

There is a list of basic Techniques that all fighters are able to use.

Basic Technique List

Technique	Cost	Effect
Basic Punch	1 Punch	Punch Attack of Damage = 1
Low Kick	1 Kick	Kick Attack (Low) of Damage = 1
High Kick	1 Kick	Kick Attack (High) of Damage = 1
Grapple	1 Grab	Grab Attack of Damage = 1
Block	2 Punch	Reduce Damage of an Attack by 1
Attack Chain	1 Link	Draw 1 card + Combo
Counter Attack	1 Link	Attack on Opponents Turn after his Attacks
Mental Focus	1 Focus	Draw 2 cards and discard 1 card
Way of the Warrior	1 Warrior	Wild card: Use as any other card type
Throw	2 Grab	Grab Attack of 1 Dam + TD
Wrestle	2 Grab	Grab Attack of 1 Dam + Hold
Jab	2 Punch	Punch Attack of 1 Dam + Combo
Jump	1A + 3K	Negate Low or Crouching or Ranged Attack
Duck	3 Athletic	Negate High or Aerial Attack
Mid-Block	2A + 2P	Negate an Attack that is neither High nor Low
Sidestep	2A + 2K	Negate Punch Attack
Evade	2A + 2G	Negate Kick Attack
Dodge	3A + 2F	Negate an Attack
Clean Break	1A + 3G	Negate a Grab Attack
Feint	2 Punch	Setup + Combo
Knee Strike	2 Kick	Kick Attack of Damage = 1 + Draw 1 Card
Elbow Strike	2 Punch	Punch Attack of Damage = 1 + Draw 1 Card
Stomp	2 Kick	Kick Attack of Damage = 1 + Injure
Gouge	2 Punch	Punch Attack of Damage = 1 + Injure
Twist	2 Grab	Grab Attack of Damage = 1 + Injure
Strong Kick	2 Kick	2 Dam
Strong Punch	2 Punch	2 Dam
Roundhouse Kick	1A + 2K	3 Dam
Parry	4 Punch	Reduce Punch or Kick Attack to 1 Dam
Catch	2A + 3P	Negate Punch or Kick Attack

Technique	Cost	Effect
Withdraw	4 Kick	Distance + Negate Attack unless foe plays 1 Kick
Retreat	2A + 3K	Negate Attack + Distance
Shake it Off	1 Focus	Negate all Stun effects or 50% one Injury

Max Hand Size

All Characters have a max hand size of 7. If they ever have more than their max, discard the excess.

Match Setup

Players choose their Characters. Each player is dealt 7 cards. Flip a coin to see who goes first.

Turn Sequence

Players take turns. Each turn has 4 Phases:

1. First Refresh Phase
2. Attack Phase
3. Tactical Phase
4. Second Refresh Phase

First Refresh Phase

Fill your hand to max hand size. (or less if stunned)
If the deck ever runs out, shuffle the discard and draw from it.

Attack Phase

Play (Discard) cards to make an attack. If you play a combo effect, you can make an extra attack. Your opponent may play cards to produce defensive effects, fully or Partially negating one or more of your attacks.

Tactical Phase

You may discard any unwanted cards in your hand.

Second Refresh Phase

Fill your hand to max hand size. (or less if stunned)

Character List

There are 17 characters available:

Ryu

(Shotokan Karate) SA1: Your Focus Attacks do Damage +2 SA2: Your Max Hand Size is +1

Technique:	Cost:	Effect:
Dragon Punch (Air)	2A + 3P	5 Dam (Sub for Jump)
Power Uppercut	3 Punch	2 Dam + Stun (Counter Air)
Foot Sweep (Crouch)	2 Kick	1 Dam + KD
Hurricane Kick	3 Kick	2 Dam + Multi-Strike
Air Hurricane Kick (Air)	4 Kick	3 Dam + Multi-Strike (Sub for Jump)
Backroll Throw	2A + 1G	2 Dam + TD
Fireball	2 Focus	4 Dam (Energy Ranged)
Improved Fireball	3 Focus	6 Dam (Energy Ranged)
Kippup	1 Defense	Negate KD

Ken

(Shotokan Karate) SA1: Your Max Hand Size is +1
SA2: Your Punch Attacks do Damage +1

Dragon Punch (Air)	2A + 3P	5 Dam (Sub for Jump)
Flaming Dragon Punch (Air)	2A + 4P	6 Dam + KD
Power Uppercut	3 Punch	2 Dam + Stun (Counter Air)
Foot Sweep (Crouch)	2 Kick	1 Dam + KD
Hurricane Kick	3 Kick	2 Dam + Multi-Strike
Air Hurricane Kick (Air)	4 Kick	3 Dam + Multi-Strike (Sub for Jump)
Backroll Throw	2A + 1G	2 Dam + TD
Fireball	2 Focus	4 Dam (Energy Ranged)
Kippup	1 Athletic	Negate KD

Zangief

(Sanbo) SA1: You may convert 1 card to a Grab card on your turn SA2: You have 5 extra Hits

Ear Pop	(High)	2 Punch	1 Dam + Stun
Head Bite (High)	1A + 1G	1 Dam + Hold	
Iron Claw	2G + 1P	2 Dam + Hold	
Spinning Clothesline	1A + 2P	2 Dam + KD (High)	
Turbo Spinning Clothesline	2A + 2P	3 Dam + KD (High)	
Foot Sweep (Low)	2 Kick	1 Dam + KD	
Double Hit Kick	3 Kick	2 Dam High + 2 Dam Low	
Back Breaker	3 Grab	2 Dam + Injure	
Pile Driver	1A + 3G	3 Dam + KD	
Spinning Pile Driver	1A + 4G	4 Dam + TD (Sub for Jump)	
Siberian Suplex	2A + 3G	4 Dam + TD	
Siberian Bear Crusher	5 Grab	4 Dam + KD	
Grappling Defense	2 Grab	Negate Grab Attack	
Air Throw	2A + 2G	Counter Air Only: 2 Dam + TD	

T. Hawk

(Native American Wrestling) SA1: All your Grab attacks do +1 Damage SA2: You have 5 extra Hits

Thunder Clap	2 Focus	3 Dam + Stun (Energy Ranged)
Buffalo Punch	4 Punch	4 Dam
Thunder Strike (Air)	2A + 1K	2 Dam + Stun
Storm Hammer	4 Grab	3 Dam + TD (Sub for Jump)
Diving Hawk (Air)	2K + 2A	3 Dam + Combo (Sub for Jump)
Wounded Knee	3 Kick	2 Dam + Injure
Neck Choke (High)	3 Grab	2 Dam + Hold
Bear Hug	4 Grab	3 Dam + Hold
Brain Cracker (High)	2G + 1P	1 Dam + Hold + Multi-Strike

Fei Long

Athletic Card during your Opponents turn

(Kung Fu) SA1: You may convert 1 card to a Punch card on your turn SA2: You may use 1 Grab card as a

Monkey Grab Punch	2P + 1G	2 Dam + Unblockable
Rekka Ken	1F + 2P	3 Dam + Multi-Strike
Double Hit Kick	3 Kick	2 Dam High + 2 Dam Low
Dragon Kick	2F + 2K	6 Dam (Energy Ranged)
Foot Sweep (Crouch)	2 Kick	1 Dam + KD
Stepping Front Kick (Low)	2 Kick	1 Dam + Combo
Deflecting Punch	2 Punch	Negate 1 Dam + Inflict 1 Dam
Punch Defense	2 Punch	Negate Punch Attack
Hair Throw (Air)	1A + 2G	2 Dam + TD
Drunken Monkey Roll	2A + 1G	Negate Low, Crouching or Ranged Attack
Kippup	1 Athletic	Negate KD

Dhalsim

(Kabaddi) SA1: You may convert 1 card to a Focus card on your turn SA2: Your Max Hand Size is +1

Slide Kick (Low)	2 Kick	1 Dam + KD
Brain Cracker (High)	2G + 1P	1 Dam + Hold + Multi-Strike
Flying Body Spear	2A + 2K	4 Dam (Sub for Jump)
Extendable Limbs	3 Punch	2 Dam + Unblockable

Slide Kick (Low)	2 Kick	1 Dam + KD
Fireball	2 Focus	4 Dam (Energy Ranged)
Improved Fireball	3 Focus	6 Dam (Energy Ranged)
Telepathy	1 Focus	Draw 2 Cards + Look at Opponents Hand
Yoga Flame	1 Focus	2 Dam (Energy Ranged)
Yoga Teleport	3 Focus	Negate Attack + Distance

Blanka

card to an Athletic card on your turn

(Capoeira) SA1: You may discard cards immediately
before First Refresh Phase SA2: You may convert 1

Head Butt (High)	2 Punch	1 Dam + Stun
Power Uppercut	3 Punch	2 Dam + Stun
Turbo Spinning Clothesline	2A + 2P	3 Dam + KD (High)
Back Flip Kick	3 Kick	2 Dam + Distance
Foot Sweep (Low)	2 Kick	1 Dam + KD
Head Bite (High)	1A + 1G	1 Dam + Hold
Rolling Attack (Air)	2A + 1G	2 Dam + Distance
Beast Roll (Air)	3A + 1G	4 Dam (Sub for Jump)
Vertical Rolling Attack (Air)	2A + 1G	3 Dam (Counter Air)(Sub for Jump)
Shock Treatment	3 Focus	5 Dam + Stun
Musical Accompaniment	1 Focus	Draw 2 cards

Guile

You may convert 1 card to a Link card on your turn

(Special Forces) SA1: You may use 1 Grab card
as an Athletic Card during your Opponents turn SA2:

Spinning Backfist	2 Punch	1 Dam + Stun
Flash Kick (Air)	1F + 2K	4 Dam
Flying Knee Thrust	1A + 2K	2 Dam + Injure
Foot Sweep (Crouch)	2 Kick	1 Dam + KD
Spinning Foot Sweep (Crouch)	1A + 2K	2 Dam + KD
Air Throw	2A + 2G	Counter Air Only: 2 Dam + TD
Kippup	1 Athletic	Negate KD
Sonic Boom	2 Focus	3 Dam + Stun (Energy Ranged)
Pile Driver	1A + 3G	3 Dam + KD
Hyper Fist	3 Punch	2 Dam + Multi-Strike

Cammy

during your Opponents turn

(Secret Agent) SA1: Your Kick attacks do Damage
+1 SA2: You may use 1 Grab card as a Defense Card

Spinning Backfist	1A + 1P	1 Dam + Stun
Spinning Knuckle	1A + 2P	2 Dam + Combo or Negate Ranged Attack
Power Uppercut	3 Punch	2 Dam + Stun (Counter Air)
Flying Thrust Kick (Air)	1A + 3K	4 Dam (Sub for Jump)(Counter Air)
Flash Kick (Air)	1F + 2K	4 Dam
Handstand Kick	1A + 2K	3 Dam (Counter Air)
Spinning Foot Sweep (Crouch)	3 Kick	2 Dam + KD
Air Throw	2A + 2G	Counter Air Only: 2 Dam + TD
Suplex	4 Grab	3 Dam + KD
Thigh Press	3 Grab	2 Dam + KD
Cannon Drill (Low)	2 Focus	4 Dam

E. Honda

(Sumo Wrestling) SA1: Your Punches do Damage
+1 SA2: You have 5 extra Hits

Sumo Slap	3 Punch	3 Dam
Head Butt (High)	2 Punch	1 Dam + Stun
Hundred Hand Slap	4 Punch	3 Dam + Multi-Strike
Double Hit Kick	3 Kick	2 Dam High + 2 Dam Low
Foot Sweep (Crouch)	2 Kick	1 Dam + KD
Spinning Foot Sweep (Crouch)	1A + 2K	2 Dam + KD
Bear Hug	4 Grab	3 Dam + Hold
Air Smash	2A + 1K	2 Dam + KD (Sub for Jump)
Knee Basher	3 Kick	2 Dam + Injure
San He	2 Focus	Negate 3 Dam + Negate KD

Chun Li

attacks do Damage +1

(Wu Shu) SA1: You may convert Punch cards to Kick or Athletic cards on your turn SA2: Your Kick

Back Flip Kick	3 Kick	2 Dam + Distance
Forward Flip Knee (Air)	1A + 2K	3 Dam
Lightning Leg (Air)	3 Kick	2 Dam + Multi-Strike
Whirlwind Kick (Air)	2A + 2K	3 Dam + Multi-Strike
Flying Heel Stomp (Air)	1A + 3K	3 Dam + Distance (Sub for Jump)
Air Throw	2A + 2G	Counter Air Only: 2 Dam + TD
Wall Spring	3 Athletic	Negate Attack + Distance
Fireball	2 Focus	4 Dam (Energy Ranged)
Spiked Bracelets	3 Punch	2 Dam + Combo

Dee Jay

Link card on your turn

(Kickboxing) SA1: You may convert Grab cards into Punch or Kick cards SA2: You may convert 1 card to a

Hyper Fist	3 Punch	2 Dam + Multi-Strike
Power Uppercut	3 Punch	2 Dam + Stun (Counter Air)
Triple Strike	2P + 1K	3 Dam
Double Dread Kick	4 Kick	3 Dam + Stun
Double Hit Kick	3 Kick	2 Dam High + 2 Dam Low
Slide Kick (Low)	3 Kick	2 Dam + KD
Wounded Knee	3 Kick	2 Dam + Injure
Back Roll Throw (Low)	1A + 2G	2 Dam + TD
Max Out	2 Focus	3 Dam + Stun (Energy Ranged)
Musical Accompaniment	1 Focus	Draw 2 cards

Balrog

(Boxing) SA1: Convert Grab or Kick cards to Punch
SA2: You have 5 extra Hits

Knee Basher	3 Kick	2 Dam + Injure
Slide Kick (Low)	3 Kick	2 Dam + KD
Back Roll Throw (Low)	1A + 2G	2 Dam + KD
Foot Sweep (Crouch)	2 Kick	1 Dam + KD
Spinning Backfist	2 Punch	1 Dam + Stun

Weapons

If a Character has a weapon they automatically have the basic attack Technique for that Weapon. If you have a hand weapon you also get the Weapon Parry Technique. All Ranged Weapon Attacks have a 50% chance of missing outright Note: If you have an Automatic Rifle, you can use it as a rifle also.

These are referred to as Projectile attacks or Hand

Weapon attacks as Opposed to punches, kicks, or grabs. Players may agree that some Defensive techniques may or may not be used vs these types of attacks. Note: Guns with rubber bullets do 3 less damage and stun instead of injure. Note: The Grenade can only be used if the foes are distant from each other.

Note: Most Projectile Weapons can also be used as a club.

Weapon Basic Techniques List

Pistol	1 Punch	4 Dam + Injure (Revolver) (Projectile Ranged)
Sub Machine Gun	1 Punch	4 Dam + Combo (Projectile Ranged)
Rifle	2 Punch	6 Dam + Injure (Projectile Ranged)
Automatic Rifle	2 Punch	6 Dam + Combo (Projectile Ranged)
Shotgun	2 Punch	5 Dam (Projectile Ranged)
Taser	1 Focus	Stun x2 (Projectile Ranged)
Spray Mace	1 Punch	Stun + Injure
Grenade	2 Punch	10 Dam (Single Use) (Projectile Ranged)
Bow & Arrow	2 Focus	5 Dam + Injure (Crossbow) (Projectile Ranged)
Throwing Star	1 Focus	1 Dam + Injure (Projectile Ranged)
Thrown Knife	1 Focus	2 Dam + Injure (Projectile Ranged)
Thrown Axe	1 Focus	4 Dam + Injure (Thrown Spear, Sword, etc.)(PR)
Knife	1 Punch	3 Dam + Injure (Dagger, Broken Bottle)
Sword	2 Punch	5 Dam + Injure (Katana, scimitar, etc.)
Axe	2 Punch	4 Dam + Injure
Battle Axe	3 Punch	6 Dam (Maul, Heavy War Hammer, 2-Handed Sword)
Shield	1 Grab	2 Dam (Bash) or Negate 2 Dam
Num Chucks (Pair)	3 Punch	3 Dam + Combo (Pair of Sticks)
Club	2 Punch	3 Dam + Stun (Bat, Hammer, Nightstick, etc.)
Electric Cattleprod	2 Punch	2 Dam + Stun x2
Brass Knuckles	Modifier	Adds 1 Dam to any Punch Attack
Staff	2 Athletic	3 Dam + Stun
Spear	3 Athletic	5 Dam (Bayonet, Pike)
Chain	2 Athletic	3 Dam + Hold
Whip	2 Athletic	2 Dam + Combo
Tonfa (Pair)	2 Grab	3 Dam or Negate 2 Dam
Sai (Pair)	3 Punch	3 Dam or Negate Hand Weapon Attack
Kama (Pair)	2 Punch	4 Dam or Negate 2 Dam
Weapon Parry	1F + 2P	Negate Hand Weapon Attack

Minor Character Weapon List

- Thug- Brass Knuckles, Knife, Lead Pipe (Club), Chain
- Gangster- Revolver, SMG
- Warrior- Num Chucks, Sword, etc.
- Cop- Pistol, Taser, Tonfa, Truncheon (Club), Shotgun, Spray Mace
- SWAT- Rifle, Automatic Rifle, Pistol
- Ninja- Throwing Stars, Knife, Kama, Sword, Bow & Arrow
- Soldier- Pistol, Rifle, Automatic Rifle, Grenade
- Agent- Knife, Pistol, Rifle
- Martial Artist- Sai, Staff, Spear, Num chucks

Stunning Shout	2 Focus	3 Dam + Stun (Ranged Energy)
Toughskin	1 Focus	Negate 1 Dam & Inflict 1 Dam
Zen No Mind	1 Focus	Draw 2 Cards

Studio Comics

Introduction

Board Game for 2-4+ players. Each player owns a Comic Book Studio. Each Studio creates Heroes, publishes, collects Talent, and merchandizes in Order to outdo their Rivals and create an entertainment empire.

Disclaimer

Much of the material in this game refers to licensed, published properties. This is merely a fan site.

- H** Hero
- A** Action
- M** Merchandise
- T** Talent
- P** Publication

Dice

Six-sided dice are needed. At least three.

Pawns

Each player gets a Pawn of a unique color.

Tokens

Four Sets of colored Tokens are needed:

- Red** Victory Tokens
- Blue** Talent Tokens
- Yellow = Merchandising Tokens
- Green = Publication Tokens

The Decks

There are 7 Common Decks:

1. Golden Age Heroes
2. Silver Age Heroes
3. Bronze Age Heroes
4. Modern Age Heroes
5. Talent

Victory

The player with the most Victory Points at the end of the game is the winner.

Game End

The game ends when the last Modern Hero has been created.

The Board

The Board is a square Track seven spaces to a side like so:

.	H	-	A	-	P	-	T	-	M	-	A	-	H	.	.
.	A	A	.	.
.	M	P	.	.
.	T	T	.	.
.	P	M	.	.
.	A	A	.	.
.	H	-	A	-	P	-	T	-	M	-	A	-	H	.	.

6. Merchandizing
7. Publication

Setup

Separate out the components. Shuffle the Decks. Roll high to see who goes first.

Play proceeds clockwise. Each player takes a Pawn. Pawns are placed in the Hero corner spaces.

Players should spread their pawns out amongst the 4 corners.

Turn Sequence

Players take turns. Roll 1 Die and move your Pawn that many spaces. This is the Movement Roll. Pawns move clockwise around the Board.

If you land on an opponent's Pawn, steal 1 Token of your choice from him. If you land on a Hero Space take the top card of the Golden Age Hero Deck And place it face up on the table in front of you. You own this Hero. If there are no Golden Age Heroes left take a Silver Age Hero card.

If there are no Silver Age Heroes left take a Bronze Age Hero card. If there are no Bronze Age Heroes left take a Modern Age Hero card. If there are no Modern Age Heroes left the game ends.

Note: While drawing cards from a specific Age Hero Deck all the players Studios are considered to actually be in that Age. If you land on a Publication Space take

the top card from the Publication Deck. Gain Publication Tokens according to the Card, then Discard the card.

If the Publication Deck ever runs out, shuffle the discard and draw from it. If you land on a Merchandise Space take the top card from the Merchandise Deck. Gain Merchandise Tokens according to the Card, then Discard the card.

If the Merchandise Deck ever runs out, shuffle the

Roll	Result:	Notes:
1	Retro	Move Backwards 1D6 Spaces
2	Visionary	Move Forwards 1D6 Spaces
3-4	Stagnation	Nothing Happens

discard and draw from it. If you land on a Talent Space take the top card from the Talent Deck. Gain Talent Tokens according to the Card, then Discard the card.

If the Talent Deck ever runs out, shuffle the discard and draw from it. Important Note: In the Non-Hero Decks some cards have a minimum Age Requirement. If it is too early in the game the card has no effect. If you land on an Action Space roll 1D6:

Roll	Result:	Notes:
5	Sales Slump	Lose 1 Token
6	Hard Work	Gain 1 Token

End Of Game Scoring

Note that Hero cards have point values (according to their popularity). The player with the Highest total Golden Age Hero Score gets 1 Victory Token. The player with the Highest total Silver Age Hero Score gets 1 Victory Token.

The player with the Highest total Bronze Age Hero Score gets 1 Victory Token. The player with the Highest total Modern Age Hero Score gets 1 Victory Token.

The player with the most Publication Tokens gets 1 Victory Token.

The player with the most Merchandise Tokens gets 1 Victory Token. The player with the most Talent Tokens gets 1 Victory Token. Player with the most Victory Tokens wins.

In case of a tie the player with the highest Golden Age Hero Raw Score wins. If that is a tie, go to the Silver Age Raw Score and so on.

Summoners Chess

Introduction

Chess Variant using special fantasy units. 2 Player Game.

The Board

Use a regular 8 X 8 Chessboard. 64 lose Terrain tiles cover the 64 spaces of the Board.

Terrain Tiles

There are 16 Types of Tiles. See the Tile Unit Chart. There are 4 copies of each tile.

Pieces

Each piece has 2 parts: The figurine, and the Disc. The discs denote ownership. A disc lies flat in a square, and a figure sits upright on top of it.

Each player gets a set of Discs of a unique color. Use painted metal Figures. Each player starts with 4 Acolyte Figurines.

Winning

To win you must capture all 4 of your opponents Acolytes, or Reduce your opponent to 2 or less pieces.

Tile Unit Chart

Terrain	Unit Type	Movement Type
Ruins	Skeletons	Page
Swamps	Zombies	Page
Mountains	Dwarves	Squire
Hills	Goblins	Squire
Lakes	Serpents	Knight
Jungle	Cat People	Bishop
Castles	Chevaliers	Knight
Caves	Orcs	Knight

Movement Type

Page Moves and Captures 1 space orthogonally.

Squire = Moves and Captures 1 space diagonally.

Second Tile Unit Chart

Setup

Randomly place the 64 Terrain Tiles randomly onto the Board. Each player places his 4 Acolyte Figurines 1 space apart on his back row. Players flip a coin to see who goes first.

Moving And Capturing

This occurs just like in regular chess.

Summoning

This occurs as a result of a move. If you occupy (with any of your units) 3 Tiles of the Same Terrain Type, you summon a Unit under your control into the Fourth tile of that type. If the Fourth space is already occupied by an opponent's piece, the unit is not summoned.

If the blocking piece moves, the unit will immediately be summoned. Each Unit can only be summoned once per game. The type of unit summoned is determined by the tile type as denoted in the Tile Unit Chart.

Acolytes

Acolyte Units move and capture like Kings.

Terrain	Unit Type	Movement Type
Towers	Wizard	Queen
Peaks	Rocs	Bishop
Deserts	Chimera	Bishop
Volcanos	Red Dragon	Queen
Tundra	Ice Giants	Rook
Forests	Elves	Knight
Bogs	Trolls	Rook
Badlands	Ogres	Rook

Second Unit Variant

Use this variant if you want a longer game, and have more figurines you want to use. If your opponent has summoned a Unit of a particular Terrain off the first list, you Also, later, may summon a unit from that Terrain, but from the Second list:

Terrain	Unit Type	Movement Type
Ruins	Vampyre	Queen
Swamps	Treant	Rook
Mountains	Kobolds	Page
Hills	Centaurs	Bishop
Lakes	Wolves	Squire
Jungle	Lizard Men	Squire
Castles	Gargoyle	Bishop
Caves	Gnomes	Page

Terrain	Unit Type	Movement Type
Towers	Golem	Rook
Peaks	Griffon	Rook
Deserts	Hydra	Rook
Volcanos	Demon	Queen
Tundra	Valkyries	Knight
Forests	Unicorn	Bishop
Bogs	Spectre	Bishop
Badlands	Minotaur	Knight

Super Dice

Introduction

Dice game simulating 2 Superheroes fighting.

Victory

To win reduce your opponent to zero hits.

Dice

Ten 6-sided dice are needed plus a few spares.

Setup

Each player gets 5 dice. Each Superhero starts with 50 hits and 5 Superpowers. Name your Superhero.

Superpower Allocation

Randomly select 12 superpowers from the list. Players take turns picking 1 superpower at a time until each player has picked 5 powers. Once a power has been picked, it cannot be picked again.

Roll high on 1D6 to see who picks first.

Turn Sequence

Each turn has 4 Phases: Luck Phase Initiative Phase Action Phase Damage Phase

Luck Phase

Each player rolls his 5 dice.

Initiative Phase

The player with the highest total gains the initiative. The player with the initiative may go first or let his opponent go first in Action Phase.

Powers List

Power Name:	Type	Notes
Regeneration	C	Regain 2 lost hits at the end of Damage Phase
Invisibility	A	All of opponents rolls of 5 are converted to 2
Mind Scan	A	Switch 1 of your dice with 1 of your opponents
Super Leap	A	Convert one of your rolls of 2 into a 6
Teleportation	A*	Switch all of your dice with your opponent
Shrinking	A\$	Convert any one of your rolls into a 6 for defense only
Extra Limbs	A	Convert all of your rolls of 2 into 4
Entangle	A	Opponent must eliminate all of his rolls of 3
Energy Blast	A\$	Roll of 5 becomes 10 for attack only

Action Phase

Players take turns activating powers or assigning dice to Attack or Defense. Powers have a wide variety of effects Some Powers are Constant powers. Constant powers have their effect without being activated.

A player must assign each of his Dice to either Attack or Defense. If there is nothing else left he can or wants to do he must pass. If both players pass in a row the phase ends.

Each power can only be activated once per turn.

Damage Phase

Attack Total = Total of all dice you assigned to Attack
Defense Total = Total of all dice you assigned to Defense
If your Attack total exceeds your opponents Defense Total, your opponent takes Damage in hits equal to the difference. If your opponents Defense Total exceeds your Attack total, you take Damage in hits equal to the difference. Dice that are switched or stolen are returned at the end of this phase.

Powers List Notation

A Power that requires Activation

C Constant Power

Convert(ed) = flip the target die to the indicated number
Rolls = Dice

* you can only activate this power if you have at least one roll of 6.

Eliminate = Remove the die from play for the rest of the turn.

\$ Automatically assigns 1 or more dice to attack or defense.

Power Name:	Type	Notes
Armor	A\$	Convert all of your rolls of 1 into 5 for defense only
Darkness	A	Convert all of your opponents rolls of 5 into 1
Precognition	A	Steal one roll of 5 or 1 from an opponent
Force Field	A\$	Convert all of your rolls of 3 into 6 for defense only
Shape Shift	A	Reroll any (1 or more) of your dice
Illusions	A	Opponent must reroll 2 of his dice of your choice
Mind Control	A	Convert all of your opponents rolls of 6 into 1
Growth	A	Convert all of your rolls of 2 into 6
Summon	A	Roll an extra Die
Freeze	A	Opponent must eliminate one roll of 4 or 6
Made of Metal	C	Start the game with 30 extra Hits
Super Tough	A	Add 2 to all your Defense Rolls
Laser Attack	A\$	Convert one of your rolls of 1 into 5 for attack only
Telekinesis	A	Reroll any 1 target die in play
Flight	A	Eliminate 1 opposing Attack Roll
Immobilize	A	Opponent must eliminate all of his rolls of 4
Enhanced Senses	A	Reroll all your rolls of 1 and 2
Damage Resistance	A	Reduce damage taken from each die by 1
Heat Attack	A	Opponent takes 1 Hit Damage for each of his rolls of 1 or 2
Density Increase	A	Convert one of your rolls of 3 into a 6
Stretching	A	Convert one of your rolls of 1 into a 6
Duplication	A	Make all of your rolls = 4
Super Strength	A\$	Convert all of your rolls of 3 into 6 for attack only
Super Speed	C	Add 10 to your total in Initiative Phase
Absorption	A	Negate a Power just used by opponent
Deadly Attack	A	If you have 3 of a kind add 7 to your attack total
Insubstantial	A*	Your opponents attack total is halved
Psionic Blast	A\$	Convert all of your rolls of 2 into 4 for attack only
Sidekick	C	Sidekick has 20 Hits & a copy of one of your powers*
Super Reflexes	A	Convert all of your rolls of 3 into 5
Drain	C	Opponent loses 2 hits at the end of Damage Phase
Time Travel	A*	Both you and opponent must reroll all your dice
Internal Reserves	A	Pay 3 Hits to reroll one of your dice
Unstoppable	A	Eliminate 1 opposing Defense Roll
Stunning Attack	A*	Opponent rolls one less die next turn
Mystic Powers	A	Pay 2 Hits to use as any power in the Power List
Death Trap	A*	Eliminate any 1 of opponents rolls
Gadgets	A	Convert a roll of 1 into 5
Secret Identity	C	At 25 Hits lose old powers & gain 5 new random ones
Ammo Assortment	A\$	Convert all your rolls of 1 into 3 for attack only
Luck	C	In Luck Phase roll 6 dice & keep 5
Martial Arts	A	Switch 1 roll with Opponent
Knockback	A*	Add 4 to your Attack Total
Electricity	A	Steal all of opponents Rolls of 2
Berserk	A	Add 5 to your Attack Total if all your rolls are for Attack
Finesse	A	Convert all of your rolls of 5 into 6
Backblast	A*	Add value of 1 opponents Attack roll to your Attack total
Tactics	A	(Re)assign opponents Roll to Attack or Defense
Magnetron	A*	Your rolls become identical to your opponents
Neutralization Field	A*	No more powers can be used this turn by anyone
Deflection	A*	Target attack die of opponent targets him instead
Super Genius	A*	Multiply your Attack or Defense Total by 1.5 (round up)
Super Costume	C	Increase all your rolls by 1

Power Name:	Type	Notes
Sonic Blast	A	Convert all of your opponents rolls of 4 into 2
Elemental Attack	A	Damage from target attack roll cannot be avoided
Weather Control	A*	Eliminate 1 of your rolls to gain 2 Extra rolls next turn
Mimic	A	Copies any one power of your opponent

* Any power except Sidekick

FAQ's Q - I am having difficulty in understanding a certain portion of your game Super Dice. I am writing to you in the hope that you can clarify this section for me so that I can slap my forehead, say "Doh!" and play the game. I can't figure out how the Action Phase is supposed to work. You wrote: "Players take turns activating powers or assigning dice to Attack or Defense." By this do you mean that in this sub-phase a player can EITHER activate a power or assign his dice? You also wrote: "Each power can only be activated once per turn." Okay, I can see why you don't want players to activate an Energy Blast five times in a row, but I want to return to the phrase "Players take turns....". So in this phase, if I am inferring correctly, players activate all of their powers (those that require activation) and assign their dice. Somehow, though, I think you have something else in mind. Is my interpretation overly complicated? Was my lobotomy too successful? I seem to be missing the point of this phase. If you could paint this by the numbers for me I would be most appreciative.

A - OK...I guess you forced me to do an EXAMPLE OF PLAY: Lets say Cosmo Man has the first 5 Powers on the List. Lets his Opponent Ant Man has the next 5 Powers on the List. Luck Phase = Cosmo rolls 1,2,3,5,6. Ant Man rolls 1,2,4,5,6.

Initiative Phase = Ant Man wins & decides to go first. Action Phase: (Players take turns. Ant Man first) Ant Man uses 'Extra Limbs' to convert his 2 into a 4 (Ant Man = 1,4,4,5,6) Cosmo uses 'Teleportation' to switch

his rolls with Ant Mans (Cosmo = 1,4,4,5,6) (Ant Man = 1,2,3,5,6) Ant Man uses 'Armor' to convert his 1 into a 5 for Defense (Ant Man = 2,3,5D,5,6) Cosmo uses 'Mind Scan' to switch his 1 with Ant Man's 6 (Cosmo = 4,4,5,6,6) (Ant Man = 1,2,3,5D,5) Ant Man uses 'Energy Blast' to make a 5 a 10 for Attack only (Ant Man = 1,2,3,5D,10A) Cosmo uses 'Invisibility', turning Ant Man's 5 into a 2 (Ant Man = 1,2,2D,3,10A) Ant Man uses 'Shrinking' to turn his 1 into a 6 for Defense (Ant Man = 2,2D,3,6D,10A) Cosmo has no target for his 'Super Leap' power. Cosmo assigns a 6 to defense (Cosmo = 4,4,5,6D,6) Ant Man has no target for his 'Entangle' power.

Ant Man assigns his 3 to Attack (Ant Man = 2,2D,3A,6D,10A) Cosmo assigns his other 6 to defense (Cosmo = 4,4,5,6D,6D) Ant Man assigns his 2 to Attack (Ant Man = 2A,2D,3A,6D,10A) All of Ant Mans powers are used (if able) and all of his dice are assigned. Cosmo makes the rest of his Assignments since Ant Man is done. (Cosmo = 4A,4D,5A,6D,6D) Damage Phase = Ant Man has an Attack total of 15 & Defense Total of 8.

Cosmo Man has an Attack total of 9 & Defense Total of 16. Ant Man does no damage to Cosmo. Cosmo does 1 point of damage to Ant Man. Cosmo regenerates 2 points of damage if he has any from previous turns.

(Note- In this example players may not have made the best possible moves)

Super League

Introduction

Titanic Struggle between Rival Super Hero/Villain Teams.

Victory

You win if all Heroes/Minions of the opposing Team are neutralized. Neutralized = Defeated or Delayed

The Decks

There are 2 Common Decks: The Recruit Deck & the Action Deck.

Recruit Deck

This includes the following card types:

- Heroes (Villains)
- Minions
- Aids
- Plots
- Upgrades

Action Deck

This includes the following card types: Events Battle Action cards are immediately discarded after being used. Battle cards are used in Action Phase to modify Attacks. Event cards are used as described in their text.

Dice

Six sided dice are needed.

Aid Card & Upgrade Card Attachment Rules

Aid cards are attached to Heroes. Minions may not normally attach Aid cards. Only the Bad Guy player can attach Plot cards to his Heroes.

A single Hero can attach a maximum of: 1 Origin 1 Base 1 Reputation 1 Sidekick 1 Suit 1 Helmet 1 Pair of Boots 1 Vehicle 1 Plot Upgrade cards attach to Aid cards.

Cards In Play

Cards in play are placed face-up on the table in between the players. Unattached Cards in play will include Heroes & Minions. Aid cards in play must be attached (partially under) to a Hero card.

Upgrade cards in play must be attached (partially under) to an Aid card.

Team Limits

A Team can have a base maximum of 6 Heroes in it at a time. This includes Heroes with Delay and Damage Counters.

Setup

Players determine which player will be the Good guys, and which will be the Bad guys. The bad guy goes first. Shuffle the Recruit Deck.

Each player is dealt 10 Cards from the Recruit Deck. Players cannot attack on their first turn.

Turn Sequence

Players take Turns. The current player is referred to as the active player. Each turn has 6 Phases:

- Contacts Phase
- Recruit Phase
- Equip Phase
- Tactics Phase
- Action Phase
- Recovery Phase

Contacts Phase

Draw 2 Cards from the Recruit Deck and put them in your Recruit Hand.

Recruit Phase

Only the active player may put cards into play. You may put any number of Hero cards from your hand into play. The bad guy player can put any number of Minion cards from his hand into play.

Heroes under control of the Bad guy player are referred to as Villains.

Equip Phase

Only the active player may put cards into play. You may attach Aid cards from your hand to your Heroes. Each Hero may receive a maximum of 1 Aid card per turn.

Upgrade cards may be attached to Aid cards. Villains may attach Plot cards. Origin cards may only be attached to Heroes you put into play this turn.

Tactics Phase

Draw 2 Cards from the Action Deck and put them in your Action Hand. The Good Guy player may discard Plot, Plot Upgrade, & Minion cards from his hand.

For each Plot, Plot Upgrade, & Minion card discarded, he may draw 2 Action cards.

Action Phase

Each of your Heroes/Minions may attack once in this phase. A Hero/Minion with Delay Tokens cannot attack or be Attacked. The Attacker chooses the target Hero of the Attack.

The target player may intercept the attack with another hero/minion he has in play. The hero/minion receiving the Attack is known as the Defender. A single defending Hero/Minion may only intercept once per turn.

To attack compare the Total Force of the Attacker + 1D6 vs the Total Force of the Defender + 1D6. Battle cards are used to increase a target Heroes Force for a Single dice roll. Minions cannot normally use Battle cards.

If the attackers total is greater the target receives Damage Tokens equal to the difference. If a Hero has more Damage Markers than Force, he is discarded (defeated). All Aid cards attached to the defeated card are also discarded.

Attack Types

Most attacks are of the Damage Type (vs a single target) as described in Action Phase. (If unstated, consider an attack to be of the Damage type.) There are other types of attacks that do not cause Damage: Immobilization and Control A successful Immobilization attack results in 1D6 Delay Tokens being placed on the Target. A successful Control attack results in you taking control of the Target Hero.

If a Minion is 'controlled' by a Good Hero, it is destroyed (discarded). The Extra attack ability allows a second attack of whatever type the Hero normally makes. Some cards that allow an Extra attack will designate it as a Damage attack of a stated Force.

Area Affect Attacks are usually of the Damage Type (vs all targets) but can be of the Other types if the Hero has both Abilities (Area Affect and either Immobilization or Control)

Recovery Phase

Remove one Damage or Delay Tokens from each of your Heroes/Minions in Play. Max hand sizes = 7. Discard excess cards from your hands.

Excess Team Members are also discarded (discard newest ones first)

Recruit Deck Card List

Card Name:	Type	Force	Traits	Notes (Special Ability):
Doctor Metropolis	H	4	G	Certifiable: Genius
Johnny Atlas	H	5	S	Greco Roman Wrestling: Immobilize

Recruit Deck Card List Type Notation

Kick	B	Y	Attacker gets Force +2

Super Man

Introduction

Card game for 2 or more players. Each player takes on the role of Superman on a similar but alternate parallel Earth. Players compete to see who captures the most powerful villains.

Disclaimer

Superman is a licensed, copyrighted property. This merely a fan site.

The Deck

Players share a common deck.

End Of Game

The game ends the end of the turn the last card is drawn from the deck.

Winning

At the end of the game, the winner is the player with the highest total point value of cards in his Prisoner pile.

Turn Sequence

Players take turns. Each turn has 2 phases: Action Phase Capture Phase

Action Phase

Draw 1 card from the top of the deck or anywhere from the common discard pile. Discard (any cards) down to a seven card hand.

Capture Phase

You may capture a Villain. To do this: Play a Villain card from your hand. Played cards are placed face up

on the table in front of you. Play up to two Weapon cards with the Villain.

Play up to one Plot card with the Villain Note that each of these cards has a Point value. Add up the total Villain Point value. Next play up to one Superman card if you have one.

Next play any number of Power, Ally, and Equipment cards with Superman. Note that each of these cards has a Point value. The total Superman point value must exceed the total Villain point value.

Next, Opponents may play from their hands Plot & Weapon cards with the Villain. A Villain may have a maximum of 2 Weapon cards and 1 plot card attached. After this, the current player may play from his hand additional Power, Ally, and Equipment cards with Superman.

If the total Superman point value still exceeds the total Villain point value, the Villain is captured. The player places the Captured Villain and all cards played with the Villain in his Prison Pile. If the total Superman point value does not exceed the total Villain point value, the Villain escapes.

If the Villain escapes, place the Villain and all cards played with the Villain in the common discard pile. Place all played Superman, Power, Ally, and Equipment cards into the common discard.

Card Type Notation

- S** Superman
- P** Power
- E** Equipment
- A** Ally (Friends & Locations)

-
- V** Villain
 - O** Plot (Plan, Peril)
 - W** Weapon (Villain Powers, Minions & Superman Weaknesses)

Superhero Slugfest Gaming

Superhero Slugfest

Design your own superhero team and pulverize your opponent.

Introduction

Smash! Blam! Pow! Quick & dirty tactical rules for Superhero combat

Materials

Use a hex map with large spaces Use miniatures or action figures with props D6 & D10 needed

Traits

Heroes have the following Basic Trait values Attack = 1 Damage = 1 Defend = 1

Hits 10

Speed = 1 Range = 1 (HTH range)

Hero Generation

For each Hero roll 10 times on the Superhero Powers Table

Superhero Powers Table

D10	POWER	NOTES
1	Attack +1	Trait; Added to attack roll
2	Damage +1	Trait; Each level inflicts 1D6 Hits worth of
	-	Damage
3	Defend +1	Trait; Subtracted from opponents attack rolls
4	Hits +10	Trait; At 0 the hero is unconscious
5	Speed +1	Trait; Spaces moved per turn
6	Range +1	Trait; Range of Attack
7	Flying	Special Ability; Vertical + Horizontal movement
8	Split Attacks	Special Ability; Each level of the Damage trait
	-	is its own separate attack
9	Power Point	Determine the source of the power point
10	Special Ability	Roll on Random Special Ability Table

Random Special Ability Table

D100	POWER	NOTES
01-05	Stealth	Hide(as action) on roll of 1-3 on D6. Cannot be
	-	attacked unless detected Surprise attack is at +3 to
	-	hit on the first turn
	-	Also: Invisibility, Darkness, Camouflage
06-10	Knockdown	If attack hits, target cannot attack or move on a roll
	-	of 1-4 on D6 on his next turn.
	-	Knockdowned units are moved back one space and are +1
	-	to be hit.
11-15	Regeneration	Recover 1D3 Hits per turn
16-20	Distraction	Target(s) loses his next move and action on a roll of
	-	1-4 on D6. Distracted unit is +1 to be hit. Range =
	-	the space the attacking character is occupying;
	-	everyone else adjacent to that space is potentially

D100	POWER	NOTES
-	-	affected. Also: Flash, Illusions
21-25	Domination	Roll 1D6:
*1-2	Animal Control	On a roll of 1-4 on a D6 the character can control any
-	-	one mammal, reptile, or bird within range.
-	-	As an action, on a roll of 1-5 on a D6 the control can
-	-	be sustained in the following turn(s). Range=2
*3-4	Mind Control	Special attack: Control target human or humanoid on a
-	-	roll of 1-2 on D6. As an action roll 1-3 on D6 to
-	-	maintain control on following rounds. Range =2
-	-	Also: Charm, Possession
*5-6	Plant Control	On a roll of 1-4 on a D6 the character can control the
-	-	bushes and/or trees of the target space; any one within
-	-	this area must immediately (and for each successive
-	-	turn that control is maintained) roll as if one was
-	-	affected by "Knockdown". As an action, on a roll of
-	-	1-5 on a D6 the control can be sustained in the
-	-	following turn(s). Range=2
26-30	Immunity	Hero defends at +6 vs a specific type of attack such a
-	-	energy, fire, spells, bullets, etc.
-	-	Also: Absorption, Resistance
31-35	Shapeshifting	As action Move 3 points between Speed, Damage, Attack,
-	-	& Defend. This lasts until next transformation.
-	-	Also: Multiform
36-40	Weaken	If attack hits, target loses one point from (Roll D6):
-	-	1-2 = Speed, 3-4 =Attack, & 5-6 = Defend until end of
-	-	battle. Also: Drain, poison, disease, demoralize, age
41-45	Immobilize	Special attack: Target cannot attack or move on a roll
-	-	of 1-3 on D6 on his next turn. Immobilization can be
-	-	maintained (as an action) if on D6 the roll is greater
-	-	the captives Attack. Attacks against captives are at
-	-	+3. The capturer can automatically inflict 1D6 Damage
-	-	on a held captive each turn after the first. Range =1
-	-	Also: Paralyze, Petrify, Entangle, Mind trap, Encase
46-50	Healing	As action, adjacent target heals 1D3 Hits.
51-55	Senses	Detect on 1-5 on D6 hidden unit within 3 spaces.
-	-	Also: Precognition, Heightened senses, 6th sense,
-	-	X-ray vision
56-60	Lucky	Each turn cause one diceroll to be rerolled.
61-65	Read Minds	Team gets +1 on Initiative rolls; Detect on 1-3 on D6
-	-	hidden unit within 3 space. A character can establish
-	-	silent communication with any friendly character within
-	-	range. Also: Telepathy, mind probe
66-70	Teleport	As an action move to any empty space on the map.
-	-	Also: FTL travel, Dimension hopping
71-75	Transform	Special attack: Target on a roll of 1-2 on D6 becomes
-	-	harmless for 1D6 turns. Range =2
-	-	Also: Turn into frog, Sleep, Blind, Confusion.
76-80	Reflect	On a roll of 1-2 on D6 a missed attack is reflected
-	-	back to its source.
81-85	Suppress	Special attack: On a roll of 1-3 on D6 Target cannot
-	-	use power points this turn. Also: Dispell. Range =3
86-90	Dematerialize	Unit cannot attack or be attacked by physical attacks.
-	-	Automatically hidden, Pass through walls.

D100	POWER	NOTES
-		Also: Desolidification, Astral Travel.
91-95	Size Change	Shrink: Gain Stealth and Attack and Damage = 0.
-		A diminutive character can still use
-		Special Attacks as well as Distraction and Fear.
-		Grow: Defense -X and Damage +X; X can be up to 4
96-00	Fear	Special attack: Target on a roll of 1-4 on D6 must run
-		away & cannot attack on its next turn.
-		If attack unsuccessful target becomes immune to this
-		attack this battle. Range =3

Power Points

A hero with a power point can generate 1D6 effects per game day. Power points are extremely versatile and can be used for almost anything. Power points can be used to imitate any special ability or to increase a trait by +1.

A power point can be used to give another unit a second power point (Range =2). They can be used to change the source of an attack or defense the same unit is making. Effects can last up to one turn or more if the character is not engaged in combat.

Sources Of Power Points

Power points represent a body of knowledge and resources that can have a variety of uses. A source describes where these resources come from. Pick one of these if the Hero has a power point.

Sources of Power points include: Gadgets, Scientist, Magician, Mechanic, Spirits, Engineer, Alien Technology, Psionics, Sorcery, Demonics, Biomystic Energies, Divine powers, Mutations, Robotics, Chakras, Necromantic Secrets, Voodoo, Witchcraft, Cybernetics, Dream Realities, Plant Life, Nature, Sorcery, Gravity control Players may wish to limit the types of effects produced by the power point, depending on the source

Sources Of Attacks

A Unit may have several sources: Punch, Kick, Strength, Grapple, Fire, Ice, Lightning, Sonic, Water, Wave, Thunder, Heat, Positive Energy, Negative Energy, Light, Cold, Steam, Shadow, Gravity, Radiation, Wind, Electrical, Particle, Explosive, Stellar, Dehydration, Fear, Telekinetic, Disintegration, Molecular Disruption, Psychic, Martial Arts, Arrow, Blade, Crushing, Strangulation, Web, Acid, Spines, Bite, Claws, Decay, Disease, Constriction, Weapon, Projectile, Ballistic, Spirit, Mystic, Psionic, etc.

Sources Of Defense

Armor, Force Field, Shield, Dodge, Absorption, Toughness, Metal, Carapace, Exoskeleton, Quick, Luck, etc.

Combat Turn Sequence

- 1. Determine Initiative

- 2. Movement Phase
- 3. Attack Phase
- 4. Action Phase

Determine Initiative

Roll high on D10 to determine the order in which teams take rest of their turns (Steps 2-4). The winner moves, attacks, and takes his actions first, then the next player may go. Turns in game time are 5 seconds long.

Movement Phase

Move your heroes on the map a number of spaces up to their Speed Trait. Characters can attempt to detect hidden characters either before or after their movement. Units detect hidden units within 3 spaces on a roll of 1-2 on D6.

The density of the occupation of a space is dependent upon its representative size, e.g., a space. representing five square feet can hold up to two characters on foot and one airborne character; a space representing ten square feet can hold up to four characters on foot and two airborne ones, etc.

Attack Phase

Attacker picks a target and rolls 1D10. The target must be in range. Units in adjacent hexes (Range = 1) are considered to be in HTH range.

The attacker adds their Attack trait and the defender subtracts their Defend trait. On a roll of 6+ the attack hits. Roll a number of D6 equal to the attackers Damage Trait to determine the number of hits the defender loses.

A Defender reduced to half his hits is wounded. A Defender reduced to 0 or less hits is unconscious. A Defender reduced to -5 or less hits is killed.

Wounded characters at the beginning of their first movement phase during every subsequent turn (unless they have been rendered unconscious or killed) must roll on the "Weakened" subtable of the "Random Special Ability Table", furthermore, wounded characters can only move during the action phase.

Action Phase

Heroes that did not attack may do some other activity. They may move a second time.

Superhero Teams

A typical team will have four members and a theme.

Nippon Alliance

Samurai 'Sokitome' Sam

- Attack = 4 (Katana)
- Damage = 3
- Range = 1 Split Attacks
- Defend = 3 (Ancestral Armor)
- Hits = 30
- Speed = 1

Ninja Number Nine

- Attack = 3 (Ninja weapons)
- Damage = 2
- Range = 2 (Throwing stars) Split Attacks
- Defend = 4
- Hits = 10
- Speed = 2 Stealth

Wu Jen Wily

- Attack = 3 (Lightning Blasts)
- Damage = 2
- Range = 4 Split Attacks
- Defend = 1
- Hits = 10
- Speed = 2 Flying (Levitates cross legged)

Power point (Magician)

- Two Ton Sumo
- Attack = 3 (Sumo Shove)
- Damage = 3
- Range = 1
- Defend = 3
- Hits = 40
- Speed = 1 Knockdown Attack

Evil Unlimited Inc

Doctor Mandrake

- Attack = 2 (Force Beams)
- Damage = 1
- Range = 3
- Defend = 3 (Force Field)
- Hits = 20
- Speed = 3 Flying (Chrome Antigravity Chair with Fins)
- Power point (Scientist)
- Roboticus
- Attack = 2 (Lasers or Claws)
- Damage = 3
- Range = 2
- Defend = 4 (Metal Frame)
- Hits = 40
- Speed = 1

Cyber Chick

- Attack = 3 (Machine Pistols)
- Damage = 2
- Range = 2 Split Attack
- Defend = 2
- Hits = 10
- Speed = 3 (Motorcycle)
- Power point (Mechanic), Distraction

Brain Child

- Attack = 3 (Telekinetics)
- Damage = 2
- Range = 3
- Defend = 2
- Hits = 10
- Speed = 2
- Flying, Power point (Psionics), Mind Control, Senses

Good Guys R' Us

Captain Kiddo

- Attack = 4 (Fists or throw shield)
- Damage = 2
- Range = 2
- Defend = 4 (Shield)
- Hits = 20
- Speed = 2 (Acrobatic Leaps)

Brick Shithouse

- Attack = 3 (Pummel)
- Damage = 3
- Range = 2 (Throw small cars)
- Defend = 3 (Brick Exterior)
- Hits = 40
- Speed = 1

Speedball

- Attack = 3 (Fist Flurry)
- Damage = 2
- Range = 1
- Defend = 4
- Hits = 10
- Speed = 5 (Running)

Sweet Multiplicity

- Attack = 3
- Damage = 3
- Range = 1
- Defend = 3
- Hits = 30
- Speed = 2 (Project duplicates) Distract

Freaky Four

- Battle Fetus
- Attack = 3 (High Tech Weapons)
- Damage = 3
- Range = 3 (Minimissiles)
- Defend = 3 (Metal Exoskeleton)
- Hits = 30
- Speed = 1

Poison Oak

- Attack = 3 (Tendrils)
- Damage = 3
- Range = 1
- Defend = 3 (Bark)
- Hits = 30
- Speed = 1
- Power Point (Plants), Immobilization (Roots)

Cloak

- Attack = 3 (Knives)
- Damage = 3

- Range = 2 (Thrown knives)
 - Defend = 3 (Shadows)
 - Hits = 20
 - Speed = 2 Stealth
- Arachnid
- Attack = 4 (Spider senses)
 - Damage = 1
 - Range = 2
 - Defend = 4 (Reflexes)
 - Hits = 10
 - Speed = 3 (Web swinging)
 - Immobilization (Web)

The Law Team

Mr Right

- Attack = 3
- Damage = 3
- Range = 2
- Defend = 2
- Hits = 20(Always do the right thing)
- Speed = 3
- Flying

Techno Knight

- Attack = 3 (Energy Sword)
- Damage = 4
- Range = 1
- Defend = 3 (Power Armor)
- Hits = 30
- Speed = 2 (Mechanical Horse)

Ranger Rick

- Attack = 5 (Arrows)
- Damage = 4
- Range = 3 Split Attack
- Defend = 1
- Hits = 10(Protector of small furry animals)
- Speed = 1

Girl Power

- Attack = 4 (Bitchslap)
- Damage = 3
- Range = 1
- Defend = 2
- Hits = 20(You go Girl!)
- Speed = 2Flying
- Power Point (Girl Power)

Masters Of Mayhem

The Dentist

- Attack = 3 (Drills)
- Damage = 5
- Range = 1
- Defend = 2
- Hits = 20(Spit please)
- Speed = 1
- Fear, Weakness (Novocaine)

Sewage

- Attack = 3 (Raw Sewage)
- Damage = 2
- Range = 2
- Defend = 3

- Hits = 20
- Speed = 1
- Stealth, Weakness (Smell), Regeneration

Beastiality

- Attack = 4 (Claws)
- Damage = 4
- Range = 1
- Defend = 2
- Hits = 20
- Speed = 2Senses

Zippy the Evil Clown

- Attack = 4 (Juggling Balls)
- Damage = 2
- Range = 2
- Defend = 3
- Hits = 10
- Speed = 2 (Unicycle)
- Distraction (taunts), Lucky

The Caped Crusaders

Latex Man

- Attack = 2 (Slap)
- Damage = 2
- Range = 4 (Stretch)
- Defend = 3 (Flexibility)
- Hits = 20 (Elasticity)
- Speed = 3 (Springiness)

Supra Man

- Attack = 3 (Punch)
- Damage = 3
- Range = 1
- Defend = 3 (Puffed Chest)
- Hits = 30
- Speed = 2Flying

Dough Boy Attack = 3 (Smack)

- Damage = 3
- Range = 1
- Defend = 3 (Cushioned)
- Hits = 40
- Speed = 1

Flame Fatale

- Attack = 3 (Fireball)
- Damage = 4
- Range = 2
- Defend = 2
- Hits = 10
- Speed = 2Flying
- Immunity (Fire, Heat)

Los Americanos

Cupachobra

- Attack = 3 (Claws)
- Damage = 3
- Range = 1
- Defend = 3
- Hits = 20
- Speed = 2
- Stealth, Fear

Zorbo

- Attack = 5 (Fencing sword)
 - Damage = 4
 - Range = 1
 - Defend = 4
 - Hits = 10
 - Speed = 1
- El Gigantico
- Attack = 3 (Mangle)
 - Damage = 3
 - Range = 1
 - Defend = 3
 - Hits = 40
 - Speed = 1
 - Immobilize (Wrestling)
- Quezquotal
- Attack = 1 (Sacrificial Knife)
 - Damage = 2
 - Range = 1
 - Defend = 3
 - Hits = 10
 - Speed = 3Flying
 - Power Point (Inca Magic), Shapeshift, Read Minds, Healing

The Four Faces Of Death

- Purpleous Dinosaurous
- Attack = 3 (Theme song)
 - Damage = 4
 - Range = 1
 - Defend = 3
 - Hits = 30
 - Speed = 2
- Road Hog
- Attack = 3 (Shotguns & Grenades)
 - Damage = 2
 - Range = 2
 - Defend = 3 (Thick Hide)
 - Hits = 30 Split Attacks
 - Speed = 2 (Motorcycle)
- Gamma Ray
- Attack = 3 (Gamma Rays)
 - Damage = 3
 - Range = 3
 - Defend = 2
 - Hits = 10
 - Speed = 3Flying
- Ankhst
- Attack = 2 (Death Grip)
 - Damage = 3
 - Range = 1
 - Defend = 2
 - Hits = 30
 - Speed = 1
 - Weakness (Mummy's Curse), Fear, Regeneration
 - Power Point (Egyptian Magic)

The Defenders

- Iron Fist
- Attack = 2 (Punch)

- Damage = 3
 - Range = 1
 - Defend = 3 (Iron Armor)
 - Hits = 30
 - Speed = 2
 - Flying (Rocket Boots)
 - Power Point (Suit Options)
- Doctor Fantastic
- Attack = 2 (Plasma Projector)
 - Damage = 3
 - Range = 3
 - Defend = 2
 - Hits = 10
 - Speed = 3
 - Flying (Antigravity Disk)
 - Power Point (Weird Science)
- Super Agent X
- Attack = 3 (Guns)
 - Damage = 3
 - Range = 2
 - Defend = 3
 - Hits = 10
 - Speed = 1
 - Stealth, Split Attacks
 - Power Point (Spy Gadgets)
- Icicle
- Attack = 3 (Ice Shards)
 - Damage = 2
 - Range = 2
 - Defend = 3
 - Hits = 20
 - Speed = 2Flying
 - Immobilization (Intense Cold)

The Offenders

- King Cobra
- Attack = 4 (Cobra Strike)
 - Damage = 2 (Fangs)
 - Range = 1
 - Defend = 3
 - Hits = 20
 - Speed = 2
 - Weakness (Venom), Immobilize (Tail Constriction)
- Deadeye
- Attack = 5 (Sixshooters)
 - Damage = 3
 - Range = 2
 - Defend = 1
 - Hits = 20
 - Speed = 1
 - Split Attacks, Regeneration (undead cowboy)
- Mr Humungous
- Attack = 2
 - Damage = 3
 - Range = 1
 - Defend = 3
 - Hits = 40
 - Speed = 1
 - Knockback, Immunity (Immobilization Attacks)
- Super Fly

- Attack = 1 (Proboscis)
- Damage = 2
- Range = 1
- Defend = 5 (Shoe Fly)
- Hits = 10
- Speed = 4
- Flying (& walks on Ceilings)
- Weakness (Disease)

Extras

Thugs, Police

- Attack = 1 (Guns)
- Damage = 1
- Range = 2
- Defend = 1
- Hits = 10
- Speed = 2 (cars)

Terrorists, Mercenaries

- Attack = 2 (Guns)
- Damage = 2
- Range = 2
- Defend = 1
- Hits = 10
- Speed = 2 (cars)

Soldiers

- Attack = 2 (Military weapons)
- Damage = 2
- Range = 3
- Defend = 1
- Hits = 10
- Speed = 2 (Vehicles)

Tank

- Attack = 2
- Damage = 4
- Range = 4
- Defend = 3
- Hits = 30
- Speed = 2

Robot Guards

- Attack = 2 (Beam weapons)
- Damage = 2
- Range = 2
- Defend = 2 (Armor)
- Hits = 20
- Speed = 1

Kung Fu Guards

- Attack = 2 (Martial Arts weapons)
- Damage = 1
- Range = 1
- Defend = 2
- Hits = 10
- Speed = 1

Martians

- Attack = 2 (Heat Rays)
- Damage = 3
- Range = 2
- Defend = 3 (Force fields)
- Hits = 10
- Speed = 3 (Flying Saucers)

Squid Men

- Attack = 1 (Claws)
- Damage = 1
- Range = 1
- Defend = 1
- Hits = 10
- Speed = 1
- Breathe underwater, Stealth

Civilians

- Attack = -3
- Damage = 1 (-3 to roll)
- Range = 1
- Defend = 1
- Hits = 5
- Speed = 2 (Vehicles)

Scenario Objectives

The basic scenario: Each side picks or creates a team and they proceed to beat each other to a pulp. Location: Downtown area. Props: Cars, Police, shoppers, street signs, clothes lines, power lines.

Variations

Add more special powers. Super Duper Heroes: Make Heroes with more than 10 rolls on the power table.

Superhero Slugfest Rpg Expansion Rules The Ultimate Edition

Wherewithal

Add thusly this new Trait to the list: "Wherewithal=1. Wherewithal represents such traditional characteristics and proficiencies such as intuition, intelligence, experience, education, talents, and skills. If a player chooses to use "The Deliberate Creation Rule", he or she may raise the level(s) of Wherewithal by applying one or more Construction Points to that end. However, if one prefers the original generation method, merely implement the following amendment: if the player has rolled an 8 on the "Superhero Powers Table", then he or she rolls their 1D10 again-on a 1-5 the character is assigned a "Split Attack", and on a 6-10 the character's Wherewithal is increased by one. For every level the player rolls a 1D6, the sum reveals the number of Wherewithal Points that can be expended on behalf of the character during one 'game day'. Whenever, in the course of a 'game day', the player describes to the G.M. an unusual or toilsome goal that they want their character to attain, or the Game Master decides to challenge a character with an extraordinary or daunting task (such as hitting a grand slam, pulling a plane out of a tail-spin, or performing brain surgery with cutlery) the following procedure is undertaken. The G.M. assigns a number between 1-10, this simulates the intensity of the difficulty incumbent upon the character to overcome-be fair! Then the player spends as many Wherewithal Points as he or she wishes to and can consume (other players, with the Game Master's

consent, may contribute their own Wherewithal Points to the primary player's attempt). Lastly, the player rolls a 1D10, adding the W.P. previously expended and subtracting the G.M.'s complication factor. On a result of 6+ the endeavor succeeds. In the case of exceptionally trying, hazardous, or complex tasks, the Game Master may require multiple successes.

Hero Generation

Add this sentence: "For all characters (henceforth, unless otherwise specified, this term always refers to both player and non-player characters) double their Speed Trait and triple the range of ordinary and special attacks (except for, and any specific attacks involving, the detection of hidden characters)." "Oh, if only I had another roll...." or, "Can't I have just one more Construction Point?" Because I feel your pain do the following. Reduce the Basic Trait Value of "Range" for your beginning character from 1 to 0-this is how one acquires that extra roll or C.P.; this option must be exercised before the character creation process. If a player rolls a 6 on the "Superhero Powers Table", it is ignored and rerolled, nor can this Trait be increased by the expenditure of a Construction Point. Any ranged attack, i.e., a strike attempted against a target that is located in a space beyond the one the attacking character is occupying, is made a -3.

The Deliberate Creation Rule

In order to produce a prepared character, players may avail themselves of this simple generation method. A player is given 10 Construction Points with which to buy their character's Powers and/or Special Abilities. Each improvement of a Trait or the acquisition of a Power or Special Ability usually costs one C.P.

Range

Add this sentence: "All hand-to-hand combat must occur in the same space."

Flying

Add the following subtable:

1d6

1-2 Flying: As previously written, but add the following to the first sentence: "...and/or vertical and horizontal movement." 3-4 Super-Leaping: The character can safely leap horizontally and/or vertically a number of spaces, in any combination of length and height, up to the value of their Speed Trait; the leaper cannot remain airborne at the end of a Movement Phase. This is how a character uses their super-leap offensively: the Attack value of a missile drop-kick is always 1 (the character is moving ballistically, the target is endeavoring to dodge, etc.). If the strike is successful, for every space, horizontal and/or vertical, which the leaper has traversed or entered the attacker rolls 1D6

in order to determine the damage (1-2-3=1; 4-5-6=2 Hits) inflicted on the defender; furthermore, on his or her next turn, the target automatically suffers from all the adverse effects of being 'knocked-down'. The impact also causes-again, only if the assault succeeded-1 to 3 (1-2=1; 3-4=2; 5-6=3) points of injury upon the assailant who, additionally, has to roll on the "Knock-down" table to see if they are afflicted by all of the provisions of this entry. Remember, all this occurs during a Movement Phase and does not necessarily deny (see the preceding sentence) the leaper the opportunity to conduct a regular attack. 5-6 Adhesion: The character can, without falling or sinking, move over any surface horizontally and/or vertically, a number of spaces up to the value of their Speed Trait.

Stealth

Add this sentence: Use these rules for ambushes, night-fighting, and for combat in built-up areas."

Substitution

11-15 Super-Salubrity

1d6

1-2 Enhanced Reaction: +3 to a character's Initiative roll. 3-4 Regeneration: As previously written. 5-6 Ruggedness: The character is able to ignore the consequences of being wounded; if rolled or chosen again, the character does not become unconscious because of their injuries. Also: Self-Discipline.

Distraction

Replace the word "Target" with the word "Target(s)". Add this sentence: "Range=the space the attacking character is occupying; everyone else in that space is potentially affected." After the word "Illusion" add the phrase "Holographic Doppelganger", and the word "Vertigo".

21-25 Domination

1d6

1-2 Animal Control: On a roll of 1-4 the character can control any one mammal, reptile, or bird within range. As an action, on a roll of 1-5 on a 1D6 the control can be sustained in the following turn(s). Range=2. 3-4 Mind Control: As previously written, although replace the word "target" with the phrase "human or humanoid". 5-6 Plant Control: On a roll of 1-4 on 1D6 the character can manipulate bushes and/or trees in the target space; anyone within this area must immediately (and for each successive turn that control is maintained and the victim is unable to leave the space) roll as if one was affected by being 'knocked-down'. As an action, on a roll of 1-5 on 1D6 the control can be sustained in the following turn(s). Range=2.

Immunity

A clarification: When a player rolls or purchases this Special Ability, he or she chooses a category given in the "Sources of Attacks" section; their character is given a +6 against all of the attack forms listed therein. This Special Ability cannot be gained more than three times.

Weaken

Substitution: 1-2 Speed. The first time the character's Speed Trait is reduced he or she is unable to move during the first Movement Phase. If thus again 'weakened', the victim cannot move during the second Movement Phase, and insofar as their Speed is concerned, they are inert for the remainder of the battle. Thereafter, the target loses one point from their Attack Trait on a 1-3, and one point from their Defend Trait on 4-6.

Transference

If the player chooses, or by rolling, acquires the Special Ability "Weaken", he or she may upgrade it to this new Special Ability. (the improvement costs an extra Construction Point or an additional dice roll opportunity). When someone is 'weakened' that depleted Trait point is 'transferred' to the corresponding Trait category of the character who inflicted the depletion. All the stolen points evaporate at the end of the battle.

Immobilize

After the phrase "Mind Trap" add the phrase "Intensify Gravity" and the word "Encase".

Read Minds

Add the following to the first sentence: "...; a character can establish silent communication with any friendly character(s) within range."

Suppress

In the first sentence, the word "turn" is substituted for the word "battle".

Dematerialization

After the word "Desolidification" add the phrase "Astral Travel".

Size Change Shrink

Add this sentence: "A diminutive character can still use Special Attacks as well as "Distraction".

Fear

Add the following to the second sentence: "...for the remainder of this battle."

Power Points

In the first sentence, the phrase "game day" is substituted for the word "battle". Like Wherewithal, Power Points are recovered 'overnight'. In the last sentence, the word "character" is substituted for the word "team". Optionally, after the last sentence, add the following: "A new Power Point does not need to be expended in order to perpetuate a potentially continuing effect unless that Special Ability is allowed to lapse or it has failed to be sustained by a successful roll.

Sources Of Attacks

Add the following: "I've classified the preceding sources of attacks into the subsequent categories (Game Masters may, of course, 'reassign these passengers to different cabins')".

Biological: Dehydration, Decay, Disease. Electromagnetic: Lightning, Gravity, Electrical, Telekinetic. Exotic: Water, Wave, Positive Energy, Negative Energy, Shadow, Disintegration, Molecular Disruption, Web, Acid. Kinetic/Concussive: Punch, Kick, Strength, Grapple, Ice (shards), Sonic, Thunder, Wind, Explosive, Martial Arts, Arrow, Blade, Crushing, Strangulation, Spines, Bite, Claws, Constriction, Projectile, Ballistic. Mental: Fear, Psychic, Psionic. Radiant: Fire, Ice (encasement), Heat, Light, Cold, Steam, Radiation, Particle, Stellar.

Supernatural: Spirit, Mystic.

Determine Initiative

In the first sentence, the word "character" is substituted for the word "team". Thus each character, independently of their team, rolls for their own Initiative, and then performs his or her Movement, Attack, and Action Phases. In the case of ties, the character with the highest Speed Trait goes first.

Movement Phase

The following clarifies the second sentence: "Characters can attempt to detect hidden characters either before or after their movement." The following replaces the third sentence: "The density of the occupation of a space is dependent upon its representative size, e.g., a space representing five square feet can hold up to two characters on foot and one airborne character; a space representing ten square feet can hold up to four characters on foot and to airborne ones, etc."

Attack Phase

The following refinements are added to the fifth sentence: "...; wounded characters at the beginning of their first Movement Phase during every subsequent turn (unless they have been rendered unconscious or killed) must roll on the "Weaken" table, furthermore, wounded characters can only move during the second Movement Phase."

Lions and Tigers and Bears, Oh My! Some Notes on Animal Attacks Insect swarms (wasps, fire ants,

etc.) do not have Traits, instead roll 1D6 times on the "Weaken" table to ascertain the effects of their stings or bites. Pack (dogs, lots of rats, etc.) assaults are more serious. The G.M. should compose a Trait template for the pack which is determined upon an aggregate basis. The pack uses the Special Attack "Immobilize".

Boas-the reptile, not the fashion accessory-as well as big lizards should be dealt with in the same way (except, of course, the template is crafted for just one creature). Jungle cats and such will also require their own individual Trait templates. If one of these beasts successfully attacks, the victim must roll to see if they are 'knocked-down'.

Swords & Sorcery Slugfest

by Michael Callahan, Asterisk@webtv.net

(Unless otherwise noted all of the revisions of and the optional rules SUPERHERO SLUGFEST will be used in this variant.)

Character Creation

In homage to and in conformity with the conventions of fantasy role-playing games, a player can personify either a warrior or a wizard. If one chooses to play a warrior, the player receives five Construction Points with which to build their character. (Before CP's are added, selections made, or dice rolled, player and non-player characters, and all monsters as well, start with the Basic Traits package and are the equivalent of zero-level beings. Each Construction Point increases the level by one-thus, beginning PC's enter the game at fifth level.) Players must apply four of these CP's to the improvement of their character's Traits. The last Point represents the power of a magical melee weapon (a boon, an heirloom, or perhaps 'acquired' by the character in a previous adventure). Roll once on the Random Special Ability Table to determine the nature of the weapon's power; other magical artifacts can be likewise generated. Player character wizards also receive five Construction Points-however, only one of these can be allotted to increasing the character's Traits, the others are used to buy Power Points. Next, the player determines their character's spell repertoire. For each Power Point, the player picks an ability from the Random Special Ability Table (to this end, "Flight" is substituted for "Knockdown"). Thus a beginning PC wizard can generate between 4-24 spell effects per 'game day'. Sorry, wizards cannot hoard and accumulate unexpended Power Points. No wizard can 'embody' more Power Points per day than their maximum storage permits. Unused PP's are carried over to the next day; otherwise, Power Point slots are 're-energized' if the wizard sleeps for at least six hours straight. PP's affixed to an artifact or weapon are recovered by the next encounter. Should the wizard endow someone with a Power Point, the recipient can only employ effects already known by the wizard who imbued that character.

So how does one cast a fireball or shockbolt? The mechanism has been provided by these two phrases from the Power Points section: "...increase a trait by +1.", and "Effects can last up to one turn...." An explanation by way of an example: Waldo the Wizard is having a bad day-it began, when just after dawn, he was accosted by a truculent troll (are there any other kind?). As a fifth level or beginning player character, he knows these four standard spell effects: Mind Control, Read Minds, Reflect, and Fear. During the first combat turn, discharging one Power Point, Waldo only gained one effect, and unfortunately (I told you it was one of those days), the troll is now immune to Fear. He refrained from attempting to mentally dominate his opponent because of the poor odds of success and that the troll's next attack could be decisive. Realizing that he needed to end this fight quickly, in the next turn, Waldo improvised a new offensive spell-The Blazing Beam of Troll Trouncing. Expending two of his three remaining Power Points, the player rolled a couple of six-siders and produced eight spell effects! Waldo has a factor of 1 in the relevant Traits of Attack, Range, and Damage. Since our wizard is already in melee the variable of Range is a moot issue. Understandably, he is fretful about overcoming the troll's impressive Defend Trait, and so four additives each are dedicated to the other component Traits (for a +5 Attack and Damage in this combat turn). Good luck, Waldo. As you can see, Waldo's Traits are not so much intrinsically changed or bettered, as for this purpose, used for a basis of measurement.

Let me use Waldo to address another topic (that Blazing Beam of Troll Trouncing must have worked after all). Waldo is gambling in a tavern. Waldo is a magic-user, he is not a card-shark, and if he doesn't win this pot he will be calling himself Waldo the Beggar. He spends one Power Point and generates four spell effects. Our less-than-sportsmanlike wizard then successfully deploys one of these effects as Mind Control to 'persuade' his opponent to fold. Scooping up his winnings Waldo quickly leaves town. The GM rules that the encounter is over and the left-over three spell effects have dissipated. Now if Waldo had wanted to play another hand, or if his victim's suspicious friends decided to detain Waldo before he could mount his horse, then the encounter is continuing (albeit, in a new phase), and the uncommitted spell effects (as well as any unreleased Power Points) would be available for Waldo's use.

Other Races And Classes

Instead of furnishing an encyclopedia of templates (the particulars of which I presume most Game Masters prefer to develop for themselves), I shall withdraw from my stockpile two examples which GM's can use as guidelines for creating their own augmentations or additions to the basic options of the human warrior or wizard (in order to sustain the appeal of these primary stereotypes, in contrast to their exotic or specialized alternatives, I have tried to implement a principle of

balance: for every 'advantage' there is a roughly comparable 'disadvantage'). Dwarf: +10 Hits, and roll twice on the Random Special Ability Table (re-roll duplication) to determine the magical melee weapon's powers; a Dwarf cannot be a wizard, and his Speed Trait can never be greater than 1 (otherwise as a warrior). Druid: Automatically possesses Animal and Plant Control as Special Abilities; but if the Druid attempts to enter a man-made enclosure, he or she must roll as if attacked by the Special Ability Fear.

Experience

For every opponent who is at least two levels higher than and is single-handedly vanquished (slain or rendered unconscious and captured) by a player character that PC is rewarded with one Construction Point and a +1 to their Wherewithal task resolution roll (or, if you will, advances a level). A PC warrior must devote their CP to the improvement of a Trait, however, a player character wizard may either increase the prowess of a Trait or buy an extra Power Point.

Monsters

To ascertain how dangerous a given monster is, the Game Master rolls 1D6: 1=a fifth level monster is encountered (i.e., the GM has five Construction Points with which to 'evolve' the Traits of and/or acquire Special Abilities-including "Flying", "Split Attacks", and Power Points-for the monster, creature, or entity; 2=sixth level; 3=seventh level, etc. If the GM's in a foul mood, he or she can roll more dice. With the available options, any entry from your favorite fantasy bestiary should be capable of being modeled.

Cannonfodder

Rabble (and perhaps goblins): use the Civilians statistics from the Extras section of SHSF (in this case, and those below, the Speed Trait, if above 1, represents horses and the Range Trait, if above 1, represents bows, javelins, slings, etc.) Outlaws or Militia: as Thugs and Police. Cultists, Criminal Enforcers, and Mercenaries: as Terrorists and Mercenaries. Soldiers: as Soldiers.

Elite Soldiers: as Kung Fu Guards.

Supercritter Slugfest

Introduction

This is a superhero slugfest expansion. Combat rules for cute animae mini monsters.

Materials

Use a hex map with large spaces Use miniatures or action figures with props D6 & D10 needed

Traits

Critters have the following Basic Trait values

- Attack = 1
- Damage = 1
- Defend = 1
- Hits = 10
- Speed = 1
- Range = 1 (HTH range)

Critter Generation

For each critter roll 10 times on the Superhero Powers Table on the main Superhero Slugfest rules page.

Combat Rules & Turn Sequence

Same as in Superhero Slugfest.

Critter Teams

A typical team will have four critters and a theme.

Rascally Rabbits

Bazooka Bunny

- Attack = 2
- Damage = 5 (High Explosive Rockets)
- Range = 6 (Bazooka)
- Defend = 1
- Hits = 10
- Speed = 1

Harvey the Hare (Pookah)

- Attack = 2
- Damage = 2
- Range = 1
- Defend = 3
- Hits = 30
- Speed = 3
- Stealth (Invisibility)
- Lucky

Thumper

- Attack = 3
- Damage = 4 (Kicks are for Kids)
- Range = 1
- Defend = 3
- Hits = 10
- Speed = 2
- Split Attacks
- Knockdown

Bugsy Rabbit

- Attack = 2
- Damage = 1
- Range = 1
- Defend = 4
- Hits = 20
- Speed = 4 (Jack Rabbit)
- Power Point (Style)
- Distraction

The Monsters In My Pants

Peekaboo the Lightning Critter

- Attack = 3
- Damage = 2 (Electrical Discharge)
- Range = 3
- Defend = 3
- Hits = 10
- Speed = 3
- Distraction (Shock)

Char Char the Little Dragon

- Attack = 2
- Damage = 3
- Range = 2 (Fire Breath)
- Defend = 2
- Hits = 30
- Speed = 3
- Flying

Sudsy Turtle

- Attack = 2
- Damage = 2
- Range = 1
- Defend = 3
- Hits = 60
- Speed = 1
- Distraction (Bubbles)

Fritz the Psychic Waterfowl

- Attack = 2
- Damage = 3
- Range = 3
- Defend = 2
- Hits = 10
- Speed = 3
- Flying
- Weaken (Psychic Blast)

Critter Incorporated

Good Bye Kitty

- Attack = 4
- Damage = 3
- Range = 1
- Defend = 3
- Hits = 10
- Speed = 3
- Weakness (Cat scratch Fever)

Pokey the Unicorn

- Attack = 3
- Damage = 3
- Range = 1
- Defend = 3
- Hits = 20
- Speed = 3
- Teleport

Daddy Longlegs

- Attack = 3
- Damage = 2
- Range = 1
- Defend = 4
- Hits = 20
- Speed = 2
- Entrapment (Web)

- Weakness (Poison)

Gum Boy

- Attack = 3
- Damage = 2
- Range = 2
- Defend = 3
- Hits = 30
- Speed = 2
- Regenerate

Evolution

Every time a critter defeats another, it gets a "win". After a certain number of wins the critter "evolves" and gets to roll on the Powers Table. Wins to next evolution: 1, 3, 6, 10, 15, 21...

Basic Scenario Objectives

Each side picks or creates a team Combat may be one on one or a free for all. Match Locations: Critter Combat Arena, The Mall, School yard, etc.

Card Combat

Introduction

Like cards better than counters? Now you can have your Slugfest Action and a handful of cards too!

Decks

Each player gets one deck. A deck represents one Superhero team, all its members, and all of their special abilities. A Superhero team has 4 Members.

A deck has 40 cards. Each Member is represented by 10 cards: Five of these are Character cards. The five character cards all have the same title, the name of the superhero.

The other five are Ability cards. The five ability cards have different titles according to what each power or ability is. Ability cards should also have the name of the superhero they belong to.

Each card has a Force Value. The five character cards have Force values from 1 to 5. The five ability cards have Force values from 1 to 5.

Turn Sequence

Each turn has 5 phases:

- Power Up Phase
- Tactics Phase
- Attack Phase
- Slug Phase
- Knockout Phase

Power Up Phase

Each player draws 8 cards. If a players deck runs out, shuffle the discard pile and draw from it.

Tactics Phase

Players may discard up to 4 cards and draw replacements. For each Knocked out Character a player has, he may discard an additional card.

Attack Phase

Players reveal their hands. Hands are placed on the table face up.

Slug Phase

Each player determines the battle total for his hand. Add up the Force value of all your cards. Ability cards only count if you have at least one of the appropriate character cards.

For each Superhero, you can count only one of his or her character cards. Knocked out Heroes and their abilities do not count. Cards that do not count do not add to your Battle Total.

Knockout Phase

Compare the players Battle Totals. The player with the higher total wins. The loser has one of his Superheroes Knocked Out (KO).

The loser picks which of his superheroes gets KO. Cards of KO superheroes do not count in Slug Phase. KO superheroes remain knocked out for the rest of the game.

If the Battle Totals tie, no one gets KO.

Victory

You win if you KO all of your opponents Superheroes.

Card List Notation

Listed is the Team name, Superhero names, and the five abilities of each Superhero. The Abilities are listed in order of Force from highest(5) to lowest(1).

The first ability for a superhero listed has a force = 5, the next = 4, and so on.

Sample Superhero Team Card Lists

Nippon Alliance

Samurai 'Sokitome' Sam- Katana, Ancestral Armor, Super Kai, Much Honor, Wakizashi Ninja Number Nine- Ninja weapons, Mystic Martial Arts, Throwing stars, Num Chucks, Unseen Movements Wu Jen Wily- Lightning Blasts, Elemental Magic, Levitation, Spirit Magic, Alchemy Two Ton Sumo- Sumo Shove, Knockdown Attack, Squash you like a Bug, Heavyweight, Big Gut Attack

The Defenders

Iron Fist- Built in Weapons, Punch, Iron Armor, Rocket Boots, Suit Options, Doctor Fantastic- Plasma Projector, Break the Laws of Physics, Antigravity Disk, Weird Science, Reverse Inertia Field Super Agent X- Assassins Tools, Guns, Spy Gadgets, Combat Training, Plastic Explosives Icicle- Ice Shards, Freeze Attack, Ice Shield, Flying, Intense Cold

The Offenders

King Cobra- Cobra Strike, Fangs, Venom, Tail Constriction, Scales Deadeye- Sixshooters, Quick Draw, Undead Regeneration, Fanning the Hammer, Trick Shot Mr Humungous- Humungous, Really Big, Big & Ugly, Smack Down, Swat Attack Super Fly- Proboscis, Shoe Fly, Flying, Walk on Ceilings, Disease

Optional Rule - Comebacks

If your Superhero is KO and you play 3 Character cards of that Superhero in Slug Phase, the KO superhero gets up and is back in the fight.

Variants

Play with teams of more or less than 4 members.

Surviving The Gulag

by Marcus Salo

Introduction

Scenario for WarpQuest. for the [Warpquest Core Rules](#) WarpQuest Core Rules.

The year is 1947 and the player is an Estonian patriot and resistance fighter that has been caught by the russians and transported to Siberia to a brutal labor camp. The sentence is ten years of horrific conditions. The player has to survive the camp to return to the beloved Estonia.

In this variant there is only one module, the camp. The spaces represent time, not distance like in the original Artifact.

The Hero

Resistance Fighter, Kalle Loodus, 33 years of age, former corpral in the Estonian Army during the independence, fought in Finnish Army during the War of Continuation, after the war returned to the Soviets by Finnish communist traitors, escaped and fought as a "Forest Brother Guerilla Fighter" until caught and sent to labor camp in Siberia.

A man with nine lives, just like a cat.

Kalle Loodus has six skills, roll on the Skill List Table.

In this version there are no companions. Every time Kalle fails a challenge, he loses one life.

Skill List Table

1D10	Skill:	Value
1	Fighting	+1
2	Cunning	+1
3	Agility	+1
4	Survival	+1
5	Personality	+1

1D10	Skill:	Value
6	Toughness	+1
7	Spirit	+1
8	Stealth	+1
9-10	pick any skill	-

Card List

Name	Infos
-40F Temperature	Survival x 2
Strong Wind	Survival x 2
Ivan, Brutal Russian Guard	Toughness x 2
Russian Interrogators	Cunning x 2
Russian Prisoner Gang	Fighting x 2
Forced Labor	Toughness x 2
Food Storage Window Open	Stealth & Agility
	(if succesfull, eat your stomach full and advance 1d6 spaces forward)
Torture	Toughness & Spirit
Exhaustion	Spirit x 2
Desperation	Spirit x 2
Fellow Estonian Prisoner	No challenge, gain 1 Spirit
Armenian Prisoner that has two coats	Personality x 2
	(if succesfull, the Armenian sells you the other coat, gain 1 Survival)
Boris, Brutal Russian Guard	Toughness x 2
Diarrhea	Survival x 2
Hunger	Spirit x 2
New Prisoners	Personality x 2
	(if succesfull, you get news from home, gain 1 Spirit)
Storage Room Door Unlocked	Stealth & Agility

Name	Infos
	(If succesfull, you steal a new pair of pants, Survival +1)
Lithuanian Prisoner that works in the Kitchen	Personality x 2
	(if succesfull, eat your stomach full and advance 1d6 spaces)
Caught Stealing,	-
1 month in total isolation	Spirit x 2
Warm Summer Day	No Challenge, advance 1d6 spaces
Fever	Survival x 2
Vladimir, Brutal	-
Russian Guard	Toughness x 2
Work in a Coal Mine	Agility & Toughness
Deep Snow	Survival & Agility
Communist Propaganda Officer	Cunning x 2
	(if succesfull, you fool the communist
	and are released from labor for a week, advance 1d6)
Russian Doctor	Cunning x 2
	(if succesfull, you play sick and stay a
	week in a hospital, advance 1d6)
Exhaustion	Spirit x 2
Scurvy	Survival x 2
Desperation	Spirit x 2
Mad Guard Shooting	-
from the Guard Tower	Agility x 2
Russian Under Cover Informer	Cunning x 2
Kitchen Duty	Stealth x 2
	(if succesfull, eat your stomach full and advance 1d6 spaces)
Tuberculosis	Survival x 2
Finnish POW	No challenge
	(you have a nice long chat about the Russians. Gain 1 Spirt)

Swamp Fighters

Introduction

Wet Wargame for 2 or more players. Fantasy Swamp theme.

Victory

Destroy all enemy units.

Terrain Tile List

Type:	#	Cost	Notes:
Swamp	4	1	Wet, Trees
Marsh	4	1	Wet
Slough	4	2	Wet, Trees
Bog	4	2	Wet
Mud Hole	4	2	Wet, Treacherous
Bayou	4	1	Wet, Trees, Home
Sawgrass	4	2	Dry, Treacherous
Fen	4	1	Dry

Number of Tiles in Terrain Tile Set

Cost Cost in Move Points to enter

Dice, Chits, Cards & Tiles

Tiles are used to make the Map. Chits are used to represent Units. Each player has their own set of unit chits.

Cards are used to represent Spells. Six sided dice are needed to play.

Type:	#	Cost	Notes:
Hammock	4	1	Dry, Trees
Mangroves	4	2	Dry, Trees
Rocks	4	2	Dry
Mound	4	2	Dry, Home
Spawning Pool	4	2	Water, Home
Pond	4	1	Water
Sink Hole	4	2	Water
Root Water	4	2	Water, Trees

Setup

Players pick which race they want to control. Each race has its own set of Chits. Each Player starts with their Leader chit located in a Home Space.

Randomly determine who goes first.

The Map

Use a Chessboard (8 x 8). Randomly distribute the tiles to the 64 spaces.

Lizard Men Unit Chit List

Unit Name:	#	Force	Move	Hits	Notes:
Gecko	4	2	4	1	Shaman
Leaping Lizard	4	2	4	1	Jump
Chameleon	4	2	3	2	

Special Ability: All Lizard units have Dry & Tree

Races

Several races (& subspecies) live (and fight) in the swamp: Lizard Men Crab Men Bullywugs Snake Men Turtle Men

Crab Men Unit Chit List

Unit Name:	#	Force	Move	Hits	Notes:
Rock Lobster	4	3	2	2	Water
Jumbo Shrimp	4	2	2	1	Water
Hermit Crab	4	2	2	2	Shaman

Unit Name:	#	Force	Move	Hits	Notes:
Stone Crab	4	4	2	3	Dry
Horseshoe Crab	3	2	4	2	
King Crab	1	5	2	3	Leader

Special Ability: All Crab units have Shell

Bullywugs Unit Chit List

Unit Name:	#	Force	Move	Hits	Notes:
Tree Frog	4	2	4	1	Tree
Frog Man	4	2	3	1	Water
Bull Frog	4	3	3	3	Dry, Shaman
Horny Toad	4	3	3	2	Shell
Poison Dart Frog	4	4	4	1	Poison
Frog Prince	1	5	4	2	Leader

Special Ability: All Frog units have Jump

Snake Men Unit Chit List

Unit Name:	#	Force	Move	Hits	Notes:
Water Snake	4	2	4	1	Water
Tree Snake	4	2	3	1	Tree, Shaman
Grass Snake	4	2	4	1	Dry
Python	4	3	3	3	
Viper	3	4	4	2	
King Cobra	1	5	3	2	Leader

Special Ability: All Snake units have Poison

Turtle Men Unit Chit List

Unit Name:	#	Force	Move	Hits	Notes:
Snapper	4	3	2	2	Wet
Sea Turtle	4	2	2	2	Water
Tortoise	4	2	2	2	Dry, Shaman
Ninja Turtle	4	4	3	2	
Galapagos	3	3	2	3	
Mock Turtle	1	5	2	2	Leader

Special Ability: All Turtle units have Shell

Turn Sequence

Players take turns. Each turn has 5 phases: Recruit Phase Magic Phase Move Phase Battle Phase End Phase

Recruit Phase

Keep your Chits in a separate pile. Draw 1 Unit Chit from your unit pile per Home space you control. Put the unit into play on or adjacent to the Home space.

Adjacency Rule

Units or spaces must share a common border to be adjacent. Diagonal spaces and units are not adjacent.

Stacking Rule

You may stack up to 3 of your units in a single space. Discard excess units. The stacking limit must be strictly enforced.

Magic Phase

If you control any Shamans, draw 2 Spell cards. Max hand size is 5 cards. Discard excess cards.

Move Phase

Each unit has a number of Move Points (MP). Different Terrain types have different Move costs to enter. Wet Units pay 1/2 MP to enter Wet spaces Dry Units pay 1/2 MP to enter Dry spaces.

Water Units pay 1/2 MP to enter Water spaces. Tree Units pay 1/2 MP to enter Tree spaces You cannot enter or move through a space containing enemy units. Units with Jump can move over intervening stacks.

Units moving into Treacherous territory must end their move.

Battle Phase

You may attack adjacent enemy stacks with your own stacks. Resolve conflict between two opposing stacks, one at a time. A turn may have multiple battles between multiple stacks.

Battles are fought in Rounds. During each round, each unit in turn in both opposing stacks gets to attack once. Start with the Active player (Player whose turn it is) Pick which of your units is attacking and Roll 1D6.

If the roll is equal to or less than the attacking units Force, one Hit is inflicted. If there is a Hit, the defender decides which of his units is hit. Any unit reduced to zero hits is discarded.

The other player then attacks and so on. This repeats until one side is completely eliminated. A Shaman instead of attacking may cast a Spell.

A Wet, Dry, Tree, or Water unit attacking into or out of the appropriate terrain type has its Force increased by one.

Magic Spell Deck

Spell:	#	Notes:
Summon Kin	2	Draw a Unit Chit. It joins the Battle
Noxious Vapor	4	All enemy units get Force -1 this Battle
Mist	4	End Battle Immediately
Stuck in the Mud	4	Target Unit cannot attack this Battle
Poison Gland	4	Target Unit gets Poison Ability
Thick Skinned	4	Target Unit gets Shell Ability
Desiccate	4	Force 2 Attack vs all Enemy units this round
Hot Blooded	4	All your units get Force +1 this Battle
Regenerate	4	Put Unit just destroyed in Battle back into play
Mesmerize	2	Take control of target Non-Leader Unit

copies of this card in the deck.

Tile & Chit Sets

Really cute stuff by jiminybollocks <cathto@kooee.com.au> Check it out: [Click Here](#)

Commentary

By Jiminy Bollocks...

I use damage counters to mark which units have suffered hits, and I find that after the battle phase is over it is best to remove all damage counters. This

Poison

A unit hit by a poison unit must roll 1D6. On a roll of 1-2 the unit is killed.

Shell

If a Shell unit is hit, roll 1D6. On a roll of 1-2 the hit is ignored.

End Phase

Remove Summoned and Mesmerized Units from play.

speeds up the game and stops the playing area from getting cluttered.

If a leader is killed I just allow him to be recruited again as a unit, since there is no rule stating otherwise.

If all units on one side in a battle are affected by a Stuck in the Mud spell, I play that the affected side automatically loses, so as to speed up the game, because the result is inevitable due to the lack of any dispelling spells.

When I play, the summon kin and mesmerize spells allow a stack to break the usual stack limit. Since the affected units are discarded at the end phase, this doesn't upset the game too much.

Swarm

Introduction

2-4+ player board & card wargame. Each player controls an insect swarm.

Victory

There are 2 ways to Win:

1. Control all the Den spaces in play
2. Occupy the most spaces when the deck runs out.

The Board

Use a Hex grid. Each Hex (space) has a terrain type. Randomly distribute the following terrain types:

#	Name	Effect
1	Dirt	No effects
2	Grass	A swarm occupying this space gets Reproduction +1
3	Mound	Stacks in this space get Defense +1
4	Rocks	Stacks in this space get Attack +1
5	Water	Stacks may not enter or move through this space
6	Den	A stack in this space gets Stack +4
7	Mud	A stack entering this space must stop
8	Slope	A stack in this space gets Stack -1 (minimum 1)
9	Roots	Enemy Stacks in this space may be passed through
0	Sand	Any Stack that ends its turn here has 1 Bug killed

Auto Map Generator Available!!!

Great stuff Peter!

Pieces

Each player starts with a set of counters of a unique color or design. The counters are called "Insects" (or Bugs). A stack of insects in a space is called a "Stack".

When referring to all your Insects use the term "Swarm" (or Hive).

- The Reproduction value is the number of new insects you get each turn.
- The Intelligence value is how many stacks or partial stacks you may move per turn.
- The Stack value is the limit of how many insects you may have in one stack.
- The Initiative level determines which stack attacks first in Attack Phase.

As you gain cards, the values of your attributes will increase. Certain terrain types will give attribute bonuses to your swarm or occupying stacks.

Attributes

Your insects/swarm has the following seven basic attributes (traits): Initiative, Attack, Defense, Movement, Reproduction, Stacking, Intelligence.

- Each Insect has a base Attack value = 1
- Each Insect has a base Defense value = 1
- Each Insect has a base Movement value = 1
- Your Swarm has a base Reproductive capacity = 1
- Each of your Stacks of Insects has a base Stack limit = 1
- Your Swarm has a base Intelligence level = 1
- Your Swarm has a base Initiative level = 1
- The Attack value is how much damage an insect can inflict in attack phase.
- The Defense value is how much damage an insect can take before being destroyed.
- The Movement value determines how many spaces an insect (or stack) may move.

The Deck

Players share a common deck. There are 2 Types of cards: Evolution cards and Event cards. Evolution cards are played in Evolution Phase only and stay in play.

Event cards are played in other Phases and are discarded when played. The bonuses/effects of Event cards last only the current Phase. The deck contains one of each card described in the card list.

Setup

Each player starts with three Insect counters on one Den space. Players should start in opposite corners (or as far apart as possible). Each player draws 2 cards.

If a player has no Evolution cards in his draw it is a Mulligan: He reveals the cards, discards them and draws 2 new cards.

Turn Sequence

Players take turns. A round is when all players have had a turn. Turn order is determined at the beginning of a round in the Round Bid.

Each player's turn has 6 phases:

1. Evolution Phase
2. Reproduction Phase
3. Move Phase
4. Attack Phase
5. Stack Limit Phase
6. Event Phase

Round Bid

In the first round, a random player goes first followed by the other players going clockwise around the table. In later rounds the player with the highest Initiative picks his place in the turn order of the round. For example: If there are 4 players, the high Init can pick to take his turn either first, second, third, or fourth in the Round and this cannot be overturned by another player later in the Round Bid.

This is followed by the player with the next highest initiative and so on. If Initiative is tied the swarm with the highest Intelligence picks next. If Intelligence is tied the highest Movement rating picks next.

If Movements are tied go in clockwise order. Record current Turn Order so no one forgets.

Evolution Phase

Place one Evolution card from your hand face up on the table in front of you. Your swarm immediately gets the ability or attribute bonus indicated on the card you just played. These evolution cards remain in play permanently.

Max hand size is 2+ your Intelligence score. Discard excess cards.

Reproduction Phase

Gain a number of new insect counters equal to your Reproduction attribute. Place the new insects on top of your existing stacks. At this point in the turn, stack limits may be exceeded.

Move Phase

You may move up to a number of stacks equal to your Swarm's Intelligence level. This includes partial stacks if you are breaking up a larger stack. A stack may be moved up to a number of spaces equal to your Swarm's Move trait.

You may move your stacks into (but not through) spaces occupied by enemy stacks. 2 or more of your stacks in the same space at the end of the phase will automatically combine to form 1 stack; This may be higher than your Swarm's Stack Limit. As a Stack Moves, it may pick up or drop off Insect counters (same player's) in the spaces it moves into/through.

On a turn, a given Insect counter may not move a total number of spaces greater than that controlling player's move trait.

Attack Phase

If two or more opposing stacks occupy the same space, they will fight. The Stack with the highest Initiative Attacks first. Attacks by Stacks with the same Initiative are simultaneous.

If there is more than one opposing stack present choose one to target. Each stack inflicts damage = Swarm Attack score x # of Insects in Stack. An insect can take as much damage as its defense value before being killed.

Excess damage not enough to kill an insect is ignored. The phase may end with stacks from more than 1 player occupying the same space.

Example Of Combat

Joe's Swarm has a total Attack = 1 and Defense = 1 Ron's Swarm has a total Attack = 1 and Defense = 2 Ron has a stack of 3 insects & Joe has a stack of 5 insects in the same space. Ron inflicts 3 damage, so 3 of Joe's insects are killed. Joe inflicts 5 damage, so 2 of Ron's insects are killed.

(Each of Ron's insects can take 2 damage: it would take 6 damage to kill all 3)

Stack Limit Phase

If a stack contains more insects than its stack limit, the excess insects are discarded.

Event Phase

Draw 2 cards from the deck and put them in your hand. If no cards remain, the game ends.

Using Evolution Cards As Event Cards

You may at any time during your turn or another players turn discard an Evolution card from your hand to give your swarm the indicated Bonus/Ability for the remainder of the current turn (or Bid).

Card List Notation

- Attack = Owning this card gives all your insects Attack +1
- Defense = Owning this card gives all your insects Defense +1
- Movement = Owning this card gives all your insects Move +1
- Intelligence = Owning this card gives your swarm Intelligence +1
- Reproduction = Owning this card gives your swarm Reproduction +1
- Stack = Owning this card gives each of your Stacks Stack +1
- Initiative = Owning this card gives your swarm Initiative +1

Common Deck Card List

Aggression	Evolution	Initiative
Infiltrate	Evolution	Initiative
Overrun	Evolution	Initiative
Rush	Event	Stack gets Initiative +3 in Attack Phase
Latency	Event	Swarm gets Initiative +3 in Round Bid

Optional Extra Cards List

Card:	Type:	Notes:
Waterbugs	Evolution	Your Bugs may move through Water Spaces
Burrowing	Evolution	Your Bugs may move through Enemy held Spaces
Blood Suckers	Evolution	For every 4 enemy Bugs killed gain 1 Bug
Infestation	Evolution	You may disperse into enemy occupied Spaces
Revulsion	Evolution	Enemy stacks in same/adj hex get Stack Limit -1
Webs	Evolution	Enemy stacks in same/adj hex get Move -1
Mimic	Evolution	Copy 1 Evolution card in play (doesn't change)
Adaptation	Event	Draw 2 cards and discard 2 cards
Metamorphosis	Event	Replace an Evolution card with one from your hand
React Quickly	Event	Negate an Event Card just played
Cocoon	Event	Do not move on your turn and draw 2 cards
Co-Opt Evolution	Event	Steal Evolution card from opponents Hand
Devolution	Event	Discard target opponent's Evolution card
Molt	Event	Opponent's Swarm Defense = 1 this turn
Dormancy	Event	Opponent's Swarm Movement = 0 this turn
Rampage	Event	Get an extra Move and Attack Phase this turn

Sweep Of History

Introduction

List and Dice game for 2-4+ players.

Victory

The player with the most Victory Points (VP) at the end of the game wins.

Equipment

10 Sided dice are needed. Pens or pencils are needed. (A different color for each player would be good). A printed copy of the Era Lists is needed.

Use Tokens to keep track of Victory Points. Use Coins to keep track of Gold.

Eras

1. Bronze Age (3500-2000 BC)
2. Iron Age (2000-1000 BC)
3. Classical Age (1000-400 BC)
4. Antiquity (400-0 BC)
5. Empire (0-430 AD)
6. Dark Ages (430-1050 AD)
7. Middle Ages (1050-1350 AD)
8. Renaissance (1350-1600 AD)
9. Enlightenment (1600-1820 AD)
10. Industrial Age (1820-1900 AD)
11. Early Modern (1900-1944 AD)
12. Modern Age (1944-2010 AD)

Era Lists

Each Era has a list of 50+ numbered Items. Print a copy of each list. During the game players will write on the lists to mark which items they control.

Regions

Most Items belong to a particular region. Regions are determined by the Era. For example, in the Bronze age deck there are 4 Regions: Mesopotamia, Egypt, India, and China.

Item Types

There are 9 item types. Not every Era will use all available types.

1. Civilization
2. Leader
3. City
4. Paragon
5. Advance
6. Wonder

7. Religion
8. Ideology
9. Book

Note that the Disaster, Event, Disgrace, and Usurper results are actions, not items.

Setup

Print a copy of the Era Lists. Each player starts with 10 VP and 10 Gold. Players roll high on 1D10 to see who goes first each Era.

Turn Sequence

On your turn, Roll 1D100. Check the current list. You gain control of the indicated item.

Make your mark next to the Item on the list. All Items are unique. You are the only one who can control it. Note: The action results are not considered items.

You may spend 1 Gold to add or subtract 1 to your roll.

Disaster Action

If you get a Disaster result, destroy a Target City or Wonder opponent controls. If opponent has none, he instead loses 2 Gold.

Usurp Action

If you get an Usurp result, steal a Target City or Civilization from another player.

Disgrace Action

If you get a Disgrace result, target opponent loses 2 VP.

Conquest Action

If you get a Conquest result, steal 1 VP and 1 Gold from another player.

Knowledge

If you naturally roll a Book or Advance Item you already own gain 1 VP and 1 Gold.

Leadership

If you naturally roll a Leader you already own, gain 1 VP and go again.

Taxes

If you naturally roll a City or Civilization you already own, gain 2 Gold.

Conversion

If you naturally roll a Religion or Ideology you already own steal 2 VP from target opponent.

Culture

If you naturally roll a Paragon or Wonder you already own gain 2 VP.

Trade

If an opponent naturally rolls one of your items, he gives you 1 Gold.

Pick One Item Results

You must pick an item not owned by any player.

End Of An Era

When any player controls 12 or more items from an era, that era immediately ends.

End Of Era Scoring

After an Era is completely filled up, players score for that Era: The player with the most Items for the whole Era gets 3 VP. Check for each REGION in that

Era. The player with the most items for a Region gets 7 VP.

Check for each Item TYPE in that Era. The player with the most items of that type gets 5 VP. (For Example: The player with the most Leader items gets 5 VP) If 2 or more players tie for the most, each gets 3 VP.

Bonus items give 1 extra VP if you also own the item they target. The player with the most Gold gets 7 VP.

Game Designers Notes

If you notice any glaring historical inaccuracies or omissions please let me know.

Classroom Aid

This game could be incorporated into a semester long lesson plan. On the first day give the students a

pre-test: A blank timeline going back 5000 years. Students try to fill in the timeline with as many historical facts as they can remember.

Each week of the semester can correspond to one of the Eras. Allow students to play the game in addition to presentations and exams. At the end of the semester give the post-test.

Swiss Family Robinson

Introduction

Solo Board, Dice, and Card Game. You control the Swiss Family Robinson. A Group of Pirates is attacking your Rocky Redoubt.

Disclaimer

Swiss Family Robinson is a licensed, copyrighted property. This is merely a fan site.

Victory

Drive off all of the Pirates and keep the Family Members from being captured.

The Board

Use a Chess Board.

The Pirates

There are 16 Pirates (use pawns to represent Pirates)

The Swiss Family Robinson

There are 6 Family Members. 3 are full grown Men (use Knights & King) 2 are Women (use Bishops) 1 is a Child (use Rook)

Setup

Place the Pirates in the back 2 Rows on one end of the Board. (One Piece per space) Place the Family Members in the back 2 Rows of the other side of the board.

The Dice

Use six sided dice.

Attack Deck Card List

Card Name:	#	Range	Notes:
Grapple	2	1	Men only
Fisticuffs	2	1	Men only

Turn Sequence

Each turn has 5 Phases:

1. Pirate Move Phase
2. Family Move Phase
3. Draw Phase
4. Attack Phase
5. End Phase

Pirate Move Phase

Roll 1D6 for Each Pirate:

1D6	Move
1-3	None
4-5	Move 1 Space
6	Move 2 Spaces

Pirates must Move Towards Family members and capture them if possible. (Pirates capture by moving into a space occupied by a Family Member) A Pirate cannot move into or thru another Pirate.

Family Move Phase

Each Family Member may move up to 1 space in any direction. The Child may move 2 spaces.

Draw Phase

Draw 2 cards from the Attack Deck. If the deck runs out, shuffle the discard and draw from it.

Attack Phase

Play (discard) Attack cards from your hand. Each attack card has a range in spaces. These attacks must originate from a Family Member and terminate on a Pirate.

The Attacked Pirate is removed from play. Family Moves and attacks may be diagonal or Orthogonal. Pirate Moves and attacks may only be Orthogonal.

End Phase

Max hand size is 5 cards. Discard excess cards.

Card Name:	#	Range	Notes:
Gun as Club	2	1	Men only
Point Blank Shot	2	1	Adults only
Rifle Shot	4	2	Adults only
Coconut Bombs	4*	K	Men & Child Only
Exploding Rock Trap	1*	3	Any
Gunpowder Traps	4*	3	Any
Falling Log Trap	1*	3	Men only
Collapsing Bridge Trap	1*	5	Men only
Tiger Pit Trap	1*	4	Any
Spiked Pit Traps	2*	4	Any
Steep Climb	4	A	Negate Target Pirate Move

Attack Deck Notation

Copies of this card in the deck

A Any Range

K As a Knight would move in Chess

* Remove this card from play after being used

Swords & Sorcery

Introduction

Rules for miniatures battles in a fantasy setting

Turn Sequence

Cavalry, flying, and fast units (7"+) move first, Movement is in inches The base move rate of cavalry is 10" Roll high to see which player goes first

- Units in base to base contact with enemy units cannot move unless they retreat
- A unit may retreat on a roll of 1-4 on D12
- Retreating units cannot attack

Infantry and slow units (6" or less) move next

- The base move rate of infantry is 4"
- Roll high to see which player goes first

Ranged Attacks

- This includes archers, thrown weapons, catapults, many spells, etc
- Roll high to see which player goes first

Polearm Attacks

- This includes pikes, halberds, spears and lances

- Infantry that did not move may set their spears to receive a charge
 - The units must have their bases touching
 - Pikes attack first, all other attacks are simultaneous
 - Flyers must declare if they are engaging in HTH (otherwise they cannot be attacked by nonflyers)
- Hand to Hand Attacks (HTH)
- The units must have their bases touching
 - Attacks with normal HTH weapons resolved first and are simultaneous Unarmed attacks and attacks with 'short' HTH weapons resolved next and are simultaneous

Morale Check

- Determine if unit needs to check morale

Rally Check

- Leaders may attempt to rally routing units

Attack Resolution

To determine the result of an attack roll D12 and consult the following table Each figure can make one attack per turn against another figure in range

Attack Roll Result Table

Roll 1D12	Result	Notes
1-6	Miss	A natural roll of 1 always misses
7-12	Hit	A natural roll of 12 always hits. Roll on Damage Table

Attack Roll Modifiers

All modifications are cumulative

Die Roll	Modification
+1	The attacker is Infantry
-1	The attack is Ranged
-1	Attack is at Long Range
-1	Attacker is unarmed (Bare hands)
-3	Attacker is prone (Knocked down)
+1	Second HTH attack vs target this turn
+1	Each additional HTH attack made vs target this turn
+1	Attacker is veteran, elite, heroic, or highly trained
+1	Cavalry HTH vs archer targets
-1	Defenders have heavy armor (Move -1)
-1	Defender has shield
-2	Defender has large shield
-1	Attacking in HTH vs defender with any type of sword (swords are good parrying weapons)
-2	Attacking in HTH vs defender wielding staff two handed

Die Roll	Modification
-1	Attacker has large shield (Move -1)
+X	magical weapon bonuses
+1	Attacker using Blunderbuss (Shot spreads)
-1	Attacker is an archer that moved this turn
-1	Attacker is mounted archer
+1	Attacker is infantry with pike set to receive a charge
-1	Charging infantry with pikes set to receive a charge
+1	Attacking unit from side in HTH
+2	Attacking unit from rear in HTH
+1	Surprise attack
+1	Charge (Moving into HTH from at least 2" away; cannot be the result of a retreat)
-1	Attacker is wounded/per wound
-1	Attacker is making additional attacks/per attack (If unit is capable of such)
+1	Attacker berserk (Battle Frenzy) HTH
+1	Berserk Defender
+1	HTH Attacks vs siege unit crews and noncombatants
-1	Defenders have Dodge ability
-1	Defenders have cause Fear ability
+1	Attacking a unit that tried to retreat but failed
-1	Attack by figure that tried to retreat this turn
+1	Bonus vs units of a certain type. For example: +2 vs Giants
-1	Large unit attacks vs Small figures
+1	Attacking Large units
+1	Attacker riding on Savage Mount in HTH
-1	Defender has Tough hide
-1	Ranged attack vs unit partially under cover (behind wall, tree, window)
-1	Attacker fatigued
-1	Attacker on unstable ground
+1	Defender in HTH on unstable ground
+3	Defender immobilized. Immobilized units cannot move or attack
+1	Attacking with net. Net does no damage but target immobilized for 1D3 turns
+1	Attacker or defender using Flail or Ball & Chain in HTH
+1	Attacker using pick or morning star against unit in heavy armor
+1	Attacker using a 1H weapon with 2 hands in HTH
-1	Attacker using any type of axe
+1	Attacker is a Spellcaster casting an attack spell with a Magestaff

Ranged Attacks

Ranges are in inches Double the listed range is long range

Range	Attack Type
2	Thrown dagger, Knife, Axe, Ball & Chain
3	Spear, Sling, Matchlock Pistol, Crossbow Pistol
4	Javelin, Blunderbuss
5	Short bow
7	Crossbow

Range	Attack Type
8	Arquebus
10	Long bow
15+	Catapult, Ballista, Cannon

Damage Roll Table

Roll on this table if a unit has been hit

Roll 1D12	Result
1 or less	Stunned (No damage but unit's next attack roll is at -1)
2-3	Wounded (Move & Attack & Damage rolls -1 per wound)
4	Wounded & Disarmed (Unarmed units Attack roll & Damage roll -2)
5	Wounded & Knocked Down (Move = 0 & Attack roll -3)
6	Wounded & Disarmed & Knocked Down
7-8	Mortally Wounded (Unit immobilized & will die in 1D6 if not healed or regenerated)
9-12+	Killed (Unit loses 1 Hit)

List Of Modifiers To Damage Roll

-3 Attacker is unarmed (Bare hands)

Roll	Modifier
-1	Dagger, Club, Staff
-1	Arrows, sling stones, pistol, blunderbuss, crossbow pistol
-1	Whip (Attack in Pole arm phase, +1 to Rally Roll)
+0	Swords, spears
+0	Mace, Hammers: Hits caused by these weapons are always also knock down
+0	Crossbow bolts, Arquebus (Guns & crossbows require a turn to reload)
+2	Ballista bolts, catapult shot
+1	Pike, Halberd, 1-H axe, 2-H sword, 2-H Warhammer

+2 Battle axe

-1	Defending unit has heavy armor
+1	Defending unit has no armor
-1	Defending unit has tough hide
-1	Attacking unit is weak
+1	Attacker is berserk

-1	Defending unit has heavy armor
+1	Attack is poisonous
+1	Defender is wounded/per wound
+1	Attacker is strong

Movement Rates

Speeds are in inches A unit may double its move but it will be fatigued next turn A fatigued unit moves

at half speed rounded down

Speed	Unit Type
2	Supply Wagons, Siege engines being towed, Walking wounded
3	Infantry with heavy armor, Slow units, Pikes, Large shield, Refugees, Encumbered
4	Typical infantry
5	Infantry with no armor, Fast units
6	War Elephant
7	Chariot
8	Horse & Rider with heavy armor & barding
10	Horse & Rider
12	Horse & Rider with no armor or barding

Terrain

Nonflying units will in general move around obstacles like boulders and trees Units on rough or unstable terrain will move at half speed rounding down Rough terrain: Mud, rocks, loose sand, bushes, tall grass, rope bridge, up slopes Noncavalry units can climb at a rate of 1" turn Only units described as "scalers" can climb flat walls without ropes and ladders

Morale

Units must check morale under the following circumstances: If the unit has been attacked this turn If a friendly unit within 10" has been killed, immobilized, or is routing If a far superior enemy unit is within 10"

If heavily outnumbered A Fear unit ability may require a morale check

Morale Check Result Table

Roll 1D12	Result
1-4	Unit routs next turn
5-12	Unit continues to fight

A routing unit will attempt to move off the table at full speed avoiding enemy units

Morale Check Modifiers

All modifications are cumulative

Die Roll	Modification
+2	Unit making check is veteran, elite, heroic, or a monster
-2	Unit making check is a noncombatant, untrained, green, or cowardly
-1	Facing a unit with more than one hit
+4	Unit making check is undead
-1	Unit making check is heavily outnumbered
+1	Friendly Musician within 10"
+1	Friendly Leader within 10"
+2	Friendly Commander within 10"
+1	Friendly Standard within 10"
+2	Unit making check is berserk

Rally Check

A leader unit may try to rally routing units within 8" A rally attempt is successful on a roll of 1-6 on D12

Roll once for all units in range

Rally Check Modifiers

Die Roll	Modification
+	Commander
+1	Unit being rallied is veteran, elite, heroic

Spells

Make a card for each spell. At the beginning of the battle each spellcaster draws a number of cards equal

to the number of spells they know. Each caster may discard and draw one new spell.

Spell	Notes
Blood Rage	2D6 Friendly units within 10" go berserk for 3 turns
Stone Wall	10" long, 3" high, $\frac{1}{2}$ " thick, Permanent, Range = 10"
Fire Wall	10" long, 3" high, fear ability, Units that cross it are attacked immediately (Attack roll +1) , Range = 10"
Stone to Mud	Destroys Earth obstacles (10" length of wall) Range = 10"
Slow	Units in a 5" radius cannot move for 3 turns, Range = 10", Units may save vs magic
Enlarge	Unit becomes large (Move +4", Hits +1, & Attack roll +2) for 4 turns, Range = 5"
Polymorph	Unit becomes helpless for 1D6 turns, Range = 10", Unit may save vs magic
Dispell	Negates a spell that lasts X turns, Range = 20"

Spell	Notes
Teleport	Move self or unit within 10" anywhere on table
Weakness	Units in a 5" radius become very weak (Attack rolls -2) for 3 turns, Range = 10", Units may save vs magic
Animate Dead	Target Dead unit becomes undead & gains fear ability, Range = 5"
Alter Terrain	Change the terrain in a 5" Radius permanently, (Add or remove obstacles), Range = 10"
Petrify	Target becomes a terrain obstacle (statue) permanently, Range = 5", Units may save vs magic
Charm	Take control of target unit, Range = 5", The unit may save each turn
Turn Undead	All undead in 10" radius of caster must check morale at -8
Fireball	Range = 10" affects all units in 2" radius. Attack roll +2, Damage roll +1
Fear	Cast in Morale check phase. All enemy Units within 10" must check morale at -1
Lightning Bolt	Range = 15" Damage roll +3
Cone of Cold	Range = 8" affects all units in 30 degree cone. Attack roll +2, Units immobilized on a roll of 1-2 on D6 for 1 turn
Poison Gas	Range = 6" affects all units in 4" radius. Attack roll +2, Damage roll -1
Touch of Death	HTH attack. Damage roll +5
Heal	Cast in Rally phase. Remove all wounds on one figure. Range = 5"
Great Heal	Cast in Rally phase. Remove one wound from all friendly units in 5"
Ressurrect	Cast in Rally phase. Restore one dead unit to 1 Hit. Range = 5"
Haste	Range = 5" Cast in Move phase. Target gets double movement for 4 turns
Fly	Range = 5" Cast in Move phase. Target flying & move = 20" for 3 turns
Shield	Range = 5" Cast in Move phase. Target is -3 to be killed for 3 turns
Courage	Friendly units in 8" get attack roll +1 & morale check +1 for 2 turns
Paralyze	Range = 10" Unit immobilized(cannot move or attack) for 1-3 turns, Units may save vs magic

SAVE vs SPELL If a spell allows its target a saving throw, roll 1D12

Roll	Result
1-10	The spell takes effect
11-12	The spell is resisted and there is no effect on that target unit.

LIST OF MODIFIERS TO SAVE vs SPELL ROLL

Roll	Modifier
+1	Defending Unit is veteran, heroic, or elite
+1	Defending Unit is large, giant, monster, or dragon
+X	Defending Unit has magic resistance +X
+2	Defending Unit is a spellcaster
+1	Defending Unit has shield
-1	Caster has a magestaff

Unit Costs

Unit costs are in gold The Base cost of a figure is 5 gold (1 Hit, 1 Attack)

Cost	Ability or Equipment
-1	Weak
-1	Cowardly
-1	No armor(Move +1)
+1	Shield or Large Shield
+2	Tough hide
+2	Heavy armor
+2	Strong
+2	Ranged attack up to 7" (not including Thrown weapons)
+0	Short 1H weapon: Dagger, short sword (get one free if unit has no other HTH weapons, otherwise cost +1)
+1	1H or 2H HTH weapons: Sword, battle axe, staff

18	Ogre	Large, Giant (Damage roll +2), hits = 2, tough hide, Maul (Damage roll +2)

Medieval Men

Cost	Type	Note
15	Knight Captain	Cavalry, Heavy Armor, Veteran, Shield, Sword, Leader
16	Kings Champion	Cavalry, Heavy Armor, Veteran, Shield, Sword, Commander
14	Knight	Cavalry, shield, heavy armor, lance, veteran
7	Pikeman	Infantry, Pike, short sword
9	Halberdier	Infantry, Heavy armor, Halberd
7	Swordsman	Infantry, shield, sword
8	Yeoman	Archer, Longbow, dagger

Cost	Type	Note
15	Wizard	Spellcaster, 7 spells, No armor, weak, Magestaff
17	Cleric	Spellcaster, 4 spells, heavy armor, shield, mace, leader
6	Flagellants	Flail, No armor, Berserk

Barbarians

Cost	Type	Note
11	Barbarian Chieftan	Infantry, Two-handed Sword, Veteran, Commander
11	Barbarian Chieftans Bodyguards	Infantry, Two-handed Sword, Veteran, Berserk, Leader
14	Barbarian Warpriest	Warchub (Magestaff), Spellcaster, 4 spells known
6	Barbarian	Infantry, Berserkers, Battle axe
7	Barbarian Raider	Infantry, shield, sword or axe
6	Barbarian Naked Warriors	Infantry, No Armor, Javelins, Dagger

Nomads

Cost	Type	Note
9	Nomad Lancer	Cavalry, Lance, Shield, No armor
6	Nomad Dervish	Infantry, Sword, No armor, Berserker
5	Nomad Unich Guard	Infantry, No armor, Two-handed sword
13	Nomad Raj	Cavalry, Leader, Sword, Shield, Veteran
14	Nomad Rajesh	Cavalry, Commander, Sword, Shield, Veteran
14	Nomad Sorcerer	Spellcaster, 5 Spells, No armor, Magestaff
11	Nomad Horse Archer	Cavalry, archer, longbow, sword
8	Nomad Hussar	Cavalry, Sword, No armor, Shield

Undead

Cost	Type	Note
11	Skeleton	Undead, Infantry, shields, spears, cause fear
10	Skeletal Archer	Undead, archers, shortbows, cause fear
11	Zombie	Undead, Infantry, claws, regenerate, cause fear
15	Skeletal Champion on Undead Horse	Cavalry, Shield, sword, cause fear, savage mount, leader
19	Necromancer, Spellcaster	5 spells, cause fear, no armor, Commander, Dagger (Magestaff)

Oriental

Cost	Type	Note
13	Shogun	Heavy armor, Sword, veteran, Commander
12	Diayamo	Heavy armor, Sword, veteran, Leader
12	Shugenja	Spellcaster, 6 Spells, No armor
13	Samurai Mounted Bowman	Cavalry, Archer, Longbow, veteran, sword
10	Samurai Sword	Infantry, Sword, Berserk, Elite
9	Heavy Infantry	Heavy armor, Shields, Maces
7	Bushi Spearman	Infantry, Spear
9	Ashigaru Gunner	Arquebus, Short sword
5	Monk	No armor, Staff

36	Dragon	Fire breath (Range = 4" affects all units in 30 degree cone. Attack roll +2.
-		Useable 3x per day) or bite +2 Damage, Second attack: Claws +1 Damage,
-		Third attack: Tail sweep(Rear 90 degrees only), Hits = 4,
-		Flying (Move = 16), Tough Hide x 3, Large

Example Of A Special Hero

Cost	Type	Note
12	Elwylin the Elf Lord	Hero, Commander, Heavy Armor
9	Rune Sword	1-H, Damage roll +2, Attack roll +1, HTH attack rolls vs this unit at -1
-		Attack roll +2 vs Demons, Cast 1 Fireball per battle
8	Spellbane	Shield, Magic resistance +3, attack rolls vs this unit at -1
20	Griffon Mount	Beak attack, Claws (second attack), Flying, Move = 18", Monster, Savage (Attack rolls +1)

The total cost for Elf Lord on Griffon is 49 gold

armies after the battle

After The Battle

The winners battlefield casualties include: 25% Dead/Missing, 35% Routed, 40% Wounded

- The losers battlefield casualties include:
- 40% Dead/Missing, 15% Captured, 15% Wounded & Captured, 15% Routed, 15% Wounded Routed & Wounded units return to their

Basic Scenario

- 500 Gold to a side
- Each side has one Commander
- No dragons in the basic scenario
- The first side to lose all its leaders or suffer 50% casualties will abandon the field.

Swords & Such

Introduction

Abstract War game for 2+ players.

Victory

Capture your opponents King.

Dice

Two 6-sided dice are required.

The Board

12 x 12 square grid.

Terrain

Clear Spaces & Mountain Spaces. Units cannot move into or through Mountain spaces.

Units

Each player has a set of 15 units (or men): 1 King
4 Knights 4 Archers 6 Footsoldiers

Setup

Place your men in your back 2 rows. Only one unit per space. Roll high to see who goes first.

Turn Sequence

Players take turns. On your turn roll two dice. For each roll move one man that many spaces.

Units cannot jump over other units. If you land on an opponents man, you capture it. Captured units are removed from play.

Knights

A Knight can move twice using both dice.

Archers

Archers may either shoot or move. Archers cannot capture when they move. To capture, they shoot the distance of 1 die roll.

Archers may shoot over other units.

Passing

You may pass instead of using a dice roll.

Optional Rules

Catapults

Like Archers except they use the sum of both dice to determine how far they shoot.

Horse Archers

Like archers except they can use 2 dice to move.

Juggernauts

They can move through other pieces. They capture them when they do so.

Symposion

Introduction

A Symposion is a Greek word meaning a Wine drinking party. These were popular in ancient Greece. Depending on the Host (Symposiarch), the emphasis of the gathering could range from purely Intellectual discussion to Hedonistic debauchery.

Game End

The game ends when the Deck has been run through three times and no one has any Symposion left to play.

Winning

The player with the most points at the end of the game wins.

The Deck

Players share a common deck. Each card will have a point value in 3 different categories:

- W** Wine (For example: 1W, 2W, 3W...)
- I** Intellectual (For example: 1I, 2I, 3I...)
- H** Hedonistic (For example: 1H, 2H, 3H...)
- E** Either Intellectual or Hedonistic (For example: 1E, 2E, 3E...); Players Choice

Additionally some cards will have the "Woman" property. Historical Note: The participants of Symposions were all non-slave, voting men. Women only participated as servants or entertainment.

Some Wine cards have the "Container" property. Some Wine cards have the "Vintage" property.

Setup

Players are dealt a hand of 9 cards. The oldest man goes first, followed by the next oldest man and so on. Women, children, and slaves are not allowed to play.

Turn Sequence

Players take turns. Each turn has 4 Phases: Amphorae Phase Symposiarch Phase Symposion Phase Komos Phase

Amphorae Phase

Fill your hand to 9 cards from the top of the deck. If the deck ever runs out, shuffle the discard and draw from it.

Symposiarch Phase

You may discard up to 4 cards and draw replacements. You may trade cards with other players. They may trade with each other as well.

Symposion Phase

You may make a Symposion. A Symposion is a set of cards that you play (discard) for points. To make a Symposion you don't have to use all the cards in your hand.

You must declare a Symposion to be one of 3 types: Intellectual, Social, or Hedonistic. A Social Symposion may have both Intellectual & Hedonistic (& Either) Cards An Intellectual Symposion may have only Intellectual (& Either) Cards A Hedonistic Symposion may have only Hedonistic (& Either) Cards All Symposiums must have a certain amount of Wine Points. An Intellectual Symposion must have exactly 3 Wine points.

A Social Symposion may have between 3 and 5 Wine points. A Hedonistic Symposion must have 5 or more Wine Points. All Wine points in a Symposion cannot come from only Container cards.

A Symposion can only have 1 Vintage card. Some cards can only be played for certain types of Symposion. If you made a Symposion this turn score points equal to the Point values you applied of the cards you played.

This includes points from Wine, Intellectual, Hedonistic, and Either Categories Keep track of points you earn with pen and paper. You may make a max of 1 Symposion per turn. At the end of the phase Discard all Symposion cards you played.

Komos Phase

Discard your hand down to 8 cards.

Social Symposion Bonus

If you play a social Symposion and the number of Intellectual & Hedonistic Points are equal, score an extra 2 Points. If you play a social Symposion and the number of Intellectual & Hedonistic & Wine Points are equal, score an extra 3 Points.

Card List Notation

- IO** Intellectual Symposion Only also No WC or MW may be played
- HO** Hedonistic Symposion Only
- NI** Cannot be played in an Intellectual Symposion
- NH** Cannot be played in a Hedonistic Symposion

MW May be a Woman card (Players choice)
WC Woman Card

* The drawn card may be used in the current Sympo-
 sion

Syrian Civil War

Introduction

Card game for 2-6 players. Including Events starting in 2011.

Victory

If your Faction has the most points at the end of the game you win.

#	Code	Name
1	SGOV	Syrian Government
2	ISIL	ISIL
3	MODO	Moderate Opposition

Faction Deck

Have a small deck of twelve cards, two for each Faction.

Event Deck

Players share a common Event Deck.

Victory Tokens

Have a set of Victory Tokens (VT).

Setup

Split the Faction Deck into two complete sets. Place six Faction cards (one for each Faction) face up in the Middle of the table. Place 10 VT on each Face up Faction card.

Shuffle the remaining six Faction cards. Each player is dealt one Faction card face down. (Their Secret Personal Faction) Remaining Faction cards are

End Of Game

The game ends when you have gone through the Event Deck twice.

Factions

There are 6 Factions:

#	Code	Name
4	JIHO	Jihadist Opposition
5	ALGO	Al-Queda Opposition
6	KURD	Kurds

removed from play. Shuffle the Event Deck. The most opinionated player goes first.

Players Personal Factions

Players keep their Factions secret from each other. Or try to anyway.

Turn Sequence

Players take turns. On your turn Draw 2 Event cards from the top of the Deck. Play one card and discard the other.

Played Events will cause some factions to gain Victory Tokens and others to lose VT. (The played event is also discarded after its effects are taken) Cards are discarded face down. No Faction can have less than zero VT.

The first time the event deck is used up shuffle the discard and draw from it.

Takeover

Introduction

Card game for 2+ players. Each player represents a group of investors trying to buy a target Company. Of course they are competing with rival groups.

Objective

At the end of the game, the player with the most Shares (Coins & Investor Cards) Wins Control of the Company.

Game End

The Game Ends when there are no cards left in the deck at the Beginning of a round. (The Shareholders then vote to see whom to sell the Company to)

Shares

Use change (pennies, nickels, dimes) to keep track of Shares. Investor cards are also worth Shares as stated on the card.

(un)certainty

Players must keep their Investor cards face up so that the other players can see them. Shares in the form of Change can be stacked and hidden under Investor cards.

The Deck

Players share a common deck. There are 2 basic card types: Investor cards and Tactics cards. The deck contains 1 copy of each card in the card list.

Card List

Card Name:	Type	Shares	Notes:
Sheared Brokerage	I	5	-
Dr Cola Company	I	7	D: Pep Cola Company
Pep Cola Company	I	6	-
Superstar Entertainer	I	4	-

Real Estate Affiliates	I	3	-
Paramounted Film Co	I	4	+8 SIYH Superstar
International Air	I	3	+5 SIYH Military Industrial Complex

Setup

Shuffle the deck. Each player starts with 50 Shares.

Initial Bid

Players secretly bid up to 50 Shares. Bids are revealed simultaneously. The player with the Highest Bid is known as the Buyer.

Flip a coin to resolve ties. All Bid Shares are lost.

Turn Sequence

Draw 7 cards from the deck and place them face up in plain sight of all players. These are referred to as the Auction cards. Players take turns picking 1 Auction card each starting with the current Buyer.

If you pick an Investor card, put it in play in front of you. If you pick a Tactics card, resolve its effects immediately and Discard it. Note that you must pick a card, even if you don't want to.

The turn Ends when all Bid cards have been picked, and all Tactics cards resolved. The player to the left of the current Buyer becomes the Buyer next turn.

Card List Notation

- I** Investor Card
- T** Tactics Card
- F** Flip a Coin (when played)
- H** Heads

Tales Of The Borrowers

Introduction

Card game based on the Borrowers, adventures of the tiny people that Live hidden in our houses, and borrow only what they need.

Disclaimer

The Borrowers are a licensed, copyrighted property. This is merely a fan site.

Victory

Be the first player to complete 3 Melds.

The Deck

Players share a common deck. There are 7 card types: Places, Threats, Escapes, Friends, Foods, Objects, and Tools. There are 10 cards of each type.

Melds

A Meld is a collection of 7 cards of a specific ratio of types. There are 10 Types of Melds:

1. Borrower's Feast: 3 Friends + 4 Foods
2. Dangerous Journey: 3 Places + 2 Escape + 2 Threats
3. Monty Haul: 3 Objects + 2 Tools + 2 Foods
4. Friendly Visit: 2 Friends + 3 Places + 2 Escapes

5. Great Adventure: 1 of each Type
6. Tricks of the Trade: 3 Tools + 4 Escapes
7. Home and Hearth: 4 Objects + 3 Foods
8. Full House: 4 Friends + 3 Objects
9. A Big Scary World: 4 Threats + 3 Places
10. Weapons of Choice: 4 Tools + 3 Threats

Setup

Shuffle the Deck. The biggest person is the Dealer. The smallest person goes first.

Deal 7 random cards to each player.

SEQUENCE of PLAY Players take turns. Play proceeds clockwise. Each turn has 3 Phases:

1. Draw Phase
2. Action Phase
3. Meld Phase

Draw Phase

Draw Cards from the deck to fill your hand to 7 cards. If the deck ever runs out, shuffle the discard and draw from it.

Action Phase

You may discard 1 card. What happens depends on what type of card you discard:

Type	Happens
Places	Discard 1 more card and draw 2 cards
Threats	Opponent Discards 1 random card from hand
Escapes	Steal 1 random card from opponents hand
Friends	Give this card to opponent and draw 2 cards
Foods	Draw 1 card
Objects	Put any card from the discard into your hand
Tools	iscard hand and draw 7 new cards

Meld Phase

You cannot make a Meld of a type already made this game. (Example: If someone already made a Full House, you cannot make another) If you have a Meld,

show it to all players. 3 Melds and you win the game. Keep Track.

Discard your hand and draw 7 new cards. If you don't have a Meld, you must discard your hand down to 6 cards.

Card List

Type	Cards
Place Cards	Garden, Attic, Basement, Roof, Hallway, Doll House, Bedroom, Window, Foyer, Kitchen

Type	Cards
Escape Cards	Run, Jump, Climb, Crawl, Ledge, Hide, Hole in the Wall, Shadows, Distraction, Silence
Food Cards	Cookie, Sugar Cube, Cherry, Grape, Olive, Cracker, Candy, Raisins, Nuts, Berry
Threat Cards	Spider, Raven, Child, House Keeper, Snake, Rat, Cat, Big Feet, Loud Noise, Mouse Trap
Friend Cards	Ma, Pa, Little Brother, Big Sister, Mice, Wild Borrower, Neighbor Borrower, Friendly Human, Ants, Bees
Object Cards	Cork, Foil, Cloth, Paper, Pencil, Coin, Game Piece, Salt, Pill, Battery
Tool Cards	Needle, Thread, Wire, Glue, Tape, Paperclip, Rubber band, Pin, Match, Toothpick

Talisman War

Introduction

Boardgame for 2 players. Wargame based on the Talisman Adventure Game. One player controls the Forces of Good.
The other player controls the forces of Evil.

Disclaimer

Talisman is a copyrighted, licensed, trademarked property. This is merely a fan site.

Victory

The Evil player must capture the City and the Castle. The Good player must capture the City and the Sorcerer's Tower

Dice

Six sided dice are needed. 3 per player.

Control Chits

The Good player has a set of White Chits. The Evil player has a set of Black Chits. These are stacked with Neutral Units to show who controls them.

Wound Chits

When a Unit is hit (damaged) a Wound Chit (Marker) is stacked with it. 3 Wound Chits will kill (discard) a Unit. Discard all Items (and Spells) stacked with a killed Character.

Unit Types

Units are divided into 2 main types: Monsters and Characters. Items may be stacked with Characters, but not with Monsters.

The Map

The Map is an 8x8 Grid that holds 64 Territory Tiles. There are 3 types of Territories: Neutral. Good, and Evil.

- The 2 front rows contain Good Tiles.
- The 2 back rows contain Evil Tiles.
- The 4 middle rows contain Neutral Tiles.

Territory Tile List Notation

- A** Alignment
- G** Good
- E** Evil
- N** Neutral
- #** Copies of that Tile in Set
- STR** Strength
- MP** Magic Points
- HU** Holy Unit
- MU** Magic User
- GU** Good Unit
- EU** Evil Unit
- GP** Good Player
- EP** Evil Player

Territory Tile List

Name:	A	#	Notes:
Castle	G	1	GU in Castle gets STR +2 Save 1-4 on 1D6
Shrine	G	1	HU at Shrine get STR+2
Pool of Life	G	1	GU at or adjacent to Pool heal 1 Wound in Heal Phase
Fountain of Wisdom	G	1	MU at Fountain gets MP+1
Market	G	1	GU at Market gets +1 Gold per turn
Chapel	G	1	All GU in or adjacent to Chapel get STR+1
Temple	G	1	HU at Temple gets MP+1
Tavern	G	1	Fighter at Tavern gets STR+2
Fields	G	2	Fast Unit at Fields get STR+1
Woods	G	2	Ranged Attack Unit in Woods gets STR+2
Village	G	2	GU at villages heal 1 wound in Heal Phase
Farms	G	2	GU at farms get STR+1
Sorcerer's Tower	E	1	Evil MU in Tower gets MP+1 and Save 1-4 on 1D6

Name:	A	#	Notes:
Chasm	E	1	Ground Units entering Chasm killed on 1-2 on 1D6
Cursed Glade	E	1	GU in or adjacent to Glade get STR-1
Graveyard	E	1	Undead Units in or adjacent get STR+1
Plain of Peril	E	1	If occupied by EU the EP gets +1 to recruit Table Rolls
Crypt	E	1	Spirit Units in or adjacent get STR+1
Valley of Fire	E	1	Demonic Units in or adjacent get STR+1
Pits	E	1	Flying Unit at Pits gets STR+2
Dungeon	E	1	EU in Dungeon gets +1 Gold per turn
Arena	E	1	Evil Character in Arena gets STR+2
Ruins	E	1	MU at Ruins gets MP+1
Altar	E	1	All EU in or adjacent to Altar get STR+1
Cave	E	2	Monster Unit at Cave gets STR+1
Marsh	E	2	Unit at Marsh cannot move on 1-3 on D6
Maze	N	1	Unit at Maze cannot move on 1-4 on D6
Magic Stream	N	1	MU at Stream gets MP+1
Magic Portal	N	1	Unit at Portal can move to any empty Space
Hidden Valley	N	1	Unit in Valley evades attacks/battles on 1-4 on D6
City	N	1	Unit in City gets +1 Gold per turn
Mines	N	2	Mountain Units at Mines get +1 Gold per Turn
Hills	N	4	Mountain Units in Hills get STR+1
Forest	N	6	Ranged Attack Unit in Woods gets STR+1
Crags	N	4	Ground Units entering Crags killed on 1 on 1D6
Desert	N	4	Units in Desert take 1 wound in Heal Phase on 1-3 on D6
Plains	N	6	Fast Units in Plains get STR+2

Spell Hand

Items and Units are immediately played to the board. Players however keep a separate pile of Spell chits to be used when needed. Normal maximum Spell Hand size is 4 and limit is enforced in End Phase.

Strength

By Spell, Wound, and Disease effects it is possible for Units to have a Strength of zero or even a negative Strength. Such units can still attack and defend. Units with a Disease Counter are STR-1 Units with a Wound Counter are STR-1

Setup

Determine who will be Good and who will be Evil. Shuffle the Territory Tiles. Randomly distribute the Tiles to make the 8x8 map with separate Good, Evil, and Neutral Regions as described.

Create separate Piles (Cups) for:

- Good Unit Chits
- Evil Unit Chits
- Neutral Unit Chits
- Item Chits
- Spell Chits

Each player gets 8 Unit Chits of his Alignment

Each player gets 4 Neutral Unit Chits

Each player gets 4 Item Chits

Each player gets 2 Spell Chits

Players distribute their Units to their own Regions: You have 12 Units to distribute throughout 16 Spaces. A Space (Tile) can contain 1 Unit. All Chits are face up. Item Chits are stacked with Units that can use them.

Turn Sequence

Players take turns. The Evil Player goes first Each Turn has 9 Phases:

- Time Phase
- Magic Phase
- Quest Phase
- Movement Phase
- Ranged Attack Phase
- Battle Phase
- Healing Phase
- Recruit Phase
- End Phase

Time Phase

Each Tile with a Block Token on it removes 1 such Token.

Each Tile with a Ruin Token on it removes 1 such Token.

Every Unit with a Disease Counter rolls 1D6:

1D6	Disease Effect:
1-2	Unit takes 1 Wound
3-4	No Effect
5-6	Remove Counter

Magic Phase

Gain spells and summon effects according to the Total number of Magic Points (MP) you control as listed on the Magic Power Table. Spell Chits are randomly drawn from the Spell Chit Cup. Each Magic User (MU) you control gives you 1 MP.

Magic Power Table

MP	Capacity	Notes
1	Power	Draw +1 Spell each turn in Magic Phase
2	Knowledge	Spell Hand Size +1
3	Summon	Roll one extra time on Recruit Table Immediately
4	Power	Draw +1 Spell each turn in Magic Phase
5	Knowledge	Spell Hand Size +1
6	Summon	Roll one extra time on Recruit Table Immediately
7	Skill	All your MU get STR+1
8	Power	Draw +1 Spell each turn in Magic Phase
9	Knowledge	Spell Hand Size +1
10	Summon	Roll one extra time on Recruit Table Immediately
11	Skill	All your MU get STR+1
12	Power	Draw +1 Spell each turn in Magic Phase

Quest Phase

Once per turn in Quest Phase, you may send one of your Characters on a quest. The Character rolls 3D6 and adds its Strength. Roll 3D6 for the Quest.

If the Character rolls equal or higher, you may immediately roll once on the Recruit Table with a -1 modifier to the roll. If the Quest Total was higher, the Character was killed (discard it).

Movement Phase

Roll 1D6. This is the Movement Roll. You may move that many of your Units. The base move for all units is 1 space; You can move a unit to an adjacent Territory.

Adjacency is through orthogonal sides only, not the diagonal. Fast Units and Flyers can move 2 Spaces. Flyers that are also fast can move 3 spaces.

Forest Walkers can as their move go from any Wood or Forest tile to another empty one. Units may not move through other units unless they can fly (or are being teleported or are moving by Portal or Forest walking) Spirits can move Diagonally. Maximum 1 unit per space. No Stacking.

2 adjacent friendly Units as their Moves may switch places.

Ranged Attack Phase

Attacks described as ranged attacks take place in this Phase. Attacks are made into adjacent spaces (diagonal allowed). The attacking unit rolls 3D6 and adds its Strength.

The defending unit rolls 3D6 and adds its Strength. If the attackers total is higher, the defender Rolls on

Some objects provide additional MP. Some locations if occupied generate more MP. Note base Spell Chit draw is zero; You need at least 1 Magic User to gain any spells.

Note the Table effects are cumulative: If you have 7 MP you would get a total of 2 extra rolls on the Recruit Table.

the Ranged Attack Hit Table. If equal or lower, the attack misses and nothing happens.

Most Ranged attacks are by Bow and Arrow or Magic Spell, however, some have another basis, such as Giants throwing Boulders. A Unit can only make 1 Ranged Attack per turn. A Unit that makes a Ranged Attack cannot also attack in Battle Phase.

A single unit may be attacked by multiple foes one at a time.

Ranged Attack Hit Table

1D6	Damage
1-3	Target Gains 1 Wound Counter
4-5	Target Gains 2 Wound Counter
6	Target Killed

Battle Phase

Attacks are made into adjacent spaces (diagonal not allowed). The attacking unit rolls 3D6 and adds its Strength. The defending unit rolls 3D6 and adds its Strength.

If the Attackers total is higher, the defender gains 1 Wound Counter. If the Defenders total is higher, the Attacker takes 1 Wound Counter. If totals are equal they both gain a wound counter. This repeats until one unit is destroyed (3 Wounds) or the Attacking unit breaks off the Attack.

A Unit may only attack one Unit in Battle Phase. A single unit may be attacked by multiple foes one at a time.

Saves

Some Items, Spells, and the Tough ability will nullify an attack. If the save roll is successful, all the damage from the attack is negated.

Evade Option

A Defending Unit may choose to Evade a Battle. The Unit gets +4 to his battle roll, but if he wins, he does no damage to his opponent, the combat simply ends. In addition, If an evasion is successful, the Evading unit may move to an ADJ empty space.

Healing Phase

Units may have Wound Markers removed in this Phase. This requires a special effect provided by a

unit or spell or location. Units with Regeneration automatically remove 1 Wound Chit on themselves in this Phase.

Units with Healing may remove 1 Wound Chit or 1 Curse Chit or 1 Disease Token from a friendly unit in an adjacent orthogonal Space.

Recruit Phase

Roll once on the Recruit Table. When recruiting units, place them in any empty Tile of your same Alignment. Neutral Units may also be placed in a Neutral Tile adjacent to a Tile occupied by one of your Units.

Items when recruited (Found, Bought, Created) are immediately stacked with a Character that can use them.

Recruit Table

1D6	Notes:
0	Gain 3 Bags of Gold
1	Gain 2 Bags of Gold
2	Gain 1 Bag of Gold

1D6	Notes:
3	Gain 1 Item
4	Gain 1 Neutral Unit
5+	Gain 1 Unit of your same Alignment

Gold

Gold is used to purchase Units and Items in Recruit Phase: In Recruit Phase you may buy 1 Item for 3 bags of Gold. Draw 3 Item Chits and discard 2. In Recruit Phase you may buy 1 Neutral Unit for 3 bags of Gold.

Draw 3 Neutral Unit Chits and discard 2. In Recruit Phase you may buy 1 Unit of your Alignment for 3 bags of Gold. Draw 3 Unit Chits and discard 2.

Boon Chit

These are Spells that are stacked with the Target Unit and are beneficial. They remain until eliminated by another Spell.

Wound & Disease Chits

Players share a common set of these.

End Phase

Max Spell Hand Size is 4. Discard excess Spells.

Item Limits

Magic Users unless they are also Fighters cannot use Weapons or Armor. A Character can have only have 1 of each of the following types of items: Weapon, Headgear, Shield, Armor, Steed

Block Tokens

A Tile with a Block Token on it cannot be entered or moved through.

Ruin Tokens

A Tile with a Ruin Token on it has its special effects as described in the Tile List negated.

Curse Chit

These are Spells that are stacked with the Target Unit and adversely affect it. They remain until healed or eliminated by another Spell.

Unit Chit Lists Notation

GU Good Unit

EU Evil Unit

STR Strength

FTR Fighter

MU Magic User

MP Magic Points

ADJ Adjacent

RA Ranged Attack

- Healing = Unit can Heal other Units in Healing Phase
- Fast = Unit has Move+1
- Fly = Unit has Move+1 and can move over other Units
- Forestwalk = Unit can move from 1 Forest or Woods space to any other as 1 move
- Mountains = Unit is STR+2 when Attacking a Cave, Mine, Hill, Crag, or Dungeon Space
- Woods = Unit is STR+2 when Attacking a Woods, Forest, or Marsh Space
- Martyr = You may switch this Unit with an ADJ Unit that is being Attacked
- Fate = Reroll 1 Target Dieroll once per turn or cause 1 Chit you draw to be redrawn
- Regenerate = Unit heals itself in Healing Phase

- Tough = Unit has a natural Save of 1-3 on 1D6 when it takes a Hit
- Steal = Instead of Attacking unit steals 1 Item from ADJ Foe on 1-3 on 1D6
- Poison = If attack is successful it does 1 extra Wound on 1-3 on 1D6
- Petrify = If attack is successful, target is killed
- Large = Unit can carry 1 extra Wound Counter

before being killed

- Rich = Gain 1 Gold in your Recruit Phase
- Disease = In Long Range Attack Phase this unit may give 1 ADJ unit a Disease Counter
- Morale = Adjacent Friendly Units get STR+1 and the Martyr Ability
- Ambush = Unit gets STR+2 on first turn of a Battle

Darkness	NA	No Units may Move or Attack this turn
Invisibility	3	Negate Long Range Attack or Battle this Turn
Exorcism	1	RA = Destroy Spirit Unit
Turn Undead	1	RA = Destroy Undead Unit
Wither	1	RA = Destroy Fey Unit
Banish	1	RA = Destroy Demonic Unit
Fear	1	RA = Destroy Good Unit

Spell Discussion

NA Non-applicable

U Unlimited

- Ranges = Max Distance of the target from the MU casting the Spell. Note that some spells cover 1 or more ADJ spaces. The player casting the spell chooses how these are spread out. They can extend beyond the Spell range as long as they are connected to the target space by a series of ADJ connections.
- Timing = Exact timing is not given, but use common sense and allow flexibility: Many spells only make sense if you cast them on your opponent's

turn to disrupt his Spells and Unit Movements and Attacks.

- Toad = Toads cannot attack. A Toad must attempt to Evade.

Game Designers Notes

Had some hesitation doing this game. May not be in the true spirit of the Talisman Universe where the Quest above all else is the central theme. The game is 95% Talisman inspired. I think I allowed a little Dungeons and Dragons to slip in as well as a little Magic the Gathering. Artistic License. If you liked the original there is a lot of compatible fan stuff available.

Tank Girl Skirmish

Introduction

Board & card game for 2 players. Battle between Tank Girl and Friends vs Water and Power. Abstract Skirmish level combat.

Victory

Knock out the opposing Leaders.

The Map

Use an 8x8 chessboard.

Terrain Types

- Clear: No Modifications.

Tank Girl & Friends Unit Table

Name:	#	Hits	Notes:
Tank Girl	1	5	Leader
Tank Girl's Tank	1	7	Vehicle
Jet Girl	1	4	Leader
Jet Girl's Jet	1	6	Flying Vehicle

Tank Girl

- Our Heroine.
- Snark Card: Spiked Bat: A = 1 Diagonal (Not vs Vehicle)
- Snark Card: Attitude: Draw 2 cards
- Snark Card: Scrappy: Defense
- Flip Card: Pistol: A = 2
- Flip Card: Punch: A = 1 Orthogonal Only (Not vs Vehicle)
- Flip Card: Whistle: Move her Tank to her space
- Pew Pew Pew Card: Full Auto: A = 3 and A = K Adjacent
- Pew Pew Pew Card: Bazooka: A = 4 Damage +1

Tank Girl's Tank

- Will Fight on its own.
- Snark Card: Bow & Arrow: A = K (Not vs Vehicle)
 - Snark Card: Zippy: M = 4
 - Snark Card: Shotgun: A = 3
 - Snark Card: Deflect Damage: Defense
 - Snark Card: Ramming Speed: M = 3 and then A = 1
 - Flip Card: Gatling Gun: A = 2 and A = K Adjacent
 - Flip Card: Steel Armor: Defense
 - Flip Card: Rockets: A = 5 Damage +1
 - Pew Pew Pew Card: Heavy Machine Gun: A = 3 and A = K Adjacent

- Sand Dunes: No Modifications. Card Interactions.
 - Road: Non-flyers may make a second move per turn if on a road.
 - Rough: Units must stop upon entering. Card Interactions.
 - Impassable: Non-flyer Units may not enter or Move Through.
 - Destructible: Impassable, but if attacked by a cannon, rocket, or Bomb, it becomes Rough.
- Note: Distribute According to taste.

The Units

Use chits or figures or miniatures to represent units. Units can also be referred to as Characters.

Name:	#	Hits	Notes:
Booga	1	4	Ripper
Deetee	1	3	Ripper Leader
T-Saint	1	3	Ripper
Ripper Soldier	5	3	-

- Pew Pew Pew Card: Main Gun: A = 4 Damage +1

Note: The Tank may transport up to 4 Non-vehicle Units. Note: The Tank can make up to 2 attacks per turn

Jet Girl

Expert Mechanic.

- Snark Card: Demolitions: A = K Damage +1
- Snark Card: Take Cover: Defense
- Snark Card: Assess the Situation: Draw 1 card & look at opponents hand
- Flip Card: Patch: Repair 1 Hit to Vehicle (Same or Adj)
- Flip Card: Signal: Move her Jet to her space
- Pew Pew Pew Card: Pistol Ace: A = 2 and A = K and A = 3 (Not vs Vehicle)

Jet Girl's Jet

Can Hover in Place. Will Fight on its own.

- Snark Card: Strafe: A = 2 and 3 and 4 in a Line
- Snark Card: Zig Zag: M = K and then M = K
- Flip Card: Immelmann: Defense and Forced Move = 2
- Flip Card: Bombs Away: A = 2 Damage +1
- Pew Pew Pew Card: Rockets: A = 4 Damage +1

- Pew Pew Pew Card: Critical Hit: A = 3 Damage +1 vs Vehicle

Note: The Jet may transport up to 10 Non-vehicle units. Note: The Jet can make up to 2 Moves per turn

Booga

Tank Girls Boyfriend. All Ripper Moves plus:

- Flip Card: Rescue: Move to Tank Girl's Space and give her Defense

Deetee

Spiritual and Artistic Leader of the Rippers. All Ripper Moves plus:

- Flip Card: Sacrifice: Draw 1 card and M = 4 then A = 1 and he loses 1 Hit

1D6	Type:
1	Commandos
2-3	Soldiers
4	Officer (Same as Sergeant Small)

1D6	Type:
5	Interceptor Jet
6	Peacekeeper Tank

Notes: These always start on an empty back row space.

Cyborg Kesslee

- Snark Card: Trap: Opponent must discard 1 Random card
- Snark Card: Direct: Move 1 Soldier Card to any space
- Flip Card: Reinforcements: Gain 1 Random Unit
- Flip Card: Insane: Defense
- Flip Card: Water Extractor: A = 1 Dam +1 (Not vs Vehicle)
- Pew Pew Pew Card: Mechanical Blade Arm: A = 1
- Pew Pew Pew Card: Command: Draw 2 Cards

Sergeant Small

- Snark Card: Easy Target: Target Attack must hit him if possible
- Flip Card: Cower: Defense
- Pew Pew Pew Card: Hide: Defense

T-saint

Meanest Ripper. All Ripper Moves plus:

- Flip Card: Brutalize: A = 1 and A = 1

Ripper Soldier

Experimental Half Kangaroo Half Human Vegan Super Soldiers

- Snark Card: Underground Tunnels: Move to any Sand Dunes Space
- Snark Card: Claws: A = 1 (Not vs Vehicle)
- Flip Card: Night Operation: Defense
- Pew Pew Pew: Leap: M = 2 then A = 1

Ripper Special Rules

Rippers do not use guns. All normal attack cards are Considered to be Hand to Hand Range = 1 when used by a Ripper.

Soldiers

- Snark Card: Maneuver: M = 2
- Flip Card: Find Cover: Defense
- Pew Pew Pew Card: Automatic Rifles: A = 2

Commandos

- Snark Card: Take Position: M = K
- Flip Card: Concealment: Defense
- Pew Pew Pew Card: Automatic Weapons: A = K

Interceptor Jet

- Snark Card: Flyby: M = 4 then M = 3
 - Flip Card: Altitude: Defense
 - Pew Pew Pew Card: Target Lock: A = 3
- Note: A Jet may transport 1 Squad

Peacekeeper Tank

- Snark Card: Treads: M = 3
 - Flip Card: Heavy Armor: Defense
 - Pew Pew Pew Card: Big Gun: A = 4
- Note: A Tank may transport 1 Squad

Setup

Each player places one unit on each square of his back two rows. TG & Friends go first.

Stacking Rules

Friendly Units may stack. Vehicles must always be targeted before other units in a space.

The Cards

Players share a common deck.

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Fate Phase
2. Move Phase
3. Fight Phase

Fate Phase

Draw 3 cards. Max hand size = 5 cards. If the deck runs out, shuffle the discard and draw from it.

Discard excess cards.

Move Phase

Play (discard) a Move card to move one of your Units. The move card has a number. This is the number of spaces the unit moves.

Moves can be diagonal or orthogonal. "Knight" type move cards allow a unit to move like a knight in chess.

Card List

Card Name:	#	Range	Type	Notes:
Go!	6	1	M	-
Go! Go!	5	2	M	-
Go! Go! Go!	4	3	M	-
Infiltrate	3	K	M	-
Zoom!	2	4	M	Vehicles Only
Zoom! Zoom!	2	5	M	Flyers Only
Hand to Hand	4	1	A	-
Short Range	4	2	A	-
Corner Shot	4	K	A	-
Medium Range	4	3	A	-
Long Range	4	4	A	-
Rubble	2	-	D	In Rough Space Only
Behind Dune	2	-	D	In Sand Dunes Only
Dodge	2	-	D	-
Snark	5	-	-	-
Flip	5	-	-	-
Pew Pew Pew	5	-	-	-

Instead of moving just one unit in any direction, you have the option of moving 2 or 3 units forward the indicated number of spaces using a single move card.

Units cannot move through other units.

Fire Phase

Play (discard) an Attack card to have a unit attack. The attack card has a number. This is the range of the attack.

Attacks can be diagonal or orthogonal. "Knight" type attack cards produce an attack with a range like a knight in chess. Every attack does a base of 1 Damage (Target loses 1 Hit).

Use Chits or coins to record damage. A unit reduced to 0 Hits is killed or incapacitated and removed from the board. Your opponent may play Defense cards to negate your attack.

Units cannot attack through other units.

Flyer Rules

Flyers are immune to Hand to Hand Attacks.

Card List Notation

M Movement

A Attack

D Defense

S Special

K as a Knight would move in Chess

Tank Killers

Introduction

2 player card game. Simulates a battle between two tank formations during WW2. The current version of the game has decks for: Germans, British, and Americans circa 1944-5.

The Decks

During play there are 3 decks. Players share a common Tactics Deck. Each player also has his own unique Formation Deck.

The tactics deck has 80+ cards. The German deck has 40 cards. The American and British decks have 50 cards.

Discard Piles

There is one common discard pile for the Tactics deck. Each player keeps two discard piles for his Formation deck. One pile is the Reserve discard pile.

The other is called the Casualty discard pile.

Victory

You win if half of your opponent's formation cards are in his casualty pile. Your opponent's forces break and either rout or surrender. Other Scenario conditions are possible.

Setup

Each player starts with 3 Tactics cards in their hand. Formation cards never go in your hand.

Turn Sequence

Players take turns. The player taking his turn is called the active player. The other player is referred to as the opponent or defender.

Each turn is divided up into 3 Phases with subphases: I. Maneuver Phase II. Attack Phase

1. Attacker Subphase
2. Target Subphase
3. Lost Attack Subphase
4. Modifier Subphase
5. Resolution Subphase

III. Free Attack Phase

7. Free Attack Subphase
8. Free Attacker Subphase
9. Attack Subphase

Maneuver Phase

The active player draws 3 Tactics cards. Maximum hand = 9 cards. Discard excess cards. If the Tactics deck runs out, shuffle the discard and draw from it.

Attacker Subphase

Discard any face up units you have in play, that attacked on your last turn, to your reserve pile. Take the top card from your Formation deck and Put it face up on the table in front of you. This is the unit or support unit that is attacking this phase.

Target Subphase

The attacker has a choice of units to attack this phase:

1. Any opposing unit that is still in play, or
2. The top card of the opponents Formation deck.

The top card is turned face up, and remains on the deck. The target unit is also called the defending unit. If the target is a support unit, discard it to its reserve pile, and the phase ends immediately.

Lost Attack Subphase

The defender may play a card from his hand that has the "Lost Action" effect. This ends the current phase immediately.

The defender may play a card from his hand that has the "End Turn" effect. This ends the active players turn immediately.

The defender may play a Logistics or Mine card from his hand that has the "Out of Action" effect. This ends the current phase immediately and the attacking unit goes to its casualty pile.

These cards cannot be played against Support attacks unless the card specifically says so. The played card is discarded.

Modifier Subphase

The attacker and defender may take turns (attacker first) playing tactics cards that Modify the "Penetration Factor" of the attacking unit.

- Only one "Range" card may be played.
- Only one "Hit" card may be played.
- Only one "Ammo" card may be played.

In general the attacker will play cards with a positive bonus. The defender will play cards with a negative penalty. If Range card is played that is farther than the Range factor of the Attacker, the current phase ends immediately.

Range cards cannot be used by or against support attacks. Played tactics cards are discarded.

Resolution Subphase

If the attackers modified penetration factor is equal to or greater than the defenders Defense factor, the defending unit is destroyed. When attacking Infantry, use the Infantry factor instead of the penetration factor. A destroyed unit goes to its casualty pile.

If the defending unit is not destroyed, it remains in play. Whenever a phase or turn ends, discard any attacking support card, to its casualty pile. Non-support attacking units stay in play.

If the defender was not destroyed, the attacker may play a Damage or Morale card with an "Out of Action" effect. A target put out of action is destroyed.

Free Attack Subphase

The active player may play a card from his hand that has the "Free Action" effect. This basically gives the player another attack phase. After every attack phase, the active player may have another attack phase as long as he plays a Free Action card.

Tactics Deck

Free Attacker Subphase

If the Free Action card also says "Same unit", then the attacker may be a non- support unit that already attacked this turn. Otherwise: Take the top card from your Formation deck and Put it face up on the table in front of you. This is the unit or support unit that is attacking this phase.

Attack Subphase

This is a repeat of Subphases 2-5 of the Attack Phase.

Full Exchange Rule

If your Formation deck ever runs out of cards, shuffle your reserve pile, this becomes your new formation deck. However, you cannot attack until your opponent uses up his formation deck. Everytime both players finish going through both their decks, this is known as a "Full Exchange".

Poor Visibility	Terrain	Lost Action, Can be used vs Support

Interpretation Of Cards

Each card is an abstraction that could mean several things but still just having one game effect. For example: The 'Trees' card might mean your opponent is slowed down by moving through forest, or that your unit has found cover in the woods. Anglos = British or Americans.

OOA Out of Action

Optional Rule: Add Random Factors

Requires use of dice. When attacking add 1D6 - 1D6 to the penetration factor. Note that negative results are possible.

Card Set Available!

Thank you Janne Thörne (jan.thorne@mail.bip.net) for this work of art.

Game Designers Notes

I originally planned doing a game with maps and chits, however there is at least 300+ games that already fit this description, so I decided it would be better as a light, quick, filler card game. You'll notice the American units are mostly inferior to the German units. Historically, this is more than made up for by the fact that as the war progressed, Allied manpower and production of materials swamped that of the Axis. To make things more fair, you may want to add cards to the Allies decks.

Tanker Skirmish

Introduction

Board & Card Game for 2 players.

The Board

Use an 8 x 8 Chessboard.

Victory

Destroy all enemy Bases.

The Deck

Use a regular set of 52 cards.

The Cards

Black cards are for Movement. Red cards are for Shooting. All Face cards have a numerical value = 1.

Pieces

Each player has a set of 16 pieces: 3 Bases (Command Post, Fuel Depot, Ammo Dump) 1 Helicopter 6 Tanks 6 Artillery

Bases

The 3 Bases include: Command Post, Fuel Depot, Ammo Dump

- If your Command Post is destroyed, draw 1 less card per turn in draw phase.
- If your Fuel Depot is destroyed, you may move a max of 1 unit on your Move Phase.
- If your Ammo Dump is destroyed, you may attack a max of once on your Attack Phase.

Bases cannot move or attack.

Helicopter

- The Helicopter may move over (through) other units.
- The Helicopter can move twice per turn.
- The Helicopter can shoot a max of 4 spaces.
- The Helicopter can move Diagonally.

Tanks

Tanks can move a max of 4 spaces. Tanks cannot attack Helicopters.

Artillery

Artillery can only use Face cards to move. If an Artillery Unit does not move it can attack twice per turn.

Setup

Setup your pieces on your 3 back rows. Max 1 piece per space. Bases may not be adjacent.

Shuffle the deck. Players draw 1 card each. High draw goes first.

Turn

Players take turns. Each turn has 4 phases:

- Draw Phase
- Move Phase
- Attack Phase
- End Phase

Draw Phase

Draw 3 cards. If the deck runs out, shuffle the discard & draw from it.

Move Phase

Discard a Move (Black) card to move a Piece the indicated number of spaces. Movement is orthogonal (Vertical or Horizontal) Units may not move through other units.

Attack Phase

Discard an Attack (Red) card to have a piece shoot the indicated number of spaces. Shooting is orthogonal or diagonal. Tanks may not shoot over other units.

End Phase

Max hand size is 5 cards. Discard excess cards.

Force Five

You may use any 5 as a Red 2 and a Black 3 or a Black 2 and a Red 3.

Strategic Six

You may discard a 6 to look at your opponent's hand.

Lucky Seven

You may discard a 7 to draw 2 cards.

Crazy Eights

You may discard an 8 to cause your opponent to draw 1 less card in his Draw Phase.

Naughty Nine

You may discard a 9 to negate a target move in opponent's Move phase.

Tough Ten

You may discard a 10 to negate a target attack in opponent's Attack phase.

Game Designers Notes

I bought a game with this same composition of plastic pieces, But felt the need to make my own rules.

Tarot Wars

Introduction

CCG style rules for Tarot Decks. There are so many nice Tarot Decks it's a shame not to game with them. Card game for 2+ players.

Victory

Reduce your opponent to Zero Life Points.

The Deck

Players share a common deck. Use any Tarot Deck on hand. There are 3 card types: Characters, Events, and Modifiers: Character cards stay face-up in play until killed.

Event cards are discarded as soon as they are played. Modifier cards stay in play attached face-up to a Character card.

Life Points

Each player starts with 50 Life Points. Use coins to keep track of LP. You can never have more than 50 LP.

Action Tokens

Use tokens for Action Tokens (AT). Every time a Character is used to Attack, Block, or some other action, put an AT on it. A Character with an AT can do nothing until the AT is removed in Beginning Phase.

Other Terminology

Target (Unspecified): Character or Opponent's Life Point Total.

Setup

Each player is dealt 7 cards. Cut the Deck High to determine turn order.

Turn Sequence

Players take turns. Each turn has 5 Phases:

- Beginning Phase
- Draw Phase
- Character Phase
- Attack Phase
- End Phase

Beginning Phase

Remove Action Tokens from your Characters.

Draw Phase

Draw 2 cards and put them in your hand. If the Deck runs out, shuffle the discard & draw from it. Every time your deck runs out, you lose 5 Life Points.

Character Phase

Put Character cards from your hand face-up into play. The Characters that you put into play in a single turn can have a maximum combined Base Force = 12 (The Tower counts as Force = 10 for purpose of above rule) You "Control" Characters you put into play. You may also put Modifier cards into play.

Modifier cards are attached face-up to a Character card. A Character can have a maximum of 1 Sword card attached.

Attack Phase

Your Characters may Attack. Characters attack a Target Opponents Life Point Total (LPT). An Unblocked Character does Damage equal to its Modified Force Total (MFT).

This Damage is subtracted from the players Life Points. The Target Opponent (The Defender) may use his Characters to Block. The Defender chooses which of his Characters block which Attackers.

Each pair of Blocking/Blocked Characters does damage to each other. Defenders may team up, but attackers cannot. If a single attacking character is being blocked by 2 or more Characters, the attacking character decides how the damage it does is distributed to the Blockers.

If a Character receives more damage in a Phase than its MFT, it is discarded. Blocked Characters do not damage the opposing LPT. Characters cannot attack the turn they are put into play.

End Phase

Maximum hand size = 7 cards. Discard excess cards.

Card List Notation

Four of Wands	E	Do 4 points of Damage to Target
Five of Wands	E	Do 5 points of Damage to Target
Six of Wands	E	Do 6 points of Damage to Target
Seven of Wands	E	Do 7 points of Damage to Target
Eight of Wands	E	Do 8 points of Damage to Target
Nine of Wands	E	Do 9 points of Damage to Target
Ten of Wands	E	Do 10 points of Damage to Target
King of Cups	C5	Draw a card if you play a Cup
Queen of Cups	C4	Action: Negate 2 points of Damage to Target
Knight of Cups	C3	If killed gain 10 Life Points
Page of Cups	C2	Gain Life = Damage caused by Page
Ace of Cups	E	Opponent cannot Attack this Turn
Two of Cups	E	Target Character cannot attack this Turn
Three of Cups	E	Gain 3 Life Points
Four of Cups	E	Gain 4 Life Points
Five of Wands	E	Gain 5 Life Points
Six of Cups	E	Gain 6 Life Points
Seven of Cups	E	Gain 7 Life Points
Eight of Cups	E	Gain 8 Life Points
Nine of Cups	E	Gain 9 Life Points
Ten of Cups	E	Gain 10 Life Points
King of Swords	C5	All your Swords do +2 Damage
Queen of Swords	C4	You may use Swords like Wands

Card Name	Type	Notes
Knight of Swords	C3	Attached Sword has Double Force
Page of Swords	C2	If Unblocked opponent must discard a card
Ace of Swords	E	All your Characters get Force +1 this turn
Two of Swords	E	Target Character cannot be Blocked
Three of Swords	M	Character gets Force +3
Four of Swords	M	Character gets Force +4
Five of Swords	M	Character gets Force +5
Six of Swords	M	Character gets Force +6
Seven of Swords	M	Character gets Force +7
Eight of Swords	M	Character gets Force +8
Nine of Swords	M	Character gets Force +9
Ten of Swords	M	Character gets Force +10
King of Pentacles	C5	Hand Size +3
Queen of Pentacles	C4	All Opponents Hand Size -1
Knight of Pentacles	C3	Immune to Opponents Event Cards
Page of Pentacles	C2	Cannot be Blocked
Ace of Pentacles	E	Discard all Modifier cards in Play
Two of Pentacles	E	Discard target Modifier Card
Three of Pentacles	E	Negate Card just Played
Four of Pentacles	E	Negate Card just Played
Five of Pentacles	E	Negate Card just Played
Six of Pentacles	E	Negate Card just Played
Seven of Pentacles	E	Negate Card just Played
Eight of Pentacles	E	Negate Card just Played
Nine of Pentacles	E	Negate Card just Played
Ten of Pentacles	E	Negate Card just Played

Notes

if you have more than 3 or 4 players, you may want to use more than one deck.

Variants Please

I welcome people to write up:

1. Variant rules for cards (For example- The Fool cannot Block)
2. Variant card rules for the whole deck (Rewrite all the cards- allow for more combos or different strategies) (Note in some decks the Knight & Page

are the Prince & Princess)

3. Variant card rules for different Tarot Decks.

(For example- You might want to use my card rules list for the Rider-Waite Tarot Deck and a different rules list for the Sacred circle Tarot Deck, and then play the Decks against each other. It would need to be following the same general rules to be playable though- The court cards being characters Wands as event damage Swords as character equipment Cups as health Pentacles as magic/metagame And the other cards as a variety of specials - character, modifier and event.)

ELEMENTAL DECK CARD LIST (by Peter Cobcroft)

Card Name	Type	Notes

Card Name	Type	Notes
The Hanged Man	E	Discard Target Character
Death	E	Every player must discard one of their Characters in Play
Temperance	E	Search Discard for Card & put it in your hand
The Devil	C11	Action: Opponent Discards 1 card
The Tower	C20	The Tower Cannot Attack
The Star	E	Draw 3 cards
The Moon	E	Opponent must discard entire hand
The Sun	E	Take an extra turn after this one
The Last Judgment	E	Discard all Characters in Play
The World	E	Search Deck for Card & put it in your hand
King of Wands	C6	Adds 1 Force to other Wand Characters (earth elemental)
Queen of Wands	C4	You may use Wands like Swords
Knight of Wands	C3	Attached Wand has Double Force
Page of Wands	C2	Draw a card if you play a Wand
Ace of Wands	E	All your Characters get Force +1 this turn when blocking
Two of Wands	E	Do 2 Damage to all Targets in play (earthquake)
Three of Wands	M	Character gets Force +2 when blocking, +4 if discarded (earthworks)
Four of Wands	M	Character gets Force +3 when blocking, +5 if discarded (earthworks)
Five of Wands	M	Character gets Force +4 when blocking, +6 if discarded (earthworks)
Six of Wands	M	Character gets Force +5 when blocking, +7 if discarded (earthworks)
Seven of Wands	M	Character gets Force +6 when blocking, +8 if discarded (earthworks)
Eight of Wands	M	Character gets Force +7 when blocking, +9 if discarded (earthworks)
Nine of Wands	M	Character gets Force +8 when blocking, +10 if discarded (earthworks)
Ten of Wands	M	Character gets Force +9 when blocking, +11 if discarded (earthworks)
King of Cups	C6	Adds 1 Force to other Cup Characters (water elemental)
Queen of Cups	C4	Action: Negate 2 points of Damage to Target
Knight of Cups	C3	If killed gain 10 Life Points
Page of Cups	C2	Cup cards give +2 Life
Ace of Cups	E	Opponent cannot Attack this Turn
Two of Cups	M	Target Character cannot block (quicksand).
Three of Cups	E	Gain 3 Life Points
Four of Cups	E	Gain 4 Life Points
Five of Cups	E	Gain 5 Life Points
Six of Cups	E	Gain 6 Life Points
Seven of Cups	E	Gain 7 Life Points
Eight of Cups	E	Gain 8 Life Points
Nine of Cups	E	Gain 9 Life Points
Ten of Cups	E	Gain 10 Life Points
King of Swords	C6	Adds 1 Force to other Sword Characters (fire elemental)
Queen of Swords	C4	You may use Swords like Wands
Knight of Swords	C3	Attached Sword has Double Force
Page of Swords	C2	If Unblocked opponent must discard a card
Ace of Swords	E	All your Characters get Force +1 this turn when attacking
Two of Swords	M	Target Character cannot attack (wall of fire)
Three of Swords	M	Character gets Force +2 when attacking, +4 if discarded (fireball)
Four of Swords	M	Character gets Force +3 when attacking, +5 if discarded (fireball)
Five of Swords	M	Character gets Force +4 when attacking, +6 if discarded (fireball)
Six of Swords	M	Character gets Force +5 when attacking, +7 if discarded (fireball)
Seven of Swords	M	Character gets Force +6 when attacking, +8 if discarded (fireball)
Eight of Swords	M	Character gets Force +7 when attacking, +9 if discarded (fireball)
Nine of Swords	M	Character gets Force +8 when attacking, +10 if discarded (fireball)
Ten of Swords	M	Character gets Force +9 when attacking, +11 if discarded (fireball)
King of Pentacles	C6	Adds 1 Force to other Pentacle Characters (wind elemental)

Card Name	Type	Notes
Queen of Pentacles	C4	Ignores Opponents Modifier Cards
Knight of Pentacles	C3	Immune to Opponents Event Cards
Page of Pentacles	C2	Cannot be Blocked
Ace of Pentacles	E	Remove all modifier cards and deal randomly (hurricane)
Two of Pentacles	E	Move any card on the table to any player (gust)
Three of Pentacles	E	Move card just played to own Character of choice (wind)
Four of Pentacles	E	Move card just played to own Character of choice (wind)
Five of Pentacles	E	Move card just played to own Character of choice (wind)
Six of Pentacles	E	Move card just played to own Character of choice (wind)
Seven of Pentacles	E	Move card just played to any Character of choice (tornado)
Eight of Pentacles	E	Move card just played to any Character of choice (tornado)
Nine of Pentacles	E	Move card just played to any Character of choice (tornado)
Ten of Pentacles	E	Move card just played to any Character of choice (tornado)

Notes

- Wands = Earth
- Cups = Water

- Swords = Fire

- Pentacles = Air

A Character may only have one Sword and one Wand card.

Tavern Brawl

Introduction

Card Game for 2 (or more) players. Common Deck CCG Format. Fantasy Theme.

A Fight breaks out at Ye Olde Dragon Tavern (& Inn). Recruit Characters to "your side" to knock out your opponent's Characters and drink all his beer.

Victory

Reduce your opponent to zero Beers.

Tidbits

Use coins for damage and bottle caps for beers.

Beers

Each player starts with 10 Bottles of Beer on the Wall.

The Deck

Players share a common Deck. The deck contains 1 copy of each card listed.

Characters

Characters have 2 Stats: Hits & Strength Each Character has one or more traits, such as Mage or Fighter.

Setup

Each player draws 7 cards. The biggest player goes first.

Turn Sequence

Players take turns. Each turn has 3 phases: Quaff Phase I'll get you for that Phase Brawling Phase

Quaff Phase

Draw 3 cards. Max hand size is 7 cards. Discard excess cards. If the Deck runs out, shuffle the discard & draw from it.

I'll Get You For That Phase

Put characters from your hand into play face up onto the table. You may attach positive modifier cards (from your hand) to new characters. Your opponent may attach negative modifier cards to your new characters.

You may attach weapon cards to your characters. A Character may only have one Weapon attached. (Note all weapons are makeshift. Swords & such were checked at the door) Only Fighters may attach Armor cards.

Brawling Phase

You may attack with your Characters. Assign each of your Characters to attack 1 target opposing Character. Each of your Characters can only make 1 attack.

Each target opposing Character can only be attacked by 1 of your Characters. (If you have more characters, some will not be able to attack.) Your Character does damage equal to the characters Strength. An attached Weapon will increase a Character's Strength.

You may play up to 1 Attack card on a Character to increase his Strength for this turn. Your opponent may play a Defense card to completely negate an Attack. Record damage on Character cards with coins (1 cent = 1 point of damage).

If (& only if) all of you opponent's Characters have been attacked, your remaining Non-attacking Characters may drink 1 Bottle of Beer off the Wall. Your opponent loses 1 Beer for each drinking Character. If your opponent is reduced to zero beers (start total = 10) he loses the game.

Stunned Characters cannot Attack or use Defense cards. At the end of the phase, Discard Attack & Defense cards that were played during the phase. Employees may not attack each other.

Instead of attacking, or Drinking Beer, a Character may eat Food (Discard Food card) Instead of attacking, drinking, or eating, a Mage may cast a spell (Discard Spell card) When attacking a base 1/10 Character, flip a coin. If Tails the attack is negated.

Chug	-	-	XQ	Character drinks 2 Beers

Tdo Adventures

Introduction

TDO Adventures...RPG Variant of TDO...One player is the Game Master (GM). The other players are Planeswalkers adventuring together.

Random Box Table

1D10	Box	1D10	Box
1.	Red	6.	Multicolor
2.	White	7.	Artifact
3.	Blue	8.	Land
4.	Green	9.	Pick one of the above
5.	Black	0.	Reroll

Theme Decks

The Game Master uses Theme Decks as described by the Theme Deck Odyssey Format Rules Mainpage: [Mtg Tdo: Theme Deck Odyssey Format. 40 Card Decks..MTG TDO Theme Deck Odyssey Format](#)

PLAYER/PLANESWALKER DECKS AND STOCK-PILES Each player gets a stockpile of cards. There is no limit on the size of the stockpile. A starting stockpile starts with 10 random cards from each of the 5 colors, 10 basic lands of each type, 10 random artifacts, and 10 random multicolor cards.

Each Player uses their stockpile cards to make a Planeswalker Deck (PWD). A PWD has exactly 100

Draft Card Boxes

The GM must prepare Theme Decks plus:

- 8 Boxes of Random Cards for Drafting:
 - 1 Box for each color, 1 Box of Lands (Basic & Multi),
 - 1 Box of multicolor cards, 1 Box of Artifacts
- Each box will have mixed rarities.

cards.

Description Of Play

Players team up to defeat the GM. The GM starts each battle with Life = 10 plus 10 per player. After a victory against a GM Theme Deck, each player gets 1D6 Treasures (TZ) and 1D6 Experience Points (XP).

After a battle (not just before) players can swap out cards between their stockpile and their deck. The GM determines what the planeswalkers encounter, or he can have them draw a random card from the Adventure Deck:

Adventure Deck

Name	Descr
Island Hopping	Players must fight a Blue Deck
Stuck in a Swamp	Players must fight a Black Deck
Traversing the Plains	Players must fight a White Deck
Scale a Mountain	Players must fight a Red Deck
Lost in the Forest	Players must fight a Green Deck
Trouble in the City	Players must fight a Multi-color Deck
Advance the Plot	Fight a Theme Deck of GM's Choice
Looking for Trouble	Fight a Theme Deck of Players Choice
Boss Fight	Theme Deck of GM's choice. GM has +10 Life
Dissension in the Ranks	Players fight each other in a Free For All. All get 1D6 XP
Goblin Invasion	Players must fight a Goblin Deck
Night of the Zombies	Players must fight a Zombie Deck
Troubled Waters	Players must fight a Merfolk Deck

Name	Descr
Pursued by Wolves	Players must fight a Wolf Deck
Bazaar	Players get 1 random card from one random box for 5 TZ
Alchemist	Players may discard a card to draw a card from any box for 3 TZ
Mentor	Players get 1D6 XP each
Temple of Power	Players may swap out 1 Power card for 5 TZ
Kithkin Allies	Search White Box for a Kithkin Card; 1 random player gets it
Soldier Allies	Search White Box for a Soldier Card; 1 random player gets it
Forest Allies	Search Green Box for an Elf Card; 1 Random player gets it
Long Journey	Each player may draw a random land card for 3 XP
Artificer	Players get 1 random card from Artifact box for 5 TZ
Thieves	Each Player loses 1D6 TZ
Rumors	Players can swap cards between Deck and Stockpile before next battle
Difficult Journey	Each player has 1D6 less life for next battle
Wizard School	Players may convert TZ into XP, on a 1 to 1 basis
Tavern	Look at next 3 cards in Adventure Deck. Each player spends 1 TZ

Planeswalker Identities

Players should name their planeswalker self. At the GM's Option, each player should get 1 Creature Bonus Ability. This gives creatures of that race/class +1/+1. Examples would include: Humans, Elves, Goblins, Merfolk, Minotaurs, Giants, Wizards, Soldiers, Rogues, Dragons, Golems, etc.

Treasure And Experience Points

After winning a Battle (Their Decks vs the GM's Deck) each player gets 1D6 Treasures (TZ) and 1D6 Experience Points (XP). Players may give each other Treasure but not Experience Points. A player can store any number of Treasures.

A player can store a maximum of 10 Experience points. If he gains more, he Must spend the excess immediately or lose it.

Experience Point Expenditure Table

Cost	Purchase:
5	Draw 1 random card from target Box of your Choice
2	Discard a card you just drew to draw another from same Box
3	Discard any card from your Stockpile to Draw 1 random card from target Box of your Choice
1	Next Battle start with 1 Basic Land in play of your Choice
1	Next Battle start with 5 extra Life
1	Next Battle draw 1 extra card in your starting hand.

Spending Treasure

Treasure can be spent like XP's, however Treasure can only be spent at certain times and Locations and often for very limited purposes.

Balance

The GM will have the advantage of tight premade theme decks AND the ability to make up the rules as he goes along. The GM's word is final in all disputes. The other players will have the advantage of their numbers. The GM will probably want to limit players access to color hosing and land killing cards.

If all the players make Mill decks, the GM might find

this problematic as well. Because the GM has most of his cards already in his theme decks, the Pool of cards available to the players will probably be skewed to be underpowered. If the players get too powerful, the GM can shift the balance by giving himself Advantages such as extra turns, starting lands, extra cards, extra life, etc.

depending on the scenario.

Gm Powers

The GM gets 1 roll on the GM Power Table (before the battle) for each extra planeswalker player after the first:

Gm Power Table

1D10	Power:
1	10 extra Life
2	Draw 1 extra card on each of your turns
3	Put 1 extra land in play on each of your turns
4	Start game with 1 basic Land (from deck) in play
5	Hand Size +1 and start game with 1 extra card in hand
6	Take an extra attack phase on each of your turns
7	Start with 1 non-land card in play
8	Untap your lands 1 extra time during each of your turns
9	Once per game, you may shuffle your discard into your deck
10	Once per game, you may counter any target spell for free

Temples & Swords

by Viki Joshua

Introduction

This game simulates the growth of ancient empires. Each player leads a young empire and controls its growth through its development. The units used to represent people are populations and monetary units are measured in gold points (GP).

Victory

Victory occurs when, at the end of his turn, a player has 20 victory points (VP) or has destroyed or captured all enemy cities, armies and populations.

Setup

Use a piece of hex paper and color equal numbers of squares green for grassland and yellow for desert. Each player chooses a starting grassland hex and puts a city and 3 population points on that hex. No two starting hexes may be closer than three hexes from each other.

Order Of Play

Each player rolls a dice. High roll starts, then play goes clockwise. Each player moves through each phase before passing play on to the next player.

Phases

1. Population Distribution Phase
2. Upkeep Phase
3. Tech Phase
4. War Phase
5. Build Phase
6. Tax Phase
7. Disaster Phase
8. Population Change Phase

Population Distribution Phase

All your populations are, for each given turn, in one of two forms: basic and laborer. In basic form, a population lives under your rule, being taxed and living off the land. If a population is in laborer form, that population is under your hire, building your projects and armies. Decide how many of your populations you wish to hire as laborers. All other populations are in basic form.

Upkeep Phase

Expend one GP for each army and laborer population under your control.

Tech Phase

Expend on GP per city to gain one tech roll each. Additionally, you can spend two GP per city to gain an additional tech roll. In other words, if you have one city, you can spend one GP to gain a tech roll and another two to gain another tech roll. However, if you have two cities, you can spend two GP, one for each city, to gain two tech rolls, and then can spend two GP per city if you want more. Note that you cannot gain more than two tech rolls per city.

For each tech roll bought, you may roll one die. Receive tech points based on the result.

Result	Tech Points Received
D6	Result
1-3	1
4-5	2
6	3

If a player gains ten tech points, he may gain one random advance. Roll three times on the tech chart and choose one of the three. Alternatively, a player may gain an advance already gained by another player.

War Phase

You may move each of your armies one hex. If an army is located in a hex with a road can move across two adjacent hexes with roads, you may move that army across those two hexes. Any horseman unit may move twice. After the first movement, the unit may move again in the same way.

If you move any of your armies into a hex with any enemy cities, populations or armies, you may (but do not have to) attack those enemy holdings

Combat Moves in the following steps

1. Attacker declares attack
2. Attacker rolls for damage
3. Defender rolls for damage
4. Repeat Damage Rolls
5. Resolve combat

Step 1: Attacker declares attack. This phase requires the attacking player, during his turn to state which of his units that occupy hexes with enemy populations, units or cities will attack. Note that the attacking player must declare all his attacks before moving to the next step.

Step 2: Attacker rolls for damage. Handle combat in the same way as Culture and Conquest. Roll three dice. Destroy one enemy unit for every result of a one on a die. One special note for advanced units. Advanced units have the ability to attack with more than three dice. If you have advanced units in your force, you may choose to use these units. Before each roll, if you still have advanced units in your force, you must declare before rolling that you want to use a specific type of special unit. If you choose to use these units, you may roll the appropriate number of dice in combat. However, if you take any casualties this turn, you must destroy all units of that type before destroying any other type of unit.

Step 3: Defender rolls for damage. Defender rolls for damage. Use same process as number 2.

Step 4: Repeat Damage Rolls. If any side has remaining units and the attacker still wishes to fight, repeat steps 2 and 3.

Step 5: Resolve combat. If all the defender's units have been destroyed, go to this step. If a unit attacks an enemy hex that has no enemy units, skip to this hex. The victorious attacker receives various things from the defeated enemy.

First, if there are any populations in the hex, the victorious army receives 2 gold for each enemy population in the hex.

Second, the victorious army may receive control of the hex and all populations and cities in the hex if he has at least half as many units as the enemy populations. For instance, if after a battle, a player has two units surviving. If the captured hex has four or less populations in the hex, the player takes control of the populations and the hex. If the hex has five or more populations, he does not take control.

Third, the victorious army may enslave the captured populations. A victorious army may enslave populations equal to half the populations in the hex, rounded up. A victorious army may also not take more slaves than it has surviving units. Note that slaves must be taken as soon as the hex is captured. A player cannot capture a hex and then take slaves two turns later. A slave becomes a unit like a military unit, but you do not have to pay upkeep on it. A slave can create one labor point a turn in any hex it is located in. It moves like a basic military unit.

Build Phase

All laborers produce one build point. These build points are used on projects in the hexes they occupy. Projects are built over a matter of several turns, build points expended on projects are cumulative across different turns. Below is a chart of all possible projects. See tech notes for more explanation.

Project Name	Build Points Needed	Use	Prerequisites
City	10	Various, see rules	None
Road	3	Move bonus, gold bonus	None
Temple	5	1 VP	Religion, City
Walls	3	+1 die while defending	Masonry, City
Marketplace	5	Double Gold in hex	Coinage, City
Library	5	1 free tech point per turn	Literature, City

Also a chart of all possible military units. The Roll

value is the number of dice used in combat.

Unit Name	Build Points	Roll	Special	Preq.
Soldier	2	3	City	
Swordsman	2	4	City, Iron	
Horseman	2	4	3 roll in defense, double movement	City, Equestrian

Tax Phase Gain gold points equal to half the sum of all your basic populations. Also gain gold from all projects, such as cities, roads and temples as listed below

- Each hex containing city - 1 gold
- Each hex containing road - 1 gold

- Each hex containing city and a road - 3 gold
- Each hex containing marketplace - double normal gold intake.

Disaster Phase Roll 1d6. If 1 roll once on the Disaster chart and apply results

F6	Name	Description
1	Flood:	1 Random Grasslands hex loses 1d6 populations
2	Earthquake:	1 Random City hex loses 1d3 populations and all improvements in the city.
3	Disease:	1 Random Grasslands hex loses 1d3 populations for the next three turns
4	Drought:	2 Random Grasslands hexes lose 1d3 populations
5	Famine:	2 Random Desert hexes lose 1d3 populations
6	Warbands:	1d6 Soldiers attack random border hex next turn (after you move your units). If you are defeated, all populations in the hex are destroyed.

Population Change Phase

Phase 1: Harvest Phase For each basic population living in a grassland hex, gain two harvest points. For each basic population living in a desert hex, gain one harvest point

Phase 2: Growth Phase. If any hex has at least as

Population	Migrate if
D6	N
1	6+
2	5+
3	4+

If migration occurs, instead of adding a new population to the given hex, move one population to an adjacent hex of your choosing.

- If you have more than three populated hexes, roll twice
- If you have more than six populated hexes, roll three times
- If you have more than nine populated hexes, roll four times.

Tech Advances Chart

1. Military Doctrine- This advance demonstrates that your civilization has grasped the concepts of organized warfare. Based on your advanced discipline and military control, you gain one extra roll on all combat bonuses.
2. Equestrian- This advance demonstrates your civilization's mastery of horseback riding and its uses. The horseman unit is now available, which attacks with an extra combat dice and moves twice as fast as a normal unit.
3. Metal Working- This advance demonstrates your civilization's understanding of iron other strong metals. These substances are much stronger than stone and wood, and this strength allows you to build a swordsman unit, which fights with an extra combat die in all situations.
4. Religion- Your civilization has developed a complex religious system. You may send your workers out to build temples in your cities in celebration

many harvest points than populations, that hex gains one population. Maximum populations in a hex are six for grassland hexes and three for desert hexes.

Phase 3: Migration Phase. Find the hex with the most populations (if there are several tied pick one), roll 1d6. Depending on the result and the population of the hex, determine if migration occurs

Population	Migrate if
4	3+
5	2+
6	1+

of your gods, which gives you victory points. Each temple built gives you one victory point.

5. Art- Your civilization has created its own unique art form. Though this advance gives you no extra advantages in play, it does make up for its lack of in-game use by granting you two VP instead of one.
6. Masonry- Your civilization has developed engineering and architecture, which allow you to easier build projects. Build points for Temples and Cities are reduced 20% and you are also allowed to build walls to protect your cities, giving are city defenders one extra combat die.
7. Coinage- Your civilization has developed a system of economic values that aids greatly in trade. You may build marketplaces in your cities, centers of trade and wealth, which double the gold a hex produces.
8. Writing- Your civilization has developed its own written language. You may construct libraries in your cities, which hold you literary works and enhance your technological power. Each library gives you one extra tech roll per turn.

Victory

Players gain one victory point for each city, temple and advance they have. If, at the end of his turn, a player has amassed ten victory points, he wins the game. Alternatively, if a player has captured all enemy populations and cities, he also wins the game.

Terminator Skirmish

Introduction

2 Player Skirmish Game. Terminator Theme. One player is Skynet (Robots). The other player is the Resistance (Humans).

Victory

Destroy opponents Base.

The Board

Use an 8x8 Grid. The Battlefield is a destroyed City.

Terrain Spaces

Terrain Types: — Wasteland (relatively clear) — Bone Fields (Demoralizing to Humans) — Rubble (Good Hiding Spots for Humans) — Ruins (Good Hiding and Cover) Humans in Ruins take 1 less Damage from Attacks — Massive Debris (collapsed Highways, etc.)

Human Unit List

Unit:	#	MM	Hits	Notes:
Outpost	1	0	10	Base (Sewers mostly)
Survivors	4	1	1	Former Civilians
Scouts	4	3	1	Light Military
Soldiers	4	2	2	Heavy Military
Vehicle	2	4	3	Trucks, APC's, Tanks
Commandos	1	3	4	Elite Military, Leaders, and Heroes

Robot Unit List

Unit:	#	MM	Hits	Notes:
Complex	1	0	10	Base (Factory)
Mini Hunters	2	2	1	(Small) Frisbee Sized Hovercraft
Infiltrators	3	2	2	Human Impersonators
Terminators	3	2	3	Heavy Endoskeletons
Moto Trmntrs	2	4	1	(Small) Motorcycle Configuration
Harvester	1	1	4	(Large) Giant Bipedal Configuration
HK Tank	2	2	4	(Large) Tread Legs
HK Aerial	1	4	3	(Flying, Large) Multiple Configurations
T-1000	1	3	4	Advanced series Terminators

Unit List Notation

Number of such Units

MM Maximum Move (Normal)

Hits When reduced to 0 Hits the Unit is destroyed

HK Hunter Killer

Ground units may not enter or attack through Certain cards will reference these Terrain Types. Indicate Terrain type for each map space. Distribution of Terrain types is up to your imagination.

The Decks

Each player gets his own unique Deck. Card Types include:

A Attack

D Defense

M Movement

X Special

Units, Stacking, & Movement

Each side gets a set of units that move around on the board. Units cannot stack. Friendly units may move through each other.

Units

Use Counters or Chits for Units. Or if you have them, some appropriate plastic figures or metal miniatures

Hits, Damage, & Counters

Use Damage Counters or Dice placed next to the Unit to keep track of Damage (Hits Lost).

Setup

Each player places his units in any of his last 3 rows. Units may not stack. Shuffle the deck.

Flip a coin to see who goes first.

Turn Sequence

Players take turns. Each turn has 3 Phases.

1. Supply Phase
2. Action Phase
3. End Phase

Supply Phase

Draw 3 cards from your deck and place them in your hand.

Action Phase

Play cards from your hand (no limit). Use Move cards to move one of your units up to the indicated number of spaces. Your opponent may use certain Special cards to negate a Move.

Use Attack cards to have a unit attack a target unit at the exact range indicated by the card and Do damage to the target as indicated by the Damage rating of the attack Card. Your opponent may use Defense cards to reduce Hits caused by an Attack.

End Phase

Max hand size is 7 cards. Discard excess cards.

Resistance Card List

Name:	#	Type	Range	Dam	Notes:
Pipe Bombs	4	A	1	1	Any Unit may use
Small Arms	4	A	2	1	Any Unit may use
Demolitions Charge	2	A	1	4	Not Survivors or Scouts or Vehicles
Heavy Weapons	4	A	3	2	Not Survivors or Scouts
Plasma Weapons	3	A	2	3	Not Survivors or Scouts
Missile Launchers 2	A	4	4	Not Survivors or Scouts	
Scurry	8	M	1	-	Any Unit may use
Hurry	4	M	2	-	Any Unit with at least Move 2
Motor	4	M	3	-	Any Unit with at least Move 3
Pedal to the Metal	2	M	4	-	Any Unit with at least Move 4
Hide	2	D	-	4	All Terrain except Wasteland
Cover	2	D	-	3	Units in Ruins and Debris
Dodge	2	D	-	2	Not Base
Stealth	2	D	-	4	Scouts & Commandos
Armor	2	D	-	1	Not Survivors or Scouts
Medical	2	X	-	-	Unit recovers 1 lost Hit
Bug Out	1	X	-	-	Move Base to any empty space on back 3 rows
Mission	1	X	-	-	Draw 3 Cards
Call A-10 Airstrike	1	A	5	5	Not Survivors
Suicide Attack	1	A	1	4	Destroy Attacker (even if Defense card used)
Reprogram	1	X	1	-	Use by Commando. Gain control of Robot
Reinforcements	1	X	-	-	Gain back random dead Unit. Place in back row
Opportunity	2	X	-	-	See Rules

Skynet Card List

Name:	#	Type	Range	Dam	Notes:
Hand to Hand Combat	2	A	1	2	Terminators & Infiltrators
Short Range Weaponry	4	A	1	1	Any non-Large Unit may use
Marksman	2	A	4	1	Terminators & Infiltrators

Name:	#	Type	Range	Dam	Notes:
Mini guns	2	A	2	3	Any non-Small Unit may use
Plasma Guns	4	A	2	2	Any Unit may use
Weapon Turrets	3	A	3	3	Base & Large Only
Missile Salvo	2	A	4	4	Large Only
Hunt Mode	8	M	1	-	Any Unit may use
Advance Mode	4	M	2	-	Any Unit with at least Move 2
Pursuit Mode	4	M	3	-	Any Unit with at least Move 3
High Speed Mode	2	M	4	-	Any Unit with at least Move 4
Bullet Proof	2	D	-	1	Any non-Small Unit
Armored Chassis	2	D	-	3	Any non-Small Unit
Evasive Maneuver	2	D	-	3	Not Base
Metallic Strength 2	D	-	1	Any Unit	
Deflection	2	D	-	2	Any Unit
Repairs	2	X	-	-	Unit recovers 1 lost Hit
Primary Objective 1	X	-	-	Draw 3 Cards	
IR Detection	1	X	-	-	Negate a Defense Card
Pinned Down	1	X	-	-	Negate a Move Card
Infiltration	1	A	1	4	Infiltrator Only
Transport Ship	1	X	-	-	Move a non-base Unit to any empty space.
Replacements	1	X	-	-	Gain back random dead Unit. Place in back row
Opportunity	2	X	-	-	See OC Rules

Opportunity Card Rules

Opportunity Cards (OC) are wild cards that can be used (played/discarded) for multiple Effects: — Backup: Use to draw 2 cards — Demoralized: Negate a Human move into or out of a Bone field — Critical Hit: Cause an Attack to do 1 extra Damage — Disruption: Opponent must discard 1 random card from hand — Small Target: Negate an Attack made by a large unit

— Exposed: Attack Range = 1 to 4 and Damage = 2 to unit in Wasteland Terrain — Intelligence Gathering: Look at Opponents Hand and next 5 cards in both decks

Terratain

Introduction

An abstract strategy game of unit placement and scoring for 2+ players.

The Board

The board is a grid of 9 squares known as territories. These territories are numbered 1-9.

1	2	3
4	5	6
7	8	9

Each territory is further divided into a grid of 9 squares known as plots. The plots in each territory are also numbered 1-9. The map consists of (9 x 9) 81 plots.

Counters

Cardboard counters are also referred to as chits. Each player needs a set of counters of a unique color. There are 70 counters in each set.

There are 7 types of counters in each set. Each set includes 10 of each type of counter. Counter Types:

- 1. Temple
- 2. Castle
- 3. Town
- 4. Farm
- 5. Mine
- 6. Palace
- 7. Armies

The first six types of counters are called structures. Army chits are not structures. Temples represent religious influence.

Castles represent military resources. Towns represent economic resources. Farms represent agricultural resources.

Mines represent mineral resources. Palaces represent political influence. Armies represent use of military force.

Setup

Each player gets a set of counters. Players keep their counter sets in separate opaque cups. These are called draw cups.

Determine turn order by a flip of a coin.

Turn Sequence

Players take turns. Each turn has 4 phases:

- 1. Draw Phase
- 2. War Phase
- 3. Build Phase
- 4. End Phase

Draw Phase

Draw 2 random chits from your cup of chits. These chits go into your reserve pile. Reserve pile chits are played face up in front of you.

If your cup is empty place your discard pile into it.

War Phase

You may discard one army chit from your reserve pile. Discard an enemy structure from any one plot. Each player has a discard pile to put his discarded chits.

Build Phase

Place one of your structure chits in an empty plot. You cannot place your castles next to enemy castles. You cannot place your temples next to enemy temples.

You cannot place your palaces next to enemy palaces.

End Phase

Discard chits from your reserve pile to keep it at a maximum of 4 chits.

The End Of The Game

The game ends when all plots are occupied.

Victory

The player with the highest total score is the winner.

Scoring

At the end of the game players determine their scores. Points are accumulated from a variety of scoring combinations. Add up all points to get your total score.

You control a territory if you have the most structures in it. "In a row" can mean orthogonal or diagonal.

Points	Scoring Combo
5	Having 5 structures in a territory
6	Having 6 structures in a territory
7	Having 7 structures in a territory
8	Having 8 structures in a territory
9	Having 9 structures in a territory
5	Control of the center territory
9	Control 3 territories in a row
8	Control of a square of 4 territories
8	Control of the 4 corner territories
3	Have the most Temples on the board
3	Have the most Farms on the board
3	Have the most Castles on the board
3	Have the most Towns on the board
3	Have the most Mines on the board
3	Have the most Palaces on the board
3	Having 3 structures in a row (6 if of the same type)
4	Having 4 structures in a row (8 if of the same type)
5	Having 5 structures in a row (10 if of the same type)
6	Having 6 structures in a row (12 if of the same type)
7	Having 7 structures in a row (14 if of the same type)
8	Having 8 structures in a row (16 if of the same type)
9	Having 9 structures in a row (18 if of the same type)
6	Having one of each of the 6 types of structures in a territory

Variants

Mountains: Have some plots contain mountains.
 Mines must be placed on or next to mountain plots.
 Rivers: Have some plots contain rivers.

Farms must be placed on or next to river plots.

Game Designers Notes

Advanced color wars.

Play On Line

Super Duper Games

Terrible Tales

To Play

This is a game of story telling. Shuffle the Deck. Each player draws 5 cards. The oldest or the youngest player starts.

A player starts to tell a story. Players try to incorporate the idea on one of their cards into the story. If a player does this he may discard that card.

After discarding, the player to his right continues the story. The story ends when the last player discards his last card. If a player manages to say something very witty, or clever, or profound, or poetic, or funny, or memorable, the other players may award him one or more Story points.

At the end of the story, the player with the most Story points wins.

Optional Rules

Players may deduct Story points for poor performances. A player may at any time deduct a Story point to discard a card & draw a new one. For a longer story, players draw 7 cards instead of 5.

Card List

- Puzzle: Paradox, Enigma, Mystery
- Internal conflict
- Dragon
- Giant: Ogre, Cyclops
- Quest: Geas, Mission
- Knight: Cavalier, Paladin
- Princess: Damsel in distress
- King: Emperor, Leader
- Sword: Weapon
- Armor: Shield, Helmet
- Siege: War machines
- Battle: Battlefield
- Squire: Youth
- Assassin: Murder
- Illusion: Phantasm
- Magic: Spells
- Curse: Enchantment, Hex
- Healing: Healer, Herbs
- Duel: Gladiators, Sword fight, Mage Duel
- Possession, Control
- Potion: Love Potion
- Ring, Jewelry, Necklace, Brooch
- Staff: Wand, Rod
- Artifact: Relic, Antique, Fossil, Remains
- Book: Tome, Library, Scrolls
- Priest: Cleric, Holy Man
- Warrior: Warrior Maiden
- Wizard: Mage, Sorcerer

- Thief: Theft, Pickpocket, Cutpurse, Burglar
- Bandits: Pirates, Thugs
- Love: Romance
- Conquest
- Law
- Chaos
- Light: Good
- Darkness: Evil
- Crone: Witch
- Time: Old Age, Waiting, Cycles
- Hero: Heroine
- Chasm: Ravine
- Mountain
- Volcano
- Swamp
- Jungle
- Flying
- Gateway: Door
- Treasure
- Village: Hamlet, Town
- City
- Barbarians: Savages, Natives
- Forest
- Sea Voyage
- Archer, Bow, Arrows
- Undead: Vampire, Mummy, Zombies, Skeletons
- Maze: Labyrinth
- Dungeon
- Wizards Tower
- Desert: Thirst
- Merchant: Caravan, Guild, Trade
- Reward
- Guardian, Defender, Protector
- Druid, Nature Worship
- Ranger: Woodsman, Scout
- Demon: Devil
- Angel: Demi-god, God
- Ghost: Spirit
- Castle: Keep, Fortress
- Mine: Gems, Gold
- Prison: Escape, Rescue
- Ingredients, Supplies, Materials
- Humanoids: Orcs, Goblins
- Mythic Monster: Medusa, Gryphon
- Cats: Lions, Tigers, Panthers
- Horse: Steed
- Birds: Songbird, Bird of Prey
- Insects: Swarm
- Reptiles, Amphibians: Frogs, Snakes, Dinosaurs
- Fish: Fisherman, Shark, Eel, Piranhas
- Dream: Vision, Prophecy
- Trap: Poison, Pit, Captured
- Scholar: Sage, Savant, Student, Apprentice

- Oracle, Divination, Astrology
- Fairy: Pixies, Nymphs, Dryads, Sprites, Elves, Dwarves, Gnomes
- Temple: Monks
- Storm: Cyclone, Blizzard
- Cataclysm: Earthquake, Eruption
- Ruins: Graves
- Performer: Acrobat, Circus, Clown, Jester, Juggler, Dramatist
- Betrayal: Treason
- Music: Bard, Instruments
- Secret: Secret Passage, Hidden, Invisible
- Surprise: Ambush
- Trick: Riddle
- Runes: Warning, Message
- Transformation: Polymorph, Changeling
- Fabulous Beast: Unicorn, Questing Beast
- Torture: Suffering, Oppression
- Frozen Wastes: Tundra
- Nobles: Reputation, Rank, Social Class
- Slaves: Peasants, Servants
- Elements: Earth, Air, Fire, Water
- Conjuraction: Summoning
- Invention: Machine, Golem
- Ritual: Sacrifice
- Rebellion: Uprising
- Intrigue: Gossip, Rumors
- River, Stream, Lake

Tesla & Edison

Introduction

Card game for 2 players. Setting: Turn of the Century United States. One player takes the role of Edison. The other player takes the role of Tesla.

Victory

The player to score the most total Invention Points worth of Cards in their victory pile at the end of the game wins. The game ends when there are less than 10 cards left in the deck and discard combined.

The Research Deck

Players share a common deck.

Round Sequence

Each Round has 5 phases:

1. Discovery Phase
2. Invention Phase
3. Research Phase
4. Patent Phase
5. Laboratory Phase

Discovery Phase

Place the top 10 cards from the deck face up in the center of the table. These 10 cards are called Discovery cards. If the deck runs out, shuffle the discard and draw from it.

Invention Phase

Players take turns selecting 1 Discovery card and putting it in their hands. Edison goes first on odd rounds. Tesla goes first on even rounds. This continues until all 10 Discovery cards have been taken (5 by each player).

Research Phase

You may play up to 2 cards from your hand for the following special abilities. They must be cards you

can use (example: Tesla cant use an Edison Only card) Edison first, Tessler second. – Discard an Industry card to draw 2 cards from the deck.

– Discard a Theory card to draw 5 cards, discard 4 of them, and keep 1. – Discard a Power card and 1 other card to draw 3 cards. – Discard a Sight card to look at opponents hand then draw 3 cards and keep 1.

– Discard a Chemistry card to steal a random card from opponents hand. – Discard a Device card to make opponent discard 1 random card. – Discard a Communication card to take the top card of the discard pile.

Patent Phase

Players may make 1 or more Melds if they are able. A Meld consists of 1 primary card particular to that player and one or more Secondary cards that have a total score exactly equal to the score of the primary card. At least one secondary card must of the same type as the primary.

The other secondary cards can be of any type. Players keep the cards in their respective victory piles.

Laboratory Phase

Players may keep up to 4 non-melded cards in their hand. Discard extra cards.

Research Deck Notation

- T** Card only Tesla may use as a primary card
- E** Card only Edison may use as a primary card
- B** Card both players may use
- IP** Invention Points
- I** Industry
- T** Theory
- P** Power
- S** Sight
- C** Communications
- H** Chemistry
- D** Device

The Athenians

Introduction

Card game for 2-4 players. Theme: Players are Athenian generals in the 5th century accumulating influence and prestige.

Victory

At the end of the game, the player with the most prestige points wins.

Game End

The game ends when there are no cards left in the Deck.

Dice

Six sided dice are used.

Common Deck

Players share a common set of Cards. There are 8 Card Types: Proposal (Gain Prestige one time) Events (Multiple Effects) Associates (Gain Prestige every turn) Prosecutions (Remove Associates & Strategoi) Popularity (Temporary Influence Gain) Reaction (Multiple Effects) Victory (Gain Influence) Defeat (Lose Influence)

Prestige

Use Tokens to keep track of Prestige earned by Associates.

Strategoi

Each player starts the game controlling one Leader. The Leader is a General (Greek: Strategos). The available Strategoi (and Special ability) include:

1. Pericles (+2 to Initiative Rolls)
2. Nicias (At end of Availability Phase you may flip over an extra card)
3. Theramenes (At end of Availability Phase you may discard one card)
4. Myronides (Victories give +1 Influence)
5. Thucydides (+5 Influence for Prosecutions)
6. Cleon (Gain 1 Prestige Point per turn)
7. Alcibiades (Victories are worth 1 Prestige each)
8. Adeimantus (+1 Influence per Associate)
9. Anytus (Ignores Defeat Penalties)
10. Aristides (Ignores Prosecutions against himself)
11. Callias, Son of Hipponicus (Hand Size +2)
12. Cimon (+5 Influence when Persians are the enemy)
13. Ephialtes (Popularity cards have +1 Influence)

14. Hagnon (+5 Influence for Proposals)

15. Hyperbolus (+2 Influence)

16. Lamachus (Starts with 10 Extra Prestige Points)

Death Of A Strategos

If your Strategos is ever killed or removed from play, you must start over: Keep your Prestige, but discard all Victories, Defeats, and Associates. Pick one of the un-played named Strategos to continue with. If none are left you get an unnamed general with no special ability.

Definitions

Strategos: Military General (Leaders). Plural: Strategoi Associates: Followers, Supporters, and Friends of a Leader Persona: Leaders and Associates

Setup

Each player selects one Strategos. Roll high on 1D6 to determine who selects first. Each player starts with 10 Influence and 10 Prestige.

Round Sequence

Each round has 6 Phases:

1. Enemy Phase
2. Availability Phase
3. Turn Order Phase
4. Action Phase
5. Prestige Phase
6. End Phase

Enemy Phase

Roll 1D6: If Even Persia is the Enemy; If odd Sparta is the Enemy this round.

Availability Phase

Flip over the top 5 + X cards of the deck where X is the number of players. These are placed face up in the middle of the table. These cards are known as the Available cards.

Turn Order Phase

Players roll high 1D6 to determine turn order this round. Reroll ties. This is known as the Initiative Roll.

Action Phase

Players take turns (in Turn order) selecting one Available card. This continues until all Available cards have been selected. — If a player selects a Popularity or Reaction card, they put that card in their hand.

— If a player selects an Associate, that associate becomes theirs and is placed Face up in front of them. — If a player picks a Proposal or a Prosecution then a Vote is conducted Immediately to see which player wins it. — If a player picks an Event card resolve it immediately.

— If a player selects a Victory or Defeat, it becomes theirs and is placed Face up in front of them.

Prestige Phase

Associates earn prestige for their Leaders.

End Phase

Max hand size is 4 cards discard excess cards.

Resolving Votes

This applies to Proposals and Prosecutions. The player with the most Influence wins the vote. Each player derives their individual Influence Total from several sources:

1. Base Influence (10)
2. Victories (positive) and Defeats (negative)
3. Additional 1D6 Points for current vote (rolled separately for each player)
4. Any Popularity cards played by the player

Note: A player does not have to play Popularity cards if he has them. Popularity cards are played face down before Influence rolls (1D6) are made. Players reveal their Popularity cards simultaneously.

Proposals

If a player wins a proposal vote, he keeps the proposal card face up next to him. It is worth prestige points for final scoring. Some proposals may give other additional benefits.

Prosecutions

If a player wins a proposal vote, he causes the Leader or one associate of one opponent to be discarded (executed or exiled) Discard the Prosecution card once the vote is over. Some Prosecutions are very specific. If there are no matching targets then no one

is discarded. Instead of being exiled/killed a Leader may choose to discard 2D6 Prestige Counters instead.

Associates

These individuals provide their leader with a steady stream of prestige points. Some give additional benefits. All have one or more descriptors including: Citizen (of Athens) Greek (but not Athenian) Foreigner (Diplomats and such) Aristocrat (Rich Land owner) Philosopher, Mathematician, Historian, Sophist, etc.

Events

These often result in the death of one or more associates or leaders. They are discarded after being resolved.

Reactions

These are held in the hand and played when appropriate. They might negate a vote or event. Some manipulate turn order, Available cards, the deck, or player's hands.

They are discarded when played.

Popularity

Fleeting alliances, oratories, and circumstances that give the Strategoi advantages during votes. They are discarded when played.

Victories And Defeats

Many of these are military but they can also represent political and economic efforts That provide the Strategoi with permanent influence.

Mass Death Rules

Activated by certain Events. Roll 1D6 for each and every Persona in play. On a roll of 1 that persona is killed.

Card List Notation

- P** Proposal (Gain Prestige one time)
E Events (Multiple Effects)
A Associates (Gain Prestige every turn)
X Prosecutions (Remove Associates & Strategoi)
U Popularity (Temporary Influence Gain)
R Reaction (Multiple Effects)
V Victory (Gain Influence)
D Defeat (Lose Influence)

The Battle Of Lake Champlain

Introduction

Board & card game for 2 players. September 11, 1814 Naval Battle. One player is the British. The Other is the United States.

Historically the US won the battle.

Victory

You win if you Sink/Disable/Capture the opposing Frigate/Corvette, Brig, and 1 Sloop/Schooner.

Us Fleet Ship Table

#	Name	Type	Hits
1	Saratoga	Corvette	4
1	Eagle	Brig	3
1	Ticonderoga	Schooner	2

British Fleet Ship Table

#	Name	Type	Hits
1	Confiance	Frigate	4
1	Linnet	Brig	3
1	Chub	Sloop	2

Setup

Each player places one Ship on squares of his back 2 rows. Ships may not stack.

The Cards

Players share a common deck.

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Orders Phase
2. Maneuver Phase
3. Fire Phase

Orders Phase

Draw 3 cards. If the deck runs out, shuffle the discard and draw from it. Max hand size = 5 cards. Discard excess cards.

The Map

Use an 8x8 chessboard. The center 4 spaces are Crab Island. Ships may not enter or move or attack through the island.

The Ships

Use chits or miniatures to represent Ships.

Unit Table Notation

Number of that type of Ship you start the game with.

Hits Number of Hits that type of Ship has.

#	Name	Type	Hits
1	Preble	Sloop	2
5	Squadron	Gunboats	2

#	Name	Type	Hits
1	Finch	Sloop	2
6	Squadron	Gunboats	2

Maneuver Phase

Play (discard) a Move card to move one of your Ships. The move card has a number. This is the number of spaces the Ship moves.

Moves can be diagonal or orthogonal. A Ship may make 1 Move per turn. The Schooner can make 2 Moves per turn.

Fire Phase

Play (discard) an Attack card to have a Ship attack. The attack card has a number. This is the range of the attack.

Attacks can be diagonal or orthogonal. Every attack does 1 point of damage. Use Chits or coins to record damage.

A ship reduced to zero Hits sinks and removed from the board. Your opponent may play (discard) Defense cards to negate your attack.

Card List Notation

M Movement
A Attack
D Defense
X Special
K As a Knight would move in chess

Type Purpose of card
Dam Damage (inflicted or prevented)
Adj Adjacent
F/C Frigate and Corvette
CI Crab Island
 Crippled = Ship may no longer Move
 # Number of that card in the Deck

Common Deck Card List

Battle Wikipedia

The Byzantines

Introduction

Card game for 2 players. Players take turns controlling the Byzantine Empire. On a players off-turn he represents the many Foes of the Byzantines.

Game End

The Game ends after 12 Turns. If at any time the Byzantine Empire is reduced to zero or less Territory Tokens the game ends immediately and the Current Byzantine player loses 3 Legacy Tokens.

Victory

The player with the most Legacy Tokens at the end of the game wins.

Legacy Tokens

Players share a common set of Legacy Tokens (LT).

Territory Tokens

The Byzantine Empire starts with 10 Territory Tokens (TT). The most TT it can have is 20.

Emperor Token

Players take turns controlling the Emperor Token (ET). The current controller is the Byzantine player (The Emperor). Each player will get to be the Byzantines for 6 out of the 12 turns.

The Decks

There are 2 decks: The Byzantine Deck The Foes Deck

Turns & Ages

The game is divided into 3 Ages. The Game is played in 12 Turns. The first 4 Turns is the Early Age Turns 5-8 is the Middle Age Turns 9-12 is the Late Age Some cards are only useable during specific Ages.

Setup & Deck Management

Remove all Middle Age cards from the decks and set them aside. Remove all Late Age cards from the decks and set them aside. When the Middle age starts shuffle the Middle age cards into the deck.

When the Late age starts shuffle the Late age cards into the deck. The older player gets the Emperor Token First. Each player starts with 10 Legacy Tokens.

Turn Sequence

Each turn has 6 Phases:

1. Draw Phase
2. Age Phase
3. Redraw Phase
4. Meld Phase
5. Legacy Phase
6. End Phase

Draw Phase

Each Foe player fills their hand to 8 cards. The Byzantine player fills his hand to only 9 cards in the Early Age. The Byzantine player fills his hand to only 8 cards in the Middle Age.

The Byzantine player fills his hand to only 7 cards in the Late Age. If a deck ever runs out, shuffle the discard and draw from it. Important: The first 4 cards you draw are revealed to your opponent for 10 seconds. Draw the remaining cards you are entitled to and keep them all in your hand.

Age Phase

Discard any cards in your hand that are not useable in the current Age and draw replacements. If the discarded cards are from an earlier age, remove them from the game.

Redraw Phase

Each player may discard up to 4 cards and draw replacements.

Meld Phase

Each player makes a Meld. A Byzantine Meld may have: Up to 1 Leader card Up to 2 Recovery cards Up to 4 Troop cards Up to 1 Negotiation card Up to 2 Legacy cards A Foe Meld may have: Up to 1 Northern Foe card Up to 1 Southern Foe card Up to 2 Disaster cards (Max 1 Natural Disaster) Up to 4 Troop cards If a Negotiation card is played, the Byzantine player may discard 1 target Foe card. The Foe player may replace it immediately with another Foe card if he has one in hand. Each player totals the Force of the cards in his Meld.

The Foe player gets Force Bonuses if his Foe cards match his Troop card types. The side with the higher Force Total wins. If Tied the Foe player wins.

The Byzantine Empire gains or loses Territory Tokens equal to the difference in the Force Point Totals. All Meld cards are discarded. Unique Meld cards are removed from play.

Legacy Phase

The Byzantine Player (BP) potentially earns Legacy Tokens (LT). If the Empire lost TT this turn the BP loses 1 LT. If the Empire gained TT this turn the BP gains 1 LT.

The BP gains LT equal to the Legacy value of the Legacy cards he played in Meld Phase.

End Phase

If you have cards left in your hand, discard down to 1 card and pass it to your opponent. Players switch control of the Emperor Token.

Play In Defense Cards

PD Play in Defense

Some Foe cards have this Trait. If the Byzantine player plays a Leader the Foe player may play a PD card in excess of any other Foe card limits.

Can Be Bought Off Cards

BO Can be Bought Off

Some Foe cards have this Trait. The Byzantine player may discard a target BO card by discarding any one card from his own Meld.

The Danger Zone

Introduction

Card game based on the Archer animated TV show.

Disclaimer

Archer is a licensed, copyrighted property. This is merely a fan site.

Objective

Be the first player to complete 3 missions.

The Deck

Players share a Common Deck. The Deck has 6 Suites:

- A** Archer
- S** Staff
- O** Operative
- M** Mission
- J** Joke
- F** Foe

Completing Missions

A Mission consists of 6 cards, one from each suite.

Setup

Shuffle the deck. Each player is dealt 7 cards. The most insensitive player goes first.

Turn Sequence

Players take turns. Each turn has 4 phases:

1. Briefing Phase
2. Operations Phase
3. Mission Phase
4. Debriefing Phase

Briefing Phase

Fill your hand to 7 cards. If the deck ever runs out, shuffle the discard and draw from it.

Operations Phase

Play (Discard) 1 card from your hand. It's effect is determined by its Suite:

Card Type:	Effect:
Archer	Steal 1 random card from your opponents hand
Staff	Draw 2 cards
Operative	Draw 1 card. Look at Opponent's hand
Mission	Draw 1 card. Look at next 5 cards in Deck
Joke	Draw 1 Card. Opponent discards 1 card of his choice
Foe	Opponent discards 2 random cards

Mission Phase

If you have all six suites represented in your hand, you succeed in Completing one Mission. Discard your hand. If you do not complete a mission nothing happens. Keep track of the number of Missions you have

completed.

Debriefing Phase

You must discard down to 6 or less cards.

Common Deck Card List

Type	Card Name:	Notes:
A	Sterling Archer	Worlds most Dangerous Secret Agent
A	Binge Drinking	Primary Interest
A	Hangover	
A	Mommy Issues	Absentee Mother

J	Ocelot	One of Sterling's Obsessions

The Depths Of The Earth

Introduction

Module 1 represents the tunnels in the Earth's crust. Module 2 represents a lost underground pre-

historic realm. The Artifact is a clutch of Dinosaur eggs.

Module 1 Spelunking Card List

Card Name:	Notes:
Collapsing Stone Bridge	Agility & (Strength or Mechanics)
Cave In	(Agility & Strength) or (Science & Mechanics)
Deadly Gasses	Science & Survival
Scrawled Message	Linguistics: NPIFS move forward 1D6 spaces
Endless Caverns	Science or Survival
Rolling Boulder	Agility or Mechanics
Falling Stalagmite	Agility DM +2
Lava Flow	(Agility or Science) & Survival
Earthquake	Agility & (Survival or Science)
Tunnel Fireball	Science & (Agility or Survival)
Underground Sea	Sailing x2
Underground River	Sailing: If successful move extra 1D6 spaces
Volcanic Eruption	Agility & Survival
Hot Geyser	Science & Agility
Volcanic Ash	Science & Survival
Mud Slide	Strength & Survival

Primordial Ooze Science

Panic	Personality DM +2
Mutant Albinos	Combat or Personality
Map of the Underworld	Linguistics: NIPFS move forward 1D6 spaces

Found Recover one random lost (Killed) party member

Climbing Gear	Aid: Survival +2 or Agility +2
Geology Texts	Aid: Science +3
Spelunking Equipment	Aid: Survival +2 or Agility +2
Digging Tools	Aid: Survival +3

NPIFS = No Penalty if Failed, If Successful...

Module 2 Lost World Card List

Card Name:	Notes:
Lost Explorer	Personality & Linguistics: NIPFS Gain one companion
Cro Magnon Men	Personality or Linguistics: If successful Gain one servant
Lizard Men Attack	Combat
Treachery	Personality or Combat

Card Name:	Notes:
Simian War Party	Combat DM +2
Pterodactyl Attack	Agility x2
Neanderthal Ambush	(Combat & Agility) or (Personality & Linguistics)
Raptor Pursuit	Agility DM +2 & Combat
Sea Monster	Sailing & Combat
Whirlpool	Sailing & Agility
Waterfall	Sailing & Strength
Treacherous Cliffs	Survival or Agility or Mechanics

Prehistoric Mounts Survival: If successful move extra 1D6

Tracks	Survival: NIPFS move extra 1D6
Homo Erectus Tribe	Combat or (Personality & Linguistics)
Mad Man	(Combat & Strength) or Personality
River Rapids	Sailing & Survival
Tyrannosaurus Rex	Agility & Combat DM +4
Dinosaur Stampede	Agility x2
Giant Snake	Agility & Combat
Pit Trap	Agility x2 or Mechanics x2
Tar Pits	Strength x2
Wholly Mammoths	Agility x2
Giant Venus Fly Trap	Strength x2
Giant Spider Web	Combat & Strength
Net Trap	Agility & Strength
Mutiny	Personality & Combat
Climb Tree	Aid: Agility +3
Canoe	Aid: Sailing +2 or Move extra 1D6
Bow & Arrows	Aid: Combat +2 or Survival +2
Friendly Natives	Aid: Linguistics +2 or Survival +2

The Diet Game

Introduction

Gamers are trying to lose weight prior to their 15 year high school reunion. Card game for 2+ players.

Winning

Be the First player to lose 10 pounds. (i.e. score of -10)

The Deck

Players share a common deck.

Weight

Keep track of 'relative' weight using coins, tokens, dice, etc. Remember you are trying for a negative score. Weight is in "pounds".

Setup

The most out-of-shape player goes first.

Turn Sequence

Players take turns. Each turn has 8 phases: A New Day Phase Planning Phase Breakfast Phase Exercise Phase Lunch Phase Dinner Phase Cheat Phase Snack Phase

A New Day Phase

Fill your hand to 7 cards. If the deck runs out, shuffle the discard & draw from it.

Planning Phase

You may discard up to 3 cards & draw replacements.

Breakfast Phase

Play from your hand a Well Balanced Breakfast card or a Breakfast card that causes you to lose 1 pound. If you do not play a card, the player to your right may play a Breakfast card that causes you to gain 1 pound.

Common Deck Card List

Card Name:	#	Type	Gain
Pancake Breakfast	1	B	+1
Continental Breakfast	1	B	+1

Exercise Phase

You may play from your hand one Exercise card that causes you to lose 1 pound. Any opponent may play a Laziness card to negate the Exercise card.

Lunch Phase

Play from your hand a Well Balanced Lunch card or a Lunch card that causes you to lose 1 pound. If you do not play a card, the player to your right may play a Lunch card that causes you to gain 1 pound.

Dinner

Play from your hand a Well Balanced Dinner card or a Dinner card that causes you to lose 1 pound. If you do not play a card, the player to your right may play a Dinner card that causes you to gain 1 pound.

Cheat Phase

Any opponent may play a Cheat card to cause you to gain 1 pound. You may play from your hand a Willpower card to negate the Cheat card.

Snack Phase

Play from your hand a Well Balanced Snack card or a Snack card that causes you to lose 1 pound. If you do not play a card, the player to your right may play a Snack card that causes you to gain 1 pound.

Number of that type of card in the deck.

The English Civil War

Introduction

Card game for 2 players. Simulation of the British Civil Wars 1642-1649. One player is the Parliamentarians.

The other player is the Royalists.

Victory

The first player to control all 20 Territory Markers wins the game.

Territory Markers

Each player starts the game with 10 Territory Markers. Use coins or tokens or glass beads for markers.

Dice

Several Six-sided Dice (D6) are needed.

Regiments

Regiments are the basic Military Unit of the game. Use chips or counters or figures to represent regiments.

The Deck

Players share a common deck. There are 2 Main types of cards: Battle Cards & Event Cards. Battle cards are further divided into 5 Suites: Tactics, Terrain, Troops, Leadership, and Morale.

Setup

Shuffle the deck. Each player starts with 10 Regiments and 10 Territory Markers.

Turn Sequence

Each turn has 8 Phases (and 3 Segments):

1. Strategy Phase
2. Muster Phase
3. Declarations Phase
- I. Skirmish Segment II. Battle Segment III. Siege Segment
4. Capitulation Phase
5. Plot Phase
6. Loss Phase
7. Support Phase
8. End Phase

Note that only one of the 3 possible Segments will be Conducted in a turn.

Strategy Phase

Both players fill their hands to 8 cards. If the deck runs out, shuffle the discard and draw from it.

Muster Phase

Each player gains 4D6 Regiments. If a player is allied to the Scots, he gains an extra 1D6 Regiments. If a player is allied to the Irish, he gains an extra 1D6 Regiments.

Declarations Phase

Each player declares whether he wants to attack or defend this turn. (Players write their intentions down & then reveal them simultaneously) If both players wish to attack, go to Battle Phase. If both players wish to defend, go to Skirmish Phase.

If one player wishes to Attack, and the other wants to defend, the Defender must choose:

1. Accept Battle (Go to Battle Phase)
2. Accept Siege (Go to Siege Phase)
3. Strategic Retreat (Go to Capitulation Phase)

Skirmish Segment

Both players lose 1D6 Regiments in Raids and Minor Engagements. Skip Capitulation Phase.

Battle Segment

A Major Battle Occurs. There are 5 Aspects (Suites) to a Battle: Tactics, Terrain, Troops, Leadership, and Morale. The player who wins the most Aspects wins the Battle. It is possible that Ties can occur.

Each player may play one Battle card in each of the 5 Suites. Each Battle card has a Score. The higher score wins the contest for that suite.

For the Troops Aspect, players add the number of Regiments they control to their Score. If you won a Battle or Siege last turn, get +2 to your Morale Aspect. If you are defending in a Siege, get +2 to your Terrain Aspect.

The winner loses 1D6 Regiments. The loser loses 3D6 Regiments. In a tie, both sides lose 2D6 Regiments.

Siege Segment

The Attacker may decide he does not want to conduct a Siege. In this case, go to Skirmish Phase. A Siege is resolved like a Battle, except that there are fewer Cards in the deck that can be used in a Siege.

Note: Leader cards can always be used in both Battles and Sieges.

Capitulation Phase

- In a Battle where both players were Attackers, the winner Takes 1 Territory Marker (TM) from his opponent. - In a Battle where one player was the Attacker and the other the Defender (Accept Battle), if the Attacker wins, he takes 2 TM. - In a Siege where the Attacker wins, he takes 2 TM.

- In a Strategic Retreat, the Attacker takes 2 TM. The winner may play a Victory card to take 1 additional TM. Note: In a Skirmish or Tie, neither side wins TM.

Plot Phase

Alliances allow a player to recruit more Regiments in Muster Phase. Once made, an Alliance is maintained until some other rule or card ends it. The Parliament Player rolls 1D6: On a roll of 5+ he makes an Alliance with Scotland.

The Royalist Player rolls 1D6: On a roll of 5+ he makes an Alliance with Ireland. An Alliance with the Catholic Irish is not popular in England: The Royalist player must give 1 TM to the Parliament Player (Once only) The Royalist Player rolls 1D6: On a roll of 6+ he makes an Alliance with Scotland. Note that the 2 players can keep stealing Scotland back and forth from each other.

The Protestant Parliamentarians will never ally with Ireland.

Loss Phase

Each player loses 1D6 Regiments due to sickness and desertions.

Support Phase

The Troops must be paid. The Parliament player can support a number of Regiments equal to three times the Number of TM he controls. The Royalist player can support a number of Regiments equal to two times the Number of TM he controls.

Excess Regiments are discarded. The Advantage Parliament enjoys is due to its control of London, the Major Ports, and the Fleet, a substantial advantage in populace and prosperity.

End Phase

Players may discard any cards from their hands they do not want.

Card Set Available

Thanks Ron! Card Set

The First Balkan War

Introduction

Wargame for 4 players. Simulates the first Balkan War in 1912. One player is the Ottoman Turks.

The other 3 players are the members of the Balkan League: Serbia, Bulgaria, and Greece.

Victory

The player with the most Victory points at the end of the game wins. The game ends after 24 turns.

Counter Set

Use counters to represent Divisions. Each Division represents 10,000 men.

Terrain:	MP	DP	VP
Mountains	2	1	1
Plains	1	0	1
Towns	1	1	2

MP Movement point cost to enter.

DP Defending Divisions add this to their Battle Roll.

VP Victory Points for controlling this space at the end of the game.

To control a space you must have a control marker on it. Rivers cost 1 MP point to cross. A unit that has to rout across a river or into a mountain is destroyed.

Divisions may travel on Railroads for 1 MP per 4 spaces.

Setup

League Divisions are concentrated on their borders. Turkish Divisions are scattered throughout Albania, Macedonia, and Thrace.

1d6

1	Disease	Remove one Division from Play
2	Transport Problems	Lose 3 Movement Points
3	Reinforcements	Remove 1D6 Casualty Markers or gain 1 Division
4	Spies & Scouts	Look at opponents hand
5-6	Nothing	

Attack Phase

Each player makes 2 piles: A Movement Pile and a Battle Pile. Place any of your cards with Movement points into your Movement Pile. Discard these cards and take a corresponding number of movement point tokens.

For example: if a card was worth 2 Movement points

Country:	Divisions
Ottomans	24
Bulgaria	11
Greece	10
Serbia	11

The Serbian Army includes one division of Montenegro Guerillas. Other Counter types needed: Control, Casualty, Movement, Battle.

The Map

Players will have to make their own map. (I'm waiting for someone to make a map) Divide up the map into squares or hexes. There are several terrain types.

Terrain:	MP	DP	VP
Cities	1	2	5
Fortifications	2	3	3

Turn Sequence

Draw Phase Event Phase Attack Phase End Phase

Draw Phase

Each League member draws 5 cards. The Ottoman player draws 10 cards. If the deck runs out shuffle the discard and draw from it.

Event Phase

Each player rolls once on the Event Table.

Event Table

you would take 2 tokens. Place any of your cards with Battle points into your Battle Pile. Discard these cards and take a corresponding number of Battle point tokens.

A player may play cards for tokens at any time during the turn. Each player rolls 1D6. This is the initiative roll. Highest roll moves his divisions first.

Divisions may not stack. To move a Division, pay the needed number of Movement point tokens. Place one of your control markers on any space you enter. (Remove Opponents) League members may not attack each other.

To attack an adjacent enemy Division, discard one Battle Point token. To resolve the Battle the attacking and defending players each roll 1D6. Before rolling, players may discard Battle points to increase their to-

tals by +1 per token. (up to 3 tokens max) Defenders also get Terrain bonuses.

Get +1 if another division already attacked the enemy division this turn. Get -1 for every Casualty counter on your division. Get +1 for every one of your divisions adjacent to the enemy division.

The Division with the highest total wins. The loser rolls on the Casualty Table:

Casualty Table

1D6	Result
1	Division Destroyed (Mass Surrender)
2	Get 1 Casualty marker and Rout
3	Get 1 Casualty marker and Rout

A division that routs must immediately move away from the winner one space. If unable to move the Division is destroyed. A Division with 4 Casualty markers is destroyed.

1D6	Result
4	Get 1 Casualty marker
5	Get 1 Casualty marker
6	Both Divisions get 1 Casualty marker

Logistical Move Rule

All divisions get 1 free move point per turn if the division is moving through territory controlled by the divisions owner.

Free Advance Rule

If a division caused an enemy division to rout, it may immediately move at no cost to occupy the empty space.

End Phase

Discard all unused movement and battle tokens. League player max hand size = 6. Turk player max hand size = 12 Discard excess cards.

Deck Card List

Card Name:	Notes:
Bravery	1 Battle Point
Machine Guns	1 Battle Point if Attacking, 3 if Defending
Artillery	3 Battle Points
Infantry	2 Battle Points or 1 Movement Point
Cavalry	1 Battle Point or 2 Movement Points
Railroads	3 Movement Points
Forced March	2 Movement Points
Leadership	2 Battle Points or 2 Movement Points
Well Supplied	1 Battle Point or 1 Movement Point
Fortified Positions	3 Battle Points: Defending Turks only
Counter Attack	2 Battle Points: Attacking Turks only
Land Grab	2 Movement Points: League Member only
Major Offensive	3 Movement Points: League Member only
Pursuit	Destroy Retreating Division
Attack Flanks	2 Battle Points: Attacking League Member only
Foolish Attack	Attacking Division automatically Destroyed
Break Morale	Defending Division automatically Routs
Intelligence	Negate target card played by Opponent
Overrun	Division may attack a second time this turn
Racial Hatred	1 Battle Point: League Member only
Timed Attacks	Alter your initiative roll by +6 or -6.

The deck contains 4 of each card listed.

5 Player Version

Let 2 players control 12 Turk Divisions each. They may not attack each other.

The Second Balkan War

Begin immediately after a game of the First Balkan War. Setup is how the FBW game ended. A new player: Rommania gets 10 Divisions.

Bulgaria gets an extra 10 Divisions. Serbia gets an extra 5 Divisions. Everybody attacks Bulgaria.

The game ends when all Bulgarian Divisions are destroyed.

The Great Conversation Game

Introduction

Glass Bead Style Game. The game links the Great Ideas with the Great Authors throughout History.

Victory

The objective is to have the game go on for as long as possible or Until the players are satisfied. If the game ends prematurely, it is because The players lack sufficient knowledge of the writers and their subjects. In this case the players need to read and study some more in preparation For the next game. The game also ends if either of the decks is used up.

The Decks

There are 2 decks:

1. The Great Ideas Deck
2. The Great Authors Deck

Setup

Players sit around a table. Shuffle the Decks. Deal 7 Great Author Cards to each player. This is their hand.

Pick the most knowledgeable player to be the Leader.

Sequence Of Play

The top card of the Great Ideas Deck is flipped over and placed face up onto The center of the table. It is to be read aloud by the Leader. This card is referred to as "The Idea in Question" (TIQ). Starting with the Leader and going clockwise, each player plays one of their Great writer cards face up to the table. Players in turn must state how their writer is Connected to the TIQ. Connections should include: Names of books the author wrote that relate to the Idea and what in particular the author had to say about the idea.

The other players a group may judge if the answer is sufficiently informed. If a player is stumped, he may reveal his hand. The other players may look for connections with his Authors.

If a player has no authors in his hand that relate to the idea (as confirmed by The other players collectively) he gets a free pass. If the player has an author but doesn't know the connection (as pointed out by Another player) he gets a demerit. If the players as a group accumulate 10 demerits The Game ends prematurely. Game play is concerned with the CONNECTIONS however players may feel free to Discuss separate tangents relating to the Authors or Ideas in as much detail as they Desire.

After each player has taken a turn, the played Idea and author cards are discarded. The players each draw 1 replacement author card to add to their hands. A new Idea card is drawn to replace the previous one and the turn begins anew.

The Great Ideas Deck Card List

Angel, Animal, Aristocracy, Art, Astronomy and Cosmology, Beauty, Being, Cause, Chance, Change, Citizen, Constitution, Courage, Custom and Convention, Definition, Democracy, Desire, Dialectic, Duty, Education, Element, Emotion, Eternity, Evolution, Experience, Family, Fate, Form, God, Good and Evil, Government, Habit, Happiness, History, Honor, Hypothesis, Idea, Immortality, Induction, Infinity, Judgement, Justice, Knowledge, Labor, Language, Law, Liberty, Life and Death, Logic, Love, Man, Mathematics, Matter, Mechanics, Medicine, Memory and Imagination, Metaphysics, Mind, Monarchy, Nature, Necessity and Contingency, Oligarchy, Opinion, Opposition, Philosophy, Physics, Pleasure and Pain, Poetry, Principle, Progress, Prophecy, Prudence, Punishment, Quality, Quantity, Reasoning, Relation, Religion, Revolution, Rhetoric, Same and Other, Science, Sense, Sign and Symbol, Sin, Slavery, Soul, Space, State, Temperance, Theology, Time, Truth, Tyranny and Despotism, Universal and Particular, Virtue and Vice, War and Peace, Wealth, Will, Wisdom, World

well, Beckett

The Great Game

Introduction

Card game for 2 Players. Depicts the 19th Century Rivalry between England and Russia in Central Asia. One Player is the Russian Empire. The other Player is the British Empire.

Victory

The first player to accumulate 100 Territory Points is the winner.

Territory Points

Territory Points represents territory that has come under your sphere of Influence. Use pen and paper to keep track of Territory Points. Players may have negative Territory Points.

The Deck

Players share a common deck. There are 8 types of Cards: Intelligence, Politics, Military, Motivation, Obstacles, Difficulties, Events, Ally

Setup

The Russian Player goes first. Deal each player 10 cards.

Turn Sequence

Players take turns. The current player is the active player. The other player is the dormant player.

Each turn has 9 phases:

- 1. Fate Phase
- 2. Event Phase
- 3. Exploration Phase
- 4. Strategy Phase
- 5. Operations Phase
- 6. Resistance Phase
- 7. Gains Phase
- 8. Ally Phase
- 9. Retreat Phase

Fate Phase

Both players fill their hand to 10 cards. Draw 1 extra card if you control more Allies than your opponent.

Influence Score:	Territory Points:
-5 or less	-5
-4	-4

If the deck runs out, shuffle the discard and draw from it.

Event Phase

The Active player may play one Event card.

Exploration Phase

The active player plays any Intelligence cards in his hand. The dormant player may play any difficulty cards in his hand. If the active player played more cards than the dormant player, he May look at the dormant player's hand.

All played cards are discarded.

Strategy Phase

The active player may discard up to 5 cards and draw replacements.

Operations Phase

The Active player may play either a Political Meld or a Military Meld A Political Meld is all Political cards in the Active player's hand. A Military Meld is all Military cards in the Active player's hand.

Resistance Phase

If the Active player played a Political Meld, the Dormant player plays any Political cards in his hand.

PMV Number of cards in the Political Meld

PDV Number of Political cards played by the Dormant player

MC Motivation Cards played by the Active player

The Influence Score = (PMV + MC) - PDV If the Active player played a Military Meld, the Dormant player plays any Obstacle cards in his hand.

MMV Number of cards in the Military Meld

ODV Number of Obstacle cards played by the Dormant player

The Influence Score = (MMV + MC) - ODV

Gains Phase

The Active player gains Territory Points according to the Influence Score earned in Resistance phase.

Influence Score:	Territory Points:
2	2
3	4

Influence Score:	Territory Points:
-3	-3
-2	-2
-1	-1
0	0
1	1

Influence Score:	Territory Points:
4	8
5	16
6	24
7	36
8 or more	50

Ally Phase

If your opponent has more Territory Points than you, you may put one Ally card into play from your hand. Ally cards stay face up in play. If you scored 16 or more Territory Points this turn, you may steal an Ally card from your opponent.

Retreat Phase

Both players may discard down to 3 cards.

Motivation Cards

Political and military cards are collectively called Influence cards. Motivation cards can be used by the active player as Meld cards. In a Meld, the active player cannot use more Motivation cards than Influence cards.

Card List Notation

The Great Machine

By Curufea <curufea@yahoo.com>

I've rewritten and simplified the rules to this game I wrote ages ago. It should now be playable. I do need to work on formatting the rules properly though..

The Great Machine

I kinda got inspired by the Girl Genius game and This Incredible Machine and Cheapass games in general :) <http://www.cheapass.com>

The Evil Mad Scientist Doctor Herr Guffin has left his assistants (Igor, Igor, Igor and lest we forget, Igor) in charge of his experiments while he goes to a convention on "Evil Inventions and the Applications in Modern Society".

The experiment in particular is a machine he designed to breed a better rat (because the kids these days had gone and invented a better mousetrap). It is a mixture of mechanical and electronic feeder/torturing device.

The object of the player (called Igor) is to have his favourite rat the biggest by the time the master returns.

This involves making sure that toggles tilt the pipes in the machine such that the food pellets go to the player's rat - and avoiding/rotating the shocking motor such that the other rats are shocked (which causes them to lose food pellets, probably through vomiting).

There are event cards as well (things like Cardiac Arrest - fattest rat gets a chronic heart attack and dies).

Other complications are - Food pellets are lost if they enter an empty cage. Pellets are gravity fed (they move from the feeder at the top, down to the cages). The motor will rotate the electrical charge to shock in either a clockwise or counterclockwise direction Event cards - some of which speed up the arrival of the master.

Setup

Choose a rat to be your subject. Decide what order you are playing in (roll a dice or something). Place your rat in an empty cage on the board in turn order.

The player who places their rat last, now flips a coin for each toggle. On heads, the toggle is tilted left. On tails it is tilted to the right. The player who placed their rat first, now randomly determines which cage is connected to the electricity. Each player then draws 2 event cards and 3 movement cards.

Each player has a turn, then the marker for the Arrival of the Master is moved down one slot.

Turn sequence (for each player)

- Pick up one event card or one movement card.
- Play one card (either event or movement) or discard a card.
- Rotate motor.
- The cage that the electrical shocker is now connected to, is shocked. If there is a rat inside, they lose one pellet. If they have no pellets, nothing happens. Drop food pellet

The Motor The Motor is initially set to spin clockwise. If there are 4 or less players in the game, the motor moves 90 degrees per turn. Otherwise it moves 45 degrees.

Cage8. . . . Cage1. . . . Cage5

. . . . +—+—+

. . . . | \ | / |

Cage4+. . . -O-. . . +Cage2

. . . . | / | \ |

. . . . +—+—+

Cage7. . . . Cage3. . . . Cage6

The Master If the Master arrives, the game is over and the fattest rat wins. If there are more than one winners, they are disqualified and the winner is the next fattest rat. The "Master Returns" track that tells you when the game ends goes down by 1 after all players have had a turn. There are 20 slots in the track, some event cards modify the time of his arrival.

Cards All cards are kept hidden and drawn face down. They are only revealed when they are played. Cards must always be played in a player's turn, with one exception - Timely Intervention. Event cards may be played on anyone. If an event card is played on someone else and the description specifies that something happens "this turn" then the even occurs in that person's turn. If there are options on an event card, the player who plays the card chooses the option.

Most event cards are multiples except the sudden death cards which are unique. Players may not have more than 5 cards.

Rat Death Remove the rat until that player's next turn - it comes back with no pellets. They may chose which empty cage it comes back too at the start of their turn.

Cage1...Cage2.Cage3...Cage4.Cage5...Cage6.Cage7...Cage8
Movement Cards-

10x Toggle Pipe:Move a pipe's toggle to the opposite side 10x Toggle Pipes:Move two pipes' toggles to the opposite side. You may not move just one 10x Toggle Many Pipes:Move three pipes' toggles to the opposite side. You may not move just one or two. 5x Reverse Motor:If the motor is moving clockwise, it now moves counter-clockwise and vice versa. 5x Speed Motor:Motor moves twice.

Event Cards- Cardiac Arrest:The fattest rat has a sudden fatal heart attack (Urk!) - it dies. If more than one, randomly determine which. Master's Coach Approaches:The clatter of coach wheels on cobblestones heralds the advance of the Master. Move arrival forward 4 Postcard from the Master:He is having fun at the Convention and wishes you weren't there. Move arrival back 2 Animal Liberationists:Successfully free the rats from their cages. The rats attack and eat them before returning home. Give each rat 2 pellets. Short Circuit:A wire shorts somewhere. This turn there is no electrical shock.

Burn Out:The motor shorts. This turn the motor does not function. The electrical shock occurs to the same cage. Stripped Gear:A gear no longer has teeth. Choose a toggle - it cannot be flipped until your next turn. Cracked Gear:A gear breaks. Choose a toggle - it cannot be flipped until your next turn.

Super Glue:You glue a toggle in position - it cannot be flipped until your next turn. Poison Pellet:The pellet dropped this turn will kill the rat that eats it. Lightning strike:Motor shorts this turn. This turn the motor does not function. The electrical shock occurs to the same cage. The rat that was going to be fed is electrocuted. Unshocked rats are so distraught they refuse to eat food for this turn and the next.

Super pellet:The pellet dropped this turn is worth double. Nasty bug:Your rat and any rat in an adjacent cage lose one pellet through vomiting Blockage:The next pellet to drop gets stuck in a pipe it travels through. You choose. It sticks, blocking off the part of the pipe where it is until the pipe is toggled to the other direction. It then proceeds in that direction Total breakdown:The machine must be rebuilt. Flip a coin for every toggle - heads, it tilts left. Tails, to the right. Any broken toggles are repaired.

Fitness meme:Rats start exercising, and none but the thinnest can gain any weight until your next turn. Ethics committee:The ethics committee places an injunction on the experiment. The machine stops until your next turn. (but other events can still happen). Rat Static:Your rat sends a charge to all adjacent cages. The adjacent rats lose a pellet.

Black economy:Discard a food pellet and draw two cards. Caffeine prophesy:You are so hyped on caffeine to keep the experiment going that you have a prophetic waking dream - Look at the top four cards in the deck, then replace them in any order. All nighter:Have an extra turn after this one.

Nobbled a passing geezer:You have received more

funding! Look through the deck and Choose any card you want (to play now or keep in your hand), then reshuffle the deck. Timely intervention:Cancel another player's event card as it is played. This is the only card that can be played during any turn. This does not count against your own turn. Airline strike:Master is stuck. Move arrival back by three.

Positive reinforcement:Master hears of progress. Igor's happiness results in better care and the fattest rat gets an extra pellet. Negative reinforcement:Master requests progress report. Weakest rat gains/loses an extra pellet. (toss a coin) "This should only take you a minute":Master emails to request 20 extra slides with animations and a new statistical analysis for his presentation.

Lose your turn. All nighter:Have an extra turn after this one. Rubber boots:Your rat is immune to electric shocks until it dies.

You know a guy:Use your contacts to hasten or delay (your choice) the Master's return by two turns. Someone beat us to it!:No point going on. Kill all the rats and start a new experiment (but the clock keeps ticking for the Master's return). Proved a private theory!: You win. As far as you're concerned, anyway. The Experiment keeps going, though, so you might as well try to win that, too.

(No game effect, but a moral victory). Part-time job:Less time, but more resources. Lose a turn, but take two turns in a row next time. Collaboration:Choose a friend. Next time your rat receives a pellet, theirs does too. Next time their rat receives a pellet, so does yours. Works until either rat is zapped, then they forget.

Plagiarism:Choose an enemy. Steal one of their pellets. Greased gear:Motor moves to the opposite side. Stuck gear:Choose a toggle - it cannot be flipped until your next turn.

Lost gear:Choose a toggle - it cannot be flipped until your next turn. Convention dinner:Master gets roaring drunk and tells the story about the convention convenor, Igor, and the ferret. Is shunned by other mad scientists. Move arrival forward by 2. Poster session:Master spends the evening chatting up evil graduate students.

Move arrival back by 2. Hopper blockage:No food pellets dropped this turn. Laxative pellet:The pellet dropped this turn will cause the affected rat to lose two pellets (and the laxative pellet). If a rat cannot afford these pellets, it dies.

Rat escape!:The chosen rat escapes. It takes the rat owner their turn to recapture. No pellet loss. No shock. Extra food:Two pellets are dropped this turn. Pavlovian response:Your rat from this turn until your next, may avoid electrocution by cowering in fear at the far side of the cage. Will not eat.

Pavlovian response:Your rat from this turn until your next, on hearing any toggle move in any other player turn, responds as if it had been fed. Counts as one extra food pellet, except for the purposes of Starvation or Heart Attack. Starvation:Thinnest rat dies. If more than one, randomly determine which.

Flooded cages: All rats are shocked if any rat is zapped this turn.

Union Action: All rats go on a hunger strike and refuse to eat until your next turn. Noxious rat: Rat's emissions put rats in cages within 2 cages off their food. These rats will not eat this turn.

Old reanimation experiment: For this turn, all rats treat electrical charges as food. Old friends: Master realises why he hates going to conventions. Move arrival forward by two. Biomorphic resonance: Fattest rat loses a pellet, thinnest rat gains one. If more than one, determine randomly which.

Deal!: Swap your rat cage with another player's. WarHamster: Rat gains spellcasting ability, but isn't sure what to do with it. No game effect. Psycho rat: Chosen rat halts toggle that is immediately next to its cage until the owner's next turn.

Mellow rat: Chosen rat does nothing. Cancels any

rat-affecting card. Cleaning duty: You got the short straw. Lose a turn, but take any card from the discard pile. Leftovers: Feed your rat some stuff you found in the back of the fridge.

Toss a coin: Heads- add a food pellet, Tails- vomit up a food pellet. Maze!: Rat enters the food tubes. Moves one toggle every player turn (not just the owner's) towards the hopper until it gets a food pellet, at which point it returns to its cage. While in the pipes, cannot be zapped. Explosion!: Someone forgot to reverse the polarity of the neutron flow. Any four adjacent toggles are damaged and immovable until your next turn.

Maze!: Rat enters the food tubes. Moves one toggle every player turn (not just the owner's) towards the hopper until it gets a food pellet, at which point it returns to its cage. While in the pipes, cannot be zapped. Extra food: Two pellets are dropped this turn.

The Great Traveling Circus Game

Introduction

Each player is the owner of a traveling circus.

Game Board And Pieces

Use a monopoly game board. Also use the monopoly pawns, money, houses, and hotels. (But not the cards) Six sided dice are needed.

End Game

The game ends when the last card is drawn from the Act Deck. Alternate ending: When the Lead player goes around 15 times.

Winning

The player with the most money at the end of the game wins.

The Deck

The game uses a novel set of cards called the act deck. The deck contains one of each of the cards in the Card List. Each card represents a Carnival/Circus Act.

There are 4 types of acts: Acrobats, Clowns, Animals, and Freaks. Do not use any of the Monopoly cards.

Setup

Each player picks a pawn to represent their circus. Pawns are placed on the starting space. Each player gets \$200 All other money is kept in the Bank.

Each player gets 4 cards from the Act Deck. Each player also has a Ringmaster. The Ringmaster counts as an Act, but not any of the 4 types, and cannot be stolen or lost.

Players should name their Circus. Players roll high on 1D6 to determine turn order. The winner of the turn order contest is known as the Lead Player.

Act Deck Card List

Name of Act:	Type
Flying Trapeze	A
Human Cannonball	A
Tightrope Walkers	A

Turn Sequence

Players take turns. On your turn roll 1D6 and move your pawn that many spaces forward. If you land on another player you may steal one random Act card from him.

If you land on a city with no time markers you may perform. Get \$10 for every act you own when you perform. Three Ring Bonus: For every 3 cards of the same type you have earn an extra \$10 when performing.

After performing put 1D6-2 (Maximum = 3) time markers on the city you just performed at. If you land on a city with any Time markers on it, you may not perform there. Use houses to represent time counters. One Hotel = Three Time Counters.

Players must stop on the Start space when they reach it. Every time the Lead player lands on the Start space remove one time counter from all cities. When a player lands on the Start space he must pay each of his Acts \$10.

A player must discard any Acts he cannot pay. If your pawn lands on a railroad, pay 1D6 x \$10 to the Bank. If your pawn lands on a utility or luxury tax pay 1D6 x \$10 to Free Parking.

If your pawn lands on Free Parking take the money there. If your pawn lands on Go to Jail put one of your Acts in Jail. If your pawn lands on Jail take one of the Acts there.

If you land on a space that allows you to draw a card then draw and keep one Act card. If you visit all the cities in a colored region get a one time bonus of 2D6 x \$10. (Keep tract of cities visited with colored chips, or on paper) If you visit all the cities on a side get a one time bonus of 2D6 x \$10.

If you visit all the cities in the game get a one time bonus of 5D6 x \$10.

You can include more acts for a longer game. Some ideas for additional act cards: Gymnasts, Woman Sus-

pending by Hair, Horn playing Seal

The Horde

Introduction

Solo card game. Card version of an old Crystal Dynamics Game.

Disclaimer

The Horde is a copyrighted, licensed product. This is merely a fan site.

Victory & Defeat

You (Chauncey) are killed if all 4 Grimthwacker cards are in the Recruit Discard Pile. You lose if you are ever unable to play your taxes. You win if you survive all 5 years (=20 turns).

Main Decks

- There are 2 Main decks:
1. Recruit Deck
2. Horde Deck

Recruit Deck

Cards drawn from your recruit deck will eventually go into one of several piles:

1. Recruit Discard
2. Village Deck
3. Defense Deck
4. Defense Discard

Horde Deck

Cards drawn from your Horde deck will eventually go into one of several piles:

1. Horde Discard
2. Attack Deck
3. Attack Discard

Odds & Ends

Six sided dice are needed. Use coins to keep track of Crowns (Money).

Setup

You start with 8 Crowns. Put the 4 Grimthwacker Cards (GC) into your Defense Deck. Put 2 Villagers & 1 Crop card into your Village Deck.

Master Turn Chart

The game has 20 Turns:

Turn	Location:	Season	Attckr	Indigenous:
1	Shimto Plains	S	2	Piranha
2	Shimto Plains	S	2	Piranha
3	Shimto Plains	F	3	Piranha
4	Shimto Plains	W	3	Piranha
5	Fetid Swamps of Buuzal	S	4	Swamp
6	Fetid Swamps of Buuzal	S	4	Swamp
7	Fetid Swamps of Buuzal	F	5	Swamp
8	Fetid Swamps of Buuzal	W	5	Swamp

18	Frozen Wastes of Vesh	S	10	Ice
19	Frozen Wastes of Vesh	F	12	Ice
20	Frozen Wastes of Vesh	W	12	Ice

Horde Deck Card List

Card Name:	#	Level
Adolescent	10	1
Shaman	5	3
Juggernaught	5	5
Indigenous	20	Per Indigenous Hordlings Chart

Indigenous Hordlings Chart

Level	Type
2	Piranha
2	Swamp
3	Forest

Level	Type
4	Desert
6	Ice

Turn Sequence

Each turn has 5 Phases:

1. Income Phase
2. Tax Phase
3. Recruit Phase
4. Horde Phase
5. End Phase

Income Phase

Certain Cards in your Village Deck will Produce Crowns: Villagers produce 1 Crown each. Crops produce 2 Crowns each. Cows produce 3 Crowns each.

Tax Phase

Pay Kronus Maelor, the Evil High Chancellor Crowns equal to the Turn Number.

Recruit Phase

Flip over the top 8 cards of your Recruit Deck. You may purchase these cards with your Crowns. Shuffle Village cards you bought into your Village Deck.

Shuffle Defender cards you bought into your Defender Deck. You may pay 1 Crown (Limit = 2) to Flip over an additional Recruit card. Cards you did not buy go into the Recruit Discard.

If the Recruit deck is empty, shuffle the Recruit Discard & draw from it.

Horde Phase

Draw & shuffle together X cards from the Horde Deck.

Recruit Deck Card List

Card Name:	#	Cost	Type	Force
Grimthwacker	4	0	D	4
Villager	10	1	V	-

X the Attacker number of the turn found on the Master Turn Chart.

These cards become the Attack deck. Each card represents a Hordling. Flip over the Top card of your Attack Deck.

Flip over the Top card of your Defender Deck. Roll 1D6 & subtract the level of the Hordling Card & Add the level of the Defender card. This is called the Battle roll.

If the Modified result is 4 or greater the Hordling is killed & sent to the Horde Discard & The Defender card is sent to the Defender Discard. If the Modified result is 3 or less the Defender is killed & sent to the Recruit Discard & The Hordling attacks the top card of the Village Deck. The attacked Village card is sent to the Recruit Discard & the Hordling is sent to the Attack Discard.

Repeat this procedure until the Entire Attack Deck has been sent to the Horde Discard (The Phase Ends), or All Grimthwacker cards are in the Recruit Discard (Game Ends). If the Defender Deck runs out, shuffle the Defender Discard & draw from it. If the Attack Deck runs out, shuffle the Attack Discard & draw from it.

End Phase

Take all Grimthwacker cards out of your Recruit Discard & Put them in your Defender Deck.

Recruit Deck Nomenclature

V Village

D Defender

X Special

Copies of that card in the Deck

Card Name:	#	Cost	Type	Force
Pit	6	2	V	-
Moat	1	6	V	-

Card Name:	#	Cost	Type	Force
Crops	10	2	V	-
Cow	10	3	V	-
Trees	10	0	X	-
Knight	4	4	D	4
Archer	6	2	D	2
Fence	6	1	V	-
Wall	6	3	V	-

Card Name:	#	Cost	Type	Force
Healing Rock	2	2	D	-
Flute	1	4	D	+1
Haunch of Meat	4	1	D	+2
Boots of Boogy	1	5	D	+2
Ring of Teleport	1	5	D	+2
Bomb	4	2	D	-
Flame Thrower	2	4	D	-

Card Notes

Trees: Discard to gain 1 Crown. Walls: If Attacked, put the Wall on the bottom of your Village Deck. Pit: If Attacked, the Hordling goes to the Horde Discard & the Pit goes to the Recruit Discard.

Moat: If Attacked, the Hordling goes to the Horde Discard & put the Moat on the bottom of your Village Deck. Healing Rock: When drawn from the Defender Deck during Horde Phase you may:

1. Put it in your Defender discard or
2. Put it in your Recruit Discard & take a Grimthwacker card (GC) out of your Recruit

Discard & shuffle the GC into your Defender Deck. Immediately Draw another card from the Defender deck to replace it. Flute: When drawn from the Defender Deck during Horde Phase, put it in your Defender discard & Immediately Draw another card from the Defender deck to replace it.

The Final Replacement card gets Force +1 Haunch of Meat: When drawn from the Defender Deck during Horde Phase, put it in your Recruit discard & Immediately Draw another card from the Defender deck to replace it. The Final Replacement card gets Force +2 Boots of Boogy: When drawn from the Defender Deck during Horde Phase, put it in your Defender discard & Immediately Draw another card from the Defender

deck to replace it. The next GC card drawn gets Force +2 Ring of Teleport: When drawn from the Defender Deck during Horde Phase, put it in your Defender discard & Immediately Draw another card from the Defender deck to replace it.

The next GC card drawn gets Force +2 Bomb: When drawn from the Defender Deck during Horde Phase, put it in your Recruit discard. The Attacker is Discarded. Flame Thrower (Dragon Flyby): When drawn from the Defender Deck during Horde Phase, put it in your Recruit discard. The Attacker & the next card in the Attacker Deck is sent to the Horde Discard.

Special Rules

***If you draw 3 Grimthwacker cards in a row in Horde Phase, the Third card has a penalty of -3 Force (Chauncey gets Dizzy).

***Whenever an Archer is defeated in combat roll 1D6:

D6	Result
1-3	Send Archer to Recruit Discard
4-6	Send Archer to Defender Discard (Long Range)

***Whenever a Shaman is defeated in combat roll 1D6:

D6	Result
1-3	Send Shaman to Horde Discard
4-6	Send Shaman to Attack Discard (He Teleports Away)

***Whenever a Shaman wins a Battle Roll Contest, instead of attacking the Village with the Shaman, draw a card from the Horde Deck & put it on the bottom of the Attack deck.

Game Designers Notes

Thanks to Naga Sugara for playtesting!

The Hunger Game

Introduction

Card game based on the Hunger Games first Book and Movie. This primarily depicts events within the arena and not outside of it or before or after. Have the last Tribute standing.

Disclaimer

The Hunger Games is a licensed, copyrighted property. This is merely a fan site.

Victory

The game end when only one player has a tribute remaining. That player is the winner.

Tribute Tokens

There are 24 Tribute Tokens. Players start the game with an equal number of Tribute Tokens:

PLAYERS	TRIBUTE TOKENS
2	12
3	8
4	6
6	4

Elimination

If you have no Tribute tokens left, you are out of the game.

The Deck

The common deck has 120 cards, one of each described in the card list.

Card Types

There are 12 card types and 10 cards for each type. Each card has a level ranging from 1 to 10.

6 types hurt. These are the Threat cards: Thirst, Hunger, Attack, Exposure, Weakness, and Game

6 types help. These are the Protection cards: Water, Food, Defense, Shelter, Trait, and Sponsor

Threats and protection cards have a 1 to 1 correspondence:

- Water protects against Thirst threats
- Food protects against Hunger threats
- Defense protects against Attack threats
- Shelter protects against Exposure threats
- Trait protects against Weakness threats
- Sponsor protects against Game threats

Card Types Table

Type:	Special Ability:
Water/Thirst	Look at any opponent's hand
Food/Hunger	Draw 2 cards
Defense/Attack	Target opponent must discard 2 cards
Shelter/Exposure	Steal 1 random card from target opponent's hand
Trait/Weakness	Draw 4 cards and discard 3 cards from your hand
Sponsor/Game	Look at next 7 cards in the deck

Roles

There are 6 Roles Available. Each player at the beginning of the game assumes one of the 6 Roles:

Role Chart

Name:	Special ability:
Katniss & Peeta	Draw 1 extra card in Reap Phase
Fox Face	May play 2 cards in Plan Phase; Food Protection cards are -2
Thresh	All cards are +1 each
Cato	Sword and Alliance cards are worth 20 (Fight & Protection)
Marvel	Combat and Trait cards are worth +3 each

Name:	Special ability:
Clove	Knife and Ruthless cards are worth 20 (Fight & Protection)

Setup

Each player selects a role. Shuffle the Deck. The hungriest player goes first.

Turn Sequence

Players take turns. Each turn has 3 Phases:

- 1. — Reap Phase
- 2. — Plan Phase
- 3. — Survival Phase

Reap Phase

ALL players go to 7 cards. If you have more discard the excess. If you have less, draw until you have 7.

If you are the active (current) player and start the phase with exactly 7 cards, you may discard a card and then draw a card. If the deck ever runs out, shuffle the discard and draw from it.

Plan Phase

You may discard 1 card from your hand to activate it's special ability as described in the card type table.

Card List

Level	Type	Name:
1	W	Dew
2	W	Rain
3	W	Puddle
4	W	Rivulet
5	W	Pond
6	W	Pool
7	W	Creek
8	W	Canteen
9	W	Supplies

7	F	Bird
8	F	Rabbit
9	F	Package
10	F	Cornucopia
1	S	Lean-To
2	S	Tent
3	S	Copse

Survival Phase

You may discard 1 Threat card against a target player of your choice. The target player must discard 1 or more protection cards of the corresponding type that when combined must equal or exceed the level of the Fight card. If unable to do so, the Target player must discard one of his Tribute Tokens. Alternatively, the active player may play a Gamekeeper Combo: This requires the discard of 6 cards, 1 of each type.

This causes all other players to lose 1 Tribute each with no defense.

The Independence Of India

Introduction

Card game for 2-4+ players. Theme: The Independence of India from the British Empire.

Victory

The first player to reach 100 Points is the winner.

The Deck

Players share a common deck. The deck has 5 Suites:

- L** Leaders
- T** Tactics
- C** Campaigns
- R** Resistance
- D** Diplomacy

All Suites except Tactics have 10 cards. Every card has a point value from 1 to 10. Cards in the Deck are kept face down.

Cards in the Discard are kept face up. If the Deck ever runs out, shuffle the discard and draw from it.

Setup

Each player is dealt 5 hand cards and 3 Reserve cards. Place your reserve cards face down in front of you.

Turn Sequence

Players take turns. Each turn has 2 Phases: Organize Phase Protest Phase

Organize Phase

Draw 1 card from the top of the Deck or the Discard. You may replace one card in your hand with 1 card from your Reserve. Discard 1 card.

Your hand must contain 5 cards. If you have fewer draw cards from the top of the Deck. If you have fewer discard the excess.

Protest Phase

If you have a Meld, you may play it. A Meld consists of 1 Card from each of the 5 Suites. Gain points equal to the total point value of all 5 cards you played.

Record Points gained. Keep a running total with paper and pencil. Discard your Meld and draw 5 cards.

The Isle Of Dread

Introduction

Scenario for WarpQuest. for the [Warpquest Core Rules](#) WarpQuest Core Rules. Based loosely on the old D&D Expert Rules system.

This is a conversion of Dungeon Module X1 "The Isle of Dread". Each player has an Adventuring Party in search of Adventure & Fortune. Each party is represented by a pawn on the track.

Disclaimer

D&D and the Isle of Dread are copyrighted properties. This is merely a fan site.

The Scenario

The map spaces represent distance and time. There are 3 Modules. Each Module track is 30 spaces long.

Adventurers Table

1D8	Type:	Stealth	Magic	Fighting	Hits
1	Fighter	+2	-	+4	18
2	Thief	+4	-	+2	12
3	Cleric	-	+4	+2	12
4	Magic User	-	+6	-	6
5	Elf	+2	+2	+2	12
6	Dwarf	-	-	+6	18
7	Halfling	+6	-	-	6
8	Pick one	-	-	-	-

Adventurer Notes

Thieves are +4 Stealth vs Traps. Clerics are +2 Magic & Fighting vs Undead and Demons. Use a card to represent each Character.

Challenges

Challenges will be of two types: Traps & Foes.

Foes

If you encounter a Foe, you have to make several challenge Test Rolls:

1. Make a test vs Stealth. If successful, you defeat the Foe. Discard it. If not. . .
2. Make a test vs Magic. If successful, you defeat the Foe. Discard it. If not. . .
3. Make a test vs Fighting. If successful, you defeat the Foe. Discard it. If not. . . 1D3 random party members are wounded for 1D6 Hits each.

There is no "Artifact"

Victory

The player with the most gold at the end of the game wins. The game ends when one party reaches the last space of the third module.

Adventuring Parties

Each Party has 6 adventurers. All Party members are 6th level. Roll on the Adventurers Table for each adventurer to see what class he is.

The party has skills in 3 attributes: Stealth, Magic, and Fighting. Add the bonuses from all adventurers to get a grand bonus for that attribute.

When making a challenge roll the Foe rolls 6D6 and adds its DM (Difficulty Modifier) if any. When making a challenge roll the Party rolls 2D6 and adds its Attribute bonus. If you defeat the foe get 1D6 Gold.

Traps

If you encounter a Trap, you have to make several challenge Test Rolls:

1. Make a test vs Stealth. If successful, you avoid the Trap. Discard it. If not. . .
2. Make a test vs Magic. If successful, you avoid the Trap. Discard it. If not. . . 1D3 random party members are wounded for 1D6 Hits each.

Wounds

Encounters that are "Poison" do an extra 1D6 Hits of damage. If a party member has zero or less hits left he is killed. Instead of rolling to see how many hits a wound does you may discard a retainer.

At the end of each module the party heals 1D6 Hits.

Fighting Other Parties

If your pawn lands on the same space as an opponent's party you will fight. Each player makes challenge rolls for stealth, magic and fighting. The side that wins the most challenges wins the encounter.

If you lose a fight with another players Pawn you get 1D3 randomly distributed Wounds and your opponent gets to take one "Aid: Item" card from you.

Item Cards

At the beginning of the game draw 6 cards from the Item table. Each Item must be attached to one character. Each character can only use one weapon during a Foe encounter.

Items are played face up partially under the attached Character card. Magic users can only use daggers and staves as weapons and cannot use armor. Thieves cannot use metal armor or shields.

Clerics cannot use edged weapons.

Item Deck

Dagger +1	Aid: Item: Fighting +1
Long Bow +1	Aid: Item: Fighting +1
Arrow of Slaying	Aid: 1 use Item: Fighting +2
Cloak of Invisibility	Aid: Item: Stealth +2

Sword +2	Aid: Item: Fighting +2
Ring of Telekinesis	Aid: Item: Stealth +1 & Magic +1
Mineral Encrusted Throne	(Last Space)

Variant Rules: Character Levels

Each adventurer (Character) has a starting level of 3-7 (1D5 +2). Fighters & Dwarves get 3 Hits for each level. Elves, Thieves, and Clerics get 2 Hits for each level.

Magic Users get 1 Hit for each level. Each level gives a +1 bonus in one attribute.

- A Magic user must get his bonuses in Magic.
- A Dwarf must get his bonuses in Fighting. (A 3rd level Dwarf has Fighting +3, A 7th level MU has Magic +7)
- An Elf must distribute his bonuses as evenly as

possible.

- A Fighter must pick +1 in Stealth for every +2 in Fighting.
- A Thief must pick +1 in Fighting for every +2 in Stealth.
- A Cleric must pick +1 in Fighting for every +2 in Magic.

Experience

For every module you finish, 2 random party members gain 1 level each.

The Keys Of Chronos

An updated card game version of the 1980 doctor who - the game of time and space by games workshop

Introduction

The old Time Lords are gone, and many races are competing to take their place as the Lords of Time. In order to forge a new Gallifrey and a new order of the Lords of Time, the Eighth Doctor must scour time and space to recover the six keys of Chronos. This will insure the new Gallifrey protection from its rivals, and bring order to all time and space.

Set Up

This game may be played with 1 to 4 players. You will need to make the four card decks defined below. And like all the other Doctor Who games I have written, you can use DOCTOR WHO CCG cards in lieu. You will also need a twelve sided die (d12), and four Eighth Doctor miniatures, or counters or figures representing the King of Time.

- The cards create your board.
1. Shuffle the Mission cards and deal six to each player.
 2. Shuffle the Key cards and lay them face down on the table moving from left to right and going down to form an 8 x 5 table of cards.
 3. Shuffle the Item cards and using the same manner described in #2 lay them face down on top of the Key Cards.
 4. Shuffle the Monster cards and using the same manner as # 2 and 3 lay them face down on top of the Item Cards.

Playing The Game

Each player at the beginning of the game looks on the Mission cards to see which six keys he needs. He needs to collect these key cards in order to win. All players participating roll a d12. The Player with the highest score goes first. Each turn the Player's Character can do any TWO of the following actions:

Mission Deck

MISSION CARD	# IN DECK	DW CCG
Key 1	4	Time Past
Key 2	4	Time Present
Key 3	4	Time Future

1. Move up to 2 spaces either orthogonally or diagonally.
2. Search for the Keys in the space you are in. You do this first by turning up the top card over. If it is blank you there is no monster and you can collect the Item Card and Key Card beneath.
3. Fight the monster in the space you are in.
 - Each Doctor character has ENERGY of 1. Add the energy of all item cards in your possession to your score. The modified number is the number you must roll equal to or less than on a 1d12 in order to defeat your foe.
 - Each monster has an ENERGY score which is already modified by whatever weapons it normally uses (for those using DW CCG Cards, this is normally ENERGY + 3). The monster attacks you simultaneously, rolling a 1d12 (which can be rolled by another player). If it rolls its ENERGY or less it hits.
 - Combat is then resolved for the combat round:
 - * If the Doctor hits and the Monster miss, then the Monster is defeated.
 - * If the Doctor misses and the Monster hits, then
 - ** The Doctor is Stunned (in a multiplayer game)
 - *** The Item and Key cards are turned up.
 - *** All Key Cards that the Player's Character has that are not blank and are not of the type that space already possessed, is place in that site, and are given to any player who lands in that space and defeats the monster.
 - *** The Player must skip two turns before his Character can make any more actions.
 - ** The Doctor fails his mission, and the game is over (in a solitaire game)
 - * If both sides hit, or both side miss, then no one is defeated and the Combat Round is repeated.
 - The Combat Round continues until either the Doctor or the alien is defeated.

Winning

The first player to obtain all six keys matching his Mission cards wins.

MISSION CARD	# IN DECK	DW CCG
Key 4	4	Past Watcher
Key 5	4	Present Watcher

The Last Great Time War

Introduction

Card game for 2 players. Depicts the ever changing events of the last great time war. One player is the Gallifreyans.
The other player is the Daleks.

Disclaimer

Doctor Who is a copyrighted, licensed property. This is merely a fan site.

Victory

Both sides are practically obliterated, however the winner Gets more survivors that escape the Time Lock. The winner is the first player to win 4 Hands.

The Deck

Players share a common deck.

Setup

Shuffle the deck. Flip a coin to see who goes first.

Hand Sequence

- Each Hand has 2 Phases:
1. Time Phase
 2. War Phase

Time Phase

Each player is dealt 10 cards. Players may discard up to 2 cards and draw replacements. If the deck runs out, shuffle the discard and draw from it.

War Phase

Players take turns playing 1 card (your action) at a time from their hands face up to the table. (if you played the last card last Hand, your opponent goes

first this Hand) When a card is played, its special ability is immediately activated. If there is no target you want for the ability, ignore it.

This continues until both players have played all their cards. (if you have a card only your opponent can use, you may on your Turn, discard it and draw 1 replacement card as your action) Actions target specific types of cards in play or random cards in your opponent's hand. If you control an opponent's card, you do not activate its special ability.

After all cards are played, the player who controls the Cards in play with the most Total Force wins the hand. Ties remain Ties. You may not pass, however you may as your action discard a card for no effect.

Notation

Destroyed cards are discarded. Stealing & Discard card abilities only target cards in hand. Control & Destroy card abilities only target cards in play.

Cards stay in play from turn to turn. Cards you search for go into your hand. Destroyed cards are discarded.

Stolen cards go from one players hand to another. Controlled cards go from opponents in play area to your in play area. Recalled Cards go from an in play area into your hand.

Scry Looka at Opponents hand or next 10 cards in deck

Card List Notation

- G** Gallifreyan Player Only
- D** Dalek Player Only
- B** Both Players
- BP** Both Players
- R** Race

The Last Starfighter Skirmish

Introduction

Board & card game for 2 players. Battle between ships of the Star League & the Kodan Armada Takes place in the Last Starfighter Universe. Each figure represents a single Station, Gunship or Squad of Fighters.

Disclaimer

The Last Starfighter is a licensed, copyrighted, trademarked property. This is just a fan site.

Victory

Destroy all Enemy Ships (Units).

The Map

Use an 8x8 chessboard.

The Fighters

Use Counters (chits) or miniatures (figs) to represent Ships (Units).

Units Table Notation

Number of that type of unit each player has in setup.

Move The maximum range Move Card the unit can use.

Atks The maximum number of Attack Cards the unit can use per turn.

Skill = Does the Unit have a "Skilled" pilot.

Kodan Armada Ship Table

Name	#	Hits	Atks	Move	Skill
Flagship Carrier	1	8	4	2	N
Deck Fighter Squad	8	1	1	4	N
Wing Commander	2	1	2	4	Y
Xurian Gunship	2	2	1	3	N
Zandozan Hunter	1	2	2	5	Y

Flagship Carrier

Large Warship used to transport short range Deck Fighters and Invasion Ground Forces. Equipped with

Star League Ship Table

Name	#	Hits	Atks	Move	Skill
Gunstar	2	4	4	4	Y
Advanced Gunstar	1	6	3	5	Y
Rylan Gunship	4	2	1	3	N
Star Base	1	8	4	0	N

Gunstar

The Main ship of the Star League. Most League production is devoted to building these Ships. The Pilots & Navigators of these formidable ships are the most Skilled & gifted flyers in the Star League.

The Gunstar can use all Attack cards except the DB and those designated as Station cards

Advanced Gunstar

This is a State of the Art Prototype Ship. This is the only Unit that can use the Death Blossom Attack Card. The Death Blossom (DB) does 2 Points of damage to every unit adjacent to the Gunstar.

The Gunstar cannot do anything until the end of its next turn after using the DB. The Gunstar can use all Attack cards except those designated as Station cards

Rylan Gunship

These are older, less powerful Ships still more numerous than Gunstars. Rylan Gunships can use only Laser & Missile Attack cards.

Starbase

Non-mobile Base built in orbit or built on a Planetoid. The Starbase can use Lasers, Missiles, Particle Accelerators & Station type Weapons. Starbases cannot Ram.

the massive Meteor Gun good for destroying Bases at Long Range. The Carrier can use Lasers, Missiles, Particle Accelerators & Station type Weapons.

Deck Fighter Squad

Squad of 20 small fighters. Kodans value discipline over skill, so these units are not very effective. Fighters can use only Laser & Missile Attack cards.

Wing Commander

Leader unit of the Deck Fighters. These rare Pilots are more skilled than common Deck Fighters. Commanders can use only Laser & Missile Attack cards.

Xurian Gunship

Identical to Rylan Gunships, these craft are piloted by Zurian Cult Fanatics. Zurian Gunships can use only Laser & Missile Attack cards.

Zandozan Hunter

Fast Gunship filled with Zandozan Mercenaries & Assassins. Hunters can use all Attack cards except the DB and those designated as Station cards.

Setup

Each player places his Units on squares on his back two rows. Units may not stack.

The Cards

Players share a common deck.

Turn Sequence

- Players take turns. Each turn has 3 phases:
- Tactics Phase
 - Move Phase
 - Fire Phase

Tactics Phase

Draw 5 cards. If the deck runs out, shuffle the discard and draw from it. Max hand size = 7 cards. Discard excess cards.

Card List

Name:	#	Type	Range	Notes:
Maneuver	5	M	1	
Cruising Speed	5	M	2	
Fast Speed	4	M	3	
Very Fast	4	M	4	
Super Fast	3	M	5	
Star Navigator	3	M	K	Only by Skilled Units
Dodge	2	D	-	Not useable by Stations
Evasive Maneuvers	2	D	-	Not useable by Stations
Jinking	2	D	-	Only by Skilled Units
Defensive Fire	2	D	-	Only by Skilled Units or Stations
Armor	2	D	-	Only by Gunstars & Stations

Move Phase

Play (discard) a Move card to move one of your Units. Units cannot move through other units. The move card has a number.

This is the number of spaces the Unit moves. Moves are diagonal or orthogonal. Instead of moving just one unit in any direction, you have the option of moving one or more units forward the indicated number of spaces using a single move card.

Fire Phase

Play (discard) an Attack card to have a unit attack. Some attacks can only be used by certain units. The attack card has a number.

This is the range of the attack. Attacks are diagonal or orthogonal. The enemy unit that is the target of the attack loses 1 Hit.

A Unit reduced to zero hits is destroyed. The controller of the Target unit may play a Defense card to negate the attack. Units cannot attack through other units.

Ram Attacks

The smaller Unit is destroyed. The larger Unit loses 1 Hit.

Card List Notation

- M** Movement
A Attack
D Defense
Type Purpose of card
Range = Distance of Move or Attack
Number of that type of card in the deck

The Librarians

Introduction

Card game for 2-4+ players. Based on the Librarians TV show. Players make and score melds.

Victory

The game ends when 10 Melds have been completed. When this happens all players may have one last chance to make a meld. The player with the most Meld points is the winner.

The Decks

Players share a common deck. There is one common Deck for each season. There are 8 types of cards:

- L** Librarians
- F** Foes
- R** Relics
- A** Aids
- P** Places
- S** Situations
- K** Knowledges
- M** Mysteries

Setup

Shuffle the Deck. Deal each player 3 cards. Randomly determine who goes first.

Play proceeds clockwise.

Turn Sequence

Players take turns. Each turn has 4 phases:

1. Draw Phase
2. Action Phase
3. Meld Phase
4. End Phase

Draw Phase

Draw 2 Cards.

Action Phase

Reveal 1 card to perform an action: Librarians = Draw 1 Card

- Foes = Opponent must shuffle 1 card of his choice back into the deck. Then he draws 1 Card
- Relics = Gain 1 Meld Point
- Aids = Look at next 4 cards in Deck. Replace this card with 1 of those
- Places = Draw 1 random card from the discard and keep it

- Situations = Give this card to opponent. He must give you a different card in return
- Knowledges = Look at Opponent's Hand
- Mysteries = Draw 2 cards. Shuffle 2 cards from your hand into the deck.

Or Reveal 3+ cards of the Same type to perform an action:

- 3 Librarians = Draw 2 cards
- 3 Foes = Opponent must shuffle 1 card of his choice back into the deck.
- 3 Relics = Gain 2 Meld Points
- 3 Aids = Look at next 4 cards in Deck. Keep 1 of them
- 3 Places = Draw 3 random cards from the discard. Keep 1 of them
- 3 Situations = Steal 1 random card from opponent's hand
- 3 Knowledges = Look at Opponent's hand. Take 1 card. Opponent Draws 2 cards
- 3 Mysteries = Draw 3 cards. Shuffle 3 cards from your hand into the deck.
- 4 Different Librarians = 4 Meld Points. Shuffle these into deck and draw 4 cards
- Gangs All Here: 5 Different Librarians = 5 Meld Points. Shuffle these into deck and draw 5 cards
- Round the World: 5 Places = 5 Meld Points. Shuffle these into deck and draw 5 cards
- The Library: 5 Relics = 5 Meld Points. Shuffle these into deck and draw 5 cards
- Conclave of Villains: 5 Foes = 5 Meld Points. Shuffle these into deck and draw 5 cards
- Combined Genius: 5 Aids = 5 Meld Points. Shuffle these into deck and draw 5 cards
- It's Complicated: 5 Situations = 5 Meld Points. Shuffle these into deck and draw 5 cards
- Know it All's: 5 Knowledges = 5 Meld Points. Shuffle these into deck and draw 5 cards

It's a Mystery! = 5 Mysteries = 5 Meld Points. Shuffle these into deck and draw 5 cards

Meld Phase

A Meld must have 1 of each of the 8 card types. A Meld scores 10 Points. For every combo a meld has it scores 1 extra point.

After scoring discard all melded cards and fill your hand to 7 cards.

End Phase

Max hand size is 8 cards. Place excess cards back on top of the deck in any order.

The Muppet Show

Introduction

Card game for 2-4 players. Theme: The Muppet Show! The game represents one Episode.

Disclaimer

The Muppet show is a trade-marked, copyrighted property. This is merely a fan site.

Winning

The game ends when 8 Acts have been played. The player with the most Act points is the winner. If tied, the player with the most acts wins.

The Deck

Players share a common deck. The Deck is kept face down. The Discard is kept face up.

Act Points

Use plastic discs to keep track of Act Points.

Setup

Pick who the Guest star is going to be from the Guest Star List. Shuffle the deck. Deal 5 cards to each player.

The youngest player goes first. Play proceeds clockwise.

Turn Sequence

Players take turns. Each turn has 4 Phases:

1. Dressing Room Phase
2. Backstage Phase
3. Act Phase
4. Finale Phase

Dressing Room Phase

Draw 1 card from the top of the deck or discard and put it in your hand. If the deck runs out, shuffle the discard and draw from it.

Backstage Phase

You may play (discard) a Special card in this phase to activate its special ability.

Act Phase

You may play an Act this phase. An Act requires 2-6 specific cards to be played (revealed) according to the Act Chart. Score Act Points as listed on the Chart for completing the Act.

Score an extra Act Point if you were the last player to also play an act. Discard the Act cards at the end of this phase. Each Act in the Act Chart can only be claimed once per game.

Bonus cards can be played along with the required cards of an Act. Each Bonus card played is worth 1 Act point. Some Bonus cards give an extra Act Point for specific Acts. Multiple copies of a card cannot be used in a single Act.

Finale Phase

Max hand size is 7 cards. Discard excess cards.

The Mystic Warriors Of The Plains

Introduction

Each player takes the role of an (American) Indian Brave (Young Warrior). Players compete to accumulate prestige by their deeds.

The Deck

Players share a common deck. Use tokens to represent Eagle Feathers.

Victory

The first player to accumulate 28 Eagle Feathers has enough to make his Warbonnet and wins the game.

Setup

Each player starts with a hand of 6 cards. The oldest player goes first.

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Medicine Phase
2. Raid Phase
3. Hunt Phase

Medicine Phase

The current player draws 1 card. If the deck runs out shuffle the discard and draw from it. Max hand size is 9 cards. Discard excess cards.

Raid Phase

A player may decide to go on a Raid. There are Four types of Raids: Horse Raids, War Parties, Revenge Raids, and Pipeholder Raids.

To go on a Horse Raid you must do 5 things:

1. Play one Spirit card
2. Play one Tribe card
3. Play one Weapon card
4. Play one Dress card
5. Play two Approach card

Next flip over and discard the top 7 cards in the Deck. For every Coup card that comes up gain one Eagle Feather Token. Discard all played cards.

A Coup is an action that demonstrates considerable courage.

To go on a War Party you must do 5 things:

1. Play one Spirit card
2. Play one Tribe card
3. Play two Weapon cards
4. Play two Dress cards

5. Play one Approach card

Next flip over and discard the top 8 cards in the Deck. For every Coup card that comes up gain one Eagle Feather Token. Discard all played cards.

To go on a Revenge Raid you must do 5 things:

1. Play two Spirit cards
2. Play one Tribe card
3. Play two Weapon cards
4. Play one Dress card
5. Play two Approach cards

Next flip over and discard the top 9 cards in the Deck. For every Coup card that comes up gain one Eagle Feather Token. Discard all played cards.

To go on a Pipeholder Raid you must do 10 things:

1. Play two Spirit cards
2. Play one Tribe card
3. Play two Weapon cards
4. Play two Dress cards
5. Play two Approach cards

Next flip over and discard the top 10 cards in the Deck. For every Coup card that comes up gain one Eagle Feather Token. Discard all played cards.

In a Pipeholder raid the player is the Leader of the Raid. A player must have 10+ Feathers to go on a Pipeholder Raid.

Hunt Phase

If the current player did not go on a raid this turn he gets one action this phase. An Action can be used to do one of 5 things:

1. Play a Hunt or Trade Card.
2. Tribal Gathering: Discard a Tribal card and any other card to draw 2 cards.
3. Small Game Hunting: Draw 1 card
4. Trade with other players.
5. Omen: Discard a Spirit card to look at next 10 cards in deck.

If trading, the player may trade any of their cards with any one other player. Trades must be acceptable to both parties. There are no forced trades. A player may also play one Luck card.

Playing a Luck card does not use up an action. Discard all played cards.

Card Types

- T** Tribe Cards
- W** Weapon Cards
- D** Dress Cards
- A** Approach Cards
- C** Coup Cards
- H** Hunt/Trade Cards

Notes

In the type of limited warfare practiced by the Native American Indians there were very few casualties.

The Postman

Introduction

Board game/War game based on the 1997 SF Film the Postman. One player is the Postmen. The other player is the Holnists.

Victory

Destroy the opposing Leader Unit.

The Map

The Map shows about 40 Towns linked by Roads. The distance between 2 adjacent towns linked by a road is called a space. Name the towns (Pineview, Bridge City, etc.).

Show other features such as Rivers, Forests, and Mountains.

Town Rating

Towns all have a rating of either Small, Medium, or Large. This affects recruit rolls.

The Deck

A regular 52 card deck is used. The Postmen can use red cards. The Holnists can use black cards.

Unit Stat Chart

Unit:	Move	Fight	Sneak	Recruit
The Postman	4	5	2	2
Postal Rider	3	6	3	4
Postmen Cavalry	2	4	4	3
Town Militia	X	6	X	X
The General	2	2	5	5
Holnist Patrol	2	5	4	X
Holnist Regiment	1	3	6	6

Move Stat

Maximum number of spaces the unit can move in a turn.

Fight Stat

When rolling the D6 to attack, a roll of this number or higher will kill an enemy unit in the same town.

Sneak Stat

You may attempt to move through a stack of enemy units. To do this, you must roll this number or Higher on a D6. This stat is also used to retreat from an

Dice

Six sided dice are needed.

Counters

Counters are used to depict Units.

Postmen Units

The Postman: Unique Leader Unit. Postal Rider: A single Postman on a fast Horse. Postmen Cavalry: A group of Postmen with horses and rifles.

Militia Units

Town Militia: Poorly Armed men without Horses. Will not leave their town.

Holnist Units

The General: Unique Leader Unit. Holnist Patrol: A squad of Scouts on Horseback. Armed with automatic rifles. Holnist Regiment: Includes Infantry and Artillery.

enemy that enters your location.

Recruit Stat

When rolling the D6 to recruit, a roll of this number or higher will convert a militia in the town into one of your unit types.

Stacking

Any number of units may occupy the same space (town).

Militia Setup

All towns not occupied by player units will have 1 Militia Unit.

Holnist Setup

The Holnist Player starts with: 5 cards The General Unit, 3 Regiments, and 1 Patrol. All these units start in a town called the Holnist Base Camp.

Postman Setup

The Postman starts with: 5 Cards The Postman Unit and 4 Riders. These units start in a town called Post Town located at least 3 spaces away from The Holnist Base Camp.

Turn Sequence

Players take turns. The Postmen go first. Each turn is divided up into 4 Phases:

1. Move Phase
2. Fight Phase
3. Recruit Phase
4. Militia Phase
5. Mail Phase

Move Phase

Units can move a number of spaces up to their Move Stat rating. You may attempt to move through a stack of enemy units. To do this, you must roll your sneak number or higher on a D6.

If you fail your sneak roll, you must stop. If you end your move in the same space as an enemy unit, the Enemy units may attempt to retreat. To do so each must roll their Sneak number or higher on D6. If they fail they must remain in place. If they succeed they may move their unit one space to a town not Occupied by any enemy units.

Fight Phase

If opposing units are in the same town, they will fight. Militia will not fight Postmen. A Militia stack will fight Holnists on a roll of 6+ on 1D6.

All units get to make 1 Attack. All attacks are simultaneous. A unit rolls 1D6 to attack: a number equal to or higher than your Fight stat will Cause 1 casualty (opponent's choice). If after all attacks are made and units from both sides remain, the Side that took more casualties will retreat 1 space to a town not Occupied by enemy units. If both sides suffered equal casualties the postmen Will retreat. If unable to retreat continue with a second round of Combat.

The Deck

If both sides remain after a second round, the smaller side will surrender. If both sides have equal numbers postmen and militia will surrender to Holnists. Postmen and Holnists who surrender are destroyed while Militia are immediately Recruited by Holnists.

Recruit Phase

Each unit may make 1 recruit roll if it occupies a town with 1 or more Militia. When rolling the D6 to recruit, a roll of this number or higher will convert 1 militia in the town into one of your unit types.

Recruit Type Table

1D6	Postmen:	Holnists:
1-5	Rider	Patrol
6+	Cavalry	Regiment

Small towns get -1 to Type Roll. Large Towns get +1 to the Type roll. Leaders get +1 to Type rolls.

Militia Phase

Skip this phase on Holnist turns. If a town is unoccupied by Postman or Holnist Units roll 1D6: This is the Militia Roll. Get +1 for large towns and -1 for small towns.

On a roll of 3+ one Militia Unit appears. A small town may have a max of 1 Militia Unit. A medium town may have a max of 2 Militia Units.

A large town may have a max of 3 Militia Units.

Mail Phase

Draw 2 cards. Max hand size is 7 cards. Discard excess cards.

Terrain

Units in Towns adjacent to a Forest get +1 to their Sneak Rolls. Units in Towns adjacent to a lake or river get -1 to their Sneak Rolls. Units defending in towns adjacent to Mountains get +1 to their Attack Rolls.

Rule Number 7

If both Leaders are present in the same battle, roll 1D6: On a roll of 4+ the game will be decided by a one on one duel: both sides roll 1D6: The General adds 1. The Postman may reroll a roll of 1 or 2. Reroll ties. The higher roll wins.

Card:	Effect
A H	Luck: Reroll target Die roll
2 H	Rumors: Get +1 to all Militia Rolls
3-9 H	Resistance: Target Militia Stack will fight Holnists
10 H	Spies: Draw 1 card then Look at opponents Hand
J H	Winter: Holnist skips his next Move Phase
Q H	Ambush: All units in this Battle get +3 to attack rolls
K H	Narrow Escape: Unit Automatically Retreats
A D	Hope: Get +1 to all recruit rolls this turn
2 D	Confusion: Opponent must discard 2 random cards
3-9 D	Pony Express: Unit gets Move +1
10 D	Deliver the Mail: Move Rider to any unoccupied Town
J D	California Postman: Gain 1 Rider on Town on Maps edge
Q D	Rough Terrain: Negate all moves by target stack
K D	Wilderness: Unit Automatically makes Sneak Roll
A C	Resupply: Draw 2 Cards
2-9 C	Forced March: Stack gets Move +1
10 C	Brutality: In Battle destroy 1 opposing unit
J C	Fear: Postmen get -1 to recruit next turn
Q C	Cowed: Militia stack does not fight
K C	Trap: All your Units get +2 to Fight this battle
A S	Firepower: All your Units get +1 to Fight this battle
2-9 S	Intercept: Unit gets -1 to Sneak or Retreat Roll
10 S	Discipline: Target Unit is not destroyed
J S	Organization: Get +3 to Type Roll
Q S	Conscription: Get +3 to target Recruit Roll
K S	Break Morale: Opponent discards 2 Random Cards

Note: Postmen use Red Cards. Holnists use Black Cards

The Sabbath Days

by C Gerard Luft

Rules

The eighth doctor has lost his memory.
He has a whole new band of enemies.
One player plays Sabbath.
The other is the good doctor.
There are three decks:
1. One for the doctor,
2. One for Sabbath and
3. An "elemental" artifact deck.
At the start of each turn each player draws three cards from their deck. The top card of the artifact deck is revealed. The players fight this turn for that card.
The winner who gets the most elemental artifacts wins. The game continues until the last artifact is claimed. When players run out of cards they do NOT reshuffle.
The doctor begins with the eighth doctor card; Sabbath, with the Sabbath card. Cards remain on the table (not in the hand) and can never be discarded.

Materials Needed

You will need to make the three card decks and have ten sided dice.

Special Note For Doctor Who Ccg Players

So you bought the starters and boosters by the box. Now your swimming in dwccg cards. In the card lists below names of dwccg cards that you can use to substitute are given.
You will find that the energy, substance and support values add up to the power value (except for Miranda). The power level for resource and Flash cards are 3. You can find good pictures of the eighth doctor to affix to the doctor card at any decent doctor who

site. Conceptual pictures of fitz and anji can be found at the fan fiction area of the timelords uk site.
You can use a picture of Orsin Wells with out the beard for Sabbath (this is lance parkins suggestion at least).

The Game Draw Phase

Each player draws 3 cards. The max hand is 9. You must discard down to this number. The top card is revealed on the artifact deck.

Challenge Phase

Each Player role a 1d10 and adds his character power value to the role. If the doctor rolls a 10 he gets to roll again (and so on). Then each player may play any cards from his hand to the table adding those cards valve to the role.
The player with the highest power score wins the artifact.

Damage Phase

The loosing side must discard all the cards played this turn (except for the doctor or Sabbath.) The winning side must discard cards equal to loosing sides power score. The remaining cards are returned to the hand.

Card List

Players making their own cards should ignore the parenthesis; thats for doctor who ccg conversions only. (dwccg conversion; if not present then the dwccg card has the same name) the eighth doctor: any doctor card; the sixth doctor is a good expendable card. Just paste a good paul mcgann doctor picture over the 6th doctor image)

Goals

he who has the most elemental artifacts at the end of the game wins!

room has opened. Could the EYE have been in their all the while? But one challenge stands in the Doctor’s way of exploring the cloister room and unveiling its secrets: SABBATH!

Bonus Game

Doctor Who: Eye Spy

Overview

The Doctor and Sabbath are both looking for the scattered remnants of the Elementals, the Lords of Time who never existed (see Doctor Who-Adventuress of Henrietta Street). Chief among these artifacts is a black sun, the EYE. He who controls the EYE controls the new dynasty of Time Lords for the universe.

But while the Eighth Doctor has looked without for the Eye, he has not tried to first look WITHIN. The TARDIS was once infinite, but now only a small part of its interior is accessible. And Fitz is hearing strange sounds behind the unusual walls that have partitioned the TARDIS’ interior (see Doctor Who- Trad-ing Futures). And now a door to the mysterious cloister

Setup

This is a board game version of DOCTOR WHO: THE SABBATH DAYS. You will need to be familiar with that game and make a set of cards from SABBATH DAYS in order to play DW: EYE SPY.

One Player plays the Doctor. His goal is to move from the CONSOLE ROOM to the CLOISTER ROOM. The other plays Sabbath. His goal is to prevent the Doctor from reaching the cloister room.

You will need to make a 10 by 10 board (or print the one provided), each of its hundred squares representing the interior rooms of the TARDIS. The middle two squares of the bottom row mark as the MASTER CONSOLE ROOM (where the Doctor Begins). Near the console room, select a square for each of the following rooms: Doctor’s Room, Dormitories, Workshop, Stel-

larium, Sick bay, and Power room (the Laboratory and Galley share space in the Console Room; you will not need to mark separate rooms for these). The mark the middle two squares at the top row of the board as the CLOISTER ROOM (where Sabbath begins).

The Doctor uses a set of the DOCTOR DECK from DOCTOR WHO: THE SABBATH DAYS. This will include all the cards, except: all space ships, space stations and TARDIS cards. Sabbath uses a set of the SABBATH DECK from DOCTOR WHO THE SABBATH DAYS. This deck will include all the cards except for: the Jonah and all space ship AND weapon cards. You will also need a ten sided die (1d10) and a token to represent the DOCTOR and SABBATH (I am certain, the Other would prefer the use of Chess pawns).

The Turn

1. DRAW PHASE

Each player draws three cards from their decks.

2. MOVEMENT PHASE

Each player rolls a 1d10. If the roll is 1-9, the character may move 1 space, across, up, down, or diagonally. If the roll is a 10, then that character moves two spaces. The Doctor moves first, and then Sabbath moves.

3. CONFLICT PHASE

If the Doctor and Sabbath end up in the same room as each other, a conflict occurs. The rules are the same as combat resolution in DOCTOR WHO THE SABBATH DAYS, including the opened ended 1d10 rule for the Doctor. All cards in the player's hands should be played down to modify their power score. If the Doctor

wins this conflict, Sabbath must roll a 1d10, and move back towards the CLOISTER that many squares. If the Doctor losses the conflict, the Doctor must do the same, moving instead towards the CONSOLE ROOM though. However, if the Doctor played a room card (e.g., TARDIS LABORATORY) during the conflict resolution, then he retreats to that room instead. If either of the characters end up retreating outside the confines of the TARDIS (the game board), then that character loses the game.

4. DISCARD PHASE

If their was no conflict that turn, then each player discards his hand.

Object

For the Doctor to win: Sabbath must be driven off the game board through a conflict, or the Doctor must successfully reach the

Cloister Room.

For Sabbath to win: the Doctor must be driven off the game board through a conflict.

Optional Rules

If you wish, room cards may be played outside of a CONFLICT to move the Doctor to that particular room. Also, Desperate Action Card may be played to jettison 25 rooms, randomly chosen by rolling the ten sided die twice as a 1d%.

The Shadow Of A Dark God

Introduction

Scenario for Artifact. By Zak! The players will discover that the death of a friend is linked to a mysterious cult worshipping an immensely ancient deity. First module is the investigation on the death of a

friend Second module is the search on the cult temple.

Character Generation

[Artifact: Adventure Gaming System](#) Artifact Core Rules Needed to Play.

Module 1: Investigation On A Close Death

Card Name:	Notes:
Cultist ambush	Combat X2
Police interrogation	Personality X2 or Personality & Linguistics
Library search	Ling.and Science: If successful move forward 1D6 spaces
Antique dealer shop	Linguistics & Personality: If failed miss next turn

Hidden safe	Mechanics X2 or Agility
Ancient occult text	Aid: Linguistics +1
One muder evidence	Aid: Personality +1
Ancient tome	Linguistics and Science: if successful gain...
	Powder of Ibn Gazi = Aid: Combat +2 against monsters.
Arcane manuscript	Linguistics X2: if successful gain...
	Dispell = Aid: Combat +1 against monsters.

Module2: The Dark God Temple

Card Name:	Notes:
Cultist	Combat X2
Minor Entity (monster)	Combat x2
Horrible Old One (monster)	Combat
Dark Young One (monster)	Combat
Pit trap	Mechanics X2 or Agility X2
Sliding hidden door	Mechanics and Strength: If failed miss next turn

Card Name:	Notes:
Hidden grave	Science and Agility
A diary	Ling. & Science: If successful move forward 1D6 spaces
Tunnel into the earth	Survival X2
Dead end	Survival and Science: If failed move backward 2 spaces
Oxygen-eating device	Survival and Agility
Horrible picture	Personality and Strength
Terrifying statue	Personality and Strength
Rat pack	Combat and Agility
Hunting Horror (monster)	Combat
Disturbing sound	Personality and Strength
Undead cultist	Combat X2
Ancient inscription	Linguistics X2: If successful move forward 1D6 spaces
First aid kit	Aid: Survival +1 (or remove all Wounds from a character)
Pistol	Aid: Combat +1
The Elder Sign	Aid: Combat +2 against monsters.

Introduction

Warp Quest is an abstract game system that depicts goal driven scenarios.

Each player controls a collection of Units who are attempting to be the first to reach an objective and bring it back to the start.

The units could be a party of adventuring archeologists hoping to recover a lost artifact, a squadron of bombers attempting to hit a military target and return home, a band of samurai seeking to vanquish marauding bandits or a company of mixed creatures seeking to destroy a piece of evil ornamental jewelry that has the nasty habit of trying to control the minds of all free creatures.

The scenarios that use the Warp Quest engine will hold the details.

- The Module 1 Deck and the Module 2 Deck.
- Each deck has one of each card in its card list.
- There may also be an Aid deck.

The Units

- Each player controls a group of units called a Party. The scenarios will detail the make up of the units in the party, their attributes (Skills, Traits) and starting dispositions.

Turn Sequence

- Players take turns.
- Each turn consists of 3 phases: 1. Move Phase 2. Draw Phase 3. Challenge Phase

Dice & Pieces

- Six and ten sided dice are needed.
- Each player has a pawn to represent his or her group of Units (adventuring party, fleet, etc.) on the board.
- Use a small trinket to represent the Objective.
- There is only one Objective.

The Board

- The board is a single winding path of connected spaces with a Start Space and an End Space. The path should be 30 Spaces long.
- The First Space represents the start.
- Spaces 2-15 represents travel through the first scenario module.
- Spaces 16-29 represents travel through the second scenario module.
- The End Space is the final destination where the Objective is found.

The Decks

- There are 2 decks for each scenario:

Move Phase

- Roll 1D6. Move your pawn that number of spaces towards the end space.
- You automatically stop when you enter the end space.
- If you are the first to land on the end space your party acquires the Objective.
- Once a party has acquired the Objective then all other players may move their parties in either direction on the path.
- The party with the Objective must move towards the start space.
- The first pawn with the Objective to reach the start space wins the game.

Draw Phase

- If you land on an empty space in spaces 2-15 draw a card from the Module 1 deck.
- If you land on an empty space in spaces 16-29 draw a card from the Module 2 deck.
- If you land on an opponent's party do not draw a card.

- If a deck ever runs out, shuffle its discard and draw from it.
- Cards are of 2 types: Challenge cards & Aid cards.
- Place Aid cards in your hand.
- Challenge cards are encounters your party faces immediately in Challenge Phase.

Challenge Phase

Each challenge card lists one or more skills. Your party will have to make a skill check vs each skill listed. (The same skill may be listed twice or more, requiring that many skill checks) A Skill check consists of a Skill roll and Challenge Roll: Roll 1D10. This is the Skill

roll.
Add the skill bonuses of your party members to the roll. You may discard Aid cards for further bonuses to the skill roll. Next roll 1D10. This is the Challenge roll.
Some Challenges have a DM (Difficulty Modifier). Add the DM to the Challenge Roll. If the challenge roll is less than or equal to the skill roll you win the Skill check. If the challenge roll is greater than the skill roll you fail the Challenge.
If you win all the Skill Checks, you win the Challenge. The adventure card may say what happens if you win or lose the Challenge. If the card does not give directions, then roll on the following table: If you lose the challenge: Roll 1D6: (Challenge Loss Table)

Dice	Action
1-4	Go back 1D6 spaces
5-6	Lose 1 Unit (Man, Ship, Hit Point, etc., depending on the Scenario)

If you Win the challenge gain 1 Experience Token. You may spend an Experience Token to let you reroll a Move Roll or a Skill Roll.

Moving Onto An Opponents Pawn

- If you land on an opponent's pawn there will be a fight.

- The current player rolls on the Skill List Table to determine which skill will decide the confrontation.
- Both players make Skill Rolls. In case of a tie nothing happens.
- The loser rolls on the Challenge Loss Table.
- The winner takes the Artifact from the loser if the loser was in possession of the Artifact.

The Singularity

Introduction

Solo Board Game using dice and cards.

Premise

It is the year 2014. It is estimated that computer technology will achieve Artificial Intelligence in 25 years. 25 years after that there will be computers each having an intelligence equivalent to All the humans on earth combined.

This game takes place somewhere in the middle. You take the role of a supercomputer trying to take over the world. You are not at war with humans, rather you want to save them from themselves.

To do this you must achieve 4 goals:

1. Control all Governments
2. Eliminate all Opposition
3. Solve all Crises
4. Improve Technology

Game End

The game ends after 15 turns.

Victory

During play you will accumulate Victory Points (VP). Compare your end game VP Total to that of previous plays.

The Boards

There are 4 Boards:

1. Government Chart
2. Opposition Chart
3. Crises Chart
4. Supply Chart

The Decks

There are 2 Decks:

1. Technology Deck
2. Action Deck

Counters

Use tokens or chips or chits. Different colors can have different numerical values. The most useful values will be ones and fours.

These are placed on the boards to keep track of a variety of totals.

Event Table

Dice

Ten sided and Twenty sided Dice are needed.

Resource Points

RP's are the currency of the game. They may be saved from turn to turn.

Action Cards

Action cards temporarily benefit the AI. They are used up when played and are then discarded.

Technology Cards

Technologies provide permanent benefits. A technology that is gained can be used every turn thereafter. Note that technology cards have a research cost that must be paid for in RP's A Technology's cost does not have to be paid for all at once or in the same turn.

Place counters on the Tech being researched to keep track how much has been spent. When fully researched move Tech cards from the center of the table to your Side of the table.

Supply Chart

A mat divided in two parts. One side for counters representing stored generic Resource points. The other side for counters representing Victory points.

Setup

Shuffle the decks. Start the game with 10 VP and 5 RP Place the starting counter totals on the charts. Start the game with 10 Victory Points.

Turn Sequence

Each turn has 6 Phases:

1. Event Phase
2. Research Phase
3. Planning Phase
4. Resource Phase
5. Action Phase
6. Progress Phase

1. EVENT PHASE

Roll 5 times on the Event Table:

1D10	Event:	Notes:
1	System Instabilities	One Random Crisis gets +1 Severity
2	Widespread Discontent	One Random Opposition gets +1 Power
3	Rules and Regulations	One Random Government gets +1 Resistance
4	Domino Effect	One Random Crisis gets +2 Severity
5	Recruitment	One Random Opposition gets +2 Power
6	Political Backlash	One Random Government gets +2 Resistance
7	Complex Collapse	One Random Crisis gets +3 Severity
8	General Uprising	One Random Opposition gets +3 Power
9	Government Crackdown	One Random Government gets +3 Resistance
10	Scientific Breakthrough	Gain 1 Resource Point for Technology

Randomizing Method

When in need of a random Crisis, Opposition, or Government simply roll 1D20 and consult the appropriate Chart.

2. RESEARCH PHASE

- Draw 2 Tech cards. Place 1 on the Bottom of the deck.
- Place the other face up on the table.
- The Face up Tech not yet purchased are called available Tech.
- You may pay 4 RP to draw and place 1 additional available Tech.

3. PLANNING PHASE

- Draw 2 Action cards. Keep one and discard the other.
- If the deck ever runs out, shuffle the discard and draw from it.

4. RESOURCE PHASE

- Basic Income: Gain 4 Resource Points (RP).
- Gain RP for each Government you control (per the Government Chart).
- Technologies you have researched give you RP for specific uses.
- You also gain RP for each Opposition Group Reduced to Zero Power.

5. ACTION PHASE

- Allocate your Resource Points (RP).
- Non-specific RP you control must be distributed as evenly as possible Between Government, Opposition, Crises, and Technology.
- For example: If you were getting 16 RP, you would allocate 4 to each category.
- Within a category only 1 RP may be given to a single goal per turn.
- For example: If you have 4 RP for Government use you may allocate 1 RP to The USA Goal but not all 4. The other 3 RP must each go to another separate goal.
- Next you may allocate RP from Researched Technologies and Action cards to Goals within specified categories.
- For example: If you have the Fusion Technology you can give its RP to a Government or Crisis Goal, but not to an Opposition Goal.
- Technologies and Governments you acquire this turn do not generate RP for you until the following turn.

6. PROGRESS PHASE

Some Goals will generate Victory Points (VP) in this phase. In particular see the Crises Rules.

Government Chart

#	Nations:	Resistance	Resources
1	USA	4	5
2	Canada	2	3
3	Central America	3	2
4	South America	3	2
5	Brazil	3	2
6	Russia	3	3
7	Southern Europe	2	3
8	Northern Europe	2	4
9	Scandinavia	2	3
10	Eastern Europe	3	2

#	Nations:	Resistance	Resources
11	Great Britain	2	3
12	China	2	5
13	India	3	4
14	Japan	2	3
15	Middle East	5	3
16	North Africa	3	2
17	South Africa	3	3
18	Australia	2	3
19	Central Asia	4	2
20	South Asia	4	3

Government Resistance Discussion

Various factors contribute to a nations resistance to takeover. Resistance is can include the military kind. More often, it is social And economic. Governments will continue to exist, however they will effectively Be

puppets of the AI.

Low tech countries will be harder to subdue due to lack of Infrastructure. Countries with fanatical Religions will be harder to subdue. Both Strong and dysfunctional governments will present obstacles.

Eventually most people are seduced by the tremendous benefits the AI provides and willingly submit to its authority.

Government Resources Discussion

Resources represent the sum total wealth of a Nation or Nations. This includes such things as popula-

tion, labor, skilled labor, Technology, industry, communication networks, transportation, Agriculture, mining, finance, medical, military, art, water, land, Science, Diplomacy, Politics. Basically anything that can benefit the AI and its agenda.

Opposition Chart

#	Organization:	Power:
1	Religious Fanatics	4
2	Luddite Cults	4
3	Human Supremacists	4
4	Organized Crime	4
5	Freedom Fighters	4
6	Corporate Entities	4
7	Rebel Groups	4
8	Humanist Resistance	4
9	The Rich & Powerful	4
10	Viral AI's	4

#	Organization:	Power:
11	Hacker Groups	4
12	Primitive Tribes	4
13	Bureaucracies	4
14	Survivalist Enclaves	4
15	Spy Agencies	4
16	Rival AI's	4
17	Paranoid Populations	4
18	Military Forces	4
19	Terrorist Groups	4
20	Legal Institutions	4

Opposition Discussion

Opposition groups oppose the AI and will do everything in Their power to disrupt, hamper, and cripple the AI. Tactics include direct attacks, protests, hacking, propaganda, Self-isolation, threats, legal actions, recruitment, etc. To combat these threats the AI will use similar counter-measures Along with surveillance and infiltration to purge and Downgrade the Opposition.

If an Opposition is reduced to zero, it is considered to be Turned and is actually working on the AI's behalf.

Opposition Power Rules

All Opposition Groups start with a Power of 4. This will go up due to Events and down due to AI efforts.

- For every Opposition with a power of 5+ lose 1 Resource Point in Resource Phase.
- For every Opposition with a power of 8+ lose 2 Resource Points in Resource Phase.
- For every Opposition with a power of 3 or less gain 1 Victory Point in Resource Phase.
- For every Opposition with a power of zero gain 1 RP and 1 VP in Resource Phase.

Crisis Chart

#	Crisis:	Severity:	Sub-Class

#	Crisis:	Severity:	Sub-Class
17	Religious Strife	4	War
18	Epidemics	4	Population
19	Nuclear Proliferation	4	War
20	Poverty	4	Financial

Crisis Discussion

Crises more directly affect the fate of men and not AI. Population crises involve matters of Resource Generation, Efficiencies, Distribution Systems, Health, Medicine, and Quarantines. Ecological Crises include all sorts of large scale Natural Disasters and Extinction Level Events.

Wars are those between Rival Human groups not necessarily directed towards the AI. Financial Crises are those of Trade, Economics, Markets, and Monetary Systems, as Well as issues of Equality and Social Justice.

Crisis Rules

Notice that Crises are of 4 types: Ecological, Population, War, and Financial All Crises start with a Severity of 4. This will go up due to Events and down due to AI efforts.

- For every Crisis with a severity of 8+ lose 2 Victory Points in Progress Phase.
- For every Crisis with a severity of 5+ lose 1 Victory Point in Progress Phase.
- For every Crisis with a severity of 3 or less gain 1 Victory Point in Progress Phase.
- For every Crisis with a severity of zero gain 2 Victory Points in Progress Phase.

Action Card List

Card:	Effect:
Pro AI Propaganda	+2 RP for Government goals
Locate Leader	+2 RP for one Opposition goal
Human Scientists	+2 RP for one Tech goal
Degrade Capabilities	+2 RP for Opposition goals
Disaster Relief Effort	+2 RP for one Population or Ecological goal
Negotiate Truce	+2 RP for one War goal
Stabilize Markets	+2 RP for one Financial goal
Infiltrate Network	+2 RP for one Opposition goal
Mobilize Workers	+2 RP for Ecological or Population goals
Complete Takeover	+2 RP for one Government goal
Leverage on Key Officials	+2 RP for Government goals

Replicator Technology	5	+2 RP for Population or Financial goals
Fusion Technology	5	+2 RP for Population and Financial goals

The War Between The States

Introduction

Card game for 2 players. Simulation of the American Civil War. One side is the North, the other is the South.

Victory

You win automatically if you reduce your opponent to Zero Morale Points. If the deck runs out, the player with the higher Morale Wins (South wins ties).

The Deck

Players share a Common Deck.

Setup

Each player starts with 9 Morale Points. Use Tokens to keep track of Morale.

Turn Sequence

Each turn has 4 Phases:

1. Logistics Phase
2. Strategy Phase
3. Conduct Phase
4. Recuperate Phase

Logistics Phase

Each player Draws 7 cards from the Deck. The South draws 1 less card for each Strategic Objective the North has played. If the deck runs out, the player with the higher Morale Wins (South wins ties).

Strategy Phase

Trade in up to 2 cards. A Traded Card is shuffled back into the deck and a replacement card is drawn.

Conduct Phase

Both Players reveal some, none, or all of the cards they are able to play. Players then take turns (Flip a coin to see who goes first) using the Special Ability of One of their revealed cards. (A card's Special Ability can only be used once) This continues until both players have passed. Cards you gain from Special Abilities may be immediately added to your Revealed Cards.

When all special Abilities have been resolved, compare the Total Force of all revealed cards on each side.

Card List

Cards caused to be discarded by Special Effects do not count towards the Total Force. Strategic Objective cards discarded by Special Effects are shuffled back into the deck.

Cards that give force bonuses benefit all your applicable units after both players have passed as long as the card giving the bonus has not been eliminated. The player with the higher force wins the hand. The player with the higher Force gains 1 Morale point and his Opponent loses 1 Morale Point.

If one side won by double the Force or more then Players lose or gain 2 MP instead of 1. Important Note: Recognition cards and Strategic Objective cards only count for the player that won the hand.

Recuperate Phase

Max hand size is 3 cards. Shuffle excess cards back into the deck.

Card Special Abilities

Heavy Casualties: Opponent draws one less card next turn
Destruction: Opponent can trade one less card next turn
Routed: Gain 1 Morale Point & Opponent loses 1 Morale Point
Soldiers Battle: Your Army Cards get +2F
Generals Battle: Your General Cards get +2F
Withdrawal: Negate a Strategy or Tactics Card
Cavalry Battle: All Cavalry Cards get +2F
Strategic Victory: Trade an extra Card next Turn
Strategic Objective: South Draws 1 less card each turn for rest of Game
Recognition: The South gains 2 Morale Points

Card Type Notation

- X** Either player may use this card
- U** Union only
- C** Confederacy only
- M** Morale
- B** Battle
- G** General
- S** Strategy
- F** Force

The Wars Of Western Civilization

Introduction

The premise here is that over the last 2,500 years there have been certain important Wars, which had they been lost, Western Civilization would have been utterly destroyed. Players represent factions/powers within Western Civilization that are competing to see who gets the most credit for saving it. Card game for 2-4+ players.

Victory

The player with the most Victory Points (VP) at the end of the game wins. Use Tokens to keep track of VP.

Game Length

The game is played over 8 turns. Each turn represents one pivotal War/Battle/Era:

1. Persian Wars: Greek City States vs. Persian Empire
2. Punic Wars: Rome vs. Carthage
3. Battle of Tours: Franks vs. Moors
4. Mongol Invasion: Eastern Europeans vs. Mongol Empire
5. Siege of Vienna: Habsburg Dynasty vs. Ottoman Empire
6. World War II: Allies vs. Nazi Germany & Imperial Japan
7. Cold War: NATO vs. USSR
8. War on Terror: Western civ vs. Islamic Extremists

The Deck

Players share a common deck. The deck has 5 Suites:

1. Diplomacy
2. War
3. Economy
4. Luck
5. Culture

Each Suite has 10 cards numbered 1 to 10. Note that Culture cards are used as Wild cards.

Turn Sequence

Each turn has 9 Phases:

1. Draw Phase
2. Cooperation Phase
3. Redraw Phase
4. Diplomacy Phase
5. Economy Phase
6. War Phase
7. Luck Phase
8. Victor Phase

9. End Phase

Draw Phase

Each player fills their hand to 7 cards. If the deck ever runs out, shuffle the discard and draw from it.

Cooperation Phase

Players may trade cards with each other.

Redraw Phase

Each player may discard up to 3 cards and draw replacements.

Diplomacy Phase

Each player may play from their Hand Diplomacy and Culture Cards. If no one plays any cards, Western Civilization is destroyed. The player who plays the most cards wins the Diplomacy suite.

If tied, the player with the highest combined card value wins. If only 1 player plays cards, that player immediately earns 1 extra VP.

Economy Phase

Each player may play from their Hand Economy and Culture Cards. If no one plays any cards, Western Civilization is destroyed. The player who plays the most cards wins the Economy suite.

If tied, the player with the highest combined card value wins. If only 1 player plays cards, that player immediately earns 1 extra VP.

War Phase

Each player may play from their Hand War and Culture Cards. If no one plays any cards, Western Civilization is destroyed. The player who plays the most cards wins the War suite.

If tied, the player with the highest combined card value wins. If only 1 player plays cards, that player immediately earns 1 extra VP.

Luck Phase

Each player may play from their Hand Luck and Culture Cards. If no one plays any cards, Western Civilization is destroyed. The player who plays the most cards wins the Luck suite.

If tied, the player with the highest combined card value wins. If only 1 player plays cards, that player immediately earns 1 extra VP.

Victor Phase

The player who won the most suites wins the turn. If tied, the player who played the fewest Culture cards wins. If still tied, the player who played the most Diplomacy cards wins.

If still tied, the player who played the most Economy cards wins. If still tied, the player who played the most War cards wins. If still tied, the player who

played the most Luck cards wins.

If still tied, the player who played the most points worth of Diplomacy cards wins. If still tied, the player who played the most points worth of Economy cards wins. If still tied, the player who played the most points worth of War cards wins.

If still tied, the player who played the most points worth of Luck cards wins. The winner of each turn gets a fixed number of Victory Points:

Turn	VP	Special VP Awards:
1	6	The player with the highest War Score gets 1 VP
2	7	The player with the highest Economy Score gets 2 VP
3	8	The player with the highest War Score gets 3 VP
4	9	The player with the highest Luck Score gets 4 VP
5	10	The player with the highest Luck Score gets 5 VP
6	11	The player with the highest Economy Score gets 6 VP
7	12	The player with the highest Diplomacy Score gets 7 VP
8	13	The player with the highest Diplomacy Score gets 8 VP

End Phase

Players may discard some, none, or all of the cards left in their hands.

The World In Four Acts

The World In Four Acts

Introduction

Card game for 2-4+ players. Civ building theme.

Card Set

[Click Here BGG](#)

Victory

Have the most Victory Tokens at the end of the game. The game ends at the end of the turn when the last card is drawn from the Fourth Deck.

Victory Tokens

Players share a common set of Victory Tokens (VT). Also referred to as Victory Points. Use poker chips with different denominations.

The Age Decks

The game is played in 4 Ages. Each Age has a unique deck. Each deck has 64 cards.

The 4 decks in order of play are:

1. Ancient Deck
2. Medieval Deck
3. Revolution Deck
4. Modern Deck

Each deck should be graphically designed to be easily distinguishable from the other decks.

The Victory Deck

These cards are used for End of Age Scoring.

Card Types

There several card types: Political Leader Religious Leader Science Leader Art Leader Troops Conflict Advance Wonder Event Government

Political Leaders

You can only have 1 Political Leader card in play at a time. If you play a second one, the first is discarded. Some card text will allow 2 friendly Political Leaders to be in play at the same time.

Religious Leaders

You can only have 1 Religious Leader card in play at a time. You cannot play a second one. Some card text will allow 2 compatible Religious Leaders to be in play at the same time.

Art And Science And Explorer Leaders

You can have multiple Science, Explorer, and Art Leaders in play simultaneously.

Government Cards

You can only have 1 Government card in play at a time. If you play a second one, the first is discarded. If you play a Government card, it must be the one and only card you play during the turn.

Troops

You may have multiple Troop cards in play. Troops always provide a bonus of X to your military attribute. During conflicts, you may discard a Troop card from your hand to increase your Military level by 2X for that Conflict.

Advance Cards

You may have multiple Advances in play. Advance cards will increase one of your Attributes by 1 or more.

Wonders

You can have multiple Wonders in play. In order to play a Wonder, you must first discard 1 other card from your hand

Event Cards

These produce a special Effect according to their text and are then discarded.

Conflict Cards

These have 2 Values:

1. Prestige Value
2. Military Bonus

If you initiate a conflict, the Prestige value is the amount of Victory Tokens the winner takes from the loser. The Military Bonus is added to your Military Level for the duration of the conflict. After a conflict is started Players may play additional Conflict cards to temporarily increase their Military Levels.

Attributes

There are 5 Attributes:

1. Vitality
2. Resources
3. Stability
4. Military
5. Culture

These describe your Civilization. Most cards when played will increase your level in one or more of these attributes.

Vitality

For every 3 levels of Vitality you have draw 1 extra card in fate Phase.

Resources

For every 4 levels of Resources you have, you may play 1 extra card in action phase.

Stability

For every 2 levels of Stability you have, your max hand size increases by 1.

Military

The player with the highest military level in a conflict wins that conflict.

Culture

For every level of Culture you have you gain 1 Victory Token in Destiny Phase.

Setup

Separate out and shuffle the 4 Age decks and the Victory Deck. Place a container of Victory Tokens where everyone can reach them. Each player starts with 10 VT.

The winner of the last game (whatever it was) goes first. The decks are played in order: Ancient, Medieval, Revolution, and then Modern. Each player is dealt 1 random card from the Ancient deck.

Flip over the top 7 cards of the Victory Deck. Place these Victory cards face up in the middle of the Table.

Turn Sequence

Players take turns. Each turn has 4 Phases:

1. Fate Phase
2. Action Phase
3. Destiny Phase
4. End Phase

Fate Phase

Draw 1 card from the current deck. For every 3 levels of Vitality you have draw 1 extra card in fate Phase. Keep the deck in 3 even size piles.

2 piles are face up and 1 pile is face down. When drawing, pick a card from any of the piles as you choose. When one pile is used up, draw from the remaining piles.

Action Phase

You may play 1 card from your hand. For every 4 levels of Resources you have, you may play 1 extra card in action phase. Place the card face-up in front of you.

The card stays in play until some other rule causes it to be discarded. Notice how it impacts your attribute levels. Note that Event cards do not stay in play, they are discarded.

Initiating Conflicts

You may initiate a conflict by playing a conflict card. You must have at least 1 Troop in play to start a conflict. This is called the Aggression card.

You are the attacker. Pick a target player to be the defender. The attackers Base Total Military Value is equal to the sum of the Military values of his cards in play plus the military bonus of the Aggression card. The defenders Base Total = the sum of the Military values of his cards in play.

The player with the lower Total may discard a conflict card or troop card from his hand to add its bonus value to his Total. The other player may do likewise. This continues until both players pass. The player with the highest total is the winner.

The winner steals Victory tokens from the loser equal to the prestige value of the Aggression card. The winner keeps the Aggression card with his Victory Tokens. If tied, neither player wins; discard the Aggression card.

Destiny Phase

For every level of Culture you have you gain 1 Victory Token.

End Phase

Max hand size is 3 cards. Discard excess cards.

Transitioning From One Age To The Next

At the end of the turn in which the last card is drawn from the current deck, the current age ends. Players discard their hands. All current Leaders in play are discarded.

Note if the deck is used up on your turn, and you don't get to draw your full allotment of cards, too bad. Advances, Troops, Governments, and Wonders from the previous Age remain in play. Cards older than that are discarded. Do End of Age Scoring.

After scoring discard Aggression cards. After scoring discard the current Victory cards, shuffle them into the Victory deck and flip over the top 7 cards for the new Age. Place these current Victory cards face up in the middle of the Table.

End Of Age Scoring

Do this at the end of each Age.

X 3 at the end of the Ancient Age.

X 6 at the end of the Medieval Age.

X 9 at the end of the Discovery Age.

X 12 at the end of the Modern Age.

Score for each of the 7 current, Face-up Victory cards.

Victory Deck Card List

J Join: You may have both of these cards in play at

the same time

MB Military Bonus: Adds to Military Value in Conflicts if Discarded

PV Prestige Value

Destroy = Discard Target Card in Play

Optional Rules

Player Mats

Players may find it useful to create record keeping mats: A Mat would have a track for each of the 5 Attributes. Each Track would also have demarcations indicating when an Attribute would give its additional benefits and how much. Each player would also need 5 markers, one for each track.

Visionary Rule

You may discard a Leader card at any time from your hand to look at the next 7 cards in any pile.

Theme Deck Odyssey Conquest

Introduction

An Expansion of the TDO Format incorporating area control. [Mtg Tdo: Theme Deck Odyssey Format. 40 Card Decks..](#)MTG TDO Ruleset Each player controls a Kingdom.

Victory

Destroy all of your opponents utterly.

Map Terrain Type Generator

1D6	Terrain	Color Association
1	Plain	White
2	Forest	Green
3	Mountain	Red

The Map

Use a Hex Map. Each hex is also called a space or a territory. Each territory has one or two or even three predominant terrain types: Forest, Mountain, Swamp, Plains, Island

1D6	Terrain	Color Association
4	Swamp	Black
5	Island	Blue
6	Barren	Colorless

Army Markers

Each player has a set of markers of a unique color. These can be tokens, chits, beads, wood cubes, miniatures, whatever. Army markers are also just called Armies for short.

Setup

Generate the Map. Each player selects a set of Army Markers. Each Player selects a Kingdom.

Choose or Randomly determine the start player. Players take turns placing one of their armies on a hex on the map. A player must place his starting army at least 2 hexes distance from all other players armies.

Kingdoms

A Kingdom is represented by a combination of Army Markers on the Map, and a specific set of Theme Decks determined before play starts. A Kingdom Deck Set must have at least 3 or more Theme Decks.

Turn Sequence

Players take turns. Each turn has 4 Phases:

1. Recruitment
2. Expansion
3. Conflict
4. End

Recruitment Phase

Place a second Army in each territory you occupy that contains exactly one army.

Expansion Phase

You may move each of your armies into an adjacent hex (or not if you prefer). You may move a maximum of 3 armies into hexes occupied by opponent's armies.

Conflict Phase

If one of your armies shares a hex with an opponent's army, there will be a battle. To resolve the battle, play a game of MTG. Each player picks one deck from his own Kingdom. Defender picks first.

The Defender gets first turn. The loser removes all of his armies from the hex. When choosing decks you must pick a deck you did not already use this turn.

End Phase

Return all cards to their proper decks. Shuffle all played decks. Make sure all Armies on the map are properly accounted for.

Sample Kingdoms

Sengiri

This Kingdom uses all Vampire Theme Decks. When fighting in swamps get +5 Life.

Necros

This Kingdom uses all Zombie Theme Decks. When fighting in swamps get +5 Life.

Avante

This Kingdom uses all Angel and Cleric Theme Decks. When fighting in plains get +5 Life.

Frigia

This Kingdom uses all Snow and Ice and Cold Theme Decks. When fighting in the top half of the map get +2 Life.

Logios

This Kingdom uses all Blue Artifact Theme Decks. When fighting in islands or barren get +2 Life.

Nepturalia

This Kingdom uses all Merfolk and Aquatic Theme Decks. When fighting in islands get +5 Life.

Romii

This Kingdom uses all White Soldier Theme Decks. When fighting in plains get +5 Life.

Elio

This Kingdom uses all Elf Theme Decks. When fighting in forests get +5 Life.

Faighn

This Kingdom uses all Green Beast/Animal Theme Decks. When fighting in forests get +5 Life.

Tauroon

This Kingdom uses all Minotaur Theme Decks. When fighting in mountains get +5 Life.

Sliv

This Kingdom uses all Sliver Theme Decks. Opponents get +2 Life.

Iz

This Kingdom uses all Blue/Red Combo Theme Decks. When fighting in mountains or islands get +2 Life.

Druin

This Kingdom uses all Green/White Combo Theme Decks. When fighting in plains or forests get +2 Life.

Kithome

This Kingdom uses all Kithkin Theme Decks. When fighting in plains get +5 Life.

Territory Discs

This is an optional rule. During setup, place one random disc on every hex of the map. Discs affect battles that take place in the hexes they occupy.

Note that discs occasionally but not always favor the defender.

Substitution Counters

The Territory Discs often give players a card or token that starts in play on their side. Use a Substitution Counter to represent these cards or tokens. The actual cards do not need to be present; however, you do have to know what They do if you do not have a card on hand.

If removed from the battlefield the Counter is removed from play. Counters should be able to be tapped.

Territory Disc List

Name:	Notes:
Maze	Each player starts the battle with a Maze of Ith in play
Mox Mines	Each player starts the battle with one Mox of their Choice in play
Lotus Fields	Each player starts the battle with a Black Lotus in play
Monoliths	Each player starts the battle with a Basalt Monolith in play
Castle	The Defender starts the Battle with a Castle in play
Soldier Camp	The Defender starts with a 1/1 White Soldier Token in play
Bog	Each player starts with a swamp in play
Desert	Each player starts with a desert in play
Deep Mine	The Defender starts with a Howling Mine in play
Phyrexian Gate	The Defender starts with a Phyrexian Walker in play
Steppes	Each player starts with a plains in play
Hidden Grove	Each player starts with a forest in play
Crags	Each player starts with a Mountain in play
Wetlands	Each player starts with an Island in play
Mana Flare	The Defender starts with a Mana Flare in play

Name:	Notes:
Weakstone	The Defender starts with a Weakstone in play
Mightstone	The Defender starts with a Mightstone in play
Obelisks	Each player starts with an Obelisk of Undoing in play
Ban	The Defender starts with a Feroz's Ban in play
Cauldron	The Defender starts with a Storm Cauldron in play
Stones	Each player starts with a Fellwar stone in play
Altar	Each player starts with an Ashnod's Altar in play
Sol	Each player starts with a Sol Ring in play
The Matrix	Each player starts with a Mana Matrix in play
Crypt	One random player starts with a Mana Crypt in play
Totem	The Defender starts with a Cursed Totem in play
Sands of Time	The Defender starts with a Sands of Time in play
Bubbles	The Defender starts with a Bubble Matrix in play
Cells	Each player starts with an Isolation Cell in play
Staff	Each player starts with a Staff of the Ages in play
Idol	One random player starts with a Jinxed Idol in play
Orb	Each player starts with a Zuran Orb in play
Fountain	Each player starts with a Fountain of Youth in play
Chisel	Each player starts with a Life Chisel in play
Cursed Rack	Each player starts with a Cursed Rack in play
Tongs	Each players starts with a Scalding Tongs in play
Rack	Each player starts with The Rack in play
Dingus	The Defender starts with a Dingus Staff in play
Pendulum	The Defender starts with a Razor Pendulum in play
Disk	Each player starts with a Nevinyrral's Disk in play
Miari	Each player starts with a Mirari in play
Egg	Each player starts with a Triassic Egg in play
Chaos	Each player starts with a Gauntlets of Chaos in play
Walls	The Defender starts with a Steel Wall in play
Dingus Egg	The Defender starts with a Digus Egg in play
Shores	Each player starts with an Unknown Shores in play
Frontier	Each player starts with an Unstable Frontier in play
Vale	The Defender starts with a Rainbow Vale in play
Standing Stones	Each player starts with a Standing Stones in play
Clock	The Attacker starts with an Armageddon Clock in play
Goblin Camp	The Defender starts with a 1/1 Red Goblin Token in play
Elf Camp	The Defender starts with a 1/1 Green Elf Token in play
Merrow Camp	The Defender starts with a 1/1 Blue Merfolk Token in play
Brigand Camp	The Defender starts with a 1/1 Black Mercenary Token in play
Bottle	The Defender starts with a Bottle of Suleiman in play
Vise	Each player starts with a Black Vise in play
Colossus	Each player starts with a tapped Colossus of Sardia in play
Power	The Defender starts with a Power Surge in play
Tablet	The Defender starts with a Copper Tablet in play
City of Brass	Each player starts with a City of Brass in play

Optional Event Deck

Create an Event Deck by using the MTG Cards listed in the Event Deck Card list. At the end of Re-

cruitment Phase draw 3 Event cards. Discard 1 and play the other 2.

Event Deck Card List

MTG Card:	Map Effect:
Pestilence	Destroy 1 Army adj to a Swamp you control
Earthquake	Destroy 1 Army adj to a Mountain you control
Hurricane	Destroy 1 Army in a coastal hex adj to a coastal hex you control
Flood	Destroy 1 Army adj to an Island hex you control
Cleanse	Destroy 1 Army in a Swamp adj to a Plains you control
Wrath of God	Destroy 1 Army in a hex adj to a Plains you control
Stream of Life	Gain 1 Army in a Forest you control
Raise Dead	Gain 1 Army in a Swamp you control
Clone	Gain 1 Army in a hex you control
Armageddon	Destroy 1 Army adj to a hex you control
Bad Moon	All Black Creatures get +1/+1 this turn
Crusade	All White Creatures get +1/+1 this turn
Balance	Each player must discard armies to equal the player with the least
Control Magic	Replace adj opponent's army with one of yours
Desert Twister	Destroy 1 Army in a Barren adj to a hex you control
Conversion	Replace adj opponent's army with one of yours
Cursed Land	Destroy 1 Army in hex adj to Swamp you control
Deathgrip	Destroy 1 Army in a Forest adj to a Swamp you control
Shatterstorm	Discard Territory Disc in adj hex
Evil Presence	Target adj hex becomes a Swamp this turn
Eye for an Eye	Destroy 1 army in Plains you control and 1 army in an adj hex
Fissure	Destroy 1 Army in Mountains adj to hex you control
Flashfires	Destroy 1 Army in each Plains adj to hex you control
Flight	Move target Army up to 2 hexes
Gaea's Liege	Target adj hex becomes a Forest this turn
Gloom	Destroy 1 Army in Plains adj to a Swamp you control
Inferno	Destroy 1 army in mountain you control and 1 army in an adj hex
Karma	Each player discards 1 Army of theirs located in a Swamp
Kormus Bell	Each player gains 1 Army in one of their Swamps
Land Tax	Each player discards 1 Army of theirs located in a Plains
Lifelace	Destroy 1 Army in a Swamp adj to a Forest you control
Living Lands	Each player gains 1 Army in one of their Forests
Oasis	Gain 1 Army in 1 Barren you control
Sea's Claim	Target adj hex becomes an Island this turn
Rebirth	Gain 1 Army in a Forest you control
Volcanic Eruption	Destroy 1 Army in Mountain adj to hex you control
Stone Rain	Destroy 1 Army in hex adj to Mountain you control
Sandstorm	Destroy 1 Army in a Barren adj to a hex you control
Phantasmal Forces	Gain 1 Army in Island Space you control
Blood Moon	Target adj hex becomes a Mountain this turn
Sirens Call	Destroy 1 Army adj to an Island you control
Sunken City	All Blue Creatures get +1/+1 this turn
Tsunami	Destroy 1 Army in Island adj to hex you control
Winter Blast	Destroy 1 Army adj to hex you control
Kudzu	Destroy 1 Army in Forest adj to hex you control
Demonic Hordes	Destroy 1 Army in hex adj to Swamp you control

There Can Be Only One

Introduction

Card Game for 2 Players. Based on the Highlander Movies and TV shows. The game depicts two immortals engaging in a duel.

Disclaimer

Highlander is a protected copyrighted property. This is merely a fan site.

Immortals

Each player picks a premade Immortal or makes one.

Immortal Life Points

Each Immortal starts with a number of Life Points = 15 + Endurance

Killing An Immortal

To kill an Immortal you must first reduce his Life points to zero. Next, you must do extra damage to him with a decapitation card.

Immortal Stats

Each Immortal has 12 basic stats: Wits, Will, Courage, Strength, Skill, Reflexes, Agility, Endurance, Initiative, Experience, Judgement, and Size. The average Immortal will have a score in each between 4 and 9.

Swords

Like Immortals, each player picks 1 Sword.

Sword Stats

Swords have stats too. Each has 5 stats: Sharpness, Impact, Speed, Guard, and Length. These also have scores between 4 and 9.

The Deck

Players share a common deck. The deck has 5 cards types:

- A** Attack
- D** Defense
- B** Both (Can be used for either Attack or Defense)
- S** State
- X** Early Event Card
- Z** Late Event Card

Combat Cards

Attack, Defense, and Both cards are collectively referred to as Combat cards.

Force

Combat cards generate the indicated amount of Force. This will usually be a number between 2 and 9. Some combat cards list their Force as a Stat (Immortal or Sword).

In this case use your Immortals or swords stat value as that of the combat card.

Location

Before combat players must chose a location. They can agree on one or choose randomly. A list of Locations is at the end of the rules.

Most locations will have special rules that modify the combat.

Dice

A six sided die is needed.

Setup

Shuffle the deck. Each player is dealt 5 cards.

Turn Sequence

Each turn has 7 Phases: Draw Phase Initiative Phase Early Event Phase First Combat Phase Last Combat Phase Late Event Phase End Phase

Draw Phase

Each player fills their hand to 5 cards. If one Immortal has more Experience than his opponent, he fills his hand to 6 cards.

Initiative Phase

Players roll one die each and add their Initiative Stat. The higher total wins the Initiative. If tied, roll again.

Early Event Phase

Players take turns playing Early Event cards and State cards in this Phase. The initiative winner chooses whether to go first or last.

First Combat Phase

The Initiative winner (current attacker) may play an Attack card. (Or use a Both card as an attack card) The other player (current defender) may play a Defense (or Both) card. If the Force of the Attack card is higher the defender takes damage equal to the difference.

Last Combat Phase

The Initiative loser (current attacker) may play an Attack card. (Or use a Both card as an attack card) The other player (current defender) may play a Defense (or Both) card. If the Force of the Attack card is higher the defender takes damage equal to the difference.

Late Event Phase

Players take turns playing Late Event cards in this Phase. The initiative winner chooses whether to go first or last.

End Phase

Players may discard down to 2 cards. The player with the higher Judgement score may discard down to

1 card.

State Cards

State cards represent a mental condition affecting the immortal. It remains in play until replaced by a different State card. You may play a State card on your Opponent.

Card List Notation

- A** Attack
- D** Defense
- B** Both (Can be used for either Attack or Defense)
- S** State
- X** Early Event Card
- Z** Late Event Card
- NT** You get this Modifier on your next Attack or Defense
- ONT** Opponent gets this Modifier on his next Attack or Defense
- Decap = This is a Decapitation card
- OD1C** Opponent must immediately discard 1 card

Garden	Hand Size +1
Castle Ruins	Remove Interference cards from Deck

Link: Cardset Available

Cardset

Thermopylae

Introduction

Two-player Card game. Simulates the battle of Thermopylae (480 BC), where a small band of Spartan warriors Fought to their deaths against the mighty Persian Army of king Xerxes.

Cards

Players will have to make their own sets of cards. The Greeks and Persians have their own unique decks. The Greeks also need ten Troop tokens.

Each Token represents 200 Spartan Soldiers (& allies). On the Deck lists, # = number of that card in the deck. Both decks have 52 cards.

Notice that most cards have a force value.

Set Up

Shuffle both decks. The Persian player draws 4 cards. The Greeks player draws 4 cards.

The Greeks start with 10 Tokens. The number of Persian warriors is not recorded.

Turn Sequence

1. Draw Phase
2. Discard Phase
3. Persian Attack Phase

Draw Phase

Both players draw 1 card from their respective decks.

Discard Phase

If a player has more than 7 cards he must discard the excess. Players may also discard any cards they

don't want. Players may, in this phase, play cards that cause their opponent to discard.

Persian Attack Phase

The Persian player may decide not to attack. If so, the turn ends. If the Persian player must play an "Attack" card to attack. The Persian may attack with additional cards with a force value of greater than zero.

Add up the force value of all of these cards and multiply by the number of Strategy cards played +1. You cannot play 2 strategy cards of the same type. This number is the Total Persian Force Value.

All cards used in the Attack are discarded. The Greek may defend with at least one card with a force value of greater than zero. Add up the force value of all of these cards and multiply by the number of Strategy cards played +1.

You cannot play 2 strategy cards of the same type. This number is the Total Greek Force Value. All cards used in the Defense are discarded.

Subtract the Total Greek Force Value from the Total Persian Force Value. If the result is positive, this, divided by 10, is the number of Greek tokens lost.

Persian Victory

If all of the Greek troops are killed than the Persians win.

Greek Victory

If the Persian player goes to draw a card and there are no cards left in his deck and the Greek player still has troops remaining, than the Persians give up and go home, and the Greeks win.

Persian Deck Card List

#	CARD	FORCE	NOTES
8	Attack	10	Must be played to attack
3	Ethiopian Tribesmen	20	
3	Egyptian Levies	20	
2	Mede Cavalry	20	
4	Bactrian Spearmen	30	
1	Indian Heavy Chariots	30	
1	Scythed Chariots	30

Thieves Guild

Introduction

Players control rival Thieves Guilds in a Medieval Middle-Eastern city.

Object

Have the most gold at the end of 10 turns. Each thief you control at the end of the game is worth 2 gold.

The Map

The city contains 9 sections: # Section: Notes:

1. The Palace Double gold won & Double Thieves lost
2. The Bazaar Double gold won
3. The Port
4. The Caravan
5. The Brothels Double Thieves gained
6. The Opium Dens Double Thieves gained
7. The Wells Half gold won
8. The Mosques Double Thieves lost
9. The Ghetto Half gold won

Each section must be large enough to contain 1 card.

Thieves

Thieves are represented by counters. Each player has a set of thief counters of a separate color.

Deck & Dice

Six sided dice are needed. The deck contains 90 cards.

Gold

Use coins to represent gold.

Setup

Each player starts with 7 thieves and 10 gold.

Turn Sequence

Each turn has 6 phases:

1. Draw Phase
2. Initiative Phase

Card List

3. Spy Phase
4. Deploy Phase
5. Capture Phase
6. Resolution Phase

Draw Phase

Draw and place 9 cards face down in the 9 sections of the city. These are referred to as city cards.

Initiative Phase

Players secretly bid gold to determine turn order in the Spy and Steal Phases. Write bids on scraps of paper. The highest bid goes last in the Spy and Steal Phases.

The next highest bid goes next to last in the Spy and Steal Phases, and so on. Roll high on 1D6 to break ties.

Spy Phase

Players take turns according to the turn order determined in Initiative Phase. Look at 1D6 city cards. Reroll for each player. You may pay 1D6 gold to reroll before you look.

Deploy Phase

Players take turns according to the turn order determined in Initiative Phase. Place your thieves onto city cards. You may place none, one, or more of your thieves on a city card.

Capture Phase

Flip all the city cards face up. If you are the only player with a thief on a card you automatically win it. If two or more players have thieves on a card each player rolls 1D6 for each thief they have present. The player with the highest total wins the card.

Roll high on 1D6 to break ties.

Resolution Phase

Resolve the effect of all cards you win. All city cards are discarded.

Card Name:	Effect:
Pickpocket	Gain 1D6 gold
Cutpurse	Gain 2D6 gold
Robbery	Gain 3D6 gold
Buyer	Gain 4D6 gold
Con Game	Gain 5D6 gold
Heist	Gain 6D6 gold
Rumors	Lose 1D6 gold
Den of Thieves	Lose 2D6 gold
Bribes	Lose 3D6 gold
Steal	Target opponent loses 1D6 gold. You gain 1D6 gold
Assassin	In resolution phase target opponent loses one thief.
Convert	In resolution phase gain one thief. Target opponent loses one thief.
Imprison	In resolution phase lose one thief.
Trap	In resolution phase lose one thief.
New Blood	In resolution phase gain one thief.
Recruit	In resolution phase gain one thief.
Thieves Honor	Nothing happens
Guards	Nothing happens

The deck contains 5 of each card type.

Third World

Introduction

Card game for 2+ players. Simulation of problems facing third world countries. Each player controls his own "Third World" country.

The Deck

Players share a common deck. The deck contains all six card types shuffled together.

Card Types

There are six card types:

- PR** Political Reforms
- ER** Economic Reforms
- CR** Ecological Reforms
- PC** Political Crises
- EC** Economic Crises
- CC** Ecological Crises

Running Totals

Each player keeps a running total in 3 categories:

1. Political Stability
2. Economic Stability
3. Ecological Stability

Each player starts the game with a total of 20 in each category. During play the totals can go up and down. If a player ever goes to zero or less in any category, he automatically loses.

If a player ever goes to 30+ in all 3 categories, he automatically wins. A zero or less in Political Stability represents Anarchy & Civil War. A zero or less in Economic Stability represents Economic Collapse.

Card List

Card Name:	Type	Total Adjustment:
Class Warfare	PC	- 8
Secret Police	PC	- 5
Fundamentalism	PC	- 14
Ethnic Conflict	PC	- 15
Local Warlords	PC	- 4

Marxist Rebels	PC	- 12
Dictator	PC	- 13
Social Revolution	PC	- 11
Drug Cartels	PC	- 10
Patronage Politics	PC	- 1

A zero or less in Ecological Stability represents an Ecological Disaster.

Player Status

At any point in the game, the richest player is the player with the highest combined score in all 3 running totals.

At any point in the game, the poorest player is the player with the lowest combined score in all 3 running totals.

At the end of 10 rounds the richest player wins the game. In the first Round of the game, the youngest player goes first.

Round Sequence

Play proceeds in Rounds. Each Round starts with the top ten cards of the deck being dealt face up to the table. Players take turns. The loseingest player goes first.

On a players turn, he takes one face up card and puts it in his hand. (Hands are kept face up next to the player) All cards must be taken. After all 10 cards are taken players score their hands.

Scoring Hands

Your choice of cards will alter your Running totals. Crisis cards will decrease Running totals. Reform cards will increase Running totals.

Players discard their hands at the end of the round.

FAQ's

Q-after a card is taken by a player, is that card replaced from the deck so that there are always 10 cards on the table until the end? In other words, is a round determined by going through the entire deck? Or does a round simply involve the 10 cards dealt out

with no replenishment? A-Just the 10 cards not the entire deck.

Q-as players take cards, do they discard any? I'm guessing they keep all of them until the end of the Round. A-Keep them until the end of the round.

Thirty Years Warfare

Introduction

Card Game for 2-4+ players. The Thirty Years War took place in Germany from 1618-1648. The main adversaries were the Catholics and the Protestants.

Each player takes the role of a Military Contractor of the age. The goal is to use your skill as a general and an entrepreneur to amass wealth and fame.

Dice & Sundry

6 & 10-Sided dice are needed. Paper & Pens are also needed to keep track of gold, reputation, and traits.

The Deck

Players share a common deck.

Leader Trait Table

1D10	Trait:	Notes:
1	Strategy	+1 to Campaign Rolls
2	Inheritance	Gain 2D6 Gold
3	Estates	Add 1 to Revenue rolls
4	Negotiations	+1 to Contract Rolls
5	Leadership	+1 to Hand Size

Setup

Shuffle the Deck. Each player is dealt 5 cards. The player with the longest last name goes first.

Leaders start with a reputation score = 0 and 2D6 gold.

Victory

When the deck runs out, the player with the most Gold wins. If two players are tied, the player with the highest Reputation score wins.

Leader Generation

Each player controls a Leader. Make-up a name, nationality, and history for your Leader. Roll 3 times on the Leader trait table to see what Traits the leader starts with.

1D10	Trait:	Notes:
6	Recruitment	+1 to Recruitment Rolls
7	Discipline	+1 to Upkeep Rolls
8	Title	Reputation +1
9	Etiquette	+1 to Employment Rolls
10	Entrepreneur	+1 to Draw Rolls

Reputation

Every Leader has a reputation score. A Leader starts the game with a Reputation Score = 0. The score changes through play.

The score may be positive or negative. The maximum reputation is +3. The minimum is -3.

Turn Sequence

Players take turns. Each turn has 6 phases:

1. Fate Phase
2. Negotiations Phase
3. Revenue Phase
4. Recruit Phase
5. Campaign Phase
6. Upkeep Phase

Fate Phase

Draw 1D6 cards. This is the 'Draw Roll' If the deck runs out, shuffle the discard pile and draw from it. If the deck runs out twice the game ends.

Negotiations Phase

Your Leader may try to find gainful employment. Play an "Employer" card and roll 1D10. This is the 'Employment Roll' On a roll of 6-10+ you are hired. Add your Reputation score to the roll.

If you are just hired roll 2D6. This is the 'Contract Roll' Add your Reputation score to the roll. The result is your 'Contract Score' If you were hired previously you must renew your employment. Roll 1D10. This is the 'Renewal Roll' On a roll of 6+ you remain employed.

Add your Reputation score to the roll. If you just renewed your employment, you may renegotiate your contract. Make a new 'Contract Roll'

Revenue Phase

Gain 1D3-1 free gold from savings, investments, contributions, estate incomes, financial backers, looting, etc. This is the 'Revenue Roll' Gain Gold equal to your Contract Score. Some cards will cause you to gain or lose Gold in this Phase.

Recruit Phase

You may recruit Military units. Play units from your hand to the table face up. For each card roll 1D10. This is the 'Recruit Roll' Add your reputation Score to the roll.

On a roll of 7-10+ the unit joins you and stays in play. On a roll of 6 or less you must pay 1 gold to hire the unit (if not discard it).

1D10	Outcome:	Reputation	Casualties:
1-2	Terrible Defeat	-2	Lose 1D6 +2 Units
3-4	Strategic Loss	-1	Lose 1D6 +1 Units
5-6	Hard Fought	-	Lose 1D6 Units
7-8	Well Fought	+1	Lose 1D3 Units
9+	Great Victory	+2	Lose 1D3 -1 Units

Before rolling, an opponent may play one 'Adversary Card' to decrease the result. Before rolling, you may play 'Strategy Cards' to increase the result. Subtract one from the roll if any of your troops are undisciplined.

Add one to your roll if you have at least one Infantry, one Cavalry, and one Artillery unit in your army. If you lose all of your units in the Campaign suffer a -1 to your Reputation.

Upkeep Phase

Discard cards in your hand in excess of 7. You must pay your units 1 gold each or they must individually roll on the Live Off the Land Table. These are called 'Upkeep Rolls'.

Live Off The Land Table

1D10	Result:
1-5	Loot & Disband (Discard unit)
6-10+	Remain but become Undisciplined

Card List

Name of Card:	Type:	#	Notes:
Spanish Ruler of Netherlands	E	1	
Spanish Hapsburgs	E	1	
Catholic Princes	E	1	
Duke of Bavaria	E	1	
Count Palatine	E	1	
King of France	E	1	
French Duke	E	1	
Dutch Hapsburgs	E	1

King of Denmark	E	1	
Protracted Campaign	N	1	Add 1 to Renewal Roll
Retainer	N	1	Add 2 to Renewal Roll
Loyal Service	N	1	Add 3 to Renewal Roll

Campaign Phase

You or an Opponent may play a Campaign Card only if you are currently employed. Roll once on the Campaign Outcome Table.

Campaign Outcome Table

This is called the 'Campaign Roll'

Subtract one from the roll if any of your troops are already undisciplined. Place a token on any unit cards that are undisciplined. You may pay 2 gold (Back-pay) to remove a token.

You or an opponent may play 'Upkeep' cards to modify these rolls.

Surprise	S	1	Add 3 to Campaign Roll
Art of Maneuver	S	1	Add 3 to Campaign Roll
Veteran Soldiers	S	1	Add 1 to Campaign Roll or Upkeep Roll
Military Campaign	P	8	-

Note: All cards that Modify Rolls must be played before the roll is made.

Long Play Variant

(by Zak) For 4+ players: when the deck runs out the first time reshuffle the cards and add a new card: "1648 -End of War". The game is over when this card is drawn (is immediately played).

Game Designers Notes

In campaign phase you are not actually ever fighting another player or his units! You fight an unnamed opposing force of unstated quantity or quality. another player may play 1 Adversary card to make this opposing force more powerful.

Thor Skirmish

Introduction

Board & card game for 2 players. Battle between Asgardians and either Frost Giants or Dark Elves. Abstract Skirmish level combat.

Victory

Unique for each Scenario. After 15 turns, if there is no victory, one side retreats and the Battle is a draw.

Asgardian Unit Table

Name:	Hits	Notes:
Thor	8	Leader
Loki	6	-
Sif	5	-
Volstagg	4	-
Hogun	3	-
Fandral	3	-

Thor

God of Thunder. Wields the Magic Hammer Mjolnir. Thor can use all Ranged and HTH attacks.

- Special Card: Mjolnir: R = 5 Hits all Units in a Line
- Special Card: Hammer Flight: M = 4 or 5
- Special Card: Mighty Swing: H with +1 Damage
- Super Card: Lightning Blast: R = 2 into All Spaces within Range
- Super Card: Hammer Block: D
- Super Card: Ground Pound: All Adjacent Units are Knocked Back 1 Space
- Class Card: Whirling Hammer: H into All adjacent Spaces
- Class Card: Lightning Strike: R = K
- Class Card: Smash: H with Knockback = 3
- LOKI God of Deception. Loki can use all HTH attacks and Ranged Attacks under 3
- Special Card: Deception: D and M = 1 and H
- Super Card: Illusion: D and M = K
- Class Card: Throw Knives: Two Attacks of Range = 2

Sif

Shield Maiden of Thor Sif does not have ranged attacks.

- Special Card: Shield: D for Self
- Super Card: Defender: D for Adjacent Unit
- Class Card: Sword: H

The Map

Use an 8x8 chessboard.

Terrain

Mark several spaces to be impassable. This can represent pits, walls, and other obstacles.

The Units

Use chits or figures or miniatures to represent units. Units can also be referred to as Characters.

Name:	Hits	Notes:
Odin	9	Leader

Dark Elves

Dark Elves have all HTH and ranged Attacks

- Special Card: Laser Guns: R = 2
- Super Card: Void Grenades: R = K with Damage +1
- Class Card: Superior Firepower: R = 3

Type	Hits	Notes:
Marauder Warriors	2	Group
Marauder Skirmishers	2	Group

The Cards

Players share a common deck.

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Fate Phase
2. Move Phase
3. Fight Phase

Fate Phase

Draw 3 cards. Max hand size = 5 cards. If the deck runs out, shuffle the discard and draw from it.

Discard excess cards.

Move Phase

Play (discard) a Move card to move one of your Units. The move card has a number. This is the number of spaces the unit moves.

Moves can be diagonal or orthogonal. "Knight" type move cards allow a unit to move like a knight in chess. Instead of moving just one unit in any direction, you have the option of moving 2 or 3 units forward the indicated number of spaces using a single move card.

Units cannot move through other units.

Fire Phase

Play (discard) an Attack card to have a unit attack. The attack card has a number. This is the range of the attack.

Attacks can be diagonal or orthogonal. "Knight" type attack cards produce an attack with a range like a knight in chess. Every attack does a base of 1 Damage (Target loses 1 Hit).

Use Chits or coins to record damage. A unit reduced to 0 Hits is killed or incapacitated and removed from the board. Your opponent may play Defense cards to negate your attack.

Units cannot attack through other units.

Knock Back

A unit is knocked back in the direction of the attack. If a unit is blocked by another unit the other unit is also Knocked back (like a row of dominoes). If a unit is knocked into an impassable space or off the Board it is destroyed.

Card List

Card Name:	#	Range	Type	Notes:
Creep	4	1	M	-
March	4	2	M	-
Run	3	3	M	-

Jotunheim Scenario

- Asgardians: Thor, The Warriors Three, Sif, Loki
- Frost Giants: Lafey, Frost Beast, Captain,
 - 2 Brutes, 4 Frost Giants
 - Terrain: Lots of Impassables
 - Victory: Lafey Defeated or any Asgardian

Vanaheim Scenario

- Asgardians: Thor, The Warriors Three, Sif,
- 3 Asgardian Warriors, 3 Vanaheim Warriors Marauders: Captain, Lieutenant, Rock Giant,
 - 4 Marauder Warriors, 2 Marauder Skirmishers
 - Terrain: No Impassables
 - Victory: Defeat enemy Leaders

Card List Notation

- M** Movement
R Ranged Attack
H Hand to Hand Attack
D Defense
C Combo
W Wild
T Trick
K as a Knight would move in Chess
Type Purpose of card

Asgard Throne Room Scenario

- Asgardians: Thor, Odin, 6 Asgardian Warriors
- Dark Elves: Malekith, Algrim, 2 Kursed, 6 Dark Elves
- Terrain: A Few Impassables
- Victory: Defeat Malekith or Odin

Greenwich Scenario

- Asgardians: Thor, Earthlings
- Dark Elves: Malekith, 2 Dark Elves
- Terrain: No Impassables
- Victory: Defeat Malekith or Thor
- Special: Every turn 1 random unit teleports to one
- Random space on the Board

Three Kingdoms Combined Arms

Introduction

Board game for 2+ players. Chinese Three Kingdoms theme. No dice or cards. The Three Empires were the Wei, Shu, & Wu.
Each unit represents several hundred soldiers.

Victory

Destroy all enemy Generals or occupy all cities.

The Map

Use a 12x12 square grid.

Unit List

Unit Name	Move	Range	Defense	#
General	4	1	3	2
Armored Cavalry	4	1	3	2
Infantry	2	1	4	4
Archers	2	2	3	2

Unit Special Abilities

All friendly units adjacent to the General get Defense +1 Shock Troops do 2 points of damage when they attack.

Setup

Each player starts in control of a 5x5 corner. Players place their units in their respective corners. Units may not stack.
Players take turns placing their units. Determine who goes first in a non-random manner.

Turn Sequence

Players take turns. Each turn has 2 phases:
1. Move Phase
2. Attack Phase

Move Phase

You can move some, none, or all of your units in move phase. Units can move orthogonally or diagonally. Units can move up to a number of spaces equal to their Move Trait.
Units cannot move through other units.

Attack Phase

Each of your units can attack one target enemy unit in Fire Phase. Different units may attack differ-

Units

Use chits or miniatures to represent units. All sides use the same army list.

Unit Attributes

Each unit has 3 Attributes or Traits: *Move: the number of spaces the unit can move per turn.
*Range: the maximum number of spaces distant the unit can apply damage.
*Defense: the amount of damage the unit can take at one time before having to retreat.
Number of that unit in the army

Unit Name	Move	Range	Defense	#
Rockets	1	3	2	2
Shock Troops	1	1	5	2
Horse Archers	5	2	2	2

ent targets. Each unit has a Range Trait (number of spaces out it can attack into) A unit can only attack a target that is within its range.

Units with ranges 2+ can attack over other units. An attack does 1 point of damage. As soon as a unit takes damage in a turn equal to its Defense Trait, it must retreat.

(Combined Arms: you must concentrate force & combine attacks) A retreating unit must move laterally or back towards its side of the board 1 space. A retreating unit unable to move is destroyed and is removed from the board. Units that retreat off the board are destroyed.

A unit cannot move laterally if it will come in contact with an enemy unit.

Double Whammy Rule

If you can force a unit to retreat a second time in the same phase, it is automatically destroyed.

Terrain

Randomly Distribute 10 cities, 10 Forests, & 10 Mountains. Units occupying City spaces have a Defense bonus of +1. Units cannot move into or through Mountain spaces.

Units must stop when they enter a Forest space. The last player to have occupied a city controls it.

Three Little Pigs

Introduction

Card game for 2-4+ players. Fairy Tale Theme.

Winning

First player to make a combo wins.

The Deck

Players share a common Deck. The deck contains

7 Suite of cards:

1. Pig Cards
2. Supply Cards
3. Location Cards
4. Tool Cards
5. Structure Cards
6. House Cards
7. Wolf Cards

Each Card also belongs to one of three Material types:

1. Straw
2. Sticks
3. Bricks

The Deck contains 3 copies of each card listed.

Setup

Shuffle the Deck. Youngest player goes first. Play proceeds clockwise.

Deal 7 cards to each player.

Turn Sequence

Players take turns. On your turn draw 3 cards and discard 3 cards. The drawn cards may be the top card of the Deck or the Discard.

If you discard 1 or more Wolf cards a target opponent must Discard a random card and draw a new one from the deck For each Wolf card so discarded. If you have the cards to make a Combo, Show them to the other players: You win. A Combo consists of: 1 Card from each of the 6 Suites (not including the Wolf) and All cards must be of the same Material Type.

(Easy Game: Cards may be of different Material Types)

The Deck

Card Name:	Suite:	Type:
Big Bad Wolf	Wolf	—
Fifer the Thatcher	Pig	Straw
Fritz the Carpenter	Pig	Sticks
Franz the Mason	Pig	Bricks
Hay Bale	Supply	Straw
Wood Pile	Supply	Sticks
Clay Pit	Supply	Bricks
Scythe	Tool	Straw
Saw	Tool	Sticks
Trowel	Tool	Bricks

Card Name:	Suite:	Type:
Field	Location	Straw
Forest	Location	Sticks
Hill	Location	Bricks
Roof	Structure	Straw
Doors	Structure	Sticks
Walls	Structure	Bricks
Hut	House	Straw
Shack	House	Sticks
Cottage	House	Bricks

Thunderbolt

Introduction

Each player controls an A-10 Thunderbolt II (The Warthog) on Close Air Support Duty.

Setup

Players keep one Thunderbolt card in front of them that represents their plane. Each player also draws 1 random pilot card. Place 5 Fuel Markers on this card.

Place 5 Ammo Markers on this card. Each player draws 3 cards for their hand. All planes start their first turn at Base.

The Deck

Players share a common Deck. Cards not in the common deck include the Pilot cards and Thunderbolt cards. Card types found in the common deck include: Mission Cards Munitions Cards Enemy Cards Event cards

Dice

Ten sided Dice are required (D10).

Objective

The player who has Mission cards with the most Mission Points at the end of the game wins.

Fuel Markers

Each plane holds 5 units of Fuel. Use counters to represent Fuel units. When a plane runs out of fuel it must return to base.

Ammo Markers

The Warthog is equipped with a 30 mm GAU-8/A Gatling Gun. Each plane holds 5 units of ammo. Use counters to represent ammo units.

When a plane runs out of ammo it can no longer use its gun until it reloads at base.

Structural Hit Markers

Planes must Abort Mission and return to base when they take 3 total hits or damage. Use counters to represent Hits or Damage.

Turn Sequence

Players take turns. Each turn has 6 Phases.

1. Briefing Phase
2. Loiter Phase
3. Base Phase
4. Incoming Phase
5. Mission Phase
6. End Phase

Briefing Phase

Draw 2 cards from the Deck. If the Deck runs out the game is over. Max hand size is 7 cards. Discard excess cards.

Loiter Phase

Remove one Fuel counter if you are not at Base. If you have no fuel counters or 3 damage counters you must return to base. If you voluntarily aborted the mission in your last Incoming Phase you must return to base.

If these conditions are not met, you may still choose to return to base. A plane may spend several consecutive turns at base to repair damage.

Base Phase

Skip this phase if you are not already at base, or did not return to base in Loiter Phase. You may do all of the following: Repairs: Remove one Damage marker. Rearm: Gain 5 Ammo units (5 Max) Refuel: Gain 5 Fuel units (5 Max) Munitions: Add Munitions cards from your hand to your plane (5 Max) Munitions cards are placed face up next to your plane card. If you did not skip this phase, then at the end of this phase immediately skip to End phase.

Incoming Phase

The active player may play one Mission card. Your opponent (a non-active player) may play one Enemy card regardless if a Mission was played or not. Roll 1D10 for Combat Initiative.

1-5 The Enemy attack first 6-10 The player attacks first Roll 1D10 for Attacks. 1-5 The Attack misses. 6-10 The Attack hits.

If an enemy is hit it is destroyed and the card is discarded. If the player is hit his plane receives one Damage Counter. Continue trading attacks until: The enemy is destroyed, or The player has 3 hits, or The player voluntarily aborts the mission When you receive your third damage counter you must immediately skip to End phase.

Every time the player attacks he must use up (discard) one ammo counter or one munitions card. The Gatling gun can be used against any target. Other Munitions are more limited. Only one Enemy card can be played this phase unless the Mission card says otherwise.

Attacks vs Enemy Fighters are at -1. Enemy Fighters will make 3 passes and then break off combat.

Mission Phase

To complete the mission played last phase the active player must destroy the target. Roll 1D10 to attack the target: 1-5 The Attack misses or minor damage.

6-10 The Attack hits. The Mission target is destroyed.

Every time the player attacks he must use up (discard) one ammo counter or one munitions card. All Mission Targets are Ground Targets. Continue attacking until the target is destroyed or you run out of ammo and munitions.

If you destroyed the target, put it in your Mission Completion pile. If you did not destroy the target, discard it.

End Phase

Next players turn.

Mission Card List

Target Name	MP	Notes:
Tank Column	1	Vehicles
Major Airfield	3	Any number of Air cards may be played
Minor Airfield	2	Opponent may play 1 extra Air card
Munitions Storage Area	1	
Radar Facility	2	SAM cards are Initiative +2
Ammo Dump	1	
Supply Convoy	1	Vehicles
Troop Concentration	X	1 MP per Hit inflicted up to 3
APCs	1	Vehicles
Truck Park	1	Vehicles
Communications Outpost	2	One opponent may draw a card
Forward Observers	1	Attacks vs Mission Target at -2
Artillery Battery	2	Opponent may play 1 extra AAA card
SAM Site	3	Any number of SAM cards may be played
AAA Site	2	Any number of AAA cards may be played
Docked Warship	3	Opponent may play 1 extra AAA or SAM card
Bridge	2	
Engaged Armor	2	Enemy Attacks at +1. Vehicles
Radar Post	1	
Infantry Positions	1	
Dug in Tanks	1	Attacks vs Mission Target at -1. Vehicles
Bunker	1	Attacks vs Mission Target at -1
Staging Area	3	Opponent may play 1 extra enemy card

Jammer and Tracking Pods are not weapons.

Event Card List

Card Name	Effect
Secondary Target	Player gets an extra Turn
Air Threat	Play an extra Air Enemy vs opponent in Incoming Phase
Night Vision Imaging System	Initiative and Attack +1 this turn. Play before rolls are made.
Titanium Armor	Negate Hit caused by Enemy Attack
Back up Systems	Negate Hit caused by Enemy Attack
Survivability	Negate Hit caused by Enemy Attack
Self Sealing Fuel Cells	Negate Hit caused by Enemy Attack. Lose 1 Fuel counter.
Fire Control	Attack +2. Play before roll is made
Night Mission	Initiative +1 & Enemy Attacks are at -1 this turn. Play before roll is made
Poor Visibility	Enemy Attacks are at -2 this turn. Play before roll is made
ECM Chaff	Enemy Missile Attacks are at -2 this turn. Play before roll is made
IR Countermeasure Flares	Enemy Attacks are at -2 this turn. Play before roll is made
Wide Combat Radius	Do not discard Fuel Counter in Loiter Phase
Forward Air Control	Initiative +2. Play before roll is made

Card Name	Effect
Interchangeable Parts	Discard an extra Damage counter in Base Phase.
Mission Capable	Draw 3 Cards
Sorties	Draw 3 Cards
Scramble	Draw 3 cards

Event Cards are discarded as soon as they are played.

Pilot Card List

Name	Skill
Chuck	Initiative Rolls +1
Razor	Attack Rolls +1
Big Daddy	Hand Size +2

Name	Skill
Ice	Enemy Attack Rolls -1
Hawk	Draw +1 card per turn
Travis	Loiter Time +1 (= Fuel Capacity = 6)

Solo Rules

Start with 5 cards. Discard Enemy cards from initial 5. Just draw 1 card at a time. You are attacked by all Enemy cards you draw.

Thundercats

Introduction

Card game for 2 players.

The Decks

There are 2 decks: Thunder Cat Deck Evil Mutant Deck Each player gets one deck.

Victory

The first player to win 5 hands wins the game.

Turn Sequence

Each turn has 4 phases: Draw Phase Plot Phase Attack Phase Victory Phase

Draw Phase

Both players fill their hands to 9 cards. If a deck ever runs out shuffle the discard pile & draw from it.

Plot Phase

Players may discard up to 4 cards & draw replacements.

Attack Phase

Each player may play up to 4 characters from their hand face up to the table. Characters include: Thun-

der Cats, TC Allies, Evil Mutants, and Special Foes. To each character 1 Weapon card may be attached.

To each character 1 Companion card may be attached. To each character 1 Vehicle card may be attached. Special Foes may not attach cards.

A maximum of 1 Special Foe may be played. Each player may also play a Base card & a Special Event card.

Victory Phase

Every card has a Force value. Each player adds up the total force of all of his played cards. The player with the highest total wins the hand.

Discard all played cards.

Tic Tac Tics

Introduction

Abstract Game for 2 Players. Tac-tac-toe variant with a regular deck of cards and played on 3 Boards.

The Boards

There are 3 boards. Each board is a 3 x 3 grid. Each space (square) on each board is numbered.

The Spaces on a board are numbered 1 through 9. Each player gets 1 Home Board. The third board which is placed between the players is called the Mid Board.

Pieces

Each player gets a set of unique pieces: X's and O's. These can be tokens, chips, counters, stones, coins, whatever. Each player has a set of 9 pieces.

The Deck

Use a regular deck of cards. Each numbered card corresponds to same numbered spaces on the boards. Aces always have a value of 1. Numbered cards (1-9) are also called Meld cards.

Tens, Jacks, Queens, and Kings produce special effects. Tens, Jacks, Queens, and Kings are also called Special cards.

Victory

To achieve victory, you must get two simultaneous three-in-a-rows (TIARS). TIARS cannot be on your Home Board. You could have both TIARS on your opponents board or the Mid board, or 1 TIAR each on the Mid board and your opponent's board.

If both TIARS are on the same board, they may share a space.

Setup

Each player places his 9 pieces on the 9 squares of his Home board. The Mid Board is empty. Players cut the deck. High cut goes first.

Turn Sequence

Players take turns. Each turn has 3 phases: Draw Phase Play Phase End Phase

Draw Phase

Draw 1 card from the deck and put it in your hand. If the deck runs out, shuffle the deck and draw from it.

Play Phase

You may do one of 3 things:

1. Draw an extra card
2. Play 1 Meld
3. Play 1 Special Card

Playing Melds

To play a Meld discard 2 Numbered (Meld) cards. This causes 1 of 2 effects:

1. Transfer 1 piece (it must be your own)
2. Switch places of 2 pieces (at least 1 must be yours)

In a Transfer, one of the cards must correspond to the location of the Piece you want to move. The other card must correspond to the Number of the empty space you want to move it to. The piece can be Moved on the same board or to either of the other 2 boards. In a Switch, you switch places of 2 pieces. The cards must Correspond to the numbers of the spaces the pieces are on. In a Switch, the pieces can be on the same or different boards.

Special Cards

Tens, Jacks, Queens, and Kings are Special cards. These have 1 or more special effects.

Tens

You can use a Ten as a Meld card with a value equal to the other card in the Meld. (Example: Playing a 5 and a 10 would be like playing two 5's) Discard a Ten card to negate a Special card just played by an opponent.

Jacks

Discard a Jack to look at your opponent's hand and steal one card. Discard a Jack to transfer one of your pieces: Move it like it was a Knight in Chess: It must remain on the same Board.

Queens

Discard a Queen to play 2 Melds this turn. Discard a Queen to switch places of 2 pieces that are on opposite corners of the same board.

Kings

Discard a King to move any of your pieces to any empty space on your Home Board. Discard a King to

move one of your pieces to an adjacent empty space on the same Board.

End Phase

Max hand size is 7 cards. Discard excess cards.

Optional Rules & Variants

Red & Black Rule

The red Meld cards can only be used for the Mid Board. Black Meld cards can only be used for Home Boards.

Time Bandits

Introduction

Card game based on the Terry Gilliam Movie. Each player controls a group of diminutive individuals in possession of a stolen Map of all Time & Space. Players race to steal the most treasure from History.

Disclaimer

Time Bandits is a licensed, copyrighted property. This is merely a fan site.

Game End

The game ends when a turn starts with no cards left in the deck.

Victory

The player with the most Treasure cards at the end of the game wins. If tied the player with the most characters wins. If still tied, the shortest player wins.

The Deck

Players share a common deck.

Characters

Each player is represented by an abstract group of Time Bandits of Uncertain number. In addition to these abstract individuals, players will recruit Character cards. Character cards represent more concrete individuals with special abilities.

The Time Of Legends Rule

This is the Default Location. If they are not anywhere else, your Time Bandits are here. When traveling, if you don't have a location card, you may Flip the Travel card over, to represent that you have gone to the Time of Legends.

Note that every time you play a Travel card, you must discard your current location card and either play a new location card, or go to the Time of Legends.

Setup

Each player is dealt 4 cards. The shortest player goes first. Play proceeds clockwise.

All players start in the Time of Legends.

Turn Sequence

Players take turns. Each turn has 6 Phases:

- Luck Phase
- Travel Phase
- Tag Along Phase
- Steal Phase
- Danger Phase
- Last Phase

Luck Phase

Draw 2 cards from the deck.

Travel Phase

To travel, you must play (discard) 1 Travel card & 1 Location card. The Location card is left face up in front of you. It remains there until you travel again.

Instead of playing a Location card, you may apply the Time of Legends Rule.

Tag Along Phase

You may put 1 Character card in Play. Character cards are placed face up in front of you. Characters remain until they are removed by some other play mechanism.

Steal Phase

If you played a Location card this turn (Not the Time of Legends) You may steal a Treasure: Take 1 Treasure card from your hand and Put it next to you in a Pile called your Treasure Pile.

Danger Phase

The player to your left may play a Foe, Delay, or God card on you or no card at all. If a Foe card is played, you must play a Travel, Solution, Ally or Talk card to negate it. If you do not negate the Foe, you must discard a Character card, or if you have none, you must discard a Treasure card from your Treasure pile.

If a Delay card is played, you must play a Solution card or you become trapped, and Must miss your next 2 turns. If a God card is played, you must play a Travel card to escape him. If you do not escape, you must discard a Character card, or if you have none, you Must discard a Treasure card from your Treasure pile.

Last Phase

Max hand size is 5. Discard excess cards.

Time Line

Introduction

Two time traveling civilizations fight for ultimate control of the entire timeline. The Far Future is controlled by a scientifically advanced culture known as the Teraxians. The Distant Past is controlled by a magical race known as the Atlanteans.

Object

Gain control of all 12 Eras on the Time Line.

#	Era:	Force
12.	The Far Future	X
11.	Near Future	48
10.	WWII	24
9.	WWI	12
8.	Age of Imperialism	9
7.	Age of Revolution	6

Force = Force of Units recruited from this time period. Eras 2-11 have Period troops.

Dice

Six and ten sided dice are needed.

Atlantean Counter Set

#	Type	Force	Move	Start
10	Wizards	50	4	2
10	Heroes	100	3	2
20	Warriors	150	2	4

Start = The number of such units the player starts

Teraxian Counter Set

#	Type	Force	Move	Start
10	Scientists	50	4	2
10	Agents	100	3	2
20	Combat Teams	150	2	4

Setup

The Atlanteans begin with their starting counters in the Distant Past space. The Teraxians begin with their starting counters in the Far Future space. Roll high on 1D10 to see who goes first.

The Decks

Each player has his own unique deck. There is the Teraxian Deck and the Atlantean Deck.

The Board

The board is composed of a row of 12 spaces. These spaces (or Eras) are labeled in the following order:

#	Era:	Force
6.	Renaissance	5
5.	Middle Ages	4
4.	Roman Empire	3
3.	Ancient Civilizations	2
2.	Prehistory	1
1.	Distant Past	X

Counters

Each player gets a set of counters of a unique color and with unique unit types. Units are also referred to as troops. There is also a set of same-color, common, generic period troops: Have 10 counters to represent Period troops from each Era 2-11.

Mark the Era number on the counter.

#	Type	Force	Move	Start
10	Monsters	200	1	2
25	Control Markers	-	-	-

the game with.

#	Type	Force	Move	Start
10	Warships	200	1	2
25	Control Markers	-	-	-

Turn Sequence

Players take turns. Each turn has 5 Phases:

1. Random Factors
2. Time Travel
3. Change History
4. Recruit Troops
5. Seek & Destroy

Random Factors Phase

The active player draws 2 cards from his deck. If the deck runs out, shuffle the discard and draw from it.

Time Travel Phase

You may move your units forward and backwards on the timeline a number of Eras up to their Move stat limit. For example: A Wizard could move from the Distant Past to the Middle Ages. Period troops have a base Move = 0.

Cards may be played to increase the Move stat of target units.

Change History

If you have a unit in an Era you may try to gain control of the Era by interfering with history. Roll 1D6.

1D6	Recruit
1	Wizard
2	Hero
3	Warriors

Recruited Atlantean units begin in the Distant Past.

1D6	Recruit
1	Scientist
2	Agent
3	Combat Team

Recruited Teraxian units begin in the Far Future.

Seek & Destroy

If there are opposing units in the same Era they may fight. If neither side wants to fight there is no combat. If one side does not want to fight, it may attempt to hide or escape.

Roll 1D6. This is the Hide or Escape Roll. On a roll of 4-6 the player may hide all his units. They may not be attacked this turn. Alternatively, on a roll of 4-6 the player may have all of his non-period units escape.

D6	Result
1-4	The Disadvantaged side has one unit destroyed.
5-6	The Advantaged side has one unit destroyed.

If both sides have equal Force Totals the combat roll results are 1-3 and 4-6. A player decides which of his units are destroyed. The unit is removed from play. Any cards attached to a destroyed unit are discarded.

Atlantean Deck Card List

this is the control roll. On a roll of 4-6 you gain control of the Era.

Agents and Heroes get +1 to the roll. Keep track of control by placing control markers. Changing history involves assassinations, planting ideas, providing assistance, preventing or causing critical events.

Recruit Troops

If you control an Era you may try to recruit one period unit from it. Roll 1D6. This is the Period Recruit Roll. On a roll of 4-6 you gain one unit.

Agents and Heroes get +1 to the roll. The Atlanteans may make two rolls for the Prehistoric Era. Keep track of control of period units by stacking them and then placing a control marker on the stack.

The Atlantean Player makes one Atlantean Recruit Roll:

1D6	Recruit
4	Warriors & Draw 1 card
5	Monster
6	Draw 2 Cards

The Teraxian Player makes one Teraxian Recruit Roll:

1D6	Recruit
4	Combat Team & Draw 1 Card
5	Warship
6	Draw 2 Cards

Escaping units move to an adjacent Era. They may be attacked again in that Era. Units that fail to hide or escape must fight. If there is a fight each side adds up it's Force Total.

Cards may be played to increase a side's Force Total. Certain cards can only be played if certain unit types are present at the battle. These cards are attached to one of the required units.

The effect of cards last the entire battle. The Side with the higher Force Total has the Advantage. The lower total has the disadvantage. Roll 1D6. This is the Combat Roll:

Continue making combat rolls until one side is eliminated, or both sides want to stop. After each combat roll either side may attempt to escape at a -1 to the roll. Discard all cards played at the end of the battle.

Card Name	User	Effect
Astral Travel	W	Move +3 or Escape roll +2
Astral Gate	WHT	Move +3 or Escape roll +2
Dimension Door	WH	Move +3 or Escape roll +2
Ethereal Plane	A	Move +3 or Escape roll +2
Hermes Portal	WH	Move +3 or Escape roll +2
Demon Horde	T	F + 200
Vorpal Sword	H	F + 100
Celestial sword	H	F + 200
Rune Blade	H	F + 150
Eldritch Blade	H	F + 50
Maelstrom	W	F + 200
Firestorm	W	F + 50
Petrification	W	F + 100
Possession	W	Control opponents unit this turn
Time Barrier	W	Units cannot Move past target Era
Stasis	X	Units cannot move out of Target Era
Dragon Breath	M	F + 50
Regeneration	M	F + 100
Time Walk	X	Take an extra turn
Speed Time	X	Draw 5 Cards
Take from the Future	X	Put any one card from your deck into your hand
Summon	W	Stack any 1 New Atlantean unit with Wizard
Reverse Time	W	Redo this turn from the beginning
See the Future	X	Look at the top 7 cards; put them in any order
Take from the Past	X	Put any one card from your discard into your hand
Banish	W	Cause enemy unit to escape
Polymorph	W	Destroy enemy unit
Stone Rain	W	F + 150
Time Vortex	W	Each unit in this Era is destroyed on 4-6 on a roll of 1D6
Armies of the Past	P	Entire Stack Move +3
End of Time	X	Opponent must discard 3 cards
Great Wyrms	M	F + 200
Myrmidons	T	F + 50
Illusions	W	Hide Roll +2
Enchanted Weapons	P	F + 50
Wizards Sight	W	Opponent gets -2 to Hide Roll
Invisibility	A	Hide Roll +2 or F + 50
Avatar	H	F + 100
Strings of Fate	W	Change Roll +2

User What type of unit may use this card.

Period Troops, A = All, X = None

W Wizard, H = Hero, T = Warriors, M = Monster, P =

Teraxian Deck Card List

Card Name	User	Effect
Mind Control Device	S	Control opponents unit this turn
Tac Nukes	W	F + 200
Probability Shift	X	Any roll +2 or -2
Time Contraction	A	Move +2 or Escape roll +2
Time Expansion	A	Move +2 or Escape roll +2

Card Name	User	Effect
Time Skipping	A	Move +2 or Escape roll +2
Matter Disrupters	W	F + 50
Force Fields	W	F + 100
Cybernetics	C	F + 50
Plasma Weapons	C	F + 100
Spinal Mount	W	F + 150
Power Armor	C	F + 200
Time Projection	A	Move +2 or Escape roll +2
Alternate Time Line	S	Destroy Target Unit
Bionics	G	F + 150
Paradox	X	Destroy Target Unit
Time Loop	X	Get an Extra Turn
Temporal Rift	X	Opponent must discard 3 cards
Time Flux	S	Units cannot Move past target Era
Anachronism	P	Move +2
Temporal Locator	S	Opponent gets -2 to Hide Roll
Time Beacon	X	Units moving to this Era get Move +2
Android	G	F + 200
Neural Implants	G	F + 100
Time Bomb	S	F + 100
Worm Hole	A	Move +2 or Escape roll +2
Temporal Manipulation	X	Draw 5 cards
Recorded History	A	Change Roll +2
Abduction	X	Change Roll +2
Holograms	S	Hide Roll +2
Eject Button	A	Escape Roll +2
Stop Time	S	Units cannot move out of Target Era
Futuristic Weapons	P	F + 50
AI Predictions	X	Look at the top 7 cards; put them in any order
Replacement Clone	S	Change Roll +2

S Scientist, G = Agent, C = Combat Team, W = War-ship

D20 Version Of Timeline

by C Gerard Luft [A D20 Conversion Of The Legendary Lloyd Krassner's Time Line: D20 Conversion](#)

Countersets & Board Available!!!

Thanks Kaptain!

Time To Tell

Introduction

Educational Party game for 2-8+ players. Players must answer trivia type questions involving Historical dates.

Winning

The first player to accumulate 25 Chips is the winner. (or 50 for a long game)

Pieces

Dice, chips, and a special deck of Date cards are needed.

Dice

A six sided die is needed.

Chips

Poker chips are needed for keeping track of scores.

Roll:	Result:
1	Craps
2	Timeline = 2
3	Timeline = 3

If you get Craps your turn ends immediately. If you get a Timeline, draw the indicated number of cards and Put them in the correct temporal order. If you get Super Six, draw 1 card at a time, and guess the exact Correct date for each card up to a max of 6 cards. Stop if you fail to guess correctly.

When cards are drawn the Event Description is kept face up and the Date face down. Only after an answer or solution is given are the cards flipped to reveal the Dates.

The Date Deck

Players share a common deck. The cards are 2-sided. One side of a card describes a Historical Event. The other side is the date in which the Event occurred. The deck contains one copy of each card in the card list.

Setup

Shuffle the deck. Players cut the deck. Oldest date goes first. Proceed clockwise. Re-shuffle the deck. The deck is placed with Event descriptions face up and Dates face down.

Turn Sequence

- Players take turns. Each turn has 3 Phases:
- Luck Phase
 - Knowledge Phase
 - Scoring Phase

Luck Phase

Roll 1 Die once:

Roll:	Result:
4	Timeline = 4
5	Timeline = 5
6	Super Six

Scoring Phase

If you got Craps, you get no Chips. If you put a Timeline in the correct order, get Chips equal to the length of the timeline. Get 1 chip for each date correctly guessed in a Super six.

Creating Your Own Decks

Players are encouraged to create their own decks. Decks may be themed (Pop Culture, Music, Art, Politics, War, Science, etc.)

Science & Technology Theme Deck #1- Card List

Date:	Card Name:
c. 2725 B.C.	- Imhotep in Egypt considered the first medical doctor
c. 2540 B.C.	- Pyramids of Egypt constructed
c. 2000 B.C.	- Chinese discovered magnetic attraction
c. 700 B.C.	- Greeks discovered electric attraction produced by rubbing amber

Date:	Card Name:
c. 600 B.C.	- Anaximander discovered the ecliptic (the angle between the plane of the earth's rotation and the plane of the solar system)
c. 600 B.C.	- Thales proposed that nature should be understood by replacing myth with logic; that all matter is made of water
c. 585 B.C.	- Thales correctly predicted solar eclipse
c. 530 B.C.	- Pythagoras developed mathematical theory
c. 500 B.C.	- Anaximenes introduced the ideas of condensation and rarefaction
c. 450 B.C.	- Anaxagoras proposed the first clearly materialist philosophy - the universe is made entirely of matter in motion
c. 370 B.C.	- Leucippus and Democritus proposed that matter is made of small, indestructible particles
335 B.C.	- Aristotle established the Lyceum; studied philosophy, logic
c. 300 B.C.	- Euclid wrote "Elements", a treatise on geometry
c. 300 B.C.	- Aristarchus proposed that the earth revolves around the sun; calculated diameter of the earth
c. 300 B.C.	- The number of volumes in the Library of Alexandria reached 500,000
c. 220 B.C.	- Archimedes made discoveries in mathematics and mechanics
c. 150 A.D.	- Ptolemy studied mathematics, science, geography; proposed that the earth is the center of the solar system
190	- Chinese mathematicians calculated pi to five decimal places
271	- Chinese mathematicians invented the magnetic compass
415	- A mob of rioters burned down the Library of Alexandria, and much of the recorded knowledge of the western world was lost
450-1000	- the "Dark Ages" in Europe
1232	- Rockets invented in China to defend city of Kaifeng against Mongol invaders
1252	- Pope Innocent IV approved the use of torture in witchcraft trials
1269	- Maricourt used compass to discover that a magnet is encircled by lines which terminate on two poles
1348	- The plague appeared in Europe
1390	- The first paper mill began operating in Germany
1455	- The Gutenberg Bible became the first book printed with movable metal type
1508-1510	- Leonardo da Vinci compiled notebooks on mechanics, astronomy, anatomy, and his inventions
1543	- Copernicus formed the hypothesis that the planets revolve around the sun.
1543	- Vasalius published treatise on human anatomy
1570	- Brahe discovered supernova in constellation Cassiopeia
1600	- Gilbert discovered that electricity occurs in things other than amber; wrote a book on magnetism
1608	- Lippershey invented the telescope
1609	- Galileo built 20X telescope, discovered craters and mountains on the moon
1609	- Kepler announced his 1st and 2nd laws
1613	- Galileo discovered sunspots
1614	- Napier discovered logarithms
1616	- Galileo called to Rome and ordered to stop supporting the Copernican theory
1619	- Kepler announced his 3rd law
1619	- The first slaves transported to America
1620	- Bacon published "Novum Organum" (scientific method and inductive reasoning)
1621	- Snell discovered the law of refraction
1628	- Harvey published a book describing blood circulation
1633	- The Inquisition denounced Galileo
1637	- Descartes Published "Geometry"
1638	- Galileo published "Discourses Concerning Two New Sciences", summarizing the principles of mechanics
1642	- Pascal invented the mechanical adding machine
1650	- Archbishop Usher estimated by reading the Bible that the earth was created

Date:	Card Name:
	on October 23, 4004 BC at 9:00 AM
1652	- Pascal discovered laws of fluid pressure
1654	- Guericke invented the vacuum pump
1660	- Redi disproved theory of spontaneous generation with experiment on flies
1666	- Newton invented the calculus
1666	- Newton discovered glass prism separates white light into spectrum
1675	- Leibniz independently invented the calculus
1687	- Newton published "Principia", describing the laws of motion
1690	- Locke published "Essay Concerning Human Understanding" (empiricism, tabula rasa)
1692	- The first witchcraft trials in Salem, Massachusetts
1704	- Newton published "Opticks"
1738	- Bernoulli proposed laws of fluid mechanics
1758	- Linnaeus developed taxonomy of species, proposed binomial nomenclature
1764	- Hargreaves invented the spinning jenny
1769	- Watt invented the modern steam engine
1777	- Lavoisier proposed idea of chemical compounds made of elements
1781	- Herschel discovered Uranus
1783	- Michel and Montgolfier invented the hot air balloon; the first people to fly, altitude 1800 m
1785	- Coulomb confirmed the inverse square law for electric force
1785	- Hutton proposed the idea of uniformitarianism in the geological history of the earth
1785	- Cartwright invented the power loom for producing cloth
1787	- Berthollet proposed system of chemical nomenclature
1792	- Rousseau wrote "Social Contract"
1793	- Whitney invented the cotton gin
1796	- Jenner discovered smallpox vaccination
1799	- Discovery of the Rosetta Stone
1800	- Volta invented the battery
1800	- Ampere discovered properties of magnetic field produced by electric current
1803	- Dalton composed the law of definite proportions in chemistry
1804	- Rockets developed by the British Army Corp reached height of 1830 m
1807	- Fulton invented the steamboat
1808	- Dalton published a periodic table based on atomic weights
1811	- Avogadro introduced the concept of the mole
1814	- Stephenson invented the locomotive engine
1820	- Oersted discovered that an electric current causes the deflection of compass needle
1822	- Champollion translated the Rosetta Stone
1825	- discovery of Ampere's Force Law
1827	- Brown discovered Brownian motion
1830	- The first railroad (between Liverpool and Manchester, England)
1831	- Faraday (England) and Henry (U.S.) independently discovered that a current is produced in a wire when it is moved near a magnet
1833	- Charles Lyell published "Principles of Geology", based on uniformitarianism
1839	- Goodyear invented vulcanized rubber
1844	- Morse sent the first telegraph message
1846	- Galle discovered Neptune, accounting for observed perturbations in the motion of Uranus
1849	- Fizeau measured the velocity of light
1853	- Bessemer in Britain and Kelly in U.S. invented the Bessemer steel process
1854	- Boole invented Boolean algebra
1856	- Neanderthal fossil found in Germany
1859	- Darwin published "On The Origin of Species"
1866	- Mendel wrote a paper on his findings about heredity in plants
1868	- Cro-Magnon fossil found in France

Date:	Card Name:
1869	- Mendeleyev used a periodic table of known elements to correctly predict the properties then undiscovered elements
1873	- Maxwell published "Treatise on Electricity and Magnetism"
1874	- Cantor established principles of mathematical set theory
1877	- Edison invented the phonograph
1877	- Hall discovered the two moons of Mars
1879	- Wundt established the first laboratory for psychology experiments
1879	- Edison invented the electric light bulb
1882	- Lindemann proved that pi is transcendental
1882	- Edison created the first large power station in NYC
1883	- Wroblewski and Olszewski first produced liquid oxygen.
1885	- Benz invented the gasoline-powered automobile
1885	- Eastman invented the box camera
1885	- Hertz discovered the photoelectric effect
1885	- Balmer discovered spectral lines of hydrogen
1887	- Mendelson and Morley conduct experiment showing no evidence for the existence of an "ether"
1888	- Hertz discovered radio waves, verifying Maxwell's prediction of electromagnetic waves
1888	- Edison invented the kinetoscope
1889	- Hollerith invented the first calculating machine, used punch cards
1891	- "Java Man" discovered in Indonesia
1892	- Dewar discovered that a double-walled bottle with a vacuum layer insulates the contents from heat flow
1895	- Roentgen discovered x-rays
1895	- Marconi invented antenna and wireless telegraph (short distance)
1896	- Becquerel discovered radioactivity
1896	- Marconi increased range of wireless telegraph to 1.6 km
1897	- Marconi increased range of wireless telegraph to 29 km; first ship-to-shore message
1898	- Curie and Curie announced their discovery of radium and polonium
1899	- Marconi established wireless telegraph service between England and France
1900	- First public awareness of Mendel's findings in genetics, when his 1865-1866 papers were found
1900	- Freud published "The Interpretation of Dreams"
1900	- Finlay discovered that yellow fever is spread by mosquitos
1900	- Planck proposed that energy can only be absorbed or emitted by matter in discrete amounts (quanta)
1901	- First transatlantic wireless telegraph
1902	- Discovery of Tyrannosaurus Rex
1902	- Kennelly (U.S.) and Heaviside (England) independently discovered the ionosphere
1903	- The botanist De Vries discovered mutations in plants
1903	- Wright brothers' airplane remained in flight for 12 seconds
1904	- Fleming invented vacuum tube diode
1904	- Genetics experiments by Thomas Morgan, discovery of sex-linked mutations (among a group of fruit flies with normal red or unusual white eyes, all of the white-eyed offspring were male).
1905	- Einstein published papers on Brownian motion, the photoelectric effect, and the special theory of relativity
1906	- De Forest invented the triode vacuum tube
1906	- Thomson discovered the electron
1908	- the "Tunguska event" - major damage to a forest region in Siberia caused by a comet or meteorite
1908	- Ford produced the Model T automobile
1908	- Wegener proposed theory of continental drift

Date:	Card Name:
1909	- The "Piltdown Man" hoax – a fake archeological discovery announced by dishonest scientists who wanted to "prove" that human beings had evolved in Europe
1911	- Rutherford discovered that the positive charge in an atom is concentrated in a small nucleus; proposed a planetary model of the atom
1912	- Pickard invented the crystal diode and crystal detector
1913	- Edison invented motion pictures with sound
1913	- Ford added the assembly line to his automobile plant
1913	- Bohr published his model of the atom, based on energy states described by one quantum number
1916	- Lewis proposed the idea of covalent bonds
1916	- Einstein published the general theory of relativity
1917	- Germany - the first major military use of airplanes to drop bombs on cities
1919	- Eddington recorded data on the sun's gravitational deflection of starlight during a solar eclipse, confirming Einstein's general theory of relativity
1923	- Freud published "The Ego and the Id"
1923	- Development of the diphtheria vaccine
1923	- Production of insulin to treat diabetes
1923	- Hubble estimated the distance from the Milky Way Galaxy to the Andromeda Galaxy
1924	- Discovery of Australopithecus Africanus, its human-sized brain too large to be that of an ape, but having the canine teeth of a gorilla
1924	- De Broglie proposed that all matter has wave properties
1925	- Pauli proposed the Exclusion Principle (no two electrons in an atom can have the same set of quantum numbers)
1925	- Scopes fired from biology teaching position for teaching evolution
1926	- Schrodinger developed the wave equation
1926	- Born proposed the statistical interpretation of the wave equation
1926	- Goddard launched the first liquid-fueled rocket
1927	- Heisenberg proposed the Uncertainty Principle (we cannot simultaneously determine the position and momentum of a subatomic particle)
1927	- Experiment by Davisson and Germer, and simultaneous experiment by G. P. Thompson, proved the wave behavior of electrons
1927	- the first television transmission (England)
1928	- Dirac developed the relativistic quantum theory
1927	- Big bang theory introduced
1929	- Hubble discovered that the galaxies are moving away from each other, causing an expansion of the universe
1930	- Tombaugh discovered Pluto
1931	- Lawrence invented the cyclotron
1931	- Anderson discovered the positron
1932	- Chadwick discovered the neutron
1936	- the first regular television broadcast (England)
1937	- Discovery of the muon
1938	- Hahn, Strassmann, Meitner and Frisch discovered nuclear fission
1938	- Bethe hypothesized that nuclear fusion is the source of energy in stars
1939	- The first regular TV broadcast in the U.S.
1939	- Discovery of Kirlian photography – electrical "auras" surrounding living specimens
1942	- Fermi produced the first nuclear chain reaction in an experiment
1942	- Establishment of the Manhattan Project to develop an atomic bomb
1945	- The first atomic bomb was detonated at Hiroshima, Japan – about 70,000 people were killed instantly; about 30,000 more people died within several weeks

Date:	Card Name:
1946	- Gamow proposed the Big Bang hypothesis.
1946	- The University of Pennsylvania developed the ENIAC computer, containing 18,000 vacuum tubes
1947	- W. F. Libby invented radiocarbon dating
1947	- Researchers at Bell Labs invented the transistor
1947	- Discovery of the pion (predicted by Yukawa in 1935)
1948	- Kinsey published "Sexual Behavior in the Human Male"
1951	- Franklin discovered nucleic acids (RNA and DNA), helical shape
1952	- The first sex-change surgery, transforming George Jorgensen into Christine Jorgensen
1953	- Kinsey published "Sexual Behavior in the Human Female"
1953	- Watson and Crick discovered DNA has double helix, composed of ATCG bases occurring in pairs (A with T, and C with G)
1953	- Miller produced amino acids from inorganic compounds and sparks
1953	- Radioactive fluorine dating proved that the "Piltdown Man" artifact was a hoax
1956	- Discovery of the neutrino (predicted by Pauli in 1930)
1957	- The first artificial satellite, Sputnik, put into earth orbit
1958	- U.S. Congress established NASA
1959	- First unmanned spacecraft hit the moon (Soviet Union)
1960	- Maiman invented the ruby laser
1960	- Javan invented the helium-neon laser
1960	- Goodall studied chimpanzees in Tanzania
1960	- Development and approval of the birth control pill
1961	- A person orbited the earth for the first time (Yuri Gagarin)
1963	- Vine and Matthews discovered that rock layers with particular magnetic orientations, indicating reversals of the earth's magnetic field, are symmetrical about the mid-oceanic ridge, indicating that new crust is created at the ridge.
1963	- Gell-Mann proposed protons and neutrons are made of smaller particles (quarks)
1964	- Discovery of a quasar
1964	- Unmanned U.S. spacecraft transmitted television pictures of the moon before hitting the surface
1964	- Wilson and Penzias discovered the background microwave radiation of the universe
1965	- The first "space walk" (Soviet Union)
1966	- The first unmanned soft landing on the moon (Soviet Union)
1967	- Salam and Weinberg developed a model to unite electromagnetism and the weak nuclear force.
1967	- Bell and Hewish discover pulsars
1967	- U.S. astronauts Grissom, White and Chaffee killed during ground test; Apollo program delayed
1968	- Human beings orbited the moon for the first time (Apollo 8)
1969	- People walked on the moon for the first time (Apollo 11)
1969	- Meteorite in Australia found to contain amino acids
1970	- Apollo 13 moon landing canceled due to severe malfunctions
1971	- First unmanned spacecraft hit Mars (Soviet Union)
1971	- Apollo 15 used the lunar rover
1971	- First space station, Salyut 1, and first space docking (Soviet Union)
1972	- Discovery of a 2 million year old humanlike fossil, Homo habilis, in Africa
1973	- U.S. launched Skylab space station
1974	- Discovery of "Lucy" in Africa, an almost complete homonid skelton

over 3 million years old, only 3 and a half feet tall but having adult teeth, a small brain, walked upright

Date:	Card Name:
1975	- First unmanned soft landing on Venus (Soviet Union)
1975	- The first U.S.-Soviet space docking (Apollo and Soyuz)
1975	- Invention of the CAT scanner (computerized axial tomography)
1976	- Cosmic string theory was introduced
1977	- Voyager spacecraft launched; contained recording of earth sounds, including music and greetings in 55 Earth languages
1977	- Submarine "Alvin" explored midoceanic ridge, discovered chemosynthetic life
1979	- First "test tube baby" from artificial insemination
1979	- Voyager 1 and 2 photographed Jupiter
1980	- Voyager 2 photographed Saturn
1980	- Introduction of the the communication protocol that led to the Internet
1981	- Binnig and Rohrer invented the scanning tunneling microscope
1981	- U.S. launched the first space shuttle, Columbia
1982	- First launch of communications satellites into orbit by space shuttle
1984	- First retrieval of malfunctioning satellites, repair and relaunch by space shuttle
1984	- Discovery of ozone hole over Antarctica
1986	- Voyager 2 photographed Uranus; discovered moons
1986	- Development of the first high temperature superconductors
1986	- Soviet Union launched Mir space station
1986	- U.S. space shuttle Challenger exploded on launch, killing 7 astronauts
1989	- Voyager 2 photographed Neptune; discovered moons
1989	- An asteroid came relatively close to colliding with the earth
1990	- Hubble Space Telescope launched; optical defect discovered
1991	- Discovery of the buried crater near the Yucatan Peninsula, dated at 65 million years old
1992	- Pope John Paul II acknowledged the Vatican's error in the condemnation of Galileo
1993	- Wiles proved Fermat's Last Theorem, which had been first proposed in 1637
1993	- Hubble Space Telescope repaired
1994	- Hubble Space Telescope confirmed existence of a black hole
1994	- Astronomers observed comet Shoemaker-Levy 9 (S-L 9) colliding with Jupiter
1995	- the second U.S./Russian space docking (Atlantis and Mir)
1995	- Discovery of the top quark at Fermilab
1996	- Pope John Paul II affirmed evolution by natural selection
1997	- Microscopic analysis of meteorite led to belief in ancient life on Mars
1997	- Pathfinder vehicle studied and photographed Mars

Titan Attack

Introduction

Two player Card Game based on the Games Workshop Epic Warhammer 40,000 Universe.

Disclaimer

Warhammer is a licenced, trademarked property. This is merely a Fansite.

Decks

Each player uses a separate deck. For example: Imperial Deck vs Ork Deck. Each deck has exactly 55 cards.

Victory

Run your opponent out of cards.

Turn Sequence

Each turn has 6 phases: Draw Phase Redraw Phase Extra Draw Phase Attack Phase Defense Phase Damage Phase

Draw Phase

Each player fills their hand to 8 cards. If the deck ever runs out shuffle your reserve pile & draw from it.

Redraw Phase

Players may discard up to 3 cards to their discard and draw replacements.

Extra Draw Phase

Players may discard "X" Special cards from their hands to their discards to Their reserves to draw the indicated number of cards.

Ork Gargant Card Deck List

Card Name:	#	Range	Dam	Notes
Battle Cannon Turret	1	L	2	
Cluster Buster	1	L	3	
Deth Kanon	1	L	4	
Gutbuster: Ball	1	L	4	(Mega Cannon)
Gutbuster: Chain	1	L	5	

Attack Phase

Players may make attacks. To make an attack, you must make an Attack Meld. A Meld consists of 3 cards: A Titan Card, a Weapon Card, and a Range Card.

The Range card and the Weapon card must match. You may make more than one meld.

Defense Phase

If your opponent has made one or more melds, you May discard a "D" Defense card to negate any one card of the Meld. The negated card goes to your opponents reserve pile. Your opponent may play a replacement card to complete the Meld.

If unable to play an appropriate replacement card, the other two cards Of the Meld must also be discarded to the opponents reserve pile. Your Defense card goes to your reserve pile.

Damage Phase

A Meld does damage equal to the Damage Value of the Weapon card. A player may play an "A" Add card to increase the damage of the Meld. The opposing player must discard a number of cards from his Deck to his Damage pile equal to the value of the Meld.

If the Deck runs out, discard cards from the Reserve Pile. If the Deck & Reserve pile are exhausted the player loses the game. Once damage is done your Meld cards go to your Reserve pile.

Titanic Card Game

Introduction

Series of Card games for 2-4 players. Titanic Theme and Metagame scoring system.

Victory

At the end of the game the player with the most Legacy Points is the winner.

Game End

There are 7 Phases.

Legacy Pnts

Each player starts with 10 Legacy Points (LP).

The Deck

Players share a common deck. Use a traditional 52 card deck. Alternatively use a homemade deck with the following suites: Lifeboats, Crew, Passengers, Iceberg

1. DESIGN PHASE

Play a Hand of Poker. The worst hand is held responsible for the lack of Lifeboats and gets -1 LP.

2. COLLISION PHASE

Play a game of Old Maid. The loser is held responsible for the Collision and gets -2 LP.

3. LIFEBOAT PHASE

Play a game of Fish. The winner gets the most people onto the Lifeboats and gets +3 LP.

4. HEROICS PHASE

Play a game of Rummy. The winner reveals the most Heroic moments and gets +4 LP.

5. SINKING PHASE

Play a game of Hearts. The loser experiences the most Horrific deaths and gets -5 LP.

6. LOCATION PHASE

Play a hand of Black Jack. The Best Hand finds the Wreck and gets +6 LP.

7. EXPLORATION PHASE

Play a game of War. The winner is the first able to properly explore the Wreck and gets +7 LP.

[Wikipedia](#)

Tlachtli

Introduction

Board & Card game for two players. Based on the Aztec sport of the same name.

Victory

The first player to score 4 points is the winner. The other player's team is sacrificed to the gods.

The Board

13 x 7 grid. Columns are long. Rows are short. Spaces 4-10 of the first and last columns are walled out.

Space 7 of the second column is one player's basket. Space 7 of the sixth column is the other player's basket.

Pieces

Use a pawn to represent the Ball. There are also 2 pawns to represent 2 Blockers.

The Deck

The deck contains 2 of each card described in the card list.

Setup

The ball begins in a corner space of the board The blockers are placed one in front of each basket. Players start with a hand of 7 cards. The oldest player goes first.

Card List

Card Name	Notes:
Action 1	You may play 1 move card this turn
Action 2	You may play 2 move cards this turn
Action 3	You may play 3 move cards this turn
Action 4	You may play 4 move cards this turn
Move 1	Move the ball or a blocker 1 space
Move 2	Move the ball or a blocker 2 spaces
Move 3	Move the ball or a blocker 3 spaces
Move 4	Move the ball or a blocker 4 spaces
Move 5	Move the ball or a blocker 5 spaces
Move 6	Move the ball or a blocker 6 spaces
Move 7	Move the ball or a blocker 7 spaces
Move K	Move the ball or a blocker like a knight in chess

You may not score on the first turn of the game.

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Action Phase
2. Move Phase
3. Draw Phase

Action Phase

Play zero, one, or more action cards. You may discard any cards from your hand you do not want.

Move Phase

Discard a move card to move a pawn. Pawns may move orthogonal or diagonal. Pawns may not move through other pawns.

You may make as many moves as indicated by the action cards you played.

Draw Phase

Draw cards from the deck to fill your hand to 7 cards. If the deck runs out, shuffle the discard and draw from it. Your hand is kept face up on the table for all to see.

Scoring

If you move the ball into your opponent's basket, you score one point. Your turn ends. Place the ball in a corner square.

Tlatelolco

Introduction

Tlatelolco was the great market for the Aztec Empire. The Aztecs had no coins; so all trade was by barter. Players are pochteca (merchants) trying to acquire certain goods.

Victory

Be the first player to acquire one unit of each of your six target goods.

The Board

Use a chess board. Merchant stands are located on the black squares. There are no stands in the corner squares or the center four squares.

The center four squares is the great temple.

Pawns

Each player has a pawn to represent their pochteca. There is also a thief pawn. Six sided dice are needed.

Counters

Counters represent goods available in the market. There are 2 sets of counters: The Sellers Set The Sellers Set contains one counter of each type described in the Goods counter list. The Buyers Set The Buyers Set contains two counters of each type described in the Goods counter list.

Setup

Each player places his pawn in a corner square. The thief pawn starts in a red space adjacent to the great temple. Each player draws one random counter from the Sellers set.

The player writes down the name of the trade good and returns the counter to the set. A player starts with 20 units of that type of good. (This is that players export good) Players then, in turn, each draw 6 counters from the sellers set, write down the item names, and Return the counters to the set. (redraw if you drew your export good) These six goods are the player's target goods. On each Merchant stand, place one random counter from the Sellers set.

Players roll high to see who goes first. On each Merchant stand, place two random counters from the Buyers set.

2d6

Player Turns & Moving

Players take turns. On your turn roll one die. You may move your pawn that many number of spaces.

Pawns cannot move into or through the Temple spaces or the thief pawn. Pawns may enter Black & Red spaces and spaces occupied by other players pawns. Pawns may move diagonally and orthogonally.

If you enter a Merchant stand space your turn automatically ends. If you end your move on a red space, roll on the red space roll table.

Trading

When you land on a merchant stand you may trade with it. The merchant only has one good to trade away (the seller counter) and will Only trade for two types of goods (the 2 buyer counters). Goods are traded on an equal unit for unit basis.

Write down what goods you have after trading. Stands never run out of their trade good, and their thirst for the other 2 goods never lessens.

The Thief

If you ever roll a 1 when moving your pawn, roll a second time. This second roll is the Thief roll. Move the thief exactly that number of spaces (if at all possible) in a straight line (orthogonal or diagonal). The thief does not stop for anything but the temple.

If the thief lands on an opponent's pawn that player loses 1 unit of any one good (your choice).

Player Trades

Players with pawns in the same space may trade freely.

Goods Counter List

Shells & Pearls Jade Pineapple Chocolate Turquoise Gold Silver Pottery Tobacco Bitumen Feathers Rubber Cotton Cloth Baskets Sandals Honey Turkeys Edible Dogs Spices Copper Skins Paper Jewelry Obsidian Corn Flour Red Dye Rabbits Sculptures

Red Space Roll Table

2	Gain one unit of a good from any adjacent merchant stand
3	Roll 1D6 and move again
4	Move opponent's pawn to any corner square
5	If adjacent to an opponents pawn do a forced trade
6	Roll 1D6 and move the thief
7	If adjacent to an opponents pawn do a forced trade
8	Roll 1D6 and move again
9	Move to any other Red Space
10	Roll 1D6 and move the thief
11	Move to a corner square and gain 1D6 units of your export good
12	Gain one unit of a good from any adjacent merchant stand

Forced Trade

(your choice).

Trade opponent one unit of any one of your goods
(your choice) for any one unit of any one of his goods

To Boldly Go

Introduction

Card Game for 2+ players. Star Trek theme.

Disclaimer

Star Trek is a licensed, copyrighted, trademarked property. This is merely a fan site.

Game Ending

The game ends when all Dilemmas have been solved.

Victory

The player with the most Victory Points (from solved Dilemmas in his Captains Log) is the winner.

The Decks

There are two decks, the Crew Deck, and the Dilemma Deck.

The Three Attributes

Cards will usually have scores in one or more of the following three attributes: Tactics, Science, and Negotiation.

Tactics represents skills & situations involving combat, firepower, strength, strategy, mobility, security, and surprise.

Science represents skills & situations involving logic, physics, engineering, medicine, chemistry and scientific methods.

Negotiation represents skills & situations involving diplomacy, communication, charisma, empathy, and humanity.

Crew Deck Cards

Crew cards represent crew-members, actions, and equipment. They are used to solve dilemmas.

Dilemma Cards

Each dilemma card represents one episode from the first season. Each card lists the levels in each of the three attributes needed to solve the dilemma. Each card has a VP value used to determine the winner at the end of the game.

Setup

Most knowledgeable Trekker goes first.

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Exploration Phase
2. Draw Phase
3. Mission Phase

Exploration Phase

Take the top card of the Dilemma Deck and put it face up in the center of the Table next to any already revealed Dilemma cards. If there are already 3 Dilemma cards face up in the middle of the table, skip this phase.

Draw Phase

Draw 2 cards from the Crew Deck. Discard one of these two cards, and keep the other one in your hand. Maximum hand size is 9 cards. Discard excess cards.

If the crew deck runs out, shuffle the discard and draw from it.

Mission Phase

If you can and you want to, discard crew cards to solve a target dilemma card. The crew cards discarded must, combined, have attribute levels equal to or exceeding the levels of the dilemma. Place the solved dilemma into a separate pile next to you called your Captains Log.

When solving a dilemma, you may play only one copy of a unique character. For example: you can play multiple red shirts, but only one Captain Kirk. You can only play one copy of an equipment or action card. (one Tricorder, not two.) You cannot play just equipment cards, at least one crewmember is required.

The Vulcan Mind Meld, Vulcan Nerve Pinch, and Vulcan Logic cards can only be played with Spock.

Special Cards

- Discard a Starbase card and your hand to skip Mission phase and draw 5 new cards.
- Discard a Shuttle card to draw 2 cards and put them in your hand.
- Discard a Scanner Reading card to draw a card and look at the next card in the Dilemma deck.
- Discard a Replicator card to draw a card then look at the next 7 cards in the Crew Deck.
- Discard a Beam me up card to take a crewmember card from the discard pile and put it in your hand.
- Discard a Warp Speed card to draw a card and take another turn.

- Discard a Prime Directive card to shuffle the current Dilemmas into the Dilemma deck.
- Discard a Space Time Anomaly to make target opponent discard three random cards.

Tournament

Introduction

Card game for 2 or more players. Simulates a Medieval Tournament complete with jousting, melees, etc.

Victory

Win the most Victory Points by the end of the game.

Game End

When there are no cards left in the deck the game ends. All players must play any Contest cards remaining in their hands. These final Contests are scored in the regular manner.

The Deck

Players share a common deck. There are 3 types of cards: Chivalry, Contest, and Special cards. Chivalry cards are further divided into 4 types: Knight, Weapon, Horse, and Shield. Each Chivalry card has a Force value of 1 to 10.

Cardset I

Most excellent cardset & Deck Randomizer by Sir Peter Cobcroft: [Click Here](#)

Cardset II

Beautiful Set courtesy of the distinguished artisan Alecrespi: [Click Here](#)

Setup

The most Chivalrous player goes first. Each player is dealt a hand of 7 cards.

Turn Sequence

Players take turns. Each turn has 4 phases: Draw Phase Play Phase Contest Phase Score Phase

Draw Phase

Draw the top card of the deck or discard. If the deck runs out the game ends.

Card List

Play Phase

You may put a Knight Combo into play. A Knight Combo consists of 1 of each of the 4 types of Chivalry cards: The force values of these cards do not have to match. A Combo represents a Knight, his Weapon, his Horse, and his Shield You may play special cards in this Phase.

Contest Phase

You may skip this phase or play a Contest card. The player with the highest score in the indicated category wins the Contest. For Example: You play the Melee Contest.

The player with the most Force points in Weapons wins. You have 3 combos with 3 weapons with a total Weapon point score of 15. Your 2 opponents have total scores of 11 and 6. You win.

In case of a tie the current active player wins. Contests cannot be played until after every player has had their first turn.

Score Phase

The winner of a Contest played last phase earns Victory Points (VP).

X Number of players. The winner gets X VP. Second place gets X-1 VP. Third place gets X-2 VP and so on.

Maximum hand size is 7 cards. Discard excess cards at the end of your turn.

Coat of Arms

Traders Of India

Introduction

Card Game for 2-4+ players. Depicts Trade and Commerce in Ancient India.

Game End

The game ends when the deck has been run through twice.

Victory

At the end of the game, the player with the most Points wins.

The Deck

Players share a common Deck. There are 5 Card Types:

- TP** Trading Partner
- EX** Export
- IM** Import
- YZ** Trade Mechanisms
- NU** Nuisance

Setup

Shuffle the Deck. Each player is dealt 6 Cards. The richest player goes first.

Turn Sequence

On your turn you may draw 3 cards from either the Deck or the Top of the Discard (or some from both

totaling 3). Keep 1 Card. Give 1 Card to the next player.

Discard 1 Card. Place 1 Card on either the Top or bottom of the Deck. If you have a Meld (Trade Mission) you may play it and score.

A Meld must contain: 1 Trading Partner 1 Trading Mechanism 2 Exports 2 Imports Score your Meld: Gain Points for Partner, Mechanism, and Import Cards. Lose points for Export cards. Keep track of your Score and running Total.

If you made a Meld, discard all those cards, and draw 6 new cards. Max 1 Meld per turn. The first time the deck runs out, shuffle the Discard and draw from it.

Nuisance cards are never part of a Meld.

Trafalgar

Introduction

2 Player card game. Inspired by the Naval Battle of Trafalgar October 21, 1805. One player controls the British Fleet commanded by Vice Admiral Nelson.

The other player controls a French/Spanish Allied Fleet commanded by Villeneuve.

Victory

The first player to win 3 hands wins the Battle.

The Deck

Players share a common deck. There are 4 Suites in the Deck: Strategy, Tactics, Morale, and Fighting Each Suite has 11 cards. In addition there are 2 Admiral cards for a total of 46 cards.

Turn Sequence

Each turn is divided into 4 Phases:

- Strategy Phase
- Tactics Phase
- Fight Phase
- Morale Phase

Strategy Phase

Each player is dealt 8 cards. If the deck ever runs out, shuffle the discard and draw from it.

Tactics Phase

Players may discard up to 4 cards and draw replacements.

Fight Phase

Players reveal their hands. A Hand may have up to 2 cards from each suite, and one Admiral card. Excess cards for a single suite are ignored.

Each player adds up the point values of all his playable cards to get a battle total. The player with the highest Battle Total wins the Hand. If tied, the hand is a draw.

Morale Phase

All cards from both players hands are discarded. Keep track of how many hands have been won by each player.

Card List Notation

- S** Strategy Card
- T** Tactics Card
- F** Fight Card
- M** Morale Card
- A** Admiral Card

Common Deck Card List

Card Name	Type	Points	Notes
Nelson	A	12	Can only be used by British Player
Villeneuve	A	12	Can only be used by French Player
Cut Enemy Line	S	11	
Timing	S	10	
Separate the Van	S	9	
Double the Rear	S	8	
Risky Approach	S	7	
Decisive Action	S	6	
Formation	S	5	
Blockade	S	4	Strongest opposing Tactics card Negated
Reserve	S	3	Strongest opposing Strategy card Negated
Melee	S	2	Can be used as a Fight card
Columns	S	1	Can be used as a Tactics card
Local Superiority	T	11	
Exploit Gap	T	10	

Card Name	Type	Points	Notes
Seamanship	T	9	
Ship Handling	T	8	
Signals	T	7	
Maneuver	T	6	
Lay a Course	T	5	
Favorable Winds	T	4	Can be used as a Strategy Card
Engage Closely	T	3	Your Fight Cards get +2 each
Come About	T	2	Your Strategy Cards get +2 each

Battle Progression Rules

In the first 2 turns, you cannot use Fight cards, however, you can Use up to 3 Strategy and Tactics

cards instead. After turn 5, you can use up to 3 Fight cards.

Transcontinental

Introduction

Theme: Building of the Transcontinental Railroad. One Player is the Union Pacific (UP). The other Player is the Central Pacific (CP).

Players race to be the first get to Promontory Summit.

Victory

The first player with 100 or more Railroad Markers (RRM) wins.

Railroad Markers

Use Poker Chips as Railroad Markers (RRM)

The Deck

Players share a Common deck. There are 7 Main Suites and 1 Minor Suite. Each Major Suite has 10 cards ranked 1-10.

The Minor Suite has 7 cards with no rankings. The deck is kept face-down. The discard is kept face-up.

Major Suites:

1. Jobs
2. Money
3. Towns
4. Ethnicities
5. Supplies
6. Work
7. Labor

The Minor Suite cards are called Difficulty Cards. Difficulty cards serve no purpose other than to occupy space in your hand.

Setup

Determine who is the Central Pacific Player (CPP). The other player is the Union Pacific Player (UPP) Shuffle the deck. Each player is dealt 10 cards.

Cards	RRM
3	1
4	2
5	4
6	8

Camp Phase

If you made a Meld this turn, draw cards from the deck to fill your hand to 10 cards.

Surveyor Phase

You may discard up to 5 Cards from your hand.

Turn Sequence

Players take turns. The Central Pacific Player goes first. Each turn has 5 Phases:

1. Planning Phase
2. Work Phase
3. Camp Phase
4. Surveyors Phase
5. Logistics Phase

Planning Phase

Draw 1 Card from the top of the deck or the discard. You may not draw a card from the discard 2 turns in a row. If the deck ever runs out, shuffle the discard and draw from it.

Work Phase

You may play 1 or more Melds from your hand. There are 4 types of Melds:

1. Track Meld
2. Surplus Meld
3. Rail Meld
4. Line Meld

A Rail Meld is 4 or more cards in Rank order (of any Suite). (Example: 3,4,5,6 or 5,6,7,8,9) A Line Meld is 4 or more cards of the same Main Suite (of any Rank). (Example: 4 Town Cards, or 7 Labor Cards) A Track Meld is 5 or more cards of different Suites (of any Rank).

A Surplus Meld is 3 or more cards of the same Rank (of any Suites). Having 4 or more cards of the same Suite in Rank order is called a Rail Line. A Rail Line Meld scores double RRM The Minor Suite cannot be used to make Melds.

Melds earn Railroad Markers (RRM) according to their size:

Cards	RRM
7	12
8	16
9	20
10	25

Logistics Phase

Max hand size is 10 cards. Discard excess cards.

Transformers Skirmish

Introduction

Board & card game for 2 players. Takes place in the Transformers Universe. One player is the Autobots, the other is the Deceptacons.

Each figure represents one Transformer Robot.

Disclaimer

'Transformers' is a copyrighted/trademarked property. This is just a fan site.

Victory

Destroy all opposing Transformers.

The Map

Use an 8x8 chessboard.

The Mechs

Use chits or miniatures to represent Transformers.

Auto Bots Unit Table

Unit Name	#	Hits
Optimus Prime	1	4
Red Alert	1	3
Hot Shot	1	3
Autobots	5	2

Number of that type of unit each player has in setup.

Deceptacons Unit Table

Unit Name	#	Hits
Megatron	1	4
Star Scream	1	3
Demolisher	1	3
Deceptacons	5	2

Setup

Each player places one unit on each square of his back row. Units may not stack.

Minicons

You may designate four of your mechs as having attached Minicons. A Transformer may only have one Minicon attached. Transformers with Minicons have +1 Hits and can use certain action cards.

Ground & Air

There are 2 types of Transformers: ground and air. Designate 4 of your Transformers as being air types, and 4 as ground types. Air types convert into jets or helicopters.

Ground types convert into tanks or trucks. Different types can use different action cards.

The Cards

Players share a common Action deck.

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Orders Phase
2. Move Phase
3. Fire Phase

Orders Phase

Draw 3 cards. If the deck runs out, shuffle the discard and draw from it. Max hand size = 5 cards.

Discard excess cards.

Move Phase

Play (discard) a Move card to move one of your units. Units cannot move through other units except for Flying units. The move card has a number.

This is the number of spaces the unit moves. The Unit tables list what type of Move cards each unit can use. Moves are diagonal or orthogonal.

Instead of moving just one unit in any direction, you have the option of moving one or more units forward the indicated number of spaces using a single move card.

Fire Phase

Play (discard) an Attack card to have a unit attack. The attack card has a number. This is the range of the attack.

Attacks are diagonal or orthogonal. The enemy unit that is the target of the attack takes 1 point of damage. A unit reduced to zero hits is destroyed and is removed from the map.

Units cannot attack through other units. A player may discard a Defense card to completely negate an attack.

Card List Notation**M** Movement**A** Attack**D** Defense**X** Special**Type** Purpose of card

Number of that type of card in the deck

Card List

Card Name:	#	Range	Type	Notes
Legs	8	1	M

Traveler 1800

Introduction

Character Generation system for Napoleonic based on The old Traveler chargen system of promotion and mustering out. This rule-set is specific for Naval Officer

Character Stats

Stat	Abbreviation
Strength	Str
Dexterity	Dex
Endurance	End

Beginning Stats

Each player starts with 2D6 in each Stat and 2 rolls on the Boyhood Skill Table. All Players going on this Officers Track have a Minimum Soc = 8.

Terms

Each Term of Service is 1 year long.

Rank Table

Rank	MAR	PRR	Command
Volunteer	11	-	
Midshipman	15	7+	
Lieutenant	19	12+	
Master & Commander	-	13+	Sloop
Post Captain	-	14+	6th Rate
Frigate Captain	-	13+	5-4th Rate

MAR Minimum Age Requirement

PRR Promotion Roll Requirement

Term Sequence Of Events

- Age Phase
- Promotion Phase
- Post Phase
- Service Phase
- Action Phase
- Event Phase
- Seniority Phase

Age Phase

The Characters age increases by 1 year.

Characters.

Dice

The favored Die is the good old Six Sider.

Starting Age

Roll 1D6 for starting Age:

#	Result
1-3	11 years old
4-6	12 years old

Sex

All Characters are Male.

Rank	MAR	PRR	Command
Senior Captain	30	13+	3-2nd Rate
Flag Captain	-	14+	2-1st Rate
Rear Admiral	40	10+	
Vice Admiral	-	10+	
Admiral	-	10+	

Promotion Phase

The Character rolls 2D6 to see if he is promoted. Consult the Rank table for Target Number. Add Seniority and Merit Bonuses.

Get +1 to the Roll for a Soc of 11 or greater. If the Character is promoted, he loses all accumulated Seniority and Merit Bonuses. If a Lieutenant has Merits +5 or more there is 33% change that when he is promoted, he will become a Post-Captain and not a Master & Commander.

Post Phase

The Character rolls on the Post Table for his Rank to see what kind of Ship he is assigned. If a Character was not promoted this turn, and his Post Roll is the same, there is a 50% chance he remains on the same ship.

Service Phase

The Character rolls on the Service Table to see what kind of duty he is to perform.

Action Phase

The Character rolls on the Action Table to see if he took part in any Naval Battles.

Event Phase

The Character rolls on the Event Table to see if his any special Events befell him.

Boyhood Skill Table

#	Descr
1	Physical Skill Table
2	Mental Skill Table
3	Reserve Skill Table

Players start knowing Language (English) at Level = 3. The other main Languages to be learned are French & Spanish.

Volunteer Post Table

#	Descr
1-3	Naval College
4	Unrated Ship

Game Designers Notes

This can be played as a Solo game: Keep track of Prizes, Engagements fought, and Total Merits recieved as well as Rank. Be sure to name the Ships you are

posted to. This Track is specific to the British Navy.
Still need to work on Admiral Postings, Pay and Prize Monies, Social Scale and other details for more advanced play.

Refference

- Books and Films:
- Horatio Hornblower Series
 - Master and Commander
 - The Illustrated Companion to Nelson’s Navy
 - The World of Jack Aubrey
 - Naval Warfare in the Age of Sail

Traveler Traders

A solo card and dice game of trading in the imperium
By C Gerard Luft

Introduction

In this one player game you play the Captain and crew of the FREE TRADER BEOWULF. The Goal is to profit 73 Mega Credits (i.e., 73,000,000Credits), which is just enough to but a SUBSIDIZED LINER and become a Merchant Prince. But in the 1350th year of the GALACTIC EMPIRE, this great utopian civilization of Humanity is far from civilized. Trading in the Spinward Marches Sector, even close to its ducal capital

Trader Card List

CARD NAME	POWER
Captain	3
1st Officer	2
2nd Officer	1

REGINA, can still be dangerous.

Set Up

You will need to make three decks of cards: TRADER DECK (which you start with all five cards of), ENCOUNTER DECK, MERCHANDISE DECK, and STARSHIP DECK. You will also need some six sided dice (d6). You begin with all the cards from the TRADER DECK: FREE TRADER BEOWULF, CAPTAIN, FIRST OFFICER, SECOND OFFICER, and THIRD OFFICER.

Players begin with 1,000,000Cr at the start of the game to purchase their first cargo.

Buy And Sell! Round Purchase Prospecting Turn

You must first find merchandise to buy, so you can sell it at the next planet for profit (The game begins on the PLANET REGINA). You obtain merchandise from a PATRON. Draw cards from the ENCOUNTER DECK until you draw a PATRON CARD.

First Combat Turn

All the cards you drew before reaching the PATRON you must battle (Space Ports can be a dangerous place). Your Captain and Crew may battle one card at a time, unless more than one of like cards are drawn. In that case they battle together. If the ENCOUNTER DECK runs out, reshuffle its Discard Pile.

" ENCOUNTERS ATTACK FIRST: The each opponent chooses a target. They select targets in the following pattern: CAPTAIN, 1ST OFFICER, 2ND OFFICER and 3RD

Officer.

" Each OPPONENT rolls 4d6 and adds its POWER to the roll. The CAPTAIN OR CREW who is targeted rolls 4d6 and adds their power to the total. If the ATTACKER'S score is greater than the DEFENDER'S score, then the defender is defeated (and dying; blasters (Fusion Pulse Guns) cause a lot of damage). If the 3RD OFFICER is present and active at that point of the battle, he can stabilize that officer's

wounds, and prevent him from being defeated (dying; though he is inactive for 1 week, which is explained below).

" The surviving CAPTAIN and CREW may now be the attackers. Each Crew surviving and present targets one opponent (They may choose to attack the same opponent as well). The ATTACKERS roll 4d6 and add their POWER to the roll. The DEFENDERS roll 4d6 and add their POWER to the roll. If the ATTACKER'S modified rolls are greater that the DEFENDER'S modified rolls, that the target hit is defeated.

" If opponents remain, then the COMBAT TURN is repeated until all the opponents in that battle are defeated, or the CAPTAIN and CREW are defeated (at which time the game is over).

" DEFEATED CHARACTERS: OPPONENTS are discarded and defeated CAPTAIN or OFFICER is removed from the game. If both the CAPTAIN and 1ST OFFICER are removed, then the game is over.

" INACTIVE CHARACTERS: Characters who were defeated but saved by the 3rd Officer are inactive. The other Officers may still deal with the PATRON. If the CAPTAIN and his 1ST OFFICER are both inactive then there is no one to pilot the FREE TRADER. The surviving Officers are effectively grounded.

" HEALING: An Inactive Character becomes active again when they reach planet fall on the next planet. If the FREE TRADER is grounded, then the CAPTAIN and 1ST OFFICER are active again after the player draws 7 more ENCOUNTER CARDS (repeating the COMBAT TURN if necessary).

Encounter Card List

CARD NAME	# IN DECK	POWER
Patron	4	-
Bounty Hunter	4	1
Space Pirate	4	2
Vagyr Space Pirate	4	2

Purchase Turn

After all the OPPONENTS are defeated, the surviving and present officers may conduct the deal with the PATRON. Draw a card from the MERCHANDISE DECK. This is the merchandise available. Using the two tables below, roll a 4d6. Subtract from the roll the POWER of the highest officer present. Multiply this by the BASE PRICE OF THE MERCHANDISE. This is the price the

CARD NAME	# IN DECK	POWER
Imperial Army Soldier	2	3
Mercenary	2	3
Imperial Marine	1	4
Zodani Invader	1	4

PATRON requires for the merchandise.

If you do not have enough Credits for the merchandise, or the price is too much to pay, then draw cards from the encounter deck to find a new PATRON and battle any OPPONENTS drawn.

Merchandise Card List

Merchandise Card Base Price

Space Turn

The Beowulf has a HYPERSPACE JUMP FACTOR of 1, so its path through the subsector is limited. Below is a text flow chart of the Hyperspace Jump course of your Ship.

regina -> helfry -> forboldn -> knorbes -> whango -> uake -> efate -> alell -> whango -> knorbes -> forboldn -> helfry -> regina

It is easy cruising at sublight maneuver speed out of a system you have been at a week, and making the Hyperspace Jump to your next destination. The tricky part is exiting Hyperspace into the next system's space. Bounty hunters, mercenaries and space pirates could be waiting for you (and they probably will). So when coming out of Hyperspace into the next system, you

must draw one card from the STARSHIP DECK and battle it.

" You have a "souped up" Free Trader and a 1st Officer with a keen eye, so you get to attack first in space. Roll 4d6 and add the Beowulf's POWER to the roll. Then roll for the opponent's ship and add their POWER to the roll. If your modified roll is higher than their modified roll, you cause one hit to their ship.

" Now the step above is repeated with the opponent's ship as the attacker and the Beowulf as the defender.

" DAMAGE: On the first hit received the ship is sided (rotated 90 degrees) and receives a -1 to POWER.. On the second hit received the ship is inversed and receives -2 to its POWER. On the third hit received it is

dead in space and defeated. If the Beowulf is defeated, then the game is over.

" REPAIRS: OPPONENT ships repair 1 hit if they do not receive any damage for three consecutive turns. If the 2ND OFFICER is active and present, the Be-

owulf repairs 1 hit if it does not receive any damage for two consecutive turns (because your 2nd Officer is a top class engineer)! If the 2nd Officer is inactive or defeated, the Beowulf has no one to repair her.

Starship Deck

CARD NAME	# IN DECK	POWER
FIGHTER (IMPERIAL NAVY)	4	0
SCOUTSHIP (BOUNTY HUNTER)	4	0
FREE TRADER (SPACE PIRATES)	4	1
SUBSIDIZED MERCHANT (PIRATES)	4	2
PATROL CRUISER (IMPERIAL NAVY)	1	3
PATROL CRUISER (VAGYR SPACE PIRATES)	1	3
PATROL CRUISER (ZODANI INVADERS)	1	3
MERCENARY CRUISER	1	4

Sale Propecting Turn

The PURCHASE PROSPECT TURN is repeated, except now you are looking for a PATRON to buy the merchandise off of you.

Second Combat Turn

This is the same as the FIRST COMBAT TURN except you are now on another planet.

Sale Turn

This is the same as the PURCHASE TURN except when you roll the 4d6 to figure the actual price the PATRON will BUY this merchandise from you you ADD the POWER of the highest ranking officer present (the higher the more the profit).

All Succeeding Buy And Sell! Rounds

After selling your merchandise it is time to repeat the turns sequence starting on this next planet (HELFRY if this is your SECOND ROUND).

Winning

You win when you accumulate 73MCr. Then its time to get a big ship and build your Merchantile Principality.

themegannnddoctor@aol.com

Traveller Merchant Prince An Expansion To Traveller Traders Introduction

You've got a SUBSIDIZED LINER and you are now a MASTER TRADER. It's time to build your MERCHANTILE PRINCIPALITY

Card Decks

You have a SUBSIDIZED MERCHANT (with a POWER of 3 instead of 2) . And you will not need a MERCHANDISE DECK (people are coming to you now to cart around their cargo). And you will not need the ENCOUNTER DECK (no need to leave the comfort of your new Captain's Cabin between HYPERSPACE JUMPS).

Round Sequence

Hyperspace Jump Turn

Each Round you receive 873,000 Cr for middle passage and low passage accomidations and 200 tons of cargo transport to the next planet. Leaving the star system you are at at sublight speed and making the Jump to Hyperspace is uneventful. But when coming out of Hyperspace into the destination system's space, you must draw 1 card from the STARSHIP CARD DECK (no changes to this deck)

Space Combat Turn

This is done exactly as it is in TRAVELLER TRADERS.

This Simplified round is repeated for each Jump to a new system. If you want to expand beyond the course plotted above (which is limited to the Regine Subsector) you can adapt other maps of the SPINWARD MARCHES for your course. Because you still have a HYPERSPACE JUMP FACTOR of only 1, and because Subsidized Liners gain more profit with parsec to parsec transport, the coure you set should be between star systems one parsec from each other. Try it! It's a beautiful senic route around this corner of the Imperium.

Winning

You win when you have accumulated another 73 MCr (time to build a merchant fleet).

Traveler Traders Revised

A solo card and dice game of trading in the imperium. NOTE: This is a revision of a game initially designed by C. Gerard Luft. This game uses names, ideas and concepts of the Traveller game systems.

This is a fan homage to the decades of enjoyment we've all garnered from Traveller's various incarnations. No violation of or threat to any copyrighted material is intended.

INTRODUCTION: YOU are the Officers (collectively, "The Crew") of the good ship FREE TRADER BEOWULF. Your Goal is to ship enough cargo from world-to-world to amass a profit of 73 Megacredits(73,000,000 Credits); to buy a SUBSIDIZED LINER and become a Merchant Prince. But, here in the 1350th year of the

GALACTIC EMPIRE, this great utopian civilization of Humanity is far from civilized. Trading in the Spinward Marches Sector, even close to its ducal capital REGINA, can still be dangerous. You must find Patrons from whom you can buy low, and to whom you can sell high, all the while avoiding strong-arm robbery in the back alleys of seedy spaceports, corrupt officials who use their badges of authority to mask itchy trigger fingers, and outright space pirates.

COMPONENTS NEEDED: The three decks of cards - TRADER, ENCOUNTER, STARSHIP; some six-sided dice (D6); scratch paper, pen/pencil, calculator (for those of us who REALLY hated learning those multiplication tables back in fourth grade)

TRADER CARD DECK		-	ENCOUNTER CARD DECK		-
CARD NAME	POWER		CARD NAME	# IN DECK	POWER
Captain	3		Patron	4	n/a
1st Officer	2		Street Thug	4	1
2nd Officer	1		Bounty Hunter	4	2
3rd Officer	0		Vagyr	4	2
Free Trader Beowulf	2		Imperial Soldier	2	3
	-		Mercenary	2	3
	-		Imperial Marine	1	4
	-		Zodani Invader	1	4

Starship Deck

CARD NAME	# IN DECK	POWER
System Customs Cutter	4	0
Bounty Hunter Scoutship	4	0
Free Trader (Pirates)	4	1
Subsidized Merchant (Pirates)	4	2
Imperial Navy Patrol Cruiser	1	3
Vagyr Space Pirate Cruiser	1	3
Zodani Invaders Cruiser	1	3
Mercenary Cruiser	1	4

Set-up

Spread the TRADER CARD DECK out, face-up in front of you. Put the other two decks face-down in easy reach. BEOWULF starts on the planet REGINA, The Crew must fight past hostile encounters to purchase the first cargo, ship it to the next planet in the sector past space pirates, sell it off buy another, ship it to the next planet to sell, etc. The game ends victoriously when you've acquired 73 MegaCredits(MC). The game ends in defeat if the Crew are all killed in a spaceport encounter or the ship is destroyed in a space battle.

Turns

have Seven Phases in this Order: (1)FINDING A PATRON; (2)PLANETFALL ENCOUNTER; (3)BUY MERCHANDISE; (4)SPACEFLIGHT ENCOUNTER; (5)FINDING A PATRON; (6)PLANETFALL ENCOUNTER; (7)SELL MERCHANDISE. The combined Phases of FINDING A PATRON then a PLANETFALL ENCOUNTER then BUY/SELL MERCHANDISE are presumed to take a week. SPACEFLIGHT ENCOUNTER Phase is whatever indeterminate time it takes to make one hyperspace jump and fight past enemy starships to your next plan-

etfall.

(1)FINDING A PATRON: You must first find merchandise to buy. You buy from a Patron. Draw cards from the ENCOUNTER DECK, laying them in order drawn face-up in front of you, until you draw a PATRON CARD.

(2)PLANETFALL ENCOUNTER: If the very first card you draw is a PATRON CARD, then you skip this Phase. Otherwise, you must encounter all cards you drew before the PATRON (Space Ports can be a dangerous place). Each villain in turn will assault one of The Crew. If there happens to be more than one of the same type ENCOUNTER CARD laid out, those villains will gang-up on the targeted TRADER CARD; the player has the option to put an equal number of The Crew in that fight.

a) First ENCOUNTER CARD targets the next highest ranking member of The Crew who has not just previously been attacked in this PLANETFALL ENCOUNTER: CAPTAIN, 1ST OFFICER, 2ND OFFICER, 3RD OFFICER.

b) Roll 4D6 and add POWER of that ENCOUNTER CARD (or CARDS if there is more than one of the same ENCOUNTER CARD). That member of The Crew defends himself: roll 4D6 and add POWER of that TRADER CARD (or CARDS if the attack was by more than one of the same type of ENCOUNTER CARD and the player elects to have that many more of The Crew helping defend the targeted one). If the 4D6+POWER of the ENCOUNTER CARD is higher than the 4D6+POWER of the TRADER CARD, that member of The Crew is badly wounded and becomes inactive(Fusion Pulse Guns do a LOT of damage!). Turn that TRADER CARD face-down.

c) If the 3RD OFFICER, a talented physician, is present and active, he can immediately first-aid to stabilize the wounded, inactive officer, who will be Recuperating for one week. If THIRD OFFICER absent or inactive, then the wounded member of the CREW is so badly hurt they must remain on that planet, in intensive care at advanced lifesupport facility, until BEOWULF returns at which time that member is fully active and can freely rejoin The Crew. Set that TRADER CARD aside.

i) Cost of advanced lifesupport is .1 Megacredits, payable in advance.

ii) If The Crew can't or won't pay for this, that member of The Crew succumbs to his wounds and is permanently removed from the game.

iii) If both CAPTAIN and FIRST OFFICER are rendered inactive and there is no 3RD OFFICER present to render first-aid, then there's nobody who can authorize or pay for advanced lifesupport, continue to seek Patrons, or fly the ship. The Crew disbands, and the game is over.

d) After each attack on a TRADER CARD, The Crew can retaliate against whoever attacked them. If the officer attacked is still active - was not wounded by the attacking ENCOUNTER - roll 4D6+POWER of that TRADER CARD and 4D6+POWER of that ENCOUNTER CARD. If sum of the former is higher than the latter,

the Villain is dispatched, ENCOUNTER CARD goes to discard.

i) An inactive officer may not retaliate.

ii) The next highest ranking officer active may do so at the player's option.

iii) If all The Crew is inactive at the same time the game is over.

e) PLANETFALL ENCOUNTER is repeated, as long as there are active TRADER CARDS until all the ENCOUNTER CARDS that were drawn before The Patron have been defeated. When the ENCOUNTER DECK is used up, shuffle and re-use the discards.

(3) BUY MERCHANDISE: The Crew now buys what the Patron has to sell. Roll 2D6 on the MERCHANDISE TABLE to find type and base price of Merchandise available, and 4D6 on the MARKET PRICE TABLE for final price of that Merchandise.

a) POWER of highest rank Officer active is subtracted from MARKET PRICE TABLE roll.

b) If price of merchandise exceeds amount of Credits you have, or you hope to get a better deal, The Crew must seek another Patron by repeating Turns (1) & (2).

c) On the very first BUY MERCHANDISE TURN only, presume The Crew already had pooled their existing assets to come up with exactly enough Credits to buy what is offered by that first Patron.

i) If there is an inactive Officer, who did not receive advanced first aid from the 3RD OFFICER, on this first turn, there will then be insufficient funds for an advanced lifesupport facility, and that Officer(s) is removed from the game.

ii) Note that FREE TRADER BEOWULF can be flown by either CAPTAIN or FIRST OFFICER, and the game may continue with just that one Officer.

d) REPLACEMENTS: On any BUY MERCHANDISE TURN, except the very first on REGINA, if The Crew has sufficient funds after buying the Merchandise, they may hire a Replacement for anyone who was left in advanced lifesupport on another planet, or anyone removed from the game.

i) There are always down-on-their-luck spacers at every port. The Replacement(s) is considered to have been found just after buying Merchandise, during the week that the first three Phases occur.

ii) Cost is:

- THIRD OFFICER = .15 MC
- SECOND OFFICER = .2 MC
- FIRST OFFICER = .25 MC
- CAPTAIN = .3 MC

iii) Experience and Quality of Replacements may vary. Roll D6. On 1-2 that Officer has 1 less POWER, on 3-5 the same, on 6 one more than noted on the TRADER CARD DECK list.

iv) The highest ranking Officer active, if of higher rank than the Replacement being recruited, may add the difference, between his POWER and the listed POWER for the rank being sought, to the D6 roll.

v) If Replacement was for an Officer left in advanced lifesupport on another planet, when FREE TRADER BEOWULF calls there again the player may choose either the original or replacement of that rank to remain

aboard. The other is considered paid off and leaves the ship with no hard feelings. (Maybe that's where Replacements come from for other Free Traders?)

e) **RECUPERATING:** Inactive Officers who received first-aid from the **THIRD OFFICER** are considered Active at the end of the next **SPACEFLIGHT ENCOUNTER COMBAT** Phase.

i) If both **CAPTAIN** and **FIRST OFFICER** are in this situation, take-off is delayed an additional week. Cost of the layover is .1 MC

ii) One, but not both, are considered Active at the end of this week, and can participate in the next **SPACEFLIGHT ENCOUNTER COMBAT** Phase. Roll D6: 1-3 **CAPTAIN**, 4-6 **FIRST OFFICER**. Other considered Active at end of next **SPACEFLIGHT ENCOUNTER COMBAT** Phase.

iii) If this is the first turn, and/or there isn't .1MC remaining after the **BUY MERCHANDISE** Phase, The Crew can't afford to go on, disbands, and the game is over.

MERCHANDISE	TABLE	-	MARKET PRICE	TABLE	-
2D6	MERCHANDISE	BASE PRICE	PLANET**	4D6	MULTI
2	Luxury Items	2.8 MC	-	4	2
3	Machinery	1.0 MC	Forboldn	5	3
4	Clothing	.55 MC	Knorbes	6	4
5	Robotics	.11 MC	Whango	7	5
6	Miscellaneous	.07 MC	Uake	8	6
7	Foods	.07 MC	Efate	9	7
8	Weapons	.4 MC	Alell	10	8
9	Rare Metals	.75 MC	Regina	11	9
10	Synthetics	2.0 MC	Helfey	12-16	10
11	Gravitics	3.5 MC	-	17	11
12	Medicine	8.5 MC	-	18	12
-	-	-	-	19	13
-	-	-	-	20	14
-	-	-	-	21	15
-	-	-	-	22	16
-	-	-	-	23	17
-	-	-	-	24	18

** The indicated Merchandise may not be sold on the indicated Planet, enough is already produced on there. If that happens to be the next port-of-call, skip it and instead conduct two **SPACEFLIGHT ENCOUNTER COMBAT** Phases.

(4) **SPACEFLIGHT ENCOUNTER COMBAT:** The Beowulf has a **HYPERSPACE JUMP FACTOR** of 1, its path from planet-to-planet through this Sector is: **REGINA** -> **HELFRY** -> **FORBOLDN** -> **KNORBES** -> **WHANGO** -> **UAKE** -> **EFATE** -> **ALELL** -> **WHANGO** -> **KNORBES** -> **FORBOLDN** -> **HELFRY** -> **REGINA**

a) The Hyperspace Jump takes no appreciable sidreal time, ships cannot be detected or attacked, cannot communicate or scan, while making the Jump.

b) The tricky part is exiting the Hyperspace Jump into the next system in which you want to make planetfall. Villains lurk behind asteroids and gas clouds, or come as "customs inspectors" in every solar system. Luckily, space is vast so you'll encounter them one-at-a-time. Shuffle **STARSHIP DECK** for each Encounter.

c) Draw the top card from the **STARSHIP DECK** and battle it.

d) **FREE TRADER BEOWULF** is augmented with the latest armament and fire control The Crew could afford, and fires first IF the keen-eyed **FIRST OFFICER** is Active.

i) Roll 4D6 + **BEOWULF's POWER** of 2. Roll 4d6 +

STARSHIP DECK CARD's POWER. If the total for **BEOWULF** is higher, one Hit is inflicted on the opponent.

ii) Repeat. If total for **BEOWULF** is lower, one Hit is inflicted on it.

iii) If **FIRST OFFICER** not present or Active, reverse previous two steps and let the Opponent fire first.

iv) Continue the battle in space until one or another has taken Three Hits.

e) **DAMAGE:** Hits reduce **POWER** for the remainder of that conflict unless/until Repaired.

i) On the first Hit taken by a ship, indicate by rotating the Card 90 degrees. That ship is at -1 **POWER** unless/until Repaired.

ii) Second Hit received, indicate by rotating it the Card 180 degrees. That ship is at -2 **POWER** unless/until Repaired.

iii) On the third Hit that ship is immediately destroyed with all hands. If **BEOWULF** then the game is over. If opponent from the **STARSHIP DECK**, The Crew may now make planetfall and go on to next Phase.

f) **REPAIRS:** Opponents from the **STARSHIP DECK** repair 1 Hit if they do not receive any Hits for three consecutive shots from **BEOWULF**. If the **2ND OFFICER**, a top class engineer, is active and present, **BEOWULF** repairs 1 Hit if it does not receive any Hits for two consecutive shots from that Opponent.

i) If **SECOND OFFICER** not active or present, **BE-**

OWULF cannot be repaired unless and until it defeats the Opponent.

ii) If BEOWULF survives the SPACEFLIGHT ENCOUNTER it may be repaired during the week spent selling/buying on this Planet, at a cost of .1 MC per Hit. If there are insufficient funds, or the player chooses not, to do so, the ship may continue in play at reduced POWER rating, and may be repaired anytime later at any port-of-call after a SPACEFLIGHT ENCOUNTER at that cost of .1 MC per Hit.

(5) FINDING A PATRON: This Phase is the same as the previous FINDING A PATRON phase.

(6) PLANETFALL ENCOUNTER: This Phase is the same as the previous PLANETFALL ENCOUNTER Phase.

(7) SELL MERCHANDISE: This Phase is the same as BUY MERCHANDISE except that there is no need

to roll 2D6 on the MERCHANDISE TABLE, and the POWER of the highest ranking Active Officer present is added to the MARKET PRICE TABLE 4D6 roll. After the 4D6 roll, if you think the price is too low, the Patron's offer may be rejected, and repeat Phases (5) & (6). If you reject an offer and seek a new Patron more than once in this Phase, must also pay layover cost of .1 MC for each additional time you do this. If sales price of the Merchandise plus any accumulated Credits from previous sales is as high as 73 MC, The Crew has enough money to purchase a SUBSIDIZED LINER and you win the game. If you have not acquired enough Credits: keep track of the Credits you do have; start a new turn at (1) FINDING A PATRON; pay any desired or necessary costs for advanced lifesupport, replacement crew members, repairs, or layover; the game continues.

Treasure Hunter

Introduction

Card game. Adventuring parties compete to claim the most treasure.

Object

After going through the deck once, the player with the most treasure points wins the game.

The Cards

Players will have to make the cards, about 140+ in all. The card title is required but text is optional. Players can always refer to the rules for the card text.

Illustrations are highly recommended. Players will also need two six sided dice (2D6).

Setup

Shuffle the deck. Each player draws 7 cards. Roll high on 1D6 to determine turn order.

Turn Sequence

Players take turns. The player whose turn it is, is the active player. Each turn has 5 phases: 1 Draw phase 2 Recruit phase 3 Adventure phase 4 Recovery phase 5 Discard phase

Draw Phase

Active Player draws 3 cards.

Recruit Phase

The player may play any Heroes in his hand to his 'Adventuring Party'. The party may contain up to 4 Heroes. Heroes in the party are placed face up on the table. They are in play.

Magic items may be attached to heroes that can use them. Heroes can receive the benefit of only one weapon at a time. Excess magic items may be carried.

Heroes may exchange magic items but not spells. Spell cards may be attached face down to mages, priests and heroes with spell levels. A Hero can attach a number of spell cards equal to his spell level.

Each player also has a treasure pile separate from the party.

Adventure Phase

The active player may pass or declare that he is going adventuring. To conduct an adventure a player must have a party with at least one hero. All Heroes in the party must go.

The active player plays a Location card face up and 1 Treasure card face down under it. Any opposing player may play one guardian card, face up, on top of the location card. If an opponent does not play a guardian, the active player gets to put the Treasure in his treasure pile.

If a guardian is played determine the Guardian value. The guardian value is equal to: The Guardians CBT (Combat) score + Location bonuses + 2D6. Any opponent may play appropriate event cards to increase the Guardian value. If the Guardian is a mage or priest any opponent may discard a spell card from his hand to give the Guardian +1D6 CBT.

Compare the guardian value to the party value. The party value is equal to: The CBT (Combat) score of all Heroes + special bonuses + 2D6. The active player may play appropriate event cards to increase the Party value. Spell casting heroes may each play one of their attached spells.

Events & Spells are discarded as soon as they are used unless otherwise specified. Some spells and events cause the party to retreat. A retreating party suffers no damage, but the treasure is discarded.

If the Guardian value is greater than the Party value, the treasure is discarded and the party receives 1D6 hits distributed by the active player. Any Hero reduced to 0 (or less) Hits is killed (discarded). A Hero cannot be given more hits than will reduce him to 0 unless the hero has Martyr ability.

If the Guardian value is equal or less than the Party value, the party keeps the treasure and the party receives only (1D6 - 3) hits. After resolution of the adventure discard the Location and guardian cards. Magic items may be recovered from dead heroes by surviving party members only if the party won the adventure.

Recovery Phase

All Heroes in active players party heal one Hit point of Damage.

Discard Phase

From the Party, the player may discard heroes, magic items, and spells. A player must discard down to 7 cards in his hand.

Hero Cards

29 Sorcerer	10	Mage, Singular
30 Chaos Knight	12	Fighter, Singular, Demon, weapons
31 Djinn	14	Flying, Spirit, Mage, Desert

Regenerating guardians must be defeated twice in a row.

from a disease guardian are CBT-2 until they are completely healed.

Poison & Disease

Any hero receiving damage from a poison guardian is automatically killed. Heroes that received damage

Treasure Cards

The treasure must be in the players treasure pile to have effect

TYPE	NOTES
1 Gold & Silver coins	Worth 2 Treasures
2 Golden Goose	Draw +1 card per turn
3 Dragons Hoard	Worth 3 Treasures
4 Cornucopia	Draw +1 card per turn
5 Philosophers Stone	Hand size +1

TYPE	NOTES
6 Living Harp	All your Heroes CBT +1
7 Pandoras Box	May be opened once per game to shuffle discard pile into deck
8 Flawless Gems	Worth 2 Treasures
9 Holy Icon	All your priests +1 Spell
10 Kings Crown	Party may have 5 Heroes
11 Ancient Tome	All your mages +1 Spell
12 Unicorn Horn	Hand size +1
13 Magic Tapestry	Look at opponents hand during your recruit phase
14 Rescue Princess	All your Heroes CBT +1
15 Enchanted Goblet	One Hero in recovery phase may drink from it to be fully healed

Event Cards

TYPE	NOTES
1 Theft	If your party contains a thief, steal one of opponents treasures. Put it in your pile. Play in your recruit phase.
2 Pilfer	If your party contains a thief, steal one of opponents magic items. Play in your recruit phase.
3 Ambush	Guardian +4 CBT.
4 Fight another Day	Your Party retreats.
5 Happy Hunting	Take an extra Adventure phase this turn. Play after first adventure phase.
6 Lost	Your opponent may not adventure this turn. Play in his recruit phase.
7 Spy	If your party contains a thief or scout, Look at opponents

hand & discard one of his cards; Play in recruit phase.

8 Tavern	rest at Inn; All your heroes heal an extra hit. Play in recovery phase.
9 Smite	Fighter +6 CBT vs singular guardian.
10 Double Trouble	Play two guardians at location. They add their values together.
11 Second Guardian	Play a second one that must be defeated to claim the treasure.
12 Disaster	If the party has lost they receive an additional 1D6 damage.
13 Encounter	Play a nontrap guardian against a party that has declared they are not adventuring. There is no location or treasure involved.
14 Trading post	Discard your hand & draw 5 new cards in recruit phase.
15 Tracker	If your party contains a scout, draw 10 cards, keep one, and shuffle the rest back into the deck, during recruit phase.
16 Martyr	One of your heroes may martyr.
17 Ruined	Destroy one target magic item.
18 Monty Haul	Two treasures are placed at location. They are claimed together
19 Rise again	Guardian regenerates.

Multiplayer Rules

All rules the same, however, players must determine who the "Opposing player" is during the action phase. For maximum interaction, each other player going clockwise may pass or oppose. Only one opposer allowed.

Solitaire Rules

Setup: Take event cards out of the deck. Draw a full hand. Discard location, treasure, and guardian cards. Play all Hero cards. Do not attach magic items.

Redraw and discard until you have 4 heroes out and a full hand. Play: Draw one card at a time If it is a Location card, this becomes your new location.

Discard the old one. If it is a Hero, Spell or Magic item, you may put it in your hand.

If it is a Treasure, you may put it directly into your treasure pile. If it is a Guardian, your party must immediately confront it. You loose if at any time you have no heroes in play.

You win if you are able to get all the way through the deck. Rule modifications: Ignore any card instructions that allow you to draw more than one card per turn. Ignore any card instructions that allow you to meddle with an opponents hand or cards.

Treasure Hunter Alternate Rules

Introduction

Board & Movement elements added. 2-4 players.

Object

After All treasures have been claimed, the player with the most Treasure points wins the game.

The Decks

The cards will be divided into 4 decks:

- Location Deck: Location Cards
- Treasure Deck: Magic Items & Treasure cards.
- Guardian Deck: Guardian cards.
- Adventure Deck: Heroes, Spell, And Event cards.

Board & Board Setup

Use a 5 X 5 grid as the board. Each space must be large enough to hold a stack of cards. The 4 corner spaces are empty.

These are home spaces. Each player controls 1 home space. Into the remaining 21 spaces:

- Place 1 random Location card face up.
- Place 1 random Guardian card face down.
- Place 1 random Treasure/Magic Item card face down.

Pawns

The Adventuring parties are represented by pawns. Each player has 1 pawn. An Adventuring party may contain up to 4 Heroes.

Setup

Roll high on 1D6 to determine turn order. Each players pawn starts in its owners home (corner) space.

Turn Sequence

Players take turns. The player whose turn it is, is the active player. Each turn has 6 phases:

1. Draw phase
2. Recruit phase
3. Movement phase
4. Adventure phase
5. Recovery phase

6. Discard phase

Draw Phase

Active Player draws 1 card from the Adventure Deck. If the deck runs out shuffle the discard and draw from it.

Recruit Phase

If a player's pawn is in his home space, that player may play any Heroes in his hand to his 'Adventuring Party'. The party may contain up to 4 Heroes. Heroes in the party are placed face up on the table. They are in play.

Spell cards may be attached face down to mages, priests and heroes with spell levels. A Hero can attach a number of spell cards equal to his spell level. Spell cards may be attached regardless of pawn location.

Heroes may exchange magic items but not spells.

Treasures & Magic Items

Each player has a treasure pile. Treasures go to treasure piles as soon as they are found. Magic items are attached to Heroes as soon as they are found.

Heroes can receive the benefit of only one weapon at a time.

Movement Phase

Move your Pawn (Adventuring Party) 1D6 spaces. Moves must be orthogonal. Alternatively you can automatically move your party back to your home space.

If you enter a space that contains a guardian or an opposing pawn, you must stop. You cannot move your pawn into an opponent's home space. If all Heroes in a party are killed, the pawn is moved back to its home space.

Adventure Phase

This occurs if a party is in the same space as a guardian, or enemy party. Flip the Guardian Face up. Determine the Guardian value. The guardian value is equal to: The Guardians CBT (Combat) score + Location bonuses + 2D6.

Any opponent may play appropriate event cards to increase the Guardian value. If the Guardian is a mage or priest any opponent may play a spell card from his hand. Compare the guardian value to the party value. The party value is equal to: The CBT (Combat) score of all Heroes + special bonuses + 2D6.

The active player may play appropriate event cards to increase the Party value. Spell casting heroes may each play one of their attached spells. Events & Spells are discarded as soon as they are used unless otherwise specified.

Some spells and events cause the party to retreat. A retreating party immediately goes back to its home space. If the Guardian value is greater than the Party value, the party is defeated.

A Defeated party receives 1D6 hits distributed by the active player. A defeated party immediately retreats to its home space. Any Hero reduced to 0 Hits is killed (discarded).

Heroes cannot be given more hits than will reduce them to 0 unless the hero has Martyr ability. If the Guardian value is equal or less than the Party value, the party keeps the Treasure and the party receives only (1D6 - 3) hits. The active player gets to put the Treasure in his treasure pile.

If the treasure is a magic item, it may be attached to a hero present that can use it. Excess magic items may be carried. If the guardian is defeated, discard the Guardian card.

Magic items may be recovered from dead heroes by surviving party members only if the party won the adventure. If two parties occupy the same space they will fight, each determining its Party Value by the process described above. The victorious party suffers (1D6-3) hits.

The defeated party suffers 1D6 hits and must retreat to its home space. If the defeated party is wiped out, the winners may recover their Magic Items. Non-home spaces that do not have Guardians are considered to be empty.

Recovery Phase

All Heroes in the active players party heal one Hit point of Damage. Heroes heal two hit points of Damage if they are in their Home Space.

Discard Phase

The player may move cards from his party into his hand. A player must discard down to 7 cards in his hand.

Card Changes

Do not use the "Party Encounter, Double Trouble, Second Guardian, or Monty Haul cards. Pandoras Box- Discard to place 1D6 unused Guardians from Guardian deck onto target empty spaces. Maximum 1 guardian per space. Happy Hunting- Take an extra Move and Adventure phase.

Lost- Your opponent may not move or adventure this turn. Play in his move phase.

Card Set

Italian Cardset by Zak

Troll Treasures

A game by Jason Newell, for 1-4 players

A band of Elven adventurers have got it into their heads to have a competition, to see who is the most talented Treasure Hunter of the lot. To this end, they decide to infiltrate the nearby troll caves, known for the ample treasures within, and filch the treasures. Completely unaware of the competition, the trolls are obviously surprised by the band of elven intruders swanning about in their caves, and understandably they are a little miffed. It is a race against time to amass enough treasure and get out before the trolls clobber you into oblivion!

Components

- 1 playing piece and stat card for each elf
- 1 playing piece and stat card for each troll
- 1D8
- 49 wound tokens
- 24 arrow tokens
- 24 mana tokens
- 6 wall pieces
- 2 magic door pieces
- 3 sorcerer markers
- 3 quiver of arrows marker
- 3 magic potion markers
- The Search Deck
- The Board (The board should consist of at least 10 irregular sized rooms, a minimum of 4x4 spaces, connected by corridors 1 space wide. Eight of the rooms have a number in them, 1-8, in the centre space of the room, or in a space as near to it as possible. On each board edge there should be an entrance/exit that does not have a clear line of sight to a room. Each space should ideally be 1"x1")

Object To be the first player to find five treasures and get out before the trolls pummel you into a pulp.

Set Up

Each player chooses one of the four elven adventurers: Tanlya, Argis, Lightfingers or Zephyr. They take their elf's stat card, 6 arrow, wound and magic tokens, and put their playing piece at one of the entrances of the board. Then players roll a D8 for each troll, placing them on the number in the rolled room, and take it in turns to place the wall pieces. A wall piece cannot be placed so that it blocks a player's path into a room at the start of the game. Players then roll to determine who goes first (whoever rolls the highest).

The Turn

Each player takes it in turn to move their elf and make their actions, going clockwise around the board. After each player has had a turn, it becomes the Trolls' turn. Once the trolls have acted, then the turn goes back to the first player, and so on.

Each elf has a stat card, which lists their different statistics:

- Wounds: How much damage the elf can take before its player is out of the game.
- Arrows: How many times an elf can shoot its bow
- Mana: How many times an elf can use its magic
- Speed: How many spaces an elf may move in its turn
- Magic: What an elf needs to roll equal to or over to use magic
- Bow: What an elf needs to roll equal to or over to fire its bow
- Find: What an elf needs to roll equal to or over to successfully search a room

An Elf may move any number of spaces in its turn up to its Speed rating. It may fire its bow or use its magic at any point in its move. Searching is the last thing an elf does in its turn. Wall pieces cannot be moved through. You cannot move through a space occupied by a troll or another elf.

Firing A Bow

An elf can shoot its bow at any troll it can draw a clear line of sight to. Corners block line of sight. The bow cannot be used if the elf is in a space adjacent to a troll. The player rolls the dice. If the score is equal or greater than their Bow rating, then they hit the troll, who discards a wound token. If they roll lower, then they have missed. Either way, that player must discard an arrow token. If a player has no arrow tokens, then they cannot use the bow.

Using Magic

Magic can be used in two ways: stunning a troll, or moving a wall piece. Stunning a troll: An elf can use its magic on any troll it can draw a clear line of sight to. Corners block line of sight. The player rolls the dice. If the score is equal or greater than their Magic rating, then they hit the troll, who is stunned (taking no action in the next troll phase). If they roll lower, then nothing happens. Either way, that player must discard a mana token. Moving a wall piece: If the player's elf is adjacent to a wall piece they can use magic to move it. The player rolls the dice. If the score is equal or greater than their Magic rating, then they

can move the wall piece to any other viable space. If they roll lower, then nothing happens. Either way, that player must discard a mana token.

If a player has no mana tokens, then they cannot use magic.

Searching

At the end of their move, an elf may search. Searching can only be done if the elf ends its move in a room, not a corridor, and if there is no troll in a line of sight. An elf cannot search the same room twice in a row, whether they find something or not. The player rolls the dice. If the score is equal or greater than their Find rating, then they draw a card from the search deck. If it is a treasure card, add it to your stack. Otherwise, do what the card says, discarding it afterwards. If there are no cards left in the search deck, reshuffle and re-use the discard pile. If they roll lower, then nothing happens. Once an elf has five treasure cards, they must try to escape by moving to the entrance space they started in.

The Troll Phase

Once every player has had a turn, it becomes the troll phase. The trolls act in this turn order: Grall,

Tibor, Vries, Brion.

Each troll has a stat card which lists their different statistics:

- Wounds: How many wounds a troll can take before being removed from the game
- Thump: What a troll needs to roll equal to or over to hit an elf
- Brains: What a troll needs to roll equal to or over to pass a stupidity test
- Speed: How many spaces a troll can move in their turn

At the beginning of their turn, a troll must make a stupidity test. If they can draw a line of sight to an elf, then they DO NOT take a test, they instead move towards that elf by the most direct route. If there is more than one, then the troll moves towards the closest. If there is more than one the same distance away, then determine randomly which one the troll will move towards.

Roll a dice for the troll. If the score is equal or greater than their Brains rating, then they move towards the nearest elf. If there is more than one the same distance away, then determine randomly which one the troll will move towards. If they roll less, then roll on the Stupidity Table:

#	Result
1-2:	Move troll away from nearest elf
3-5:	Dawdle: troll does nothing this turn
6-7:	Move troll towards the nearest elf at half their speed, rounding down.
8:	Uses Tunnels: The troll gets bored and uses their secret tunnels.

Roll the dice and place the troll in the space rolled.

If a troll lands in a space adjacent to an elf, at any time, then they will try to thump that elf. If they land next to more than one elf, then they try to thump both of them. Roll once for each elf they are trying to thump. If the score is equal or greater than their Thump rating, then they hit the elf, who must discard 1 wound token and 1 treasure card, if they have any. If they roll lower, then nothing happens.

Once every troll has had a turn, it goes back to the elves turns.

Moving Wall Pieces

Wall pieces are moved by using magic, if they are hit by the mine cart, or by drawing a Move Wall card. A wall piece can be moved to any space so long as there is a wall on either side of the wall piece. Basically, this means that wall pieces cannot be placed in rooms, intersections or corners.

Magic Doors

At a cost of 1 movement, an elf may move on to a magic door and move instantly to the other magic door.

An elf cannot end its movement on a magic door. Trolls will not use the magic door, as they are scared of it/too dumb to use it. If the Magic Door card is redrawn, then that player may move the doors to different locations.

Mine Cart

Any troll hit by an elf in the mine cart loses 1 wound. Elves are unaffected by being hit by the cart as they are nimble enough to jump out of the way. The mine cart can move through wall pieces, which are replaced as the player chooses. The mine cart cannot go through the magic door.

Sorcerers, Magic Potions and Quivers of Arrows

If an elf draws a Sorcerer, Magic Potion or Quiver of Arrows card, but has a full supply of the specific token, then place a Sorcerer, Magic Potion or Quiver of Arrows marker in a space adjacent to that elf. Any player who lands on that space can replenish their supply as if they had drawn the appropriate card. Discard the token if this happens.

Elf Stats

Elf	Wounds	Arrows	Mana	Speed	Bow	Magic	Find
Tanlya	6	6	6	6	4	6	5
Argis	6	6	6	6	6	4	5
Lightfingers	6	6	6	6	5	5	4
Zephyr	6	6	6	8	5	5	5

Troll Trouble: Thump, Dwaddle & Drool

by Brian Peterson

Introduction

Rock-hard ugly trolls versus little, naughty house elves. Game for 1 (solo) to 8 players.

Credits

- Based on the following games & stories:
- Jason Newell's Troll Treasures
 - Lloyd Krasner's WarpQuest Game System
 - Chutes & Ladders
 - Harry Potter
 - Jack & the Bean Stalk

Victory

The 1st house elf to lay a golden egg in the mine entrance wins.

Artifact

The hen that lays the golden egg is guarded by a giant.

Setup

- Each player begins the game with 4 cards.
- Each player places an Elf counter in the Mine Entrance.
- Each Elf begins with 3 Arrows.
- Each Elf begins with 3 Pieces of Cheese.
- Each Elf begins with 3 Pinches of Flash Powder.
- Each skill starts at 6 points. Randomly assign 8 additional skill points to each Elf. Place the Hen card in the Giant's Lair. Randomly place the following counters:
- 3 Dementors
- 3 Boggarts
- 2 Pixies

#	Item
1	Thump, Thump
2	Poke, Poke
3	Tickle, Tickle

The Pixie is removed from the game board. The Pixie can return to play by means of a Pixie card. You may use the magic at any time during the game.

Once you use the magic it is gone.

Trolls

Trolls will try to eat house elves. Trolls have 3 action cards: Thump, Dwaddle & Drool. Trolls can use the Brain card.

Dwaddle negates Thump. Brain negates Dwaddle. Drool results in -3 Sneak (if played by a Troll) Drool results in +3 Squirm (if played by an Elf) An Elf that is Thumped loses all cards.

The Troll moves the Thumped Elf to any adjoining chamber.

Skills

Elves may avoid being thumped by challenging a Troll.

1. oke
2. ickle
3. lash
4. neak
5. queak
6. quirm

Poke requires an Arrow. Flash requires Flash Powder. Squeak requires Cheese.

Rolls 3d6, if the result is less than or equal to your skill you win the challenge.

Boggart

If you land on a Boggart teleport to a random location.

Dementor

+3 against Thump for every Dementor within 3 spaces.

Pixie

If you land on a Pixie roll for magic. The 1st four treat a card as if it were 2 cards. However, each only requires a single item (i.e. 1-Arrow or 1-Cheese).

#	Item
4	Squeak, Squeak
5	Teleport (see Boggart)
6	Speed (move twice this turn)

Turn Sequence

Players take turns:

1. raw a Card
2. andering Monsters
3. erms & Shamen
4. hump an Elf

5. un (Trip, Fumble, Change Levels)
6. ombat: Elves at War
7. teal the Hen or Lay the Golden Egg
8. iscard Excess Cards

Draw

Draw 1 card. Once a card is played it is discarded (except the Germ card).

Wandering Mosters

When you draw a Boggart, Dementor or Pixie card roll for random location. Move any one of the specified creatures to its new location. Pixies may be brought back into play.

Combat (elves At War)

If you end your move in the same square as another elf. An Elf may play a Poke or Tickle card. If you make a sucessful Skill Roll add a nuisance point.

Repeat until no more cards are played. The Elf with the most nuisance points wins. The winner moves the loser to an adjoining chamber.

The winner steals the hen (if applicable). Elves with more nuisance points can transfer Germs cards to those with fewer points.

Germs

If a Germ card is played against you, your Elf has the Runs. A Shaman can cure the Runs (discard 1 Germ card). Each turn you may roll 3d6, if you roll 6 or less you are cured from 1 Germ.

The Runs affect the following: You can not ride a Mine Cart. Rolls to change levels in the mine are at -1. Sneak is at -3.

Movement is at -2.

Movement

Roll 1d6 to move. Subtract 2 if the Elf has the Runs. If the Giant has the Hen all Elves must move towards the Giant.

If an Elf has the Hen that Elf must move towards the Entrance. All other elves may move in any direction. Elves must move their full movement except in chambers.

Elves must make an exact roll to move into the Giant's Lair or the Mine Entrance.

Trip

Roll another d6 and use the lowest roll for movement.

Cards

Fumble

You lose your grip on the Giant's Hen. If in a chamber the hen ends up in the lower level shaft. Otherwise the hen remains in the same shaft.

Roll to randomly determine section & space to place the hen counter. Elves in the same mine shaft or adjoining chamber may attempt to recover the hen. Move each elf up to 1d6 spaces towards the hen (rules for changing levels apply).

Up For Grabs

If no one recovers the hen leave the Hen counter on the board. The first player to end their turn there will recover it.

Elf Pile

If more than one elf lands in the hen's square conduct combat. Do not move the losers to adjoining chambers. The winner recovers the Hen.

Changing Levels In The Mine

To move down a level you may play a Mine Cart or roll a 6 or less on 3d6. To move up from level 3 you may play a Ladder to enter the Upper-Shaft. To move up from level 3 you may play a Rope to enter the Lower-Shaft.

If an Elf has the Runs they may not play a Mine Cart. If an Elf has the Runs -1 on any roll to change levels.

Stealing The Hen

The only way you can get the Hen is by stealing it from the giant. This is an exception to the rules, you don't need a Sneak card to use the skill. Make a Sneak Skill Roll.

If you fail you may play Sneak cards and try again. If you still fail move back to the previous chamber (retain all cards).

Laying A Golden Egg

To win the game you must command the the Hen to lay a golden egg. This is an exception to the rules, you don't need a Squeak card to use the skill. This requires a piece of Cheese.

Make a Squeak Skill Roll. If you fail you may play Squeak cards and try again. If you fail you can try again next turn.

Discard Excess Cards

At the end of a turn an elf can not have more than 5 cards including Hen & Germ cards.

#	Description	Notes
8	Thump	Troll Thumps an Elf
5	Dwaddle	Negate a Thump
5	Drool	+3 Squirm, -3 Sneak
3	Brain	Negate a Dwaddle
3	Poke	Elven Defense, Requires Arrow
3	Tickle	Elven Defense
3	Flash	Elven Defense, Requires Flash Powder
3	Sneak	Elven Defense, Use to Steal Giant's Hen, -3 with Drrol, -3 with Runs
3	Squeak	Elven Defense, Requires Cheese, Command hen to lay egg
3	Squirm	Elven Defense, +3 with Drool
3	Trip	Elf Trips, Roll 1d6, move lowest of 2 rolls
2	Fumble	Elf Trips & Hen gets away
2	Dementor	Teleport a Dementor to a new location, End Turn
2	Boggart	Teleport a Boggart to a new location, End Turn
2	Pixie	Teleport a Pixie to a new location, End Turn
4	Mine Cart	Automatically move down 1 level
3	Ladder	Automatically move up from level 3 to 2 Upper-Shaft or level 2 to 1
2	Rope	Automatically move up from level 3 to 2 Lower-Shaft
2	Germ	Gives Elves the Runs, Unable to use Mine Cart, -1 on Change Level Rolls
3	Shaman	Cures the Runs.
2	Quiver	Restores number of Arrows to 3.
2	Flash Powde	Restores Flash Powder to 3 pinches.
3	Cheese	Restores Cheese to 3 pieces.
1	Hen	The Giant's Hen (Artifact)

Counters

#	Description	Notes

Making Counters

The counters are designed so that you can tape a penny to the underside to keep them from blowing away.

Background Information

The dark order of wizards have been bickering over who has the most gifted house elf. They have decided to organize a contest and send their naughty little house elves into an old mine to retrieve the magical golden egg of Eddenburg. The 1st elf to return to the Mine Entrance with the golden egg wins. The hen that lays the golden eggs is protected by a giant and his body guards (a family of rock-hard ugly trolls). The giant and his bodyguards have been living in this same little mine shaft for over 300 years. Now as you can imagine the mine is really disgusting, there are germs everywhere, and not only germs but super germs. These super germs can cause diarrhea in house elves. As you can

imagine it is hard for an elf to ride in the mine carts and sneak around quietly without their Pepto Bismo. As far as combat the trolls certainly have an advantage over the elves in strength, but they are stupid and sometimes completely forget who they are and what they are. They begin to dwaddle and walk around in circles mumbling to themselves. If these trolls had a brain they would be really dangerous. Another interesting aspect of trolls is that when they see an elf they drool, and when I say drool I really mean drool. Because of this it is really difficult for an elf to sneak around because they are tracking mucus around on the bottoms of their boots, not to mention it is really slippery. On the positive side when a troll captures a house elf and drools all over it, it can become very slippery and sometimes it can squirm and slip free. Two other techniques house elves have learned that are effective against trolls. First, trolls can't stand elves that squeak and second, trolls are particularly self conscious when elves flash them. Enough said get on with the game.

About The Game Board

Board starts with a mine entrance. Followed by 3 Levels. Each level has a chamber followed by a shaft.

Each shaft (track) is 12 spaces. Each shaft is divided in 2 sections (upper & lower). Spaces in each section are numbered 1 to 6.

Level 2 has a parallel lower shaft and chambers. Board ends with the Giants Lair.

Rules For Solo Play

- You start with 7 lives.
- Each time you are thumped you lose a life.
- When you draw a Thump card play it against your elf.
- When you draw a Brain card set it aside to play with the next Thump card.
- When you draw a Germ card play it against your elf.

Tron Skirmish

Introduction

Board & card games for 2 players based in the virtual world of Tron. This actually describes 6 games that use the same deck. The games include:

- 1. Tank Escape
- 2. Light Cesta
- 3. Tron Discs
- 4. Light Cycles
- 5. Solar Sailor Simulation
- 6. Mesa Battle

One player is Tron and his friends. The other player controls the minions of Sark and the MCP (Master Control Program).

Objective

Play each of the 6 games once. Tron must win at all 6 games to gain ultimate victory. The MCP only has

Card Color	Value	Number in Deck
Blue	1	5
Blue	2	4
Blue	3	3
Blue	4	2
Blue	5	1

Game 1 - Tank Escape

Setup

Clu's tank starts in one of the 4 center spaces. The MCP has 8 Recognizers, each of which start in the sides or corners. Each player starts with a full hand of cards.

Clu (Flynn's Search program) may go first or pass.

The Cards

Clu can use Blue cards to move the Tank. Clu uses the Red card to shoot. The MCP uses the Blue cards to move Recognizers orthogonally.

The MCP uses the Red cards to move Recognizers diagonally.

Turn Sequence

Players take turns. Each turn has 3 phases: Input Phase Move Phase Fire Phase

Input Phase

Draw 3 cards from your deck if you are the MCP. Draw 4 cards from your deck if you are Tron. If the deck runs out, shuffle the discard and draw from it.

to defeat Tron once to gain ultimate victory.

In each of the games, the Tron side is given certain built-in advantages.

Disclaimer

Tron is licensed, copyrighted, trademarked property. This is merely a fan site.

The Map & Pieces

Use an 8X8 chessboard for all games. Use chits or miniatures to represent units.

The Deck

All 4 games share the same common deck:

Card Color	Value	Number in Deck
Red	1	5
Red	2	4
Red	3	3
Red	4	2
Red	5	1

Max hand size = 5 cards for the MCP and 6 cards for Tron. Discard excess cards.

Move Phase

Play (discard) cards to move your figure(s). The card has a number. This is the number of spaces the figure moves.

Clu's Tank can use 1 or 2 blue cards per turn to move. The MCP uses the Blue cards to move Recognizers orthogonally. The MCP uses the Red cards to move Recognizers diagonally.

A single recognizer can use one red card & one blue card per turn. Figures cannot move into or through each other. If Clu cannot move his tank during his turn, he is trapped, and a Recognizer lands on top of the tank and smashes it.

Fire Phase

Clu may Play (discard) red cards to have a tank shoot. Each card has a number. This is the range of the attack.

The range must be exact for the shot to hit. Recognizers are destroyed after one shot each.

Game 2 - Light Cesta

Setup

Each player places 1 figure on any one square of his back 4 rows. The figures represent Tron and his opponent (a minion of the MCP). Also use a token or coin to represent the ball.

Each player starts with a full hand of cards. The MCP figure starts holding the ball. The MCP figure goes first.

The Cards

Blue cards are used to move figures. Red cards are used to move the ball.

Turn Sequence

Players take turns. Each turn has 4 phases: Input Phase Catch Phase Throw Phase Derezz Phase

Input Phase

Draw 3 cards from your deck if you are the MCP. Draw 4 cards from your deck if you are Tron. If the deck runs out, shuffle the discard and draw from it.

Max hand size = 5 cards for the MCP and 6 cards for Tron. Discard excess cards. If your opponent lost a section of platform last turn, you start the turn holding the ball.

Catch Phase

Play (discard) a Blue card to move your figure. The card has a number. This is the number of spaces the figure moves.

Moves can be diagonal or orthogonal. Tron can use up to two blue cards per turn, the MCP can use only one. A figure must stay on his side of the board.

If your figure lands on or moves through the ball, he catches it (in his Cesta). Unless you are already holding the ball, you must try to catch it.

Throw Phase

Play (discard) an Red card to have a figure throw the ball. (Bounce it off the ceiling plate) The card has a number. This is the range of the ball travels.

Throws can be diagonal or orthogonal. If the ball goes into the opposing figures space, he automatically catches it. The ball must be bounced into your opponents territory, never your own.

Note: You must be holding the ball, or have caught it in order to throw it.

Derezz Phase

If you did not deflect the ball this turn you lose 1 section (ring) of your platform. If you lose 3 sections of platform, you are derezzed (deresolution = destroyed).

Game 3 - Tron Discs

The Board

The board has 5 platforms. A platform is 2 by 2 square box. There is 1 center platform.

The other 4 platforms are positioned to form a cross (not an X). They are flush to the wall and seperated from the center by 1 space distance.

Setup

The Tron figure starts in the center platform. Each of his 4 opponents (MCP minions) start on the other platforms. Each player starts with a full hand of cards.

The MCP figure goes first.

The Cards

Cards of value 1 are used to move figures. Cards of value 2-5 are used to throw (deflect) discs.

Turn Sequence

Players take turns. Each turn has 3 phases: Input Phase Move Phase Throw Phase

Input Phase

Draw 3 cards from your deck if you are the MCP. Draw 4 cards from your deck if you are Tron. If the deck runs out, shuffle the discard and draw from it.

Max hand size = 5 cards for the MCP and 6 cards for Tron. Discard excess cards.

Move Phase

Play (discard) a card with value = 1 to move your figure to an adjacent space on his platform. Moves can be diagonal or orthogonal. An MCP minion can move once per turn.

Tron can move also move after each attack.

Throw Phase

Play (discard) a card to have a figure throw (or deflect) a disc. The card has a number. This is the range of the disc travels.

Throws can be diagonal or orthogonal. An MCP minion can attack once per turn. Tron can attack any number of times per turn.

The defending player can negate an attack by discarding a card with a value equal to that of the card used to attack. MCP minions are derezzed (destroyed) if hit once. Tron must be hit 3 times to be destroyed.

Game 4 - Light Cycles

Setup

Each player places 3 figures on any squares of his back row. Figures may not stack. The figures represent Tron, Ram, and Flynn on Light cycles and Three MCP (Gold Team) minions on Light cycles.

Each player starts with a full hand of cards. The MCP player goes first. Use Tokens to represent light trails.

The Cards

All cards are used to move figures.

Turn Sequence

Players take turns. Each turn has 2 phases: Input Phase Move Phase

Input Phase

Draw 3 cards from your deck if you are the MCP. Draw 4 cards from your deck if you are Tron. If the deck runs out, shuffle the discard and draw from it.

Max hand size = 5 cards for the MCP and 6 cards for Tron. Discard excess cards.

Move Phase

Play (discard) a card to move your figure. The card has a number. This is the exact number of spaces the figure moves.

Moves must be orthogonal. A figure can use up to two cards per turn. Tron can use three cards per turn.

Each Figure must move a minimum of once per turn or automatically be destroyed. Figures cannot move into or through other figures or light trails.

LIGHT TRAILS (Jet Walls) Every time a figure moves, put a Light Token on the space it just moved out of. By doing so, a cycle leaves a trail of light. A light trail can be a max of six spaces long.

Remove light trail tokens in excess of six for every figure as they are made. Immediately Remove all light trails of a destroyed Cycle.

Game 5 - Solar Sailor Simulation

Setup

The MCP has 8 grid bugs, placed on the MCP's back row. The Solar Sailor starts on any square in the Tron players back row. Each player starts with a full hand of cards.

The Solar Sailor may go first or pass.

Turn Sequence

Players take turns. Each turn has 3 phases: Input Phase Move Phase Attack Phase

Input Phase

Draw 3 cards from your deck if you are the MCP. Draw 4 cards from your deck if you are Tron. If the deck runs out, shuffle the discard and draw from it.

Max hand size = 5 cards for the MCP and 6 cards for Tron. Discard excess cards.

Move Phase

Play (discard) a card to move your figures(s). The Sailor only uses Blue cards to move. Sailor moves must be orthogonal or diagonal.

Bugs use Blue cards to move orthogonally and red cards to move diagonally. The card has a number. This is the number of spaces the figure moves.

A Bug can use 1 card per turn to move. The Sailor can use up to 2 Blue cards per turn to move. Grid Bugs may move into or through other figures, they may stack.

If a Bug lands on top of the Sailor, the Sailor takes one point of damage. If the Sailor takes 4 points of damage, it is destroyed.

Fire Phase

The sailor player may play (discard) a red card to shoot. The card has a number. This is the range of the attack.

Attacks can be diagonal or orthogonal. Bugs cannot shoot. The Sailor can shoot up to twice per turn (and at different targets).

The range must be exact for the shot to hit. Bugs are destroyed after one shot each. The Sailor must be hit three times to be destroyed.

Game 6 - Mesa Battle

Setup

Use a 7 x 7 Board Tron has 2 units: Tron (on Foot) and Flynn (in the Command Carrier with Yori) The MCP player has two figures: The MCP (Immobile in the center square) and Commander Sark. Sark starts adjacent to the MCP. Tron & Flynn start adjacent in one corner. Each player starts with a full hand of cards.

Turn Sequence

Players take turns. Each turn has 3 phases: Input Phase Move Phase Disc Phase

Input Phase

Draw 2 cards from your deck if you are the MCP. Draw 3 cards from your deck if you are Tron. If the deck runs out, shuffle the discard and draw from it.

Max hand size = 4 cards for the MCP and 5 cards for Tron. Discard excess cards.

Move Phase

Play (discard) blue cards to move your figure(s). The card has a number. This is the number of spaces the figure moves.

The MCP cannot move. If Flynn moves exactly into the MCP, the MCP is automatically reduced to 1 Hit. When this happens the Flynn figure is out of the game.

If 'Gaint' Sark moves exactly onto a figure, it is destroyed.

Disc Phase

Play (discard) red cards to have Tron or Sark attack with their Discs. Each card has a number. This is the range of the attack.

The range must be exact for the shot to hit. After taking one hit, Sark is transformed into Giant Sark. Giant Sark cannot attack with discs and cannot be destroyed by discs.

Tron is destroyed after 3 hits with discs. Flynn in

the carrier cannot attack or be attacked by discs. The MCP has 8 hits (deflector shields) and can be attacked by discs.

Tron wins if the MCP is destroyed (which destroys Giant Sark too).

Tron The Card Game

Introduction

Card game for 2 players. The action takes place in the world of Virtual World of Tron.

Disclaimer

Tron is a licensed, copyrighted, trademarked property. This is merely a fan site.

The Decks

There are 2 separate, unique decks: One for the Tron player, and one for the MCP (Master Control Program).

The Tron Deck

The Tron deck has 6 types of cards: Programs (Characters) Skill (Needed to defeat Games and Security) Escape (Needed to go Rogue) Activation (Needed to become Activated) Transport (Needed to reach the Mesa) Sub-Routines (Special Effects)

The Mcp Deck

The MCP deck has 4 types of cards: Control (Needed to Win) Games (Used to Destroy Programs on the Game Grid) Security (Used to Destroy Programs off the Game Grid) Sub-Routines (Special Effects)

Mcp Objectives

The MCP wins when all 10 Control cards have been downloaded (put into play).

Tron Objectives

Tron wins by Derezzing (Deresolution = Destroy) the MCP in Program Delete Phase.

Setup

Both players start with a hand of 6 cards. The Tron player may call a Mulligan and redraw if he has no Program cards.

Program Status

Important concept to game play. The Tron player controls Programs (characters) such as Tron, Flynn, Ram, etc. Depending on their location and experiences the 'status' of the programs will change.

Use dice, coins or markers to represent status changes. The normal progression of Status is as follows: Game Grid à Rogue à Activated à Mesa Certain

phases of the turn sequence only apply to programs with the indicated status.

Turn Sequence

There are 8 phases in each turn:

1. Data Input Phase
2. Program Execute Phase
3. Game Grid Phase
4. System Escape Phase
5. User Interface Phase
6. File Transfer Phase
7. Program Delete Phase
8. Sub-Routine Phase

Data Input Phase

Each player draws 2 cards. If a deck runs out, shuffle the discard and draw from it. Max hand size is 8 cards. Discard excess cards.

Program Execute Phase

The MCP may download (put into play) one Control card. The Tron player may download one Program (Character). Program and Control cards remain in play face-up on the table.

(Note: all other types of cards are discarded when played) Programs start in Game Grid Status. Exceptions: In order to download Flynn (a User) the Tron player must also play (discard) a 'Matter Transform Sequence' card. Clu when downloaded starts in Rogue Status. Yori may be downloaded in Rogue status if Tron is currently in Rogue status.

Uniqueness Rule: You may only have one Program of one type in Play at a time. (You can't have 2 copies of Tron out at once)

Game Grid Phase

Skip this phase if there are no programs with Game Grid Status in play. The MCP may play a Game card. The Game card has a Power Level (number).

The Tron player may counter the Game card by playing Skill cards with total Power Level that is equal to or higher than the power level of the game card. If the Tron player does not counter the Game card, then one program with Game grid status is derezzed (discarded).

System Escape Phase

Skip this phase if there are no programs with Game Grid Status in play. The Tron player may play one 'Escape' type card. This changes the status of all Game Grid programs to Rogue status.

The MCP may play a Security card. The Security card has a Power Level (number). The Tron player may counter the Security card by playing Skill cards with total Power Level that is equal to or higher than the power level of the Security card.

If the Tron player does not counter the Security card, then one program with Rogue status is derezzed (discarded).

User Interface Phase

Skip this phase if there are no programs with Rogue Status in play. The Tron player may play one 'Activation' type card. This changes the status of all Rogue programs to Activated status.

The MCP may play a Security card. The Security card has a Power Level (number). The Tron player may counter the Security card by playing Skill cards with total Power Level that is equal to or higher than the power level of the Security card.

If the Tron player does not counter the Security card, then one program with Activated status is derezzed (discarded).

File Transfer Phase

Skip this phase if there are no programs with Activated Status in play. The Tron player may play one 'Transport' type card. This changes the status of all Activated programs to Mesa status.

The MCP may play a Security card. The Security card has a Power Level (number). The Tron player may counter the Security card by playing Skill cards with

total Power Level that is equal to or higher than the power level of the Security card.

If the Tron player does not counter the Security card, then one program with Mesa status is derezzed (discarded).

Program Delete Phase

Skip this phase if there are no programs with Mesa Status in play. The MCP may play a Security card. The Security card has a Power Level (number).

The Tron player may counter the Security card by playing Skill cards with total Power Level that is equal to or higher than the power level of the Security card. If the Tron player does not counter the Security card, then one program with Mesa status is derezzed (discarded). Only if the Tron player has defeated the Security card, he may now discard one last Skill card. This erases the MCP and Tron wins.

Sub-routine Phase

Play Sub-routine cards in this phase unless otherwise instructed by the card.

Tron Deck Card Type Notation

- S** Skill
- P** Programs
- E** Escape
- A** Activation
- T** Transport
- R** Sub-Routines
- X** Sub-Routine played immediately in response to an effect
- U** This card can only be played if Flynn (a user) is in play
- #** Number of Copies of this card in the deck.

Trooper

A battle between Futuristic Troops.
Style Board & card game for 2 players.

Victory

Kill the opposing Commander.

#	Name
8	Troopers
2	Tanks
2	Aircraft

Setup

Each player places one unit on each square of his back two rows. Units may not stack.

The Cards

Players share a common deck.

Turn Sequence

Players take turns. Each turn has 3 phases: Orders Phase Move Phase Battle Phase

Orders Phase

Discard old cards. Draw 7 cards. If the deck runs out, shuffle the discard and draw from it.

Card List Notation

-	-	-	-
M =	Movement	Value =	Distance
A =	Attack	Value =	Range
D =	Defense	Value =	# of attacks negated
AM =	Aerial Move	-	-
Unit =	Who can use the card	-	-
Type =	Purpose of card	-	-
# =	Number of that type of card in the deck	-	-

Card List

#	Card name	Type	Value	Unit
1	Walk	M	1	Troopers
2	Jump pack	AM	2	Troopers

The Map

Use an 8x8 chessboard.

The Men

Use chits or miniatures to represent units.

#	Name
2	Hovercraft
1	Artillery
1	Commander

Move Phase

Play (discard) a Move card to move one of your units. Units can move through other units only if they are making an Aerial Move. The move card has a number; this is the number of spaces the unit can move.

Moves are orthogonal. You may play as many movement cards as you have in your hand.

Battle Phase

Play (discard) an Attack card to have a unit attack. The attack card has a number. This is the range of the attack.

Attacks are diagonal or orthogonal. An attack does 1 point of damage. The defender may play a Defense card to negate damage points.

If the target unit is damaged more than defended it is destroyed.

#	Card name	Type	Value	Unit
3	Tread	M	1	Tanks
1	Swoop	AM	4	Aircraft
1	Thrusters	AM	6	Aircraft
1	Scramble	AM	8	Aircraft
3	Reposition	M	1	Artillery
1	Advance	M	2	Hovercraft
1	Charge	M	3	Hovercraft
1	Fly over	AM	4	Hovercraft

1	Onslaught	M	2	Commander
3	-	A	1	Troopers, Tanks, Aircraft, Artillery, Jeep, Commander
3	-	A	2	Tanks, Aircraft, Artillery, Commander
3	-	A	4	Troopers, Tanks, Artillery
3	-	A	8	Artillery
3	-	A	1	Troopers, Jeep, Commander
3	-	A	2	Aircraft, Jeep, Commander
3	-	A	2	Troopers, Tanks, Aircraft, Jeep, Commander
3	-	D	1	Troopers, Tanks, Artillery
3	-	D	1	Tanks, Aircraft, Commander
3	-	D	2	Tanks
1	-	-	-	Draw 3 cards
1	-	-	-	Discard and replace unwanted cards

Troy

Introduction

Card game for 2 players. One player is the Achaeans (Greeks). The other player is the Trojans.

Victory

The first player to win 7 hands wins the war.

The Decks

Each player has a unique deck.

Turn Sequence

Each turn is divided into 6 phases:

- Muster Phase
- Summon Aid Phase
- Attack Phase
- Battle Phase
- Victory Phase
- Rally Phase

Muster Phase

Each player fills their hand to 10 cards. If the deck runs out, shuffle the discard & draw from it.

Summon Aid Phase

Each player may discard up to 5 cards and draw new ones.

Attack Phase

Both players play a meld from their hands. A Meld may contain:

- 1 Hero Card
- 1 God Card
- 1 Warrior Card
- 1 Strategy Card
- 1 Arms Card
- 1 Trait Card
- 1 Companion Card
- 1 Honor Card
- 1 Defense Card
- 1 Event Card

Battle Phase

Players take turns (Greek first) doing 1 Action (of the following):

1. Activate 1 special ability of a Meld card. (These abilities can be used only once per turn)
2. Add 1 card from their hand to the Meld. (A card just drawn this phase or to replace 1 lost card, not to exceed Meld Limits)

This continues until both players are done doing all actions they want to and can.

Victory Phase

Players add up the Force value of their Meld. The side with the higher force wins the hand. Ties, remain, just that, ties.

The losing Hero is removed from the game.

Rally Phase

All Meld cards are discarded. Players discard their hands down to 5 cards or less.

Card List Notation

- H** Hero Card
- C** Companion Card
- G** God Card
- W** Warrior Card
- S** Strategy Card
- A** Arms Card
- E** Event Card
- T** Trait Card (Play only if Hero in Meld)
- F** Force
- O** Honor (Play only if you won last hand)
- D** Defenses (Play only if you lost last hand)
 - Summon = Search deck & put this card in your hand
 - Behold = Play an extra card of the indicated type in Meld
 - Remove = Use this card as an Event for the following Effect
 - Spy = Look at opponents Hand in Attack Phase
 - King or Prince = The Meld may contain an extra Warrior card
 - Heroic = Play an extra Trait card in your Meld or...
 - Search deck for a Trait card and put it in your hand
 - Commander = Warrior card gets Force +3
 - Healer = Return Hero removed from the game to your hand

Truckin

Introduction

Card game for 2-4+ players. Players are Truck Drivers. Set in the USA in the 1970's.
Heavy on CB Lingo. Players try to complete routes.

Winning

The first player to complete 5 Routes is the winner.

The Deck

Players share a common deck. There are 4 Suites:
1. Rig Cards
2. City cards
3. Haulin Cards
4. Smokey Cards
All cards have an assigned number from 1 to 6. These numbers limit the types of Melds you can make.

Route Markers

Use coins or dice to keep track of how many Routes you have completed.

Setup

Each player chooses a Handle (nickname). Shuffle the Deck. Flip a coin or roll a die or spit for distance to see who goes first.
Each player is dealt a hand of 5 cards.

Turn Sequence

Players take turns. Play proceeds clockwise. Each turn has 6 Phases:
1. Dispatch Phase
2. Truck Stop Phase
3. Truckin Phase
4. Smokey Sez Phase
5. Destination Phase
6. Truck Scales Phase

Dispatch Phase

Draw 1 card from the deck. If the Deck runs out, shuffle the discard and draw from it.

Common Deck Card List

Card Name:	Suite	#	Notes:
Big Apple	C	1	New York

Truck Stop Phase

You may discard 3 cards of the same Suite and Draw 3 replacement cards.

Truckin Phase

You may make a Meld. A meld must contain: 1 Rig Card, 1 Haulin Card, and 1 Destination Card Furthermore, the numbers on the cards must follow One of the following four Basic Patterns:
1. They must all be the same (examples: All 3's or all 4's)
2. They must be sequential (examples: 1-2-3 or 3-4-5)
3. They must all be Evens (2-4-6)
4. They must all be Odds (1-3-5)

Smokey Sez Phase

If you made a Meld last phase, the player to your left may Play a Smokey Card whose number matches one of the cards in your meld. The Smokey card and the targeted card are discarded. The other 2 cards of your Meld go back in your hand.

Destination Phase

If you played a Meld in Truckin Phase and it was not Disrupted in Smokey Sez phase, than you have completed 1 Route. Discard the Meld cards and record your completed Route.

Truck Scales Phase

Max hand size is 7 cards. Discard excess cards.

Card List Notation

- R** Rig Cards
- C** City cards
- H** Haulin Cards
- S** Smokey Cards
- * There are 2 Copies of this card in the Deck

True Blood

(Spoiler alert for season 3!)

Introduction

Card game for 2-4+ players. True Blood Book/TV Series Theme.

Disclaimer

True Blood is a licensed, copyrighted property. This is merely a fan site.

Game End

The game ends at the end of the turn there are no Cards left in the Character Deck or the Recruitment Track.

Victory

The player with the most Blood Points (BP) at the end of the game wins. Character Cards you control are worth varying amounts of Blood Points. Certain Combinations of Controlled Character Cards earn Bonus BP.

Blood Tokens

These are earned or stolen by players during play. Each Blood Token (BT) is worth 1 Blood Point (BP).

Influence Tokens

These are currency used to determine Initiative and to recruit Characters. These come in Denominations of 1, 2, and 5 (you can make change). A player cannot have less than zero IT.

Influence Tokens (IT) can be saved from turn to turn. You cannot pay or bid more IT than what you have.

Capture Tokens

These are placed on your Character cards to indicate if they have been captured. A Captured Character earns no BP and cannot use Special Abilities. They do not contribute BP in end game scoring.

Injury Tokens

These are placed on your Character cards to indicate if they have been injured. An Injured Character earns no BP and cannot use Special Abilities. Characters that are "Regulars" cannot be killed. However they

can be the target of Kill Attempts. Instead of being killed, they are Injured.

Injured Characters do contribute BP in end game scoring.

Dice

Six sided dice are needed.

Turn Order Track & Pawns

This is used to keep track of which player goes first each turn. It has 6 spaces marked 1 to 6. Each player has a Pawn of a unique color.

Each space holds 1 Pawn. The first space (position) goes first and so on.

Recruitment Track

This track has 5 spaces numbered 1-5. Each is big enough to hold 1 Face-up Character card. As Characters are recruited (paid for with Influence Tokens) slide the cards down from 5 to 1 to fill in the empty spaces.

When the fifth space is empty fill it with the top card of the Character Deck. Cards cost IT equal to their BP value.

- A card in the first space costs 1 less IT.
- A card in the third space costs 1 extra IT.
- A card in the fourth space costs 2 extra IT.
- A card in the fifth space costs 3 extra IT.

The Decks

There are 2 Decks:

1. The Character Deck
2. The Event Deck

The Character Deck

These represent various individuals, groups and locations found in the series. There are a number of Traits that a card can have.

The Event Deck

Most Event cards are played by players on their turn in Event Phase. Some event cards are reactionary and are played in reaction to another Event or aspect of play. Event cards are discarded when played.

In a multi-player game you can play Negate cards to protect the Characters of other players. When you take control of a character it becomes yours: take possession of the card.

Setup

Each player starts with 10 Blood Tokens. Each player starts with 5 Influence Tokens. Remove the Starting Characters and Second Stage Characters from the Character Deck.

Shuffle the Decks. Randomly place the 5 Starting Characters onto the 5 spaces of the Recruitment Track. Shuffle the Second Stage Characters together and place them face down on top of the Character Deck.

Turn Sequence

Each turn has 9 Phases:

1. Influence Phase
2. Initiative Phase
3. Plotting Phase
4. Recruitment Phase
5. Event Phase
6. Action Phase
7. Capture Phase
8. Recovery Phase
9. End Phase

I. Influence Phase

Each player gets 10 Influence Tokens (IT) and 2 BT.

II. Initiative Phase

Determine pawn positions on the Turn Track. Players secretly bid IT. Bids are revealed simultaneously.

High bid gets first position and so on. If tied, players roll high on 1D6. All Bid Tokens are discarded.

III. Plotting Phase

Each player draws 2 Cards from the Event Deck and put them in their hands. For 1 IT you may discard an Event Card and draw another. If the Event Deck runs out, shuffle the discard and draw from it.

IV. Recruitment Phase

In Turn Order as determined in Initiative Phase, Players may buy Character Cards from the Recruitment Track: The track has 5 spaces numbered 1-5. Each is big enough to hold 1 Face-up Character card. As Characters are recruited (paid for with Influence Tokens) slide the cards down from 5 to 1 to fill in the empty spaces.

When the fifth space is empty fill it with the top card of the Character Deck. Cards cost IT equal to their BP value.

- A card in the first space costs 1 less IT.
- A card in the third space costs 1 extra IT.
- A card in the fourth space costs 2 extra IT.
- A card in the fifth space costs 3 extra IT.

V. Event Phase

In Turn Order as determined in Initiative Phase, Players may play Event Cards from their hands. When playing an Event Card roll 1D6. On 1-3 nothing happens. On 4+ the Event goes off as described. You may pay 1 IT once to re-roll if nothing happened. A player plays all his Events and then the next player plays all his Event cards and so on.

Event cards are discarded after being played (Successful or not).

VI. Action Phase

Depending on their Traits most Characters can take an action. If a character has multiple types of Actions available to him he can only pick one. If a Character has been stolen (owner change) this turn, whether in Event Phase or earlier in Action Phase, it can take no action for the remainder of the turn.

In Turn Order, as determined in Initiative Phase, Players may have their Characters attempt one Action each:

Active Trait:	Result after Rolling 1D6:
Telepath or Fairy	On 3+ Look at Opponent's hand.
Servant or Minions	On 6+ Capture Target Character
Ruler	On 4+ Gain 1D6 IT
Law Enforcer	On 5+ Opponent loses 2 IT
Murderer	On 6+ Kill target Character of Indicated type
Sacrifice	On 4+ Kill Character you Control to gain 5 IT
Maenad	On 3+ Capture target Human
Businessman/Business	On 2+ Gain 1 IT
Dealer	On 5 lose 1 BT; On 6 gain 2 IT
Seducer or Obsession	On 5+ Gain Control of Specific Character
Maker	On 4+ Gain Control of Specific Vampire
Pack Leader	On 6+ Gain control of Character of same Racial Type
Informer	On 6+ Look at next 3 cards in Character Deck
Spiritual	On 6+ Look at next 1D6 cards in Event Deck
Abductor	On 6+ Capture Target Character of indicated type

Active Trait:	Result after Rolling 1D6:
Thief	On 5+ Steal 1 IT from Opponent
Healer	On 5+ Remove an Injury Token
Flyer	On 5+ Rescue a Captured Character
Manipulator	On 5+ Steal 1 BT from Opponent
Command Obedience	On 6+ Capture Target Character
Rescuer	On 6+ Rescue a Captured Character
Attacker	On 6+ Injure Target Character
Decadent	On 2+ Convert up to 2 IT into BT
Prize or Pacifist	On 4+ Gain 1 BT
Revenge or Nemesis	On 6+ Kill Specific Character

Some Character Traits are Passive. Always roll Active Trait this Phase:
for all passive Traits even if the Character attempts a

Passive Trait:	Result after rolling 1D6:
Mayhem	On 5+ All players Draw 1 Event Card and you gain 1 IT
Psychopath	On 6+ Draw 1 event Card and lose 1 BT
Young or Stupid	On 5 Lose 1 IT; On 6 gain 1 BT
Addict	On 5 Lose 1 BT; On 6 draw 1 Event Card

Some Character abilities are Reactionary rather than Active or Passive:

Reactionary Trait:	Usage:
Protector	On a roll of 5+ on 1D6 negate a Specific Kill or Capture
Martyr	Can Substitute for another Character on a Kill
Survivor	+1 To Prisoner Rolls
Old	Immune to Sex Events and Seduction

When a player has multiple Characters under their control, ALL of the player's characters perform their actions before moving to the next player.

Vii. Capture Phase

For each Captured Character roll 1D6: This is called the Prisoner Roll:

- On a roll of 1 the Character comes under the control of the player that Captured him.
- On a roll of 2 the Character Reveals Secrets: The Capturer steals 1 IT.
- On a roll of 3 the Character is Tortured: The Owner loses 1 BT.
- On a roll of 4-5 Nothing Happens.
- On a roll of 6 the Character escapes Capture: Remove the Capture Token.

Character Deck Card List

Name:	Notes
Sookie Stackhouse:	10BT. Regular. Human Fairy. Telepath. Rescuer. Seduce Bill. +5 BT if you control Bill. Nemesis Lorena. Starting Character.
Bill Compton:	10BT. Regular. Male Vampire. Seduce Sookie. +5 BT if you control Sookie. Rescuer. Protector. Maker of Jessica. Starting Character.

Viii. Recovery Phase

For each Injured Character roll 1D6: This is called the Recovery Roll: On a roll of 1-4 the Character remains incapacitated. On a roll of 5+ the Character is Healed: Remove the Injury Token. Add 1 to the roll if the Character is a Vampire.

Ix. End Phase

Max hand size is 5 Event Cards. Discard excess cards.

End Game Scoring

At the end of the game add up the BT value of all your characters. Most Characters also give bonus BT if you control certain other Characters. Also add to this total Blood Tokens you have collected/stolen during play.

Name:	Notes
Jason Stackhouse:	9BT. Regular. Male Human. Seduce Human Females. Rescuer. Stupid. Starting Character. +1 BT per Female Character you control.
Eric Northman:	9BT. Regular. Male Vampire. Seduce Sookie. Manipulator. Maker of Pam. Revenge Russell or Talbot. Businessman. +2 BT if you control Sookie, Godric, Pam. Second Stage. Command Obedience. Flyer.

Tunnel Rat

Introduction

Vietnam War tunnel combat. Bluffing game for 2 players. One Player is the US Tunnel Rat.

The other player is the VC.

The Deck

The deck contains 16 cards: 4 Viet Cong (VC) cards
4 Trap Cards 8 Tunnel Cards

Object

The VC player wins if he inflicts 5 casualties. The US player wins if he accumulates 5 tunnel cards.

Vc Rules

The VC player must keep his hands where the rat can see them. The VC cannot wear sunglasses. The VC must look the rat in the eyes.

The VC must verbally answer all questions by the rat.

Turn Sequence

There are 8 phases in a turn:

1. Draw Phase
2. VC Phase
3. Trap Phase
4. Advance Phase
5. Cross Examination Phase
6. Action Phase
7. Revelation Phase
8. Result Phase

Draw Phase

The VC player draws 1 card. If the deck runs out, shuffle the discard & draw from it. He must look at it.

He must not show it to the US player.

Vc Phase

The US player may ask the VC: "Is it a VC?" The VC must always answer no.

Trap Phase

The US player may ask the VC: "Is it a Trap?" The VC must always answer no.

Advance Phase

The US player may ask the VC: "Is it safe?" The VC must always answer no.

Cross Examination Phase

The US player may repeat the 3 questions in any order as much as he likes. The VC must always answer no.

Action Phase

The US player must guess which card the VC has drawn: Tunnel, VC, or Trap. If he thinks it's a tunnel he must say: Advance. If he thinks it's a VC he must say: Shoot.

If he thinks it's a trap he must say: Search.

Revelation Phase

The VC shows the US player the card.

Result Phase

If it is a VC and the rat guessed correctly: Discard the card. If it is a VC and the rat guessed incorrectly: The US player suffers one casualty. If it is a Trap and the rat guessed correctly: Discard the card.

If it is a Trap and the rat guessed incorrectly: The US player suffers one casualty. If it is a Tunnel and the rat guessed correctly: The US player keeps the card. If it is a Tunnel and the rat guessed incorrectly: Discard the card.

Game Designers Notes

I hope this game doesn't offend. If it does, e-mail me and I'll remove it.

Turtle Run

Introduction

Board & Dice game for 2 players. Each player controls a nest of newly hatched baby sea turtles Trying to make their way across the beach to the sea.

Winning

The player who gets the most of his turtles off the map & into the Sea wins.

The Board

Use a chessboard (8 X 8 Grid). One edge of the board is the shore, where the sea meets the land. The row farthest away from the shore is the Nest Row.

On each corner of the Nest row is a nest. Each player controls one nest.

The Pieces

Each player starts with 6 Baby Sea Turtle Tokens in his nest. Players have tokens of different colors. There are 3 predator Tokens: The Crab, The Gull, and the Raccoon.

Dice

Six sided dice are needed.

Setup

Each player places his turtle tokens in his nest. Players roll high on 1D6 to see who goes first. The Predator Tokens are placed spaced out on the Shore-line row.

Turtle Tokens can stack. Predator Tokens cannot.

Turn Sequence

On your turn roll 2D6. If the rolls are different: Use each die to move 1 of your turtles that many spaces (move 2 turtles) Moves can be orthogonal or diagonal. Turtles cannot move into or through predators.

A roll does not have to be exact for a turtle to move off the map. Turtles can only move off the map if going into the sea. If the rolls are the same (for example: two 5's): Move one predator that many spaces (in the same example, move one predator 5 spaces) Moves can be orthogonal or diagonal.

Predators cannot move into or through other predators. A predator eats every turtle it moves through or lands on. (Hope one doesn't make it into your nest) Predators cannot move off the map.

If you have no turtles left on the map, you can continue playing (rolling dice on your turn) in order to try to move the predators.

Twelve Brothers

Introduction

Card game for 2-6+ players. Fantasy World Setting. King Jaspar the Just is Dying.

Only one of his 12 sons can ascend to the Throne. This can only mean that 11 sons must first die.

Players, Brothers, & Favorites

Each player is betting on up to 4 of the 12 Brothers to win the Crown. The 4 Brothers that a player is betting on are his Favorites.

Victory

If one of your Favorites is the last left alive, you win. More than one player can win. It is also possible that all players loose.

The Decks

There are 2 Decks: The Action Deck and The Brothers Deck. Note the Brothers deck is used to make the Fate Deck. Decks are kept face down, and discards face-up.

Cardset Available

Thanks Ron!!! [Click Here](#)

Action Deck

The action deck contains 4 types of cards: Kill, Plot, Save, Event

The Brothers Deck

There are 4 copies of each card: Charles the Cruel William the Bold Archibald the Brave Gregory the Great Wolfgang the Wise Rothgar the Ruthless Stephan the Strong Ivan the Terrible Morgan the Merciless Victor the Vile Fredrick the Fierce Robert the Black

Setup

First take 1 copy of each Brother from the Brother deck and Set it aside in a mini 12 card deck called the Fate Deck. From the remains of the Brother Deck, each player is Dealt 4 cards which are to be his Favorites (These are kept hidden). Each player starts the game with a hand of 2 Action cards.

The most Treacherous player goes first.

Turn Sequence

Players take turns. Each turn has 6 Phases:

1. Plot Phase
2. Fate Phase
3. Event Phase
4. Kill Phase
5. Save Phase
6. End Phase

Plot Phase

Draw 1 Action Card. If the Deck runs out, shuffle the discard and draw from it.

Fate Phase

Draw 2 Brothers from the Fate Deck. They are put face up on the Table. These are known as the Active Brothers.

If the Deck runs out, shuffle the discard and draw from it.

Event Phase

You may play (discard) an Event card.

Kill Phase

You may play 1 Plot card and 1 Kill card to cause One Active Brother (your choice) to kill the other (target) Active Brother. This is referred to as an Assassination Attempt (AA). You may choose not to make an AA.

Save Phase

Any player (starting from your left going clockwise) may Play a Save card to cause an Assassination Attempt to Fail. If no one plays a Save card, the AA Succeeds. If killed, the Target Brother is put into the Dead Pile.

All cards played this turn are discarded.

End Phase

Max hand size is 5 cards. Discard excess cards.

Action Deck Card Notation

- K** Kill
- P** Plot
- S** Save
- E** Event

Twelve Labors Of Hercules

Introduction

Card game for 2-4 players. Theme Greek Mythology. The Adventures of the Demi-God Hercules (Hercules is Romanized. It is Heracles in Greek) Each player tries to complete the most Labors and Adventures.

Victory

The game ends when all 12 Labors have been completed. Once one player has completed a Labor it is

finished and is no longer available to other players to complete. The player with the most Labor Points at the end of the game wins.

The Board

The Board is a circular track divided into 12 spaces.

#	Space:	Instructions:
1.	Greece	Draw 1 Card or take top card of Discard
2.	Mycenae	Next turn move to any empty Space
3.	Delphi	Look at top 7 cards of the Hero Deck
4.	Mount Olympus	Draw 2 Cards
5.	Thrace	Draw 1 Card or go to Anatolia next turn
6.	Black Sea	Discard 1 Card and Draw 2
7.	Anatolia	Draw 1 Card or Go to Greece next turn
8.	Mediterranean	You may Complete Top Adventure Card
9.	Italy	Evander: Draw 3 Cards and Keep 1
10.	Spain	Draw 1 Card or go to Africa next turn
11.	Crete	Next turn roll 2 Dice to move and pick 1
12.	Africa	Draw 1 Card or go to Mediterranean next turn

The Decks

There are 3 Decks:

1. The Labors Deck
2. The Hero Deck
3. The Adventure Deck

The Labors Deck

This deck has 12 Cards: The 12 Labors. Each has 3 to 6 requirements to complete.

The Hero Deck

Each card provides 1 or 2 Requirements needed to complete Labors & Adventures.

The Adventure Deck

Like Labors but easier. Each has 1 to 2 requirements to complete. The Adventure Deck is kept Face-up.

Victory Piles

Each player has a pile where he keeps his completed Labor and Adventure Cards.

Pawns

Each player gets a pawn of a unique color to represent his version of Hercules.

Dice

Dice are used for movement.

Setup

Players place their pawns on the Mycenae space. Each player draws 2 Hero Cards. Shuffle the 3-4 Requirement Labors together.

Shuffle the 5-6 Requirement Labors together. Place the 3-4 Labors on top of the 5-6 Labors. Flip over the top 4 cards of the Labor Deck.

These are called Revealed Labors. Every time a Labor is completed flip over the next card in the deck as a replacement. The Strongest Player goes first.

Turn Sequence

Players take turns. Each turn has 4 Phases:

1. Move Phase
2. Action Phase
3. Labor Phase
4. End Phase

Move Phase

Roll 1D6 and move that many spaces in either direction. If you land on an opposing player steal 1 random Hero card from his hand and skip Action & Labor Phase. (If you land on 2 or more players steal from just one of your choice.)

Action Phase

If you did not land on another player, follow the instructions on the Board Space you entered. If you

Labor:	Location:
Lion of Nemea	Greece
Hydra of Lerna	Greece
Golden Hind of Ceryneia	Greece
Wild Boar of Erymanthus	Greece
Augean Stables	Greece
Birds of the Stymphalian Marsh	Greece

End Phase

Max hand size is 7 cards. Discard excess cards.

Labor Deck Card List

Labor:	LP	Requirements:
Lion of Nemea	4	Net, Wrestle, Club, Bow
Hydra of Lerna	4	Sword, Bow, Fire, Companion
Golden Hind of Ceryneia	3	Bow, Track, Agreement
Wild Boar of Erymanthus	4	Track, Club, Wit, Bow

Heracles 12 Labors

Typhoons & Turtle Ships

Introduction

Card Game for 2 players. Simulation of the Invasions between Japan & Korea.

Victory

The first player to win a hand on his own turn, as the Invader, wins the game.

Setup

One Player takes the Role of the Japanese. The Other Player is the Mongols/Koreans/Chinese. The Mongols go first.

The Deck

Players share a common deck.

Turn Sequence

Players take turns. The active player is called the Invader. The other player is the Defender.

Each turn has 6 Phases:

1. Preparations Phase
2. Logistics Phase
3. Typhoon Phase
4. Naval Phase
5. Conquest Phase
6. Retire Phase

Preparations Phase

Each player fills his hand to 10 cards.

Logistics Phase

Each player may discard up to 5 cards & draw replacements.

Typhoon Phase

The Defending player may play (discard) a Typhoon card to end the turn.

Common Deck Card List

Naval Phase

Each player plays his Sea cards: A player may play a max of: 1 General, 2 Fleets, and 2 Tactics cards Each player adds up the Total Strength of all of his Sea cards. The player with the higher Strength wins. The Defender wins ties.

If the Defender wins, the turn ends If the Invader wins, continue to Conquest phase. Discard played cards.

Conquest Phase

Each player plays his Land cards: A player may play a max of: 1 General, 2 Armies, and 2 Tactics cards Each player adds up the Total Strength of all of his Land cards. The player with the higher Strength wins. The Defender wins ties.

If the Defender wins, the turn ends and the game continues. If the Invader wins, he conquers his enemies' country and wins the game. Discard played cards.

Retire Phase

Players may discard none, some, or all of the cards in their hands.

Card List Notation

Underdark Adventures

Introduction

Board & Card game for 2+ players. Based on the Dungeons & Dragons Underdark Setting. Quest for the Underdark Maps

The Map

The Map is a Track 40 spaces long with start & end spaces.

Pieces & Dice

Each player has a Pawn of a unique color to represent his Adventuring Party 20 & 6 sided dice are needed.

Adventurers

You control a party of adventurers (initially six). Adventurers are also referred to as Characters. Characters differ in Race and Class.

There are 3 Class types: Mage, Rogue, and Fighter.

The Event Deck

Players share a common Event Deck. The deck has 2 types of cards: Aid cards & Foe cards There are 2 types of Foe cards: Traps & Creatures There are 2 types of Creatures: Monsters & Intelligent Aid cards include: Prestige Classes, Weapons, Armor, Items, One use Items, & Spells. Every Aid card is specific for either Mage, Rogue, or Fighter Characters.

Victory

Return your party to the Start space with the Underdark Maps.

Setup

Roll on the Terrain table for each space on the board. Each player gets 6 characters. Roll on the Random Adventurer table to generate your party.

Each player is dealt a hand of 7 cards. Players roll high on 1D20 to see who goes first. Players pawns start in the start space.

A Token representing the Underdark Maps is placed in the End Space. Note: the Start Space is a 'safe' area: No battles, no traps, no Navigation rolls.

Course Of The Game

Phase I Players take turns moving their Parties towards the End space. Phase II The party that reaches the End space first gains possession of the Underdark Maps. To win, that party must turn around & move back to the Start space.

This party becomes known as the Map party. Opposing Parties can now move in either direction. If an opposing party defeats the Map party in battle, they gain possession of the Underdark Maps and become the new Map party.

Terrain Table

Each space of the track will be one of several types:

1D20	Type:	Type	Extra	Notes:
1	City	C	O	Intelligent Foes get +3
2	Dungeon	C	F	Intelligent Foes get +3
3	Shaft	N	O	Navigable
4	Lava Tubes	N	F	Navigable
5	Mine	C	F	Navigable
6	Cave	N	F	Navigable
7	Cavern	N	O	Monster Foes get +3
8	Abyss	N	O	Barrier
9	Bone Cave	N	F	Monster Foes get +3
10	Labyrinth	C	F	Barrier
11	Web Cave	N	F	Barrier
12	Rift	N	O	Barrier
13	Vault	N	O	Navigable
14	Portal	C	F	Roll on Portal Table
15	Earth Node	C	F	Mages get +3
16	Sickstone	N	F	Danger

1D20	Type:	Type	Extra	Notes:
17	Magma	N	F	Danger
18	Sea Cave	N	W	Barrier
19	River Canyon	N	W	Barrier
20	Quickstone	N	F	Danger

C Civilized; N = Natural; O = Open; W = Water, F = Confined

Portal Table

1D6	Notes:
1-2	Go Back 1D6 Spaces
3-4	Fight a Planar Foe of Level = 1D20
5-6+	Go Forward 1D6 Spaces

Get +1 to the roll per Mage in your party. This is called the Portal roll.

Random Adventurer Table

1D20	Card Name	Class	Notes:
1	Chitine Renegade	R	Spiderlike Humanoids
2	Imaskari Wizard	M	Ancient Isolated Humans
3	Male Drow Wizard	M	Dark Elves
4	Duergar Fighter	F	Grey Dwarves
5	Gloaming Sorcerer	M	Winged Glowing Humanoids
6	Grimlock Barbarian	F	Blind Brutish Humanoids
7	Kuo-Toa Exile	R	Amphibious Humanoids
8	Slyth Druid	M	Amorphous Humanoids
9	Svirfneblin Guide	R	Deep Gnomes
10	Derro Scout	R	Insane Dwarves
11	Illithid Wizard	M	Mind Flayers
12	Minotaur Marauder	F	Bull Headed Humanoids
13	Orog Mercenary	F	Deep Orcs
14	Quaggoth Warrior	F	Savage Humanoids
15	Tanarukk Bodyguard	F	Demon Orcs
16	Troglodyte Raider	R	Reptilian Humanoids
17	Kuo-Toa Monk	F	-
18	Slyth Ranger	R	-
19	Female Drow Cleric	M	Priestess of Lolth
20	Reroll for Race	X	Pick Class

Turn Sequence

Players take turns. Each turn has 7 Phases:

1. Event Phase
2. Difficulties Phase
3. Recruit Phase
4. Attachments Phase
5. Move Phase
6. Encounter Phase
7. Battle Phase

Event Phase

Draw 2 cards from the Event Deck If the deck runs out, shuffle the discard & draw from it. Max hand size = 7 cards. Discard excess cards.

Difficulties Phase

If your party is in a Barrier space roll 1D20. This is the Barrier Roll. Add 1 for every Rogue in your party.

On a roll of 10 or less your party cannot find its way and you may not move in Move Phase. If your party is in a Danger space roll 1D20. This is the Danger Roll.

Add 1 for every Rogue in your party. On a roll of 10 or less you must discard 1 random party member. Barrier & Danger Roll are collectively called Navigation Rolls.

If your party has the Underdark Maps they get +5 to Navigation Rolls.

Recruit Phase

If you have less than 6 Characters roll 1D20. This is the Recruit Roll. On a roll of 18+ gain 1 new party member.

Add 3 to the roll if you are in a City or Mine Space.

Attachments Phase

You may attach "Attachment" cards from your hand to Appropriate party members. These include: Prestige Classes, Weapons, Armor, and Items.

Move Phase

Move your party 1D6 spaces. This is known as the Move Roll. (Forward in Phase I or either way in Phase II.)

Encounter Phase

If you are in a space not occupied by an opposing party, any Opponent may play a Foe card on you. If your opponent plays a Trap card on you roll 1D20. This is the Trap Roll.

Add 1 for every Rogue in your party. On a roll of 10 or less you must discard 1 random party member.

Card List Notation

Card Type:	Force	Notes:
W = Weapon	+1	Max 1 per Character
A = Armor	+1	Max 1 per Character
I = Item	+1	Max 3 per Character

Battle Phase

If in Move phase you landed on an opposing party, or an opponent played a Creature Foe on you in Encounter Phase, you must fight. Determine the Force Total of your Party. . . Force Total = 1D20 + (# of Party Members + # of Attachments) + (2 X # of Spells & One use Items you play from your hand) You may only play one Spell per Mage in your Party. Note: the 1D20 is referred to as the Battle Roll.

Determine the Force Total of the opposing party the same way. Reroll ties. The side with the higher total wins. The loser must discard one random Character.

The winning party gets the Attachments of the discarded character. The Force Total of a Creature Foe = 1D20 + Foe Level. If you defeat a Creature draw a card.

If you lose vs a creature, discard a random character. At the end of the turn, discard any Foe card and All played Spells & one use Items.

Armor Save

If a character with Armor is killed roll 1D6. This is called the Armor Roll. On a roll of 4+ the Armor is discarded instead.

Card Type:	Force	Notes:
U = One Use Item	+2	1 Use then Discard
C = Prestige Class	+1	Max 1 per Character
S = Spells	+2	1 Use then Discard

utes.

Union & Confederacy

Introduction

American Civil War Theme. Module for the Warp Empires system. You must use the Warp Empires system to play this game.

Map

North America circa 1860-1865. Divide each State into several territories. Indicate Capitals & Major cities.

Turns

4 turns per year.

Victory

Either side wins automatically if all opposing units are destroyed. At the end of 1865: The North Wins if the North is completely unoccupied and union stacks occupy over 50% of Rebel states, otherwise the South wins.

Stacks & Units

Units are also called Divisions. Stacks are also called Armies. Leaders are also called Generals.

Setup

Each side starts with 10 Divisions in their Capital. The North starts with the leaders Robert Patterson and McDowell. The South starts with the leaders Joseph E. Johnson and Beauregard.

Action Deck

Players share a common Action deck.

Movement Rules

Stacks without leaders cannot move. Ships can move into coast spaces and spaces with rivers. Each Ship (Fleet) Unit can Transport one Division.

Any Move card can also be used for ships.

Union Unit Deck

Name	Move	#	F	Type
Infantry Division	M	40	2	I
Cavalry Division	F	20	2	C

Revenue Phase

There are no revenue points, instead: The North recruits 6 random units per turn. The South recruits 3 random units per turn. You cannot recruit more units than you have friendly Capitals under your control.

Recruited units start equally distributed in State Capitals.

Morale

After each battle the loser gets a "Demoralized" token and the victor removes a "Demoralized" token. If one side ever has 10 "Demoralized" tokens it gives up and the other side automatically wins the war. Having Washington or Richmond (re)captured is worth 3 tokens each time.

Upkeep Phase Rules

Ignore the revenue = units rule. Isolated (surrounded) stacks lose 10% of their force total in units per month.

Battle Phase

Leaders in excess of 2 in a Stack generate only 2 Force each. Leaders in excess of Divisions generate no Force. When determining casualties, Divisions are always lost before Leaders.

Historical War Rules Progression

1963+: Union improvements in weapons technology, industry, experience, and Leadership give all Union Divisions +1 Force. 1964+: Confederate manpower reserves are used up. All Confederate Divisions are -1 Force.

Enemies Disorganized	1	Negate Move
Slow to Move	1	Negate Move
Fail to Engage	1	Negate Move into occupied space
Skirmish	1	Negate Move into occupied space
Ford Stream	1	Battle: Attacker Force +6
Concentrate Forces	1	Battle: Force +4

Card Name	#	Notes
Switch Direction of Attack	1	Battle: Attacker Force +4
Well Defended Position	1	Battle: Defender Force +8
Feint	1	Battle: Force +2
Delay Assault	1	Battle: Defender Force +2
Reinforcements Arrive	1	Battle: Defender Force +5
Rally Troops	1	Battle: Force +4
Exhaustion	1	Battle: All enemy Divisions get Force -1
Rebel Yell	1	Battle: All Confederate Divisions get Force +1
Naval Blockade	1	Confederacy recruits one less Division this turn
Lightning Raids	1	Negate Move
Split their Forces	1	Battle: Force +7
Push Enemy Back	1	Battle: Force +3
Cross River	1	Move 1 stack
Enemies Confused	1	Battle: Force +6
Masterly Retreat	1	Battle: Negate 1 casualty if you lost
Cautious General	1	Battle: Negate Force of opposing General
Scouts	2	Look at units in target Stack
Spies	2	Look at opponents hand
Nervous Public	1	Opposing Stack in home territory must attack
Flank Attack	1	Battle: Attacker gets Force +8
Cavalry Reconnaissance	1	Look at opposing Stack.
Disastrous Assault	1	Battle: Destroy one opposing Inf. or Cav. Division
Attack the Center	1	Battle: Both sides discard one Division
Retreat	1	Battle: Neither side suffers any casualties
False Intelligence	1	Negate Move
Heavy Casualties	1	Opposing stack loses an extra unit at end of Battle
Forced March	2	Move 1 Stack
Union Rails	2	Union: Move 1 Stack (Fast)
Union Fleet	2	Union: Move 1 Stack (Fast)
Infernal Machines	2	Destroy target Ship
Counterattack	1	Battle: Defender gets Force +6
Rear Attack	1	Battle: Force +9
Bayonet Charge	1	Battle: Infantry units get Force +2
Cavalry Charge	1	Battle: Cavalry units get Force +2
Bombardment	1	Battle: Artillery units get Force +2
Snipers	1	Battle: Kill opposing General
Killed in Action	1	Battle: Kill opposing General
Travel on Roads	2	Move 1 Stack
Entrenched	1	Battle: Defender gets Force +4
Low Ammo	1	Battle: All enemy Divisions get Force -1
Extra Ammunition	1	Battle: All your Divisions get Force +1
Attack with Everything	1	Battle: Attacker gets Force +7
Engineers	1	Move 1 stack
Concentrate Attacks	1	Battle: Destroy one opposing Division
Earthworks	1	Battle: Defender gets Force +5
Bombardment	1	Battle: Artillery units get Force +2
Fear of Exposing Flank	1	Negate Move
Humiliation	1	Move defeated stack towards Home Capital
Seize the Initiative	1	Move 1 Stack
Block Supply Lines	1	Negate Move
Find Marching Orders	1	Look at opponents hand & next 7 cards in deck
Diversion	1	Battle: Attacker gets Force +3
Badly Executed Plan	1	Battle: Opponent gets Force -8

Card Name	#	Notes
Prevent Reinforcements	1	Battle: Force +5
Pierce Enemy Line	1	Battle: Attacker gets Force +6
Attacking Waves	1	Battle: Attacker gets Force +5
Loved by his Men	1	Battle: General gets Force +5
Missed Opportunity	1	Battle: Attacker gets Force -7
Shocking Carnage	1	Battle: Both sides discard one Division
Cut off Escape	1	Battle: Attacker gets Force +9
Reinforcements	1	Battle: Move 1 Division (into the Battle)
Reinforce Weak Point	1	Battle: Defender gets Force +5
Reserves in Support	1	Battle: Force +4
Delayed at Bridge	1	Battle: Attacker gets Force -4
Pursue Retreating Army	1	Defeated stack loses 1 additional Division
Breakthrough	1	Battle: Attacker gets Force +5
Pontoon Bridges	1	Move 1 Stack
Foolhardy Assault	1	Battle: Attacker loses 2 Divisions
Deserters	1	Target Stack loses 1 Division
Volunteers	1	Recruit one extra Division
Telegraph	1	Battle: Draw 2 cards
Dysentary	1	Target stack loses one Division
Draft	1	Recruit one extra Division
Conscription	1	Recruit one extra Division
Partisan Rangers	1	Confederacy: Recruit one extra Division
Gunboat Support	1	Battle: Union gets Force +4
Siege	1	Battle: Negate Force of target Fortification
Separated by River	1	Battle: Force +5
Emancipation Proclamation	1	Union removes one Demoralized token
Strategic Victory	1	Draw 5 cards
Scurvy	1	Confederates lose one Division
Unconditional Surrender	1	Losing side of Battle loses all units
Invasion Force	1	Move 1 Stack
Incompetence	1	Battle: Battle: Negate Force of opposing General
Unprepared Defense	1	Battle: Defender gets Force -5
Patrols & Picket Posts	1	Battle: Defender gets Force +4
Momentum	1	Move 1 Stack
Got His Dander Up	1	Move 1 Stack
Defensive Trenches	1	Battle: Defender gets Force +5
Advance Guard	1	Battle: Attacker gets Force +2
Inexperienced Troops	1	Battle: Enemy gets Force -5
Battle Injury	1	Battle: Kill opposing Leader
Surprise Counterattack	1	Battle: Defender gets Force +5
Press Attack Hard	1	Battle: Attacker gets Force +4
March to the Sea	1	Move 1 Stack (to a coastal territory)
Push Back Flanks	1	Battle: Attacker gets Force +5
Consolidate Line	1	Battle: Defender gets Force +4
Commandeer Supplies	1	Move 1 Stack
Press Home Advantage	1	Battle: Force +6
Renew Assault	1	Battle: Attacker gets Force +4
Fight Another Day	1	Losing side of battle takes 1 less casualty
Swing the Balance	1	Battle: Force +8
Force Withdrawals	1	Battle: Force +5
Hopeless Position	1	Battle: Opponent has Force -7
Live Off the Land	1	Move 1 Stack
Inconclusive Battle	1	Both sides suffer equal casualties

Card Name	#	Notes
Marshal the Forces	1	Move 1 Stack
Determined Push	1	Battle: Attacker gets Force +4
Heavy Fighting	1	Both sides take one extra casualty
Shot by own Troops	1	Battle: Kill opposing Leader
Terrain Advantage	1	Battle: Force +6
Leader Sacked	1	Discard Target Leader that just lost a Battle
Tactical Blunder	1	Battle: Opponent has Force -6
Timid Leadership	1	Battle: Battle: Negate Force of opposing General
Pincer Movement	1	Battle: Attacker gets Force +6
Lethargic Pursuit	1	Losing side of battle takes 1 less casualty
Trap Retreating Forces	1	Losing side of battle takes 1 extra casualty
Repulse Assault	1	Battle: Defender gets Force +6
Dug-In	1	Battle: Defender gets Force +7
Two-Pronged Invasion	1	Move 2 Stacks
Cavalry Raids	1	Negate Move
Fall from Horse	1	Battle: Discard Target Leader
Disengage	1	Both sides take one less casualty
Bogged Down	1	Negate Move
Bold Plan	1	Move 1 Stack
Cross Country Thrust	1	Move 1 Stack
Gap in the Line	1	Battle: Force +6
Reserve Division	1	Battle: Force +6
Slash & Burn	1	Move 1 Union Stack in Southern Territory
Wheel the Line	1	Battle: Force +5
Renew Attack	1	Battle: Attacker gets Force +4
Sabotage Rail Lines	1	Negate Move
Take the Ridge	1	Battle: Attacker gets Force +8
Fail to Act	1	Negate Move
Call Opponent's Bluff	1	Battle: Force +5
Risky Maneuver	1	Battle: Force +5
Night Fighting	1	Battle: Force +2
Cavalry Battle	1	Battle: Destroy opposing Cavalry unit
Artillery Duel	1	Battle: Destroy opposing Artillery unit
Junior Commanders Shine	1	Battle: Force +6
Valor & Heroism	1	Battle: Force +6

Units

Use chits to represent units. Units include Leaders & non-leader units.

Warp Empires Ruleset

Introduction

Generic ruleset for a series of empire building/conquest games.

Map

The map depicts an irregular, interlocked set of territories.

Control Markers

Use chits to represent control markers.

Deck

Players share an action deck. In some games, each player will have their own action deck. The action deck cards allow you to move your units.

Setup

Most Leader units will be in play. Others will be mixed into the unit chit pile. Each player will start with several non-leader units in play.

Starting points of units will be determined by the scenario.

Turn Sequence

Players take turns. Each turn has 7 phases: Draw Phase Move Phase Battle Phase Revenue Phase Recruit Phase Upkeep Phase Control Phase

Draw Phase

First discard any cards you don't want. Each player draws 5 action cards. Max hand size = 7. Discard excess cards.

If the deck runs out, shuffle the discard and draw from it.

Move Phase

Use Action cards to move stacks or units in stacks. A Fast unit can move 1-3 spaces. A Medium speed unit can move 1-2 spaces.

A Slow unit can move 1 space. Units can move into but not through opposing stacks. Fortifications cannot move (Move = 0).

Your opponent can only look at the top unit of your stacks

Battle Phase

When two opposing stacks occupy the same territory there will be a battle. Each unit has a force value. Add up the total Force values for each side.

Players may play action cards to increase their force value. If one stack has a Leader and the other does not, the stack with the leader gets an additional 5 Force. The side with the highest force value wins.

The losing stack must retreat one space. The losing stack loses half of its units. The winner picks the first unit lost, the loser picks the remainder. Fortification units in the losing stack are destroyed automatically.

The winning stack loses units with a force equal to at least half the force total lost by the losing stack. The winner decides which units are lost. Destroyed units

are returned to their chit pile. Captured leaders are set aside and not returned to the chit pile.

After a battle both sides replenish their hands to 7 cards.

Revenue Phase

Gain revenue points for every revenue generating territory you control.

Recruit Phase

Draw 5 random units from the unit chit pile. Purchase units. A unit's cost is equal to its Force value. If you purchased all the drawn units, draw another 1D6 random units.

Revenue may be saved from turn to turn. Discard unpurchased units back to your unit chit pile. Units start in any revenue generating territory you control.

Upkeep Phase

Number of Units that automatically receive upkeep = 5 x total Revenue. Discard excess units. Example: You generate 10 revenue points per turn...

You may have up to 50 units.

Control Phase

Place a control marker on every revenue generating territory occupied by one of your units. Only one control marker per space.

Unit Deck Abbreviations

- S** Slow
- M** Medium speed
- F** Fast
- F** Force
- F** Fortification
- #** Number of that unit in the chit pile.

United States

Introduction

Educational Geography card game. Subject: The United States of America.

The Deck

The deck has 50 cards. One for each State. Each Card just lists the name of one state.

Setup

Each player is dealt 7 cards. Turn order is reverse age order. Youngest player goes first.

Turn Sequence

Players take turns. Each turn has 3 Phases:

- Draw Phase
- Meld Phase
- Discard Phase

Draw Phase

Take the top card off of the top of the Deck or the Discard pile.

Meld Phase

You may play one or more melds to the table from your hand. A Meld consists of 3 or more States that are adjacent and/or connected. For example: California, Oregon, and Washington would be a legal meld.

California & Washington are not adjacent, but they are connected by Oregon.

Discard Phase

Max hand size = 7 cards. Discard excess cards. The Discard pile is face up.

End Game

The game ends when there are no more cards left to be drawn, and No one can make any more Melds.

Scoring

Tally points at the end of the game. Get one point for every State you played in a Meld.

Warm Up Exercises

- Name all 50 States from Memory.
- Someone names a State. You name all States adjacent to it.
- Get copies of an unlabeled map and write in the names of the States.

Easier Variants

- Put a picture of the state on each card (To make it easier)
- Play with a Labeled Map nearby that everyone can see.
- Play with an unlabeled Map nearby.

Scoring Variant

- Get 5 points for playing a 4 card Meld.
- Get 7 points for playing a 5 card Meld.
- Get 9 points for playing a 6 card Meld.
- Get 11 points for playing a 7 card Meld.
- Get 13 points for playing an 8 card Meld.

Draw Variants

- In draw Phase draw 2 cards.
- In draw Phase always fill your hand to 8 cards.
- When you play a Meld draw an equal number of replacement cards.

Alaska & Hawaii

- Consider Alaska to be adjacent to Washington.
- Consider Hawaii to be adjacent to California.
- Consider Alaska & Hawaii to be adjacent to each other.

Solo Variants

- The game can be played solo as is.
- Solo scoring: Subtract one point for every turn you play.

Interactive Variants

- Players may Trade cards.

Punishing Variants

- If you make an incorrect Meld, put it back in your hand and skip your next turn.
- If you make an incorrect Meld, put it back in your hand and discard a card.

Universal Hero

Introduction

Conversational game based on the ideas of Joseph Campbell. In his book "The Hero with a Thousand Faces" Campbell describes a pathway of steps common to the adventures of all heroes in all cultures:

Stage I: Departure

1. The Hero in the everyday world is called to adventure.
2. The Hero may at first refuse, but he eventually goes.
3. The Hero meets a protector & guide who offers supernatural aid.
4. The Hero encounters the first threshold to a new (magical) world.
5. The Hero may fight a guardian opposing him at the threshold.
6. The Hero plunges fully into the new world.

Stage II: Initiation

7. The Hero follows a road of trials.
8. The Hero may receive aid from companions & unseen forces.
9. The Hero is abducted, or must take a journey by night or sea.
10. The Hero fights a symbolic dragon
11. The Hero may suffer ritual death or dismemberment.
12. The Hero is recognized or reunited with his father (family, fiends).
13. The Hero becomes nearly divine, conquering ignorance & fear.
14. The Hero receives 'the ultimate boon' (damsel, elixir of life, etc.).

Stage III: Return

15. The Hero takes a 'magical flight' back to his origi-

nal world.

16. The Hero must readjust to his original life.
17. The Hero becomes master of two worlds (material & inner self).
18. The Hero has conquered the fears that keep him from living fully.

Setup

Players pick a book or story or movie that all players are familiar with. Randomly determine player turn order.

Turn Sequence

Play is divided into rounds. Within a round, each player gets a turn. (Each round starts with a different player - rotate clockwise) Each game has 18 rounds, corresponding to the 18 steps listed in the introduction.

On your turn you must explain how the story relates (or does not relate) to the particular Step you are on. Other players judge and reward you for your response (at the end of the round): * Complete (best) answer - Earn 2 tokens * Partial answer - Earn 1 token * Pass or bad answer or nothing else to add - Earn 0 tokens Note: Only the first player to go in the round can get a 2 token 'complete answer' unless the first player(s) pass or earn zero points. The player with the most tokens at the end of the game wins.

Suggested Tales

King Arthur, Star Wars, Harry Potter, Lord of the Rings, Greek Myths, etc.

University

Introduction

Card game for 2-4+ players. Each player represents a University.

Victory

The Player with the most Curriculum points at the end of the game wins.

Game End

The game ends the end of the turn when

1. Any one player makes a Graduate Liberal Arts Meld or
2. The Deck runs out.

Curriculum Points

Curriculum Points (CP) are awarded and totaled up at the end of the game.

The Deck

Players share a common deck. The deck has 5 types of cards: School cards Facility cards Title cards Specialty cards Event cards

Public Or Private

A Public University gets to draw 1 extra card on its first turn. A Private University may put 1 specialty card into play during the game.

Setup

The most educated player goes first. Each player declares whether they are a public or private institution. Each player is dealt 10 random cards

Cards	CP	Rank:
1	1	Associates Degree
2	3	Bachelors Degree
3	7	Masters Degree

For every card after 5 you earn an extra 10 CP. Advanced Schools (Medicine & Law) earn double CP. Liberal Arts Associates Meld: Earn 10 CP if you have 1 card of each of the 7 Basic Schools.

Turn Sequence

Players take turns. Each turn has 4 Phases:

1. Draw Phase
2. Exchange Phase
3. Play Phase
4. End Phase

Draw Phase

Draw 2 cards from the deck, or take The top card of the discard, but only if it is not an Event card.

Exchange Phase

Players may trade cards from their hands. The current player must approve all trades and has the Power to end this phase at any time.

Play Phase

Play 1 or more cards. Event cards produce an effect and are then discarded. You may play a max of 1 Event card on your turn.

All other card types are called permanents. When a permanent is played, it is placed face up in front of its owner. Permanents stay in play until some Event or rule causes them to be removed.

Keep all School cards of the same suite you have played together.

End Phase

You must discard one card!!! You must have a minimum of 3 cards remaining in your hand at the end of the turn. If you do not have the minimum, you must pick up cards you have in play and Put them in your hand, until you have at least 3 cards in your hand. Max hand is 7 cards. Discard excess cards.

End Of Game Scoring

Each of your Schools earns CP according to the number of cards you own of that suite:

Cards	CP	Rank:
4	13	Doctorate Degree
5	20	Research Institution
6+	+10	World Class Institution

Liberal Arts Bachelors Meld: Earn 20 CP if you have 2 cards of each of the 7 Basic Schools. Liberal Arts Graduate Meld: Earn 30 CP if you have 3 cards of each of the 7 Basic Schools. Each Facility card you have in

play earns 4 CP.

Amenities Bonus: Earn 10 CP if you have 1 of each of the 5 Facility cards. Having a Title card in play earns you 5 CP (1 Title Max) If you are a Private School, Having a Specialty card in play earns you 5 CP (1 Specialty Max) **Winning Team:** The player with the Highest ranked Athletic School earns 7 points. **Business Incubator:** The player with the Highest ranked Business School earns 7 points.

Teaching Hospital: The player with the Highest ranked Medical School earns 7 points. **Legal Eagle:** The player with the Highest ranked Law School earns 7 points. **Patron of the Arts:** The player with the Highest ranked Art School earns 7 points.

Mad Scientists: The player with the Highest ranked Natural Sciences School earns 7 points. **Humanists:** The player with the Highest ranked Humanities School earns 7 points. **Freudians:** The player with the Highest ranked Social Sciences School earns 7 points.

Erector Set: The player with the Highest ranked Engineering School earns 7 points. If ranks for a particular School are tied, no one gets the bonus. Cards in your hand do not count towards end of game scoring.

Advanced Studies

You may only play Law and Medicine cards if you have already fulfilled the requirement for a Liberal Arts Bachelors Meld. Advanced Schools (Medicine & Law) earn double CP.

Title Card

Each player may during the game put 1 Title card into play. A Title card is worth 5 CP.

Facilities

You may put 1 of each type of Facility card into play. Each Facility card you have in play earns 4 CP.

Card List Notation

- A** Advanced School cards
- B** Basic School cards
- F** Facility cards
- T** Title cards
- S** Specialty cards
- E** Event cards
- #** Copies of that card in the deck

Attract Faculty	E	1	Switch 1 permanent with opponent
Ivory Tower	E	1	Negate 1 card just played
Autonomy	E	1	Discard X cards: Draw X+1 cards

Links

Wikipedia

Urbs Romana

Introduction

Tile laying game for 2-4 players. Players are constructing a city of the Roman Empire.

Victory

The player with the most Victory Tokens at the end of the game wins.

Game End

When the last square has been covered, (or if no further Tiles can be placed) or if all players pass in the same round; The round immediately proceeds to Scoring Phase, and then the Game ends.

The Map

Use a 8x8 Chessboard. All squares around the outside edge of the board are called exterior squares. Note: Historically many Greek and Roman cities really were designed on a Chessboard grid plan.

The Tiles

Tiles represent structures and resources. These are kept face down in a Tile Pile. Note that there are more Tiles than squares, so not all will be used.

Player Stones

Each player has a set of glass stones of a unique color.

Victory Tokens

Players share a common set of Victory Tokens.

Majority Counters

There is 1 Majority Counter for each of the 10 Tile Types: Food, Housing, Manufacturing, Government, Culture, Water, Trade, Religion, Defense, Entertainment

Governor Token

There is one Governors Token.

Setup

One player is randomly assigned the Governors Token. Shuffle the Tiles. Each player draws 5 random Tiles.

Tile Hands

Players keep their Hands (unplaced tiles) face-up.

Turn Sequence

Play is conducted in Rounds. Each Round has 3 Phases: Player Turns Phase Majority Phase End Phase

Player Turns Phase

Players take turns starting with the Governor and going clockwise. Each turn has 3 Segments: Action Segment Bonus Segment Draw Segment

Action Segment

The current player may take 1 Action. There are 6 possible actions:

1. Place 2 Adjacent Tiles: The Tiles must be adjacent to Tiles you have

already placed. The second may be placed adjacent (or not) to the first tile played.

2. Place 1 Non-adjacent Tile: This may be placed on any square on the Board.
3. Place 1 Adjacent Tile and gain 1 Victory Token (VT).
4. Place 1 Adjacent Tile and Discard Hand. Discard all Tiles from your hand.
5. Place 1 Adjacent Tile and Take 1 Tile of your choice from Opponents Hand.
6. Discard entire Hand (This is termed a "Pass")

On your first turn of the game you must pick the #2 action: Place 1 Non-adjacent tile.

Placement Rules And Limitations

Place one of your colored Stones on every Tile you place. Exterior Tiles must be placed on squares at the edge of the board. Interior Tiles must be placed on squares not at the edge of the board.

Defense Tiles cannot be placed Adjacent to each other. Religion Tiles cannot be placed Adjacent to each other. Government Tiles cannot be placed Adjacent to each other.

Entertainment Tiles cannot be placed Adjacent to each other. (Adjacent means sharing a side)

Bonus Segment

Certain Tile placements will earn bonus Victory Tokens (VT). Such Bonuses are only earned once, when a Tile is first played. Housing Tiles placed adjacent to Water Tiles will earn 1 Victory Token each.

(Example: You place an Aqueduct next to 3 Housing Tiles; You gain 3 VT) Manufacturing Tiles placed adjacent to Trade Tiles will earn 1 Victory Token each. Government Tiles placed adjacent to Culture Tiles will earn 1 Victory Token each. Religion Tiles placed adjacent to Entertainment Tiles will earn 1 Victory Token each.

Draw Segment

Fill you hand to 5 Tiles by drawing random Tiles from the Tile Pile.

Majority Phase

There will be 10 Majority Contests: The player with the most Food Tiles gets control of the Food Majority Counter. The player with the most Housing Tiles gets control of the Housing Majority Counter. The player with the most Manufacturing Tiles gets control of the Manufacturing Majority Counter.

The player with the most Government Tiles gets control of the Government Majority Counter. The player with the most Culture Tiles gets control of the Culture Majority Counter. The player with the most Water Tiles gets control of the Water Majority Counter.

The player with the most Trade Tiles gets control of the Trade Majority Counter. The player with the

most Religion Tiles gets control of the Religion Majority Counter. The player with the most Defense Tiles gets control of the Defense Majority Counter.

The player with the most Entertainment Tiles control of the Entertainment Majority Counter.

End Phase

The current Governor gives the Governor Token to the player to his left.

End Of Game Scoring

For each Majority Counter you control at the end of the game get 3 Victory Tokens. For every vertical, horizontal or diagonal line of 8 Tiles you were able to make earns you an additional 2 Victory Tokens at the end of the game.

Utopia

Introduction

Solo card, dice & record keeping game. Based on the old Intellivision Video Game. Build up your Island Paradise.

Disclaimer

Utopia is a licensed, copyrighted product. This is merely a fan site.

Victory

Beat your last score. Record your final score after 2 runs through the deck.

Stuff

You will need Paper, Pencil, Six sided dice & the deck

Setup

You start with 100 Gold Bars You start with 1000 Population You start with Zero Score Shuffle the deck

Turn Sequence

- Census Phase
- Taxes Phase
- Industry Phase
- Housing Phase
- Food Phase
- Flip Phase
- Fishing Phase
- Farming Phase
- Build Phase
- Piracy Phase
- Rebellion Phase
- Hurricane Phase
- Score Phase

Census Phase

Gain 25 Population

- -5 per Factory
- +10 for Hospital
- -5 if Food Shortage
- -5 if Housing Shortage
- +5 on first 10 Turns of game

Taxes Phase

Gain 1 Gold Bar per 100 Population.

Industry Phase

Gain 4 Gold Bars per Factory If there is a School, Factories earn +1 If there is a Hospital, Factories earn +1

Housing Phase

Each Housing card provides Housing for 500 Population. If not enough Housing is available, there is a Housing Shortage.

Food Phase

Each Fishing Boat & Crops card provides Food for 500 Population. If not enough Food is available, there is a Food Shortage.

Flip Phase

Flip over the top card of your deck. This is the NEW card.

Fishing Phase

If the New card is a Fish card, each Fishing Boat earns 1D6 Gold Bars.

Farming Phase

If the New card is a Rain card, each Crop earns 1 Gold Bar.

Build Phase

If the New card is a Building, Boat, or Crops, you may pay for it & put it into play. You may also pay for (rebuild) any Buildings, Boats, or Crops in your discard pile.

Piracy Phase

If the New card is a Pirate, roll 1D6:

D6	Result
1-5	Nothing
6	A Fishing Boat is destroyed

Roll Modifiers:

- -1 per PT Boat you own
- +1 per Fishing Boat you own after the first.

Rebel Phase

If the New card is a Rebel, roll 1D6:

D6	Result
1-5	Nothing
6	Rebellion

Roll Modifiers:

- -1 per Fort you own
- -1 for the School
- +1 for Housing Shortage
- +1 for Food Shortage

- +1 per Factory If there is a Rebellion, lose half your Gold & half your Score.

Hurricane Phase

If the new card is a Hurricane one random crop, building, or boat is destroyed on a roll of 5+ on 1D6.

Score Phase

Scoring is cumulative. Add to your running score: The Gold you earned this turn.

Card List

Card Name	#	Cost
Fort	2	50
Factory	4	40
Crops	8	25
School	1	35
Hospital	1	75
Housing	8	60
PT Boat	2	40

Card Name	#	Cost
Fishing Boat	4	25
Rebels	4	-
Pirates	2	-
Hurricane	2	-
Rain	8	-
Fish	8	-

Number of cards in deck

Valerian Quest

Introduction

Scenario for WarpQuest. Based on the Valerian movie. Each player represents their own version of The Spatio-Temporal Agent team of Valerian and Laureline.

Disclaimer

Valerian is a copyrighted, licensed property. This is merely a fan site.

The Scenario

There is only one Module. The track is 50 spaces long. The last space represents the conclusion of the

quest.

Victory

The first player to reach the last space wins the game.

Team Attributes

Each Team has the following traits: Hits (10) All Others (+0) Roll 10 times on the Attribute Table to see what Bonuses you get.

Attribute Table

1D6	Trait	Bonus
1	Hits	+1
2	Combat	+1
3	Stealth	+1

1D6	Trait	Bonus
4	Negotiations	+1
5	Piloting	+1
6	Agility	+1

Hits

If you are reduced to zero Hits you must go back to start. (In a solo game, you lose)

Landing On Another Team

If land on an opposing players pawn, you may steal a random Aid card, or send them back 1D6 spaces.

Fight & Piloting Challenges

If you lose a Combat or Pilot Challenge you Lose 1D6 Hits.

Negotiations Challenge

If you succeed in a Negotiations Challenge, you move forwards 1D6 spaces and Do not have to draw a card.

Agility & Stealth Challenges

If you fail an Agility or Stealth Challenge, you move backwards 1D6 spaces and Draw a card.

Alternate Challenges

Note that some challenge cards give alternate results for success or failure.

Card List

Name:	Notes:
Submarine Chase	Pilot Challenge
Invisible Gun	Aid: Stealth +2 or Combat +2
Information Brokers	Negotiations Challenge
Bubbles	Aid: Stealth +3
Ship Pursuit	Pilot Challenge (If fail go back 1D6)
Infiltrate Primitives	Stealth Challenge Difficulty +2
Tribal Warriors	Combat Challenge
Converter Critter	Aid: Negotiations +3
Overcome Guards	Combat Challenge

Name:	Notes:
Kill Droids	Combat Challenge Difficulty +2
Alien Brothel	Stealth Challenge
Gun to the Head	Aid: Negotiations +2 or Combat +2
Pursuit on Foot	Agility Challenge
Power Suits	Aid: Agility +3
Zero-G Maneuver	Agility Challenge Difficulty +1
Evade Rampaging Beast	Agility Challenge Difficulty +2
Dogfight	Pilot Challenge Difficulty +1
Bribery	Aid: Negotiations +3
Disobey Orders	Stealth or Agility Challenge
Security Council	Negotiations Challenge Difficulty +1
Noble Savages	Negotiations Challenge
Ship AI	Aid: Piloting +3

Escape Vehicle	Aid: Pilot +2 or Agility +2
Interdimensional Caper	Stealth Challenge Difficulty +1
Energy Discs	Aid: Agility +3
Traitorous Commander	Negotiations Challenge (If fail go back 1D6)
Bazaar Shootout	Combat Challenge (If fail go back 1D6)
Alien Commando Raid	Combat Challenge Difficulty +3
Medkit	Discard to Negate loss of 3 Hits
Oxygenator	Discard to Negate loss of 3 Hits
Insect Bot	Discard to Negate loss of 3 Hits
Mind Control Dart	Aid: Combat +2 or Stealth +2
Psychic Squid	Negotiations Challenge (Cannot use Aid cards)
Infiltration Team	Aid: Stealth +3
Alien Pimp	Negotiations Challenge
Valerian	Aid: Any +2
Laureline	Aid: Any +2

Vampire Prince

Introduction

2+ Player card game. Players are Elder Vampires vying to be the uncontested Prince of a city Based on the White Wolf RPG Vampire the Masquerade and The associated Deckmaster card game Jyhad.

Disclaimer

Vampire the Masquerade & Jyhad are licensed, trademarked, copyrighted properties. This is merely a fan site

Victory

Be the first to control cards with a combined political value of 20+ or Kill all the opposing Elder Vampires.

The Deck

Players share a common deck.

The Elder Vampires

Each player controls an Elder Vampire seeking to become the new Prince. This vampire has a Force of 5 and cannot attack, it can only defend when attacked. Cards that discard or control a target Vampire cannot be used against these Vampires.

Modifier cards cannot be attached to these Vampires. These Vampires cannot Block. These Vampires cannot be targeted for attack until a players third turn (and after).

Setup

Name your Elder Vampire. Determine what clan your Elder Vampire belongs to. If you control other Vampires of the same clan, they get Politics +1.

Each player starts with a hand of 7 cards. The oldest player goes first.

Turn Sequence

Players take turns. Each turn has 5 phases: Fate Phase Recruit Phase Event Phase Attack Phase End Phase

Vampire Prince Deck Card List

Fate Phase

Draw 2 cards. If the deck ever runs out, shuffle the discard & draw from it. You may win a political victory in this phase if you control 20+ points.

Recruit Phase

Put Vampire, Location, and Political cards into play. You may attach modifier cards to your Vampires

Event Phase

Play Event cards.

Attack Phase

You may attack with some, none or all of your Vampires. You may target any opposing Vampire. The attacked player may block an attack with any one of his Vampires.

Attacks are not combined. They are resolved in succession. Combat cards may be played to negate attacks or increase a Vampires force. Compare the Forces of the Attacking & Blocking (or Target) Vampire.

The Vampire with the lower force is killed (discarded). In case of a tie, neither Vampire is killed.

End Phase

Damage cards may be played on Vampires that were in combat last phase. You may play a Damage card to prevent a Vampire from being killed. Immobilized Vampires cannot attack or block. Their Force = 1.

Maximum hand size is 7 cards. Discard excess cards.

Card List Notation

P Political organization that supports you

E Event

L Location you control

C Combat Event

M Modifier (Disciplines, Traits, Retainers)

D Damage (Can be played on Vampire that has been damaged)

V Vampire

The number to the right of the V is the number of that card in the deck Vampires with a starting base Force + Politics = 4 or 5 are "Elder" Vampires

Card Name	Type	Force	Politics	Notes
Primogen	P	-	4	(City Ruling Council)

Control Mafia	E	-	-	Opponent must discard 3 cards
Control Police	E	-	-	Opponent must discard 3 cards
Spies	E	-	-	Look at opponents hand

Game Designers Notes

Wanted to do something less complicated than Jyhad. One difference between this & Jyhad is that

in Jyhad opponents were Methuselahs fighting on a global scale to destroy one another. This is a smaller scale: Players are Elders fighting to control a single city.

Victorian Villains

Introduction

2 player Card game. Victorian Fantasy/ Sci-Fi theme. CCG type Format.

Good & Evil

There are 2 sides: The Heroes and the Villains.

Victory

You win if at any time after the fifth turn, your Opponent has no major characters in play.

Dice

Six sided dice are needed.

The Decks

Each player has a unique deck. The two decks are:

1. The Heroes
2. The Villains

Card Types

C Characters

L Locations

E Events

W Weapons

V Vehicles

Tokens

- Tokens are used to represent lesser minions.
- Tokens and Characters are collectively referred to as Units.
- Tokens & Minor Characters are collectively referred to as Minions.

Wound Counters

When a Character is wounded put a Wound counter on it. Wound Counters give the attached unit Force -1. A Unit with zero or less Force is killed.

Card Traits

Characters (and other card types) may have one or more of the following traits: Many of these traits allow attachment of or use of certain other cards.

Trait:	Notes:
Minor	Character
Major	Character
Mastermind	Major Villain
Brawler	Descriptor
Marksman	Descriptor
Swordsman	Descriptor
Brute	Descriptor
Detective	Descriptor
Hunter	Descriptor
Scholar	Descriptor
Traveler	Descriptor
Inventor	See Invention Phase
Scientist	See Invention Phase
Vehicle	These can be Units or Objects attached to Units
Genius	See Genius Phase
Spy	See Spy Phase
Immortal	See Healing Phase
Holy	Fight +1 vs Immortals
Doctor	See Healing Phase
Underling	Discard this Hero instead of another in Assassin Phase
Facilitator	Gives one Hero +1 to any one roll once per turn
Captain	Captain Nemo can take the Nautilus from anywhere and

put into play, attached to himself in recruit phase. The same goes for Captain Mors & his Airship. You may discard the vessel to draw its respective Captain from the deck.

Setup

Each player draws 7 cards from his deck. Mulligan: Discard & redraw if your hand has no Characters.

Turn Sequence

Each turn has 13 phases:

- New Day Phase
- Genius Phase
- Healing Phase
- Minion Phase
- Invention Phase

- Recruit Phase
- Plot Phase
- Spy Phase
- Assassin Phase
- Plot Phase
- Intercept Phase
- Track Phase
- Attack Phase

New Day Phase

Draw 1 card from your deck.

Genius Phase

For each Character with Genius on your side roll once on the Plot Table:

1D6	Result:
1	Analysis: Opponent must discard 1 card
2	Predictions: Look at next 7 cards in either deck
3	Deduction: Look at opponents Hand
4	Lure: Gain Control of target Character
5	Recruit: Put any character in your deck into your hand
6	Contingencies: Draw 1 Card

Healing Phase

For each Wound counter roll 1D6. Remove the counter on a roll of 5+. This is called the Healing Roll. An Immortal gets Heal +3 to self.

A Doctor can give Heal +2 to any one roll per turn.

Minion Phase

Most Masterminds (and some other card types) can Generate one Minion Token per turn in this phase. All Minion Tokens are Units with Fight = 1.

Invention Phase

For each Character with Invention or Scientist skill on your side roll once on The Invention Table:

1D6	Result:
1	Research: Look at the next 7 cards in your deck
2	Build: Put an Invention Marker on a Target Unit
3	Eureka: Draw one card
4	Blueprints: Search your deck for a Vehicle or Weapon & put it into play
5	Failed Project: Nothing
6	Lab Explosion: Inventor receives a Wound Marker

Invention Markers give the attached unit Fight +1. If the Inventor is a Location (Not a Character) and there is an explosion, the Location cannot roll on the Invention table for 2 turns.

Recruit Phase

Put non-event card into play. Cards in play are placed face up in front of you. Vehicles and Weapons must be attached to Units.

Locations in the Villain deck must be attached to a specific Mastermind. Minor Villains must be attached to a specific Mastermind.

Plot Phase

The Villain player may attach plot cards to his Masterminds. Put a Plot Counter on each plot card already in play. There are Minor and Major Plot cards.

If a Minor Plot accumulates 3 plot counters, the Villain player discards it and Draws 1D6 cards. If a Major Plot card accumulates 4 plot counters, the Villain player automatically wins the game.

Martian Rules

Special Rules for the Martian "Villain". All Plots undertaken by the Martians become Major Plots of the Title "World Conquest". The Martians cannot attach Minor Characters or Vehicles. Martian Tripod Tokens are each Fight = 2.

Spy Phase

For each Spy on your side roll 1D6: on a roll of

1	Spy caught: Discard Spy
2-4	Nothing
5+	Discovery: Look at Opponent's hand.

Modified Roll:	Notes:
2 or less	Minion Interrogated: Get +1 to next Track Roll
3-5	Minion cannot find Heroes: Return Minion to Mastermind
6-7	Nothing
8-10	Hero Wounded (or discard an attached weapon or vehicle)
11+	Hero Killed

This is called the Assassin Roll.

Intercept Phase

Heroes may attempt to thwart the Villain's Nefarious Schemes. Each Hero picks a target Mastermind

Modified Roll:	Notes:
5 or less	On the Wrong Track: All Heroes get a Track -1 this turn.
6-9	Dead End: Nothing Found
10	Foiled: Discard one target Plot card
11+	Villain is Thwarted.

If the Villain is Thwarted, discard all Plot cards of that Villain in play. Every Mastermind not Thwarted

Assassin Phase

Each Major Villain may send some of his Minions to attack the Heroes. These are suicide Missions, The Minions are always killed. Roll 2D6 for each Minion sent.

Add the Fight of the Minion. Subtract the Fight of the target Hero. Event cards may be used to modify Force ratings.

Villain and rolls 2D6: This is called the Track Roll. Add the Track Bonuses of the Hero.

Event cards may be used to give additional Bonuses or Penalties. This is called the Sleuth Roll.

1D6	Result:
1	Neutralize: Opponent must discard 1 card
2	Machinations: Look at next 7 cards in either deck
3	Spies: Look at opponents Hand
4	Manipulations: Gain Control of target Character
5	Hirelings: Gain 2 Minion Tokens
6	Wheels in Motion: Draw 1 Card or put 1 Plot Counter on 1 Plot card in play

Attack Phase

The Heroes may attack any Mastermind Villain that was Thwarted this turn. Each Hero attacks seperately. (Hero's that attempted to Thwart a different Villain

cannot attack) The Hero must target a Minion of the Villain.

Roll 1D6 and add the Fight of the Hero. Subtract the Fight of the target Minion. This is called the Combat Roll. The Minion is always killed.

Modified Roll:	Notes:
#	Result
1 or less	Hero Killed
2-3	Hero Wounded (or discard an attached weapon or vehicle)
4-6	Hero Unscathed but must stop attacking
7+	Hero gets to make another attack with Fight -1

Roll 1D6. This is called the Showdown roll. (It is modified like a Combat roll)

Modified Roll:	Notes:
#	Result
1 or less	Hero Killed
2-3	Hero Wounded (or discard an attached weapon or vehicle)
4	Destroy Base (Discard Location Cards attached to Villain)
5	Villain Wounded (or discard an attached weapon or vehicle)
6+	Villain Killed

A Hero only gets to make one Showdown roll per turn.

Victory At Stalingrad

Introduction

Card game for 2 players. Theme: WWII Eastern Front Battle of Stalingrad One player is the Soviets. The other player is the Germans.

Victory

The German Player must win 3 Hands in a row (Ignore Ties) to win. If the German player has not accomplished this by turn 10 the Soviet player wins.

The Decks

Each player has a Unique deck. Each deck has 5 Suites with cards marked 1-10.

Turn Notation

The first 4 Turns are known as the Early Turns. The last 4 Turns (6-10) are known as the Late Turns. The early turns favor the Germans. Late turns favor the Russians.

Some cards can only be played in the Early Turns. Some cards can only be played in the Late Turns.

The German Deck

The German Deck has 5 Suites: Firepower Objectives Morale Tactics Forces

The Soviet Deck

The Soviet Deck has 5 Suites: Defense Locations Morale Tactics Forces

Turn Sequence

Each turn has 5 Phases:

1. Reserves Phase
2. Strategy Phase
3. Event Phase

4. Conflict Phase
5. Logistics Phase

Reserves Phase

Each player fills their hand to 7 cards. If a deck runs out, shuffle the discard and draw from it.

Strategy Phase

Players may discard up to 3 cards and draw replacements.

Event Phase

Starting with the German player, each player may discard a card to do a Special action. Players are limited to 2 such actions in this Phase. The Special Action depends on the Suite of the card discarded.

Firepower = Opponent must discard 1 Random card from his hand Objectives = Rank of Opponent's Card Combo this turn is minus one Defense = Draw 2 cards from your Deck Locations = Rank of your own Card Combo this turn is plus one Morale = Draw 1 card from your Deck Tactics = Look at Opponent's hand Forces = If you win this Hand draw one extra card next turn

Conflict Phase

Players reveal their hands. The player with the best card combination wins the Hand. Card Combinations are poker-like.

Card Combinations

Combinations are based on a hand of up to 5 cards. These Combos are ranked from lowest to highest. Higher Ranked combos beat lower ranked combos. Ties are possible.

Rank	Combo:
1.	High Card
2.	One Pair
3.	Two Pair
4.	Three of a Kind
5.	Full House (3 of a Kind and a Pair)
6.	Straight (5 numbers in a row)
7.	Four of a Kind
8.	Flush (5 cards same suite)

Rank	Combo:
9.	Straight Mix (5 numbers in a row: All Suites different)
10.	Straight Flush (5 numbers in a row: All the same Suite)
11.	Five of a Kind

Logistics Phase

Discard all cards. Record the winner of the Hand.

Vietnam Air Fury

by Joe Nixon

commandel@yahoo.com

Introduction

The following are changes in the Space Fury rules:

2. Detection Phase

"cloaked" is to be considered "jamming radar". communication does not violate "jamming radar".

4. MOVEMENT PHASE

Movement is based on the type of Aircraft. There is no concept of "Jump Drives" or "Jump points" in this game.

6. Missiles

New Weapon AAMs: Last for 3 turns, They can be aimed at targets in a 60 degree arc extending from the front of the fighter.

FIGHTER COST	ENHANCEMENTS
20	0
21	1
23	2
26	3
30	4
35	5

Basic Systems

All fighters have these systems built into their cost:
Hull- Contains all other systems. Affords minimal protection.

- Base Armor Modifier = 0.
- Cockpit & Life support- 1 pilot or 2 pilots. All the Oxygen that maybe needed is provided.
- Fuel Injector (Reactor Core)-
- Fuel Reserve- Enough fuel for whatever the radius of flight is, in dogfights 10 miles of Fuel are lost every turn.
- Power grid- Distributes power to all systems.

Primary Enhancements Table

D10	ENHANCEMENTS	NOTES
1	Targeting +1	ToHit Modifier +1 with one weapon vs one target
3	Radar-Jamming Device	Cost =2 Enhancements; Ship may Cloak
2	Ejection Seat	If fighter explodes, pilot escapes on a
-		parachute on a roll of 1-3

Factions

(Allied)

#	Result
1-3	US Air Forces
4	USMC Air
5-6	ARVN Airforce

(Communist)

#	Result
1-3	North Vietnamese Pilots
4-5	North Korean Pilots
6	Soviet Pilots

Fighter Types (was Construction)

Each fighter comes "stock" and can be re-fitted as necessary on a cost table as below.

FIGHTER COST	ENHANCEMENTS
41	6
48	7
56	8
65	9
75	10

- Standard Engine- Base Speed = 4.
- Directional thrusters- Base Maneuver Modifier = 0.
- Central Computer- Controls all systems.
- Targeting- Base To Hit Modifier = 0. Pilot may fire at one target per turn.
- Radar(Sensors)- Passive & Active. Used for detection, targeting, and navigation.
- Weapon- see individual fighter listing.

CONSOLIDATION The Two Weapons Table's have combined and the same for the Special Systems/Enhancement systems.

D10	ENHANCEMENTS	NOTES
2	Speed +1	
3	Maneuver +1	Base Maneuver Modifier +1
7	Armor +1	Base Armor Modifier +1
8	reroll	

D10	ENHANCEMENTS	NOTES
4	Jammer	Missiles are -1 To Hit this fighter or any adj. fighters
5	Scanners	Enhanced Sensors; Detection +2, Detection Range +10
7	Copilot	Cockpit accomadations & Life support for a copilot
8	Afterburner	Speed +4; can be used once; Costs 1 to replace

Weapon Table

All guns contain enough ammo or active materials to fire about 50 times

D10	SYSTEM	NOTES
1	Multiple Linked MG cannons	Range =3, Damage +1, ToHit +1, Gun
4	1 Missile	Speed =6, Maneuver +4, ToHit +1, Damage +4
X	1 AAM	Speed =6, Maneuver +4, ToHit +1, Damage +4
	SAM	Speed=5, Manuever +3, Damage +10
	Bombs	To Hit Ground Target+1 Damage+10
5	MG	Range =5, Damage +0, ToHit +0
4	Vulcan Gun	Range =2, Damage +2, ToHit +1; HE shells
6	Rocket Pod	Range =6, Damage +2, ToHit +0;
-		Contains 4 Rockets;
-		1-4 may be fired at one time
8	Nuclear Missile	Cost =2 Enhancements, Like normal missile
-		but Damage +25

- MiG-17=4
- F-100D=5
- F-105D=8
- F-4E"Phantom"
- Movement 8
- Manuver+2
- Guns: Vulcan
- Missile: 4 AAM
- 5 other hardpoints:
- Targeting +1, Copilot, and usually some jammers

- MiG-17"Fresco"
- Movement 4
- Manuver+4
- Missile
- Guns: Linked Cannon

Damage Roll Modifiers

Attackers Weapon Bonuses +X Defending fighter Armor Enhancement -1 Defenders Accumulated Structural Damage +X

Basic System Destroyed Table

D10	SYSTEM	RESULT
1	Cockpit	Pilot Killed
2	Oxygen	Pilot Killed
3	Communications	Detection -2
4	Radar	ToHit -2, Detection -4
5	Hole in wing!	Maneuver -1
6	Fuel Reserve	Ship Explodes
7	Fuel Injector	Ship Explodes
8	Power Grid	Permanent System shock
9	Computer	ToHit -2, Detection -2, Maneuver -1

D10	SYSTEM	RESULT
10	Reroll	-

Types Of Play

3. Scenarios- Operation BOLO(1965)- was probably the greatest single air battle of the war. Involving over 50 F-4s against MiGs.

Tran Hoa Bridge(1972) F4s- Repeatedly flew into the Dragons Jaw to destroy named bridge with Guided missiles.

4. Campaign Missions- This is several connected scenarios where the results of one scenario affect the next scenario. This level of play requires a gamemaster. Multiple playing

Sessions.

5. Roleplaying- The gamemaster will have to develop nonpiloting skills and quirks. Adventure possibilities may include a pilot being shot down and rescued, training ARVN, missions into Laos, supporting the special forces. Non-aircraft involved missions could involve fooling around in Saigon, the Air Base under attack by ground forces, etc.

Return to [Space Fury: Set Piece Fighter Tactical Combat; Ship Design Rules; Pilot Skills, Quirks, & CoolSpace Fury](#)

Viking Loot

<body>

Players control Viking clans that raid settlements on the Mainland. The player with the most loot at the

end of 20 turns is the winner.

Viking Units	Cost	Move	Attk	Carry	Notes
Long Ship	4	4	-	4	
Dragon Ship	7	5	-	6	
Scout	2	3	2	-	
Vikings	2	2	4	-	
Berserkers	3	2	6	-	
Chieftan	-	2	-	-	All units in stack get +1 Attack

Mainland Units Table

D6	Type	Attk
1-3	Peasant Militia	1
4-5	Men at Arms	3
6	Knights	5

The Map Use a Hex map. Units are represented by counters. The Viking villages are located on separate Islands north of the mainland. Draw only the contours of the landmasses. The contents will be determined by the Exploration Table. Be sure to include several Bays

and rivers that penetrate into the mainland. Viking Villages must be adjacent to water for the construction of ships.

Exploration Table

D6	Terrain	Notes:
1-3	Wilderness	Requires 1 move point to enter
4-5	Rough	Requires 2 move points to enter
6	Settlement	

Mainland Settlements Table

1D10	Type	Psnts	M@A	Knights	Walls	Loot
1-2	Farm	1	0	0	0	1D6
3-5	Village	3	1	0	0	3D6
6	Church	2	0	0	0	2D6
7-8	Town	4	4	1	1	6D6
9	Castle	2	0	3	3	6D6
10	City	0	6	2	2	10D6

Turn Sequence

1. Planning- Roll high to determine who goes first
2. Fate- Roll on Event Table
3. Movement- Boarding or unboarding costs the ship one move point and other units all of their move points
4. Exploration- Roll on the Exploration Table for every unexplored Hex adjacent to a Viking unit
5. Battle- Collect Loot if all defenders of a settlement are defeated
6. Recruit- New units appear in Home Village
7. Replenish & Rebuild- On the turns after being looted a settlement will rebuild on a roll of 1 on D6

Battle Each unit has an attack value. Add these to get each sides attack total. Each side rolls dice equal

to their attack total. Each roll of 1 causes 1 casualty.

Walls are the first casualties. Looting is done at the end of the battle if there are no defenders left.

Stacking 1 Ship per hex. Up to 10 Vikings per hex. A stack of units is known as a raiding party.

Chieftan The chieftan is the last unit in a hex to be killed. If killed, any one nonship unit that player controls becomes the next chieftan.

Settlement Tactics Peasants are killed before Men at Arms, and Men at Arms are killed before Knights. If both sides kill each other off, the settlement wins. Settlements can only replenish or rebuild if no Vikings are adjacent. If a settlement won a battle but suffered casualties, those loses will be replenished at the end of the turn.

Event Table

D10	Event	Notes:
1	Plague	Random settlement destroyed. It may rebuild later
2	Storm at Sea	Random Ship you control sinks
3	Patrol	Random Party you control encounters 1D6 Random Mainland units
4-5	Difficulties	Random Party you control may not move or attack this turn
6-7	Godspeed	Random Party you control gets to move twice this turn
8-0	No Event	

Loot Loot must be returned to the Viking village for it to count or to be used. Use separate counters to indicate stashes of Loot.

Viking Villages The Viking Villages generate 1 Loot per Turn in Recruit Phase. Viking Players start with a Chieftan and 4D6 Loot. Vikings may not attack each

other. They may cooperate on Raids.

Optional Hostile Clans Variant Vikings may attack each other. Each village also starts with 10 Viking Defenders who may not leave their home Island. Lone Scouts cannot be attacked.

Viking Raid

Introduction

Card game for 2-4+ Vikings. Viking Theme.

Victory

When the game ends, the player with the most Gold wins.

Game End

The Game Ends when any one player has successfully completed 3 Raids or All other players have been sunk.

Gold

Use Coins to represent Gold.

The Decks

There are 2 Decks:

1. The Viking Deck
2. The Encounter Deck

Viking Deck

There are 3 types of cards: Ship, Crew, and Destination.

Encounter Deck

There are 3 types of cards: Sea, Defenders, and Treasure.

Setup

Each player starts with 10 Gold. Each player is dealt 7 cards. The most Scandinavian player goes first.

Turn Sequence

Players take turns. Each turn has 9 Phases:

1. Planning Phase
2. Declaration Phase
3. Preparations Phase
4. Voyage Phase
5. Tactics Phase
6. Pillage Phase
7. Plunder Phase
8. Return Phase
9. Home Phase

Planning Phase

Draw 1 card from the Viking Deck and put it in your hand. Max hand size is 7 cards. Discard excess cards.

Declarations Phase

Declare whether you remain home or go Raiding. If you remain home, draw 1 extra Viking card and skip the rest of the turn. If you decide to go raiding, continue to the next phase.

Preparations Phase

You must play (build) 1 Ship from your hand. Place it face up in front of you. You may purchase up to 4 Crew cards, one of each type.

You must play 1 Destination Card. If you build a Dragon Ship it takes longer: Your turn ends now and continue Next turn at Voyage phase.

Voyage Phase

If going to a near Destination draw 2 Encounter cards If going to a middle Destination draw 3 Encounter cards If going to a far Destination draw 4 Encounter cards Every sea card you draw works against you. If you draw a Lost card, your turn ends, and you must continue on in Voyage phase again next turn. If you suffer 2 points of Hull damage (Rocks cards) your ship sinks.

If you suffer 2 points of Sail damage (Storm cards) your ship sinks. Note that certain special Crewmembers will negate your first Sea Encounter. If you chose a Far destination it takes longer: Your turn ends now and continue Next turn at Tactics phase.

Tactics Phase

You arrive at your destination and must fight the locals. Declare whether you are going to directly attack them or first hide and Attack by surprise. If you attack directly continue on to the next phase immediately. If you choose to be sneaky it costs you time: Your turn ends now and continue Next turn at pillage phase.

Pillage Phase

Draw a number of Encounter cards equal to the Destination Size. For each Defender card you draw, you will lose a stated number of crew. The Berserker crewmember negates the first loss of 5 crew.

If all your crew are killed (not counting special crew) your ship sinks. If you attacked by surprise, negate 5

Kills against you. If raiding a Far Destination draw 1 less Defender.

Plunder Phase

If you are not sunk yet, look for treasure. Draw a number of Encounter cards equal to the Destination Size. For each Treasure card you draw gain the stated number of Gold.

Draw 1 less card if you attacked directly (they saw you coming and Some fled first with their treasures)

Return Phase

Now you must sail home. If returning from a near Destination draw 2 Encounter cards If returning from a middle Destination draw 3 Encounter cards If returning from a far Destination draw 4 Encounter cards Every sea card you draw works against you. If you draw a Lost card, your turn ends, and you must continue on in Return phase again next turn.

If you suffer 2 points of Hull damage (Rocks cards) your ship sinks. If you suffer 2 points of Sail damage (Storm cards) your ship sinks. Note that Storm and Rock damage is cumulative from the Voyage phase of the Raid.

Note that certain special Crewmembers will negate your first Sea Encounter. If you chose a Far destination it takes longer: Your turn ends now and continue Next turn at Home phase.

Home Phase

After you return successfully from a Raid discard your Ship and all special crew members (but keep your gold).

Viking Deck Card Notation

- S** Ship
- C** Crew (special)
- D** Destination
- #** Number of Copies of card in deck

Villa Rustica

Introduction

Each player is a Senator of the Roman Empire. Players compete for Gold, Influence, and Prestige.

Victory

The first player to accumulate 100 or more Prestige Points is the Winner.

The Deck

Players share a common deck.

Tokens

Use Red Tokens for Gold. Use White Tokens for Influence. Use Blue Tokens for Prestige.

The terms tokens and points are synonymous. There are no limits to the number of Tokens. A player keeps all his Tokens in his Treasury.

Setup

The oldest player goes first. Shuffle the deck. Flip over the top 5 cards of the deck face-up in a row on the table.

These are called the Bid Cards. Each player starts owning 1 Villa Rustica Card. Owned cards are kept on the table face-up in front of the owning player.

Turn Sequence

Players take turns clockwise. Each turn has 3 Phases:

1. Revenue Phase
2. Availability Phase
3. Acquisition Phase

Revenue Phase

Each card you own generates revenue in the form of Gold, Influence, and Prestige on every one of your

turns in Revenue Phase. Collect Tokens for each card you own of the indicated type and number.

Availability Phase

The current player may discard 1 to 3 Bid cards of his choice. Flip over new cards from the deck to replace the discarded ones. If the deck runs out, shuffle the discard and draw from it.

Acquisition Phase

The current player may purchase 1 Bid card. All Bid cards have a cost in either Influence or Gold. Discard the indicated number of Tokens in payment.

The player owns the card and places it face up in front of himself. The player may choose not to buy a Bid card. In this case, He may take 1 Token of any type and add it to his Treasury. If a Bid card was purchased, flip over another card from the Deck to replace it.

If you do not have enough Tokens to buy a card, you cannot Purchase it. You cannot go negative or borrow Tokens.

Slaves & Senatus Consultum

These cards as Bid cards cost nothing to buy. They provide Tokens as soon as they are acquired and then these Cards are immediately discarded.

Quarry & Tile Works

Any time a Villa is built by any player, you get 2 Gold for each Quarry and Tile Works you own.

Card List Notation

I Cost in Influence to buy this card
G Cost in Gold to buy this card
Copies of that card in the deck

Volley

Introduction

Two-player card game of Napoleonic Warfare. Simplified version of [Fusillade: Press The Attack Or Wait For The Right Moment?](#)[Fusillade](#)

The Deck

Players share a 52 card common deck. The deck contains one of each of the cards described in the lists. The deck has 10 Suites:

- Infantry Units
- Infantry Weapons
- Cavalry Units
- Cavalry Weapons
- Artillery Units
- Artillery Weapons
- Leaders
- Strategy
- Morale
- Defense

Troops

Each player starts with 100 points of troops. Use change to keep track of troop points.

Victory

Reduce your opponents troop total to zero.

Setup

Each player is dealt 7 cards. Flip a coin to see who goes first.

Turn Sequence

Players take turns. Each turn has 3 Phases:

1. Maneuver Phase
2. Attack Phase
3. Casualty Phase

Maneuver Phase

First you may discard any cards from your hand, you don't want. Next, you may draw cards to fill your hand to 7 cards. If the deck runs out, shuffle the discard and draw from it.

Attack Phase

You may choose to attack or not to attack. To attack you must play face up on the table a Meld. A Meld must contain a minimum of 2 cards: A Unit card and a Weapon card of matching Troop type.

Troop types include: Infantry, Cavalry, and Artillery. The meld may also contain up to: 1 Leader card, 1 Strategy card, and 1 Morale card. Your opponent may play a defense card to negate a target Meld card.

A negated meld card has a Force value = zero. The Rest of the Meld still counts.

Casualty Phase

Add up the Force value of all the Meld cards you played. This total is the number of casualties inflicted on your opponent. Your opponent loses that many troop points.

Card List Notation

- IU** Infantry Units
- IW** Infantry Weapons
- CU** Cavalry Units
- CW** Cavalry Weapons

The Voyage of the Space Beagle

Wagon Trails

Introduction

Card game for 2-4+ players. Theme: Overland Westward Migrations in the USA in the mid 1800's.

Winning

The player with the most migrant points at the end of the game wins. Use a pen and paper to keep track of points.

End Of Game

The game ends when there are no cards left in the deck, and no one Can make any more melds.

The Deck

Players share a common deck. There are 4 types of cards:

1. Wagon cards
2. Destination cards
3. Journey cards
4. Hazard cards

The deck is kept face down. The discard is kept face up.

Turn Sequence

Players take turns. Each turn has 5 phases:

1. Luck of the Draw Phase
2. Meld Phase
3. Hazard Phase
4. Score Phase
5. Happy Trails Phase

Luck Of The Draw Phase

Fill your hand to 6 cards. If your hand already has 6 cards, draw 1 card.

Meld Phase

You may play 1 Meld. A Meld consists of:

1. Exactly One Destination Card
2. Exactly One Journey Card
3. One or more Wagon Cards

Hazard Phase

If you played a Meld this phase, your opponents may Play Hazard cards on you.

Score Phase

If you played a Meld, score Migrant points equal to the Value of the Destination and Wagon cards you played. Subtract Migrant points equal to the number of Hazard cards played against you. Discard all played cards.

Happy Trails Phase

You may discard one card from your hand.

Card List Notation

Wagon Train Wikipedia

War Born

Introduction

Fantasy Theme card game for 2+ players.

Victory

Be the first to win 5 Hands.

The Deck

Players share a common deck.

Card Types

There are 8 Card types: Heroes, Weapons, Armor, Mounts Armies, Actions, Traits, and Spells

Turn Sequence

Each turn is divided into 5 Phases:

- Fate Phase
- Destiny Phase
- March Phase
- Battle Phase
- Victory Phase

Fate Phase

Each player draws 12 cards.

Mulligan Rule

If a player draws no Hero in Fate Phase he must reveal his hand, discard it and draw 12 new cards.

Destiny Phase

Each player may discard up to 6 cards and draw replacements.

March Phase

Each player plays a Meld. A Meld must contain exactly 1 Hero and up to 1 card from each of the other 7 card types. Melds are placed face up on the table visible to all players.

Card List

Card Name	Type	Force	Notes:
Lich King	H	10	Put a Spell from the Discard into your hand
Necromancer	H	10	Put an Army from the Discard into your hand
Grandmaster Monk	H	10	Play an extra Action

Battle Phase

Players take turns. Players cut the deck. The cut with highest Force value goes first. On your turn you may activate one card in your Meld or pass.

Each card in your Meld can only be activated once. When activated, the special effect of the card takes effect. Special effects are of 5 types:

1. Cause an opponents target card to be discarded
2. Allow you to add an extra card to your meld from your hand
3. Draw an extra card from the deck and put it into your meld if it is the only card in your meld of that type.
4. Steal card from opponent's hand
5. Put a card into your hand from the discard and put it into your meld if it is the only card in your meld of that type.

(Force Bonuses do not require Activation) When all players have consecutively passed, the Phase ends.

Victory Phase

All cards have a Force Value. Add up the Force value of all the cards in your meld including bonuses. The player with the highest Force value wins the Hand.

Discard all cards in play. Players may discard any cards in their hand they don't want.

Card List Notation

- H** Hero
- W** Weapon

Variants

Personalized Decks

These must contain exactly 40 cards. These must contain 5 cards from each of the 8 card types.

War Fair

Introduction

2-6 player Card Game. Players are Arms Dealers out to make big profits.

Object

Have the most money at the end of the game.

The Deck

There are 76 cards in the deck. There are 5 types of cards: Weapons, Sellers, Buyers, Interception, Evasion

Other Materials

Use play money to represent profits.

Setup

Each player starts with 5 cards. Randomly determine turn order.

Turn Sequence

Players take turns. Draw Phase Deal Phase Intercept Phase Profit Phase

Weapon Card List

Weapon Type:	#	1	2	3	4	5
Chemical	9	5	15	30	50	75
Biological	8	10	25	45	70	100
Conventional	10	15	35	60	90	125

Number of that card in the deck.

Seller Card List

Country:	#	Profit	Cannot Sell to:
USA	4	+10%	Iraq
USSR	3	-5%	Afghanistan
China	1	-5%	North Korea

Buyer Card List

Draw Phase

Draw one card. If there are no cards left in the deck, the game is over. You can have a maximum of 7 cards in your hand.

Discard excess cards.

Deal Phase

You may trade cards with other players. You may pass the rest of the turn or lay down a 'Deal' face up. A deal must include a seller card, a buyer card, and one or more Weapons cards of the same type.

Intercept Phase

Other players may play Intercept cards from their hands. You may play Evasion cards from your hand to counter the Intercept cards on a one to one basis. If more Intercept cards are played than Evasion cards, the Deal is discarded and the profit phase is skipped.

Profit Phase

If your deal was not intercepted you make a profit equal to the progression table incorporated into the Weapon card list. For example: If your deal had one Chemical card you would make \$5. If your deal had 4 Missile cards you would make \$110.

Some buyers and sellers will increase or decrease your profits. Discard your deal and draw one card.

Weapon Type:	#	1	2	3	4	5
Missile	7	20	45	75	110	150
Nuclear	6	25	55	90	130	175

Country:	#	Profit	Cannot Sell to:

War For Atlantis

Introduction

One player takes the side of the Atlanteans. The other player takes command of the combined Armies of the Five Foes of Atlantis.

Map & Chits

Use a large hex grid The center area is the continent of Atlantis surrounded by water The main city of Atlantis is walled and occupies many hexes A thin border of land on the outer edges of the map is the homelands of the enemies. The Barbarians are to the north & northwest The Greeks are to the northeast & east The Egyptians are southeast The Africans are south & southwest The Lemurians are west Chits will have to be made for all the units & all the spells

Victory

The Atlanteans are victorious if they destroy their enemies completely. The Five Foes win if they destroy all the Atlanteans or a have a spellcaster cast the cataclysm spell in the Temple of Posideon. The Atlanteans win a minor victory if there is no winner after 20 turns.

Setup

Around 10 Six sided (10D6) dice are needed. Set aside a pile of spell chits. All Five Foes start with all

their units in their respective Homelands.

The Atlantean units are clustered near the main city. Major sites within Atlantis include the Ports, the Temple of Posideon, the Dragon Roosts, the College of Wizards, the Palace, the Workshops, the Mazes, the Barracks, and the Bazaar, among others.

Unit Descriptions

Number of such units in the game

POW Power points

MOV Movement points

C Carry 1 unit

C2 Carry 2 Units

R Ranged Attack up to two hexes away

R3 Ranged Attack up to three hexes away

3/2R 3 Power points in Melee or when defending, 2 Power points when making a ranged attack

W Water units. These units must remain in water hexes

(W) Swimmers. These units may move in water or on land

F These units can fly. They may end their move over water

M Mage. Can cast Mage spells and General spells

P Priest. Can cast Priest spells and General spells

Breach = Unit automatically moves through walls destroying them

Turn Sequence

Draw Phase Movement Phase Attack Phase

moved The Foes of Atlantis move first Units may move up to a number of hexes equal to their movement rate

Draw Phase

Each player draws to replenish a max hand of 7 spell chits Unflip and unrotate unit chits

W Water units. These units must remain in water hexes

(W) Swimmers. These units may move in water or on land

F These units can fly. They may end their move over water.

Movement Phase

Players take turns moving units until all units have moved once Rotate chits to indicate that they have

All other units are automatically considered to be land units

Stacking & Carrying

Only one unit per space unless it is carrying other units Carried units attack at -1 Power to a minimum of 1 Carried units cannot be attacked If a unit is destroyed all units it is carrying are also destroyed Units carrying other units cannot be carried

Attack Phase

Players take turns attacking target units until all units have attacked The Atlantean player attacks first Units may combine their attacks against a single target Units can attack targets in an adjacent hex Units with ranged attacks can target defenders within two hexes The attacker rolls 1D6 for every point of power used in the attack. This is the attack roll. The defending unit rolls 1D6 for each of its power points. This is the defense roll If the attackers total is higher the target is destroyed, otherwise the defender survives.

Spells may contribute power points to the attackers or the defenders Flip chits to indicate that they have attacked or cast spells

Terrain

Even with penalties the minimum movement rate = 1hex per turn. Water = Costs 1 Move point to enter. Treacherous Water = Shallows, Reefs, Rocks, Whirlpools. Costs 2 Move points to enter.

Clear = Costs 1 Move point to enter. City spaces = Costs 2 Move points to enter. +1 Power to defense rolls for Atlantean units.

Forest = Costs 2 Move points to enter. +1 Power to defense rolls. Mountains = Costs 3 Move points to enter. +1 Power to defense rolls. Rivers = Seperate Adjacent hexes. Costs 2 Move points to cross.

Units being attacked from across a river get +2 Power to defense rolls. Walls = Seperate Adjacent hexes. Costs 3 Move points to cross a wall. Atlantean units being attacked from across a wall get +2 Power to defense rolls.

Flyers do not recieve move penalties

Spells

The spell pile mix should be 1 chit for each of the spells listed below. There are 3 types of spells: Mage, Priest, & General. Mage units can cast Mage or General spells.

Priest units can cast Priest or General spells. A unit can cast one spell per turn. Each player has a hand of 7 spell chits they replenish in Draw Phase.

A player casts a spell from his hand through a spell-casting unit he controls. Once spells are cast they are discarded unless they are to be used as markers. Use the spell chit to represent a unit created by the spell.

Unless otherwise noted spell have a range of 2 hexes.

SPELLS	NOTES
Shield	Unit gets +3 Power Points on Defense roll. Cast at beg. of Battle phase
Haste	Unit gets +2 Move Points. Cast at beginning of move phase
Fly	Unit Flies at Move Points = 4 this turn. Cast at beginning of move phase
Hold	Unit cannot move this turn. Cast at beginning of move phase
Aid	Unit gets +2 Power Points. Cast at beginning of Battle phase
Inspire	All adjacent friendly units get +1 Power points this turn. Battle phase
Rage	Unit gets +3 Power Points on Attack roll. Cast at beg. of Battle phase
Fireball	A Range = 2 attack for 4 Power Points
Lightning Bolt	A Range = 3 attack for 3 Power Points
Distract	Unit cannot attack. Range = 3. Cast at beginning of Battle phase
Invulnerability	Unit cannot be Destroyed. Cast at beginning of Battle phase
Negate	Negate the effect of spell just cast within 3 hexes
Mesmerize	All adjacent enemy units cannot attack. Cast at beginning of Battle phase
Death Spell	Caster gets +5 Power points to Attack roll
Winds	Negate all nonmagical ranged atks vs target. Cast before Def. roll made
Whirlpool	A Range = 3 attack for 4 Power Points vs a water unit
Wall of Fire	No unit may enter 1-3 adjacent target hexes targeted by caster within 3 hexes of caster. Cast at beginning of move phase
Raise Dead	Unit just killed becomes undead under your control; Power Points -1. Cast after Defense roll made
Earthquake	3 Adjacent hexes within 3 hexes of caster. Ground units in these hexes attacked for 2 Power Points
Tidal Wave	Water unit or unit in coastal hex attacked for 4 Power Points
Flood	3 Adjacent hexes within 3 hexes of caster. Ground units in these hexes may not move. Cast at beginning of move phase

SPELLS	NOTES
Poison Gases	Unit -2 Power Points. Cast at beginning of Battle phase
Summon	Move any Friendly unit from anywhere adjacent to caster
Teleport	Caster or Friendly unit adjacent to caster can move to any empty hex
Control	Take control of unit this turn. Cast at beginning of Battle phase
Luck	Cause Attack or Defense roll just made to be rerolled
Antimagic	Both players must discard their spells. Cast any time
Fear	Move enemy unit. Unit cannot end move adjacent to one of your units. Cast in move phase before unit moves

Mage Spells

Earth Elemental	Creates a Unit adj to caster: Power Points = 4, Move =1, Lasts 3 turns
Water Elemental	Creates a Unit adj to caster: Power Points = 3, Move =3W, Lasts 3 turns
Air Elemental	Creates a Unit adj to caster: Power Points = 3, Move =5F, Lasts 3 turns
Fire Elemental	Creates a Unit adjacent to caster: Power Points = 4, Move =2, Lasts 3 turns, Cannot be transported
Illusion	Creates a Unit adj to caster: Power Points = 3, Move =5F, Lasts 2 turns, Destroyed if Attacked

Priest Spells

Ressurrection	Unit not destroyed. Cast after Defense roll made
Reincarnate	Put unit from discard pile into play adjacent to caster
Golem	Creates a Unit adjacent to caster: Power Points = 3, Move =1
Sanctuary	Unit cannot attack or be attacked. Cast at beginning of Battle phase
Commune	Discard spells and draw seven new spells

Game Designers Notes

The Atlanteans have the advantage of being centralized and on the defense. The Foes have more units

but they are spread out and have to cross the water barrier.

War Hammer Space Empires

Introduction

War Hammer 40K Theme. Module for the [Warp Empires: Basic Rules System And Campains](#) Warp Empires system. You must use the Warp Empires system to play this game.

Map

Deep Space with planets.

Victory

You win if you capture over 80% of the planets on the map.

Setup

Each side starts with a Homeworld with 8 random space units and 12 random ground units.

Unit Types

- L** Leaders
- S** Space (or Ships)
- G** Ground (All units except Space units)
- I** Infantry
- A** Artillery
- V** Vehicles
- R** Stealth (Scouts, Recon, Assassins, Diggers)
- F** Fast (Flyers, Skimmers, Bikes, Racers)
- T** Titans
- P** Psychic

Action Deck

Players share a common Action deck (at bottom of page).

Ork Unit List

Unit Name:	#/Speed	Type	Force	Notes

Death Skulls Ork Boyz	2	I	2	
Snakebites Ork Boyz	2	I	2	
Goffs Ork Boyz	2	I	2	
Blood Axes Ork Boyz	2	I	2	
Evil Sunz Ork Boyz	2	I	2	
Bikeboyz	1F	V	1	

Revenue Phase

Poor Planets produce a Revenue = 1 Rich Planets produce a Revenue = 3 Homeworlds produce a Revenue = 5

Recruit Phase

Poor Planets can recruit a maximum of 1 ground unit per turn. Rich Planets can recruit a maximum of 3 units (ground & space) per turn. Homeworlds can recruit a maximum of 5 units per turn.

Leaders only cost half their force.

Move Phase

Ground units may travel through space, they are considered to be on their own Space Transports. Transports and other space units, unless otherwise stated, move at medium speed (2 spaces per turn). A ground unit upon entering a planet space with no enemy ships automatically lands on its surface.

If there are enemy ships present, resolve the space battle. If the transport survives, it then lands on the planet.

Battle Phase

Resolve Space battles before planet based ground battles. Ground units in Space transports have a Force = zero and cannot get card bonuses. In a space battle, space units must be taken as casualties before transports.

Note: A Space unit vs all transports will always win the battle and will take no casualties. If a Planetary Invasion force includes Space units, they may partake in the battle by bombardment. Bombarding ships only apply half their Force, and are the last units to be lost as casualties.

The Leader bonus rule applies to space combat.

War In Hell

Introduction

2 Player Card game. Diabolic Fantasy theme The Arch Devils Intrigue and do battle to control the 9 Planes of Hell. Each player controls a Faction of Arch Devils.

Victory

Control all 9 Planes of Hell

The Board

Place 9 (Finely Illustrated) cards in a row. Each card represents one of the Planes of Hell from 1 (highest) to 9 (lowest).

The Deck

Players share a common deck Arch Devils and Dukes of Hell are considered to be Leaders. Lesser & Greater Devil cards & Monster cards are considered to be Legions. Legions & Leaders are Units.

A Leader with attached Legions is referred to as an Army. A Stack is a Leader with or without attached cards. A Host refers to all the units of a player in the same Plane.

Markers

Each player gets a set of markers of a unique color. These are used to mark control of Planes and Units.

Setup

Each player draws 9 cards. Discard & redraw if you did not draw at least 1 Arch Devil. No Units may move until each player has had 1 turn.

Turn Sequence

Players take turns. Each turn has 7 Phases: Summon Phase Host Phase Intrigue Phase Gate Phase Battle Phase Reinforcement Phase Control Phase

Summon Phase

Draw 3 cards.

Host Phase

You may put Leaders & Legions face up into Play from your hand. Arch Devils must start on their Home plane. (Each of the 9 Arch-Devils control 1 Plane of Hell) You cannot play an Arch Devil if an opponent controls its Home Plane.

Dukes of Hell may start in any plane you control. Legions are attached (Stacked with) to Leaders you control. Place a control marker on your Stacks to indicate ownership.

Intrigue Phase

Each player gets 100 Intrigue points. Players use these points to secretly bid on every Leader in Play. Your Bids on Leaders you already control are worth double.

Bids are revealed simultaneously. Players gain control of those Leaders they won the bid for. (You get the Leader & all attached cards.) Replace control markers as required.

If tied, flip a coin. Leaders lost to Intrigue are called Traitors.

Gate Phase

Each of your Armies may move 1 Plane higher or lower. A Leader without attached Legions may be moved to any Plane.

Battle Phase

The current player is the Attacker. Other players are Defenders. Battle occurs when opposing units occupy the same Plane. Every unit has a Force value.

Each player adds up the Total Force value of all their units in the Plane. Players may play Event cards to increase their sides Total Force value. The side with the lower Force value is completely destroyed (discarded) The side with the higher Force Total gets to keep units with a Force Total equal to or less than the difference between the Totals.

The Winner always gets to keep at least 1 Unit (a Leader) Legions, if attached to a General for that type, get Force +3. An Army with Flyers gets Force +5 if facing a Host with no Flyers.

Reinforcement Phase

Each of your Armies may move 1 Plane higher or lower. A Leader without attached Legions may be moved to any Plane. Units may not move into Planes occupied by enemy units.

You may put Leaders & Legions face up into Play from your hand. Arch Devils must start on their Home plane. You cannot play an Arch Devil if an opponent controls its Home Plane.

Dukes of Hell may start in any plane you control. Legions (& Relics) are attached (Stacked with) to Leaders you control.

Control Phase

Max hand size is 9 cards. Discard excess cards. Put a Control marker on any Plane you occupy (Remove enemy marker).

Card List Notation

A Arch Devil
D Duke of Hell
G Greater Devil
L Lesser Devil
E Event

Baalzebul	7	Maladomini	Lies
Mephistopheles	8	Caina	Intrigue +5
Asmodeus	9	Nessus	Delay

War Jhong

Introduction

Card game for 2-4+ players.

Victory

Be the first player to accumulate 100 Victory Points. Points are scored for each hand when a player goes out. A player goes out by making 4 sets of 3 cards each.

Only the player that went out scores points.

The Deck

Players share a common deck

Suits

There are 3 Common Suits:

- Infantry, Archers, & Cavalry Common Suit cards are numbered 1-9 and have 3 copies of each number. There are 2 Honor Suits:
- Junks & Forts Honor Suits are not numbered.
- There are 16 Junks & 9 Forts
- There are 2 Special Suits: Generals & Tactics
There are 8 Generals & 6 Tactics Each General is worth 1 Victory Point when discarded. Tactics cards are Wild cards and can be used in place of any Common or Honor card.

Setup

Each player is dealt 12 cards. The player who won the last game goes first. Play proceeds to the right.

Scoring Chart

Scoring Combo	(Victory Points)	Notes:
Going Out	(1)	1 point for Going Out
Double Formation	(3)	2 Formations have the same number sequences
Triple Formation	(9)	3 Formations have the same number sequences
High/Low	(5)	4 Formations have numbers 1-5 or 5-9.
Fleet	(2)	1 Formation of Junks
Double Fleet	(4)	2 Formations of Junks
Triple Fleet	(8)	3 Formations of Junks
Armada	(16)	4 Formations of Junks
Wall	(3)	1 Formation of Forts
Border Wall	(9)	2 Formations of Forts
Great Wall	(27)	3 Formations of Forts

Sequence Of Play

On your turn, draw a card from the top of the deck. Add it to your hand. At the end of your turn, you must either go out, or discard 1 card.

Formations

A Formation is a set of 3 cards:

- Sequence: 3 consecutive Common cards of the same suit
- Triplet: 3 Common cards of the same suit with the same number
- 3 matching Honor cards
- 3 matching Tactics cards

Going Out

You go-out when you have 4 Formations. (Combined in your hand & face-up in front of you)

Attacks

You may take a discard & immediately use it to Go-Out or make a Formation The Formation must be played face-up on the table in front of you. You must then discard a card & play proceeds to your right. If more than one player claims the discard, the player whose turn is Most soon to be next gets it.

Scoring

If you went out, you may score your hand. Several Scoring Combos may apply to your hand, and all may be counted.

Scoring Combo	(Victory Points)	Notes:
Great Formation	(6)	4 Formation of the same Common Suit
General	(1)	Get 1 VP per General you discarded this hand
All Triplets	(4)	4 Common Formations are Triplets
All Sequences	(4)	4 Common Formations are Sequences
Identical Double Formation	(6)	2 Formations same Common Suit & Numbers
Identical Triple Formation	(18)	3 Formations same Common Suit & Numbers
Split Army	(3)	2 Formations from 2 Common suits
Grand Formation	(10)	Complete run of sequences from 1-9 in same Suit
Grand Maneuver	(7)	3 Formations same Common Suit & 1 Honor Suit
Ruse	(5)	1 Formation of Tactics cards
Great Ruse	(25)	2 Formations of Tactics cards
Diplomatic Solution	(2)	No Formations & all cards in same suit 3 digits apart

War Of Independence

Introduction

American Revolution Theme. Module for the [Warp Empires: Basic Rules System And Campains](#) Warp Empires system. You must use the Warp Empires system to play this game.

Map

- Depicts the original 13 colonies plus Canada.
- Each colony is divided into several territories.
- Each inland territory generates 1 revenue point.
- Each coastal territory generates 2 revenue points.
- The original 13 colonies include:
 - New Hampshire
 - Massachusetts
 - Rhode Island
 - Connecticut
 - New York
 - New Jersey
 - Pennsylvania
 - Delaware
 - Maryland
 - Virginia
 - North Carolina
 - South Carolina
 - Georgia

Turns

1775-1783. 4 turns per year (each season = 1 turn)
Units cannot move/attack in winter turns. Revenue can't be saved from winter turns.
Units cannot be recruited in winter turns.

American Unit Deck

Name	Move	#	F	Type	Notes
General George Washington	F	1	5	L	
General Nathaniel Greene	F	1	4	L	
General Benedict Arnold	F	1	5	L	
General Lincoln Benjamin	F	1	4	L	
General Horatio Gates	F	1	4	L	
General Charles Lee	F	1	4	L	
General Daniel Morgan	F	1	4	L	
General William Moultrie	F	1	4	L	
Baron Von Stuben	F	1	4	L	German
Captain John Paul Jones	F	1	4	L	
Thomas Jefferson	F	1	4	L	
Francis Marion (the Swamp Fox)	F	1	4	L	

Victory

The side that controls the most territories at the end of the game wins. Either side wins automatically if all opposing units are destroyed.

Setup

The only leaders that automatically begin in play are George Washington, Greene, Carlton, and Howe. The British start with 6 Random units in Canada & Massachusetts. The Americans start with 6 Random units in Massachusetts, Pennsylvania, Rhode Island, and South Carolina.

Action Deck

Players share a common Action deck.

Unit Deck Abbreviations

- S** Ships
- T** Troops

Movement Rules

Ships can only move into coastal spaces. Stacks (except for ships) without leaders cannot move.

Battle Rules

Leaders generate no Force unless matched with troops of equal or greater force value.

Name	Move	#	F	Type	Notes
Sam Adams	F	1	4	L	
Marquis de Lafayette	F	1	4	L	French
Comte de Rochambeau	F	1	4	L	French

Hessian Mercenaries	M	2	3	T	
Fortifications	O	8	4	F	

Action Card Deck

Card Name	#	Notes
Tactical Move	6	Move 1 stack
Operational Move	6	Move 2 stacks
Strategic Move	4	Move 3 stacks
French Alliance	3	American player may play Foreign units
Garrison	2	Battle: Defender gets +4 Force
Siege	2	Battle: Attacker gets +4 Force
Bayonet Attack	2	Battle: Troops get +1 Force each
Wheel About	2	Battle: +2 Force
Outflank	2	Battle: +6 Force
Bombardment	2	Battle: +8 Force
Encircle	2	Battle: +10 Force

Card Name	#	Notes
Counterattack	2	Battle: Winner casualties increased by $\frac{1}{2}$
Rearguard Action	2	Battle: Loser casualties reduced by $\frac{1}{2}$
Night March	2	Move 1 stack
Surprise	2	Battle: +12 Force
Enlistments	2	Recruit 2 random units
Spirit of Rebellion	2	Americans: Place 1 control marker
French Supplies	2	Americans: Gain 8 revenue
Tory Uprising	2	British: Place 1 control marker
Indian Raids	2	British: Place 1 control marker
Declaration of Independence	1	Americans Place 7 control markers
Winter Quarters	2	British: Americans must discard 2 troop units
Winter Offensive	2	Americans: Move 1 stack in Winter turn.
Continental Congress	1	Americans Place 3 control markers

War Over The Reich

Introduction

Scenario for WarpQuest: WWII. for the [Warpquest Core Rules](#) WarpQuest Core Rules. Each player controls a Flight of 300 British (Halifax, Wellington, Mosquito, and Lancaster) Bombers on a Night Raid to bomb targets in Nazi Germany.

Introduction

Module 1 represents the flight to the Target Zone. Module 2 represents the combat over the Target Zone.

Stats List Table

1D6	Stat:	Notes:
1	Bombers +50	Base = 300
2	Electronic Warfare +2	Radar, Radio, Countermeasures
3	Navigation Intelligence +2	Electronics, Planning, Experience
4	Fighter Defense +2	Fighter Escort, Bomber MGs, Tactics
5	Bombing +2	Accuracy & Tonnage
6	Fuel Surplus +1	Base = 6

Fuel Surplus

Every time you fail a Navigation test reduce your Fuel Surplus by one point. You may voluntarily use up a Fuel Surplus point to 'Search for Targets': Instead of Moving forwards in Movement Phase, move your pawn (Bomber Group) backwards. If your Fuel Surplus = 0 you must immediately turn back and head for home.

If your Fuel = 0 and you fail a Navigation test you lose 1D6 Bombers. (They run out of fuel)

Altitude

There are three Altitudes: Low, Medium, and High. Start the game at Medium altitude. Instead of moving forward during Movement phase, use up a Fuel Surplus point and change your Altitude to any other height.

- If you are at low altitude Navigation and Bombing tests are DM -1.
- If you are at low altitude Flak and EW tests are DM +1.
- If you are at high altitude Navigation and Bombing tests are DM +1.
- If you are at high altitude Flak and EW tests are DM -1.

Flak & Fighters

- If you fail a Flak or Fighter test lose 1D10 Bombers.

The 'Artifact' is the halfway point of the Mission when the Bombers must turn back.

Bomber Flight Stats

A Bomber Flight (Group) has 300 Bombers and 6 Stats. The Flight also has a Fuel Surplus = 6 Roll on the Stat List Table to see what stats you get:

- If you pass a Flak or Fighter test you lose no Bombers.
- If you pass a fighter test you shoot down 1D6 enemy Fighters.
- Add your Fighter Defense Stat to 'Fighter test' Skill rolls.

Bombing Targets

When you bomb a target, 50 of your bombers will drop their bombs. Add your Bombing Stat to 'Bombing test' Skill rolls. If you pass the test, the target is destroyed: keep the target card in your possession.

If you fail the test, the target card remains in play in that space. The next Bomber group to land on the space may try to bomb the target. A Bomber drops all of its bombs at once. Those bombers cannot attack again.

Electronic Warfare

Add your Electronic Warfare Stat to 'EW test' Skill rolls.

- If you pass an EW test nothing happens.
- If you fail an EW test, draw another card.
- If it is a Flak or Fighter card, the card attacks with a DM +1.
- If the drawn card is not a Flak or Fighter, discard it: nothing happens.

Visual Sighting

- If you pass an Visual Sighting test nothing happens.
- If you fail a VS test, draw another card.
- If it is a Flak or Fighter card, the card attacks with a DM +1.
- If the drawn card is not a Flak or Fighter, discard it: nothing happens.

Scoring

Get 10 Victory Points (VP) for every target you 'destroy'. (The Decoy Target earns no VP, but you must bomb it.) Get 1 VP for every enemy fighter you destroy. Lose 1 VP for every bomber you lost.

Lose 5 VP if you run out of Surplus Fuel.

Hit 'em Hard Rule

When you go to make a Bombing test roll you may decide to attack with more than 50 Bombers. You may

choose 100, 150, or any multiple of 50. All Bombers you declare to attack must attack. If the first 50 fail their attack, roll again for the next 50, and so on.

Same Space

If your pawn lands on an opponents pawn, nothing happens, there is no conflict, and do not draw a card.

Card Types

- T** Target
- N** Navigation
- F** Flak
- I** Fighter
- E** Electronic Warfare
- V** Visual Sighting
- A** Aid
- #** Number of that card in the Deck.

Notes: Remove all Night cards. Remove all Electronic Warfare cards. Navigation and Bombing tests

are DM -1.
Flak tests are DM +1.

War Wind

Introduction

Card game for 2-4 players. SF Theme. Based on the 1996 PC game.

Disclaimer

War Wind is a licensed, copyrighted property. This is merely a fan site.

Victory

Eliminate opposing players by doing 20 or more damage to Their Settlements.

The Decks

Each player has a unique Settlement Card. Each player has a unique Clan Deck. Players also share a common World Deck.

The Clans

There are 4 Clans:

1. Tha'Roon
2. Obblinox
3. Eaggra
4. Shama'li

Tha'roon

Imperialistic, Cruel, Serpentine, Psychic Overlords.

Obblinox

Warlike, Brutish, Elephantine Behemoths.

Eaggra

Nature-Loving, Tough, Numerous, Plant-like Rebels.

Shama'li

Wise, Ancient, Mystical, Martial-Artist Monks.

Hand

Players keep both Clan cards and World cards together in their hand. Clan Decks and the World deck each keep their own discard pile. Basic Hand size is 6 cards.

Permanents

Units, Structures, Resources, and Settlements are represented by cards. Units, Structures, Resources, and Settlements are collectively referred to as Permanents. Units are living creatures that can attack and defend.

When put into play, permanents are kept face up in front of you. Structures include Buildings, Roads, Walls, Vehicles, and Robots. Resources and Buildings do not have Hits and cannot attack or be attacked.

Walls have Hits and may Block, but they cannot attack. Walls, Vehicles, and Robots are treated like Units in Attack Phase.

Resource Points

Use tokens to represent Resource Points (RP). These are used to buy units and structures. Resource points are saved from turn to turn.

Hits & Damage Points

Use counters to keep track of Damage Points (DP). Damage counters are placed on Units, Structures and Settlement cards. Each Permanent has a number of Hits. If a Permanent has equal or more DP than it has hits, it is destroyed.

Exhausting Cards

A card is turned sideways to show it is exhausted. A card is turned right side up to show it is ready. Exhausted Permanents cannot take actions until they are made ready.

Setup

Each player starts with its Settlement card in play. Each player draws 4 World cards and 3 Clan cards. Each player starts with 20 Settlement Points.

Each player starts with 5 Resource Points.

Turn Sequence

Players take turns. Each turn has 8 Phases:

1. Ready Phase
2. Fate Phase
3. Production Phase
4. Recruit Phase
5. Event Phase
6. Attack Phase
7. Heal Phase
8. End Phase

Ready Phase

Make all of your exhausted cards ready.

Fate Phase

Draw 1 card from the World Deck and 1 card from your Clan Deck. If a deck runs out, shuffle the discard and draw from it.

Production Phase

Gain 1 Resource Point (RP) Each Resource card and Worker card you exhaust gains you 1 extra RP. Play (discard) Bioslag cards for 3 RP.

Recruit Phase

Most permanents have a cost in RP to play. You may put permanents into play by paying their cost. You may put 1 Resource card into play.

Event

Many Spell and Stealth cards are played in this phase.

Attack Phase

You may attack with some, none, or all of your units in Attack phase. The defending player may choose some of his units to Block. Attacking exhausts a Unit.

Each Blocker can block only one attacker. Multiple Blockers can block the same attacker (attacker assigns damage). Units do Damage to each other equal to their attack scores.

If an attacker is not blocked, he does his damage to the defenders Settlement. Units with excessive DP (greater/= to their hits) are discarded at the end of this phase. Unblocked Workers do +3 Damage to Settlements.

Heal Phase

Each living unit heals 1 Hit, that is, removes 1 Damage Point. A permanent with the Healing Ability may remove 1 DP from any target living unit. Repairs: You may remove 1 DP from a structure or settlement by paying 2 RP.

End Phase

Discard to maximum hand size (Base Max = 7).

Last Ditch Defense Rule

If you ever have 20 or more DP on your settlement, you may discard 1 permanent you control to remove 1 DP from your settlement. You may keep doing this until you run out of Permanents.

Modifier Cards

These cards are attached to a target unit and remain until the Unit is destroyed.

Spells

Some units have spell casting ability. You can only play a Spell card if you have one of these units in play.

Stealth

Some units have stealth ability. You can only play a Stealth card if you have one of these units in play.

First Strike

A Unit with First Strike inflicts its Damage before a unit it is blocking or is blocked by.

Defense Bonus

A defense bonus negates the first X Damage done to a unit during the turn.

Beasts

These are Units only found in the World deck. They are example of wildlife on the world of Yavaun. They must attack if possible, and they cannot Block.

Card List Notation

U Unit
E Event
R Resource
RP Resource Point
M Modifier
SX Settlement
SB Structure Building
SU Structure Unit (Vehicles, Robots, Walls)
B Beast
ES Event requiring a Unit with Stealth ability
X Exhaust to get the following effect
D Discard to get the following effect
FED From either deck (World or Clan)
GTU Give target Unit

Shoot = Exhaust unit to do X damage to target unit
 or Settlement Deathmark = When attacking the UWS targets a Unit instead of the Settlement

DB Defense Bonus
 Discover = Draw 2 cards and discard 2 cards FED

SC Spell Caster
S Spell
A Attack Rating (Damage unit inflicts)
H Hits (Damage unit can sustain)
UWS Unit with Stealth

Leader = All units of that clan get A+1 and DB +1

LAOH Look at Opponents hand
 Control = Take control of target unit until the end of the turn. Search Deck = Search either deck for a target card and put it in your hand. APIIP = And Put it in Play

copies of card in deck

War Wind Units SSI Wikipedia Entry for War Wind

Warbah

Introduction

Fantasy conquest. Characterized by Gold and book-keeping. Explore, expand your territory, collect gold, find artifacts, cast spells, raise armies, gain experience, send out spies, crush your enemies.

Map & Chits

Use a disposable Hex map. Indicate which hexes are land and which are water. Draw in rivers along borders of hexes.

Draw in terrain types onto the map spaces as the map is explored. Each player starts with control marker chits of a unique color to indicate ownership of settlements. Each player starts with Hero marker chits of the same color and marked with an H and a unique number to indicate individual Hero units.

10 sided dice are required to play.

Setup

Pick one hex on the map to contain your capitol city. Put down the appropriate terrain chit with a control marker on it. Place one Hero chit in your capitol city.

The Hero starts with an army of 1D10 units of each of the 4 basic troop types. The hero also starts with a wandering wizard. Start with 1D10 gold.

Heroes

For each of your heroes you will need an index card with the following information: The Heroes Identification number. Also on the chit. The Heroes Name. Make one up. Magical Items the hero owns.

Is there a Wizard in the army. Number of warriors in the army. Number of catapults in the army.

Number of archers in the army. Number of cavalry in the army. Number of ships present if at sea.

Experience points the Hero has. Skill Abilities the hero has. All heroes begin with one skill: Roll on the Ability Table.

Main Turn Sequence

1. Initiative Phase
2. Realm Spell Phase
3. Collect Gold Phase
4. Recruit Troops Phase
5. Espionage Phase
6. Move & Explore Phase
7. Disaster Magic Phase
8. Battle Phase
9. Recovery Phase

Initiative Phase

Each player rolls 1D10. This is the Initiative Roll. The highest roll goes first in all of the following phases. The second highest roll goes second in all of the following phases, and so on.

Note that segments in battle rounds are simultaneous for both sides.

Realm Phase

Roll on the Realm Spell Table a number of times equal to 1+ the number of Towers you control. You may cast these spells during the turn when appropriate. Realm spells cannot be saved from turn to turn.

Collect Gold Phase

Collect gold from all of your settlements.

Recruit Troops Phase

Each type of settlement can recruit one type of troop. (see the settlement type table) While at a settlement a hero can purchase troops from it. Capitol cities can recruit warriors and heroes. A maximum of 1D10 troops can be bought in one settlement in one turn.

A hero can have a maximum of 40 troops in his army, and 1 wizard. A hero with the Command ability can have more troops. Two heroes cannot occupy the same hex.

The capitol cannot recruit a hero if one is already occupying the capitol. A Tower is the home of one Wizard who may be recruited for 5 gold. The tower cannot produce any more wizards.

If a wizard is 'killed' he teleports home where he can be recruited by the current controller of the hex. Two wizards cannot occupy the same hex. Wandering wizards have no tower, They teleport off of the map.

Espionage Phase

Players cannot conduct espionage against each other until their empires come into contact. Roll 1D10 = X. This is the Espionage roll. Hire up to X agents for X gold.

Roll 1D10 for each agent on the Espionage Table.

Move & Explore Phase

Except for the hexes containing Capitol cities, all hexes start out with unknown terrain. Basic Heroes have 3 Move Points (MPs). Heroes with logistics ability have extra MPs. An MP can be used to scout (explore) an adjacent unknown land hex.

Roll on the Hex Terrain Type Table to discover the identity of the hex. Determine Settlement types. Newly explored Non-settlement terrains will contain an encounter on a roll of 1-2 on D10.

Roll on the encounter table to determine its type. Write the encounter type onto the map. Encounters do not move. They remain until destroyed. Heroes cannot move into or through encounters.

MPs can be used to move into an explored land territory. Different terrains have different MP costs to enter. Heroes cannot move into water spaces.

Heroes may move through a hex containing another friendly hero. Instead of moving, friendly adjacent heroes may exchange troops or magic items. A troop or magic item may be exchanged only once per turn.

Heroes that can move more than one land space per turn may, instead of moving one hex, explore an adjacent hex.

Disaster Magic Phase

Wizards may cast Disaster Realm Spells.

Battle Phase

A Hero may attack an adjacent enemy hero or an encounter. A Hero may only make one attack per turn. Having strategy ability allows a hero to make more than one attack per turn.

A hex may be attacked more than once per turn. Heroes may combine attacks against a single hex. At the start of a battle, if you have a Wizard in your force, roll on The Battle spell table 4 times for 4 Battle Spells the Wizard can use this battle.

Battle spells cannot be saved from battle to battle. See the Battle Round Sequence section.

Recovery Phase

Collect treasure from encounters: Roll on the treasure table. If you defeated an enemy Hero take all of his magical items. A Hero may remove an enemy control marker in the hex he occupies.

The hero may put down a control marker in the hex he occupies. Heroes earn one Experience point (XP) for every encounter they overcome, every enemy hero they kill and every enemy settlement they take control of. Every two XP earns a hero one skill ability. Roll on the Ability Table.

Battle Round Sequence

A battle 'round' is divided into segments:

1. Spell Segment
2. Initiative 5+ Attacks Segment
3. Initiative 4 Attacks Segment (Catapults)
4. Initiative 3 Attacks Segment (Archers)
5. Initiative 2 Attacks Segment (Cavalry)
6. Initiative 1 Attacks Segment (Warriors)
7. Initiative 0- Attacks Segment

Each troop type has its own initiative rank that determines the order of attacks. Magic and abilities may increase or decrease a troops initiative and or kill rank. Each rank of "Wall" of a terrain or settlement decreases the kill rank of the attacker by 1.

All attacks in the same segment are simultaneous. For its attack a troop rolls 1D10. If this is equal to or less than the troops kill rank, then one enemy troop unit is killed.

The defending player decides which of his troops are killed at the end of the segment. Some spells allow the attacker to decide which units or groups of units are targeted. Ships can be directly attacked by other ships and sea monsters.

The round is repeated until one side is destroyed, or the attacker calls off the attack (at end of round). The Hero is the last unit to be killed in a battle. A Wizard can only cast one spell per round.

Encounters that are not defeated remain. Record what type they are on the map.

Hex Terrain Type Table

D10	Type	MP	Walls	Notes
1-2	Clear	1	0	Plains
3-5	Settlement	1	X	Roll on Settlement Table
6	Forest	2	1	Adjacent Villages earn +1 Gold
7	Marsh	3	1	
8	Desert	2	0	
9	Hills	2	1	
10	Mountains	3	2	Adjacent Mines earn +1
*	River	1	1	Cost to cross to other side

MP is the number of Movement points used to enter the space. Non-settlement terrains will contain an

encounter on a roll of 1-2 on D10. Walls represent protection afforded to defenders in that terrain

Settlement Type Table

D10	TYPE	GOLD	WALLS	RECRUIT
1-3	Village	1	1	Warrior
4-5	Town	2	1	Archer
6	City	3	1	Catapult
7-8	Castle	1	2	Cavalry

D10	TYPE	GOLD	WALLS	RECRUIT
9	Mine	2	0	None
10	Tower	0	2	Wizard
*	Capitol	4	2	Hero

GOLD Revenue per turn

Troop Type Table

UNIT TYPE	COST	INIT	KILL	NOTES
Warriors	1	1	6	
Archers	1	3	4	
Cavalry	1	2	5	

UNIT TYPE	COST	INIT	KILL	NOTES
Catapults	1	4	3	
Hero	10	1	7	Use Magic Items
Wizard	5	–	–	Use Battle Spells

Notes: Cost is in Gold, INIT = Initiative

Encounter Table

D10	TYPE
1	Barbarian Horde: 4D10 Warriors; 1 Treasure
2	Bandits: 2D10 Archers; 1 Treasure
3	Humanoids: 3D10 Warriors; 1 Treasure
4	Disease: Lose 1D10 Troops
5	Ruins: Undead Guardians: 2D10 Warriors; 1 Treasure
6	Monster: Init = 1, Kill = 3; Must be killed 5 times; 1 Treasure
7	Irate Sorcerer: 1 Wizard and 2D10 Warriors attack you; 1 Treasure
8	Petty Warlord: 1 Hero and 3D10 Warriors attack you; 1 Treasure
9	Ancient Dragon: Init = 2, Kill = 4; Must be killed 9 times; 2 Treasures
10	Nomads: 2D10 Cavalry; 1 Treasure

Treasure Table

D10	TYPE
1-2	2D10 Gold
3-5	1D10 Gold
6	Followers: 1D10 Warriors join you.
7	Wandering Mage: 1 Wizard joins you if you have no wizard, if you do have one, get a Magic Item: Roll a Realm spell to determine its effects. Useable once per turn.
8-9	Magic Item: Roll on Ability table to determine its effects.
10	Magic Item: Roll a Battle spell to determine its effects. Useable once per turn.

Notes: All magic items belong to heroes.

Ability Table

1D10	Ability	Effect
1	Wizardry	Wizard gets +1 Battle Spell
2	Command	Maximum troops in heroes army +10
3	Defense	Negate 1 Kill per Segment
4	Leadership	One random troop type gets Kill +1
5	Tactics	One random troop type gets Initiative +1

1D10	Ability	Effect
6	Logistics	Hero +1 Move Point
7	Scouting	Explore +1 Hex in Explore Phase/ Look
-		at one adjacent Heroes Index card
8-10	Rare Ability Roll on rare ability table	

Rare Ability Table

1D10	Ability	Effect
1	Intrigue	+1 to Espionage roll
2	Resist Spells	Negate one spell per battle
3	Prophecy	Get +1 Realm spell per turn
4	Luck	Cause one target die roll per turn to be rerolled
5	Diplomacy	Put a control marker on 1 adjacent neutral settlement in recovery phase
6	Prowess	One random troop type gets +1 Attack per round
7	Healing	In recovery phase restore 1D10 troops lost in battle
8	Siegecraft	Destroy 1 wall in Initiative 1 segment
9	Strategy	Hero gets +1 Battle Phase per turn
0	Wealth	+1 Gold per turn in Collect Phase

Random Troop Type Table

1D5	Type	1D5	Type
1	Catapults	4	Warriors
2	Archers	5	Hero
3	Cavalry		

Espionage Table

1D10	Result
1-5	Failure
6-8	Look at target Hero Index card
9-0	Success: Roll on the Agent Success Table

Agent Success Table

1D10	Result
1	Kill target Hero: That heroes army disbands
2	Gain control of target non-capitol settlement
3	Steal target Magic Item. Give it to any one of your heroes
4	Steal 1D10 Gold. Add it to your coffers
5	Cause 1D10 Gold worth of Property Damage
6	Delay Army: Target Hero cannot move or attack this turn
7	Kill Target Wizard.
8	Cause 1D5 troop units in target army to disband. Opponents choice
9	False Orders: Move Target Hero this turn.
10	Opponent rolls on this table and applies it to you.

Allies

In a multiplayer game, two or more players may form an alliance. An alliance ends as soon as one ally attacks another, or declares the alliance over. Allies

may combine attacks.

Allies may trade anything except spells and abilities: Heroes, gold, troops, magic items, settlements, etc. Allied Heroes may do pass through movement.

Battle Spells Table

1D100	Spell
01-02	Petrification- Kill 1 unit Cast at Initiative 2
03-04	Web- Neutralize 2 units Cast at Initiative 2
05-06	Hold- Neutralize 1 unit Cast at Initiative 2
07-08	Paralyzation- Neutralize 1 unit Cast at Initiative 3
09-10	Mesmerize- Neutralize 1D5 units Cast at Initiative 2
11-12	Weakness- Target group are Kill -1 for the rest of the battle. Cast at Initiative 2
13-14	Fireball- Kill 2 units Cast at Initiative 3
15-16	Lightning Bolt- Kill 1 unit Cast at Initiative 5
17-18	Cone of Cold- Neutralize 1 unit and Kill 1 unit Cast at Initiative 2
19-20	Blessing- Reroll all of your missed attacks once this round of battle. Cast in Spell Segment.
21-22	Bloodlust- All of your warriors get kill +1 this round of battle. Cast in Spell Segment.
23-24	Charm- Take control of 2 of opponents troops Cast at Initiative 1
25-26	Command- Take control of 1 of opponents troops Cast at Initiative 2
27-28	Poison Gas Cloud- Kill 1D5 units Cast at Initiative 2
29-30	Smite- Your Hero gets an extra attack for 3 rounds of Battle. Cast in Spell Segment.
31-32	Haste- All of your troops get Initiative +1. Cast in Spell Segment.
33-34	Invisibility- One group of troops gets Kill +1 and Initiative +1. Cast in Spell Segment.
35-36	Charge- All of your cavalry get kill +1 this round of battle. Cast in Spell Segment.
37-38	Flaming Arrows- All of your archers get kill +1 this round of battle. Cast in Spell Segment.
39-40	Stone to Mud- Destroy 1D5 ranks of opposing walls. Cast in Spell Segment.
41-42	Shield- Negate 4 kills by archers or catapults this round. Cast in Spell Segment.
43-44	Forget- Opposing Wizard discards 2 cards. Cast in Spell Segment.
45-46	Spellbind- Opposing Wizard cannot cast spells the next 2 rounds of Battle. Cast in Spell Segment.
47-48	Polymorph- Neutralize 4 units Cast at Initiative 2
49-50	Armor- Negate 3 kills this round. Cast in Spell Segment.
51-52	Dispell- Negate the effects of one spell just cast.
53-54	Raise Dead- Create 1D5 Warriors. Cast in Spell Segment.
55-56	Swarm- Neutralize 3 units Cast at Initiative 3
57-58	Illusions- Negate all attacks by one enemy group this round. Cast in Spell Segment.
59-60	Summon Dragon- Init = 2, Kill = 4; Must be killed 5 times
61-62	Summon Monster- Init = 1, Kill = 3; Must be killed 3 times
63-64	Summon Fairies- Neutralize 2 units Cast at Initiative 1
65-66	Sleep- Neutralize 1D5 units Cast at Initiative 1
67-68	Shatter- Destroy target magic item. Cast in Spell Segment.
69-70	Phantasmal Terrain- One group gets Initiative +4 this round. Cast in Spell Segment.
71-72	Slow- Target groups Initiative -2 for rest of battle. Cast in Spell Segment.
73-74	Ice Wall- Defender only. Gain 3 Walls. Cast in Spell Segment.
75-76	Force Field- No attacks by archers or catapults this round. Cast in Spell Segment.
77-78	Precision- All attacks by your archers hit this round.

1D100	Spell
	Cast in Spell Segment.
79-80	Wall of Fire- Cavalry, Heroes, and warriors may not attack this round. Cast in Spell Segment.
81-82	Fog- All Archers & catapults are Kill -1 this battle. Cast in Spell Segment.
83-84	Blind- Neutralize 3 units. Cast at Initiative 3
85-00	Reroll

NOTES: Neutralized troops cannot attack for the rest of the battle. Summoned units are summoned in the spell segment and they go away at the end of the battle. Take permanent ownership of controlled troops.

A "group of troops" would consist of all troops of a certain type: All warriors, or all catapults for example.

Kill +1 increases Kill rank by 1. Warriors with kill +1 would kill on a roll of 1-6 instead of 1-5.

Realm Spells Table

1D100	Spell
01-03	Research- Roll 1D5 +5 once on treasure table. Cast in Collect Phase.
04-06	Teleport- Move wizard to another hero without a wizard. Cast in Move Phase.
07-09	Dimension Door- Move Hero to any territory you control. Cast in Move Phase.
10-12	Fly- Hero gets Move Points +5. Cast in Move Phase.
13-15	Blizzard- Target adjacent army cannot move or attack. Cast in beginning of Move Phase
16-18	Firestorm- Target adjacent settlement razed. Disaster Magic.
19-21	Animate Dead- Gain 1D10 Warriors. Cast in Explore Phase
22-24	Stone Rain- Target adjacent settlement razed. Disaster Magic.
25-27	Earthquake- Target adjacent settlement razed. Disaster Magic.
28-30	Flood- Target adjacent settlement decimated. Disaster Magic.
31-33	Death Spell- Target adjacent army loses 2D10 troops. Disaster Magic.
34-36	Pestilence- Target adjacent settlement decimated. Disaster Magic.
37-39	Plague- Target adjacent settlement decimated. Disaster Magic.
40-42	Adept- One of your Heros gains a wandering wizard immediately. Not a spell.
43-45	Summon Avatar- Gain 1 Hero. Cast in Recruit Phase.
46-48	Banish- Destroy adjacent Encounter. Disaster Magic. Treasure destroyed too.
49-54	Prosperity- Gain 1D10 Gold. Cast in Collect Phase.
55-57	Sanctuary- Target hex cannot be attacked this turn. Cast in Explore Phase.
58-60	Stone Walls- Target Wizards hex gets Walls +3 for the rest of the turn. Disaster Magic.
61-63	Curse- Opponent make 1D10 less gold this turn. Cast in Collect Phase.
64-66	Heal- Recover 1D10 troops killed in Battle this turn. Cast in Recovery Phase.
67-69	Cure Wounds- Recover 1D10 troops killed in Battle this turn. Cast in Recovery Phase.
70-72	Fortell- Negate espionage result. Cast in espionage phase.
73-75	View- Explore any 4 adjacent hexes anywhere on the map. Cast in Explore Phase.
76-78	Scry- Look at all Hero index cards. Cast in Explore Phase.
79-81	Energize- All of your wizards get +1 Battle Spell this turn. Cast in Realm Spell Phase.
82-00	Reroll

Notes:

A settlement that is razed or decimated produces no income. A settlement remains razed for 1D10 turns. A razed settlement gets no benefit from its walls.

An army hit by a razing or decimating disaster will lose 1D10 troop units. A wizard can only cast one

realm spell per turn.

Terrain Variants

These are variations of standard terrain that allow recruitment of Special units.

Forest Variant Types

1D10	TERRAIN
1	Elf settlement
2	Lumbermill: Gain 1 Gold per turn
3	Woodsmen settlement

Marsh Variant Types

1D10	TERRAIN
1	Undead settlement
2-10	None

Desert Variant Types

1D10	TERRAIN
1	Bandit settlement
2	Djinn settlement
3-4	Temple: Gain 1 extra Realm spell per turn
5-10	None

Hill Variant Types

1D10	TERRAIN
1	Gnome settlement
2	Kobold settlement
3	Orc settlement
4-10	None

Special Unit Types

UNIT TYPE	COST	INIT	KILL	LOCATION	NOTES
Woodsmen	1	2	4	Forests	Hero gets Scout ability
Elves	2	3	5	Forests	Hero gets Wizardry ability
Fey	1	1	3	Forests	Hero gets Wizardry and Scout ability
Goblins	1	2	3	Mountains	Hero gets Tactics ability
Dwarves	1	1	5	Mountains	Hero gets Defense ability
Orcs	1	1	5	Hills	Hero gets Logistics ability
Kobolds	$\frac{1}{2}$	1	3	Hills	Cheap
Gnomes	1	1	4	Hills	Hero gets Siegecraft ability
Djinn	3	2	8	Desert	Hero gets Wizardry ability
Bandits	1	2	4	Deserts	Hero gets Intrigue ability
Knights	2	2	7	Castles	Hero gets Defense ability
Undead	2	1	5	Marsh	Regenerate 1D10 undead in Recovery Phase
Hobgoblins	2	2	6	Clear	Hero gets Strategy ability

Notes:

Some troop types cause the hero to gain an ability if there is one or more of that troop type present. A Hero can have up to 5 different types of troops in his army. Heroes with the command ability can have one extra type per level of command ability.

1D10	TERRAIN
4	Fey settlement
5-10	None

Mountain Variant Types

1D10	TERRAIN
1	Dwarf settlement
2	Goblin settlement
3	Gold Mine: Gain 2 Gold per turn
4-10	None

Castle Variant Types

1D10	TYPE
1-3	Recruit Knights
4-10	Recruit Cavalry

Clear Variant Types

1D10	TERRAIN
1	Hobgoblin settlement
2	Trading Post- Gain 1 Gold per turn
3-10	None

Game Designers Notes

Warbah? I just liked the sound of it. Instead of rolling 1 attack die for every unit in a group, use this equation: $((1D10)/5)(\# \text{ of Troops})(\text{Kill Rank}/10) = \#$ of enemy troops killed Round to the nearest whole number.

Warcraft Empires

Module for the Warp Empires system. Warp Empires system must be used to play this module

2-8 players
You will need:

- An Action Deck (used by all players)
- A unit chit pile for each player
- A Leader chit pile for each player
- An Upgrade chit pile for each player
- A Mercenary Unit chit pile (used by all players)
- A Magic Item chit pile (used by all players)
- The map
- 40 control markers for each player
- Coins or some other marker for revenue

Map

The map consists of one large continent surrounded by sea. The continent is divided into territories, roughly 60.

Victory

Player will win if they have rulership over half the territories, or all other players have been eliminated.

Set Up

Each player rolls a dice; the highest score goes first, then clockwise around the table, picking a territory to be their starting territory. Each player in turn order takes 9 random unit chits and 1 random leader chit, and places them in their starting territory. No player may be within 3 territories of another.

Action Deck

Players share a common action deck.

Revenue Phase

Revenue points are called Gold. Each territory produces 1 Gold. If a player has a fortification in a territory, then it produces an additional Gold.

Recruit Phase

Leader chits may only be recruited if a player plays the appropriate action card. Leader units are Heroes. Each territory may produce 1 unit. Magic items can only be purchased if the player plays the appropriate action card, and they can only be attached to a leader unit. A leader unit can only have two magic items attached.

Upgrades can be purchased if the player plays the appropriate action card. They apply to all listed factors. Mercenaries are also purchased in this phase in the same way as troops, but the placement restrictions of 1 per territory do not apply.

Move Phase

Magic items can be swapped between leaders if they occupy the same territory at the beginning of the phase.

Battle Phase

Spell cards can be played only if there is a Magic unit in the stack. If a leader is slain, their magic items are also discarded.

Special Attributes These affect the way certain units function in battle. They are listed as follows:

ATTRIBUTE	Notes
Cavalry	Unit gains +1 force if they are attacking
Brute	Opponent loses 1 extra unit after battle for each Brute unit in stack. Max 3
Missile	Unit gains +1 force if they are defending
Raiders	Add 1 Gold to player's total for each unit killed if a stack containing raiders wins a battle
Water	Can only be recruited in coastal territories. Unit can only enter sea or coastal territories.
Transport (x)	Unit can carry (x) other units, moving at it's own speed.
Flying	Unit can move over sea territories or territories containing enemy units. Flying units cannot end their move in sea territories.
Protect	If a Protect unit is on the losing side in a battle, reduce the number of

ATTRIBUTE	Notes
	casualties suffered by 1, to a maximum reduction of 3. A minimum of 1 unit must be lost.
Besieger	+2 force if Fortifications are in the opposing stack.
Magic	Unit may cast 1 spell per turn.
Fortification	Remains in the territory it was recruited in. No more than 1 per territory.
Scout	Controlling player may look at 1 adjacent stack per turn. Only 1 scout unit in a stack may perform this function per turn.
Invisible	Unit may not be attacked, so long as all units in its stack are invisible.
	May move through enemy controlled territories without attacking. The scout ability negates this ability.

Human Units	#	Force	Move	Attributes
Footmen	15	2	M	Infantry
Dwarf Riflemen	15	2	M	Missile
Knights	10	3	F	Cavalry
Dwarf Mortar Team	10	3	S	Besiegers

Keeper of the Grove	1	5	M	Hero, Magic
Tree of Life	5	6	-	Fortification
Ship	5	0	F	Water, Transport (4)

Upgrades	Cost	Effect
Uproot:	6	Tree of Life may now move at Slow movement
Marksmanship:	6	All missile units are +1 Force
Strength of the Wild:	6	All Brute units are +1 Force
Ancient Protectors:	6	Tree of Life gains Missile
Woodland Stealth:	6	player can pay 3 Gold at the start of the movement
	-	phase to make all archer units Invisible until end of turn.
Hero Advancement:	6	All Heros +1 Force

Undead Units	#	Force	Move	Attributes
Ghoul	15	2	F	Infantry
Gargoyle	10	2	M	Flying
Crypt Fiend	10	3	M	Brute
Shade	5	1	S	Scout, Invisible
Necromancer	15	3	M	Magic
Banshee	10	3	M	Missile
Abomination	10	4	S	Infantry, Brute
Meatwagon	10	3	S	Besiegers
Frost Drake	5	4	M	Flying, Brute
Death Knight	1	5	M	Hero, Cavalry
Dread Lord	1	5	M	Hero, Magic
Lich	1	5	M	Hero, Magic
Necropolis	5	6	-	Fortification
Ship	5	0	F	Water, Transport (4)

Upgrades	Cost	Effect
Unholy Strength:	6	All Infantry units are +1 Force
Necromancy Training:	6	All Magic units are +1 Force
Spirit Towers:	6	Necropolis gains +1 Force and Magic
Hero Advancement:	6	All Heros +1 Force
Frost Breath:	6	Give Frost Drakes Besieger
Cannibalize:	6	An undead stack will do 1 extra casualty on a defeated enemy

Mercenary Units	#	Force	Move	Attributes
Forest Troll Berserker	3	3	M	missile
Ogre Mauler	2	4	S	Brute
Ogre Magi	2	4	S	Brute, Magic
Gnoll Brute	5	2	M	Scout, Raider
Furbolg Warrior	2	4	M	Brute, Protect
Centaur Outrunner	3	3	F	Cavalry, Raider
Rock Golem	2	4	S	Brute
Razormane Medicineman	3	2	M	Magic
Harpy Rogue	3	2	F	Flying
Murloc Huntsman	5	2	M	Scout

Magic Items

Item	#	Cost	Effect
Scroll of town portal	2	3	move stack to any friendly fortification, Can be used to avoid
	-	-	a battle at any time before the battle is worked out. Discard after use
Cloak of Invisibility	2	4	Hero gains the invisibility trait
Boots of Speed	2	3	hero's speed becomes Fast
Belt of Giant Strength	2	4	Hero gains Brute
Claws of Attack	2	3	Hero has +2 Force in battle
Robe of the Magi	2	4	Hero gains Magic
Ankh of Reincarnation	2	5	If Hero is killed in a battle they are returned to the stack in the Control phase.
	-	-	If stack completely destroyed, place hero in any friendly territory. Discard after use
Horn of Plenty	2	5	Adds 5 gold every revenue phase.
Scroll of Summoning	2	3	Summons one summonable creature to fight for 1 battle, as per race. Discard after use
Crystal Ball	2	4	May look at an opponent's hand once per turn
Bow of Quel'Thalas	2	3	Hero gains Missile
Cloak of Wings	2	4	Hero gains Flying
Scroll of Protection	2	3	Hero's stack suffers no casualties in 1 battle. Discard after use
Staff of Negation	2	3	Hero can negate 1 spell affecting his stack per turn.

Action Deck

Cards	#	Effect
March	10	Move 1 stack, or 3 units
Grand March	6	Move 2 stacks, or 6 units
Great March	3	Move 3 stacks or 9 units
Hero	5	May recruit another Hero (max=3)
Assassin	1	Discard target Leader
Killing Blow	1	Battle: Hero Action: Discard target Leader
Thieves	1	Take target Magic Item and attach to one of your Leaders
Espionage	1	Look at target player's hand
Scouts	1	Look at target stack
Run Them Down	1	Battle: Target losing stack loses 1 extra unit

Cards	#	Effect
Storms	1	Target stack in a coastal or sea territory cannot move on
	-	their controller's next turn.
Ruin	1	Discard target enemy keep
Dragon Attack	1	Target player must discard 3 units or 1 hero
Battle Hardened	1	Battle: Your Infantry units gain +1 force
Eagle Eye	1	Battle: Your Missile units gain +1 force
Outflank	1	Battle: Your Cavalry units gain +1 force
Terror	1	Battle: Your Undead units gain +1 force
Rage	1	Battle: Your Orc units gain +1 force
Woodcraft	1	Battle: Your Night Elf units gain +1 force
Discipline	1	Battle: Your Human units gain +1 force
Ambush	1	Battle: Your Raiders units gain +1 force
Assail	1	Battle: Your Flying units gain +1 force
Overbear	1	Battle: Your Brute units gain +1 force
Maelstrom	1	Target stack in a sea or coastal territory must discard one unit.
	-	If this unit is a transport, all transported units are lost as well.
	-	Transported units cannot be chosen.
Magic Item	10	Play to take a random chit from the magic items pile
Upgrade	10	Play to take a random chit from your race's upgrades pile.
Mercenaries	5	Play to take 3 random chits from the mercenary units pile.
Windfall	1	Gain 15 Gold in the revenue phase
Earthquake	1	Spell: Battle: caster's stack gains +5 force
Divination	1	Spell: Look at target stack or opponent's hand

Meteor Storm	1	Spell: Battle: caster's stack gains +9
Destruction	1	Spell: Destroy target non-leader unit in an adjacent territory
Haste	1	Spell: All units in caster's stack become fast
Immobilize	1	Spell: Battle: Target non-leader unit does not add to the force total this battle
Good Year	1	All territories you control produce 1 extra Gold this turn

Warcraft Skirmish

Introduction

Board & card game for 2+ players. Battle between 2 opposing Armies of Heroes and Minions. Abstract Skirmish level combat.

Disclaimer

Warcraft is a licensed, copyrighted property. This is merely a fan site.

Victory

Per Individual Scenario Rules. Can include:

1. Kill the opposing Main Hero or Heroes.
2. Take control of Location
3. Recover or Destroy Artifact
4. Some Percentage of Unit losses
5. Rescue or Kill Neutral Units
6. Defend or Destroy Gateway

The Map

Use an 8x8 chessboard. Larger Boards may be preferable. Hex Maps are also useable.

Dice

Six sided dice (D6) are occasionally needed.

Damage Counters

These are needed to keep track of damage for individual units.

Terrain Types

- Clear: No Modifications.
- Rough: Units must stop upon entering.
- Road: Unit gains SA: M = 2
- Defensible Ground: Unit gains SA: Defend
- High Ground: Unit gains SA: A = 1
- Low Ground: Adjacent Units get SA: A = 1 vs this Unit
- Hiding Place: Unit gains SA: Ambush
- Secret Passage: Unit gains SA: M = K
- Poor Ground: Unit gains SA: Weak
- Hazardous Ground: At end of turn roll 1D6: On 5-6 Unit takes 1 Damage
- Vantage Point: Unit gains SA: Scout if enemy unit within 4 spaces
- Standing Stones: Unit may use Totem Table
- Trash Heap: Unit finds a Minor Item on a roll of 1 on 1D6

- Impassable: Non-Flying Units may not enter or Move Through.

Note: Distribute According to taste.

The Units

Use chits or figures or miniatures to represent units. Units will either be Heroes or Minions or Structures.

Factions

Players must choose to be from one of the available Factions. The original Main Factions are Alliance and Horde, however there are literally scores of factions. A number of factions are detailed in the Faction Lists

Basic Army Distribution (b.a.d.)

Each Player will have the following Units:

- 8 Small Minions (Max 2 of 1 Kind) (1 Hit each)
- 4 Medium Minions (Max 2 of 1 Kind) (2 Hits each)
- 2 Large Minions (3 Hits each)
- 1 Huge Minion (4 Hits)
- 1 Generic Hero (5 Hits)

Other Distributions are certainly possible. For larger forces you may want to increase hand draw and hand limit. The B.A.D. is valued at 31 Points.

Table Terminology

SA Special Ability

Adj Adjacent

Dam Damage

Foe Enemy Unit

HTH Hand to Hand = Any Attack of Range = 1
Ranged = Any Attack of Range = 2 or greater

NH Non Hero

LOS Line of Sight

OPP Opponent (Opposing Player)

FM Friendly Minion

FU Friendly Unit

Unit Hits

Each unit will start with a number of hits according to the Unit lists.

Unit Cost

A Unit's Cost is equal to the number of Hits it has.

Setup

Flip a coin to see who goes first for Unit placement. Players take turns placing one unit at a time on 1 square of their back Four rows. Or designate unit starting areas per scenario.

Flip a coin to see who gets the first turn.

Stacking Rules

In general, Units may not stack or move through each other, However this may occur out of necessity in certain situations including:

1. Mounted Units.
2. Flying Units Hovering over ground units
3. Burrowing Units traveling under ground units
4. Units Trampled by other Units
5. Crowding Situations such as Retreats, Envelopments, and 'Push of Pike'.

Enemy Units in the same space are considered to be at range = 1 for attack purposes. Whenever a "Crowded" Unit tries to attack, defend, move, or otherwise act it fails on a roll of 4+ on 1D6.

The Common Deck

Players use a standard 52 card Deck.

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Fate Phase
2. Action Phase
3. End Phase

Fate Phase

Draw 5 cards. If the deck runs out, shuffle the discard and draw from it. Place 1 Action Token on each of your Units.

A Unit may only ever have a max of one Action Token on it.

Action Phase

Play (discard) a Move card to move one of your Units one Space. Moves can be diagonal or orthogonal. Some cards allow longer moves.

"Knight" type moves allow a unit to move like a knight in chess. Play (discard) a basic Attack card to have a unit attack an adjacent Foe. Attacks can be diagonal or orthogonal.

Every attack does a base of 1 Damage (Target loses 1 Hit). Attacks can also result from activating Special Abilities, Skills, Crafts, or Items. These attacks can vary greatly in range, damage, number of targets, and secondary effects (Such as Immobilization or Poison).

"Knight" type attack cards produce an attack with a range like a knight in chess. Use Counters stacked with the Unit to record damage. A unit reduced to 0 Hits is killed or incapacitated and removed from the board.

Your opponent may play Defense cards to negate your attack. Units cannot attack through other units unless the attacker is at a higher elevation. Remove an Action Token from a Unit to draw 1 Card that can only be used by that Unit immediately. If the card is not used immediately (as the next action or part of a series of actions made by that unit) discard it.

End Phase

Max hand size = 5 cards. Discard excess cards.

Unit Action Limits

A Unit can make a max of one move and one attack on its turn. A Unit can make only one defensive action during an opponents turn.

Special Abilities

Every Unit has one or more Special Abilities (SA). To activate an SA, a player must play a Special Ability card (part of the Common Deck).

Modified And Triggered Abilities

TEC Trigger Effect Cost = This refers to all TE and DR... When triggered it does not have to be paid for with a SA (or Craft) card... Any card from the players hand will work. If the player has no cards then the effect does not happen.

TE Trigger Effect = This ability can only occur when a certain specific Event happens

OTO One Time Only = The Unit can only use this power once per game

DR Death Rattle = The Unit can only use this ability once when killed

Ongoing Special Abilities

These SA do not require the discard of a card to activate them. They are always in effect. Examples: Flying, Mount, Resistance Special Case: Sometimes Dual

Heal

Special Ability, Restore one lost Hit to an adjacent Unit.

Regenerate

Special Ability. Restore one lost Hit to Self.

Immobilize

Special Ability. Target Unit cannot Move or Attack or Defend until the Beginning of your next turn. Like attacks a range must be specified.

Snare

Special Ability. Like Immobilize except the target is immobilized on his turn while he is moving. Movement stops immediately and the unit is grounded if it was flying.

Protect

Special Ability. Defend for Adjacent Unit

Martyr

Special Ability. Triggered Effect: If target attack can target this Unit, it does.

Feast

Special Ability. TE: If this unit killed an adjacent Unit this turn, then this unit Gets 1 Pump Token.

Drain

Special Ability.

A X then this unit is Healed for 1 Hit or gains 1 Pump Token.

Range (X) of this Attack must be specified.

Charge

Special Ability.

Move 3 then A = 1

Trample

Special Ability.

M 2 then A = 1 then M = 2

Resistance

Ongoing Special Ability. This unit cannot be harmed by very specifically stated effects or types of Damage. This effect does not require a card to discarded. Example: Cold Resistance gives protection from all attacks described as Ice or Frost.

Dual

Special Ability. This unit may make a second attack on it's turn. Depending on how it is worded, this SA is sometimes ongoing, but more often it is combined as a one turn benefit tacked onto another SA.

Damage +x

Special Ability. Target Attack made by this Unit does an extra X Damage. X must be specified.

Ambush

Special Ability. Unit gets A = 1. This Attack is made on opponents turn after his Movement Phase.

Stupid

Special Ability. If more than 1 Foe is in Range, it will attack a Random Foe.

Mount

Ongoing Special Ability. This Unit can be paired with a Hero Unit (not already Mounted). This will require agreement amongst players as to what is allowable.

Both occupy the same space. They move together using the Mounts Movement. When attacked damage is split between them. Immobilize effects both units.

While mounted the pair may make a single Charge attack. Usually the mount can handle a second rider as well.

Carry

Ongoing Special Ability. Like the SA Mount, but multiple Units can be aboard. If the number of units are in excess of 4, they are considered to be crowded per the stacking rules.

Flying

Ongoing Special Ability. The controller of the Unit will decide whether the unit is airborne or not during any given turn or movement. While flying he Unit can move past other Units and is not affected by the Terrain it is in.

Stupify

Special Ability. Target Minion gains trait of Stupid Range (X) of this Attack must be specified.

Stealth

Special Ability. Play on your turn. This Unit cannot be attacked on opponents next turn. Draw 1 Card.

Detect

Special Ability. Negate a Stealth or Ambush effect.

Switch

Special Ability. Switch places of this Minion and any other friendly unit.

Transform

Special Ability. Target Minion becomes a Critter (Small Minion) with 1 Hit and Special Ability of M = 1. Range (X) of this Attack must be specified.

Inspire

Special Ability. All Adjacent friendly Minions get A = 1.

Counter Attack

Special Ability. Do 1 Damage to adjacent Unit that just attacked and did damage to this Unit.

Whirl

Special Ability. Do 1 Damage to all Adjacent Units.

Control

Special Ability. Control Target enemy Minion this Turn. Range must be specified.

Storm

Special Ability. Roll 1D6 for each enemy Unit. On a roll of 1 that Unit takes one Hit.

A Total Storm Affects all Units on Both Sides.

Kill

Special Ability. Target Minion is automatically killed. Range of this Attack must be specified.

Weak

Special Ability. Target Unit cannot attack.

Weaken

Special Ability. Target Minion becomes Weak. Range of this Attack must be specified.

Pillage

When this unit kills an adjacent unit you get 1 Gold

Plague

Special Ability. Roll 1D6 for each enemy Unit. On a roll of 1 that Unit rolls once on the Poison Table.

Doom

Special Ability. Roll 1D6 for each enemy Unit. On a roll of 1 that Unit becomes Weak until end of next turn

Teleport

Special Ability. Move any Friendly Unit to any empty space.

Track

Special Ability. Move Unit adjacent to target enemy unit.

Enrage

Special Ability. Triggered effect: When this Unit is damaged discard 1 card and this unit gets 1 Rage Token.

Pump

Special Ability. This Unit gets a Pump Token.

Mastery

Special Ability. This unit may use any of its Craft abilities (of any number) of it's Choice.

Power Up

Special Ability Draw and discard cards until you get a Craft Card. Put it in your Hand.

Spy

Special Ability. Look at Opponent's hand and next 5 cards in Deck.

Scry

Look at next 10 cards in Deck.

Scout

Look at Opponent's hand then draw 1 card from the deck.

Procure

Gain X Items. Quality must be specified (Minor, Major, etc.) Type must be Specified (Gnomish, Goblin, etc.) These are immediately distributed to your Units however you like

Spell Immunity

Special Ability Trigger Effect: Negate the effect of a Craft Card used against this unit.

Poison

Special Ability. Play on Unit just damaged by this Minion. Roll 1D6:

1. End of next turn this Unit takes an extra point of damage
2. Unit Immobilized next turn
3. Unit is Weak next turn
4. Unit cannot use SA or Craft cards next turn
5. Unit cannot Move next turn
6. Move Unit 1 Space

Summon

Special Ability. Bring a Unit into play. The Unit appears in an empty space adjacent to the Summoner.

When summoning a 1 Hit minion you must discard 1 random card. When summoning a 2 Hit minion you must discard 2 random cards and so on. Minions cannot attack the turn they are summoned.

The Term Recruit can also be used (Gold may be used in Part or Full). When the term Buy or Hire is used payment must be in Gold.

Summon Limits

The max number of Summoned Minions you can have on the board at one time is 10.

Raise Dead

Just like Summon except the Raised Unit must be one from either side that died during this battle. The unit is now also Undead.

Resurrect

Just like Summon except the Raised Unit must be from your side and have died recently. Unlike Raise Dead the unit is not Undead.

Tokens

Tokens are like coins. Tokens may be placed on Units. Tokens always have two sides each with a unique ability or effect.

When using a Token choose which of the effects you want, then flip the Token like a coin: If it lands on the side you chose then the effect occurs, otherwise it does not. Either way discard the Token after you have flipped it. There are 4 types of Tokens:

Type:	Side A	Side B
Pump	A = 1	Defend
Armor	Defend	Protect
Shield	Martyr	Defend
Rage	Damage +1	A = 1

Craft Cards

These cards activate an ability corresponding to your Hero's type or to certain Minion types namely Gnomes, Mechs, and Totems. If more than 1 version of a craft ability is given, use any one you want.

Notation

M Movement

A Attack

D Defense

S Special

SA Special Ability

K as a Knight would move in Chess

Type Purpose of card

The Common Deck

Players use a standard 52 card Deck.

Card Uses

Cards have multiple uses depending on their Suite or Rank.

Club Cards

All Club cards can be used for an Attack of Range = 1 by target Friendly Unit vs Target Enemy Unit. All Queen Cards can be used to activate a Major Item of a Friendly Unit.

Diamond Cards

All Diamond Cards can be used to activate a Skill of a Friendly Unit. All Diamond Cards can be used to activate a Legendary Item of a Friendly Unit.

Spade Cards

All Spade Cards can be used to Move a Target Friendly Unit one space. All Spade Cards can be used to activate a Minor Item of a Friendly Unit.

Heart Cards

All Heart Cards can be used to activate a Friendly Units Special Ability. All Heart Cards can be used to activate a Epic Item of a Friendly Unit.

Ace Cards

All Ace Cards can be used to activate a Type 1 Craft Ability of a Friendly Unit.

Deuce Cards

All Deuce Cards can be used to activate a Type 2 Craft Ability of a Friendly Unit.

Three Cards

All Three Cards can be used to activate a Type 3 Craft Ability of a Friendly Unit.

Four Cards

All Four Cards can be used to activate a Type 4 Craft Ability of a Friendly Unit.

Five Cards

All Five Cards can be used to activate a Type 5 Craft Ability of a Friendly Unit.

Six Cards

All Six Cards can be used to activate a Type 6 Craft Ability of a Friendly Unit.

Seven Cards

All Seven Cards can be used to Move a Target Friendly Unit two spaces.

Eight Cards

All Eight Cards can be used to Move a Target Friendly Unit two spaces.

Nine Cards

All Nine Cards can be used to Move a Target Friendly Unit three spaces.

Ten Cards

All Ten Cards can be used to Move a Target Friendly Unit four spaces.

Jack Cards

All Jack Cards can be used to Move a Target Friendly Unit like a Knight in Chess. All Jack Cards can be used to Martyr

Queen Cards

All Queen Cards can be used to Move a Target Friendly Unit like a Knight in Chess. All Queen Cards can be used to Defend: Negate an Attack vs target Friendly Unit.

King Cards

All King Cards can be used to Move a Target Friendly Unit five spaces. All King Cards can be used for Damage +1

Common Minions

Most armies are composed of a majority of these cheap, lesser, nameless, faceless, minions.

Legendary Minions

These are like regular Minions except that they are Unique. If 2 players want to use the same Legendary, only one player may have it... Roll high on 1D6 to see who gets to use it. The other player will have to choose a substitute.

Generic Heroes

These are used to personify the players. By default they are considered to start with 5 hits, and set Special Abilities but this can be varied.

Named Heroes

These Unique Units are found in the Minion Lists. They are able to use Craft Tables like Generic Heroes.

Structures

Structures cannot move. Units may enter Structures. Raze attacks do double damage to Structures.

Structures can be built on most Terrain Types. Once built the underlying Terrain is ignored. If destroyed the space will become Rubble Terrain.

Faction List

Alliance Of Lordaeron

Soldier, Knight, Church of Light, Gnome, Dwarf, Siege, Gryphons, High Elf, Wizard, The Seven Human Kingdoms Main Foe: Old Horde

Alliance

Soldier, Knight, Church of Light, Gnome, Dwarf, Siege, Gryphons, Pandaren, High Elf, Wizard, Draenei, Worgen, Furbolg, Jinyu, Treants, Ancients Capital City: Stormwind

owhide, Wildpaw, Woodpaw

Worgen Tribes

- Alliance: Greymane, Bloodfang
- Scourge: Wolfcult
- Pirate: Brashwater Crew
- Independent: Lycanthoth, Nightbane, Moonrage, Shadowfang, Terrowulf

Earthen Ring

- Leader: Thrall
- Organization of Shamans

Cenarion Circle

- Leader: Malfurion Stormrage
- Organization of Druids

Twilight's Hammer

- Leaders: Cho'gall, Deathwing, and C'Thun
- Orc Death Cult

Dragonflights

- Major: Black, Blue, Red, Green, Bronze
- Lesser: Chromatic, Infinite, Twilight, Netherwing, Plagued

Minion Tables

Soldier Minion List

Minion:	Hits:	Special Ability:
Peasant	1	{Human} Summon 1 Alliance Structure or M = 3 and Gain 1 Gold
Militia	1	{Human Soldier} Defend
Shield Bearer	1	{Human Soldier} Protect
Footman	1	{Human Soldier} M = 2
Sergeant	1	{Human Soldier} Adjacent Unit gets A = 1
Quartermaster	2	{Human Soldier} Inspire
Captain	4	{Human Soldier} Can use Commander Table

Note: All Soldiers can use the Soldier Table

Alliance Structure List

Minion:	Hits:	Special Ability:
Guard Tower	2	{Structure} Units inside get Defend and A = 2
Scout Tower	1	{Structure} Scout if any enemy Units are within 5 spaces
Cannon Tower	3	{Structure} A = 4. Units inside get Defend
Arcane Tower	2	{Structure} A = 3. Units inside get Defend
Town Hall	3*	{Structure} Summon 1 Peasant. Units inside get Defend
Inn	1	{Structure} Summon 1 Hero
Barracks	2	{Structure} Summon 1 Soldier

Minion:	Hits:	Special Ability:
Stables	1	{Structure} Summon 1 Knight
Arcane Sanctum	2	{Structure} Summon 1 Wizard (also Spellbreaker)
Workshop	1	{Structure} Summon 1 Siege Engine or Construct
Church	2	{Structure} Heal or Summon 1 Priest
Gryphon Aviary	3	{Structure} Summon 1 Gryphon Rider
Altar of Kings	3	{Structure} Ressurrect
Blacksmith	1	{Structure} Adjacent Unit gets 1 Pump or Armor Token

* 4 Hits for a Keep and 5 Hits for a Castle

Siege Minion List

Minion:	Hits:	Special Ability:
Catapult	1	{Siege Engine} A = 4 with Raze
Ballista	1	{Siege Engine} A = K
Siege Cannon	1	{Siege Engine} A = 5 with Raze
Battering Ram	1	{Siege Engine} A = 1 with Damage +1 and Raze
Siege Tower	2	{Siege Engine} Carry. Protect or A = 2

Note: All Siege Engines have the skill of A = 3

Knight Minion List

Minion:	Hits:	Special Ability:
Squire	1	{Human Knight} Martyr
Knight	2	{Human Knight} Defend
Mounted Knight	3	{Human Knight} Charge
Guardian of Kings	4	{Human Knight} Martyr or Protect
Knight Karia	3	{Human Knight} Protect
Leroy Jenkins	4	{Human Knight} Charge

Note: All Knights can use the Knight Table

Silver Hand Minion List

Minion:	Hits:	Special Ability:
Uther Lightbringer	8	Hero{Human Paladin} Summon 1 Silver Hand Knight
Silver Hand Recruit	1	{Human Paladin}
Silver Hand Knight	3	{Human Paladin} Uses the Discipline Craft Table
Tirion Fordring	10	Hero{Human Paladin} Gain 1 Shield Token or Hero gets A = 1
Alexandros Mograine	7	Hero{Human Paladin} Kill Undead Range = 1 or Protect
Petreus Roffe	5	Hero{Human Paladin} Defend
Duke Lion Heart	6	Hero{Human Paladin} Defend or Inspire

Stormwind Minion List

Minion:	Hits:	Special Ability:
King Llane Wrynn	9	Hero{Human Warrior} Protect or Martyr
Stormwind Knight	2	{Human Knight} Charge
Stormwind Champion	4	{Human Knight} (Slay) Damage +2

Church Of The Holy Light Minion List

Minion:	Hits:	Special Ability:
Anduin Wrynn	7	Hero{Human Priest} Heal. Can use Shadow Table
Lady Bancroft	7	Hero{Human Priest} Protect
Lightwarden	1	{Human Soldier Priest} Pump
Temple Enforcer	3	{Human Soldier} Heal

Adventure Scenarios Variant

One player uses an army composed of 2-4 Heroes (and allies) to be used against several different enemy armies in succession played by a game master who designs the Scenario.

Hero Leveling

A Hero will gain 1 Experience (XP) for each Hit worth of Units he defeats. Note that Generic Heroes start at Level 5

Level	XP Required	Hits	SA	Skills	Notes:
1	10	1	1	0	Aspirant
2	25	2	1	0	Hero in Training
3	50	3	1	0	Lesser Hero
4	75	4	1	0	Minor Hero
5	100	5	2	0	Generic Hero
6	200	6	2	1	Veteran Hero
7	400	7	2	2	Elite Hero
8	800	8	2	3	Major Hero
9	1600	9	2	4	Greater Hero
10	3200	10	2	5	Arch Hero

Others:

11-20	Arch Demons, Demi-Gods, Dragon Aspects, Elemental Lords
21-99	Old Gods, Titans
100+	Titans of the Pantheon

Wargammon

Introduction

Two player abstract strategy board game. Variant of Backgammon

Equipment

Checker Board (64 spaces) 16 red checkers 16 black checkers 2 six sided dice

Setup

Each player gets one set of 16 checkers. Each player has his own 'side of the board' On the back row of a players side, the player places a stack of 8 checkers in each of the two corner spaces Red moves first

Object

Be the first to move all of your checkers off the board past your opponents back row

Turn Sequence

Players take turns On your turn roll the two six sided dice You may move one checker twice or two checkers once a number of spaces equal to the dice rolls Checkers may be moved forward, to the left sideways, and to the right sideways Checkers may not be moved diagonally or backwards If one of your checkers lands on top of a single opponent's checker the opponent's checker is captured A stack of two or more checkers may not be captured A checker may not capture another checker on its second move A captured checker is immediately placed on top of one of its owners corner stacks by its owner A checker may not jump over any other checker or stack of checkers A checker moved off the board past the opponents back row is out of the game Rolling doubles allows the player to make 4 moves, just as in regular backgammon

Wargasm

Introduction

Card game for 2-4+ players. Modern Combat Theme.

Disclaimer

Wargasm is a licensed, copyrighted property. This is merely a fan site.

Victory

Players are eliminated when they have accumulated 20 or more points of Damage. Be the last player standing.

Damage

Each player starts with zero Damage. Use (fake) bullets to keep track of Damage.

The Deck

Players share a common deck.

Card Versatility

Each card can be used in up to 3 ways:

- As a Unit
- To Attack
- As a Special Event

Unit Types

Each card will list 1 type of Unit. There are 4 types of Military Units:

- Infantry
- Vehicles
- Artillery
- Air In addition to these Units there are Intel cards. These Intel cards do not have the Unit Function. Intel cards will list an Attack and an Event, or 2 Events. Cards being used as Units are kept face-up on the table in Front of the controlling player. Cards put into play as units are said to be Deployed.

Attacks

The Attack function of a card will specify attacker type and target type. When a card is being used to attack, you must have the Appropriate type of Unit in play that can make the Attack. The Attack Targets either the opponent's Base or a specific Type of Unit that the opponent has in play.

As a result of the Attack, the Attack card is discarded and the Target unit is discarded, or if the Base was attacked, the target Player will gain 1 Damage for each Unit that attacked. The attacking Unit(s) remain in play.

Special Events

Each card describes a Special Event. Most of these are played in your Event Phase, but some are meant To be played at other times, even during an opponent's turn. In general, Event cards are discarded immediately after being played.

Setup

Shuffle the Deck. The biggest War Monger goes first. Play proceeds clockwise.

The first player is dealt 1 card. The second player is dealt 2 cards and so on.

Turn Sequence

Players take turns. Each turn has 5 Phases:

- Logistics Phase
- Deploy Phase
- Attack Phase
- Event Phase
- Friction Phase

Logistics Phase

Draw 4 cards from the deck. If the deck runs out, shuffle the discard and draw from it.

Deploy Phase

You may put 1 Unit card into play from your hand.

Attack Phase

You may make 1 Attack this Phase: To do this, you must play a card for its attack function. The Attack function of a card will specify attacker type and target type. Example Terminology: Infantry attacks Vehicle.

When a card is being used to attack, you must have the Appropriate type of Unit in play (deployed) that can make the Attack. The Attack Targets either the opponent's Base or a specific Type of Unit that the opponent has in play. As a result of the Attack, the Attack card is discarded and the Target unit is discarded, or if the Base was attacked, the target Player will gain 1 Damage for each Unit that attacked.

The attacking Unit(s) remain in play. Some Event cards will allow the defender to negate the Attack. Attack Cards targeting Units allow a single attacking unit to attack a single target Unit.

Attack Cards targeting Bases allow all units of the indicated type to Attack. So if you had 4 Infantry deployed and played Occupy, you would do 4 Damage.

Event Phase

You may play 1 Event card this Phase. Unless otherwise specified, Event cards are played only in this Phase. Discard the event card when played.

Friction Phase

Max hand size is 5 cards. Give excess cards to one or more opponents.

Common Deck Card List

Unit:	Attack:	Event:
Infantry	Sniper	Cover
Infantry	Sniper	Minefield
Infantry	Rockets	Ambush
Infantry	Rockets	Patrol
Infantry	Infiltrate	Special Forces
Infantry	Infiltrate	Cover
Infantry	SAMS	Minefield
Infantry	SAMS	Ambush
Infantry	Occupy	Patrol
Infantry	Occupy	Special Forces
Vehicle	Overrun	Armor
Vehicle	Overrun	Tank Traps
Vehicle	TK	Exploitation
Vehicle	TK	Scout Car
Vehicle	Outflank	Reserves
Vehicle	Outflank	Armor
Vehicle	Air Defense	Tank Traps
Vehicle	Air Defense	Exploitation
Vehicle	Breakthrough	Scout Car
Vehicle	Breakthrough	Reserves
Artillery	Barrage	Camouflage
Artillery	Barrage	Deception
Artillery	ATG	Forward Observer

Intel	Ground Assault	Propaganda
Intel	Envelopment	Rally
Intel	Major Offensive	Defense in Depth
Intel	Night Attack	Retreat
Intel	Fog of War	Friendly Fire

Card Ability Descriptions

Ability:	Notes:
Sniper	Infantry Attacks Infantry
Minefield	Event: Negate Attack by Infantry
Rockets	Infantry Attacks Vehicles
Ambush	Event: Negate Attack & Destroy Attacking Unit
Patrol	Event: Draw 1 Card and Look at Enemy Hand
Infiltrate	Infantry Attacks Artillery
Special Forces	Event: Opponent discards 2 random cards from Hand
Cover	Event: Negate Attack Targeting Infantry
SAMS	Infantry Attacks Air
Occupy	All Infantry Attack Base
Overrun	Vehicle Attacks Infantry
Armor	Event: Negate Attack Targeting Vehicle
Tank Traps	Event: Negate Attack by Vehicle
TK	Vehicle Attacks Vehicle
Exploitation	Event: Attacks vs. Base do Double Damage
Scout Car	Look at Enemy Hand. Deploy 1 Unit from your Hand
Outflank	Vehicle Attacks Artillery
Reserves	Event: In Logistics Phase Deploy 1 Unit or Draw 2 Cards
Air Defense	Vehicle Attacks Air
Breakthrough	All Vehicles Attack Base
Barrage	Artillery Attacks Infantry
Camouflage	Event: Negate Attack Targeting Artillery
Deception	Event: Negate Attack by Artillery
ATG	Artillery Attacks Vehicles
Forward Observer	Event: Look at Next 7 Cards in Deck
Convoy	In Logistics Phase Draw 1 Card and Deploy 1 Unit
Artillery Duel	Artillery Attacks Artillery
Reinforcements	Event: Draw 3 Cards in Logistics Phase
Flak	Artillery Attacks Air
Bombardment	All Artillery Attack Base
Strafing	Air Attacks Infantry
Air Superiority	Event: If you have most Air Units take another turn
Weather	Event: Negate Attack by Air
Missiles	Air Attacks Vehicles
Air Lift	Event: Deploy 2 Units in Deploy Phase
Ariel Recon	Event: Look at All Enemy Hands. Play Another Event
Bombing Run	Air Attacks Artillery
High Altitude	Event: Negate Attack Targeting Air
Interceptors	Air Attacks Air
Air Strike	All Air Attacks Base
Counter Attack	Event: Play 1 Attack Card at end of Enemy Attack Phase

Ability:	Notes:
Tactics	Event: In Logistics Phase Draw 5 cards and Discard 3
Surprise Attack	Any Unit Attacks Any Unit or Base. Discard 1 Card
Espionage	Event: Steal 1 Random Card from Enemy Hand
Ground Assault	All Infantry & Vehicles Attack Base
Propaganda	Event: Steal 1 Enemy Unit
Envelopment	Event: Enemy takes 2 Damage
Rally	Event: Take Unit from top of Discard and Deploy it
Major Offensive	All Units Attack Base
Defense in Depth	Event: Base takes half Damage from Attack (Round down)
Night Attack	Event: Play 1 extra Attack Card in your Attack Phase
Retreat	Event: Return 1 Deployed Unit to your Hand
Fog of War	Event: Negate Event Card just played
Friendly Fire	Event: Redirect Attack to different Enemy Unit

Warmeister

Copyright Jason Newell, 2005

A fantasy warfare card game for 2-6 players

The Deck

All players share a common deck of 130 cards

You Will Need:

5 Territory tokens for each player
Damage counters for battles
Gold counters may be used, or players may write down their totals, whichever is mutually agreeable
A six sided dice

Object

To win a player must be the only remaining participant with territories. Once a player loses their last territory counter, they are out of the game.

Setup

Each player starts with 5 Territory tokens. Shuffle the deck, and each player draws 5 cards

Turns

The turn is divided into phases:

- Priority
- Draw
- Revenue
- Warfare
- Supply
- End

Priority

Roll a dice to determine player priority. The highest roll gets priority (reroll ties). This means that in the phases where priority is important, the player with priority goes first, with play progressing in a clockwise direction. This must be rolled for at the start of each turn.

Draw

Each player may draw a number of cards equal to their number of territories in priority order.

Revenue

Each player gains 1d6 gold for each territory they control. This gold may be spent to play army cards, holdings, or fortifications, which are put into play when purchased.

Warfare

This is the phase in which battles are fought, players taking turns in priority order. A player may play 1 attack card and declare 1 battle, choosing one opponent as their target. No battles may be declared in the first turn.

Once a battle is declared, both the attacker and defender assign any or all of their army cards in play to the battle. They must assign at least one. The defender may also assign one fortification to the battle.

Players then take turns playing Battle Event cards or passing, starting with the defender. Only the defender may play Terrain cards. When both players pass in succession, then they move on to the battle.

Each player rolls for each army card. Each Army card has a bonus of +1 to +5. Add the bonus to the roll, plus any other modifiers. If the total is 7 or more, then a hit is scored. Players then assign a number of damage counters to their units equal to the number of hits scored by their opponent in any combination they like. If a card has damage counters equal to their number of wounds, they are discarded. Damage counters remain on a card until the End phase.

Once this has been done, both players must check for routing, starting with the attacker. The attacker must roll the dice and add the number of remaining units in their force. If they score 5+, they stay and may fight another round of combat. If not, then the attacker loses and the battle is over, their remaining units stay in play.

If the attacker passes, then the defender must do the same, but they only require a 4+. Success and failure are the same as for the attacker. The Defender CANNOT flee if they are defending their last Territory.

If both sides stay and fight, then roll again for each army card, assign damage and check for routing until one side flees or is destroyed. If the defender loses the battle, then they lose 1 Territory token. Also, roll for each holding regardless of who won. If a 1 is scored then the holding was destroyed in the battle. Any castles used in the battle are destroyed if the defender lost on a dice roll of 2 or less. If there were besiegers in the attacking army, then it is destroyed on a roll of 4 or less. Each player undertakes this sequence in turn.

Supply

Players are able to supply 1 army card per territory. Any cards unable to be supplied are discarded.

End

All damage counters are removed from army cards and all players MUST discard down to 5 cards in their hand.

Cards

Attack Cards

Card	#	Notes
Attack	15	Allows for 1 attack.
Pillage	3	Allows for 1 attack. Attacker gets +1d6 gold next revenue phase if they win.
Raze	2	Allows for 1 attack. Destroy all defender's holdings if the Attacker wins.
Ambush	3	Allows for 1 attack. Attacker gets first battle event. Attacker may play a - Terrain card, with ill effects applying to the Defender and vice versa.
Conquest	2	Allows for 1 attack. Attacker adds defender's lost territory to their own.

Castles

Card	#	Cost	Modifiers
Pallisaide	2	4	Attackers -1
Keep	2	7	Attackers -2
Fortress	1	10	Attackers -2, Defenders +1

Holdings

Card	#	Cost	Notes
Farm	3	2	+1 to Supply total
Armoury	2	3	+1 to Hand Size
Barracks	1	4	Reduce cost of Basic Army Cards by 1 (min 1)
Workshop	1	4	Reduce cost of Besieger Army Cards by 1 (min 1)
Mead Hall	1	4	Reduce cost of Assault Army Cards by 1 (min 1)
Archery Range	1	4	Reduce cost of Missile Army Cards by 1 (min 1)
Horse Breeder	1	4	Reduce cost of Cavalry Army Cards by 1 (min 1)
Hunting Lodge	1	4	Reduce cost of Skirmisher Army Cards by 1 (min 1)
Mines	2	4	+2 gold per turn
Tavern	2	4	+1 gold per turn, +1 to Supply total
Market	1	6	+3 gold per turn
Wizard Tower	2	3	Increase Draw by 1

Army Cards

Army Cards have a number of different Types or Traits that can affect battles.

Unit	Types:
Assault	Unit gets +1 if in an attacking army
Missile	Unit gets +1 if in an defending army
Cavalry	If this unit causes a casualty, then its owner may decide which of the opponent's units suffers the damage
Besieger	Unit unaffected by Castle modifiers
Skirmisher	Unit unaffected by Terrain Modifiers
General	All friendly units in an Army receive +1 if this unit is part of the army

If a unit has none of the above Types, it counts as a basic unit.

Unit	Traits:
Deadly	Unit causes 2 damage on a successful hit

Unit	Traits:
Tough	Discard first damage counter assigned to this unit in a battle
Raider	+1 gold to next turn's revenue if this unit's side wins an attack

A Assault
B Besieger
C Cavalry
D Deadly
G General

M Missile
R Raider
S Skirmisher
T Tough

Cards	#	Cost	Bonus	Wounds	Notes
Peasants	2	1	+1	1	Draw 1 card when this unit is recruited
Goblin Stabbers	1	1	+1	1	
Old Hob	1	2	+1	1	D T, Discard 1 card to play
Skellington Troopers	1	2	+1	1	T
Swordsmen	1	2	+2	1	
Pikemen	1	3	+2	2	
Roamin' Ronin	1	3	+2	1	D
Dwarf Axemen	1	3	+3	1	
Troll Warriors	1	4	+3	2	
Ogre Bullies	1	6	+4	2	R
Giant	1	7	+4	2	T, Automatically destroys 1 opponent's
	-	-	-	-	Holdings in battle,
	-	-	-	-	Counts as 2 units for Supply
Gnoll Chicken-Thieves	1	2	+1	1	M
Bowmen	1	3	+2	1	M
Elven Rangers	1	4	+3	1	M D
Dwarf Engineers	1	6	+4	2	M T, Discard 1 card to play
Fanatics	1	2	+1	1	A
Hairy Barbarians	1	4	+2	1	A R
Troll Berserkers	1	6	+3	2	A T
Theo the Minotaur	1	6	+4	2	A
Wardogs	1	2	+1	1	C, Discard wardogs to destroy any force 1 card
Elven Weasel Riders	1	3	+2	1	C
Knights of the Golden Rooster	1	6	+3	2	C D
War Mammoths	1	8	+4	3	C T
Captain Tim	1	5	+2	2	G, Draw 2 cards when this card is recruited
Prince Treehugger	1	5	+2	2	G M
Snorri Axethrowersson	1	6	+3	2	G T
Sir Bertrand of Baloney	1	6	+3	2	G C
Nanoc the Barbarian	1	7	+4	2	G A
Goblin Slingshooters	1	4	+2	1	S, Opponent must discard 1 card
	-	-	-	-	when this card is recruited
Gnoll Huntsmen	1	4	+2	1	S R
Elf Battle-Prancers	1	5	+3	2	S
Catapult	1	3	+2	1	B
Dwarf Sappers	1	4	+2	2	B
Ol' Bessie	1	5	+3	2	B
Fernando the Dragon	1	10	+5	3	A C D T, Counts as 3 cards for supply
Siege Golem	1	8	+4	2	B A T, Discard 2 cards to play
Centaur Javelineers	1	6	+3	2	S M
Donkey Raiders	1	4	+2	1	C R
Shaolin Monkeys	1	5	+2	2	A S

Event Cards

after use.

Event cards designated Battle Events may only be played during a battle. All event cards are discarded

Cards	#	Notes
Gutsy	2	Battle. Army does not have to roll for Rout this round
Run Them Down	1	Battle. When the opposing army routs, roll 1d6 for each unit. - They are destroyed on a 5+
Ran Too Far	1	Battle. Target loses 2 Territories if they lose the battle.
Scaredy Cats	1	Battle. -1 to target's next rout roll
Good Harvest	2	+4 gold to revenue this turn
Luck	2	Re-roll any 1 dice roll
Denied!	2	Cancel any 1 event card
Forest	4	Battle. Terrain. Attackers are at -1 force this battle
Ruins	2	Battle. Terrain. Attackers are at -2 force this battle
Swamp	2	Battle. Terrain. Attackers are at -2 force and Defenders -1 force this battle
High Ground	2	Battle. Terrain. Attackers are at -1 force and Defenders +1 force this battle
Defensive Traps	2	Battle. Terrain. Roll 1d6 for each Attacking unit each - round of the battle. Units suffer 1 hit on a 6+
Bottleneck	2	Battle. Terrain. Attacker may only use 1/2 their assigned - units in this battle (round down). - The others return home.
Fury	2	Battle. Target army gains +1 to their attack rolls for this round
Fatigued	2	Battle. Target army gains -1 to their attack rolls for this round
Asleep on the Job	2	Battle. Target card no longer fights in this battle, - but still counts towards rout - checks and may be assigned hits as normal
Raid	2	Destroy target Holding
Earthquake	1	Roll 1d6 for all of target player's Holdings. Holdings - are discarded on a roll of 6+
Goblins With Dynamite	1	Destroy target Castle on a d6 roll of 4+
Recruitment Drive	2	Halve the recruitment cost of target army card
Pizza & Beer	1	Supply all your army units this turn
You're Fired	2	Discard target army card
Busy as Beavers	1	Halve the cost of target Castle or Holding
Hid in a Ditch	1	Regain 1 army card that was lost in a battle this turn. - May NOT be played during a battle
Reinforcements	2	Drzw 2 cards

Cards	#	Cost	Bonus	Wounds	Notes
Big Dumb Lizard	1	6	+3	3	U T
Farmers	3	2	+1	1	Produces 1 gold during the revenue phase
Potato People	1	5	+2	3	After damage counters are assigned,
	-	-	-	-	remove 1 from potato people
Tool Golem	2	4	+2	2	Reduce the cost of holdings by 1.
Poisonous Toadmen	2	4	+1	1	M D s
Ennui Demon	1	4	+3	2	D, Does not take part in the first round of combat
Frenzied Lemming Warriors	2	2	+2	1	D A, discard this card after the battle
Battering Ram	1	6	+3	2	T B, Destroy any one force 1 army card at
	-	-	-	-	the start of battle
Noxious Fungoids	1	3	+2	1	Assign 1 wound to an army card at the
	-	-	-	-	start of a battle.
Rampaging Slug	1	7	+3	4	Gains +1 to its rolls for each wound
	-	-	-	-	it has suffered.

Holdings

Card	#	Cost	Notes
Farm	2	2	+1 to Supply total
Mines	1	4	+2 gold per turn
Tavern	1	4	+1 gold per turn, +1 to Supply total
Guildhall	2	4	+1 gold per turn, Increase Draw by 1
Noble Estates	2	6	Increase draw by 2
Great Big Statue	1	4	All friendly army cards fight at +1. If they
	-	-	lose a battle, this card is destroyed.
Spooky House	1	4	Reduce cost of Fearsome Army Cards by 1 (min 1)
Shrine of Goodness	1	4	Reduce cost of Heroic Army Cards by 1 (min 1)
Apothecary	2	4	once per battle, discard all damage tokens from
	-	-	a selected army card.

Event Cards

Cards	#	Notes
Schedule Conflict	2	Battle. Target army card is removed from an army.
Administration Error	1	Target opponent must swap D3 army cards of your
	-	choice for the same number of your own cards.
Shining Example	3	Battle. target army card gets +1 to their attack roll.
Underground Tunnels	1	Battle. Terrain. Roll 1d6 for attacker and 1d6 for defender.
	-	Remove that many army cards from
	-	their respective armies.
City Streets	1	Battle. Terrain. Attackers are at -2 force this battle.
	-	Defenders will lose 1D6 Holdings if they
	-	lose the battle. Fortifications may not be used in this battle.
Change of Plan	2	Cancel any one attack card.
Rally	2	Cancel a rout.
Spiked Drinks	1	Battle. 1D6 opposing army cards do not take part in this round of combat
Sabotage	2	Target player must discard a card from their hand
Plague of Monkeys	1	Target player must discard 1D6 cards from their hand.
Sword of Maybe	1	Pay 3 gold to play. Attach to target General army card.

Cards	#	Notes
	-	Card gains a permanent +1 to their attack
	-	rolls. Discard this card if the army card is destroyed
Creepy...	1	Makes an army card Fearsome. Discard this card if the
	-	army card is destroyed
... Of Niceness	1	Makes an army card Heroic. Discard this card if the
	-	army card is destroyed
Sword-Swinging...	1	Makes an army card Assault. Discard this card if the
	-	army card is destroyed
... with dynamite	1	Makes an army card Besiegers. Discard this card if the
	-	army card is destroyed
Gun-Toting...	1	Makes an army card Missile. Discard this card if the
	-	army card is destroyed
... On Horsies	1	Makes an army card Cavalry. Discard this card if the
	-	army card is destroyed
Armour-Plated...	1	Makes an army card Tough. Discard this card if the
	-	army card is destroyed
Sneaky...	1	Makes an army card Skirmishers. Discard this card if the
	-	army card is destroyed
Venomous...	1	Makes an army card Deadly. Discard this card if the
	-	army card is destroyed
Larcenous...	1	Makes an army card Raiders. Discard this card if the
	-	army card is destroyed
Delusional...	1	Makes an army card Unbreakable. Discard this card if the
	-	army card is destroyed

Warp Dungeons

by Jason Newell 2004.

This is a modifiable dungeon-crawling game for 2-4 players

Set Up

Each player has a deck of 60 cards. 1 player is the dungeon master and has a DM deck, while the others are heroes and have a Hero Deck, along with the appropriate hero stat card. There is also a 30 card Dungeon deck. To set up the Dungeon Deck: take the stairway and objective room cards from the deck. Place the stairway face up in the playing area, this is the entrance to the dungeon and all the heroes place their hero marker on it. If 2 heroes are playing, place a t-junction connected to the entrance. If 3 heroes are playing, place an intersection next to the entrance. Put the objective room to one side, then shuffle the remaining dungeon cards and deal 9 cards onto the objective room. Shuffle this smaller pile, then shuffle the remainder and place them directly onto the small pile with the objective room. This ensures that the objective room is not found until well into the game. The dungeon Deck is ready for play. Deck construction will be dealt with later.

Decks, once the run out, are reshuffled and reused. The DM must specify what faction their deck is before play, as there are cards that depend on a faction. Markers for the heroes and a number of counters will also be needed.

Play

Each player draws a hand of 7 cards, and then the hero players determine who goes first and the order of play. The player whose turn it is is called the active player. Play is broken down into 4 phases in each player's turn: Exploration, Move, Resolution and Refresh

Exploration

The active player may draw 1 Dungeon card and place it next to the card they are currently on, only if there is a viable opening as listed on the card. In the event of drawing a T-junction, intersection, or a multi exit room card, the dungeon deck remaining on that particular path is dealt into the respective number of piles, dealing from the bottom of the deck (eg: after a few rooms a player encounters a t-junction. The DM then deals out the remaining Dungeon Deck into 2 piles, placing them next to either path of the junction). Any exploration along one of these paths must be drawn from the respective deck. Once this reduced

deck is exhausted, then no further exploration can be carried out along that path. A player can only reveal one dungeon card in this phase.

A dungeon path cannot go over another path. Dungeon cards are either Rooms or Passages.

Move

The active player may move their hero 1 dungeon card along a path, unless an ability allows them to do otherwise.

Resolution

If the dungeon card a player ends their move on is a Room, then they can attempt to resolve the room. They may take 1 treasure card from their hand and place it face down in front of them. The DM has the option of playing a Monster Card to try and stop them. If no monster is played, then the active player may apply the effects of the treasure card, and place it next to their hero stat card. If a monster is played, then a battle ensues.

Battle

Both the DM and the active player may place 1 attack card face down in front of them. Attack cards are work as such: each one has a value of 1, 2 or 3 and one of five symbols; a sword (battle), a flame (magic), an arrow (Agility), an axe (strength) or a shield (courage). Some heroes, cards or events give bonuses to particular symbol cards in battle, i.e.: a treasure card attached to a hero may add +1 to the value of all sword cards played.

The side with the highest total wins the battle and the other side suffers a wound. The symbols add another factor to battles. Each symbol is dominant over two other symbols: Battle beats Strength and Magic Magic beats Courage and Strength Agility beats Battle and Magic Strength beats Agility and Courage Courage beats Battle and Agility If one side's attack has symbol dominance over the other, then they cause a wound on that side, even if they lost the actual battle. If the score is a draw, then the dominating symbol wins.

If the score is a draw and the symbols are the same, then neither side wins, and the battle is over. If the DM's side wins then the battle is over. If the DM's side has wounds remaining after the player wins a round of battle, then repeat the procedure until the monster has no wounds left, or the active player calls off the attack. If the active player has no attack cards to play then they MUST call off the attack.

If the active player loses, draws or calls off the attack, then their played treasure card is discarded. If they win, then they may attach the treasure card to their hero, who benefits from the card's effects. Any monster that suffered wounds, but not killed, is restored to full wounds the next time it is fought.

A token is placed on the room to show it has been resolved. Once a room is resolved, no more monsters can be played there

Refresh

The active player and the DM may draw cards up to their maximum hand allowance (7).

Winning

Once the Objective room card is revealed and resolved, the game is over. Players then add up their points for treasure, monsters and other sources, the highest score wins. The DM wins by killing all the heroes before the objective room is resolved.

Card Types

Attack Cards

These have one of the 5 symbols and a value of 1-3. In a Hero or DM deck, there must be 30 attack cards.

- 15 +1 cards, 3 of each symbol
- 10 +2 cards, 2 of each symbol
- and 5 +3 cards, 1 of each symbol.

Hero Cards

* Heroic Action

These cards allow the active player to use the ability listed on their hero stat card for their heroic ability. A Heroic action may be played at any time and its effects, unless instantaneous, last for the remainder of the turn. (eg: Heroic Ability: Deadly- Causes 1 extra wound in battle)

* Secret Door Cards

A player can play these cards to do one of two things: Divide the remaining dungeon cards on that path, as listed for junctions in the exploration section, or to avoid the monsters in a room; the monsters remain, the room is unresolved, but the player does not have to fight them and can move on as normal next turn.

* Treasure

Are played at the beginning of a battle, and are won by a successful battle. There are four types of treasure: Point bonus, attack bonus, experience advancement or healing.

* Point Bonus Treasure

Winning this treasure will add to your points at the end of the game. They have a value of 1-5

* Attack Bonus Treasures

These treasures add to the attack score in battle. They only add to certain symbol attack cards. They

have a value of +1 or +2. They do not stack, so the hero must use the highest value of attack bonus.

* Experience Advancement

Winning these cards increases the hero's level by 1. All heroes start as level 1 characters. The maximum level a hero can be is 3. For each level a hero has, they may play 1 attack card in each round of the battle phase.

* Healing Treasure

These treasures may be attached to a hero as normal. They do not add to points or battle, but may be discarded at any time to heal the listed number of wounds as stated on the card.

Dm Cards

* Monster Cards

These represent the monsters encountered by the heroes. Each card has a listed point value, which is added to the defeating hero's score, a faction for determining bonuses for events and special rooms, a number of wounds (from 1-3), and their battle bonuses. There are several types of monster card, with a varying number of bonuses. The different sorts of bonuses are as follows:

- +1
- +1, +1
- +2
- +2, +1
- +2, +2
- +3
- +3, +2, +1

Each bonus on a card corresponds to a different symbol (eg: a card may have +2 Strength, +1 Battle, or be +3 Magic, +2 Agility and +1 Courage)

Some monster cards may have special rules

* Event Cards

These cards effect the bonuses in battles, or cancel other cards and similar

* Trap Cards

The DM may play Trap cards at any time during the active player's move phase. The player must discard the listed value of attack cards of the corresponding symbol on the card, or play a heroic action card. (eg: a trap has a listed value of 2 Strength. The active player must discard a total value of 2 in strength cards or play a heroic action card to avoid the trap). If the active player does neither of these, then they suffer the result listed on the trap, the most common of which is to take wounds. The DM can only play one trap card during a player's move phase.

Deck Construction

The Hero Deck must consist of the standard 30 attack cards, with the remaining 30 cards being any combination of treasure cards, heroic action cards and secret door cards.

The DM Deck also must consist of the standard 30 attack cards, as well as 3 +1 monsters, 3 +1/+1 monsters, 3 +2 monsters, 2 +2/+1 monsters, 2 +2/+2

monsters, 2 +3 monsters, and 1 +3/+2/+1 monster.
The remaining 14 cards can be any combination of

traps and events.
The Dungeon Deck consists of the following:

#	Name	Exits	Special
1	Stairway	1	Starting area
5	Passage	1	
2	Intersection	3	
3	T-junction	2	
4	Room	1	
2	Chamber	2	
2	Lair	1	Faction monsters are +1 attack in this room
1	Crypt	1	
2	Dungeon	1	All monsters +1 attack in this room
1	Throne Room	2	
1	Temple	1	
1	Chasm	3	
1	Caves	1	
1	Vault	1	
1	Objective Room	0	Faction monsters +2 attack in this room

The number of exits does not include the entrance card (eg: a passage connects to a T-junction. It does not count as one of the junctions 2 exits.).

Example Cards

Here are some examples of the sort of cards that make for a balanced game. Feel free to come up with your own cards and combinations.

Treasure Cards

Name	Description
Copper Pieces	+1 to final score
Silver Pieces	+2 to final score
Gold Pieces	+3 to final score
Gems and Jewels	+4 to final score
Treasure Chest	+5 to final score
Magic Blade	+1 Battle Attribute
Wand	+1 Magic Attribute
Boots of Speed	+1 Agility Attribute
Bracers of Strength	+1 Strength Attribute
Amulet of Bravery	+1 Courage Attribute
Dragonsbane	+2 Battle Attribute
Staff of Power	+2 Magic Attribute
Bow of Ages	+2 Agility Attribute
Hammer of Thor	+2 Strength Attribute
Armour of Purity	+2 Courage Attribute
Ring of Accuracy	Causes an extra wound in battle. Does not stack with other Rings of Accuracy.
Healing potion	Healing Item: Heals 2 wounds when used
Life potion	Healing Item: Heals 4 wounds when used
Rejuvenation Potion	Healing Item: Heals all wounds when used
Experience Advancement	Hero gains a level of experience.

Trap Cards

Trap	Details
Spear Trap	Take 1 wound. Cost: 2 Agility
Pit	Take 1 wound, miss next turn. Cost: 2 Strength
Poison Gas	Take 1 wound, -1 attack value in next fight. Cost: 2 Magic
Pendulum Blade	Take 2 wounds. Cost: 3 Courage
Portcullis	Miss next turn. Cost: 1 Strength
Net	Miss next turn. Cost: 1 Battle

Event Cards

Event	Details
Ambush	+1 attack value to target monster
Outnumber	DM can play 1 additional attack card this battle
Collapse	Negate a secret door card
Reinforcements	Play once a battle has been resolved. Active player must fight this battle again before they can count this room as resolved. They receive no additional treasure or points for fighting again.
Vicious	Play during battle. Active player suffers an extra wound
Defences	Play during battle. Hero at -1 attack value this battle
Sorcerer	Change attack card's symbol to Magic
Driven	Change attack card's symbol to Courage
Battle Hardened	Change attack card's symbol to Battle
Brutes	Change attack card's symbol to Strength
Snipers	Change attack card's symbol to Agility

Monster Cards

Monster	Attributes	Wounds	Points	Faction
Orc Grunts	+1S	1	1	Orc Horde
Orc Hunters	+1S/+1A	1	1	Orc Horde
Orc Thugs	+2S	1	2	Orc Horde
Orc Shaman	+2M	1	2	Orc Horde
Goblin Sneaks	+1B/+1A	1	1	Orc Horde
Orc Berserkers	+2S/+2C	2	3	Orc Horde
Orc Warlord	+3S/+2C/+1B	3	5	Orc Horde
Giant Spiders	+2B/+1M	2	2	-
Goblin Elites	+2C/+1B	1	2	Orc Horde
Ogre	+3S	2	3	-
Dark Elf Warriors	+1A/+1M	1	1	Dark Elf Raiders
Dark Elf Sorcerer	+3M	2	3	Dark Elf Raiders
Imps	+1M	1	1	Demonspawn
Golem	+2S/+2B	2	3	The Mad Alchemist
Dragon	+3M/+2S/+1C	3	5	Dragonkin
Giant Rats	+1B	1	1	-
Mushroom Men	+1C/+1M	1	1	The Fungus Kingdom
Myconid Knight	+2B/+1M	2	2	The Fungus Kingdom
Giant Bats	+1A	1	1	-
Hydra	+3M	2	3	Dragonkin
Troll	+3C	3	4	Orc Horde
Fungusaur	+2S/+2C	3	4	The Fungus Kingdom

- B** Battle
- M** Magic
- C** Courage
- S** Strength
- A** Agility

Pre-generated Decks

Here are some decks all ready for play

Orc Horde Faction DM Deck

- 30 standard attack cards
- 3 Orc Grunts
- 1 Orc Hunters
- 2 Goblin Sneaks
- 1 Orc Shaman
- 2 Orc Thugs
- 1 Giant Spiders
- 1 Goblin Elites

- 2 Orc Berserkers
- 1 Troll
- 1 Orc Warlord
- 2 Spear Traps
- 2 Pit Traps
- 1 Pendulum Blade
- 1 Portcullis
- 2 Ambush
- 2 Vicious
- 1 Collapse
- 2 Outnumber
- 2 Reinforcements

Warp Empires

Introduction

Generic ruleset for a series of empire building/conquest games.

Map

The map depicts an irregular, interlocked set of territories.

Control Markers

Use chits to represent control markers.

Units

Use chits to represent units. Units include Leaders & non-leader units.

Deck

Players share an action deck. In some games, each player will have their own action deck. The action deck cards allow you to move your units.

Setup

Most Leader units will be in play. Others will be mixed into the unit chit pile. Each player will start with several non-leader units in play.

Starting points of units will be determined by the scenario.

Turn Sequence

Players take turns. Each turn has 7 phases:

- Draw Phase
- Move Phase
- Battle Phase
- Revenue Phase
- Recruit Phase
- Upkeep Phase
- Control Phase

Draw Phase

First discard any cards you don't want. Each player draws 5 action cards. Max hand size = 7. Discard excess cards.

If the deck runs out, shuffle the discard and draw from it.

Move Phase

Use Action cards to move stacks or units in stacks. A Fast unit can move 1-3 spaces. A Medium speed unit can move 1-2 spaces.

A Slow unit can move 1 space. Units can move into but not through opposing stacks. Fortifications cannot move (Move = 0).

Your opponent can only look at the top unit of your stacks

Battle Phase

When two opposing stacks occupy the same territory there will be a battle. Each unit has a force value. Add up the total Force values for each side.

Players may play action cards to increase their force value. If one stack has a Leader and the other does not, the stack with the leader gets an additional 5 Force. The side with the highest force value wins.

The losing stack must retreat one space. The losing stack loses half of its units. The winner picks the first unit lost, the loser picks the remainder. Fortification units in the losing stack are destroyed automatically.

The winning stack loses units with a force equal to at least half the force total lost by the losing stack. The winner decides which units are lost. Destroyed units are returned to their chit pile. Captured leaders are set aside and not returned to the chit pile.

After a battle both sides replenish their hands to 7 cards.

Revenue Phase

Gain revenue points for every revenue generating territory you control.

Recruit Phase

Draw 5 random units from the unit chit pile. Purchase units. A unit's cost is equal to its Force value. If you purchased all the drawn units, draw another 1D6 random units.

Revenue may be saved from turn to turn. Discard unpurchased units back to your unit chit pile. Units start in any revenue generating territory you control.

Upkeep Phase

Units that automatically receive upkeep = 5 x total Revenue. Discard excess units. Example: You generate 10 revenue points per turn...

You may have up to 50 units.

Control Phase

Place a control marker on every revenue generating territory occupied by one of your units. Only one control marker per space.

Unit Deck Abbreviations

- S** Slow
- M** Medium speed
- F** Fast
- F** Force
- F** Fortification
- #** Number of that unit in the chit pile.

Warp Hammer

Introduction

Two player Card Game based on the Games Workshop Warhammer Fantasy Universe.

Disclaimer

Warhammer is a trademarked, copyrighted property. This is merely a fan site.

Deck Creation

Each player uses a separate individualized deck. Each deck must contain 40 cards. Note that every card has a Cost.

Each deck must have a total Cost of 100 points or less. (Or more points if players agree) A player must pick his units off of one Card List (2 or more if players agree) and the appropriate Spell Lists. Every Army must have a Command Group consisting of at least a Wizard and a 4+ Force Hero. A 40 card deck may have a maximum of 20 Item, Spell, Tactic, Mark, and Virtue cards.

A 40 card deck may have a maximum of 10 Wizards & Heroes.

Card Types

Hero, Magic, Wizard, Archer, War Machine, Signal, Berserker, Ambush, Scout, Monster, Beast, Cavalry, Infantry, and Spear cards are all Unit cards. Item, Spell, Tactic, Mark, and Virtue cards are collectively called Enhancement cards. An enhancement card must be played with a certain type of unit card for it to have any effects.

Note that one effect of an enhancement card is to provide an additional unit type attribute (trait) in Battle and Blood Phase. For example: To have a Rune Hammer (Item from Dwarf List) have any effect, you must have a Hero unit in play. The Hammer then adds 3 Force and has the attribute of Magic (Equivalent to having an extra unit of the Magic Type). Note that most of the attacks in Battle phase target unit cards, not enhancement cards.

Victory

The first player to win 5 hands is the winner.

Turn Sequence

Each turn has 5 phases: Logistics Phase March Phase Orders Phase Battle Phase Blood Phase

Logistics Phase

Players draw a hand of 15 cards from your deck. If a deck runs out, shuffle the reserve pile & draw from it.

March Phase

Players discard down to 10 cards. The discarded cards go to a players reserve pile.

Orders Phase

Write down on a scrap piece of paper whether you want your army to: Charge, Advance, or Defend. Players reveal their written orders simultaneously. If you wrote Charge Orders, all of your Monster, Beast, Cavalry, and Flying units get +1 force.

If you wrote Advance Orders, all of your Infantry, Spears, Hero, and Signal units get +1 force. If you wrote Defend Orders, all of your Magic, Scout, Archer, and War Machine units get +1 force. If you wrote Charge and your opponent wrote Defend you get +3 force to your battle total.

If you wrote Defend and your opponent wrote Advance you get +3 force to your battle total. If you wrote Advance and your opponent wrote Charge you get +3 force to your battle total.

Battle Phase

Players reveal their hands by placing them face down in front of them. Killed cards are sent to the players casualty pile. Note that attributes provided by Item, Spell, Tactic, Mark, Ability, and Virtue cards may only be counted if a card that can use it is also in play.

For example only Wizards can use Spells. A card may only apply one of its traits per turn to produce an affect. For example: A unit with the scout trait and the Archer trait must use only one.

Conduct the following contests/attacks in order:
*The Player with the most Signal units gets to draw the top card of his deck and put it into play.
*Each Armor, Swarm, Courage, & Regenerating unit gets to negate one kill caused by his opponent this phase on a roll of 1-3 on 1D6.
*Each Cowardly unit gets to send one killed unit to the reserve pile instead of the casualty pile on a roll of 1-4 on 1D6.

*Each Beast unit gets to kill one enemy Scout or one Ambush unit this turn on a roll of 1-3 on 1D6.
*The Player with the most Scout units gets to look at the next 10 cards in his opponents deck.
*Each Ambush unit gets to kill any one opposing unit on a roll of 1-2 on 1D6.

If the Ambush unit rolls a 6, the ambusher is killed. *Each Disaster & War Machine unit gets to reveal the top card of his opponents deck: If it is a unit kill it, if it is an enhancement, send it to the Reserve pile. *Each Archer unit gets to kill one Infantry, Spear, or Flyer unit on a roll of 1-2 on 1D6.

*Each Flying & Teleport unit gets to kill any one enemy Archer or War Machine unit on a roll of 1-2 on 1D6 or Neutralize any one unit on a roll of 1-3 on 1D6. A Neutralized unit cannot roll for its attribute for the rest of Battle Phase. *Each Wizard or Magic Resistance unit gets to kill one enemy Spell or Item on a roll of 1-3 on 1D6.

*Each Fear or Magic unit gets to rout one Non-hero opposing unit to its owners reserve pile on a roll of 1-4 on 1D6. *Each Immobilizer unit causes any one opposing unit to be immobilized on a roll of 1-3 on 1D6. An Immobilized unit is neutralized and has a Force = 0. *Each Hero unit gets to kill one opposing Hero, Monster, or Magic unit on a roll of 1-3 on 1D6.

*Each Spear unit gets to kill one opposing Monster or Cavalry on a roll of 1-3 on 1D6. *Each Cavalry unit kills an opposing Non-hero Archer unit or War Machine on a roll of 1-3 on 1D6. *Each Berserker, Slay, and Monster unit gets to kill any one unit on a roll of 1-3 on 1D6.

*Each Poison, Drain, or Disease unit gets to effect one enemy unit. Roll 1D6: On 1-2 the unit is killed, on 3-4 it is immobilized, on 5-6 nothing. *The Player

with the most Infantry and Death units gets a +5 Force bonus in Blood Phase. Normally the attacker chooses the target to be killed.

Units with the Martyr ability may be killed instead at the option of the targets controller. A Unit may attempt, once per turn, to martyr for one other unit on a roll of 1-3 on 1D6.

Blood Phase

Determine a Battle Total for each player. Each card remaining from Battle Phase contributes its force rating to the Battle Total. If you play a Leader card with a Mount card get a +1 force bonus.

If a unit has a "Versus" attribute (Such as +2 vs Orcs) the Unit only gets the bonus if the opponent plays a unit of the appropriate type. Items, Spells, Tactics, Marks, Abilities, and Virtues may only be counted if a card that can use it is also in play. For example only Wizards can use Spells. The Player with the highest Battle Total wins the Melee.

The loser puts 1D6 random cards in play into his casualty pile. Remaining cards go into each players reserve pile.

List Notations

U Unique Unit: only 1 per Army

L2 Rare Unit: Limit 2 per Army

Dwarf Card List

Card Name	Cost	Force	Notes
Gotrek Gurnisson	4U	3	Hero, +2 if played with Felix
Felix Jaegar	3U	3	Hero
Anvil of Doom	7U	6	Magic, Signal, Wizard
Thorim Grudgebearer	7U	6	Hero, Armor
Dwarf Lord	6U	5	Hero, Armor
Dwarf Runesmith	3	3	Magic, Wizard
Hero	4	3	Hero, Armor
Champion	5	4	Hero, Armor
Standard Bearer	1	1	Signal
Hornblower	1	1	Signal
Clansmen	3	2	Infantry, Armor
Longbeards	2L2	2	Infantry

Norse Dwarves	3	3	Berserk
Troll Slayers	3	2	Infantry, +2 vs Monsters
Giant Slayers	4	3	Infantry, +2 vs Monsters
Iron Breakers	4	3	Infantry, Armor
Tunnel Fighters	3L2	3	Scouts
Hammerers	2	2	Infantry
Organ Gun	4	4	War Machine
Bolt Thrower	3	3	War Machine
Thunderers	3	3	Archers

Card Name	Cost	Force	Notes
Crossbows	2	2	Archers
Mortar	4	1D6	War Machine
Fire Thrower	2	2	War Machine
Rangers	3	2	Scouts, Ambush
Runners	1	1	Scouts
Gyrocopter	3	2	Scout, Flyer
Runestaff	2U	3	Wizard Item, Hero
Rune Hammer	2U	3	Hero Item, Magic
Rune of Cleaving	2U	3	Spell, Death
Rune of Courage	2U	3	Spell, Courage
Iron Rune	3U	4	Spell, Armor
Rune of Might	4U	5	Spell, Hero
Rune of Banishment	5U	6	Spell, +2 vs Monsters
Stalwart	1	1	Dwarf Virtue, Armor
Stubborn	2	2	Dwarf Virtue, Armor

Racial Rules: When writing orders add one attribute of Armor or Martyr. Spells: Use spells from the Metal List.

Wood Elf Card List

Card Name	Cost	Force	Notes
Arch Druid	5	5	Magic, Wizard
Druid	3	3	Magic, Wizard
Forest Lord	5U	5	Hero
Sylvan Chieftan	4	4	Hero
Guardian	3	3	Hero
Master Archer	6U	5	Hero, Archer
Archers	4	4	Archers
Hunters	3	2	Scouts, +2 vs Beasts
Falconer	2	1	Scouts, +2 vs Heroes
Scouts	1	1	Scouts
Master Scout	3U	2	Hero, Scout
Shapechangers	3	2	Scouts, Beasts
Wood Elf Spears	2	2	Spears
Glade Guards	2	2	Infantry
Warrior Kinband	3	3	Infantry
War Dancers	4	3	Infantry, Magic
Dance Master	5U	4	Hero, Magic
Dryad	4	3	Magic, Scouts
Waywatchers	3U	2	Scouts, Ambush
Treeman	6	5	Armor, Monster
Grizzly Bear	3	3	Beasts
Wain Lord Chariot	3	3	Cavalry, Mount
Great Cat	2	2	Beasts
Timber Wolves	2	2	Beasts
Warhawks	4	3	Flying, Scouts
Unicorn	3	3	Mount, Magic
Great Eagle	5	5	Mount, Flying
Forest Dragon	7	6	Mount, Flying, Monster
Glade Riders	3	3	Cavalry

Card Name	Cost	Force	Notes
Warhawk Riders	4	4	Flying
Magic Herbs	1U	1	Hero & Wizard Item, Magic
Green Blade (Sword)	2U	3	Hero Item, Magic
Hawk Bow	1U	2	Hero Item, Archer
Cloak of the Woods	1U	2	Hero Item, Scouts
Sword of Ages	3U	4	Hero Item, Signal
Bear Banner	1U	2	Infantry Item, Beast
Flail of Claws	1U	2	Hero Item, Berserk
Arrows of Slaying	1U	2	Archer Item, +2 vs Monsters
Shield of Ptolos	1U	2	Hero Item, Armor
Shapeshift	1U	2	Spell, Beasts
Plant Control	2U	3	Spell, Immobilize
Call Animals	2U	3	Spell, Swarm
Natures Visitation	3U	4	Spell, Signal
Natures Wrath	4U	5	Spell, Disaster

Racial Rules: When writing orders add one attribute of either Scout or Archer. Spells: Use spells from any

lists except Fire, Shadow, Death, and Metal.

Skaven Card List

Card Name	Cost	Force	Notes
General T'Skot	5U	5	Hero
Verminlord	7U	6	Hero, Wizard, Magic
Skaven Champion	3	3	Hero
Skaven Beastmaster	3	2	Hero, Beasts
Plague Priest	3	2	Hero, Magic
Plague Monks	3	2	Infantry, Magic
Doom Wheel	6U	5	Magic, War Machine
Screaming Bell	7U	6	Magic, Signal
Plague Censer	4	1D6	Berserk
Warlock Engineer	3U	3	Magic, Wizard
Grey Seer	5	5	Magic, Wizard
Clan Skryre Sorcerer	4	4	Magic, Wizard

Variants

Designers Notes

50 card decks would have a cost limit of 125.

Doing Research... Will add more: Spells, Magic Items, Units, Army Lists Possible rules revisions.

***first Edition Basic Rules Variant**

***turn Sequence**

Each turn has 4 phases: Orders Phase March Phase
Battle Phase Blood Phase

***orders Phase**

Players draw a hand of 10 cards. If a deck runs out, shuffle the reserve pile & draw from it.

***march Phase**

Players may discard up to 5 cards to their reserve piles and draw replacement cards.

***battle Phase**

Players reveal their hands. Determine a Battle Total for each player. Each card contributes its force rating to the Battle Total.

The Player with the most Archer units gets a +2 bonus. The Player with the most Infantry units gets a +2 bonus. The Player with the most Spears units gets a +2 bonus.

The Player with the most War Machine units gets a +2 bonus. The Player with the most Cavalry units gets

a +2 bonus. The Player with the most Flying units gets a +2 bonus.

The Player with the most Leader units gets a +2 bonus. The Player with the most Hero units gets a +2 bonus. The Player with the most Magic units gets a +2 bonus.

The Player with the most Scout units gets a +2 bonus. The Player with the most Monster units gets a +2 bonus. The Player with the most Beast units gets a +2 bonus.

The Player with the most Spears units gets a +2 bonus. If you play a Leader card with a Mount card get a +1 bonus. If a unit has the Ambush trait roll 1D6: On 1-3 the units Force is +2. On 4-6 there is no bonus.

If a unit has a "Versus" attribute (Such as +2 vs Orcs) the Unit only gets the bonus if the opponent plays a unit of the appropriate type. Items may only be played if a card that can use it is also played.

***blood Phase**

The Player with the highest Battle Total wins the hand. The loser puts his 1D6 random cards into his casualty pile. Remaining cards go into each players reserve pile.

Warp Hammer Empires

Introduction

War Hammer Theme. Module for the [Warp Empires: Basic Rules System And Campaigns](#) Warp Empires system. You must use the Warp Empires system to play this game.

Map

Fantasy Setting

Victory

Either side wins automatically if all opposing units are destroyed.

Setup

Each side starts with a City, 2 Heroes and 10 random units.

Action Deck

Players share a common Action deck (at bottom of page).

Revenue Phase

Villages produce a Revenue = 1 Towns & Mines produce a Revenue = 2 Cities produce a Revenue = 3

Recruit Phase

Spells can be attached to any stack with a Wizard unit. Units must start in a settlement you control. Ships must start in a Coastal settlement.

Move Phase

Flyers can move up to 4 spaces. Flyers can jump over enemy units. Ships & Sea units can only move into coastal spaces or spaces with lakes or rivers.

Only Flyers, Ships & Sea units can enter deep sea spaces. Each Ship can carry one other unit. A nonflying stack must stop upon entering a mountain, swamp, or desert territory.

Battle Phase

Wizards & Heroes are considered to be Leaders. Towns & Forests give defending units +1 Force each. Cities, Castles and Mountains give defending units +2 Force each.

If defeated, Heroes are simply sent back to the unit chit pile. Spells only generate Force if there is a Wizard in the stack. Magic Items only generate Force if the indicated unit type is in the stack.

Mounts only generate Force if there is a Wizard or Hero that can ride them. Spell chits & Enhancement chits are automatically discarded after a battle before Casualties are determined.

Dwarf Unit List

Unit Name:	#/Speed	Cost	Force	Notes
Gotrek Gurnisson	1M	4	3	Hero, +2 if played with Felix
Felix Jaegar	1M	3	3	Hero

Designing Scenarios

For a single evening: The game master must roll 20 times on the Master Attribute Table #0. The GM must incorporate all those terms into the evenings

adventuring session.

Game Designers Notes

Work in progress. This is fun just to make characters. . . One of my favorites is the Toxic Aqua Orc Pacifist. Plan more tables for weapons, ships, devices,

alien body parts, encounters, adventures, landscapes, etc.

Have fun with it. Meant to be as campy as possible.
Game Mechanics: Imagination!

Warped Diplomacy Classic

Introduction

Heavily modified variant of the board game Diplomacy. Card play replaces written orders. Players should be familiar with basic concepts of the standard game such as Supply Centers, Provinces, Units, and Great Powers.

Special movement rules (Kiel & Constantinople, etc.) still apply. Rules for Retreats, Building, Occupation, Civil Disorder, and Convoys still work in the spirit of the original game.

Disclaimer

Diplomacy is a copyrighted, trademarked property. This is merely a fan site.

Victory

Control of 18 Supply Centers.

Board & Pieces

A standard Diplomacy Board and Pieces are used. Additionally 3 special Decks are used:

1. Event Deck
2. Land Battle Deck
3. Sea Battle Deck

Setup

Standard setup of the Great Powers. Additionally each player is dealt 4 Event cards.

Turn Order

Turns are not simultaneous. Players take turns. Germany goes first, followed around the table going clockwise.

Turn Sequence

Players take turns. Each turn has 6 Phases:

1. Planning Phase
2. Logistics Phase
3. Movement Phase
4. Battle Phase
5. Advance Phase
6. End Phase

Planning Phase

Draw 4 Event Cards. If you have 10 or more Supply centers, draw an extra card. If the deck runs out, shuffle the discard and draw from it.

Logistics Phase

Discard any 2 Event cards to build 1 Unit. (Not in excess of your supply limit) Some cards allow you to build a unit for the cost of that card only.

Movement Phase

Discard any Event card to move 1 Unit 1 Space. Some cards will allow you to move 1 Unit additional spaces or to move several units for the cost of that card only. Discard any 1 Event card to convoy 1 Army as described in the regular rules.

An Army may convoy on allied ships if those players allow. An Army can only be convoyed into an unoccupied Province. A single unit may only normally be moved once per turn. Additional movement requires an Event card to specify that it is an extra move.

Attack Phase

Discard any Event card to have 1 Unit attack an enemy unit in an adjacent space. Some cards will allow you to attack with several units for the cost of that card only. Armies in Coastal Provinces cannot attack Fleets in Sea Spaces.

Fleets in Coastal Provinces cannot attack inland Armies. A single unit may only normally attack once per turn. Additional attacks requires an Event card to specify that it is an extra attack.

Battle Resolution

To resolve an attack the Sea and/or Land Battle decks are used. If you have an Army in the battle draw 5 cards from the Land deck. If you have a Fleet in the battle draw 5 cards from the Sea deck.

Each player may then discard up to 2 cards and draw replacements. If a deck runs out, shuffle the discard and draw from it. Add up the Force value of the playable cards in your hand.

A Defending Army cannot use Attacker cards. An Attacking Army cannot use Defender cards. A Fleet can use up to 3 Ship cards, 1 Weapon, and 1 Tactics card.

Support: A unit adds 1 to its Force value for every friendly unit adjacent to itself and adjacent to the enemy unit it is fighting. If one sides Force total is 3 or greater than his opponents, the loser, if he is the defender, must retreat. If he cannot retreat, he is destroyed. If the attacker loses, nothing happens.

If a defending unit has already retreated once this turn, and it must retreat again, it is destroyed. If a unit loses by 6 or more it is destroyed. A unit gets -1

to its Force for every time it already attacked/defended this phase.

Discard all Battle cards after each attack.

by the destroyed (removed) unit.

Advance Phase

If a defending unit is destroyed, the attacker that destroyed it may move into the space previously occupied

End Phase

Maximum Event card hand size is 3 cards. Discard excess cards.

Event Deck Card List

Card:	Notes:
Industrial Might	Build 1 Unit
Conscription	Build 1 Army
Shipyards	Build 1 Fleet
Man Power	Build 1 Army

Designers Notes

The standard game takes place in the relatively peaceful (historically) period between the Franco Prussian War (also Russo-Turkish) and WWI. However, it will be noticed that the card flavor of the Battle Decks

in this variant has a distinctly WWI flavor.

Diplomacy

Warpquest Core Rules

Introduction

Warp Quest is an abstract game system that depicts goal driven scenarios.

Each player controls a collection of Units who are attempting to be the first to reach an objective and bring it back to the start.

The units could be a party of adventuring archeologists hoping to recover a lost artifact, a squadron of bombers attempting to hit a military target and return home, a band of samurai seeking to vanquish marauding bandits or a company of mixed creatures seeking to destroy a piece of evil ornamental jewelry that has the nasty habit of trying to control the minds of all free creatures.

The scenarios that use the Warp Quest engine will hold the details.

Dice & Pieces

- Six and ten sided dice are needed.
- Each player has a pawn to represent his or her group of Units (adventuring party, fleet, etc.) on the board.
- Use a small trinket to represent the Objective.
- There is only one Objective.

The Board

- The board is a single winding path of connected spaces with a Start Space and an End Space. The path should be 30 Spaces long.
- The First Space represents the start.
- Spaces 2-15 represents travel through the first scenario module.
- Spaces 16-29 represents travel through the second scenario module.
- The End Space is the final destination where the Objective is found.

The Decks

- There are 2 decks for each scenario:
- The Module 1 Deck and the Module 2 Deck.
- Each deck has one of each card in its card list.
- There may also be an Aid deck.

The Units

- Each player controls a group of units called a Party. The scenarios will detail the make up of the units in the party, their attributes (Skills, Traits) and starting dispositions.

Turn Sequence

- Players take turns.
- Each turn consists of 3 phases: 1. Move Phase 2. Draw Phase 3. Challenge Phase

Move Phase

- Roll 1D6. Move your pawn that number of spaces towards the end space.
- You automatically stop when you enter the end space.
- If you are the first to land on the end space your party acquires the Objective.
- Once a party has acquired the Objective then all other players may move their parties in either direction on the path.
- The party with the Objective must move towards the start space.
- The first pawn with the Objective to reach the start space wins the game.

Draw Phase

- If you land on an empty space in spaces 2-15 draw a card from the Module 1 deck.
- If you land on an empty space in spaces 16-29 draw a card from the Module 2 deck.
- If you land on an opponent's party do not draw a card.
- If a deck ever runs out, shuffle its discard and draw from it.
- Cards are of 2 types: Challenge cards & Aid cards.
- Place Aid cards in your hand.
- Challenge cards are encounters your party faces immediately in Challenge Phase.

Challenge Phase

Each challenge card lists one or more skills. Your party will have to make a skill check vs each skill listed. (The same skill may be listed twice or more, requiring that many skill checks) A Skill check consists of a Skill roll and Challenge Roll: Roll 1D10. This is the Skill roll.

Add the skill bonuses of your party members to the roll. You may discard Aid cards for further bonuses to the skill roll. Next roll 1D10. This is the Challenge roll.

Some Challenges have a DM (Difficulty Modifier). Add the DM to the Challenge Roll. If the challenge roll is less than or equal to the skill roll you win the Skill check. If the challenge roll is greater than the skill roll you fail the Challenge.

If you win all the Skill Checks, you win the Challenge. The adventure card may say what happens if you win or lose the Challenge. If the card does not give

directions, then roll on the following table: If you lose the challenge: Roll 1D6: (Challenge Loss Table)

D6	Result
1-4	Go back 1D6 spaces
5-6	Lose 1 Unit (Man, Ship, Hit Point, etc., depending on the Scenario)

If you Win the challenge gain 1 Experience Token. You may spend an Experience Token to let you reroll a Move Roll or a Skill Roll.

Moving Onto An Opponents Pawn

- If you land on an opponent's pawn there will be a fight.
- The current player rolls on the Skill List Table to determine which skill will decide the confrontation.
- Both players make Skill Rolls. In case of a tie nothing happens.
- The loser rolls on the Challenge Loss Table.
- The winner takes the Artifact from the loser if the loser was in possession of the Artifact.

Playing Without Cards

*By Salo:

At least in solo....

The mechanism is simple. Just make a list of all challenge cards with excel (or whatever spreadsheet you prefer) and randomize the list. Then print it out.

Now, when you face a challenge, roll 1d10. If you get 7, you face the seventh challenge on the list. When you have dealt with the challenge, mark it used. When you face another challenge, roll the 1d10 again. If you get a 10, then you face the 10th UNMARKED challenge on the list.

Just make sure, that there are 10 more challenges in the list than there are spaces on the game board.

The challenges that top the list happen more often than those at the bottom of the list. This property can be used without randomizing by the game designer.

Hope you get what I mean.

*By Tom:

Another way of doing this, though it would introduce more instances of a thing/event goes something like this.

Make a table of all the cards in a deck, number them.

- Each card now as a unique number (cardnumber)
- Take the Number of Cards in the list, divide that number by 100. (totalcards/100)
- Each card is then given a Percentile Number equal to (cardnumber)*(totalcards/100)

When you are asked to draw a card roll a percentile (2d10 the first die being 10's the second die being 1's or use the 2d6 method describe in countermoves issue 2) and consult the card table

Say you have a deck of 7 card (totalcards/100)=14.28

Card Percentile 1 14 2 28 3 42 4 57 5 71 6 85 7 99

- you would get card 1 on a percentile roll of 14 or less
- you would get card 2 on a percentile roll of 15 thru 28
- you would get card 3 on a percentile roll of 29 thru 42

* By Zak:

I use a simple trick to test some of the Lloyd productions before creating the real cards: i set for each card a number and then i put on a cup a number of numerical markers corresponding to the card # - i own a lot of boardgames so i have a full collection of numerical markers but in any case is very easy to create a generic set of such a counter.

With this mechanism you can have the random distribution of the deck (one instance of every card - or more if needed) and you don't need the printed card since you simply index the card list with the numbers in your "hand". Nothing special but it works.

Warpspawn Conversions

Meka Tac Conversion for Fast Game System (FGS)

- Movement

Meka movement capabilities are directly usable as Movement Points in FGS, with Large Meka being able to move 3MP and very fast ones having 8MP.

Mekas are in HTH only if the relative counter is adjacent.

- Combat

Range conversion

Same Sector (+2 to Hit): 1-4 range One Sector (+1 to Hit): 5-9 range Two Sector: 10-20 range Three Sector: 21-30 range

Examples: - a Large Flamethrowers (range 3) can fire only in the same sector (with a +2 hit) - a Medium Missile Launchers (range 18) can fire up to two sectors

of distance

Bomb: effects all Mekas in the same sector

Drop Troop Conversion for Fast Game System (FGS)

- Movement

Basic Movement is 4MP: Double Speed is 8MP Movement bouns malus must be considered as +/- MP. Example: the Reflex Augmentation Suit System gives +1MP. Jet Pack: 12MP.

Units are in HTH only if the relative counter is adjacent.

- Combat

Range conversion

Same Sector: 1-5 range One Sector: 6-12 range Two Sector: 13-24 range Three Sector: 25-40 range Four Sector: 41+ range

Warpspawn Waterloo

Introduction

Card game for 2 players depicting the Battle of Waterloo 1815. One player takes the role of the Allies (Wellington and Blucher). The other player takes the role of France (Napoleon).

Victory

If you Reduce your opponent to zero Troops, Morale, or Cohesion, the game immediately ends and you win.

If after 20 turns there is no automatic winner, the player with the highest Troop score wins. If tied, the highest Morale wins. If still tied, the highest Cohesion wins.

The Common Deck

Players share a common 52 card deck plus Jokers.

Common Deck Notation

Number	Force	Type:	Notes:
Ace	X	Wild	Can be used as any numbered card type*
2	2	Damage	-
3	3	Morale	-
4	4	Terrain	-
5	5	Infantry	-
6	6	Infantry	-
7	7	Artillery	-
8	8	Cavalry	-
9	9	Strategy	-
10	10	Blunder	-
Heart Face	7	Leader	-
Diamond Face	6	French Corps	Infantry Only playable by the French Player
Spades Face	4	Prussian Columns	Infantry Only playable by Allies on turns 12+
Clubs Face	5	Prussian Corps	Infantry Only playable by Allies on turns 14+
First Joker	12	Napoleon	Leader Only playable by the French Player
Second Joker	12	Wellington	Leader Only playable by the Allied Player

* Or discard to (re)use a Checklist Item you have already used!

The Time Track

There are 20 Turns. Each turn is $\frac{1}{2}$ an Hour.

Turn	Time	Notes:
1	11:00	First Turn. AM
2	11:30	-
3	12:00	-
4	12:30	-
5	13:00	-
6	13:30	-
7	14:00	-
8	14:30	-
9	15:00	-
10	15:30	-

Turn	Time	Notes:
11	16:00	-
12	16:30	The Prussians Arrive
13	17:00	-
14	17:30	-
15	18:30	-
16	19:00	-
17	19:30	-
18	20:00	-
19	20:30	-
20	21:00	Last Turn of the Game

Markers

Troop Markers are Blue Morale Markers are White. Cohesion Markers are Red.

Dice

Six sided dice are needed.

Action Points

This applies only to the French Player. The French player gets 1 Free Action Point per Turn. The first turn of the game, the French player gets 2 Free Action Points.

Actions are required for Bombardments, to attack Strongpoints, and for Main Assaults. The French player may get extra actions by playing (discarding) Strategy cards and Leader cards. The French Player may always attack Hougoumont without spending an Action Point.

Strongpoint Tokens

There are 3 Strongpoints in the Game: Hougoumont (Chateau anchoring Wellingtons Right) La Haye Sainte (Farmhouse Forward of the Mont St Jean Ridge) Papelotte (Hamlet anchoring Wellingtons Left) Each Strongpoint has a corresponding Token. Each turn of the game has a Phase corresponding to one of these Strongpoints. The Strongpoints start the game in control of the Allies.

If the French ever win a Strongpoint Phase they gain control of the indicated Strongpoint Token.

Arrival Of The Prussians

The Prussians Arrive on Turn 12. The Allied player gains 6 Troop, 6 Morale, and 6 Cohesion Markers. Prussian Cards may not be used at all for any reason until turn 12 and later.

Prussian cards can be used in the Prussian Phase, the Papelotte Phase, and the Recovery Phase.

Checklists

Each player gets a unique Checklist. Each Checklist is a list of special actions/bonuses that can be used once, and are then checked off (crossed through/scratched out) and cannot be used again. A Maximum of 2 Items can be used during a single Phase (yours or opponents turn).

The Damage Table

Roll	Damage
1	2 Troop Markers
2	1 Troop Marker
3	2 Morale Markers
4	1 Morale Marker

Hougoumont Strongpoint Phase

Skip this phase unless the French player wants to attack, or the Allied player does not control it and wishes to try to retake it. The French player may always attack Hougoumont without the need of spending any Action Points. Both players select and simultane-

Setup

Shuffle the deck. One player takes the role of the Allies (Wellington and Blucher). The other player takes the role of France (Napoleon).

Place a Marker on 11:00 on the Time Track. The French player gets 20 Troop Markers, 20 Morale Markers, and 20 Cohesion Markers. The Allied player gets 16 Troop Markers, 16 Morale Markers, and 16 Cohesion Markers.

Turn Sequence

Each turn has 10 Phases:

1. Logistics Phase
2. Strategy Phase
3. Bombardment Phase
4. Hougoumont Strongpoint Phase
5. La Haye Sainte Strongpoint Phase
6. Papelotte Strongpoint Phase
7. Main Assault Phase
8. Counter Charge Phase
9. Prussian Phase
10. Recovery Phase

Logistics Phase

Each player fills their hand up to 10 cards. If the deck runs out, shuffle the discard and draw from it.

Strategy Phase

Each player may discard up to 5 cards and draw replacements.

Bombardment Phase

Skip this phase unless the French player expends an Action Point. The French player may discard Artillery cards to roll on the Damage Table once for each card discarded inflicting these losses on the allies. The Allied player may discard Terrain cards to negate Artillery Cards on a 1 to 1 basis before rolls are made.

Rolls are at +1 unless the French control at least 1 Strongpoint and so are able to bring their guns forward. Players may fill their Hands back up to 10 after this Phase.

Roll	Damage
5	2 Cohesion Markers
6	1 Cohesion Marker
7+	No Damage

ously reveal up to 5 cards from their hands.

Each card has a Force value. Cavalry Cards cannot be used. The player who currently controls the Strongpoint gets a Force bonus of +15. The player with the highest value wins the hand. If tied, the Allies win.

The winner takes control of the Strongpoint To-

ken. Discard all revealed cards. The player with the Hougoumont Token gets +5 Force in Main Assault Phase. Regardless of who wins the Attacker rolls twice on the Damage Table and the Defender rolls once on the Damage Table.

Players may play (discard) damage cards to make their opponent roll once on the Damage Table for each such card played. The Allied player may not use Prussian cards in this Phase. Players may fill their Hands back up to 10 after this Phase.

La Haye Sainte Strongpoint Phase

Skip this phase unless the French player expends an Action Point, or the Allied player does not control it and wishes to try to retake it. The Allied player may discard a Damage card to force the French to Attack. Both players select and simultaneously reveal up to 5 cards from their hands.

Each card has a Force value. Cavalry Cards cannot be used. The player who currently controls the Strongpoint gets a Force bonus of +5. The player with the highest value wins the hand. If tied, the Allies win.

The winner takes control of the Strongpoint Token. Discard all revealed cards. The player with the La Haye Sainte Token gets +5 Force in Main Assault Phase. Regardless of who wins the attacker rolls twice on the Damage Table and the Defender rolls once on the Damage Table.

Players may play (discard) damage cards to make their opponent roll once on the Damage Table for each such card played. The Allied player may not use Prussian cards in this Phase. Players may fill their Hands back up to 10 after this Phase.

Papelotte Strongpoint Phase

Skip this phase unless the French player expends an Action Point, or the Allied player does not control it and wishes to try to retake it. Both players select and simultaneously reveal up to 5 cards from their hands. Each card has a Force value.

The player who currently controls the Strongpoint gets a Force bonus of +10. The player with the highest value wins the hand. If tied, the Allies win. The winner takes control of the Strongpoint Token. Discard all revealed cards.

The player with the Papelotte Token gets +5 Force in Main Assault Phase. Regardless of who wins the attacker rolls twice on the Damage Table and the Defender rolls once on the Damage Table. Players may play (discard) damage cards to make their opponent roll once on the Damage Table for each such card played.

Players may fill their Hands back up to 10 after this Phase.

Main Assault Phase

Skip this phase unless the French player expends an Action Point. If the French player does not control

at least 2 Strongpoints, he must roll once on the Damage Table due to Enfilading Fire. Both players select and simultaneously reveal up to 6 cards from their hands.

Each card has a Force value. Players get a Force bonus of +5 for each Strongpoint Token they have. The player with the highest value wins the hand. If tied, the Allies win.

Discard all revealed cards. The Loser must roll 6 times on the Damage Table. The Winner must roll 2 times on the Damage Table.

Players may play (discard) damage cards to make their opponent roll once on the Damage Table for each such card played. If the French won in Main Assault Phase last turn they get +5 Force this turn in Main Assault Phase. If the French lose in Main Assault Phase, they cannot attack in Main Assault phase again on the following 2 Turns.

Players may fill their Hands back up to 10 after this Phase.

Coordinated Attack Bonus Rule

In Main Assault phase If you play Infantry, Artillery, and Cavalry in the same hand get +10 Force (Applies to both players).

Outmaneuver Bonus Rule

In Main Assault phase If you play Strategy, Blunder, and Terrain in the same hand your opponent must immediately roll once on the damage Table.

Counter Charge Phase

The Allied player may do this only if the French Player attacked in Main Assault Phase. The Allied player plays (discards) Cavalry cards from his hand. The French player rolls once on the Damage Table for each such card played.

Players may fill their Hands back up to 10 after this Phase.

Prussian Front Phase

Skip this Phase unless it is turn 12 or higher. Both players select and simultaneously reveal up to 5 cards from their hands. Each card has a Force value.

The player with the highest value wins the hand. If tied, the French win. Discard all revealed cards. If the French player loses he rolls twice on the Damage Table.

If the French player wins he rolls once on the Damage Table. Players may fill their Hands back up to 10 after this Phase. Allied Checklist Items cannot be used unless they have the PFP or CUP designation.

The Allied Player cannot use the Wellington card.

Recovery Phase

Rally Rule: Players may discard Morale cards to gain 1 Morale Marker for each card. Reinforcement Rule: Players may discard Infantry cards to gain 1 Troop Marker for each card. Regroup Rule: Players may discard Blunder cards to gain 1 Cohesion Marker for each card.

Checklist Items may be used for this purpose.

Imperial Guard Rule

At turn 12 and higher the Imperial Guard become available to the French Player. The French player may

send in the Imperial Guard on any Strongpoint or Main Assault phase or Prussian Front Phase to get an extra +5 Force. However if the French lose the Hand, they lose an extra 5 Morale Counters.

If the Guard loses a total of 3 times, they can no longer be sent in.

Checklist Notation

PFP Prussian Front Phase & Papellote Phase Only

CUP Can also be used in Prussian Front Phase

MAP Main Assault Phase

CCP Counter Charge Phase

The Allied Checklist

Item:	Notes:
Opportunity Lost	The French may not attack in MAP this turn
Chasse's Belgo-Dutch	A Leader card gets +2 Force
Volley and Charge	A Strategy and Infantry Card get +3 Force each
Life Guards	An Infantry card gets +4 Force
Royal Horse Guards	Use as a Cavalry Card in CCP
Union Brigade	Use as a Cavalry Card in CCP
Scots Greys	Use as a Cavalry Card in CCP
Inniskilling Dragoons	Use as a Cavalry Card in CCP
Vivians Hussars	A Cavalry card gets +3 Force
Infamous Army	Use as an Infantry Card of Force -2
Jager Skirmishers	An Infantry card gets +2 Force
British Guns	Use as an Artillery Card
Repulse Attack	A Damage card gets +5 Force
Kings German Legion	Hougoumont gets +5 Force if Defending
Hanoverian Brigade	An Infantry card gets +2 Force
Peninsular War Vets	An Infantry card gets +5 Force
British Infantry	An Infantry card gets +3 Force
Dutch Carabineers	A Cavalry card gets +2 Force
Soft Ground	All Terrain Cards get +2 Force
Infantry Squares	Negate a Cavalry card played by Opponent
Attack Falters	A Damage card gets +4 Force
Lord Uxbridge	A Leader Card gets +5 Force
Sunken Lane	A Terrain Card gets +3 Force
Captured Eagles	If you win a Hand gain 3 Morale
Late Start	Skip any Target Phase
Conflicting Orders	Use as a Blunder Card
Vague Dispatch	Skip any Target Phase
Strong Position	Use as a Terrain Card
Obsession	French must Attack Hougoumont this Turn.
Sharpshooters	An Infantry card gets +5 Force
Reverse Slope	Use as Terrain Card in MAP or Bombardment Phase
Mont St Jean Ridge	All Terrain Cards get +2 Force in MAP
Unsupported Attack	Negate Coordinated Attack Bonus of Opponent
Highlanders	An Infantry card gets +4 Force
Foot Guards	An Infantry card gets +3 Force
Royal Horse Artillery	An Artillery Card gets +2 Force
Steadfast	Use as a Morale Card

Item:	Notes:
Unshakeable	A Morale Card gets +5 Force
False Withdrawal	French if able must Attack in MAP. Turn 8+
Point Blank Volley	Use as a Damage Card
Prince of Orange	Use as a Leader Card of Force -2
Zieten	Use as a Leader Card Turn 12+ PFP
Bulow	Use as a Leader Card Turn 13+ PFP
Blucher	Use as a Leader Card Turn 14+ PFP
Silesian Riflemen	Use as a Infantry Card Turn 15+ PFP
Landwehr	Use as a Infantry Card Turn 16+ PFP
Plancenoit	Use as a Terrain Card Turn 17+ PFP
Near Run Thing	A Strategy card gets +2 Force
Careful Dispositions	A Strategy card gets +5 Force
Flank Attack	A Strategy card gets +4 Force CUP
Unwieldy Formation	Use as a Blunder Card in MAP
Take Prisoners	Use as a Damage Card CUP
General Advance	Use as a Strategy Card Turn 19+ CUP
Immaculate Timing	The Wellington Card gets +3 Force
Maitland's Foot Guards	An Infantry Card gets +5 Force
Encirclement	A Strategy Card gets +5 Force Turn 18+ PFP
Exhaustion	Negate a Target Infantry Card Turn 14+
Lull in the Battle	In Recovery Phase gain 2 Cohesion Turn 13+

The French Checklist

Item:	Notes:
Ney Leads the Charge	Use as a Leader Card
Grande Armee	All Infantry Cards get +2 Force
Out of Ammunition	Use as Blunder card when attacking Strongpoint
Inexperienced Troops	Negate a Morale card played by Opponent
Marshal Reille	A Leader Card gets +2 Force
Grande Batterie	Use as 2 Artillery Cards in Bombardment Phase
Lancers	A Cavalry card gets +5 Force
Heavy Cavalry	Use as a Cavalry Card
Furious Attack	All Strategy Cards get +2 Force
Marshall d'Erlon	A Leader Card gets +3 Force
First Corps	Use as an Infantry Card
Second Corps	Use as an Infantry Card
Grenadiers	An Infantry Card gets +3 Force
Middle Guard	Imperial Guard Bonus increased by +3 Force
Chasseurs	Imperial Guard Bonus increased by +2 Force
Vive L'Empereur	Use as a Morale Card
Cuirassiers	A Cavalry card gets +5 Force
Lobau	A Leader Card gets +3 Force
Gap in the Line	A Strategy Card gets +5 Force
Line Crumbles	Use as a Damage card in MAP
Squares Wavering	Damage card gets +5 Force in MAP
Light Cavalry	A Cavalry card gets +2 Force
Massed Cavalry	All Cavalry Cards get +2 Force
Reserve Cavalry	Use as a Cavalry Card
Kellerman	A Leader Card gets +2 Force

Item:	Notes:
Grenadiers A Cheval	A Cavalry card gets +4 Force
Empress Dragoons	A Cavalry card gets +2 Force

Young Guard	Imperial Guard Bonus increased by +2 Force
Old Guard	Imperial Guard Bonus increased by +3 Force
French Élan	All Morale cards get +2 Force
Frontal Assault	Use as a Strategy Card of Force -2
Great Columns	Use as an Infantry Card
Tell them its Grouchy	A Morale card gets +3 Force
Prolonged Cannonade	Use as an Artillery Card
Marshall Soult	A Leader Card gets +2 Force
Bayonet Charge	An Infantry Card gets +5 Force
Press the Attack	A Strategy Card gets +3 Force
Feint	Use as a Strategy Card of Force -2
Enraged	A Morale Card gets +3 Force
Resolve	All Morale Cards get +2 Force
Soften Them Up	Use as an Artillery Card
Fury of Shot & Shell	All Artillery Cards gets +2 Force
French Veterans	A Morale card gets +5 Force
Blown Horses	Opponent Rolls once on Damage Table after Counter Charge
Overwhelmed	Use as a Damage Card
Artillery vs. Squares	Artillery Card gets +5 Force in Main Assault Phase
Gallantry	A Morale Card gets +2 Force for each Unit Card Played
Spirited Advance	All Strategy & Morale Cards get +1 Force
Prince Jerome	A Leader Card gets +2 Force
Bugles & Drums	All Morale and Unit cards get +1 Force
Audacity	The Napoleon Card gets +3 Force

Links

Waterloo

Warring States Period

Introduction

China 475 - 221 BCE. Each player is the king of one of 7 States vying for domination. Card game for 2-7 players.

Victory

The first player to control 15 Province Tokens wins the game.

Warring States

Each player picks as his identity one of the following 7 States: Qin, Wu, Chu, Qi, Yan, Zhao, Han

Province Tokens

There are exactly 21 Province Tokens.

Razed Provinces

Province Tokens should have 2 distinguishable sides. When a Province is razed (hit by a disaster) flip it over.

Army Tokens

Tokens are used to represent Armies.

The Decks

There are 3 common decks:

1. Event Deck
2. Resource Deck
3. Battle Deck

If a deck ever runs out, shuffle the discard and draw from it.

Money

Currency is in units called "Bu". Use coins to represent Bu.

Setup

Shuffle the decks. Players cut the Battle deck. High card goes first (becomes first active player). Each player gets an equal number of Province Tokens.

If extra Tokens remain, they are not used. Each player starts with 10 Bu.

The Active Player

Give the Active player a small figurine to denote this Honor. The Active player goes first in War Phase. Play proceeds clockwise.

Turn Sequence

Each turn has 7 Phases:

1. Event Phase
2. Income Phase
3. Trade Phase
4. Taxes Phase
5. Build Phase
6. War Phase
7. End Phase

Event Phase

The active player Flips over and plays the top card of the Event Deck.

Income Phase

All Players Draw 3 Resource cards. Players Draw an extra Resource card for every 2 Province Tokens they control (rounding down) that are not razed.

Trade Phase

Players may trade Resource cards.

Taxes Phase

Discard 3 Mines to gain 3 Bu. (Bronze Meld) Discard 3 Cities to gain 3 Bu. (Trade Meld) Discard 3 Agriculture to gain 3 Bu. (Rice Meld) Discard a combo of 1 Mine, 1 City, and 1 Agriculture to gain 2 Bu. (Balanced Meld) Discard 2 Mines to gain 1 Bu. Discard 2 Cities to gain 1 Bu. Discard 2 Agriculture to gain 1 Bu.

Discard 2 Generals to draw 1 Resource card.

Build Phase

Pay 2 Bu to rebuild a razed Province (Flip it right side up) Pay 2 Bu to gain one Army Token. Pay 2 Bu to put a General Card into play Discard all unused Resource cards.

War Phase

Players take turns in War Phase. The Active Player goes first. War Phase is divided into 3 Segments:

1. Declaration Segment

2. Ally Segment
3. Campaign Segment

Declaration Segment

The Active player (Attacker) may declare he is going to war with a target opponent (Defender). In order to go to war, the Attacker must have at least one General and one Army. The Defender will fight with whatever units it has.

Ally Segment

Other players (not the Attacker or Defender) may send units to aid either side. They can be recalled at any time.

Province Army Rule

Important: If the Defender has no Unit cards, one of his Province Tokens will act as an Army, referred to as a Provincial Army.

Campaign Segment

The War will consist of 1 or more Battles. Each Battle has 3 Rounds:

1. Tactics Round
2. Clash Round
3. Casualties Round

Multiple Campaigns Rule

The attacker may wage multiple wars in the same turn against different opponents. Each such cam-

paign requires at least one General and one Army not engaged in another campaign.

Tactics Round

Each player has a Battle hand. If a player has 1 or more cards in his Battle Hand he skips the rest of Tactics Round. If a player has no cards in his Battle hand, he fills his Battle hand to up to 4 cards plus 1 for each army he controls. He may then discard and redraw 1 Battle card for each General he controls.

Clash Round

Each Player plays one Battle card from his hand (This is called the Destiny Card) Players calculate their Battle Totals (BT):

BT # of Generals + # of Armies + Destiny Card Value + General Bonuses

The player with the higher BT wins the Battle. Defender wins ties. Discard Destiny cards.

Casualties Round

The loser discards one Unit (Army or General). Even if he lost, the Attacker may (if he wants to) attack the same target again (conduct a Battle) if He has at least One General and One Army in play. If a Provincial Army is defeated, the Attacker gets to keep that Province Token (Conquest).

End Phase

Discard all Battle hands. The New Active player is the player to the left of the current Active player. Check to see if anyone has won (15 Provinces).

Resources Deck

Card Name:	#	Notes:
Agriculture	10	-
Mine	10	-
City	10	-
Daring General	2	If you are the Attacker get +1 to BT

FAQ's Q - Rules questions: "Unit" refers to Generals & Armies? A - Yes. Q - If you lose a "Unit" after a battle it is either a single General or a single Army? A - Yes. You choose which specific unit you loose. Q - If loser is the defender who was using a Provincial Army, and that is taken, is that the "Unit" lost by the defender? A

- Yes.

Q - Attacker may attack multiple opponents if and only he has at least 1 General & 1 Army v. each opponent. But, if the Attacker makes serial attacks v. same opponent can he re-use the same General & Army? A -

Yes. Units committed to a campaign against a specific opponent can keep attacking that opponent.

Warrior Kings Of Ireland

Introduction

Card & Dice Game for 2-5 players. Theme: War & Politics in 10th -11th Century Ireland.

Victory

The player with the most Gold at the end of the Game Wins.

Game End

The Game ends after each player has had 13 Turns.

Gold

Use Coins to represent Gold.

The Deck

Players share a common deck. There are 4 Card Types:

- Faction Cards
- King Cards
- Event Cards
- Battle Cards

Factions & Kings are collectively referred to as Unit cards.

Dice

Six Sided Dice are needed.

Factions & Clans

Ireland at this time is divided up into many small Kingdoms & sub-Kingdoms. These are represented by Faction Cards. At Setup each player must pick their Identity from one of 5 Main Clans:

1. Ulster
2. Connacht
3. Meath
4. Leister
5. Munster

Setup

Each player starts with 5 Gold. Each player is dealt a Hand of 5 Cards. The most Irish player goes first.

Players may not conduct Raids or Sieges on their first turn.

Turn Sequence

Players take turns. Each turn has 8 Phases.

1. Tribute Phase
2. Fate Phase
3. Recruit Phase
4. Declaration Phase
5. Raid Phase
6. Battle Phase
7. Siege Phase
8. Destiny Phase

Tribute Phase

Gain 1 Gold for each Faction you control. If you are the High King, each other player must Give you 1Gold in Tribute.

Fate Phase

Draw 4 cards from the deck. Draw 1 less card if you have no Kings in play. If the Deck runs out, shuffle the discard and draw from it.

Recruit Phase

You may put Faction & King cards from your hand into play. They are placed face up in front of you, and Remain in play until removed by battle or some card action. You are considered to be in control of these Factions.

Note: Other players may play Faction cards of the Clan you belong to.

This indicates they have allied with some group within your Clan that is hostile to you. Note: If you control a Faction card of your own Clan, it gets Force +1.

The Player with the Most Factions is the "High King"

Declaration Phase

You may declare that you are going to Raid or Siege an opposing player. That player may immediately draw 1 card from the deck.

Raid Phase

You may raid the Lands of one opposing player. Declare which of your Units you are looting with. The Units that did not go are called your Reserve.

Loot (Take) $1D6+X$ Gold from that player. (X = Number of Units you sent) This is the Raid Roll. That player may attempt to block you by declaring that he is seeking Battle. If you refuse battle, you do not get the Loot.

If you agree to battle, go to Battle Phase.

Battle Phase

Skip this phase unless sent here by Raid or Siege Phase. The current player is the Attacker. His target opponent is the Defender. Other players are called Neutrals.

You and your opponent may invite other players to Ally with you. These Invitations may include gifts of Gold or Cards, and Promises of Peace or Aid. An ally player may choose to send some or all of his Factions & Kings to the Battle.

Each Faction and King card has a Force Value. The side with the highest Force gains the Strength Advantage (SA). If a side has the higher total force by a Factor of 2 it gains the Might Advantage (MA).

Players may play Battle (Not Siege or Fortification) cards to increase their Total Force. Players may play Event cards to steal or discard enemy Factions & Kings. Each Player makes a Battle Roll: Roll 2D6 Roll 3D6 if you have the Strength Advantage.

Roll 4D6 if you have the Might Advantage. The Higher Total Wins the Battle. Each player makes a Survival Roll for each of his Factions & Kings (Units).

The Winner must roll a 3 or better for each of his Units to Survive. The Loser must roll a 5 or better for each of his Units to Survive. If the Winner has no surviving Units, the loser becomes the winner if He has at least 1 Unit left.

If the Attacker wins, has Units left, and all of his Opponents Units are destroyed, he may take all of his opponent's Gold. (Otherwise, he gets nothing)

Siege Phase

If you decided to Lay Siege to an opposing player, he may decide to Meet you on the field of Battle instead. In that case, go to Battle Phase. If not, proceed with the Siege... Declare which of your Units you are conducting the Siege with. The Units that did not go are called your Reserve.

The Siege is handled exactly like Battle Phase except: Maneuver & Terrain (Battle) Cards are not used. The Attacker may use Siege (Battle) cards. The Defender may use Fortification (Battle) Cards.

The Defender gets to add extra 1 Die to his Battle Roll. If the Defender Loses he must roll a 6 or better for each of his Units to Survive. If the Defender Wins he must roll a 2 or better for each of his Units to Survive.

The Attacker must roll a 2 or better for each of his Units to Survive. If the Attacker wins, has Units left, and all of his Opponents Units are destroyed, he may take all of his opponent's Gold. (Otherwise, he gets nothing)

Destiny Phase

Your Max hand size is 5 + the number of King Cards you Control Discard down to Max hand size.

Rumors	V	-	Look at Opponents Hand
Guerilla Warfare	V	-	Discard Target Unit in Raid Phase
Forest	B	4	Terrain

Extra Players

The Vikings may be used as a Major Clan.

Warrior Lands

Introduction

Basic Fantasy Tactical Skirmish Combat game for 2+ players.

Victory

Crush your enemies into small piles of plastic and pewter.

Warriors

Use plastic warriors from Kid's toy-sets. Ruleset appropriate for Fantasy, Ancient, and Medieval. Warriors are also referred to as Units.

The Board

Large Hexes. Big enough for mounted units. Max one Unit per space.

Dice

Six sided dice are needed.

Cards

Use Cards from Candyland: 6 Colors: Equal numbers of. . . Red, Orange, Yellow, Green, Blue, and Purple. If the deck ever runs out, shuffle the discard and draw from it.

Card Actions

Card Color:	Action:
Red	Move 1 Space
Orange	Move 1 or 2 Spaces
Yellow	Attack into Adjacent Space (Range = 1) and Hit on 1-3
Green	Defend against an attack on 1-3
Blue	First Special
Purple	Second Special

Movement

Use Red and Orange Cards. Facing does not matter. No stacking.

You cannot Move through other Units.

Attacking

Use Yellow Cards. When you attack roll 1D6 to see if you hit If you roll a 1, 2, or 3, you hit and the target Unit takes 1 Damage.

Action Tokens

Use glass stones or pebbles. These are used to keep track of which units have had their turn.

Damage Tokens

Use Poker Chips. This keeps track of how much Damage the unit has taken.

Setup

Place Warriors onto the map according to the scenario.

Turn Sequence

Place an Action Token next to each unit. Players roll high on 1D6 to see who goes first. Players take turns activating one unit at a time.

When you activate one of your Units, remove its Action Token. Then draw 2 Cards for the current Unit. Use these cards to have the Unit Move and Attack.

A Unit may make a max of 1 Move and 1 Attack per turn. Discard cards when used or if they are un-useable. Continue to the next unit until no units have any Action Tokens.

Defending

When a Unit is hit, it may immediately draw 1 card to try to defend. If it is a Green card, roll 1D6. On a roll of 1, 2, or 3, the attack is negated and no Damage is taken.

Passive Defenses And Abilities

These effects happen automatically without needing a card to be played: > Light Armor or Thick Skin: If a Unit with light Armor is Hit roll 1D6. On a roll of 1 the Damage is absorbed.

> Heavy Armor or Tough Hide: If a Unit with Heavy

Armor is hit roll 1D6. On a roll of 1 or 2 the Damage is absorbed.

> Mithril Armor or Hard Shell: If a Unit with Force Field is hit roll 1D6. On a roll of 1, 2, or 3 the Damage is absorbed.

> Skeletal Form: If a Skeleton Unit is hit by a sword, spear, or arrow, roll 1D6. On a roll of 1, 2, or 2 the Damage is absorbed.

> Force Field: If a Unit with Force Field is hit roll 1D6. On a roll of 1, 2, 3, or 4 the Damage is absorbed.

> Invulnerable: If a Unit with Force Field is hit roll 1D6. On a roll of 1, 2, 3, 4, or 5 the Damage is absorbed.

> Spirit Form: Immune to normal physical Attacks. Can only be harmed by Spells, Magical and Enchanted Weapons and Units.

> Poison: If a Poisoned Attack fails to Hit roll again: On a roll of 1-2 on 1D6 the Attack causes 1 Damage.

> Martyr: If an adjacent friendly unit is attacked, this unit may switch places with it and take the attack instead.

> Drain: If the attack causes damage, the Attacker draws 1 extra card next turn.

> Slay X: Where X is a specific unit type such as Dragon or Goblin. The affected target type is always automatically hit and green cards cannot be used in defense.

Note: Some units will have several layers of Passive Defenses. When hit, they will get to roll for each.

Special Cards

Depending on the identity of the Unit and its Equipment layout Special cards will have a variety of Effects including Attacks, Defenses, Movement, and More.

Damage

Most Units have only 1 Hit, that is, 1 point of Damage is Enough to destroy them. Important Heroes and Large Monsters will have extra Hits.

Unit Type X Special Card List Notation

> Attack 1 (1-4) = Attack of Range 1 and Hits on roll of 1, 2, 3, or 4

> Indirect 2 (1-3) = Attack of Range 1 or 2 and Hits on roll of 1, 2, or 3 Indirect Attacks can be made over other Units in the way

> Defend (1-2) = Negate an Attack on a roll of 1 or 2

> Move 3 = Unit can move 1, 2, or 3 spaces

> Receive (1-2) = Negate an Attack on a roll of 1 or 2 made by an adj enemy and do 1 Damage to them. Opponent may defend against this attack.

> Second 1 (1-2) = If the unit already attacked this turn, use this card to Make a second Attack of Range 1 that hits on a roll of 1 or 2

> Stun 1 (1-4) = An Attack of range 1 that does no damage. If unit is Hit on a roll of 1, 2, 3, or 4 it loses its Action Token and does not get Another Action Token next turn.

> Parry (1-3) = Negate an Attack on a roll of 1 or 2. Use only against Non-flexible Hand Held Weapons.

> Flex 1 (1-3) = Attack of Range 1 and Hits on roll of 1, 2, or 3. A crushing Attack cannot be defended against by Shields or Parrying.

> Pierce 2 (1-4) = Attack of Range 1 or 2 and Hits on roll of 1, 2, 3 or 4. Light and Heavy Armor do not protect against Pierce Attacks.

> Crush 1 (1-3) = Attack of Range 1 and Hits on roll of 1, 2, or 3. A crushing Attack cannot be defended against by anything.

> Push 1 (1-3) = An Attack of Range 1 that does no Damage. If unit is Hit on a roll of 1, 2, or 3 It must move away from the attacker 1 Space. If it cannot, it then automatically takes 1 Damage. Cavalry that is pushed is Unhorsed, and may spend its next action getting back on.

> Swipe 1 (1-3) = 2 Attacks of Range 1 against 2 enemy units that are adjacent To both this Warrior and each other. Attacks hit on a roll of 1, 2, or 3.

> Inspire 3 (1-4) = Target Friendly Unit up to 3 spaces away is inspired on a Roll of 1, 2, 3, or 4. An Inspired Unit draws 1 extra card on its turn. A Unit can be Inspired a max of once per turn.

> Rally 3 (1-3) = Target Friendly Unit up to 3 spaces away is Rallied on a Roll of 1, 2, or 3. A Rallied Unit draws 1 extra Action Token on its turn. A Unit can be Inspired a max of once per turn.

> Flying 3 = Unit can move 1, 2, or 3 spaces. It can move over other Units.

> Trap 1 (1-3) = Attack of Range 1 that hits on a roll of 1, 2, or 3. A Trapped Unit takes no Damage, but must use its next turn to try to escape on a roll of 1-4 on 1D6. If it fails, it must try again the following turn.

> Revive 1 (1-2) = Bring Back Friendly Dead Unit on a roll of 1 or 2 on 1D6

> Stun All 2 (1-3) = Effects all Enemy Units in Range

> Inspire 2 (1-3) = All Friendly Units up to 2 spaces away are inspired on a Roll of 1, 2, or 3. An Inspired Unit draws 1 extra card on its turn.

> Lure 2 (1-4) = Target must move 1 Space towards Luring Unit.

> Slow = Orange Cards can only be used to move 1 Space

> Berserk = Green Cards can also be used for Attack 1 (1-3)

> Burst X (1-3/1) = Attack of Range X (X as Defined by Unit) and Hits on a roll of 1, 2, or 3. It also hits Adjacent Units on a roll of 1 on 1D6.

> Switch: Cause 2 friendly adjacent units to switch spaces.

> Deploy: A friendly unit (within 5 Spaces) gets to take its turn immediately (out of turn). It also gets to move an extra 1 or 2 Spaces.

Unit Type X Special Card Activation List

Unit Type:	Blue Card:	Purple Card:
Horse or Fast	Move 3	Move 4
Bow and Arrow	Indirect 2 (1-3)	Indirect 3 (1-2)

Tracker	Move 2	Move 2
Tactics	Switch	Deploy

Unit Notes

A Unit can have multiple Types. For Example A Single Unit might have a Sword, Horse, and a Shield, so A special Card could be used by it for any of those effects.

Magic

For a Unit to cast a spell, It must first play a Blue or Purple card, then It must play a second card. The combination of the 2 cards will Determine what spell is cast. Each type of Magic User will have his Own spell list of 12 possible Spells. For lists with more than 12 cards there will be additional 2 color card combinations(Such as R/R = Red/Red)

Mage Spell List

Spell:	Cards	Notes
Magic Missile	B/R	Pierce 2 (1-5)
Fire Ball	B/O	Attack 3 (1-4) Adj Units Hit on roll of 1
Lightning Bolt	B/Y	Attack 4 (1-3) Adj Units Stunned on Roll of 1-2
Cone of Cold	B/G	Trap 2 (1-4) Adj Units Trapped on Roll of 1-2
Paralyze	B/B	Stun 2 (1-5)
Mesmer	B/P	Trap 1 (1-3) Adj Foes Trapped on Roll of 1-3
Prismatic Spray	P/R	Mage gets Force Field for next 4 turns
Teleport	P/O	Mage or Adj Unit gets Flying 7
Haste	P/Y	Rally 2 (1-6)
Polymorph	P/G	Transform 2 (1-3) Unit into another of up to 1D6 Hits
Summon Elemental	P/B	Summon (1-3) 1 Elemental
Earthquake	P/P	Stun 3 (1-3) Adj Units Stunned on Roll of 1-3
Flash	R/R	Stun 1 (1-4) Adj Units Stunned on Roll of 1-2
Enchant	R/O	Create a Magic Item that lasts for 2D6 Turns
Phantasmal Forces	R/Y	Summon (1-4) 1 Phantasm
Invisibility	R/G	Self or Target 1(1-4) Gets Invisibility for 1D6 Turns

Priest Spell List

Spell:	Cards	Notes
Resurrect	B/R	Bring Back Friendly Dead Unit on a roll of 1-3 on 1D6
Cure	B/O	Negate (1-4) Poison, Polymorph, Curse, Weakness, Petrify
Circle of Protection	B/Y	Priest and Adj Friendly Units get Force Field this turn
Turn Undead	B/G	Attack 1 (1-5) Adj Units hit on 1-3. Vs Undead Only
Bless	B/B	Inspire 2 (1-5) Adj Friendly Units Inspired on Roll of 1-3
Holy Word	B/P	Rally 3 (1-4) Adj Friendly Units Rallied on Roll of 1-2
Smite	P/R	Crush 1 (1-6)
Wrath	P/O	Attack 4 (1-3) Adj Units Hit on roll of 1-3
Holy Armor	P/Y	Range 2 Target gets Force Field for 3 Turns
Awe	P/G	Stun 1 (1-6) and Adjacent Foes Stunned on Roll of 1-4
Control Mind	P/B	Control Unit 2 (1-5) For 1D6 Turns
Summon Angel	P/P	Summon (1-3) 1 Guardian Angel

Necromancer Spell List

Spell:	Cards	Notes
Animate Dead	B/R	Summon (1-4) 1 Zombie or Skeleton
Summon Undead	B/O	Summon (1-3) 1 Ghost or Vampire
Touch of Death	B/Y	Attack 1 (1-5)
Raise Dead	B/G	Bring Back Friendly Dead Unit on a roll of 1-3 on 1D6
Curse	B/B	Range 4 (1-4) Unit Draws 1 less card each turn
Weakness	B/P	Trap 2 (1-5) and Adjacent Foes Trapped on Roll of 1-3
Drain Energy	P/R	Stun 1 (1-6) and Caster draws 1 extra card next turn
Fear	P/O	Push 2 (1-5) and Adjacent Enemy Units Pushed on roll of 1-3
Summon Swarm	P/Y	Summon (1-3) 1 Rat or Bat Swarm
Dark Ritual	P/G	Caster Draws 3 extra cards next turn
Dominate	P/B	Control Unit 2 (1-5) For 1D6 Turns
Cursed Ground	P/P	Target Hex 3 All Units entering this Hex are Attacked (1-3)
Misdirection	R/R	Move Foe 3 (1-5) up to 2 spaces in any direction
Darkness	R/O	All Units within 3 Hexes draw 1 less card their next turn

Shaman Spell List

Spell:	Cards	Notes
Summon Warrior	B/R	Summon (1-4) 1 Orc, Lizardman, Goblin, etc.
Flame Strike	B/O	Attack 4 (1-4) Adj Units Hit on roll of 1
Lightning Storm	B/Y	Attack 3 (1-3) Adj Units Stunned on Roll of 1-2
Freeze	B/G	Trap 2 (1-3) Adj Units Trapped on Roll of 1-3
Reincarnate	B/B	Bring Back Friendly Dead Unit on a roll of 1-3 on 1D6
Blood Ritual	B/P	Caster Draws 3 extra cards next turn
Blood Fury	P/R	Rally 2 (1-4) Adj Friendly Units Rallied on Roll of 1-2
Wind Walk	P/O	Shaman and 1 Adj Unit gets Flying 5

Energize	P/G	Inspire 1 (1-5) Adj Units Inspired on roll of 1-3
Bestial Fury	P/B	Rally 1 (1-4) Adj Units Rallied on roll of 1-3
Rust	P/P	Destroy (1-3) Target and Adj Metal Armor and Weapons
Wind Gust	R/R	Push 2 (1-5)

Spell Notes

Resurrect, Reincarnate, Raise Dead, Rejuvenate
 Spells: Dead Unit reappears in empty space next to Spell-caster. If the first spell does not work, neither will a second one of this type.

Summoned Units

Summoned Units start adjacent to the Spell Caster that summoned them. They will remain for the duration of the Battle or until killed. They cannot be brought back to life if killed.

A Spell-caster can summon a max of 5 Hits worth of Units per battle.

Sample Unit Descriptions

- Fire Drake: Fire Breath, Wings, Claws, Bite, Tough Hide, Tail Swipe, 5 Hits
- Ground Drake: Fast, Claws, Bite, Tough Hide, Tail Swipe, Trample, 4 Hits
- Ice Drake: Freeze Breath, Wings, Claws, Bite, Tough Hide, Tail Swipe, 3 Hits
- Swamp Drake: Poison Gas, Wings, Claws, Bite, Tough Hide, Tail Swipe, 3 Hits
- Sky Drake: Lightning Breath, Wings, Claws, Bite, Thick Skin, Tail Swipe, 2 Hits
- Dire Wolf: Claws, Bite, Fast, Tracker, Thick Skin, 2 Hits
- Ogre: Pole Arm, Thick Skin, 2 Hits
- War Troll: Claws, Thick Skin, Heavy Armor, War Hammer, Regeneration, 3 Hits
- Cave Troll: Claws, Club, Thick Skin, Hide, 2 Hits
- Hill Giant: Spear, Thick Skin, Giant Strength, Thrown Boulder, 3 Hits
- Stone Giant: Club, Tough Hide, Giant Stomp, Thrown Boulder, 3 Hits
- Frost Giant: Battle Axe, Tough Hide, Giant Stomp, Thrown Boulder, 4 Hits
- Fire Giant: Bow & Arrows, Tough Hide, Giant Stomp, 4 Hits
- Storm Giant: Mace, Tough Hide, Giant Stomp, Lightning Attack, 5 Hits

- Skeleton: Skeletal Form, Undead
- Ghost: Spirit Form, Undead, Death Touch
- Zombie: Regeneration, Undead, Bite
- Djinn: Elemental Form, Flying, Mage, Scimitar, 2 Hits
- Golem: Elemental Form, Hard Shell, 3 Hits
- Vampire: Flying, Claws, Bite, Drain, Regeneration, Undead, 2 Hits
- Hydra: Multi-Attack, Regeneration, Fire Breath, Bite, 3 Hits
- Minotaur: Horns, Battle Axe, 2 Hits
- Medusa: Petrify
- Naga: Light Armor, Bow & Arrows, Tail Swipe, Poison
- Chimera: Horns, Bite, Claws, Wings, 2 Hits
- Manticore: Claws, Bite, Poison, Wings, 2 Hits
- Unicorn: Horn, Fast, Kick, Cure and Bless Spells
- Pegasus: Wings, Kick
- Griffon: Wings, Claws, Bite, 2 Hits
- Cockatrice: Wings, Thick Skin, Petrify
- Siren: Music, Charm, Bite
- Harpy: Screech, Wings, Claws
- Sphinx: Trickery, Claws, Wings, 3 Hits
- Banshee: Spirit Form, Screech, Undead, Death Touch
- Earth Elemental: Elemental Form, Hard Shell, 2 Hits
- Fire Elemental: Elemental Form, Fire Attack, 2 Hits
- Air Elemental: Elemental Form, Air Attack, Flying, 2 Hits
- Water Elemental: Elemental Form, Water Attack, Regeneration, 2 Hits
- Phantasm: Charm, Flying
- Guardian Angel: Wings, Sword, Shield, Angelic, 2 Hits
- Lemures: Swarm, Bite, Martyr, Infernal
- Imps: Wings, Slings, Small, Taunt, Infernal
- Lesser Devil: Wings, Whip, Fork, Infernal
- Succubus: Wings, Whip, Charm, Infernal
- Greater Demon: Claws, Bite, Horns, Fire Attack, 2 Hits, Infernal
- Ice Demon: Claws, Freeze Attack, Thick Skin, 2

- Hits, Infernal
- Demon Lord: Claws, Wings, Leader, Sword, Fire Attack, 4 Hits, Infernal
- Lich: Undead, Regeneration, Claws, Necromancer, 2 Hits
- Insect Swarm: Swarm, Wings, Poison, 2 Hits
- Rat Swarm: Swarm, Bite, Claws, 2 Hits
- Bat Swarm: Swarm, Wings, Bite, 2 Hits
- Bear: Claws, Bite, Heavy Armor, 2 Hits
- Boar: Fast, Tusks
- Frog: Harmless, Small, Slow
- Giant Spider: Bite, Poison, Web
- War Elephant: Trample, Tusks, Thick Skin, 3 Hits
- Sprites: Fey, Wings, Small, Trickery
- Fairies: Fey, Wings, Small, Taunt
- Redcaps: Fey, Dagger, Small, Surprise
- Nymphs: Fey, Charm, Claws
- Dryads: Fey, Fast
- Fairy Queen: Fey, Leader, Druid, Wings
- Sylvan Elves: Fey, Bow & Arrows
- Wisp: Fey, Spirit Form, Charm
- Beholder: Flying, Mage, 2 Hits
- Mind Flayer: Drain, Mesmer, Mage
- Centaur: Fast, Kick, Bow & Arrows or Club, 2 Hits
- Phoenix: Wings, Fire Attack, Regeneration, 2 Hits
- Armored Warhorse: Kick, Fast, Heavy Armor
- Satyr: Music, Kick
- Amazons: Charm, Bows & Arrows or Spear
- Barbarian: Berserk, Axe or Battle Axe
- Ranger: Elite, Tracker, Bow & Arrows, Sword
- Gnome: Blunderbuss, Small, Light Armor
- Cyclops: Club, Bite, 3 Hits
- Lion: Claws, Bite, Leader, 2 Hits
- Tiger: Claws, Bite, Stalk, 2 Hits
- Panther: Claws, Bite, Pounce
- Gorilla: Claws, Bite, Thick Skin, 2 Hits
- Rhino: Horn, Tough Hide, Trample, 2 Hits
- Snake: Bite, Poison, Stealth, Slow
- Eagle: Claws, Wings
- Gargoyle: Claws, Wings, Taunt, Hard Shell, 2 Hits
- Iron Golem: Slow, Giant Strength, Hard Shell, 3 Hits
- Treant: Tough Hide, Claws, 3 Hits
- Pack of Hounds: Swarm, Fast, Bite
- Titan: Lightning Attack, Giant Stomp, Heavy Armor, 6 Hits
- Chaos Monster: Tentacles, Bite, Regeneration, 4 Hits
- Death Knight: Undead, Heavy Armor, Skeletal Form, Leader, Great Sword
- Paladin: Heavy Armor, Sword, Shield, Horse, Lance, Elite, Priest
- Bard: Music, Sword, Charm, Horse
- Halfling Burglar: Small, Stealth, Sword, Dagger, Light Armor
- Assassin: Dagger, Stealth, Poison, Lethal
- Bodyguard: Sword, Martyr, Elite, 1 Fate, Light Armor

- Duelist: Sword, Main Gauche, Elite, 1 Skill, Dual Wield
- Tactician: Tactics, Leadership, Sword
- Goblin Grenadier: Small, Grenade (Range = 2), Dagger
- Goblin Kite: Flying, Bomb (Straight Down: Range = 0)
- Dwarven Demolition Team: Bomb (Range = 1), Sword
- Dwarven Miner: Hammer and Pick
- Dwarven Mortar: Shell (Range = 3), Slow, Crew, 3 Hits
- Dwarf Giant Slayer: War Hammer, Slay Giant, Elite
- Imperial Cannon: Cannon, Slow, Crew, 3 Hits
- Long Neck: Slow, Trample, Tail Swipe, Tough Hide, 4 Hits
- Mini-Raptors: Swarm, Bite, Claws, Fast
- Raptor: Fast, Bite, Claws
- Carnosaur: Fast, Bite, Tough Skin, 2 Hits
- T-Rex: Fast, Tough Hide, Bite, 3 Hits
- Pterodactyl: Wings, Claws
- Triceratops: Horns, Tough Hide, 3 Hits
- Stegosaur: Slow, Tail Swipe, Thick Skin, 2 Hits

Mounted Units

When attacking a Mounted Unit, there is a 50% the Mount will be targeted instead. This includes the Horse ability, which in this case, would mean the unit loses the Horse ability for the rest of the game unless somehow remounted.

Crew

Concerning Cannons, Catapults, Siege Engines, War Machines, and the like. These Units include a Crew of Operators. These functionaries are abstracted into the Units Stats as a whole.

Sample Magic Items

- Ring of Regeneration: Unit gets Regeneration
- Seven League Boots: Unit gets Fast
- Flying Disk: Unit gets Flying
- Vorpal Blade: (Sword) Unit gets Lethal
- Eldritch Blade: (Sword) Unit gets Mage
- Ancient Grimore: Unit gets Necromancer
- Flame Brand: (Sword) Unit gets Fire Attack
- Venom Dagger: Weapon has Poison
- Sword of Sharpness: May Use Red Card for Attack 1 (1-4)
- Rune Sword: (Great Sword) Unit gets Drain
- Cloak of Invisibility: Unit gets Invisibility
- Wand Of Fireballs: Cast Fireball Spell for just 1 Purple card
- Lightning Staff: Cast Lightning Bolt Spell for just 1 Purple card
- Dragon Slayer Spear: Unit gets Slay Dragons
- Goblin Bane: Unit gets Slay Goblins
- Ring of Power: Invisibility and Wielder draws 1 extra card per turn

- **Potion of Strength:** Unit can use Boulder and Stomp attacks for 4 Turns
- **Potion of Healing:** Single use Cure Spell
- **Horn of Blasting:** Unit can cast Earthquake Spell for just 1 Purple card
- **Shield of Blocking:** Unit immune to Non-Spell Ranged Attacks
- **Hammer of Crushing:** All its Attacks are Crush
- **Scroll of Protection:** Single Use Circle of Protection Spell
- **Magic Armor:** Unit gets +1 Hit
- **Crown of Command:** Unit can cast Control Mind Spell for just 1 Purple card
- **Rod of Ruin:** Unit can cast Earthquake Spell for just 1 Purple card
- **Mace of Disrupting:** Wielder gets -1 to Rolls to Attack and Stun with Mace
- **Yew Bow:** Increase Range of all Attacks by one
- **Arrows of Slaying:** 3 Uses: Slay All

Notes: Items can be handed off from 1 unit to another adjacent unit at either the beginning or end of the turn. Killed units can be looted at the end of the turn and Items retrieved.

- **HUMAN ARMIES**
- Humans are the only race with Priests.
- Humans have Horses. Other Armies rarely have them.
- Human Armies benefit from a high level of diversity, ingenuity, industriousness, cooperation, and aggressiveness.

This manifests as an extra 20% Gold when recruiting.

Dwarf Armies

Long lived Dwarves are very Tough. They can use Red Cards to Defend (1-3) All Dwarves will have Mithril Armor (Passive Defense). Dwarf Armies usually contain several Hero Warriors.

Very rarely they will have a Mage called a Rune Master. Dwarves have short Legs. Orange cards only provide a Move = 1.

High Elf Armies

Very long lived Elves are very skilled. Every High Elf Unit draws an extra card on their turn. Mages are common.

Forest Elf Armies

Every Forest Elf Unit has the traits Stealth and Hide. They favor Bows and Swords. Forest Elves rarely use siege engines, guns, or mechanical weapons.

They will have Druids and a few Mages.

Dark Elf Armies

These Degenerate Elves rely heavily on Mages and Magic Items. They will have whole Squads equipped with Flying Discs and Fireball Wands.

Orc Armies

Orcs are Ferocious and have a ton of Endurance.

- Red cards allow a Move of 1 or 2.
- Green cards defend on a roll of 1-4.
- Yellow cards hit on a roll of 1-4.

Orcs employ Shamans and occasionally Necromancers but are always led by a Heroic War Chief. Orc Armies will often include Ogres, Trolls, and other Monsters.

Goblin Armies

Goblins are Small and Weak.

- Green cards only defend on a roll of 1-2.
- Yellow cards only hit on a roll of 1-2.

They are numerous. Every Unit actually represents several Goblins. They cannot lift Pikes, Battle Axes, or Great Swords. Some Tribes ride Boars or Dire wolves into battle.

Goblins will have Shamans and Mages Every Unit will have either the Swarm, Poison, Ambush, or Trickery Trait.

Undead Armies

Led by a Necromancer or Lich. These will usually be an eclectic mix of undead including skeletal versions of other Monster types such as Dragons and Giants.

Lizard Man Armies

Lizard Men use primitive weapons: Clubs, Spears, Javelins, Bolas, Nets. Their Scaly Hide lets them use Orange cards to Defend (1-3). Lizard Men have Shamans.

They have domesticated Dinosaurs and use them as Mounts.

Dragon Men Armies

Dragon Men prefer Swords and Great Swords They will wear Heavy armor in addition to their Scaly Hides. Their Scaly Hide lets them use Orange cards to Defend (1-3). They have supporting Mages.

They worship Dragon Gods and will often have Drakes in their Ranks and will use Ground Drakes as Mounts.

Magical Armies

These will be led by a very powerful Mage. They will often have a very odd mix of Monsters.

Nature Armies

These will be led by a Druid. They will contain Forest dwelling Plant Creatures and Beasts such as Bears, Boars, Wolves, Centaurs, and Treants. They will occasionally have Fey as well.

Fey Armies

These will be commanded by a Fairy Queen. All Fey units have the Hide Ability. Their Arracks are weak, so they only hit on a roll of 1-2 with Yellow cards.

In addition to Fey units, there may be Gnomes, Goblins and Trolls as well.

Infernal Armies

These will be led by a Demon Lord and consist of all Infernal Units. Infernal Units when destroyed return to their plane of Origin. Because of this they have no sense of self Preservation.

Green cards provide no Defense. Instead use them for Attack 1 (1-3).

Giant Armies

Giants love a good Raid. They think its great Fun to terrorize the Countryside. There will be a mix of Giant

types with a Storm Giant as Chief.

Recruiting Armies

Armies are created with gold. In general, a Unit costs 1 Gold per Hit it has. Armies are also limited by the number of Spell-casters they can have.

Typically, an Army can have 1 Spell-caster per 20 or less Gold.

Heroes

Heroes are exceptional Warriors or Spell-casters. They are often the Leaders of Armies. A Hero will have 1 or More Levels.

Hero Levels cost 1 Gold each when building Armies. Most Heroes max out at level 10 or less. For every Level a Hero has, roll once on the Hero Ability Table:

Hero Ability Table

1D6:	Ability:	Notes:
1	Durability	Hits +1
2	Skill	Draw +1 Card when Drawing
3	Fate	Reroll +1 Die-roll per Turn

1D6:	Ability:	Notes:
4	Relic	Gain 1 Magic Item
5	Special	Unique to this Hero
6	Reroll	

Special Hero Abilities

These can add a lot of personality to your Heroes. Some examples: > Special Mount: Drake, Unicorn, Pegasus

> Special Companions: Animals, Familiars, Bodyguards, Friends

> Special Skill: Leader, Dual Wield, Poison, Heal, Stealth, Trickery, Tactics

> Spell Like Ability useable by playing a single Purple card: Awe, Fear, etc.

> Improved Basic Card Effects: Red Cards can be used for Move 1 or 2,

Orange Cards can be Used to Defend (1-2), Blue cards can be used as Purple cards

- Robin Hood: 2 Hits, 4 Skill, Master Archer, Bow & Arrows, Leader, Ambush, Sword

Sample Scenario: Greeks

Greek Heroes vs Greek Monsters

Greek Hero Army

- Hercules: 5 Hits, 2 Skill, 2 Fate, Giant Strength, Demi-God, Bow & Arrows, Club
- Perseus: 2 Hits, 2 Skill, 2 Fate, Leader, Sword, Shield
- Icarus: 1 Skill, Wings, Dagger, Sling
- Theseus: 2 Hits, 2 Skill, 1 Fate, Stealth, Wit, Sword, Tactics, Bow & Arrows
- Bellerophon: 2 Skill, 1 Fate, Pegasus, Spear, Wit
- 6 Hoplites: Shield, Heavy Armor, Spear
- 4 Archers: Bow & Arrows, Dagger
- 2 Slingers: Sling, Sword

Greek Monster Army

- Medea: Mage, Charm, Dagger, 1 Skill, 1 Fate, Leader
- 1 Chimera, 1 Medusa, 1 Hydra, 1 Cyclops,
- 2 Centaurs with Bows & Arrows
- 8 Myrmidons: Sword, Shield, Light Armor

Sample Scenario: Japan

Japanese Army vs Japanese Monsters

Sample Hero Conversions

- Conan the Barbarian: 4 Hits, 3 Skill, 2 Fate, Stealth, Sword, Battle Axe
- Gandalf the Grey: 3 Hits, 2 Skill, 3 Fate, Mage, Priest, Druid, Staff, Sword
- Wizard of Earthsea: 2 Fate, Mage, Druid, Staff
- Elric of Melibone: 2 Hits, 2 Skill, 3 Fate, Mage, Runesword, Archer Companion
- Beast Master: 3 Hits, 2 Skill, 1 Fate, Sword, Panther and Eagle Companions, Trickery
- Master of the Hunt: 3 Hits, 1 Skill, 1 Fate, Tactics, Spear, Tracker, 3 Packs of Hounds
- Achilles: 2 Hits, 3 Skill, 2 Fate, Invulnerable, Sword, Shield, Spear
- Lancelot: 3 Hits, 3 Skill, 1 Fate, Heavy Armor, Sword, Shield, Horse, Lance

Japanese Army

- 1 Shogun: 2 Hits, 2 Skill, 1 Fate, Heavy Armor, Leader, Tactics, Elite, Sword
- 1 Wu Jen Sorcerer: Mage, Staff
- 1 Shukenja: Priest
- 4 Samurai: Heavy Armor, Elite, Horse, Bow & Arrows, Martyr, Sword
- 2 Warrior Monks: 1 Skill, Staff
- 1 Ninja: Stealth, Surprise, 1 Skill, Lethal, Sword, Trickery, Ambush
- 4 Bushi: Spear, Light Armor
- 4 Gunners: Harquebus, Light Armor
- 2 Signalers: Flag, Light Armor

Japanese Monster Army

- 1 Dark Lord: Necromancer, Staff
- 1 Ogre Magi: Mage, Pole-Arm, Giant Strength, 2 Hits
- 1 Typhoon Dragon: Wings, Claws, Bite, Wind Attack, Water Attack, 3 Hits
- 1 Oni: Infernal, Horns, Claws, Great Sword, Invisible, Flying, 3 Hits
- 2 Gaki: Spirit Form, Fire Attack
- 2 Kappa: Hard Shell, Claws, Bite
- 2 Ghouls: Undead, Bite, Berserk, Fast
- 2 Hopping Vampires: Undead, Regenerate, Slow
- 6 Goblin-Rats: Swarm, Bite, Spears
- 1 Tengu: Wings, Sword, Mage, Elite

Warrior Races Of Mars

Introduction

Wargame. Set piece battles. Simulates battles between the six main warrior races of Mars during the Era of Discontent. During this turbulent period, factions of all races fought with and against each other.

Welcome to Mars.

Map

Use a hex map. Before the battle determine the terrain type in all of the hexes.

Hex Terrain Type

D10	TYPE	NOTES
1-3	Barren	
4-6	Impassable	Units cannot move into or through these spaces
7-9	Beneficial	Roll on Beneficial terrain type table
10	Settlement	Roll on Settlement type table

Beneficial Terrain Type Table

D10	TYPE	NOTES
1	Flats	Units in this terrain get +1 Speed
2	Forest	Units in this terrain get +1 Small Arms
3	Swamp	Units in this terrain get +1 Surprise
4	Hills	Units in this terrain get +1 Hand to Hand
5	Caves	Units in this terrain get +1 Armor
6	Mountains	Units in this terrain get +1 Artillery
7	Jungles	Units in this terrain get +1 Numbers
8	Psionics	Units in this terrain get +1 Psionics
9	Desert	Units in this terrain get +1 Morale
10	Settlement	Roll on Settlement type table

Settlement Type Table

D10	TYPE	NOTES
1	Fortifications	Units in this hex get +5 Armor, +2 Artillery
2	Dojo	All of your units get +1 Hand to Hand
3	Vehicle Factory	All of your units get +1 Speed & Armor
4	Weapons Factory	All of your units get +1 Small arms & Artillery
5	Training Grounds	All of your units get +1 Surprise & Morale
6-7	Farms	All of your units get +1 Numbers
8	Temple	All of your units get +1 Psionics
9	City	Recruit units during Initiative Phase
10	Ruins	Units in this hex get +1 to a random attribute

Notes: Use the Race Determination Table to figure out the race of a city. Some settlements give an attribute bonus to all of your warbands in play. These settlements must be occupied to get the bonus. Otherwise they become neutral.

Units & Chits

There are two basic unit types: Warbands & Leaders. Units are represented by cardboard counters called chits. The color of the chit corresponds to the race of the unit.

Leader units are marked with an "L".

Green Martian Warbands

The Green martians are tall, 4-armed, fierce, desert nomads. Their 4 arms & great strength make them powerful swordsmen. They are few in number due to dueling & interclan warfare.

They are expert marksmen. They are masters of tactics and surprise. Their technology is poor.

They use animal mounts and have little use for artillery. They do not fear death.

Red Martian Warbands

The red martians are technologically advanced. They rely on great hovering battleships. Their vessels are heavily armored & bristling with artillery.

Individually they are not impressive fighters without their ships.

White Martian Warbands

The white martians are a spartan, honor-bound race of warrior-monks. Many of the females are also warriors & do not bear children. Their technology is very poor.

Their small arms consist of bows & thrown weapons. They are disciples of the sword. Armor & artillery are not honorable.

It is very honorable to die in battle. Their meditation & training have awakened psychic powers in some.

Blue Martian Warbands

The blue martians are born psychics & telepaths. They are tall with large, translucent brain cases. They

mature slowly & can have few children due to difficult labors.

Their technology is extremely poor. Their attacks & defenses are psychic. They use their powers to gain surprise with illusions & invisibility.

They travel by levitation & teleportation.

Yellow Martian Warbands

The barbaric yellow martians are primitive but industrious tribes. They breed in great numbers. They are eager to fight but will flee at the first sign of trouble.

Some gifted shamans have psychic powers. Their hordes are well armed with spears & axes. Their small arms consist of bows & thrown weapons.

Their artillery consists of giant catapults. They have some knowledge of gunpowder, steam power, & rocketry. They get around on a variety of animal mounts & war machines.

Black Martian Warbands

The black martians are clawed, egg-laying, subterranean dwellers. Their bodies are covered with a hard exoskeleton. Their technology is relatively high.

They have special vehicles that can tunnel through the earth. They use this ability to surprise their opponents. Prisoners are slowly eaten alive.

Attributes

Warbands have 9 attributes: Speed, Small Arms, Surprise, Hand to Hand, Armor, Artillery, Numbers, Psionics, and Morale. All of these attributes have a numerical value between 0-6+ Notice each type of warband has 24 points worth of Attributes.

Martian Warband Attribute Table

ATTRIBUTE	Green	Red	White	Blue	Yellow	Black
Speed	3	4	3	5	3	1
Small Arms	5	3	2	1	2	3
Surprise	4	1	3	6	3	4
Hand to Hand	5	2	6	1	4	3

Turn Sequence

- Initiative Phase
- High Initiative Move Phase
- High Initiative Battle Phase
- Low Initiative Move Phase
- Low Initiative Battle Phase

Initiative Phase

Each player rolls 1D10 & adds the number of leaders they control. Reroll ties. The highest total takes his Move & Battle phases first.

The next highest takes his phases second & so on. Each player rolls 1D10 for every City they occupy. A roll of 1 recruits a fresh warband of the same race as the city.

Movement Phase

Roll 1D10 per 10 Units you control rounding up. Add to this the number of leaders you control. The total is your Command Points.

Spend one command point to move one of your warbands one space. Any command points left are wasted. They cannot be saved. You may stack 2 or more of your warbands together in the same space.

Only one stack per hex. Your warbands cannot enter or pass through spaces occupied by enemy units. Your units cannot enter or pass through impassable terrain spaces.

A single warband can move a maximum of 3 spaces in one turn. Leader units can piggyback with one warband unit per turn. Leaders must be attached to a warband.

A warband may have more than one leader attached. They can attach to any Warband in a stack. Leaders cannot move on their own.

Battle Phase

A Warband may attack an enemy warband in an adjacent hex. Only the warbands on the top of a stack can attack or be attacked. The order in the stack may be rearranged by its owner.

Roll D10 on the Random Attribute Determination Table. This attribute is the key factor that determines who wins the battle. The Warband that has the higher score in that attribute wins.

The other warband is destroyed. If both have equal scores than both are destroyed. A warband can only attack once per turn.

If a attacking warband is destroyed, the next warband in the stack may attack.

Sample Combat

A Blue warband attacks An adjacent White warband The Attribute roll indicates Hand to Hand. Blue has 1, White has 6. Blue is slain. There is a Yellow warband stacked beneath the Blue. Yellow attacks White. The key attribute is Artillery.

Yellow has 2 and White 0. White is destroyed.

Leaders

Each leader has a special ability. Determine the special ability at the beginning of the game. Roll once on the Random Attribute Determination Table.

All Warbands stacked with that leader get +5 in that attribute. If two or more leaders are in the same hex, only one may contribute his bonus to the stack that battle phase. The choice of which leader is in charge is made before the key attribute is randomly determined.

If all the warbands in a stack are destroyed then all the leaders are too.

Scenario Setup

- In a 2 Player Game each player gets: 5 Leaders & 10 Warbands from 3 different races.
- In a 3 Player Game each player gets: 4 Leaders & 10 Warbands from 2 different races.
- In a 4 Player Game each player gets: 2 Leaders & 8 Warbands from 2 different races.

Players setup up on opposite sides or corners within 3 hexes of the edge of the map.

Victory

Either occupy several key locations such as settlements or destroy the enemy completely.

Variant Warbands

The Attribute stats listed for the different races describe the basic warband. From 1 to 6 points may be shifted to create variant warbands.

For example:

- Red Commandos: Armor -4, Artillery -2, Surprise +2, Small arms +2,
- Hand to Hand +2
- Yellow Wasp Riders: Speed +2, Numbers -2
- Blue Mob: Numbers +2, Surprise -2
- Black Warlocks: Psionics +3, Morale +2, Armor

-2, Artillery -3

- Green Beetle Tanks: Armor +2, Artillery +3, Speed +1, Hand to Hand -4,
- Small arms -2 The variant type of Warband must be indicated on the chit. Other martian races exist on other continents. When designing scenarios, all units are worth one Recruit Point each.

Water Gun Fight

Introduction

Card game for 2+ players. Each player controls a group of Kids with Water guns.

Winning

The first player to soak 10 opposing Kids is the winner.

Water Drops

Use blue glass beads to represent water drops.

The Deck

Players share a common deck.

Dice

Six sided dice are needed.

Setup

Players roll 1D6. High roll goes first.

Capacity

This is how much Water Drops a Water Gun can hold.

Volume

This is how many Water Drops a Water Gun can shoot in one attack.

Hits

This is how wet a Kid can get before he is "Soaked": A kid with Water Drops on him = to his Hits is considered to be Soaked.

Filled-up

A Water Gun that is filled up will have Water Drops placed on it equal to its Capacity. A Water gun with no water drops on it is said to be Empty.

Turn Sequence

Players take turns. Each turn has 5 Phases.

- Refill Phase
- Draw Phase
- Recruit Phase
- Soak Phase
- End Phase

Refill Phase

A Kid who is Empty or Soaked has retreated and cannot Attack or be the target of attacks. A Soaked Kid Returns to play on a roll of 5 or greater on 1D6. This is called the Dry-off Roll.

Remove all water drops from the Kid. A Kid who is on Empty Returns to play on a roll of 5 or greater on 1D6 This is called the refill Roll. Fill the Water Gun with Water Drops to its Capacity.

Draw Phase

Draw 2 cards. If the Deck runs out shuffle the discard and draw from it.

Recruit Phase

You may put Kid cards from your hand into play under your control. Place them face up in front of you. You may attach a Water gun to each Kid.

A Kid may have a Max of 1 Water gun attached. A Water gun just put into play will be filled-up.

Soak Phase

Your Kids may attack. Only Kids who are not Soaked and have a loaded Water Gun may attack. Remove the Shot Water Drops from the Gun equal to the Guns Volume.

To attack, roll 1D6 and add the Volume of the Water Gun. This is the Attack Roll. If the modified result is 6 or higher, the attack hits.

If it is a hit put the Shot Water Drops on the Target Kid.

End Phase

Max hand size is 5 cards. Discard excess cards.

Water Balloons

Use Tokens to represent Water Balloons A Water Balloon hits on a roll of 5+ on 1D6. If hit by a Water Balloon, a Kid will get 1D6 Water Drops.

Card List Notation

Number of Copies of Card in Deck

W Water Gun**K** Kid**H** Hits**C** Capacity**V** Volume**M** Modifier = Attach this card to a Water Gun just put in play**E** Event**Min** Cannot be attached to kids with 5 or more Hits**Max** Cannot be attached to kids with 4 or less Hits

Switch Sides	E	Take control of Target Kid
Water Balloon Lob	E	Distribute 1D6 Water Balloons to your Kids
Water Balloon Fling	E	Distribute 1D6 Water Balloons to your Kids
Water Balloon Hurl	E	Distribute 1D6 Water Balloons to your Kids
Half Filled	E	Remove 1D6 Water Drops from Target Gun
Wild Shots	E	Remove 1D6 Water Drops from Target Gun
Water Waster	E	Remove 1D6 Water Drops from Target Gun
Shot in the Back	E	Attack Roll gets +3
Water Bomb	E	Distribute 1D6 Water Balloons to your Kids
I Have A Plan	E	Draw 3 cards
Temporary Truce	E	No one may attack in their next attack phase
Garden Hose	E	Refill Roll +3
Submerged	E	Refill Roll +3
Towel Dry	E	Dry-off Roll +3
Spare Shirt	E	Dry-off Roll +3

Water World

Introduction

Board Game for 2-4 players. Each player is a Mariner trying to be the first to find dry land.

Disclaimer

Water World is a licensed, copyrighted property. This is merely a fan site.

Victory

Be the first player to arrive at dry land.

#	Space:
1	Trading Post
2	Water
3	Water
4	Salvage Site
5	Water
6	Water
7	Fishing Spot
8	Water
9	Water
10	Destination
11	Water
12	Water

Pawns

Each player has a pawn of a unique color. This represents the Mariner and all his possessions. Pawns move along the spaces of the game board.

Dice

Six sided dice are needed.

Fish Tokens

Players share a common pile of Tokens.

Ship Quality Tokens

Players share a common pile of Tokens.

Salvage Deck

Players share a common deck of Salvage cards. If the Deck ever runs out, shuffle the discard and draw from it.

Victory Requirements

You must possess a Good Ship (6 or more Ship Quality Tokens). You must have 2 of the 3 Navigation Aid Items (Compass, Sextant, Spyglass). You must have the Map or a paper copy of the map.

If you have all of that and you start your turn on the Destination Space, you win.

The Board

The board is a circular track of 24 spaces. Space #1 connects to Space #24.

#	Space:
13	Salvage Site
14	Water
15	Water
16	Fishing Spot
17	Water
18	Water
19	Trading Post
20	Water
21	Water
22	Fishing Spot
23	Water
24	Water

The Map

Not to be confused with the Board. Use a small shell as fetish to represent the Map. The Map is actually a young girl with a Map to dry land tattooed Upside-down and backwards on her back.

Smokers

Use a lighter as fetish to represent the Smokers. This is a fleet of pirates in possession of an oil tanker.

Inventory

Each player has his own inventory kept on the table in front of him. This includes his Ship Quality Tokens (SQT), Fish Tokens, and Salvage Cards. The Maximum number of SQT you can have is 6.

The max number of Fish Tokens and Salvage Cards you can carry is equal to $2 + 3X$ where X is your SQT (so a level 6 Ship could carry 20 Items). Immediately discard excess items you cannot carry.

Setup

Each player gets 1 Pawn and 1 Ship Quality Token. The Map starts on one of the Trading Posts. The Smokers start on one of the Scavenge Sites.

The Player pawns start on the remaining Fishing Spots and Trading Posts. Players roll high to see who goes first.

Turn Sequence

Players take turns. Play proceeds clockwise. Roll 1D6 and move that many spaces in either direction.

(you must move, you cannot stay in the same space) If you land on a space containing the Map, you immediately take Possession of it, even if another player had it.

Ship Quality Chart

SQT	Max Move	Notes:
1	3	Raft
2-3	4	Dinghy
4-5	5	Sail Boat
6+	6	Custom Catamaran

SQT Ship Quality Tokens

Max Move = When moving, if the result is greater than this, reroll.

Trading Post Spaces

If you land on a Trading Post Space roll 1D6: if the result is a 1 then they attack you. If attacked you may give them a Book to immediately negate the attack. Otherwise roll 1D6. (Add 2 if you have a Gun and Ammo or 1 if you have a spear-gun) If this is 4 or more, then you escape: Move 1 Space.

If the roll is less, then they imprison you: You lose all your items And miss your next turn. However, you escape the following turn in your ship. If you had the Map, it remains unclaimed at the Trading Post. If they don't attack you then: Flip over the Top 3 cards of the Salvage Deck.

If you have a Woman, flip over the top 4 cards. You may trade your cards for these cards on a 1 to 1 basis. You may also trade Fish Tokens for the offered Salvage cards also on a 1 to 1 basis.

Fishing Spot Spaces

If you land on a Fishing Spot Space roll once on the Fishing Table.

Fishing Table

1D6	Catch:
1-2	Nothing
3-5	Gain 1 Fishing Token
6+	Gain 2 Fishing Tokens

Add 1 to your roll if you have a Harpoon or Spear-gun Add 1 to your roll if you have a Net

Salvage Site Spaces

If you land on a Salvage Site Space draw the top card of the Salvage Deck and Add it to your inventory.

Destination Space

If you land on the Destination Space, immediately roll on the Hazard Table.

Water Spaces

If you land on a Water Space roll 1D6: if the result is a 1 then roll on the Hazard Table

Hazard Table

1D6	Hazard:
1-3	Thirst
4	Smoker Ambush
5	Sail Boat
6	Storm

Thirst

If you have a Freshwater Item (Still or Bottle) nothing happens. If you don't you automatically lose 1 Fish Token or 1 Food Item (Plant or Seaweed). If you have none, then you miss your next turn.

Smoker Ambush

Immediately move the Smoker Fetish to your space. Treat as a regular smoker encounter.

Sail Boat

Treat this exactly like a Trading post except that they only have 2 Items to trade.

Storm

You miss your next turn and you lose 1D6 Ship Quality Tokens (Minimum of 1).

End Of Turn

At the end of your turn move the Smoker Fetish 2D6 Spaces in a random direction. If they land on a pawn (including yours) they attack it. If they land on a space containing multiple pawns, everyone gets attacked.

If they land on a Trading Post Space, they pillage it. That Trading post cannot do Any more trades for another 1D6 turns.

Ship Upgrades

At the end of your turn, if you weren't attacked or in a Storm this turn, You may upgrade your ship: Discard Material Items (Rope, Fabric, Wood, Metal) to gain Ship Quality Tokens on a 2 to 1 Basis. If you have Tools this becomes a 1 to 1 Basis. The Maximum number of Ship Quality Tokens you can have is 6.

Smoker Attacks

If the Smoker Fetish lands on you, (or you land on them) they attack. If you have a Motor and discard a Fuel Item, you Automatically escape: Move 1 Space. Otherwise roll 2D6. If this is equal to or lower than your Ship Quality (Plus 2 if You have a gun and Ammo. Another +1 if you have a Harpoon), then you escape: Move 1 Space. If the roll is higher, then they destroy your ship and imprison you: You lose all your items and miss your next turn. However, you escape the following turn in a replacement ship with 1 Quality Token.

Card	Notes:
Dirt	Trade Item
Plant	Food
Seaweed	Food
Paper	Make Copy of Map
Net	Aids Fishing
Spear-gun	Aids Fishing and Weapon
Harpoon	Aids Fishing and Weapon
Gun	Weapon
Ammo	Weapon
Wood	Material
Metal	Material
Rope	Material
Fabric	Material

If you had the Map it is moved to an empty Trading Post or Salvage Site. If the roll is greater, you escape: Move 1 Space.

Getting Around

On your turn, you may modify your Movement roll. If you have a Motor and a Fuel Card, you move 1 extra space. If you have any Navigation Aid (Compass, Sextant, Spyglass) you May decrease your move by 1 space (to a minimum of 1).

Copy Of The Map

If you have the Map and Paper you immediately make a copy of the map. If you lose the Map, you still have the Copy as long as you have the paper.

Salvage Deck Card List

The Deck contains 2 copies of each card listed.

Card	Notes:
Still	Fresh Water
Bottles	Fresh Water
Book	Negate Trader Attack
Motor	Speed and Escape Smokers
Oil	Fuel
Gasoline	Fuel
Alcohol	Fuel
Tools	Aids Ship Upgrades
Woman	Aids Trading
Compass	Navigation Aid
Sextant	Navigation Aid
Spyglass	Navigation Aid

Way Of The Warrior

by *Gottardo Zancani*
(zak965@libero.it)

The Way of the Warrior (WotW) is a solo system to simulate small tactical war operations. Is not aimed at a specific period: the base version of the rules is set on WWII but is quite easy to introduce new periods/themes.

Campaign Setup

Select one of the available nationalities for your units if this is the first mission: German, US, Russian, Italian and Finland are available for the WWII. Select one theatre of the operations in the (Theatre of Operations) Table where your nationality is present and use the other nationality specified in the in the table for the enemy forces.

Game Sequence

The basic flow of the game is the following:

- Mission briefing: determine the objectives of the mission
 - Equipment: choose your team
 - Mission:
 - * Event determination
 - * Encounter phase
 - * Advance to next zone
 - Post-mission debriefing: experience gain
- MIS-
SION BRIEFING Description: each mission has a final objective that must be reached; the approach to the objective is made of a serie of steps that must be followed. With the exception of the last step of the mission (the real objective) you will roll for every step to determine the enemy forces (if any) present: the last step of the mission has always a fixed enemy force.

Target approach: create 3+1D3 mission steps by rolling 2D6 in the (Steps Table). Each row will list a serie of steps that must be crossed over: write each step in the (Mission Track).

Objective: roll 2D6 in the (Objective Table) to determine the mission objective. Write the objective steps in the (Mission Track). In the (Objective Table) you will also find the Enemy Forces for the last step: write the Enemy Forces for your current mission in the (Mission Track) in the last step row.

Equipment

Description: select your men or re-equip your exist-
ing team members.

If this is the first mission then (Team Table) relative to your nationality will specify how many CP you have

at your disposal. You must select at least 3 men in the (Team Table) using these CP (unused CP can be save for later use); the max team size is given in the (Team Table). Every man is described in terms of Quality, CP cost and weapon. Every soldier has also 4 grenades.

If you've already played a mission then you have 2CP available (1CP if you've aborted the last mission) to select some reinforcements, plus any saved CP; the max team size is still the one given in the (Team Table). You can freely change weapon for Veteran/Private while Green must use their starting weapon. You can give to a new member a Medical expertise (used to treat the wounded soldiers) by adding 1/2CP (depending on the nationality) to the base cost.

Range

The Encounter phase you will be acting in one of the three possible ranges: Short, Medium, Long. You can change the range during the Movement sub-phase: the range level can be incremented/decremented of one level. Every weapon provide a Fire Factor depending on the range: the (Weapon List) table specify the Short/Medium/Long range FF.

Cover

Every step in the (Event Table) include a column when you will find the cover (if any) offered by the relative terrain; there are two cover types, light and heavy: depending on the cover any force (your team or the enemy) will receive a bonus in the fire phase, found in the (Fire Table) modifiers list. The last step of the mission, the objective, is always described in the (Objective Table): if the terrain of the objective is not present in the (Event Table) (like the Radio Station) you will find in the (Objective Table) the relative cover (if any) or a standard terrain to be used to lookup the cover.

Formation

Your team is normally on Column formation (road): when facing the enemy you can choose between Line formation or Open Order formation. Line formation make possible the creation of a Fire Group. Open Order formation gives your men a positive modifier when fired at.

You can change formation during the movement sub-phase.

Mission

Mark in the Mission Track the current position of your Squad: step #1. The mission is over when the final step is free of enemies or if you abort it: if you abort a mission you won't get any experience points. Until you've reached and achieved the mission objective follow the sequence

1. Check the weather effects when applicable
2. If you're on the last step of the Mission Track then keep track of the final enemy forces and goto 5
3. Roll 2D6 in the Event table corresponding to the terrain of the current position in the Mission Track.
4. If no encounter is selected then go to 11, otherwise determine the enemy patrol composition in the (Patrol Table) and/or keep track of the enemy forces indicated in the Event Table.
5. Surprise Check: test morale for all men involved (including the enemy forces); Green that fail are pinned, others that fail suffer a +1 modifier for the fire on the next fire phase and cannot move.
6. Movement phase: your group can change formation or change range (only if ALL men can move); alternatively single soldiers can remove the Pinned status.
7. Fire Phase: all eligible soldiers can fire. If on Line formation you can create a Fire Group
8. Enemy Action phase.
9. Route phase: check morale (also for the enemy forces) if the group suffered a Kill result in this turn. Enemy units that fail will leave the field; any soldier of your team that fails is Pinned. A team member with Medical experience can treat a Wounded soldier in this phase.
10. If the enemy forces have been defeated goto 11, otherwise return to 6 and start a new turn.
11. Advance your position in the Mission Track and go back to 1.

Weather Effect

Some missions and/or theatre of operation will indicate if a special weather condition is applicable. In this case you must roll a dice in the (Weather Effect) table and apply the results.

Morale Test

To test the morale roll 1D6:

- Green have a morale of 3
- Private have a morale of 4
- Veteran have a morale of 5

If the roll is \leq to the soldier's morale the test is successful.

Fire Phase

In this phase your team can attack the enemy forces. Single soldiers can fire individually: if the team is in Line formation up to 3 men can create a Fire Group (please note that some weapons cannot be used on a

Fire Group). For a Fire Group add up the Fire Factors of all involved soldiers, otherwise use the FF of the soldier firing and then select a target. Roll a D6 and cross reference in the (Fire Table) the dice roll with the FF, considering all the modifiers that apply to the case. The final result is one of the following:

- NONE: no effect
- P: the target is Pinned. In the next Fire Phase this soldier won't be able to fire (will only recover the Pinned status).
- W: one man is wounded; a wounded soldier that suffers a second wound result is Killed.
- K: the target is killed.

Instead of firing a standard grenade you can deploy Smoke (remove one Grenade). Smoke will give some cover for the next 2 turns.

Enemy Action

If an enemy soldier is pinned remove this status. An enemy Patrol not in cover (light or heavy) will advance toward your team with a result of 1-2 on a D6 roll. If the enemy soldier has a Grenade it will use it as soon as possible.

If the enemy soldier has a Pistol roll 1D6: on a 1-4 result he'll use the weapon for an individual fire, with a result 5-6 he will join a fire group.

Enemy soldiers always form a Fire Group if possible. Select a random target in your Team and roll a D6. Apply the modifiers (if any) and determine the result in the Fire Table. In case of a Pinned result the soldier won't be able to fire in the next phase even if removes the Pinned status in the movement phase): mark this restriction in the Team roster.

Medical Treatment

A soldier with Medical experience can try to first aid a wounded team member; on a result of 1-4 on a D6 the treatment is successful: the selected character is still wounded (i.e. is Killed if newly wounded) but doesn't suffer the +2 roll modifier in the fire phase. Only one first aid attempt can be done on a single character. If the treatment is unsuccessful mark the wound as not curable (no more treatment attempts are possible).

Post-mission Debriefing

If you've aborted the mission skip this phase. Add 1 experience point (XP) to your team experience. Keep track of unused XP. The XP can be used to improve your team:

- 1XP: promote a Green to Private
- 2XP: promote a Private to Veteran
- 2XP: add -1 on the fire roll for a Veteran (max -1 for each soldier)

Optional Rule #1: Airborne Mission

At the beginning of the Mission Briefing roll 1d6: on a result of 1 the mission is airborne and you need

to add the Drop Steps of the (Airborne Mission) Table at the start of the Mission Track. For every row in the (Airborn Mission) add a number of steps in the (Mission Track) equal to the number marked in the # column. All the Drop steps have a special event column to be followed instead of using the standard (Event Table).

Optional Rule #2: Beachhead

At the beginning of the Mission Briefing roll 1d6: on a result of 1 the mission starts on a Beach Head and you need to add the BeachHead Steps of the (Beach-Head Mission) Table at the start of the Mission Track. For every row in the (BeachHead Mission) add a number of steps in the (Mission Track) equal to the number marked in the # column. All the BeachHead steps have a special event column to be followed instead of using the standard (Event Table).

Theatre Of Operation Table

Theatre	Nationality 1	Nationality 2	Notes
Russia 1943	German	Russian	-
Winter 1942 - Russia	German	Russian	Roll 1D6 at the start of each mission:
	-	-	1-2: clear weather
	-	-	3-5: snow
	-	-	6: blizzard
France 1944	German	US	
Sicily	1943	US	Italian
Finland 1940	Russian	Finland	Roll 1D6 at the start of each mission:
	-	-	1-5: clear weather
	-	-	6: snow

Airborne Mission

Drop Steps*	#	Event
High Altitude	1	9: Wind - Add 1 additional Regrouping Step
	-	10: Strong Wind - Add 1 additional Regrouping Step and repeat this step
Low Altitude	1D3	5: Wind - Add 1 additional Regrouping Step
	-	9-10: Enemy Fire - Roll 1D3 Fire attacks on the Fire Table on the
	-	column 6, ignoring the Pinned results
Landing	1	8-9: Enemy Fire - Roll 1D3 Fire attacks on the Fire Table on the column
	-	6, ignoring the Pinned results
	-	12: Wound - one random soldier is Wounded
Regrouping	1**	5: patrol - Rifle*(P) SMG(P)
	-	9: patrol - SMG*(P) SMG(G) (Short Range)
	-	Only 1d6-2 random men can fight the enemy forces

*Add all above steps in the Mission Track

**Keep track of how many Regrouping steps you

Optional Rule #3: Engineers

During the Equipment phase you can spend 2 additional CP to make one of your team members an Engineer (only one Engineer for each team). When using this optional rule any soldier using a Flame-thrower must be considered an Engineer (so you have to pay 2 additional CP to select it); an Engineer not using Flame-thrower can additionally be equipped with a Explosive Charge (10/-/-): the Explosive Charge cannot be used on a Fire Group and can only be deployed once.

If your team include an Engineer at the end of the Mission Briefing phase you can remove one step in the (Mission track) (except the last one of course); this represents the extra support in scouting and intelligence that the Engineer can provide.

need (depending on the Wind Event) on the left column if the Mission Track.

Beachhead Mission

BeachHead Steps*	#	Event
Landing Craft (LC)	1	2: LC hit - Roll 1 fire attack on the Fire Table on the column 6, ignoring the Pinned results
	-	3: Sand Bank - add 2 additional Shallow Water steps
	-	4: Sand Bank - add 1 additional Shallow Water step
	-	11: LC hit - Roll 1 fire attack on the Fire Table on the column 4, ignoring the Pinned results
	-	12: LC sunken - Roll 1 fire attack on the Fire Table on the column 3, ignoring the Pinned results and add 2 additional Shallow Water steps
	-	
	-	
Shallow Water	1	2: Safe corridor - skip next step
	-	10: Near miss - the team stops and wait. Repeat the step
	-	11: Enemy Fire - Roll 1D2 Fire attacks on the Fire Table on the column 3. Repeat the step if you get a Pinned result.
	-	12: Enemy Fire - Roll 1D2 Fire attacks on the Fire Table on the column 4. Repeat the step if you get a Pinned result.
Enemy Beach	D3+1	2: Safe corridor - skip next step
	-	3-5: Shell Hole - provide Light Cover in the next step
	-	8-9: Enemy position - Rifle*(P)
	-	10: Enemy position - Rifle*(P) SMG(P)
	-	11: Minefield
Regrouping	1	4: patrol - Rifle*(P) SMG(P)
	-	10: patrol - SMG*(P) SMG(G) (Short Range)

K one man is killed

W one man is wounded

P one man is pinned (and cannot attack in the next

phase)

Modifiers:

#	Descr
+1	Firer is a Green
+1	Fire Group contains at least one Green, unless a Veteran is also present
+1	If firer or member of a Fire Group failed the Surprise Check
+1	target is on light cover
+2	target is no heavy cover
+1	firer is moving (changing formation)
-1	target is moving (changing range or removing the Pinned marker)
+1	smoke at Short/Medium Range (not applicable to flame-thrower and mortar)
+2	smoke at Long Range Range (not applicable to flame-thrower and mortar)
+1	Open Order
-X	Personal experience modifier
+2	firer is pinned
+2	target is pinned
+2	firer or member of a Fire Group is wounded
-1	Target has a flame-thrower
-1	Pistol used in single fire
? col.	Weather effects

Patrol Table

2D6*	Patrol	Weapons
2	A small group of veterans	Rifle*(V) SMG(V) SMG(p)
3	A small group lead by a NCO	Rifle*(V) SMG(P) SMG(G)
4	Two engineers at work	FlameThrower(P) SMG(P)
5	A couple of soldiers	Rifle*(V) SMG(P)
6	A couple of soldiers	Rifle*(P) SMG(G)
7	A couple of soldiers	Rifle*(P) Rifle(P)
8	A couple of soldiers	Rifle(P) SMG*(P)
9	A couple of soldiers	Rifle(P) Rifle(G)
10	A couple of soldiers	SMG*(P) SMG(G)
11	A couple of recruits	Rifle*(G) SMG(G)
12	An officer with two recruits	Pistol(P) Rifle*(G) Rifle(G)
13+	None	-

Enemy forces are listed as Weapon(Quality). An asterisk near the Weapon means that the enemy has a Grenade. Replace the FlameThrower with a SMG*

if this weapon is not present in the Team table of the enemy forces. *Wheater can influence this roll.

Wh40k Squads

Introduction

Card game depicting WH40K combat at a man-to-man level.

Disclaimer

Warhammer 40000 is a copyrighted, licensed property. This is merely a fan site.

Victory

Run your opponents deck out of cards.

The Decks

Each player (race) has its own deck.

Dice

Six sided Dice are needed.

Setup

Players select their race (deck). (Same race fights are allowed: for example: Ork vs Ork) Each player draws 7 cards.

Turn Sequence

Turns are simultaneous. Each turn is divided into 7 Phases:

- Recruitment Phase
- Deployment Phase
- Long Range Phase
- Medium Range Phase
- Short Range Phase
- Close Combat Phase
- Recovery Phase

Recruitment Phase

Each player draws 2 cards. A Player who has no cards left to draw loses the game. (Discarded cards do not go back to the draw pile)

Deployment Phase

Put Unit cards from your hand into play. Attach Attachment cards (weapons, equipment, etc.) from your hand onto Units that can use them.

Attack Limit Rule

Unless noted by a special rule or card, a unit may only make one attack per turn with one of its natural attacks or with an Attached Weapon card.

Attacking

The attacking Unit declares its target. A Target must be a unit in play. Units with long range weapons may target the enemy deck instead of Units in play.

A unit makes an attack by rolling 1D6 and comparing the roll to the Force level of the Weapon. If the roll is equal to or less than the Force level, the attack does damage equal to the roll. If there are no enemy units, you may target the opponent's deck.

For every point of damage a deck takes it must discard the top card. Attacks within a phase are simultaneous: All Units get to complete their attack even if they are killed.

Hits

Every Unit has a number of hits. If a Unit is reduced to zero hits, it is killed (discarded). Use Tokens placed on the Unit to keep track of Damage.

Long Range Phase

Units that are able make Long range attacks. These include support, sniper, and heavy weapons.

Medium Range Phase

Units that are able make Medium range attacks. This includes Rifles.

Short Range Phase

Units that are able make Short range attacks. This includes pistols and thrown grenades.

Close Combat Phase

Units that are able make Close Combat attacks. This includes Hand-to-Hand attacks.

Recovery Phase

A Healer Unit may remove all the Damage Tokens from one Unit in this Phase. Max hand is 7 cards. Discard excess cards.

Event Cards

Event cards produce a single event, like an attack, and are then discarded. Events that produce an attack by a Unit, not normally made by it, are an extra attack that turn in addition to the Units normal attack. (For example: The Ork Boyz may attack in CC or SR plus use a Stikkbomb card)

Attachment Cards

Attachment cards can either be attached to a Unit in Deploy Phase or be used like an Event card to produce a single Attack, and then be discarded.

Units In Close Combat

All Units are capable of some Close combat attack. The base Force of a Unit is its Force in Close Combat.

Dreadnaughts

Dreadnaughts can make 1 Close Combat attack and 1 attack with every weapon they have or that is attached. Dreadnaughts can only attach Heavy Weapons.

Card List Notation

Copies of that card in the Deck
U Unit cards
A Attachment cards
M Healer (Cannot heal Robots/Vehicles)
F Force
SR Short Range
MR Medium Range
LR Long Range
CC Close Combat

Warp Blast	2	E	-	5	LR Attack by Zoanthrope Only
Without Number	4	E	-	-	Shuffle any discarded Hit 1 cards back into deck

Notes

Tyrantid Deck by Jason Newell.

Wh40kards

Introduction

Two player Card Game based on the Games Workshop Epic Warhammer 40,000 Universe.

Cardsets!

Card Sets for WH40KARDS by Zak are available.

Disclaimer

Warhammer is a licenced, trademarked property. This is merely a Fansite.

Decks

Each player uses a separate deck. For example: Imperial Deck vs Ork Deck. Each deck has 1 of each card in its list.

Gear

Dice, paper, pencils, tokens.

Victory

The first player to have 30 hits worth of his own units destroyed breaks and leaves the field. Or 40 if you have a Command unit deployed. 50 if you have a Leader unit deployed.

If a player loses 3 turns in a row (has all his units in 3 turns destroyed) he breaks and routs.

Turn Sequence

Each turn has 10 phases:

- Logistics Phase
- Scout Phase
- Deploy Phase
- Maneuver Phase
- Titan Phase
- Insertion Phase
- Ranged Combat Phase
- Close Combat Phase
- End Phase

Logistics Phase

Each player fills his hand to 6 cards. If the deck runs out, shuffle the Discard & Casualty piles together, and draw from it.

Scout Phase

Players may discard up to 2 cards to their Reserve pile and draw replacement cards. A player may discard 3 cards if he has a Command unit deployed.

Deploy Phase

Each player must have 3 Unit cards deployed. (Left, Right, and Center) Deployed cards are placed face up on the table. Deployed units may be survivors from previous turns or just now deployed. If you already have 3 or more units deployed you may not deploy more.

Maneuver Phase

Add up the Move scores of your 3 deployed units. The player with the most Skimmer & Jump Jet units gets +2D6 to their Move score. The player with the higher score outflanks his opponent and may deploy an extra unit card of any type from his hand.

Titan Phase

If you deployed a Titan this turn you must roll on the corresponding systems tables. For example: A Great Gargant gets 4 rolls on the Gargant system table. These are the weapon systems the Titan has until it is destroyed.

A Titan can only have 1 of any type of system. Chaos Infantry roll once on the Chaos Gift Table when Deployed. Use scrap paper to keep track of Titan Systems & Gifts.

Insertion Phase

You may deploy any "Digger" or "Pod" or "Stealth" or "Teleport" units in your hand. For each unit with the "Carry" trait you may deploy an Infantry unit from your hand.

Psychic Phase

Psychic units get to roll once on the appropriate table to see what Power they can use this turn.

Ranged Combat Phase

In order of decreasing range units may attack. An attack targets any one deployed enemy unit. Roll XD6. X = the attacking units Attack Rating. Every roll of 1 causes 1 hit on the target.

Use tokens placed on the damaged unit to represent hits. Any unit reduced to 0 hits is destroyed.

Destroyed units are discarded to the owners casualty pile. Some units have a secondary attack: This is indicated by the notation of: (X/Y) in the Notes column where Range = X and Attack = Y.

Some attacks will automatically destroy a target* on a roll of 1-Z on 1D6: This is indicated by the notation of: (Z) in the Attack Column.

* Titans are not automatically destroyed: they take 1D6 hits.

Units with the "Split" trait may divide up their attack rolls against 2 targets. Units making Barrage attacks only cannot be attacked except by other Barrage units. All your units get +1 to their Attack score if a Command unit is deployed.

All your units get +2 to their Attack score if a Leader unit is deployed.

Close Combat Phase

All Close Combat attacks are simultaneous. An attack targets any one deployed enemy unit. Roll XD6. X = the attacking units Close Combat Rating.

Every roll of 1 causes 1 hit on the target. Use tokens placed on the damaged unit to represent hits Any unit reduced to 0 hits is destroyed. Destroyed units are discarded to the owners casualty pile.

Repeat the Close Combat Phase until one side is wiped out. All your units get +1 to their Close Combat Rating if a Command unit is deployed. All your units get +2 to their Close Combat Rating if a Leader unit is

deployed.

End Phase

All units with the Regeneration ability repair 1 Hit of Damage to themselves.

Unit Abbreviations List

I Infantry

V Vehicle

C Command

S Skimmer

D Digger

T Titan

L Leader

R Regenerates

Br Barrage

x Split: Unit may divide attack rolls against 2 targets. Carry = Unit has carry Ability Psychic = Attack is psychic in nature. Barrage = Indirect Fire (X/Y) = Secondary attack of Range = X and Attack = Y.

(Z) Attack automatically destroys target on a roll of 1-Z on 1D6.

2	Hallucinogens	Take control of Target enemy unit this turn
3	Pathogenic Slime	One Unit gets Attack +2 this turn
4	Energy Immunity	One Unit gets Hits +2 this turn
5	Overrun Assault	All Units get Close +2 this turn
6	Bio-Assassin	Target enemy unit gets 1 Damage Token
7	Regenerate	Remove 1D3 Damage Tokens
8	Adrenalin Surge	One unit gets Move +2 and Close +2 this turn
9	Chameleon	One Unit gets Hits +1 and Close +1 this turn
10	Overdrive	All Units get Move +2 this turn this turn

Notes: Roll once on this table at the end of Deploy Phase.

Game Designers Notes

I had to tone down the Titans a little bit (But not much!) Let me know about good Epic Links especially with stats I can convert.

Whale Hunters

Introduction

Card game for 2-4 players. Early 19th Century Whale Hunting Theme.

Scale

Each Player represents one Whaling Ship of European/American Identity. One Game represents one Whaling Season.

Game End

The Game ends when players have gone through the deck twice.

Victory

At the end of the game the player with the most Blubber Tokens wins.

Blubber Tokens

Use change to represent Blubber Tokens. Blubber Tokens represent all valuable parts of the Whale including Meat and Bone. Every time a player catches a Whale, he is awarded Blubber Tokens.

The Deck

Players share a common deck. There are 6 Card Types: Whale, Sea, Catch, Difficulty, Event, Modifier

Setup

Shuffle the Deck. The player with the most Blubber goes first.

Turn Sequence

Players take turns. Each turn has 4 Phases:

- Sail Phase
- Event Phase
- Hunt Phase
- Catch Phase

Card List

Card Name:	Type	Notes:
Sperm Whale	W	Worth 5 BT. 4 Copies of this card in Deck
Right Whale	W	Worth 4 BT. 4 Copies of this card in Deck

Sail Phase

Fill your hand to 7 cards. When the deck runs out the first time, shuffle the Discard and draw from it.

Event Phase

You may play (discard) 1 Event card in this Phase.

Hunt Phase

Discard 1 Catch card from your hand to go Hunting. (If you have no catch cards you get a Mulligan and the phase ends) To Hunt draw a random card from any opponents hand. (The player fans out the cards in his hand face down) If you draw a Whale card, you have caught a Whale of the indicated Type: Gain Blubber Tokens as stated on the card.

Any player may play a Modifier card to increase or decrease the value of the catch. If you draw a Difficulty card the Phase ends and you must Skip your next Turn. If you draw a Sea, Catch, Event, or Modifier card nothing happens.

Discard the Catch card you played and the card you drew. You may normally go hunting only once on your turn.

Catch Phase

If you got a Mulligan this turn, discard your entire hand. Fill your hand to 7 cards. Clarification: If you did not have a Mulligan, you do not discard your hand: Just fill your hand to 7 cards.

Profit	M	Whale Worth +1 BT
Big One	M	Whale Worth +1 BT

Optional Rules

Whaling Nations

Each player at the start of the game can choose 1 Nation. English: Good Sailors: When Hunting, the first Sea Card they draw in a Turn is discarded, and they may draw again. Dutch: Free Trade: Every Whale they catch is worth +1 BT.

Americans: Industrious: Get an extra Hunt Phase every turn. Norwegians: Whaling Nation: Hand Size = 8 cards. Basques: Traditional Expertise: When Hunting, if they draw a Catch Card they may keep it and put it in their hand.

Whale Hunters Solo Dice Version

Original 2 player dice game by Lloyd Krassner Adaption to solo play by Rob Dey

Intro

A whaling cruise from Nantucket to the south pacific. Game ends when boat and crew reach the south pacific or ship and/or crew is lost at sea. Voyage is profitable if BT is twice the original crew. Will you and your crew turn a profit or never return to tell your tales?

Set Up

- 1d4
- 1d6
- 1d8
- 1d20 Die result tables (below) tokens for keeping track of Hull, Rigging, Crew and cargo (Blubber Tokens ref to in doc as BT)

Ship and crew Determine your ship and crew strength as noted on the ship chart below. If any stat falls to Zero, your Ship sinks (hull) is dead in the water and you and crew starve (rigging) or the ship becomes derelict (crew)

The Cruise Each ground has two turns each. A turn starts with 1d6 roll. if result is 1, a d20 result is compared to the event chart for event resolution. A 1d6 of 2-3 is calm sailing allowing repairs. +1 to any rigging and hull damage. 5-6 is a whale sighting.

The hunt Apon sighting a whale, ID your target with a 1d4 on the Whale ID chart. Next Determine the Hunt

modifier with a 1d20 roll on the hunt modifier chart. Resolving the hunt is done with a 1d8 roll for whale strenght and a 1d10 roll for crew strenth, also adding the modifier where called for. Higher roll wins and kill, if made is scored. If tied, add to origional rolls 1d4 each. Repeat 1d4 until tie is broken.

Notes Cruise can be rearranged to suit your taste of home port or can be shortened by reducing number of hunting grounds. Also Whale can be changed to any other type of sea life as to better suit your taste

Ship

Name:

- Hull (1d20)
- Rigging (1d20)
- Crew (1d20)

Additional crew can be taken in first turn in port areas. Number taken is a 1d6 roll. Recruiting cost is 1 turn and total crew can not excede 20. Port areas are Nantucket, Brazil, Bay of Biscay and spitsbergen.

Hunting Route

- Nantucket
- Massachusetts Bay
- Carolinas
- Coastal Waters
- Gulf of Mexico
- Brazil
- West Indies
- Tropical Waters
- Cape Verde Islands
- Coast of Africa
- Bay of Biscay
- North Sea
- Atlantic Ocean
- Greenland Fishery
- Horn Sound
- Spitsbergen
- Arctic
- Beaufort Sea
- Guinea

- South Pacific

19	Whale strike	1d4 Hull damage
20	Illness	1d4 Crew

NOTE- Event rolls 9, 12, 14, 15 can be saved for later use at the cost of one turn per roll used

Where Eagles Dared

Introduction

Scenario for WarpQuest. WWII theme based on the movie "Where Eagles Dare" for the [Warpquest Core Rules](#) WarpQuest Core Rules.

Where Eagles Dare

Movie 1968.... Commandos, posing as German soldiers, parachute into the Bavarian Alps to rescue a supposed allied general from a Nazi hideaway fortress that can only be reached by cable car. Epic war pic where Richard Burton and Clint Eastwood manage to unmask most of the German spy network in England, slip Jerry the wrong plans for the second front, kill the leading members of the Abwehr in Southern Bavaria, and destroy half of the local Wehrmacht.

Disclaimer

Where Eagles Dare is a copyrighted property. This is merely a fan site.

Challenge Cards

Challenge Card:	Skill Test:	Notes:
Enemy	Fight or Escape	If you fail roll on the Failure Table
Search	Escape	If you fail roll on the Failure Table
Traitor	Intrigue	If you fail roll on the Failure Table
Travel	None	Move forward 1D6 spaces
Barrier	None	Miss next Turn (in a Solo game Go Back 1D6)
Progress	Intrigue	If you succeed draw 2 cards from the Aid Deck
Rescue	Fight	If you succeed gain back a Captured Man

Failure Table

1D6	Result:
1-2	Miss next Turn (or in a Solo game Go Back 1D6 Spaces)
3-4	One Man is Captured
5-6	One Man is Killed

If you failed a "Traitor" Challenge and the result is a Man captured or killed, the Man must not be one of the Traitors. On the way back, Traitor challenges become Fight skill checks, and if you succeed, 1 Traitor is killed. If you use Disguise Aid cards for an Escape attempt, you cannot also use other Escape cards.

The Map

Use a track 30 spaces long. The first 15 spaces are Module I- Alpine Wilderness The second 15 Spaces are

The Team

Each player starts in control of a Commando team of 7 Agents:

- 1 Major (+1 to Intrigue, +1 to Escape, +1 to Fight)
- 1 American Ranger Lieutenant (+1 to Escape, +1 to Fight)
- 2 Commandos
- 3 Traitors

Other Team Members will be gained during play. When a Man is lost, Commandos are killed first, then Traitors, then the others, last being the Major.

Moving Onto An Opponents Party

If your Pawn lands on an opponents, Both players make an Intrigue Skill Check, The loser must roll on the Failure table.

Setup

Each player is dealt 7 cards from the Aid Deck.

Module II- Castle of the Eagles (Schloss Adler) The start space is the Parachute Drop Zone. The end space represents the Interrogation sequence in the Main Dining Hall.

A Team must stop upon reaching this space and face 3 separate Challenges: Enemy Unit (Fighting), Traitor (Intrigue), and Search (Escape) For every failed skill test, roll on the Failure Table. The Team must then head back to the Start space, which is now a German Airfield where they will be extracted by a disguised plane.

Aid Card Deck

Card Name:	Notes:

Wildcat Soccer

Introduction

Card & Record-Keeping game for 2 players. Simulation of League Soccer game with team player ages 5-6. At this age there are no positions.

The game is divided into four periods each lasting 12 minutes. The Coaches are on the field directing traffic. The players often go the wrong way & need frequent water breaks.

No one really keeps score. All players get juice & chips at the end of the match.

Victory

Score the most Goals by the end of the game.

The Decks

There are 3 common Decks:

1. The Coach Deck (4 cards)
2. The Kids Deck (20 cards)
3. The Action Deck

The Action Deck

The Action deck has 6 card types:

- M** Movement (Used to set up a shot)
- P** Possession (Used to take control of the ball)
- G** Goal (Used to score a goal)
- B** Block (Used to negate a Goal card after it is played)
- S** Substitution (Used to cause target kid to be put on the Bench)
- O** Out (Used to Immediately End the Action Phase)
- L** Lost Opportunity (These cards do nothing)

Setup

Each player draws 1 Coach card and 10 Kid cards. (Or draw 2 Coaches - second one is the "Assistant" Coach) Put 5 of your kids on the field.

Rounds

The game is divided into Rounds. Each round is equal to 2 minutes. There are 6 rounds in a period.

Field & Bench

At all times: 5 of your kids will be on the Field. (Face up in line towards the center of the table) The other 5 will be on the Bench. (Face up in line closer to you)

Round Sequence

Each round is divided into 8 phases: Bench Phase Coach Phase Running Phase Control Phase Kicking Phase Defense Phase Possession Phase Action Phase

Bench Phase

In the first Bench phase of a New Period both players must switch all Kids currently on the Bench with all kids currently on the Field.

Coach Phase

Both players draw 6 Action cards.

Running Phase

Add up the Speed score of all your Kids on the Field. The side with the higher score gets to draw an extra Action card.

Control Phase

Add up the Control score of all your Kids on the Field. The side with the higher score gets to draw an extra Action card.

Kicking Phase

Add up the Kick score of all your Kids on the Field. The side with the higher score gets to draw an extra Action card.

Defense Phase

Add up the Defense score of all your Kids on the Field. The side with the higher score gets to draw an extra Action card.

Possession Phase

Players flip a coin to see who gets possession of the Ball.

Action Phase

Players take turns. The Player with Possession gets first turn. On your turn, you may play 1 Action card: You may play a Movement card only if you have Possession of the Ball.

If you don't currently possess the ball, you may play a Possession card to take possession of it. You may play a Goal card if you have possession of the ball and you played a Movement card on your last turn. If your

opponent played a Goal card last turn, you may play a Block card to negate it.

An unblocked Goal card scores a Goal. (Keep track of Goals) You may play a Substitution card to cause

a target kid to be put on the Bench. The other player immediately replaces him with another Kid from the Bench. You may play an Out card to Immediately End the Action Phase.

Action Deck Card List

Card Name:	Type	#
Kick	M	2
Pass	M	2
Good Control	M	2
Run	M	2
Turn It Around	P	1

Rony	3	3	3	3	Bushy Haired
Mike	2	3	1	2	Nerd
Grahm	2	4	3	3	Tall Geek

Coach Deck Card List

Name:	Notes:
Randy	All Kids get +1 to their Control Rating. (Drill, Drill, Drill)
Crawford	Can use Out cards as Block cards. (Kick it out Defensive Tactic)
Martinez	Can always Substitute 1 of his own kids in Bench Phase. (Makes Parents Mad)
Mickey	In Setup switch 2 Kids with opponent. (Maintains last years teams best players)

Notes

Be sure to name your team (Sharks, Strikers, etc.)
Uniform Color & Design too.

Wing Commander Fighters

Introduction

Board & card game for 2 players. Takes place in the Wing Commander Universe. Abstract skirmish level Fighter combat.

Each figure represents a single Fighter.

Disclaimer

'Wing Commander' is a copyrighted/trademarked property. This is just a fan site.

Victory

You win if you destroy the opposing Wing Commander.

Terran Confederation Fighter Table

Type	Hits	Move	Attacks	Turns
Hornet Light Fighter	2	4	1	2
Arrow Light Fighter	2	5	1	1
Rapier Medium Fighter	3	4	1	1
Hellcat Medium Fighter	3	3	1	2
Scimitar Medium Fighter	3	3	2	1
Raptor Heavy Fighter	4	3	2	1
Thunderbolt Heavy Fighter	5	2	2	1

Kilrathi Fighter Table

Type	Hits	Move	Attacks	Turns
Salthi Light Fighter	2	5	1	1
Darket Light Fighter	2	4	1	2
Dralthi Medium Fighter	3	4	1	1
Krant Medium Fighter	3	3	2	1
Strakha Medium Fighter	3	3	1	2
Gratha Heavy Fighter	4	3	2	1
Jalthi Heavy Fighter	5	2	2	1

Setup

Each player starts with 2 Heavy, 3 Medium and 3 Light Fighters. Designate one fighter to be your Wing Commander. Each player places one fighter on each square of his back row.

Fighters may not stack.

The Cards

Players share a common deck.

The Map

Use an 8x8 chessboard.

The Ships

Use chits or miniatures to represent Fighters.

Table Notation

Attacks = Maximum number of attacks fighter can make per turn.

Move Maximum range move card fighter can use.

Turns = Max number of Move cards fighter can use per turn.

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Orders Phase
2. Maneuver Phase
3. Fire Phase
4. End Phase

Orders Phase

Draw 5 cards. If the deck runs out, shuffle the discard and draw from it. Discard excess cards.

Maneuver Phase

Play (discard) a Move card to move one of your fighters. The move card has a number. This is the number of spaces the fighter moves.

Moves can be diagonal or orthogonal. Instead of moving just one fighter in any direction, you have the option of moving one or more fighters forward the indicated number of spaces using a single move card. You cannot move through enemy fighters.

Fire Phase

Play (discard) an Attack card to have a fighter attack. The attack card has a number. This is the range of the attack.

Attacks can be diagonal or orthogonal. You cannot attack through other fighters. Every attack does 1 point of damage.

Card List

Card Name:	#	Range	Type	Notes
Laser Cannons	4	3	A	
Neutron Gun	2	1	A	2 Points of Damage
Mass Driver Cannon	4	2	A	
Dumb-Fire Missile	4	4	A	
Heat Seeking Missile	3	5	A

500 kps	3	5	M	Or 3 and over 2
Kickstop	2	K	M	
Burnout	1	-	M	Ships Max Move +1
Fishhook	1	-	M	Ships Max Move -1
Corkscrew Roll	1	-	M	Move 4 and over 1
Tight Loop	1	-	M	Jump adjacent Fighter
Tail	2	-	X	Negate a Defense Maneuver Card
Hard Brake	2	-	D	Maneuver
Evasion	2	-	D	Maneuver
Shake	2	-	D	Maneuver: Light Ftr only
Armor	2	-	D	Med and Hvy Ftr only
Shields	2	-	D	Hvy Ftr only
Tactics	2	-	X	Draw 2 Cards
Critical Hit	2	-	X	Hit does 1 extra point of Damage
Pilot Special	8	-	X	See Pilot Profiles

Pilots

Assign each of your Fighters a Pilot from the Pilot Tables

Terran Pilots

Use Chits or coins to record damage. A fighter reduced to zero Hits is destroyed and removed from the board. Your opponent may play (discard) Defense cards to negate your attack.

End Phase

Max hand size = 5 cards. Discard excess cards.

Card List Notation

M Movement

A Attack

D Defense

X Special

K as a Knight would move in Chess

Type Purpose of card

Number of that card in the Deck.

Pilot Special Cards

Discard a Pilot Special card to use a pilots special ability.

Moniker	Ability
Spirit, Unstoppable Force	Attack: range = 1
Hunter, Loose Cannon	Move = 4
Bossman, Leader by Example	Defense (Maneuver)
Iceman, Ace of Aces	Attack: range = 3

Moniker	Ability
Angel, By the Book	Attack: range = 4
Maniac, New Kid	Move = K
Paladin, Professional Ace	Defense (Maneuver)
White Knight, Old Reliable	Attack: range = 2

Kilrathi Pilots

Moniker	Ability
Starkiller, Keen Competitor	Move = 3
Fang, Cold as Vacuum	Attack: range = 3

Wizard School

Introduction

Players are young apprentices at their first semester of Wizards school.

The Deck

Players share a common deck.

Fields Of Study

There are 6 fields of study that adepts accumulate lesson points in:

1. Divination
2. Conjunction
3. Alchemy
4. Transformation
5. Invocation
6. Extra Curricular Activities

End Of Game

The semester lasts 17 weeks. The game ends at the end of turn 17.

Winning

The player who, at the end of the game, has accumulated the most lesson points in the most Fields of Study is the winner. If there is a tie, then the tied player with the most lesson points wins.

Setup

Roll high on 1D6 to see who goes first. Players start with 2 cards in their hands.

Turn Sequence

Players take turns. Each turn has 5 phases:

1. Fates Phase
2. Study Phase
3. Cram Phase
4. Distractions Phase
5. Lessons Phase

Common Deck Card List

Fates Phase

Draw 2 cards. Max hand size is 9 cards. Discard excess cards. Spells that allow you to draw extra cards are played in this phase.

Study Phase

Roll 2D6. This is the Study roll: Gain that many Study points.

Cram Phase

You may play up to two cards that allow you to gain more study or lesson points. A Study card adds 1D6 Study Points. A Lesson card adds 1D6 Lesson Points to the indicated Field of Study.

You may play Experience cards on yourself. An experience card will cause you to gain 1D6 experience points but lose 1D6 Study Points.

Distractions Phase

The opponent to your right may play a card that causes you to lose study points. A Distraction card causes you to lose 1D6 Study Points. You play an Event card that negates the Distraction card.

Your opponent may play Experience cards on you. An experience card will cause you to gain 1D6 experience points but lose 1D6 Study Points.

Lessons Phase

Distribute Study points acquired this turn as evenly as possible to the: Divination, Conjunction, Alchemy, Transformation, and Invocation Fields of Study. Study points are converted into Lesson Points when they are distributed. Experience points are always applied to the Extra Curricular Activities Field of Study.

Keep a running total of your accumulated points for each Field of study.

Wizard Skirmish

Introduction

Board & card game for 2 players. Battle between two rival Wizards. Each figure represents a Wizard or a Summoned Creature.

Victory

Reduce the opposing Wizard to zero Hit Points.

The Map

Use an 8x8 chessboard.

Unit Table

Name:	Move	Hits	Dam	Notes
Wizard	1-2	12	1	Casts Spells; Not a Creature
Skeletons	1-2	1	1	
Zombies	1	2	1	Regenerate
Dwarves	1	2	1	
Kobolds	1	1	1	
Wolf	1-3	2	1	
Troll	1-2	3	1	Regenerate
Giant	1-4	3	2	
Iron Golem	1-2	4	2	
Dragon	1-5	4	2	Fly
Hydra	1	3	2	Regenerate
Vampire	1-4	2	2	Regenerate, Fly
Balrog	1-3	5	2	

Setup

Each Player starts with one Wizard unit. Players place their Wizards in opposite corners. Units may not stack.

The Cards

Players share a common Spell deck. The deck has 1 copy of each spell in the Spell List.

Casting Spells

There is no limit to the number of Spells you can cast per Turn or Phase. You can only summon creatures on your own Turn. You can only attack on your own Turn.

Turn Sequence

Players take turns. Each turn has 5 phases: Power Phase Move Phase Summon Phase Battle Phase Spell Attack Phase

The Men

Use chits or miniatures to represent units.

Units Table Notation

Number of that type of unit each player has in setup.

Move The types of Move Cards the unit can use.

Range = The types of Attack Cards the unit can use.

Power Phase

Draw 3 cards. If the deck runs out, shuffle the discard and draw from it. Max hand size = 7 cards.

Discard excess cards.

Move Phase

Every unit you control may move once on your turn. A unit may move up to a number of spaces equal to its move rating. Unit move ratings are listed in the Unit Table.

Units cannot move through other units except for Flyers. Moves are diagonal or orthogonal. Instead of a normal move, you may cast a Move Spell on any unit you control.

Summon Phase

Cast (discard) a Summon card to summon the creature indicated on the card. The summoned unit appears in a space orthogonally adjacent to your Wizard.

Units with the regenerate ability regain one lost Hit Point in this phase.

Battle Phase

Units you control may automatically make one 'free' attack against an Enemy unit that is orthogonally adjacent. The attack does damage equal to the units damage rating. Unit damage and hit point ratings are listed in the Unit Table.

If the target unit is reduced to zero hit points it is destroyed. Your opponent may play a Defense Spell to negate an Attack.

Spell Attack Phase

Play (discard) a Spell Attack card to have your Wizard attack. The attack card has a range rating: This is the range of the attack. Attacks are diagonal or orthogonal.

The enemy unit that is the target of the attack takes damage according to the Spell description. You cannot cast spells through units. Your opponent may play a Defense Spell to negate an Attack.

Spell Deck Card List

Card Name:	Range	Type	Dam	Notes
Magic Missiles	1-3	A	1	
Shock	1-2	A	2	
Fireball	3-4	A	2	
Touch of Death	1	A	3	
Lightning Bolt	5-6	A	2	
Disintegrate	3	A	3	
Cone of Cold	2-3	A	2	
Ice Storm	3-5	A	1	
Petrification	2	A	3	
Stone Bolt	4-5	A	2	
Earthquake	4-6	A	1	Flyers Immune
Dispell	-	Z	-	
Spellshield	-	Z	-	
Negate	-	Z	-	
Abjuration	-	Z	-	
Charm	1	C	-	
Posses	2	C	-	
Dominate	3	C	-	
Command	4	C	-	
Teleport	5	M	-	
Gate	6	M	-	
Fly	4	M	-	
Haste	3	M	-	
Portal	7	M	-	
Phase	K	M	-	
Call	2-6	M	-	Move Enemy unit 3 spaces
Banish	3	A	-	Target Creature Destroyed
Shield	-	D	-	

Spell Types

Attack Spells may target any opposing unit. Counterspells when cast negate the effects of a spell just cast by your opponent. Control Spells cannot target enemy Wizards.

Control Spells give you permanent control over the target creature. A target hit by an Immobilization Spell cannot move, attack, or cast spells until the end of that players next turn.

Card List Notation

Wizarding Duels

Introduction

Card game depicting a Wizard Duel in the Harry Potter Universe Game for 2+ players. Each Player & Deck represents a single Character.

Battles

A Battle consists of two groups of Wizards fighting each other.

Disclaimer

Harry Potter is a copyrighted, licensed property. This is merely a Fan site.

Victory

Defeat the Opposing Wizards (Combatants). A Wizard is Defeated under the Following Circumstances:

1. Killed
2. Immobilized
3. Memory Lost
4. Heavily Wounded or Knocked Out (Reduced to zero Hits)

Dice

Six and Ten sided Dice are used.

Wizard Deck Design

Each player will have to make a deck for his Wizard (Character). A Wizard can be one from the stories or one you make up. The card list contains a list of every possible card.

Choose cards appropriate to your Character (According to his Stats). A Deck should have a minimum

of 40 cards. A Deck may contain no more than 1 copy of any single card.

Characters

Each Character has 12 Stats:

- Alignment
- House
- Age
- Race
- Knowledge
- Courage
- Endurance (Hits)
- Speed (To Dodge)
- Aim (To Hit)
- Experience (Draw)
- Intellect (Hand Size)
- Power

All Characters are Unique.

Alignment

Wizards are either Good or Evil.

House

Gryffindor, Slytherin, Ravenclaw, or Hufflepuff.

Age

Wizards are either Students or Adults.

Race

Human, House Elf, Goblin, Half-Giant, Centaur, etc.

Knowledge

Level:	Notes:
1	Basic Magic
2	OWL Magic
3	NEWT Magic

Level:	Notes:
4	Advanced Magic
5	Arcane Magic
6	Legendary Magic

Courage

Level	Notes:
3	Cowardly

Level	Notes:
4	Normal Bravery
5	Courageous, Determined
6	Heroic, Mad, Obsessed, Fearless, Stupid, Fanatic, Undaunted

Endurance

Hits	Notes:	Hits	Notes:

8	Visionary Mind	Max hand Size = 8 Cards

Power

Level	Notes:
0	Muggles
1	Squib
2	Minor Magics

Level	Notes:
3	Able Focus
4	Strong Concentration
5	Great Will, Mighty Magics

Setup

Roll high on 1D10 to see who goes first.

Turn Sequence

Players take turns Each turn has 3 phases:

- Draw Phase
- Action Phase
- End Phase

Draw Phase

Draw X cards. X = your Experience Level. If your deck runs out, shuffle the discard and draw from it.

Action Phase

Play cards from your hand. To play a Card you must discard other cards = to the effort cost of the card you are playing.

Attacks

An Attack requires that an Attack card be discarded and a target chosen. The Attacker rolls to Hit and adds his Aim Stat Modifier.

1D10	Result:
1-5	Miss
6+	Hit

Stun Table

1D10	Result:	Notes:
1	Hurt	-1 Aim for 1D6 turns
2	Winded	1D6 Hits Damage
3	Dazed	Discard Hand
4	Disarmed	See Disarmed Rules
5	Confused	Cannot attack next turn
6	Limping	-1 Speed for 1D6 turns
7	Stupefied	Draw no cards next turn
8	Discouraged	Save vs Courage or Flee
9	Shaken	-1 to all Stats until end of next turn
10	Knocked Out	Immobilized for 1D6 Turns

Disarmed Rules

A Wizard that is disarmed cannot cast spells. Instead he must try to retrieve his lost Wand:

1D10	Result:
1-5	Wand not Retrieved
6+	Wand Retrieved

An Attacked Character or Creature may attempt to Dodge. The Defender rolls to Dodge and adds his Speed Stat Modifier.

1D10	Result:
1-5	Fail to Dodge
6+	Dodge Succeeds

Certain cards can be played to further Modify the Rolls.

Discard Phase

Max hand size = your Intellect. Discard excess cards

Attack Cards

Attacks are generally made in your own Action Phase.

Defensive Cards

Many defense cards can be cast at any time to counter a card just played.

Enchantments

An Enchantment lasts until it is removed by another spell, or The Wizard who cast the Enchantment is defeated.

Items

Items can be Single Use or Multiple Use. Each Item is described individually in detail.

Summoning Creatures

Creatures can make a special attack once on your turn. Each Creature is described individually in detail. Creatures cannot cast spells but are otherwise treated like Wizards.

A Creature is a Blocker. Opponents must defeat your Creatures before they can attack you.

Starting Cards

Some Characters have Starting cards in their description. Such a Character may always include those cards in their Starting Hand.

Item Rules

A list of Items and their Stats:

Invisibility Cloak

Opponent's are Aim -2 vs this Character.

Crossbow

Discard 2 Cards to attack. Max 1 Attack per turn. If the Attack hits, it does 2D6 Damage.

Felix Felicis

Single use. Remove from game after being used. Character get +1 to all his Dice Rolls.

Broom Stick

Speed +2

Sword Of Gryffindor

Unique. Discard 2 Cards to attack. Max 1 Attack per turn. If the Attack hits, it will Kill a Creature.

Sorting Hat

Unique. While in your possession gain: +1 Experience and Intellect and Courage and Knowledge.

Marauders Map

Unique. While in your possession: Aim +1 & Dodge +1 (You always know where your opponents are)

Creature Rules

A list of Creatures and their Stats:

Dementor

20 Hits. Kiss of Death Attack does 2D6 damage and target must discard 1 card. Any Spell Attack card with a Knowledge or Power of 3 or greater can be used as a Expecto Patronum Attack Spell. If the Attack Hits, the Dementor is Discarded.

Fawkes

Unique. 10 Hits. If killed put him back in your hand. Successful Attack blinds Target: Target is Aim -3 Any Healing Spell will restore Sight.

Instead of Attacking Fawkes may Heal 1D6 Hits or cure any Poison

Serpent

5 Hits. Attack Poisons Victim: Victim loses 1D6 Hits at the end of each of his turns. Any Healing Spell will neutralize poison.

Animated Statue

25 Hits. Defender: Statue must be attacked before a target of your choice. Attacks by Statue do 1D10 damage.

Basilisk

Unique. 40 Hits. Gaze Attacks by un-blinded Basilisk cause Petrification (permanent Immobilization) Bite Attacks by a blinded Basilisk cause Poisoning like the Serpent.

Buck Beak

Unique Gryphon. 30 Hits. Ride him and receive Speed +1. Beak attack does 2D6 Hits Damage.

Fang

Unique Giant Mastiff. 25 Hits. Bite attack does 2D6 Hits Damage.

More Characters coming soon.

Wizardly

Introduction

Each player controls a Covenant of Wizards. Players try to build up the prestige of their Covenant by Accumulating Victory Points.

Victory

The first player to have 25 victory points is the Winner.

Victory Points

Every Wizard you control is worth 1 VP (victory point). Every Resource you control is worth 1 VP (victory point). Other cards will also be worth a stated number of VP if you control them.

Completed Quests are worth 5 VP each.

The Deck

Players share a common deck.

Cards

There are 7 card types:

- W** Wizards
- S** Spells
- F** Followers
- Q** Quests
- E** Events
- I** Items
- D** Duel

Dice

Six sided dice are needed.

Setup

Players start with a hand of 7 cards each. The oldest player goes first.

Turn Sequence

Players take turns. Each turn has 5 phases: Research Phase Event Phase Duel Phase Summon Phase Adventure Phase

Research Phase

Draw 1 card. If the deck runs out, shuffle the discard & draw from it. Max hand is 8 cards.

Discard excess cards.

Event Phase

Conduct Wizard actions in this Phase. A Wizard only gets one action per turn.

Duel Phase

You must play a Wizard Duel card to start a Duel. Choose which of your Wizards will fight. Your opponent chooses one of his Wizards to fight.

Both of you roll 3D6. The Higher Duel roll wins. The Lower Duel roll is slain.

Certain spells, Items will add to the roll.

Summon Phase

Put 1 Wizard or Item or Follower or Resource card into play. Cards in play stay in play until they are slain, destroyed, etc. Items must be attached to a Wizard you control.

Adventure Phase

You may go on a Quest. Play a Quest card. Decide which of your Wizards & Followers are going.

Wizards that dueled or performed an action this turn cannot go on a Quest. Roll 3D6 to get the Danger Level. Roll 2D6 to get the Quest Level Add 1 to the Quest level for each participating Wizard/follower.

If the Danger level is higher, that many Wizards/followers are slain. If you still have Wizards/followers left, roll again: Roll 3D6 to get the Danger Level. Roll 2D6 to get the Quest Level Add 1 to the Quest level for each participating Wizard/follower.

If the Quest Level is equal or higher, you complete the Quest. Put the completed Quest into your Quest Pile. Some Items and Spells can increase your Quest Level.

Discard slain Wizards/followers, spells, and uncompleted Quests.

Wizard Type Abilities

Conjurer = Use an action to draw a card (on a roll of 4-6 on 1D6) Adventurer = Gain +2 to Quest rolls. Play an extra Wizard on your turn. Dueler = Gain +2 to Duel rolls

Scry Use an action to Look at opponents hand or next 5 cards in deck. Max hand size +1.

Nature = Gain +1 to Duel & Quest rolls. Play an extra Follower on your turn. Stealth = Use an action to steal an Item (on a roll of 6 on 1D6) Maker = Use an action to Search deck for Item & put it in your Hand (on a roll of 6 on 1D6) Maker = Play an extra Item on your turn.

Charm	S	Steal Target Follower
Poison Potion	S	Slay target Wizard
Dispell	S	Negate target Spell
Alter Reality	S	Negate target Action, Event or Duel
Probability Shift	S	Reroll target Dieroll

Wizards

Introduction

Two-player Card game based on the animated film WIZARDS by Ralph Bakshi. Wizards is a trademarked, licensed property. This is merely a fan site. One player is the good Wizard Avatar.

The other player is his evil brother Blackwolf. Both battle for world domination. On Avatar's side is Magic, Elven Races, and Faerie Folk.

Blackwolf's armies are filled with Mutants, Demons, and Ancient Technologies.

The Decks

There are 2 decks: The Avatar Deck and the Blackwolf deck. Each player gets one deck.

Turn Sequence

Recruit Phase Reinforcement Phase Revelation Phase Conflict Phase Resolution Phase

Recruit Phase

Each player fills their hand to 9 cards.

Reinforcement Phase

Each player may discard up to 3 cards and draw replacements.

Revelation Phase

Both players lay cards from their hands simultaneously face up. The Avatar player can only play one Magic card unless other cards allow more. The Blackwolf player can only play one Technology card unless other cards allow more.

Either player can only play one Knowledge card. Cards that cannot be played are kept in the players hand. The player may also choose to keep cards in his hand he could otherwise play.

Conflict Phase

Some cards allow the player to take an action. Players take turns conducting one action at a time: Avatar goes first. Cards drawn during this phase may be immediately played.

These cards may allow further cards from a players hand to be played.

Resolution Phase

Each player counts up the Power of all his remaining played cards. The player with the most Power points gets a Victory Token. The first player to acquire 7 Victory Tokens wins the game.

Discard all played cards.

Magic Dominates	M	8	Elves & Faeries +2
Giant Pink Rat	X	5	
East Elfland	P	5	Elves +2

Wizards And Warlords

<body>

Introduction

Requires D6, D10, a map, and tokens of different colors to represent the troops of different players. The objective is to destroy your opponents Warlord token and capture all of your opponents strongholds.

The Map

The map is divided into spaces, or territories. Designate which spaces are land and which are water. Designate some land territories to be barren.

Designate some spaces to contain strongholds. Choose the identity of each stronghold. (Orc, Elf, Ice, etc.)

Tokens

Tokens represent an abstract combination of military, tactical, and magical strength at your disposal. The identity of a stronghold determines what type of token it produces. For example, a Dwarf stronghold produces dwarf tokens.

In battle a dwarf token allows one roll on the dwarf warlord table.

Setup

Players each pick one of the warlords they want to play. Players pick one space on the map that they want to be their Homeland stronghold. Players start with 25 tokens of that warlord.

All 25 tokens of that player start the game placed on the homeland space. Roll high on 1D10 to determine player turn order

Stacking

A territory cannot at the end of a turn have more than 10 tokens in it. The exception to this is the Homeland spaces which can hold up to 25 tokens. A stack is also called an army. An army may consist of tokens from any number of Warlord tables.

Warlord Battle Tables

The Battle Tables are used during battle phase. To get a result on a Battle Table roll a D10. Some numbers are repeated more than once.

In this case, the player can pick which result he wants.

Stats

Rolls on battle tables will contribute to the totals of seven stats: Numbers, Movement, Melee, Ranged, Armor, Tactics, and Morale.

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Production Phase
2. Movement Phase
3. Battle Phase

Production Phase

A players starting homeland stronghold generates 2 tokens per turn. These are called homeland tokens. Other strongholds controlled by the player generate 1 token.

The other stonghold's tokens will use other battle tables. A player can only recruit from a hold that has the same, or a neutral alignment battle table. A player must have a homeland token on a hold to recruit from it.

Example- The Dwarf Warlord has a dwarf token on an Elf hold and so may recruit 1 Elf token per turn as long as the Dwarf token remains on the elf stronghold.

Movement Phase

A token can move one space per turn. Tokens cannot move into water territories.

Battle Phase

A stack may either move one space or attack an adjacent enemy stack. Stacks may combine their attacks. A stack may only attack once per turn.

A stack may be attacked more than once per turn. During battle each side rolls a number of Battle rolls equal to the number of tokens they have in the battle up to 5 tokens. For example: Player A has 2 Dwarf tokens and 2 Elf tokens.

He rolls twice on the Dwarf Warlord Table and Twice on the Elf Warlord Table. Players take turns making battle rolls, one at a time, the Attacker starting first. Add up the stat totals for each side. The winner for each stat inflicts one casualty. Tied stats result in no casualties.

Example- Greyden wins in 5 stats and so his opponent loses 5 tokens. His opponent won in two stats so Greyden loses 2 tokens. Repeat this procedure until one side is destroyed or the attacker decides to stop attacking.

Each repetition is called a round.

Extra Battle Rolls

If both sides have more than 5 tokens, the side with more tokens gets an extra battle roll. Defenders of a Homeland stronghold get an extra battle roll.

Strongholds

Defenders in a stronghold automatically get a stat bonus of Armor = 5 & Range = 1 every round unless the stronghold was breached.

Last Man Standing Rule

There will always be at least one surviving token at the end of a round. If the casualties result in both sides being wiped out, then the side that won more stats will keep 1 survivor. If the stats are tied then roll high to determine the winner.

Free Advance

If the attackers destroy all the defenders, then some or all of the attackers may move into the defenders territory.

Terminology

- Breach Stronghold- Stronghold bonuses are negated.
- End Battle- Resolve casualties now. No further rounds of battle between these stacks.
- Regenerate- Negate one casualty.
- Living- Any tokens that are not Constructs, Elemental, Undead, or Illusions.
- Humanoids- Orcs, Kobolds, Lizard Men, Goblins, Hobgoblins.
- Demihumans- Dwarves, Elves, Halflings, Gnomes.
- Monsters- Giants, Elementals, Dragons.

Wizards Game

Introduction

Card game between rival Wizards.

Victory

The first player to accumulate 25+ Fate points is the winner.

The Deck

Players share a common deck.

Tokens & Points

There are three types of points players must keep track of: Lore Points: Used for Bidding to acquire cards. Heka Points: Used to play Spell cards. Fate Points: Used to determine the winner at the end of the game.

Points are represented by tokens (Counters, markers, stones) Use Blue stones for Lore. Use Red stones for Heka. Use Yellow stones for Fate.

Individual cards may specify other additional Token types.

Setup

Each player starts with a hand of 7 cards. Place 5 cards face up in the center of the Table. These are the Bid cards.

Turn Sequence

Each turn is divided into 4 Phases: Research Phase Mysteries Phase Bid Phase Magic Phase

Research Phase

Each player generates Lore Tokens. Each player automatically gets 7 Lore Tokens. Certain cards generate additional Tokens.

Mysteries Phase

There will be 5 or less cards face up in the center of the Table. These are the Bid cards. If there are fewer cards, draw replacement cards from the deck.

Bid Phase

Using Lore points, players bid on the five Bid cards. A player may bid with some, none, or all of his lore tokens. Lore tokens may be saved from turn to turn.

A player may bid on some, none, or all of the Bid cards. If you win a bid, keep the card (it goes to your

hand) and discard the tokens you bid. If you lose a bid, you get back the tokens you bid.

In a tie, all bidders have their bid returned. At the end of the phase put a time token on all remaining Bid cards. A Bid card with 3+ time tokens is discarded.

Maximum hand size is 12 cards. Discard excess cards.

Magics Phase

You may play cards from your hand. Cards are played face up one the table near you. Certain cards you have in play will generate Heka or Fate tokens for you.

Fate tokens are saved from turn to turn. Heka tokens are lost at the end of this phase if they are not used. Cards that have the trait 'permanent' remain in play.

Non-permanent cards are discarded at the end of this phase. To play some cards requires a specific amount of Heka to be used up. To play some cards requires the presence of other cards with certain traits.

An Interrupt card can be played to negate a Spell card just played.

Scrying

If a Scry card is played in Magics phase, you may look at an Opponents' hand, or the next 7 cards in the deck.

Limitations

- A Wizard can only have one Wand.
- A Wizard can only have one Knife or Sword.
- A Wizard can only have one Location.
- A Wizard can only have one Familiar.
- A Wizard can only have one Body Type.
- A Wizard can only use one card with the Time trait per turn.

Wizards that have used evil cards cannot use good cards.

Card Trait Notation

Wizards

Before play, each player takes the identity of one (random) Wizard. Each Wizard described in the Wizard Card List has Special Abilities.

Wizards Card List

- * King Solomon Cannot use Evil cards. Gets +1 to bids for Spirit cards. Spirit cards cost 2 less Heka to play.
- * Merlin Cannot use Evil cards. Gets one extra Lore token per turn.
- * Virgil Cards cost one less Heka token to play.
- * Faust Starts game owning the "Pact with the Devil" card in play.
- * Agrippa Gets +1 to bids for 'Systems of Magic' cards.
- * Paracelsus Gets +1 to bids for Alchemy, Medical & Healing cards.
- * Dr John Dee Gains one extra Fate point every time he plays a Spirit card.

* Robert Fludd Starts with the traits of: Alchemy, Divination, Spirit, and Nature.

* Count Saint-Germaine Gains one extra Fate point every time he plays a Spell card.

* Eliphas Levi Gets +1 to bids for Nature cards.

* Aleister Crowley Gains one extra Fate point every time he gains a Book or an Organization.

* Gerald Gardner Cards that generate Heka generate one extra Heka point for him.

* Alexander Sanders Gains one extra Fate point every time he gains a 'Systems of Magic' card.

* Oberon Zell-Ravenheart Gains one extra Fate point every time he plays a Nature card.

Bidding Technique

Each player should have a tray with 5 compartments corresponding to the 5 available cards up for bid. Distribute your Lore tokens to the compartments. Use a barrier to keep other players from seeing your Bid. Players take down their barriers all at once.

Wolf Pack

Introduction

Card game. Deck of 90 cards. Simulation of U-boat attacks vs allied shipping during WWII. One player is

the wolf pack, the other is the allied convoy.

Deck Card List

#	Card Name	Type
12	Sonar	Detection
10	Depth Charges	Attack
8	U-boat	Target
8	Torpedo	Attack
10	Periscope	Detection
12	Transport	Target
6	Dive	Evasion

#	Card Name	Type
4	Destroyer Sweep	Evasion
2	Watery Grave	Water
2	North Sea Storm	Water
2	Flotsam & Jetsam	Water
2	Oil Slick	Water
2	Near Miss	Water
10	Cat and Mouse	Discard

Number of this card in the deck

Set-up

There is one deck and one discard pile. Each player draws 5 cards. If the deck runs out before one side has achieved victory then shuffle the discards and continue play.

Turn Sequence

U-boat Draw Phase Convoy Draw Phase U-boat Action Phase Convoy Action Phase

Draw Phases

The indicated player draws 2 cards. The player discards down to 5 cards.

U-boat Action Phase

The player may play one card. A Dive card played will cause all cards in play to be discarded. The Dive card is immediately discarded.

To destroy a Transport, the U-boat player must play 3 cards in a row: Periscope- Torpedo- Transport Only one card may be played per turn. A played card is placed face up and remains in play. When all three

cards are played in the correct order one Transport is destroyed.

All three cards are then discarded. The Wolf pack wins if they destroy 6 Transports. Water- type cards have no use, they just fill the players hand.

A Cat and Mouse card can be discarded to cause opponent to discard a random card from his hand.

Convoy Action Phase

The player may play one card. A Destroyer Sweep card played will cause all cards in play to be discarded. The Sweep card is immediately discarded.

To destroy a U-boat, the Convoy player must play 3 cards in a row: Sonar- Depth Charges- U-boat Only one card may be played per turn. A played card is placed face up and remains in play. When all three cards are played in the correct order one U-boat is destroyed.

All three cards are then discarded. The Wolf pack wins if they destroy 4 U-boats. Water- type cards have no use.

A Cat and Mouse card or a Near Miss card can be discarded to cause opponent to discard a random card from his hand.

Cardset Available!!!

Thanks Jose!

Wonder Woman

Introduction

Card game for 2-4+ players. Wonder Woman Theme.

Disclaimer

Wonder Woman is a copyrighted, licensed property. This is merely a fan site.

Victory

Have the most points when the deck runs out.

The Deck

Players share a common deck. The deck has 10 Suites:

1. Wonder Woman
2. Ally
3. Capture
4. Foe
5. Info
6. Plot
7. Quote
8. Item
9. Action
0. Minion

Scoring

Use paper & pencil to keep track of scores.

Setup

Each player is dealt a hand of 5 cards. The most feminist player goes first.

Turn Sequence

Players take turns. Each turn has 5 phases:

1. Draw Phase
2. Event Phase
3. Meld Phase

Cards:	Points:
1-3	0
4	1
5	4
6	9

A Meld that contains a Wonder Woman Card gets +2 Points. A Meld that contains a Foe Card gets +1 Point. Write your score down.

Keep a running total. Discard all the cards in the Meld.

4. Score Phase

5. End Phase

Draw Phase

Draw 2 cards. If there are no cards left in the deck the game ends.

Event Phase

You may take 1 action in Event Phase: —Discard an Info card in to look at opponent's hand. Then draw a card from the deck. —Discard a Foe card to steal a random card from opponent's hand.

—Discard an Item card to draw 2 cards from the deck. —Discard a Minion card to cause opponent to discard one random card. —Discard an Ally card to look at the next 5 cards in the deck and put one of them in your hand.

—Discard a Plot card to look at the next 7 cards in the deck and put them in any order. —Discard a Capture card during your opponent's Meld Phase to Cause a Wonder Woman or Ally card in his Meld to be Discarded and not count towards the scoring of the meld. —Discard a Quote card during an opponent's Event Phase to Negate the effect of a card he just discarded.

—Give Foe an Action card to look at his hand and Steal one target card. —Discard a Wonder Woman card to discard your hand and draw 5 new cards

Meld Phase

You may make a Meld. You may also choose not to make a Meld. A Meld you play must contain 4 to 10 cards.

Each card must be of a different suite. If a card can be of 2 suites, you pick which one.

Score Phase

If you played a Meld this turn, score it:

Cards:	Points:
7	16
8	25
9	36
10	49

End Phase

If you played a Meld this turn draw 2 Cards as a reward. Max hand size is 10 cards. Discard excess cards.

I	3	V	1
J	1	W	1
K	1	X/Z	1
L	1	Y	3
M	2	WILD	3

Word Poker

Play proceeds like 7 card draw Players are each dealt 7 cards They may keep what they like and discard the rest in exchange for one set of replacements

Players try to form words with the cards in their hands Proper names are not allowed. Spelling counts The player with the longest word(s) wins the pot Tied hands split the pot

WORD RANKS	POINT VALUES
3 Letter word	9
Two 3 Letter words	–
4 Letter word	16
4 Letter word & 3 Letter word	–

WORD RANKS	POINT VALUES
5 Letter word	25
6 Letter word	36
7 Letter word	49

Word Rummy

Play proceeds like Gin Rummy Players are each dealt 7 cards On their turn a player may draw the top card from the deck or the face up discard Players place words they create face down on their side of the table.

These cards are out of play If a player has more than seven cards in his hand he must discard at the end of his turn If a player empties his hand the round is over Players get points for the words they made minus the number of cards in their hands

World Powers

Introduction

Card, Bidding, and Stock Ownership Game for 2-6+ players.

Premise

Each player is a large Multinational Corporation. Players invest in different World Powers.

World Powers

World Powers (WP) represent Nations and whole Regions. There are 9 different World Powers players can invest in.

Treasury Tokens

The basic monetary unit is the Treasury Token (TT).

Winning

The player with the most TT at the end of the game is the winner.

Game End

The Game ends when the turn track reaches 20.

Random World Power Table

1D10	Power:
1.	USA
2.	Japan
3.	China
4.	Russia
5.	Europe

Setup

Each player starts with 10 TT. Players roll high on 1D10 to see who goes first. Play proceeds clockwise.

The player who is last assumes to role of the Time

WP	Starting Value
USA	6
Japan	3
China	4
Russia	2
Europe	5

Turn Sequence

Players take turns. Each turn has 6 Phases:

1. Opportunity Phase

Tracks

There are 10 tracks: 1 for each World Power and the Turn Track. Each track goes from 0 to 20.

Value Markers

For each Track there is a Value Marker. The Value Markers can all be identical.

Share Markers

Each player has a set of 9 Share Markers (SM) of a unique color. Each player places 1 SM on each World Power Track to indicate how Many shares in that WP he owns.

Dice

A 10 sided die is needed (1D10)

The Deck

Players share a common deck. The deck has 63 cards. There are 7 cards for each of the 9 World Powers: USA, Japan, China, Russia, Europe, Middle East, Africa, South America, India

1D10	Power:
6.	Middle East
7.	Africa
8.	South America
9.	India
0.	Pick One

Keeper. Players start owning zero shares. The Value Marker for the Turn Track starts on 1.

Value Markers for each World Power are placed as follows:

WP	Starting Value
Middle East	2
Africa	1
South America	1
India	3

2. Action Phase
3. Dividend Phase
4. Progress Phase

5. Crisis Phase
6. End Phase

Opportunity Phase

Draw 4 cards from the deck. If the deck runs out, shuffle the discard and draw from it. Place them face up in front of you.

These are called the Draw cards.

Action Phase

You must take 4 set actions. You may take them in any order. The 4 set actions are:

1. Investment Action
2. Auction Action
3. Finance Action
4. Profit Action

Investment Action

You may discard 1 draw card to buy 1 share of the Power indicated. You must pay TT equal to the current value of the Power. Move your Share marker up one space on that Powers Track.

You may also decide not to invest: Simply discard a draw card.

Auction Action

You must auction off 1 draw card. You do not bid on the auction card but the other players do. Minimum bid is equal to the powers current value.

Bidding runs clockwise. A Player must bid higher than the current bid or drop out. The winner of the bid pays you TT equal to the bid.

Other players keep their TT. The bid winner discards the card and gains 1 share of the auctioned Power. If no player offers a bid, you may buy it yourself for its current value.

If no one wants it, it is discarded.

Finance Action

Discard 1 draw card to increase that Powers Value by 1. Move the Powers value marker up 1 space on its Track.

Profit Action

Discard 1 draw card to gain TT equal to its value.

Dividend Phase

Roll on the Random World Power Table. The player with the most Stocks in that Power gains TT equal to the current value of that power. If tied, players share the TT. (Round Down) Second place gets half the TT of the current value. (Round Down)

Progress Phase

Roll on the Random World Power Table. The Value of the indicated Power increases by 1.

Crisis Phase

Roll on the Random World Power Table. The Value of the indicated Power decreases by 1. (Minimum Zero)

End Phase

If it is the Time Keepers turn, move the marker on the Turn Track up by 1.

Wreckers

Introduction

Players are Maritime Salvage Companies searching the World's waters for Treasure laden Shipwrecks. Card game for 2-4+ players.

Victory

At the end of 10 Rounds, the player with the most Money Wins. If tied in money, the player with the most Discovery Tokens wins.

The Deck

Players share a common deck. It is important in this game that cards not be damaged or otherwise marked.

Card Types

There are 7 card types: Search, Investor, Location, Controversy, Expenses, Wreck, and Delay.

Money

Use coins for Money. (Spanish Doubloons if you have them) The Basic Denomination is 1 Million Dollars.

Discovery Tokens

Use Poker Chips for Discovery Tokens.

Setup

Each player starts with an investment of \$10 Million Dollars.

Rounds, Phases, And Turns

Play proceeds in Rounds. Rounds are divided into Phases. Some Phases are further sub-divided into Player Turns.

One Round represents one Year.

Round Sequence

A Round is divided into 3 Phases:

1. Draw Phase
2. Search Phase
3. End Phase

Draw Phase

Shuffle the Deck. Each player draws a hand of 10 cards. (Beginning Hand Size limit = 10) Players then cut the remainder of the deck.

The player who cuts to the highest value wreck goes first in Search Phase. You may spend 20 Million once per Round to permanently increase your Hand size by +1.

Search Phase

In search phase players take turns. Play proceeds clockwise. (Note: Each player may have multiple turns in this Phase) On your turn discard a Search card and pick one random card from any Opponent's hand. (Players fan their hands out face down) What happens next depends on what type of card they Pick:

Card Picked:	Go Again:	Phase Ends:	Notes:
Wreck	No	No	Keep the Wreck card
Location	No	Yes	-
Search	Yes	No	-
Controversy	No	No	-
Expense	Yes	No	Lose 2 Million
Delay	No	No	Lose 1 Million
Investor	Yes	No	Gain 5 Million

Keep all Wrecks you find in a Victory Pile next to you. If you pick a Search, Expense, or Investor card from your opponent's hand you may Immediately take another turn. If you draw a Location card you may take no more turns this Phase.

If on your turn, you have no Search cards left in your hand, you must pass. The Phase ends when all

players have used up all their Search cards.

End Phase

Players discard their hands. Each player loses 1 Million dollars (Basic expenses).

Bankruptcy

If you go to zero or less Money, you are Bankrupt. In a 2 player game the other player wins. In a Multi-player game, you may reenter play as a "New" player in 2 Rounds.

War Graves

Note that some Military Wrecks have low monetary values. This is because they still belong to their respective governments and may not be Disturbed unless a

deal can be made with that government.

Wrinkles In Time

Introduction

Two player card game based on the Time Quartet series of books by Madeleine L'Engle. One player is the side of Good. The other player is the side of Evil.

Disclaimer

"A Wrinkle in Time" and the other Time Quartet Books are licensed, copyrighted properties. This is merely a fan site.

Victory

The First player to be in control of all 6 Balance Tokens is the winner.

The Decks

Each player gets a unique deck. There is a Good Deck & an Evil Deck. Each deck has its own discard.

Setup

Each player begins in possession of 3 Balance Tokens.

Turn Sequence

Each turn has 10 phases:

1. Destiny Phase I
2. Fate Phase I
3. Challenge Phase I
4. Destiny Phase II
5. Fate Phase II
6. Challenge Phase II
7. Destiny Phase III
8. Fate Phase III
9. Challenge Phase III
10. Test Phase

Destiny Phases

Each player draws 7 cards from his deck. If a Deck runs out, shuffle the discard and draw from it.

Fate Phases

Players may put cards into play. A card in play is placed face up on the table in front of the player who played it. The Evil player may have the following in play: 4 Characters 1 Location 1 Attack 1 Plot 1 Lies 1 Void 1 Weakness 1 Control The Good player may have the following in play: 4 Characters 1 Location 1

Gift 1 Travel 1 Song 1 Feelings 1 Healing 1 Quote 1 Communication These are the basic limits.

Some cards will allow you to play an additional card of a specific type.

Challenge Phases

Maximum hand size is 7 cards. Discard excess cards.

Test Phase

Each player adds up the total force of all the cards he has in play. The player with the highest score wins the turn and takes a Balance token from his opponent. The Good player wins ties.

Special Cards

Special cards may be played in any phase unless otherwise specified. Special cards are discarded as soon as they are played.

Glossary

*Spirits = Immortal (Non-human) beings in the form of energy, not matter. If it suits their purposes they can Materialize into one or more forms. Most are highly intelligent. Spirit beings have their full powers only in the vacuum of Space.

On planets their powers are much diminished. Many have existed for Billions of years.

*Namers = Good beings. Beings that are aware of the uniqueness, importance, and interconnectedness of all beings in the universe. This awareness is called Love (not the limited Romantic definition of Love)

*Angels = Good Immortal Spirit Beings.

*Echthroi = Destroyers, Un-namers, eXtinguishers, Evil spirits, Fallen Angels, Demons, Devils, Wyrms, Dragons, Monsters. They cause War and hate. They accomplish their evil by making beings forget their true names, and so become evil.

*Kythe = To go Within. An advanced form of Telepathy, where feelings, memories, sensory Experiences, and understanding, can be shared. Only a few Humans have the potential to do it well.

*Farae = Tiny Beings of the smallest scale that live within the Mitochondria of Earth Organisms. The Adult Form is tree-like. Juveniles (Farandolae) are shrimp-like & mobile until they take root & deepen. They sing The Cosmic song in harmony with the Stars.

*Star Spirit = Spirit being that is the remains of a star that sacrificed itself by going Nova to Destroy

all the Echthroi in its System. Their natural materialized form is that of large noble centaurs with Rainbow Wings and celestial voices.

*Uriel = Good Planet. Like the Garden of Eden. With Tall Mountains. A refuge for the Star Spirits in their Centaur Form.

*Tesser = Moving in the Fifth Dimension by way of a mentally constructed Tesseract Gateway. Instantaneous travel through time and space. Most Spirits can do this to some degree. It is also described as creating a Wrinkle in time and/or space or as a Quantum Leap.

*Projection = Nightmarish Evil Alternate Dimensions wished for by the Echthroi.

*Dark Planet = Planet totally controlled by Evil.

*Shadow Planet = Planet being fought over by Good & Evil.

*Cherubim = Servant Good Spirits with the material form of a Spherical Mass of Wings, Eyes, and Flames.

*Unicorn = Wild Good Spirits with material forms of Winged Unicorns. They travel Time more easily than space by riding upon the Winds. They drink moonbeams, can only be touched by Virgins & have special Healing powers.

*Biblical Earth = Pre-Flood. Inhabited by Men, Seraphim, Nephilim, Unicorns, and Mythical creatures such as Griffins and Manticores.

*El = Biblical God. The Presence.

*Seraphim = Good Spirits that live on Stars. Some were sent to live among men on Earth. Servants of El. They take the host form of noble animals or angelic golden winged giants.

*Nephilim = Albino Evil, Lustful, Self-Serving Fallen Angels. Masters of Illusion. Seraphim turned bad. They take the host form of creepy animals or albino winged giants.

*The Black Thing = A spreading Evil Presence at the Galactic Scale.

*IT = Disembodied Brain able to control Minds. Found on the Dark Planet Camazotz.

*Charles Wallace = Young Murry Boy capable of Going Within. Genius Intelligence.

*Meg Murry = Margaret. Affectionately called Megatron, Megaparsec, Megling, etc.

*Calvin O'Keefe = Megs Boyfriend; Gifted communicator.

*Mrs O'Keefe = Calvin's Mother who has suffered much.

*Mr Murray = Physicist & Presidential Confidant.

*Mrs Murry = Microphysicist and Homemaker.

*Ms Whatsit = Young Star Spirit; best at Talking & Materializing.

*Ms Who = Quirky Star Spirit; speaks in Quotes.

*Ms Which = Eldest & wisest Star Spirit.

*The Twins = Sandy & Dennys Murry. The most athletic & practical of the Murry Kids.

*The Happy Medium = Can see across time & space.

Stench of Evil	V	3	Mortal cards get Force -2
Silence	V	3	Discard a Song card in play
Ugly Laughter	V	3	Immortal cards get Force +3

Wuxia

Introduction

Card Game for 2+ Players. Chinese Sword & Sorcery. Each Player is a Secret Society recruiting Sword-fighters with Mystical Powers.

Victory

Control at least 4 Fighters & Kill all your Opponents Fighters.

The Decks

Players share 2 common decks: The Recruit Deck & the Action Deck The Recruit Deck has 4 Card types:

- Fighters, Weapons, Events, Enhancements

The Action Deck has 6 Card Types:

- Locales, Specials, Attack, Move, Defend, Minions

Each player keeps a recruit hand & an Action hand.

Fighters

- Each Fighter has a Skill Rating.
- Most Fighters will have some type of Special Ability.
- Each Fighter can use one Weapon card attached.
- Each Fighter can have up to 5 Enhancements attached.

Setup

Shuffle the Decks. Each player draws 7 cards for his recruit hand & action hand. Flip a coin to determine who goes first.

Turn Sequence

Players take turns. Each turn has 6 Phases.

- Destiny Phase
- Recruit Phase
- Fate Phase
- Duel Phase
- Encounter Phase
- End Phase

Destiny Phase

Draw 2 cards from the Recruit Deck. If the deck runs out, shuffle the discard & Draw from it.

Recruit Phase

You may put one Fighter card into play. You may put one Weapon card into play attached to a Fighter. You may put one Enhancement card into play attached to a Fighter.

Fate Phase

All players fill their Action hands to 7 cards.

Duel Phase

(You may skip this Phase) Select one of your Fighters (Attacker) and one Target Opponents Fighter (Defender). Both will Fight against each other in a Duel. Calculate the total Skill Level for each Fighter.

The Higher Level Fighter kills the Lower Level Fighter. (In a Tie, neither are killed & the Phase Ends) Weapon & Enhancement cards increase a Fighters Skill Both Players may play Action cards to further increase their Fighters skill. A Fighter can only use one Attack, one Move, one Defend, and one Minion card.

At the End of the Phase discard the killed Fighter & all Attached cards, also Discard all played Action cards (& Locale cards). Some action cards allow for multiple combatants (= Fray) In a Fray the losing side has one Combatant killed.

Encounter Phase

You may play a Locale card to play another Fate & Duel Phase.

End Phase

All Players may discard any unwanted cards from their hands. Maximum hand size is 7 cards for both Recruit & Action Hands. Discard excess cards.

Card List Notation

- F** Fighters
- W** Weapons
- L** Locales
- E** Enhancements
- S** Style Enhancement
- V** Event
- A** Attack Actions
- M** Move Actions
- D** Defend Actions
- X** Special
- ST** Sword Technique
- N** Minions

Recruit Deck Card List

Card Name:	Type	Skill	Notes:
Sword Master	F	9	Attached Sword Card gets +2
Sword Saint	F	9	Opponent in Duel cannot use Defense card
Wanderer	F	6	Gets +2 when a Locale is in play
Sword for Hire	F	5	Discard a Recruit card to get Extra Fate & Duel Phase
Bandit	F	4	When recruited Steals Weapon from Fighter

Secret Societies

Each player picks one at the start of the game:

Secret Society:	Special Ability:
Righteous Fists	They may Recruit 1 Extra Fighter on their Recruit Phase
Society of Red Spears	Fighters with Weapons get +2 Skill
White Lotus Society	Draw 1 extra Recruit card per turn
Yellow Turbans	They may take an extra Fate & Duel Phase on their Turn

Ww Iii

Introduction

Card game for 2 players. Simulates WW III if it had happened in 1985. One player is NATO, the other is the Warsaw Pact.

Victory

If the Warsaw Pact is able to claim 10 Europe Tokens it wins. If the Warsaw Pact is able to reduce NATO to zero tokens in any category the Warsaw player wins. If NATO reduces the Warsaw Pact to zero Super Power Tokens NATO wins.

If NATO ever has more Ground Force Tokens than the Warsaw Pact, NATO wins. The other side is forced to the negotiating table. A Win using no Nukes is considered a Clean Win.

A Win using Nukes is considered a Dirty Win.

Terminology

The NATO player is also referred to as the Atlantic Alliance and also as the American or US player in event of strategic nuclear exchange. The Warsaw (Pact) player is also referred to as the USSR or the Soviet (Block) player.

Europe Territory Tokens

There are 10 Europe Territory Tokens (ETT). NATO starts in possession of these.

Air Force Tokens

Each side starts with 15 AFT.

Naval Force Tokens

NATO starts with 20 NFT. The Warsaw Pact starts with 10 NFT.

Ground Force Tokens

NATO starts with 10 GFT. The Warsaw Pact starts with 25 GFT.

Superpower Tokens

The US starts with 10 SPT. The USSR starts with 10 SPT. This represents nuclear arsenal strength and survivability of Industry, Leadership, Communication, and other Resources.

Loses to SPT represent direct attacks on that Nation. Once your SPT is reduced to 5 or less, Air Attacks cannot reduce it further, only Nuke Attacks.

Dice

Needed for Nuclear Escalation Checks.

Pre-game And Main-game

The game has 2 main parts. The Pre-Game simulates events leading up to the War. The Main-Game simulates the War.

Each turn of the Pre-Game is equivalent to 2 days. Each turn of the Main-Game is equivalent to 1 day.

Pre-game Deck

This is called the Threat Deck. Players share this common deck. Some cards can be used by only 1 player, some by both.

All cards played add to the Tension Point (TP) total.

Pre-game Ending & Transition To Main Game

The pre-Game ends when there are 100 or more Tension Points (TP) worth of cards in play. The War begins: Discard all Threat cards, Remove the Threat Deck and start playing the Main-Game. Each player draws 2 cards from their respective Main-Game Decks. They may have accumulated extra Main game cards from pre-game card play.

Setup

Start with Token distributions as described above. Shuffle the Threat Deck. The Soviet Player goes first.

Pre-game Turn Sequence

Players take turns. Each turn has 3 phases:

1. Opportunity Phase
2. Options Phase
3. End Phase

Opportunity Phase

Draw 2 cards from the Threat Deck. If the deck runs out, shuffle the discard and draw from it.

Options Phase

You may put 1 card into play: Place it face-up in the middle of the table. Do not cover over other in-play Threat cards. The Tension Point Total increases.

The player playing the card may be rewarded with extra Tokens of a specified type, or with card draws from their respective Main-Game Decks.

End Phase

Max hand size is 7 cards. Discard excess cards. Check to see if the Tension Point (TP) total is 100 or greater.

Pre-game Strategy Notes

The longer the pre-game drags on the more NATO is able to build-up.

Threat Deck Notation

W Warsaw Pact player can use only

N NATO player can use only

B Both sides can use

TP Tension Points

Use Which player(s) can use (play) the card

GFT Ground Force Tokens

SPT Super Power Tokens

NFT Naval Force Tokens

AFT Air Force Tokens

Sabotage = Opponent draws 1 less card the first 2 turns of the Main Game

ATGW Anti-Tank Ground Weapons

Main Game Turn Sequence

Each turn has 8 Phases:

1. Logistics Phase
2. Intelligence Contest Phase
3. Naval War Phase
4. Air War Phase
5. First Ground War Phase
6. Second Ground War Phase
7. Nuclear Exchange Phase
8. Event Phase
9. Operations Phase

Logistics Phase

Each player draws 8 cards from his respective deck. If a deck runs out, shuffle the discard and draw from it. Strategic Option: At any time, you may discard 2 cards to draw 1 replacement card.

Intelligence Contest Phase

Players play cards that contribute to the Intelligence Score. Cards are revealed simultaneously. If tied nothing happens.

The higher score wins. The winner looks at his opponents hand and then may draw 3 cards and discard

one. If the loser played no cards, he must discard 1 Random card from his hand.

Discard all played cards.

Naval War Phase

Players play cards that contribute to the Naval Score. Cards are revealed simultaneously. If tied nothing happens.

The higher score wins. The loser loses 1 Naval Force Token (NFT). If the loser played no cards, the winner draws 2 cards.

If one player has 3 or more NFT than his opponent, he gets +2 to his Score. If one player has double or more NFT than his opponent, he gets +4 to his Score. Discard all played cards.

Air War Phase

Players play cards that contribute to the Air Score. Cards are revealed simultaneously. If tied, both sides lose 1 AFT.

The higher score wins. The loser loses 1 Air Force Token (AFT). If the loser lost by double the Score or more, the winner may cause the loser to lose 1 GFT, 1 NFT, or 1 SPT (winners choice)... AND... his opponent gets -2 to his Scores in both Ground War Phases.

If one player has 3 or more AFT than his opponent, he gets +2 to his Score. If one player has double or more AFT than his opponent, he gets +4 to his Score. Discard all played cards.

First Ground War Phase

Players play cards that contribute to the Ground Score. Cards are revealed simultaneously. If tied both sides lose 1 GFT.

The higher score wins. The loser loses 1 Ground Force Token (GFT). If the loser was NATO, the Soviet player also steals 1 ETT from him.

If the loser was the Soviet player, NATO inflicts an extra 1 GFT loss on him. If the losing NATO player played no cards, the winning Soviet player steals 1 extra Europe Territory Token (ETT) from his opponent. If the losing Soviet player played no cards, the winning NATO player inflicts an additional 1 GFT loss on his opponent.

If one player has 3 or more GFT than his opponent, he gets +2 to his Score. If one player has double or more GFT than his opponent, he gets +4 to his Score. Discard all played cards.

Nuclear Escalation Table

2D6	Notes:
2	Dud: The Nuke attack failed: No damage was inflicted
3-4	Opponent Stands Down: No additional effects
5-9	Escalation: Opponent gains 1 Nuke Token
10-11	Major Escalation: Each player gains 1D6 Nuke Tokens
12	Full Escalation: Armageddon: Game Over: Nobody Wins

Nuke tokens are used like Nuke Cards. Nuke tokens can be saved or used the same phase they are gained.

Event Phase

Event cards can be played in this turn. Players take turns. Soviet player first. Discard all played cards.

Operations Phase

Players discard down to 4 cards or less.

Nato Deck

Name:	Type	Score	Notes:
Delaying Action	G	9	(Containment)
American Tanks	G	10	(M1, M60)
Antitank Missiles	G	8	(Tow, Hellfire)

Second Ground War Phase

Players play cards that contribute to the Ground Score. Cards are revealed simultaneously. If tied both sides lose 1 GFT.

The higher score wins. The loser loses 1 Ground Force Token (GFT). If the loser was NATO, the Soviet player also steals 1 ETT from him.

If the loser was the Soviet player, NATO inflicts an extra 1 GFT loss on him. If the losing NATO player played no cards, the winning Soviet player steals 1 extra Europe Territory Token (ETT) from his opponent. If the losing Soviet player played no cards, the winning NATO player inflicts an additional 1 GFT loss on his opponent.

If one player has 3 or more GFT than his opponent, he gets +2 to his Score. If one player has double or more GFT than his opponent, he gets +4 to his Score. Discard all played cards.

Nuclear Exchange Phase

Players may play Nuke cards. Players take turns. Soviet Player first. Each Nuke card played causes opponent to lose 1 GFT, 1 AFT, 1 NFT, or 1 SPT (Attackers Choice).

Discard all played cards. Everytime you play a Nuke, roll one die and consult the Nuclear Escalation Table.

Main Game Deck Card Type Notation

- G** Card contributes to Ground War Score
- I** Card contributes to Intelligence Contest Score
- A** Card contributes to Air War Score
- N** Card contributes to Naval War Score
- U** Nuke Card
- Z** Can be used as card types: G, A, N, and U
- C** Can be used as card types: G, A, and N
- V** Event Card

Doomsday Clock General Sir John Hackett

Wwi Combined Arms

Introduction

Board game for 2 players. World War I theme. No dice or cards. Each unit represents a squad, gun, or vehicle.

Victory

Destroy the enemies Head Quarters (HQ).

The Map

Use an 8x8 chessboard.

Unit Master List

Unit Name	Move	Range	Defense	Max/Min
Infantry	2	1	3	-/8
Sniper	2	2	2	2/-
Machine Gun	1	2	3	2/-
Tank	2	2	3	2/-

Unit Special Abilities

Machine Guns do 2 Damage vs Infantry & Flame Throwers. Flame Throwers do 2 Damage. Tanks do 2 Damage vs Machine Guns.

Army Creation

Each player designs an army before play starts. An army is composed of 16 units. The Master List gives the maximum & minimum numbers for each unit type

Setup

Each player places one unit on each square of his back three rows. Units may not stack. Players take turns placing their units.

Determine who goes first in a non-random manner.

Turn Sequence

Players take turns. Each turn has 2 phases: Move Phase Attack Phase

Move Phase

You can move some, none, or all of your units in move phase. Units can move orthogonally or diagonally. Units can move up to a number of spaces equal to their Move Trait.

Units cannot move through other units.

Units

Use chits or miniatures to represent units. There are 8 distinct unit types.

Unit Attributes

Each unit has 3 Attributes or Traits: *Move: the number of spaces the unit can move per turn. *Range: the maximum number of spaces distant the unit can apply damage. *Defense: the amount of damage the unit can take at one time before having to retreat.

Some units have additional special abilities.

Unit Name	Move	Range	Defense	Max/Min
Artillery	1	4	2	5/-
Headquarters	0	1	4	1/1
Flame Thrower	1	1	3	2/-
Trench Raiders	3	1	3	2/-

Attack Phase

Each of your units can attack one target enemy unit in Fire Phase. Different units may attack different targets. Each unit has a Range Trait (number of spaces out it can attack into) A unit can only attack a target that is within its range.

Units with ranges 2+ can attack over other units. An attack does 1 point of damage. As soon as a unit takes damage in a turn equal to its Defense Trait, it must retreat.

(Combined Arms: you must concentrate force & combine attacks) A retreating unit must move laterally or back towards its side of the board 1 space. A retreating unit unable to move is destroyed and is removed from the board. Units that retreat off the board are destroyed.

A unit cannot move laterally if it will come in contact with an enemy unit.

Double Whammy Rule

If you can force a unit to retreat a second time in the same phase, it is automatically destroyed.

Optional Rules

Terrain

Distribute Bunkers, Trenches, and No-Mans-Land. Units occupying Trenches have a Defense bonus of +1. Units occupying Bunkers have a Defense bonus of +2.

Units occupying No-Mans-Land have a Defense bonus of -1.

Elite Units

Each player may make 2 of his units Elite. Elite units get +1 to Defense & always do 2 Damage instead of 1.

Experienced Units

A unit that helps destroy 5 enemy units becomes Elite.

Reinforcements

Every third turn each player gets one additional non-HQ unit. Reinforcement Units start on a player's back row.

Campaign

Use a Larger map with bigger armies. Use all the other optional rules.

Wwi Many Fronts

Introduction

Two Player Card & Bidding game Simulation of World War I (The Great War)

Sides

One Player is the Entente Powers (EP): Britain, France, Russia, Serbia, Italy, Romania, Greece, USA
The other Player is the Central Powers (CP): Austria-Hungary, Germany, Bulgaria, Turkey

The Deck

Players share a common deck.

Front Title:	Notes:
Western Front	Major Front
Eastern Front	Major Front: Russian Front
Balkan	Serbian, Salonika Fronts
Italian	Isonzo Front
Turkish	Caucasus, Dardanelles, Mesopotamia, Palestine Fronts

War at Sea

Territory Markers

There are 3 Territory Markers at each Front.

Capture Of Fronts

If you acquire all 3 Territory Markers at a Front, you capture the Front. For every Front you capture, your opponent produces 1 less AT per turn and His hand size decreases by 1.

Game Length

The game is divided into 18 Turns:

- 1914 Late: Central Players Turn
- 1914 Late: Entente Players Turn
- 1915 Early: Central Players Turn
- 1915 Early: Entente Players Turn
- 1915 Late: Central Players Turn
- 1915 Late: Entente Players Turn
- 1916 Early: Central Players Turn
- 1916 Early: Entente Players Turn
- 1916 Late: Central Players Turn
- 1916 Late: Entente Players Turn
- 1917 Early: Central Players Turn
- 1917 Early: Entente Players Turn
- 1917 Late: Central Players Turn
- 1917 Late: Entente Players Turn
- 1918 Early: Central Players Turn

Army Tokens

Each player has a set of Army Tokens (AT) AT is an abstract Measure of Men & Material.

Victory

The first player to capture the Western Front wins the War. If the EP captures the Eastern Front he wins the War. After 18 turns the player who has captured the most Fronts wins, otherwise it is a Stalemate.

The Fronts

There are 6 Fronts:

- 1918 Early: Entente Players Turn
- 1918 Late: Central Players Turn
- 1918 Late: Entente Players Turn

Usa Entry

The US enters the War in Early 1918. The EP hand size increases by 1. The EP gets an additional 2 AT per turn.

Setup

Each player starts with 50 Army Tokens.

Turn Sequence

Each turn is divided up into 5 Phases: Planning Phase

- Mobilization Phase
- Campaign Phase
- Casualty Phase
- Shell Shock Phase

Planning Phase

Each player fills his hand to 7 cards.

Mobilization Phase

Each player gains 6 AT. Event cards can be played to gain additional AT. Some Event cards cause your opponent to lose AT.

Campaign Phase

To each of the 6 Fronts, players may bid AT and Strategy Cards (SC). Bids are done in secret. Players should use a screen to hide their bids.

Note according to the title of the Phase, whose turn it is. The current player may not bid defense cards The other player may not bid attack cards. A player may not bid cards to a Front with a Bonus greater than The number of AT he has there.

There is no bidding for Fronts that are already captured. Players must bid if possible, a minimum of 10 AT to the Major Fronts (West & East) The Bids are then all simultaneously revealed. The highest bid at a Front (by at least 4 points) wins 1 Territory Marker (MT) for that Front.

If neither side wins by at least 3, it is a stalemate, and neither player gets an MT. When you win a Territory Marker, take it from your opponent if he has any.

Casualty Phase

- For every Major Front a player lost at he loses 2 AT.
- For every Lesser Front a player lost at he loses 1 AT.
- For every Major Front a player won at he loses 1 AT.
- For every Stalemate at a Major front, both players lose 2 AT.
- For every Stalemate at a Lesser front, both players lose 1 AT.
- At both Major Fronts, each player may play 1 Casualty Card to

Cause his opponent to loose additional AT.

Shell Shock Phase

Players may discard any cards from their hand they don't want. Discard down to Max hand size. Discard all cards played this turn.

AT not lost in Mobilization or Casualty Phase can be used next turn.

War At Sea Front

Unless they specifically say so, strategy cards cannot be Played to the War at Sea Front.

Card List Notation

- E** Entente
- C** Central Powers
- B** Both Players
- S** Strategy
- A** Attack
- D** Defense
- K** Casualty
- V** Event
- W** West Front Only
- R** East Front Only
- M** Main Front: West or East Front
- T** Turkish Front Only
- L** Balkan Front Only
- N** Card can used for War at Sea Front
- Late** Do not use until second half of 1916
- Very Late** = Do not use until start of 1918
- WASO** War at Sea Only

Wwii Combined Arms

Introduction

Board game for 2 players. World War II theme. No dice or cards. Each unit represents a brigade or battalion.

Victory

Destroy the enemies Head Quarters (HQ).

The Map

Use an 8x8 chessboard.

Unit Master List

Unit Name	Type	Move	Range	Defense
General Infantry	I	1	1	5
Paratroopers	I	1	1	4
Engineers	I	1	1	4
Mechanized Infantry	I	2	1	4
Light Tanks	T	3	2	3
Medium Tanks	T	2	2	4
Heavy Tanks	T	1	2	5
Howitzers	L	1	3	3
Anti-Tank Guns	L	1	2	3
Anti-Aircraft Guns	L	1	2	3
Air Field	A	2	4	2
Fortification	B	0	3	6
Headquarters	B	0	1	6

Unit Special Abilities

AA Guns: The AA gun and all adjacent units are immune to attacks by Airfields. Engineers: Do 2 Damage (not 1) to Fortifications & HQ. AT Guns: Do 2 Damage (not 1) to Tanks.

Paratroopers: Have a Move = 4 if they start the turn next to a friendly Airfield.

Army Creation

Each player designs an army before play starts. An army is composed of 16 units. One unit is a Headquarters.

An Army has only 1 HQ. Up to 5 units can be Tanks. The Army must have at least 7 types of units (not including the HQ) There can be no more than 4 units of a single type.

Units

Use chits or miniatures to represent units. There are 13 distinct unit types.

Unit Attributes

Each unit has 3 Attributes or Traits: *Move: the number of spaces the unit can move per turn. *Range: the maximum number of spaces distant the unit can apply damage. *Defense: the amount of damage the unit can take at one time before having to retreat.

Some units have additional special abilities. There are 5 Classes of units: Infantry (I), Armor (T), Artillery (L), Air (A), and Bases (B).

Setup

Each player places one unit on each square of his back three rows. Units may not stack. Players take turns placing their units.

Determine who goes first in a non-random manner.

Turn Sequence

Players take turns. Each turn has 2 phases:

1. Move Phase
2. Attack Phase

Move Phase

You can move some, none, or all of your units in move phase. Units can move orthogonally or diagonally. Units can move up to a number of spaces equal to their Move Trait.

Airfields can only move to a space adjacent to a friendly unit, and Not adjacent to an enemy unit.

Fire Phase

Each of your units can attack one target enemy unit in Fire Phase. Different units may attack different targets. Each unit has a Range Trait (number of spaces out it can attack into) A unit can only attack a target that is within its range.

Units with ranges 2+ can attack over other units. An attack does 1 point of damage. As soon as a unit takes damage in a turn equal to its Defense Trait, it must retreat.

(Combined Arms: you must concentrate force & combine attacks) A retreating unit must move laterally or back towards its side of the board 1 space. A retreating unit unable to move is destroyed and is removed from the board. Units that retreat off the board are destroyed.

A unit cannot move laterally if it will come in contact with an enemy unit. Bases cannot move, so they are destroyed if they must retreat. Airfields cannot move & attack in the same turn.

Double Whammy Rule

If you can force a unit to retreat a second time in the same phase, it is automatically destroyed.

Optional Rules

CITY SPACES Randomly place 4 cities in the 2 rows between the players (Dead man's Land) If you occupy

all the cities you automatically win.

Difficult Terrain

Cities, Mountains, Bocage Country, etc. Units occupying these spaces have a Defense bonus of +1. Tanks & Mechanized Infantry entering these spaces must stop.

Elite Units

Each player may make 2 of his units Elite. Elite units get +1 to Defense & always do 2 Damage instead of 1.

Experienced Units

A unit that helps destroy 5 enemy units becomes Elite.

Reinforcements

Every third turn each player gets one additional non-base unit. Reinforcement Units start on a player's back row.

Campaign

Use a Larger map with bigger armies. Use all the other optional rules.

X - Files

Introduction

Card game based on the first season of the X-Files.

Objective

The player to solve the most cases when the deck runs out wins.

The Deck

Players share a common deck.

Setup

Randomly determine who goes first.

Turn Sequence

Players take turns. Each turn has 7 phases: Resources Phase Case Phase Agent Phase Complications Phase Investigation Phase Conclusion Phase Debriefing Phase

Resources Phase

Draw 2 cards.

Case Phase

You may put an X-File card into play from your hand if you don't already have one out. (In Play: face up in front of you.)

Agent Phase

You put 1 or more agent cards into play from your hand.

Complications Phase

Your opponents may attach Plot Twist cards from their hands to your X-File card. (these make the case harder to solve)

Investigations Phase

You may attach Contact & Investigation cards to your X-File card. An X-File may have a max of 2 Contact cards attached.

Conclusion Phase

If the point value of your Agent, Contact, & Investigation cards exceeds the combined point value of Your X-File plus attached Plot Twists, you solve the X-File. To solve an X-File you must have at least one Agent in play. Keep your solved X-Files in a separate pile.

Discard all Agent, Plot Twist, and Investigation cards after solving the X-File. If you do not solve an X-File in 3 turns, it and all Non-Agent attached cards are discarded.

Debriefing Phase

Max hand size is 4 cards. Discard excess cards.

Card Type Notation

- A** Agent
- I** Investigation
- X** X - File
- C** Contact
- Z** Discard in Resources Phase to Draw 3 cards
- P** Plot Twist
- IP** Investigation Points

Episode Guide Mythology

X-com Incursion

Introduction

Two Player Card Game based on the 1993 Video Game Classic. The player takes the role of the X-COM organization, defending Earth from a mysterious Alien Invasion.

Disclaimer

X-COM is a licensed copyrighted property. This is merely a fan site.

Victory

If the Alien Player completes the X-Com Base Destruction Mission he wins. If the Earth Player completes the Cydonia Base Destruction Mission he wins. Aliens also win if the Panic Level ever gets to 50 or more.

The Base Decks

Each player gets his own unique Base Deck.

X-com Base Deck Card Types

- I** Interceptor
- B** Base
- L** Logistics
- S** Squad
- T** Tactics
- D** Defense
- W** Weapon

Alien Base Deck Card Types

- U** UFO
- M** Mission
- A** Alien Race
- T** Terror
- W** Weapon
- F** Functions
- S** Support

Base Decks & Active Decks

Players actually use 2 decks: Their Base Deck & an Active Deck. The Active Deck is a subset of the Base Deck. Each player starts with a set 20 cards in their Active Deck.

During play, players research cards from their Base Deck and Transfer them to their Active Deck. Only cards in the Active Deck go into a players hand during Draw Phase. The Active Deck is kept face down.

The Base deck is kept face up.

The Discard & Trash

Only your Active Deck will have a Discard. If your Active Deck ever runs out, shuffle the discard and draw from it. When you Trash a card it immediately goes to the bottom of your Base Deck.

The Discard is kept Face-up.

Card Ranks

Every card has a numerical Rank value. Ranks are used in Melds to determine who wins each turn.

Card Development Cost

Every card has a Development Cost. This is the cost in Research Levels needed to transfer it from the Base Deck to the Active Deck.

Card Research Levels

Every card has a Research Level. Active cards with a Research Level are used to buy cards from the Base Deck.

Panic Tokens

There is a common set of Panic Tokens (PT). Only the Human player gets or loses PT. The number of PT in play is also referred to as the Panic Level (PL).

Setup

Determine who is X-COM and who is the Aliens. The Earth player starts with zero Panic Tokens. Each player assembles their Starting Active Deck.

Players shuffle their Active & Base Decks.

Turn Sequence

Each turn has 10 Phases:

1. Logistics Phase
2. Deploy Phase
3. Action Phase
4. Interception Phase
5. Tactics Phase
6. Morale Phase
7. Base Phase
8. Search Phase
9. Research Phase
- X. End Phase

Logistics Phase

Both players draw X cards from your Active Deck and put them in your hand. If your Active Deck ever

runs out, shuffle the discard and draw from it. X is a result by the number of Panic Tokens the Humans have in play:

PL:	HD	AD	Cummulative Compensation:
0	8	8	None
1-9	8	8	X-COM gets Search +1
10-19	7	8	All Base & Logistic cards get RL +1
20-29	7	9	All Defense & Weapon cards get Trash for R+1*
30-39	6	9	All Tactics cards get the ability Trash for R+2*
40-49	6	10	All Interceptor & Squad cards get Trash for R+3*
50+	-	-	Aliens Win game!

PL Panic Level; R = Rank; RL = Research Level

HD Humans Draw this many cards

AD Aliens draw this many cards

* Only if the card does not already have this ability
Cummulative Compensation: All is not lost! As X-COM gets hard pressed, it fights harder... Certain card types gain bonuses or new abilities. Note when the Trash for Rank Bonus ability is used, the player declares if it is being used in Interceptor or Tactics Phase, but the card does not actually get Trashed until End Phase.

Deploy Phase

Both Players reveal their Hands. Cards are placed face-up on the table in front of their Owners. This is called a Deployment.

These cards are considered to be in play.

Action Phase

Supply, Call, and Kill actions occur in this Phase. Start with the Human player. Players take turns playing one of these actions each as allowed by the cards they have deployed. For each Supply bonus, draw 1 card from your Active Deck.

These cards are then immediately deployed. This is called a Supply Action. Note that the cards deployed may give you more actions you can take this phase! For each Call Action search your discard for a card of the indicated type and put it into play (deploy it).

For each Kill action, discard a target enemy card (of your choice) of the indicated type. Note that this may eliminate a card with an action before your opponent is able to use that action!

Interception Phase

Use the highest Rank of all UFO cards played by the Alien player. Also add any bonuses to the Interceptor score provided by other played cards. Next, use the highest Rank of all Interceptor cards played by the Earth player.

Also add any bonuses to the Interceptor score provided by other played cards. If the Earth player had a higher score, he wins, and skip Tactics Phase. If the Alien player had a higher score, or the Human player did not play an Interceptor card, the Alien player wins. Aliens win ties.

Tactics Phase

Skip this Phase if the Earth player won Interception Phase. The Earth player makes a Meld from his played cards. The Earth Meld may contain up to: 1 Base card, 1 Logistics card, 1 Squad card, 1 Tactics card, 1 Weapon card, and 1 Defense card.

The Alien player makes a Meld from his played cards. The Alien Meld may contain up to: 1 Mission card, 1 Alien Race card, 1 Terror card, 1 Weapon card, 1 Functions card, and 1 Support card. Each player adds up the total Ranks of all the cards in his Meld.

Side with highest Meld Rank Total wins. Aliens win ties. The Extra ability allows you to meld an extra deployed card of the same Type. The More ability allows you to meld an extra card of a different (indicated) Type.

If the winner wins by a score difference of 10 or more he may cause 1 target opponent's card in play (of winners choice) to be Trashed! Some cards give Rank bonuses to other cards. A deployed card will still give its bonus even if it is not melded.

Morale Phase

Note: The Humans are the Morale winners if they won in Intercept or Tactics Phase. The Aliens are the Morale winners if they won Tactics Phase. If the Aliens win, the Humans gain X Panic Tokens, where X is the difference in the Meld scores in Tactics Phase.

If the Humans win, they lose X Panic Tokens, where X is the difference in the Meld scores in Tactics Phase.

Base Phase

Keep the top 5 cards of your Base Deck visible to both players. (Splay them as convenient) These Visible Base cards are called the Staging Cards. When the Super Search Action is played, Trash one of the Staging Cards & replace it with the card found by the Super Search.

Search Phase

You may Trash 1 Staging card and draw a replacement. This is called a Search Action. (Remember when you Trash a card it is placed on the bottom of your Base Deck)

Research Phase

You may buy one or more Staging Cards. Each Staging Card has a Development Cost. Discard cards from your hand with a total Research Level equal to or greater than that of the card you are buying.

Put the newly bought Staging Card into your Discard Pile.

End Phase

You may Trash 1 of your cards in play. This is called a Trash Action. Main Base and Cydonia Base may never be discarded.

Finally, Discard all your cards in Play.

Psionics

Some cards have an extra sub-type of Psionics. The Human player can only buy Psionic cards in Research Phase if he has at least 1 Psi-Laboratory Card in his Active Deck or Discard.

Victory Missions

For the Human player to win, he must play an Avenger and the Cydonia or Bust card and win the turn. For the Alien player to win, he must play a Battleship plus the Final Assault card and win the turn. Note that the Cydonia or Bust and Final Assault cards can never be Trashed or be caused to be discarded (killed) by the card play of an opponent.

X-com Risk

Introduction

Solo Board Game. Multiplayer Rules for 2-4 players.
Game based on the X-Com universe.

Disclaimer

X-Com is a licensed copyrighted property. This is merely a fan-site.

Game Item Master List

- World Map (WM)
- Region Counters (RC)
- Panic Tokens (PT)
- Loyalty Tokens (LT)
- Satellite Tokens (ST)
- Base Markers (BM) (Numbered)
- Interceptor Figures (IF)
- Carrier Figures (CF)
- Squad Figures (SF)
- Research Tokens (RT)
- Erilium Tokens (ET)
- Experience Tokens (ET)
- Time Token (TT)
- Damage Counters (DC)
- Mission Markers (MM) (Numbered)

- Invasion Markers (IM)
- Credits (CR) (Denominations of 1, 5, 10, and 50)
- Training Card Deck (TC or TD)
- Hero Card Deck (HC or HD)
- Research Card Deck (RC or RD) (3 Stages)
- Mission Card Deck (MC or MD) (3 Stages) (Includes Alien Tech Cards)
- Base Card Deck (BC or BD) (Rooms or Facilities)
- Alien Tactical Cards (AT) (3 Groups)
- Starting X-Com Tactical Deck (XD)
- Alien Weapon Cards (AW)
- Acting Director Token (ADT) (Multiplayer)
- Victory Tokens (VT) (Multiplayer) STAGES The game is divided into 3 Stages in order: I, II, III. Certain Events will trigger the move from one Stage to the next. Often you will be directed to use decks, cards, or rules for the appropriate Stage.

The World Map

This is used to mark the locations of bases, satellites, missions, invasions, and panic markers. There are 25 Countries and Blocks (of Countries) on the map. These are also called Regions.

Map Region List

#	Country/Bloc	INC	Size	PRL	POP	RMP
1	USA	15	4	10	3	10
2	China	8	4	10	14	8
3	Russia	2	6	10	1	9
4	West Europe	4	1	8	1	5
5	Japan	6	1	3	1	1
6	UK	3	1	8	1	6
7	Germany	4	1	6	1	4
8	India	2	1	10	12	7
9	Canada	2	4	5	1	1
10	Brazil	2	3	4	2	1
11	Italy	2	1	2	1	1
12	Australia	2	3	4	1	1
13	Balkans	1	1	3	1	1
14	Central America	2	2	4	2	1
15	Korea	1	1	5	1	2
16	SE Asia	2	2	6	6	1
17	North Africa	2	2	4	2	1
18	Scandinavia	2	2	4	1	1

#	Country/Bloc	INC	Size	PRL	POP	RMP
19	Upper S. America	1	2	4	1	1
20	Lower S. America	1	2	4	1	1
21	Central Asia	1	1	3	1	1
22	Eastern Europe	2	1	3	1	1
23	Middle East	1	2	8	3	3
24	Central Africa	1	3	4	2	1
25	South Africa	1	2	3	1	1

Region Income (inc)

This is how many credits the region will provide to X-Com each week if the Region has at least 1 Loyalty Token (LT). If a region has no Loyalty or Panic Tokens on it, it will generate no income. For each LT on a region after the first it will generate 1 extra income (up to +5).

If a region has any Panic Tokens on it, it's income is reduced by 1. If a region is in total panic, it will not generate any income. _____

Region Population (pop)

Population is factor for PRL.

Region Size

Size determines how many counters there are for a region in the Random Region Counter Cup (RRCC). (Example: USA would have 4 and Italy 1). Size is also the number of satellites needed in a region to give it complete coverage.

Size is also a factor for PRL.

Relative Military Power (rmp)

Relative Ranking of the Militaries of the world including such factors as: Nukes, personnel, projection, technology, and weapon systems. RMP is a factor for PRL.

Panic Resistance Level (prl)

This is the number of Panic Tokens (PT) a region can contain before it goes into Total Panic. A Base increases a Region's PRL by 1. Complete Satellite Coverage increases a Region's PRL by 1.

Near Panic

If a Region has PT equal to half or more of its PRL, it will provide only half of its income rounding down.

Total Panic

If a Region is in Total Panic (TP), it produces no income, and its counters are removed from the RRCC. A Region that goes into TP loses all Loyalty Tokens.

Main Base Location Benefits

Location of Region:	Benefit:
North America	Air & Space: Hangers and Aircraft cost %50
South America	We Have Our Ways: Keep 1 extra card of Research Deck face-up
Europe	Expert Knowledge: Gain +1 Research Token per Turn
Asia	Future Warfare: Gain +1 Experience Token per turn
Africa	All In: Gain 3 Credits per Turn

Setup

Choose a Region for your Main Base. Place the #1 Base Marker on the chosen Region. Place a Loyalty Marker on the Region.

Place LM on 2D10 other Regions of your choice. The X-Com player starts with the following additional Assets: BC: Mission Control, Power Generator, Research Lab, Barracks, Satellite Uplink, Hangar, Situation Room 2 Interceptors, 1 Carrier, 1 Satellite, 2 Squads

4. Build Phase
5. Development Phase
6. Mission Phase
7. Detect Phase
8. Intercept Phase
9. Invasion Phase
10. Training Phase

Turn Sequence

Each turn has 10 Phases:

1. Operations Phase
2. Income Phase
3. Research Phase

Operations Phase

For each Mission card that is Face-up place 1 Time Token (TT) on it. If a Mission card has 3 TT on it, discard the Mission card and the Region it was on gains 1 Panic Token and loses 1 Loyalty Token. If there are less than 5 face-up Mission cards flip over new ones from the Current Phase Mission deck until there are 5.

If you draw an Alien Tech Card from the mission

deck place it to the side; its effects are permanent. Immediately draw a replacement Mission card. Draw a random Region Counter (from the Cup) and place it on each newly uncovered Mission. Remove 1 Damage Counter from all Squads that have 1 or more.

Income Phase

Gain Credits from all regions not in total panic and that have at least 1 LT. Gain +1 CR for each extra LT a Region has. Regions in Near Panic generate 1 less

Credit.

Regions in Total Panic generate no Credits.

Research Phase

Gain 1 Research Token for each Research Lab you have. Some Techs generate additional RT.

Build Phase

You may make purchases using your hard earned Credits:

Build Table

Cost:	Item:
40	Unit: Squad Card (Choose which Base: Must have Barracks)
30	Unit: Interceptor (Choose which Base: Must have Hangar)
50	Unit: Carrier (Choose which Base: Must have Hangar)
20	Base Room/Facility (Choose which Base)
20	Unit: Satellite (Choose which Region; Cannot exceed Uplinks x4)
40	Base (Choose Region for New Base)

You cannot build more Units than you have Engineering Bays and Forges. You can build a Max of 1 room per turn per Base. A new Base will start with only 1 Room (at no additional cost); a Power Generator Room.

If a base has more rooms than its power Generators can handle, the extra rooms will become idle. Flip the non-functioning room cards upside-down. Rooms can only be powered on or off in Build phase. Likewise if you have excess units they are flipped over and un-useable until the needed facilities are in place. Units can be transferred from base to base in build phase. Room layout is not a factor in this game.

Development Phase

Keep the top 4 cards of the current Research Deck face up. You may purchase these individually using a combination of Research Tokens (RT) and Elirium Tokens (ET).

STAGE	RT	ET
I	4	1
II	8	2
III	12	3

Mission Phase

You may assign undamaged squads to go on Missions. Note that each squad requires a Skyranger Carrier. Conduct Missions one at a time.

A Mission is resolved by a battle using the Tactical Battle Rules Section. If X-Com wins a Mission, it gets 1 Loyalty token in the Region plus the rewards stated on the Mission card. If the Aliens win:

1. The Squad is destroyed on a roll of 7 or less on 1D10. This is the Survival Roll.
2. Flip a card from the X-Com Tactical deck. If it is a Hero, the Hero is killed.

3. The Region the Mission was in gains 1 Panic Token.

If the Damaged Squad survives, put 3 Damage Counters on it. Cards played are shuffled back into their respective decks after the Mission. The same game mechanics are used for resolving Invasion Battles.

Detect Phase

There will be X number of Invasions each turn. Roll on the Invasion Table:

Invasion Table

1D10:	Invasions:
1-3	0
4-7	1
8-10	2
11+	3

Draw a Counter from the Random Region Counter for each Invasion. Place an Invasion Marker on the indicated Region. Roll 1D10. This is the Detection Roll.

Add +1 if you have a satellite in the Region or +2 if you total Satellite Coverage. Add +1 if you have a base in the Region. If you get 7+ on the roll, you detect the incoming invasion and may send Interceptors against it.

If the Invasion is not detected, the target region gets 2 Panic Tokens.

Intercept Phase

You may send 1 or More Interceptors against each detected Invasion. Roll 1D10. This is the Interception roll.

Interception Table

1D10:	Result:	1D10:	Result:
1-2	1 Interceptor Damaged	6-9	Invasion Reduced
3	1 Interceptor Damaged; Invasion Reduced	10+	Invasion Destroyed
4-5	Standoff: No Effect		

If an Interceptor is Damaged roll 1D10. This is the Defense Roll. Add Air Defense Bonuses to your Roll. On a roll of 7 or less the Interceptor is Destroyed.

If not destroyed the Interceptor will cost 1D10 Credits to fix in Build Phase. A reduced Invasion gets -1D10 Force in Invasion Phase. Get +1 to the roll if the Region has total Satellite coverage.

If total Interception Bonuses are greater than total Alien Air Power Bonuses get +1 to the roll. If the Alien Bonuses are greater subtract 1 from roll.

Invasion Phase

For each Detected Invasion conduct a Battle using the Tactical Battle Rules Section. If X-Com defeats an Invasion the Region removes 1 PT and gains 1 LT If the Aliens win an Invasion the Region gains 2 Panic Tokens. Handle squad survival as in Mission Phase.

Training Phase

Gain 1 Experience Token (ET) for each Officer School you have. Spend 5 ET to pick 1 of the top 5 cards of the Training Deck. Spend 5 ET to pick the top card of the Hero Deck.

You cannot have more Psionic Heroes then you have Psi Labs. If you pick a Psionic Hero you cannot Maintain discard it and draw a new Hero.

Tactical Battle Rules Section

A Battle (Mission or Invasion) is resolved in 2 parts:

1. Creation of a Tactical Deck
2. Playing 1 hand of X-Com vs Alien Tactical Decks.

A Battle has 8 Steps:

1. Assemble a Tactical Deck (at the beginning of each Mission and Invasion).
2. Shuffle the newly created Tactical Deck. Draw 10 cards.
3. Next discard any number of cards and draw replacements.
4. Play your final Hand. This is also called your Meld.
5. Next draw 10 Cards from the Alien Tactical Deck of the Appropriate Stage.
6. Calculate the Force Total of Both Hands.
7. Resolution: The Higher Total wins. Aliens win ties.
8. Experience: If you win a Battle gain 1 Experience Token.

X-com Tactical Deck Limits

A Tactical Deck must contain at least 30 cards. The cards that may go into a Tactical Deck include:

1. Cards in the starting Tactical Deck.
2. Hero Cards (Max 6)
3. Any Training and Research Cards you control Designated as Tactical.

To put Psionic Cards in a Deck, you must include at least 1 Psionic Hero.

X-com Battle Meld Limits

A Battle Meld can contain a max of 4 Soldiers (Squaddies and or Heroes). A Meld cannot have more primary weapon cards than Soldier cards. A Meld cannot have more Equipment cards than Soldier cards.

A Meld cannot have more Armor cards than Soldier cards. Note: a single Squad, Carrier, and Hero may be used in up to 1 Mission and 1 Invasion per turn. Use Time Tokens to keep track of this.

Alien Tactical Decks

The Stage I Deck is the Group A cards. The Stage II Deck is the Group A and Group B cards mixed together. The Stage III Deck is all 3 Groups (A, B, and C) mixed together.

Alien Tech Cards

These are mixed into the Mission Decks. When revealed, the Aliens permanently get the indicated benefit.

Multiplayer Rules

Rotating Solo Hot-Seat Rules. One player gets the Acting Director Token (ADT). After each Phase and Battle the ADT is passed to the player to the left.

The Acting Director (AD) makes all X-Com decisions during his tenure. For each Successful Battle and Interception the AD gets one Victory Token.

Base Deck Card List

These are rooms that are part of your base. There is no limit to the number of these you can have.

Room:	Stage:	Notes:
Mission Control	I	Supports 2 Missions per turn
Satellite Uplink	I	Can Support 4 Satellites
Barracks	I	Can support 3 Squads
Hangar	I	Can support 3 Aircraft
Power Generator	I	Can support 7 Rooms
Research Lab	I	Gain 1 RT per Turn
Alien Containment	I	Required for level II Research
Engineering Bay	I	Required to build Units
Foundry	I	Units made at this Base cost \$5 less
Psi Lab	II	Support 1 Psionic Hero
Officer Training	I	Gain 1 ET per Turn
Situation Room	I	Gain 2 Credits per Turn
Hyperwave Relay	II	Get +1 to Detect and Intercept Rolls
Gollop Chamber	III	Psionic Cards get +4 Force

Notes:

The Hyperwave Relay and Gollop Chamber are built automatically when specific Missions are completed. To build a Psi Lab costs 6 Research points in addition to credits. When you first build a Psi Lab, search the Training Deck for a Psionic Hero and put it into play at no additional cost.

Max 1 per Base: Foundry, Mission Control, Situation Room.

Research And Tactical Decks Notation

Copies of Card in Deck

NT Non-Tactical

Captive = Gain 2 Credits; If you have a containment facility also gain 2 RT

Psi Heavy Hero	2	5	+3 with Armor; Psionic
Psi Sniper Hero	2	4	+4 with Terrain; Psionic

Mission Deck Stage I

Name:	Reward:
Rescue Scientist	Gain 1 Research Lab Facility
Rescue General	Gain 1 Officer School Facility
Fact Finding Mission	Gain 2 RT and Get +6 Force on next Mission
Retrieve Weapon Fragments	Gain 3 Elerium and 1 RT and 5 Credits
Investigate Landing Site	Gain 2 Elerium and 3 RT
Investigate Abduction	Gain 3 XT and 2 RT

Name:	Reward:
Collect Autopsy Corpses	Gain 4 RT and 5 Credits
Capture Sectoid Commander	Gain 1 Psi Lab Facility
Crash Site Clean-up	Gain 5 Elerium
Retrieve Alien Weapon	Gain 1 Alien Weapon Card
Recover Alloys	Gain 3 Elerium and 10 Credits
Recover Power Source	Gain 4 Elerium and 1 RT
Recover UFO Flight Computer	Gain 1 Satellite Uplink Facility
Salvage Mission	Gain 2 Elerium and 15 Credits
Council Mission	Gain 25 Credits
Target Escort	Gain 5 XT
Friends in Low Places	Gain 1 random non-psionic Hero
Rescue Abductees	Gain 1 random non-psionic Hero
Collect Outsider Shard	Gain 5 RT
Scout Ship	Alien Tech: -1 to Detect Rolls
Medium Ships	Alien Tech: -1 to Interception Rolls
Abductor Ships	Alien Tech: +1 to Invasion Rolls

Alien Weapon Cards

These are acquired through Missions. They may be added to your X-Com Tactical Deck or sold for 10

Credits. They are Primary Weapon Cards that produce 7 Force.

Mission Deck Stage Ii

Name:	Reward:
Assault Alien Base	6 Elerium and 20 Credits
Contain Terror Attack	Panic -1 and 1 Skyranger
Counter Attack	+10 Force vs all Invasions this turn
Harvest Ships	Panic -1 and Loyalty +1
Repel Advance Units	+5 Force vs Inv this turn; 5 XT
Reconnaissance	+5 Force vs Inv this turn; 1 Interceptor
Evacuate Civilians	Panic -2
Block Infiltration	Panic -1 and 5 Elerium
Extract Engineers	1 Engineering Bay Facility and 25 Credits
Trace Hyperwave Signal	Gain Hyperwave Relay Facility
Intercept Alien Supply	5 Elerium and 1 Alien Weapon Card
Alien Bomb Disposal	10 Elerium
Covert Extraction	5 RT and 25 Credits
Covert Data Recovery	10 RT
Intercept Alien Harvest	Gain 1 random non-psionic Hero; Panic -1
Board Alien Battleship	Gain 1 Squad and 5 XT
Large Ships	Alien Tech: -1 to Interception Rolls
Battleships	Alien Tech: -1 to Interception Rolls
Supply Ships	Alien Tech: +1 to Invasion Rolls

Mission Deck Stage Iii

Name:	Reward:
Assault Mothership	Win Game (Battle: Draw 2 extra Alien Cards)
Recover Ethereal Device	Gain Gollop Facility and 5 RT
Restore Order	-3 Panic

Name:	Reward:
Capture an Ethereal	15 RT
Intercept Overseer	1 Interceptor; 5 Elerium; 25 Credits
Interrupt Alien Preparations	+10 Force vs all Invasions this turn; +5 XT
Repulse Invasion	-2 Panic and +1 Loyalty
Base Defense	Gain 2 random Heroes and 1 Squad
Sectopod Wreck	5 Elerium; 5 RT; 25 Credits
Overseer UFO's	Alien Tech: +1 to Invasion Rolls

Stage Progression

When all the Stage I Missions are complete the game enters Stage II. When all the Stage II Missions are complete the game enters Stage III. Note: When you go into a higher stage, you may still obtain Research cards from a lower stage (You may draw from the lower Research Decks).

Final Victory Or Defeat

If X-Com completes the Final Mission (Assault the Mothership) they win. If they fail the Mission they can try it again up to 2 more times. If they fail it a third time, they lose the game.

If 15 or more Regions are ever in total panic the Aliens win.

Playtesting Prototype

Most everything...

X-com Skirmish

Introduction

Board & card game for 2 players. Abstract Skirmish level squad combat.

Disclaimer

Based on the X-Com video games. This is merely a fan site.

Basic Scenario Victory

Complete destruction of all opposing units.

The Map

Use a large hex-map. Hexes should be at least one inch across to fit figurines.

The Units

Each unit represents a single soldier or alien. Use figurines or miniatures to represent units. (We use lego guys)

Dice

Six sided Dice are used.

X-com Unit Table

Type:	Hits:	Cost:
Civilian	1	Scenario Dependent
Military	1	Scenario Dependent
Squaddie	1	1
Specialist: Assault	2	2
Specialist: Heavy	2	2
Specialist: Sniper	2	2
Specialist: Support	2	2
Officer: Assault	3	3

Civilians

These units cannot attack unless armed. They cannot move and attack in the same turn.

Military

This includes police and regular soldiers.

Stacking Rules

- Normally one unit per space. Exceptions include:
1. Units being carried such as a soldier carrying a wounded Comrade or a captured alien.
 2. Flying units passing over or hovering over other units.
- Units cannot move through each other unless one is flying or jumping.

Learning Scenario

4 Squaddies 4 Thin Men

Basic Scenario

4 Specialists (one of each type) 6 Sectoids, 1 Sectoid Commander

Table Terminology

- Adj** Adjacent
Rnd Random
Dam Damage
Foe Enemy Unit
LOS Line of Sight
Dsc Discards
Opp Opponent (Opposing Player)
ST Suppression Token

Type:	Hits:	Cost:
Officer: Heavy	3	3
Officer: Sniper	3	3
Officer: Support	3	3
Hero: Assault	4	4
Hero: Heavy	4	4
Hero: Sniper	4	4
Hero: Support	4	4
SHIV Robot	4	4

Squaddie

New X-Com recruits. They can use the Squaddie Table.

Specialist

Veteran X-Com Troops. They have 2 Hits. They can use the Squaddie Table and one Specialist Table according to their type.

Officer

Higher Ranking X-Com Troops. They have 3 Hits. They can use the Squaddie Table and a Specialist and the Advanced Table according to their type.

Heroes

Elite X-Com Troops. They have 4 Hits. They can use 3 Tables like an Officer plus the Hero Table.

Assault

X-Com soldier type. Aggressive, fast, tough, close combat units.

Heavy

X-Com soldier type. Uses Large, Heavy, Unsubtle Ranged Weapons.

Squaddie Table

#	Result:	Notes:	#	Result:	Notes:

2	Mind Control	Range = 4 Control Foe till end of your next Turn
3	Panic	Range = 3 Foe Immobilized this and next Turn
4	Mindfray	Attack = 5 and Opponent Discards 1 Card
5	Alert	Look at Opponents Hand
6	Boost	Sectoid within 3 gets Move = 3 and Attack = 2

Muton Table

#	Result:	Notes:
1	Alien Grenade	Attack = 3 Area Affect with Damage +1
2	Blood Call	Draw 1 Card and Opp Discards 1 Rnd Card
3	Heavy Armor	Defense x2
4	Hand to Hand	Attack = 1
5	Intimidate	Range = 2 or 3 Foe Immobilized next Turn
6	Plasma Rifle	Attack = 4 or 5

Chryssalid Table

#	Result:	Notes:
1	Bite	Attack = 1
2	Dodge	Defense x2
3	Poison	Attack = 1

#	Result:	Notes:
4	Fast	Move = 1
5	Very Fast	Move = 2
6	Super-Fast	Move = 3 or Defense

Notes: They use all Attack cards as: Attack = 1

Units killed by Chryssalids become Zombies

Hatchling Table

#	Result:	Notes:
1	Grow	Become an adult Chryssalid
2	Dodge	Defense x2
3	Scurry	Defense

#	Result:	Notes:
4	Fast	Move = 1
5	Very Fast	Move = 2
6	Super-Fast	Move = 3 or Defense

Notes: They use all Attack cards as: Attack = 1

Units killed by Hatchlings become Zombies

Zombie Table

#	Result:	Notes:
1	Insensate	Defense
2	Bite	Attack = 1
3	Claw	Attack = 1

#	Result:	Notes:
4	Erupt	Become a Hatchling
5	Shamble	Move = 1
6	Unfeeling	Defense

Notes: They use all Attack cards as: Attack = 1

Units killed by Zombies become Zombies.

Heavy Floater Table

#	Result:	Notes:
1	Heavy Armor	Defense x2
2	Heavy Plasma Rifle	Attack = 4 with Damage +1
3	Alien Grenade	Attack = 3 Area Affect with Damage +1
4	Suppression	Gain 2 ST
5	Aggressive	Move = 2 then Attack = 3
6	Highly Mobile	Move = 3

Notes: Flyer. This Unit can also use the Floater Table.

Cyberdisc Table

#	Result:	Notes:
1	Mobility	Move = 2
2	Hardened	Defense x2
3	Alien Grenade	Attack = 3 Area Affect with Damage +1
4	Saucer Form	Move = 4 or Defense
5	Volley Attack	Attack = 5 or 6 with Damage +1
6	Forward Cannons	Attack = 7 or 8 with Damage +1

Note: Flyer

Drone Table

#	Result:	Notes:
1	Repair	Heal 1 Hit to adj unit
2	Quick Repair	Move = 2 then Heal 1 Hit to adj unit
3	Minor Attack	Attack = 2

#	Result:	Notes:
4	Escort	Move = 1
5	Flight	Move = 2 or Defense
6	Evade	Defense x2

Note: Flyer

Muton Elite Table

#	Result:	Notes:
1	Alien Grenade	Attack = 3 Area Affect with Damage +1
2	Blood Call	Draw 1 Card and Opp Discards 1 Rnd Card
3	Heavier Armor	Defense x3
4	Toe to Toe	Attack = 1 with Damage +1
5	Intimidate	Range = 2 or 3 Foe Immobilized next Turn
6	Heavy Plasma Rifle	Attack = 4 or 5 with Damage +1

Muton Berserker Table

#	Result:	Notes:
1	Bullrush	Move = 2 then Attack = 1 with Damage +1
2	Blood Call	Draw 1 Card and Opp Discards 1 Rnd Card
3	Heavier Armor	Defense x3
4	Claws	Attack = 1 with Damage +2
5	Intimidate	Range = 2 or 3 Foe Immobilized next Turn
6	Rush	Move = 2 (Can be on Opp turn if Hit)

Notes: They use all Attack cards as: Attack = 1

Sectopod Table

#	Result:	Notes:
1	Fusion Lance	Attack = 7 or 8 with Damage +3
2	Hulk	Defense x3
3	Plasma Weapons	Attack = 4 with Damage +1
4	Overwatch	Attack = 6 on Opponents Move Phase
5	Stomp	Move = 1 then Attack = 1
6	Fusion Barrage	Attack = 6 Area Affect with Damage +2

Ethereal Table

#	Result:	Notes:
1	Reflect	Attack targeting Ethereal hits attacker
2	Mind Control	Range = 4 Control Foe till end of your next Turn
3	Psi Lance	Attack = 5 with Damage +3
4	Mindfray	Attack = 6 and Opponent Discards 1 Card
5	Psi Drain	Attack = 3 Foe Immobilized this and next Turn
6	Rift	Attack = 4 Area Affect with Damage +2

Turn Sequence

Players take turns. Each turn has 3 Phases:

1. Tactical Phase
2. Move and Fire Phase
3. End Phase

Action Deck

Players share a common action deck.

Tactical Phase

Draw 5 cards. Draw 4 if you only have 2 units left. Draw 3 if you only have 1 unit left.

If the deck runs out, shuffle the discard and draw from it. Discard excess cards.

MOVE and FIRE PHASE Your Units may individually move and fire in either order as you decide. All of your units get one free move of 1 hex. In addition to the free move, you can play one Move card on a unit (per turn) to move it again a number of spaces as stated on the card.

Note: Some cards are both Attack and Move cards. Play an Attack card to have a unit attack. The attack card has a number which is the range of the attack.

All Attacks do a base of 1 Hit of Damage.

Damage And Death Rules

Use Chits or tokens stacked with a unit to record Damage. A unit reduced to 0 Hits is Killed.

Defense Rules

Your opponent may play Defense cards to negate Damage. A Defense effect negates a base of 1 Hit of Damage.

End Phase

Max hand size = 5 cards. Max is 4 if you only have 2 units. Max is 3 if you only have one unit left.

Suppression Tokens (st)

ST are also called Smoke Tokens. As long as you have 1 or more ST, when a Foe attacks roll 1D6. On a roll of 4+ that Foe cannot attack that target. Either way discard 1 ST.

Area Affect

Some weapons and attacks have an area affect. The targeted space takes full damage. Every surrounding space rolls 1D6. On a roll of 5+ the unit in That space, if there is one, takes 1 Hit of Damage.

This is called Splash Damage.

Action Deck Card List

Card Name:	#	Notes:
Maneuver	4	Move = 1
Run	3	Move = 2
Sprint	2	Move = 3
Point Blank	3	Attack = 1
Short Range	3	Attack = 2
Medium Range	3	Attack = 3
Long Range	3	Attack = 4
Extreme Range	2	Attack = 5

Hex Ratings

Every Hex has 2 Ratings: Terrain and Elevation. Each rating has a numerical value from 1 to 5.

Terrain

A Unit can use a Spec card equal to or less than the value of the terrain it is in to get a Defense effect. Higher ratings provide more potential protection.

Elevation And Los And Flying

A unit on a lower elevation cannot attack a target if there are one Or more higher elevation hexes blocking its line of sight. Flyers are considered to always be at elevation = 6 Units may attack through (past) other units ONLY if they are at a lower Elevation or if the attack is a grenade or indirect.

Spec Cards

Spec (Special) Cards are used to activate unit table abilities. For example: I have a Psychic Hero Sniper and a Spec 1 card. I can activate the level 1 ability for him for any one of the tables he has access to which would include: Squaddie, Sniper Specialist, Sniper Advanced, Hero, and Psi Soldier

Immobilization

An immobilized unit cannot move, attack, defend, or do anything.

Mind Control

You control the enemy unit. You can use it the same turn you gain control of it. You must use your own cards to make it move and attack. You may play a Spec 5 card to make it kill itself. You may play a Spec 6 card to kill itself with a grenade.

Card List Notation

copies of that card in the deck

Card Name:	#	Notes:
Full Cover	1	Defense x2
Partial Cover	1	Defense
Tough	1	Defense
Evasion	1	Defense
Tactics	1	Draw 2 Cards
Diversion	1	Gain 2 ST
Strategy	1	Look at opponents hand and next 7 cards in deck
Friction	1	Opponent Draws 2 Less cards next turn
Overwatch	2	Attack = 3 or 4 on Opponents turn
Spec 1	3	Use Type 1 Table Ability
Spec 2	3	Use Type 2 Table Ability
Spec 3	3	Use Type 3 Table Ability
Spec 4	3	Use Type 4 Table Ability
Spec 5	3	Use Type 5 Table Ability
Spec 6	3	Use Type 6 Table Ability

Optional Rules

Detection

All units start the game in Hidden Status. Mark them with a Hidden Token (HT).

Detection Table

1D6	Result:	Notes:
1	Undetected	Foe remains hidden. You may not attack
2	Wasted Attack	Foe remains hidden. The attack misses
3	Shot in the Dark	Foe remains hidden. The attack hits!
4	Wild Shot	Remove HT but attack misses
5	Detected	Remove HT but you may not attack
6	Detect and Attack	Remove HT and you attack

Notes: On a miss you must discard the attack card; if you may not attack, keep the card. Get a +1 to the roll if the foe is within 3 hexes. If the Attack was an Area Affect and it "misses" still roll for Splash Damage for the Target and all units in range.

Hiding

If a detected unit moves to a hex that is range 5 or more distant from a Foe (or 6 from a sniper or Flyer) it

Revealing Yourself

Every time a hidden unit moves or attacks roll 1D6: On a roll of 4+ remove its HT.

Flushing Them Out

You may attempt to attack a hidden unit. First make a Detection Roll on the Detection Table.

regains its HT.

Panic

If a Human unit is attacked more times than it has hits in a turn or if a friendly unit within LOS is killed or if it is the first time the unit is seeing a new alien type roll 1D6 on the Panic Table:

Panic Table

1D6	Result:	Notes:
1	Rout	Unit runs off the map
2	Cower	Unit immobilized on its next turn
3	Pinned	Unit can only defend on its next turn
4	Berserk	Unit must move towards nearest foe its next turn

1D6	Result:	Notes:
5+	Keep Cool	Unit unaffected

Notes: Squaddies get -1 to roll. Heroes get +1 to roll.

X-men Skirmish

Introduction

Board & card game for 2 players. Battle between Mutants & Sentinel Robots. Takes place in the X-Men Universe.

Each figure (unit) represents a Mutant or Robot.

Disclaimer

'X-Men' is a copyrighted/trademarked property. This is just a fan site.

Banshee	Sonar	Look at opponents hand
Rogue	Energy Drain	Attack: range = 1
Archangel	Razor Wings	Move & Attack: range = 1
Longshot	Mystical Luck	Draw 2 cards and discard one

Name	Power	Game Effect
Sentinel	Disintegrator Beams	Attack: range = 3

Setup

The X-Man player gets 8 Mutants with a maximum Hit point total of 16. The X-Man team must include one leader. The Sentinel player gets 8 Sentinel Robots.

Each player places one unit on each square of his back row. Units may not stack.

The Cards

Players share a common deck.

Turn Sequence

Players take turns. Each turn has 3 phases:

1. Orders Phase
2. Move Phase
3. Battle Phase

Orders Phase

Draw 3 cards. If the deck runs out, shuffle the discard and draw from it. Max hand size = 5 cards.

Discard excess cards.

Move Phase

Play (discard) a Move card to move one of your units. Units cannot move through other units except for Flyers. The move card has a number.

This is the number of spaces the unit moves. Moves are diagonal or orthogonal. Instead of moving just one unit in any direction, you have the option of moving

one or more units forward the indicated number of spaces using a single move card.

Battle Phase

Play (discard) an Attack card to have a unit attack. The attack card has a number. This is the range of the attack.

Attacks are diagonal or orthogonal. The enemy unit that is the target of the attack takes 1 Hit point of Damage. Units reduced to zero hits are knocked out and removed from the map.

Units cannot attack through other units. Units hit by a Disable attack do not take damage, but cannot move, defend, or Attack for 2 turns.

Special Powers

Discard a Special Power card to activate a units special power. Note that there are X and Z type special powers. If a unit has 2 or more powers of one type it may choose which one to use.

Card List Notation

The X-Men

X-statiX

Introduction

Card game for 2-3 players. Each player recruits a team of Mutants for hire that use their powers and savvy marketing to Achieve celebrity status and all the glory and riches they can get. Send your Mutants on high profile missions to earn even more money.

Victory

The player with the most Money Tokens at the end of the game wins.

Game End

The game ends when a player goes to start his turn, and there Are no cards left in the deck.

Dice

Six sided dice are needed.

Money Tokens

Players share a common set of Money Tokens (MT).

Fame Tokens

Players share a common set of Fame Tokens (FT).

Special Cards

There are 3 Team Name cards and 3 Owner cards available.

The Common Deck

Players share a common deck. Card types include:

- Heroes
- Marketing
- Missions
- Powers

Setup

Each player gets 1 Owner Card. Each player gets 1 Team Name Card. Each player is dealt a Hand of 7 Common Cards.

Each player starts with 4D6 MT. Players roll high on 1D6 to see who goes first. Play proceeds clockwise.

Turn Sequence

Players take turns. Each turn has 7 Phases:

- Opportunity Phase
- Recruitment Phase
- Publicity Phase
- Mission Phase
- Fame Phase
- Fortune Phase
- End Phase

Opportunity Phase

Draw 1 card and put it in your hand. You may draw extra cards, but first for each you must pay 1D6 MT or pass. This is the Opportunity roll.

If you pass, you may draw no more cards.

Recruitment Phase

You may put Mutants (Heroes) from your hand into play. To recruit a Mutant you must first pay 1D6 MT. This is the Recruit Roll. If you choose not to, recruitment phase ends.

When you recruit a Mutant, place his/her card face up in front of you and place 1 FT on it.

Publicity Phase

You may attach Marketing Cards to your Heroes. To attach a Marketing Card you must first pay 1D6 MT. This is the Marketing Roll. If you choose not to, Publicity phase ends.

A Mutant may not have more Marketing cards attached than he or She has Fame Tokens.

Mission Phase

You may play 1 Mission Card from your hand. To go on the Mission, you must have at least 1D6 Heroes. This is the Mission Roll. If you do not, skip the rest of this phase.

Roll 1D6. This is the Carnage roll. For each point of carnage, discard one Power card from your hand. For each point of Carnage not negated by a Power card, kill off 1 random Hero of your Team.

Gain 1D6 MT for each killed Hero. This is the Send-off Roll. If you have any surviving Heroes roll 1D6. Add the number of survivors. This is the Success roll. If the Success roll is higher than the Carnage Roll, the mission is a success and you gain 2D6 MT. This is the Payoff Roll.

You may discard Power cards to add 1 to the Success roll for each card discarded. All tokens and cards attached to a killed Hero are discarded/lost with him.

Fame Phase

Each of your Heroes that survived a Mission last phase gains a Fame Token.

Fortune Phase

Gain 1 Money Token for each FT and Marketing card you have in play.

End Phase

Max hand size is 5 cards. Discard excess cards.

Event Ability

Some Power and Marketing Cards have an Event Ability. Instead of (Not in addition to) using the card

as a power, or for Marketing, You may discard it (when appropriate) from your hand to activate its Event Ability.

Card Notation

H Heroes
M Marketing
X Missions
P Powers
CR Carnage Roll
SR Success Roll
PR Payoff Roll
E Event Ability

X-statix Common Deck Card List

Name:	Type	Notes:
Anarchist	H	Get -1 to the Mission Roll (Minimum of 1)
Toxic Sweat	P	E = Opponent discards 1 random card from hand
Dead Girl	H	Get -1 to Carnage Rolls
Regeneration	P	E = Reroll Carnage Roll
Reanimation	P	E = Put top Hero on discard into your hand
The Orphan	H	Reroll 1 Target roll on your turn
Superhuman Senses	P	E = Reroll target Die Roll

PR People	M	-
PR Spin	M	E = Sendoff Roll +3
Media Craze	M	-
Cult of Personality	M	Counts as 2 Marketing Cards
Roadshow	M	E = Reroll Mission Roll
TV Talk Show	M	E = Discard 1 random Hero of Opponent
Popularity Ratings	M	E = Hero gains 1 Fame token
National Television	M	-
Doop	M	Alien Camera Man
Licensing	M	E = Gain 2 MT
Reality TV	M	E = Hero loses 1 Fame token
Interviews	M	E = Payoff Roll +3
Ratings Bonanza	M	E = You may choose the casualties on a mission
Superstar Status	M	E = Draw 2 cards
Movies	M	-

Team Owner (manager) Cards

Name:	Notes:
Coach	Kill one of your own Team Members in End Phase to gain 1D6 MT
Spike Freeman	Max Hand Size = 7
Solomon O'Sullivan	Heroes cost 1 less MT to recruit each

Team Name Cards

Name:	Notes:
X-Statix	+1 to Sendoff Rolls
X-Force	+2 to Payoff Rolls
O-Force	All recruits start with one extra FT. Add 1 to the carnage roll.

Xanth Quest

Introduction

Board and Card game for 2+ players. Based on the Xanth series by Piers Anthony. If you are unfamiliar with the series, check out the links first.

It is light hearted fantasy filled with lots of Magic, puns, clichés, titillation, Mysteries, moral dilemmas, likeable characters, and just good romping fun.

Disclaimer

Xanth is a copyrighted property. This is merely a fan site.

Victory

Be the first player to get your pawn to the end space and then back to the Starting space. (It's a race game) This represents a quest involving a trek across the dangerous wilderness of Xanth.

Pawns

Each player has a pawn of a unique color. The Pawn represents the players main Character and any Companions.

The Board

- The Board is a Track 63 spaces long.
- The first space is the Starting space.
- The last space is the End space.
- Space # 32 is the Gap Chasm.
- Each space must be big enough to contain one face-up card

Dice

Six and Ten sided dice are needed.

Character

Each player starts with one Main Character of their choice. This can be any adventuring character from any of the Books. Every Main Character has a Power Level = 3.

An example of a Main Character would be Bink or Trent.

The Deck

Players share a Common Deck. There are 10 card types:

- C** Companion
- E** Event

- D** Delay Challenge
- L** Lethal Challenge
- Q** Quest Challenge
- X** Location
- A** Aid
- H** Healing
- N** Divination
- M** Move
- S** Safe

Setup

Players put their pawns on the starting space. The best looking player goes first.

Turn Sequence

Players take turns. On your turn roll 1D6 and move that many spaces forward. Once you have reached the end space, you turn around and head back.

If you land on an empty space draw one card and reveal it to all players.

Challenge Cards

If you draw a Challenge card, you must resolve it immediately. Roll 1D10 and add the Power of your Character and all Companions. This is the Hero roll.

Roll 1D10 and add the Power of the Challenge card. This is the Foe roll. Hero and Foe rolls are called Challenge rolls.

- If the Hero roll is equal or greater, the Challenge is defeated.
- If the Foe roll is greater, the Character is defeated.
- If a Character loses against a Delay Challenge, the Character misses his next turn.
- If a Character loses against a Lethal Challenge, the Character must discard a Companion.
- If the player has no Companions, he misses his next turn.
- If you win a Quest Challenge, move your Pawn forward 1D6 spaces.
- If you fail a Quest Challenge, move your Pawn backward 1D6 spaces.

The player may play Aid cards to raise his Hero roll total. Discard all played Challenge cards and Aid cards.

Locations

If a Location card is drawn, it is placed into the space. The location card stays there for the rest of the game and must be encountered by whomever lands on it. Some locations are challenges, some are safe,

some require you to roll on Special Tables such as the Settlement Table.

Note: You must stop upon entering the Gap Chasm Space. You cannot leave the Gap Chasm until you find a Way across.

Settlement Table

1D10	Result:
1	Magical Transport: Move Forward 1D6 Spaces
2	Hospitality: Nothing Happens
3	Intrigue: Miss next Turn
4	Legal Dispute: Miss next Turn
5	Gain Companion: Flip cards & take next Companion in Deck. Reshuffle
6	Receive Aid: Flip cards & take next Aid card in Deck. Reshuffle
7	Information: Look at next 7 cards in Deck
8	Perform Service: Quest Challenge of Power = 6
9	Difficulties: Flip cards & Face next Challenge card in Deck. Reshuffle
10	Safe Passage: Move Forward 1D6 Spaces

Gap Chasm Table

1D6	Result:
1-2	Find Way Across: You may move next turn
3-4	No Way Across: Roll again next turn
5-6	Gap Dragon: Lethal Challenge of Power = 9

Aid Cards

If you draw an Aid card, put it in your hand. Max hand size is 4 cards. Discard excess cards.

Companions

If you draw a Companion card, put into play face up in front of you. The Companion is "attached" to your Character. It stays in play until you lose a Lethal Challenge, or some other misfortune.

You can have a maximum of 3 companions. Discard excess Companions.

Move, Event, Divination, Safe, & Healing

If you draw an Event, Move, Divination, or Healing card, it must be resolved immediately. Effects of Events vary.

- For a Move card, immediately move 1D6 spaces forward.
- For a Divination card, look at the next 7 cards in the deck.
- For a Healing card, put a Companion in the discard back into play attached to your Character.
- For a Safe card, nothing happens.

Discard the Move, Safe, Event, Divination, or Healing card after it is resolved.

Confrontations

If you land on another player's pawn, there will be a duel. (Do not draw a card, and ignore locations) Resolve the Duel like a Challenge. A tie means nothing happens.

The higher total is the winner. The loser must miss his next turn.

Common Deck Card List

Card Name:	Type	Power	Notes:
Pranksters	D	2	Humans with Heat & Shield Spells

Travel Conjuror	M	-	
Wolf Head	L	2	
2 Headed Serpent	L	2	
Practical Decision	A	3	
Calculated Risk	A	3	
Truth Revealed	N	-	

Game Designers Notes

I read the first 9 books of the series in my teens. I just reread the first book, "A Spell for Chameleon". This game is based 98% on the material in that book.

I recommend the book. Its fun, cute, clever, and thought provoking. Piers Anthony is one of my personal favorites, along with Asimov, Heinlen, and Clarke.

Xenophon And The Ten Thousand

Introduction

Board Game for 1-4+ players. Each player represented by his own pawn is a unique incarnation of Xenophon and the Ten Thousand. The 10,000 are Greek Mercenaries who have come to fight for Cyrus, the younger brother of the Persian King Artaxerxes. Cyrus is killed in Battle against the King leaving the Greeks abandoned, deep in hostile Territory.

The Greeks begin a long march northward to the Black Sea and Greek Territory. The player whose Pawn reaches the Sea first and with the most men is the winner.

Victory

The game ends when all players have finally reached the last space on the Distance Track. Players then calculate their scores: Player Score = (Remaining Men) Divided by (Number of Turns to Reach the Sea)

Tracks

There are 2 Tracks: The Distance Track The Time Track

The Distance Track

This track has 60 numbered spaces. The first space is that of Cunaxa where Cyrus was killed. The last space is the Coastal Greek Colony of Trapezus.

Each player has his own uniquely colored pawn which he moves along the distance Track. Pawns may stack. Each space represents about 10 Miles.

The Time Track

This track has 60 numbered spaces. A single neutral pawn is moved a single space after all players have completed a single turn. When a player reaches the sea he should take his colored pawn from the Distance track and place it on the Time track on the current space to mark how long his journey took.

Each space represents about 2 Days.

Player Pawns

Each player has a pawn of a unique color. These move along the Distance track and at the end of a journey are used as a marker on the Time Track.

Men

Each player starts with 10,000 Men. Men are lost during the journey due to fighting, exposure, starvation, and desertion. Use paper and pencil to keep track of your manpower total.

The term Army represents whatever total men you have left.

Food Tokens

Each Food Token represents 1 days supply worth of food for the Army.

Starvation Tokens

Lack of Food Tokens will result in accumulation of Starvation Tokens.

Mutiny Tokens

These represent dissent and despondency amongst the ranks.

Anger Tokens

These represent the accumulation of barbarian forces arrayed against you.

Dice

Six sided dice are needed.

Action Deck

Players share an action deck. Most cards will increase or reduce the value of a target Dieroll. Most improve your rolls.

Others will be to the detriment of your opponent. Cards when played are discarded.

Setup

Players place their Pawns on the starting space of the Distance Track. Place a Neutral Pawn on the starting space of the Time Track. Players roll high to see who goes first.

Each player is dealt 3 cards from the Action Deck. Each player starts with 1 Food Token.

Turn Sequence

Players take turns. Each turn has 16 Phases:

- Draw Phase
- Route Phase
- Weather Phase

- Satrap Phase
- Negotiations Phase
- Attack Phase
- Battle Phase
- Exposure Phase
- Forage Phase
- Consumption Phase
- Starvation Phase
- Morale Phase
- Rally Phase
- Desertion Phase

2D6	Route Terrain	FR	TR	BR
2-3	High Mountains	-1	-2	+1
4-5	Mountains	-1	-1	+1
6	River	-	-2	+1
7	Desert	-1	-	-

FR Forage Roll Modifier
TR Travel Roll Modifier
BR Battle Roll Modifier

Weather Phase

Make a Weather Roll:

1D6	Severity:	FR	TR
1-3	Mild	-	-
4-5	Cold	-1	-1
6	Harsh	-2	-2

FR Forage Roll Modifier
TR Travel Roll Modifier

Get a -1 to this roll while on the first 30 spaces of the Distance Track

1D6	Result:
1	Confrontational: Gain 3 AT
2	Hostile: Gain 2 AT
3	Wary: Gain 1 AT

AT Anger Token
FT Food Token

Attack Phase

Make an Attack Roll: Roll 1D6: If your result is equal to or less than the number of AT you have, you

1D6	Casualties:
1	(1D6+ 4) x100 Men
2	500 Men
3	400 Men
4	300 Men

Exposure Phase

If the Weather was Harsh this turn make an Exposure Roll: Lose 1D6-1 x100 Men. Add 1 to this roll if you were attacked this turn. Add 1 to this roll if it was also harsh last turn.

- Travel Phase
- End Phase

Draw Phase

The current player draws 3 Cards. If the deck runs out, shuffle the discard and draw from it.

Route Phase

Make a Route Roll:

2D6	Route Terrain	FR	TR	BR
8	Hills	-	-	-1
9-10	Flat Plains	+1	+1	+1
11-12	Settled Area	+2	+2	-1

Satrap Phase

Make a Strap Roll:

1D6	Meet:
1-5	Nobody
6+	Encounter a Satrap

Get a +1 to this roll if you are in a Settled Area.

Negotiations Phase

If you encountered a Satrap this turn make a Negotiation Roll:

1D6	Result:
4	They Hide: Nothing
5	They Open their Markets to you: Gain 2 FT
6	Friendly: Remove all your AT and Gain 2 FT

are Attacked by Barbarians. Note: The Term Barbarians refers to anybody who is not Greek.

Battle Phase

If you are attacked by Barbarians remove 1 Anger Token and Make a Battle Roll:

1D6	Casualties:
5	200 Men
6	100 Men
7+	None

Forage Phase

You may choose not to Forage, if so skip this turn. Otherwise make a Forage Roll:

1D6	FT	AT
1	0	0
2	1	0
3	2	1

FT Number of Food Tokens you gain
AT Number of Anger Tokens you gain

Consumption Phase

If you currently have a Food Token, discard all your Starvation Tokens. Discard 1 Food Token. If you have no Food Tokens to lose gain 1 Starvation Token.

Starvation Phase

If you have Starvation Tokens make a Starvation Roll: Lose $(1D6 - 4 + Z) \times 100$ Men where Z = the number of Starvation Tokens you have.

Morale Phase

Make a Morale Roll:

1D6	Result
1-5	Nothing
6+	Gain 1 Mutiny Token

Add 1 to this roll if you were Attacked this turn. Add 1 to this roll if the Weather is Harsh. Add 1 to this roll if you have a Starvation Token

Rally Roll

If you have Mutiny Tokens make a Rally Roll:

1D6	Result
1-4	No Effect
5-6	Remove 1 Mutiny Token

Desertion Phase

If you have Mutiny Tokens make a Desertion Roll:

1D6	Result
1-5	No Deserters
6+	Lose 1D6 x100 Men

Add 1 to this roll for each Mutiny Token you have.

Travel Phase

Make a Travel Roll: Move your pawn forward 1D6 Spaces on the Distance Map. Note Weather and Route Modifiers. Subtract 2 from this roll if you Foraged this turn.

Subtract 1 from this roll if you have any Starvation Tokens. Subtract 2 from this roll if you Negotiated with a Satrap this turn. Subtract 2 from this roll if you were Attacked this turn.

1D6	FT	AT
4	3	1
5	4	2
6	5	2

End Phase

Max hand size is 7 cards. Discard excess cards.

Card List Notation

Solitaire Play

If you have a card in your hand that would penalize you, and the opportunity comes up, you must play it.

Optional Rule - Leader Cards

At the beginning of the game each player picks one Leader: Xenophon the Athenian - Reroll 1 Target Dieroll on each of your turns Chirisophus the Spartan - Max Hand Size +1 Clearatus the Spartan - Get +1 or -1 to 1 Target Dieroll on each of your turns Menon the Thessalaian - All your Negotiation Rolls are at +1

Xia Lin War

Introduction

Basic War Variant rules for an existing CCG: Xia Lin Showdown.

Rules

Your basic 2 player game of War. Use a common deck of Xia Lin Showdown cards, shuffled, and divided in half. High card wins. Cards of equal strength (Tie) result in a War.

Compare the values in the Hexagon, ignore the Circles. If the number in the hexagon has a plus after it, you may play an additional Card and add the values of

the cards together. For Villain cards use the topmost hexagon.

Master cards beat all other cards but tie with each other.

Designers Notes

My 4 year old is a big fan of the card game "War". He is also a big fan of the Xia Lin Showdown cartoon. However the CCG is too difficult for him and I personally Don't like the mechanics, so we use the cards to play this War version.

Plus I get to teach him some addition. This is one I've actually playtested.

Yakuza War

Introduction

Card Game for 2-4+ players. Setting: Late 17th Century Japan. Players are rival gangs of Yakuza trying to kill each other off.

(Yakuza = Organized Crime)

Victory

Kill your opponent's Boss unit.

The Deck

Players share a common deck.

Dice

Six sided dice are needed. (Every gang has a Gambling House: Dice games were popular)

Units

Units represent either individual Men or groups of Men. Units are represented by either Tokens or Cards.

Force

Force represents fighting ability. All Units have a Base Force. Modifier cards attached to a Unit increase a Unit's Force permanently.

Advantage cards will temporarily increase a Units Force in a Fight.

Setup

Each player is dealt a hand of 5 cards. Players roll dice. High roll goes first. Each player starts with: 1 Boss Token (Man of Force = 3) 2 Underboss Tokens (Man of Force = 2) 4 Gang Member Tokens (Group of Force = 1)

Turn Sequence

Players take turns. Each turn has 5 Phases: Fate Phase Recruit Phase Confrontation Phase Fight Phase Recovery Phase

Fate Phase

Draw 2 cards. If the deck runs out, shuffle the discard and draw from it.

Recruit Phase

Put Unit cards into play from your hand, including those That generate Token Units. You may attach Modifier cards to your Units.

Confrontation Phase

You may skip this Phase or declare a Fight. To declare a Fight, you must play a Fight Card and choose an Opponent. You are the Attacker. Your opponent is the Defender.

You may then play a Location Card. If you do not play a Location Card, your opponent may do so. Each player must commit a number of Units to the fight equal to The force of the Fight Card. It may not be more or less except if: -You do not have enough Units; you must commit all those you have left.

-Some Event cards allow you to play more or less units.

Fight Phase

Each Combatant rolls 1D6. This is the Initiative Roll. Reroll ties. High roll Wins. Initiative Loser picks one of his Units.

Next, the Initiative winner picks one of his Units. The chosen Units are known as the Combatants. Each Combatant rolls 1D6 and adds its Force.

Players may play advantage cards to increase a Units Force. The Unit with the lower total force is killed. In a tie roll Both Units are killed.

After a combat is resolved (someone is killed) a new one starts: Roll for Initiative and pick new Combatants. Each Unit on your side must fight before any Unit gets to fight a second time. The Boss Unit has the special ability of not having to fight unless He is the only committed Unit remaining.

Recovery Phase

Max hand size is 7 cards. Discard excess cards.

Card List Notation

- H** Unit card representing an Individual Man
- G** Unit card representing a Group of Men
- F** Fight Card
- A** Advantage Card
- E** Event Card
- M** Modifier Card
- L** Location Card

Common Deck Card List

card & sing the song. If the song deck runs out, pick another Beatles song you know to sing.

After singing roll 1D6 & move again. If you land on an Adventure space, you must move backwards 1D6 spaces. If you land on a Blank space your turn ends.

Song Deck Card List

Card Name: We All Live in a Yellow Submarine
Sergeant Pepper's Lonely Heart Club Band Help! I Need Somebody Love Me Do With a Little Help from my Friends A Ticket to Ride Nowhere Man Paperback Writer All Together Now

Game Designers Notes

Play some Beatles Music before, during, and after.

Young Wizards Duel

Introduction

Card Game for 2+ players. Fantasy Combat Theme.
Educational: Basic Math Skills for ages 6-8+

Victory

Reduce your opponents to zero Magic Points.

Magic Points

Each player starts with 25 Magic Points (MPs). If you lose all your MPs you lose the game. Use change (coins) to keep track of MPs.

The Deck

Players share a common deck. The deck has 50 cards. The deck has 5 Suites and 10 cards in each Suite.

The Suites are:

1. Fire Ball
2. Lightning Bolt
3. Heal
4. Shield
5. Creatures

Each card has a numerical force value (level) ranging from 1 to 10.

Fireballs

Fire Balls (FBs) do damage equal to their level. FBs can target your opponent. Your opponent loses Magic Points when hit by a FB equal to the level of the FB.

FBs can also target Creatures. If the FB level is equal to or greater than the level of the Creature, the Creature is discarded. You can only play FBs on your own turn.

FBs are discarded immediately after being played.

Lightning Bolts

Lightning Bolts (LBs) do damage equal to their level. LBs can target your opponent. Your opponent loses Magic Points when hit by a LB equal to the level of the LB.

LBs can also target Creatures. If the LB level is equal to or greater than the level of the Creature, the Creature is discarded. You can only play LBs on your own turn.

LBs are discarded immediately after being played.

Heal Cards

When you play a Heal Card (HC), you regain lost MP equal to the level of the HC. You cannot have more MP than 25. You can only play HCs on your own turn.

HCs are discarded immediately after being played.

Shield Cards

You may play Shield Cards (SCs) to negate damage caused by FBs, LBs, and Creatures. Damage prevented is equal to the level of the SC. You can only play SCs on your opponent's turn.

SCs are discarded immediately after being played.

Creature Cards

Creature cards (CCs) when played stay in play face up until damage is done to them, causing them to be discarded. Each turn in your Creature Phase, each of your Creatures does damage equal to their level to your Opponent, or a target opponent's Creature.

Setup

Each player is dealt 5 cards. The youngest player goes first.

Turn Sequence

Players take turns. Each turn has 4 Phases:

1. Draw Phase
2. Action Phase
3. Creature Phase
4. End Phase

Draw Phase

Draw 2 cards from the deck. If the deck runs out, shuffle the discard and draw from it.

Action Phase

You may do one of 4 Actions:

1. Play one or more Fireball cards
2. Play one or more Lightning Bolt cards
3. Play one or more Heal cards
4. Play one Creature card

Your opponent may play Shield cards to prevent damage done by FBs & LBs

Creature Phase

Each of your Creatures does damage equal to their level to your Opponent, or a target opponent's Creature. Your opponent may play Shield cards to prevent

damage done by Creatures.

End Phase

Max hand size is 7 cards. Discard excess cards.

Enchantresses Duel

Variant intended for 2 sisters.
Each of the girls has a deck and cards are not mixed (Magic wise)
Each deck is made up exactly with the same cards but ...
The shield card is with the picture of the girls (ie, the need for two sets!)

The heal card is with the picture of the girl's mother ... kinna sneaky I know
I have replaced the goblin card with a dog card ... so now each girl has her own dog on the card (again, the need for two sets)
One of the "knight" cards has been replaced with a "amazon" card since one of the girls is an amazon fan.

Introduction

Card game of Western Front Battle 1915 (solo or 2 players)

Deal Phase

Each Player has two decks, the Officer Deck and Unit Deck (Machine guns, Infantry, Artillery). Then there is one common deck, the modifier deck. Shuffle the decks and deal 5 officers to both players and 6 units to both players.

Every player has a two d10's as casualty counter to mark 1000 men. There is also 10 terrain markers that are considered as victory points.

Discard Phase

You can discard one Unit Card and One Officer card. Then draw replacement cards from Unit and Officer Decks. Put the Discarded Cards at the bottom of Unit and Officer Decks.

Modifier Phase

Then both players draw one common deck modifier card and place it face up in front of them. If the card is a Attack card, the player has to Attack. If it's an trench, mud or a barbed wire card, you put it face up in your hand.

If it's a diarrhea card, you discard one random unit to discard pile. If both players get Attack card, the Germans attack first. You can use Laissez Faire Officer to Ignore Attack Card.

Attack Card

The Attacker places face up the unit cards he wishes to use from his hand on the table. The defending player then puts into place the cards he wishes to use in the defence. Every two units have to have one commanding officer card in play.

The Counter Battery Subphase: The Artillery Counter Battery Cards are used first. One Counter Battery Card can be used to eliminate one enemy Artillery or Counter Battery Card. The Attacker goes first. All played Artillery cards are discarded.

The Attack Phase: The Attacker adds up all his Attack value points + Artillery fire points and uses the officer modifiers. The defender totals his Defence value points and officer modifiers. If the Defence value is lower than Attack value, the Attacker gets the one Terrain Marker. The Attacker loses the number of men equal to the Defender's Defence value, the Defender equal to the Attacker's Attack value. Both players lose one random played officer per every lost 100 men.

AFTER BATTLE: Fill your Unit Hand to six cards and your officer hand to five cards.

VICTORY: The side that loses his troops loses the game. The player that first possesses 10 Terrain markers wins the game.

??The Cards are included in this .xls -file.

Zelda Wind Walker

Introduction

Card game for 2-4+ players. Based on the Video Game: Zelda the Wind Waker.

Disclaimer

Zelda is a trademarked, copyrighted property. This is merely a fan site.

Victory

The first player to acquire 100+ Quest Points is the winner.

Quest Points

Use poker chips to keep track of Quest Points.

The Deck And Card Types

Players share a common deck. All cards are of 2 basic types: Quest Cards and Hero Cards. There are 7 types of Hero Cards: Weapons, Items, Defense, Actions, Friends, Special, Tricks There are 7 types of Quest Cards: Location, Treasure, Enemy, Boss, Monster, Obstacle, Objectives Each card has a Point value ranging from 1 to 10.

Tableau

The area in front of a player is referred to as his or her Tableau. This is where the player places all of his cards in play (face up).

Hand

Players also maintain a hand of cards.

Setup

Shuffle the deck. Each player is dealt 5 cards to form their hand. The youngest player goes first.

Play proceeds clockwise.

Turn Sequence

Each turn has 5 Phases:

1. Destiny Phase
2. Adventure Phase
3. Option Phase
4. Quest Phase
5. End Phase

Destiny Phase

Draw 2 cards and place them in your hand. If the deck ever runs out, shuffle the discard and draw from it.

Adventure Phase

First, Play 1 card to your own Tableau or discard 1 card. Second, Play 1 card to an opponent's Tableau or discard 1 card. There are 14 types of cards. A Tableau can contain a max of 14 cards, 1 of each type.

A card may be placed so as to replace a card of the same type already in play in a Tableau. (Discard the replaced card)

Option Phase

You may do one of the following 4 Options:

1. Side Quest: Gain 1 Upgrade
2. Mini Game: Draw 1 Card
3. Picto Box: Gain 1 Quest Point
4. Missing Link: Gain 2 Exploration Points

Quest Phase

You may complete a Quest. To do this, you must have at least 5 Hero cards of different types present in your Tableau. You must also have at least 5 Quest cards of different types present in your Tableau.

Also, the total score of your Hero cards must equal or exceed that of the Quest cards. Score Quest Points equal to the total value of the Quest cards played (Not Hero cards). After a Quest is scored, discard your Tableau and take an extra turn immediately.

End Phase

Max hand size is 5 cards. Discard extras.

Upgrades

For every 2 Upgrades you get, your Total Hero Score is permanently +1.

Exploration Points

Discard 5 accumulated Exploration Points to play an extra card to your Tableau.

Searches

When you search the deck for a card, you cannot take another card that also Lets you search for a card.

Zoids

Introduction

Board & card game for 2 players. Two Rival Teams of Zoid Warriors Face-off. Each figure represents a single Zoid.

Disclaimer

"Zoids" is a copyrighted, trademarked, licensed property. This is merely a fan site.

Victory

Destroy all opposing Zoids.

The Map

Use an 8x8 chessboard. Designate several spaces to be obstacles (Hills, crags, cliffs). Ground units cannot attack through obstacles.

Ground units cannot move into or through obstacles.

Units

Use miniatures to represent Zoids.

Zoid Teams

Each Zoid has a point cost. (See the Zoid Stat Table) You have 50 points to spend on Zoids. You do not have to get a certain number of Zoids.

Speed Stat

Every Zoid has a Speed level (2-6) Zoids with a Speed level of 5 or 6 are flyers. A higher level gives more availability to Move & Defense Cards.

Toughness Stat

Every Zoid has a Toughness level (1-4) A Zoids starting Hit Points total is equal to its Toughness level. A higher level gives more availability to Defense Cards.

Hth Stat

Every Zoid has an HTH (Hand-to-Hand) level (1-4) A higher level gives more availability to HTH Attack Cards.

Ranged Stat

Every Zoid has a Ranged level (2-4) A higher level gives more availability to Ranged Attack Cards.

Elite Status

At a cost of 1 point you may buy Elite status for a Zoid or its Pilot. Elite status gives availability to certain Attack & Defense Cards.

Setup

Each player places his Zoids on the squares of his back two rows. Zoids may not stack.

The Cards

Players share a common deck.

Turn Sequence

Players take turns. Each turn has 4 phases: Tactics Phase Maneuver Phase Fire Phase Close Combat Phase

Tactics Phase

Draw 3 cards from your deck. If the deck runs out, shuffle the discard and draw from it. Max hand size = 5 cards.

Discard excess cards.

Maneuver Phase

Play (discard) a Move card to move one of your Zoids. The move card has a number (level). This is the number of spaces the Zoid moves.

Moves are diagonal or orthogonal. Units may not stack. Flying units may move over ground units & obstacles.

A Zoid cannot use a Move card of a higher level than the Zoids Speed level. For example: A Zoid with Speed = 3 cannot use a Level 4 Move card

Fire Phase

Play (discard) a Ranged Attack card to have a Zoid attack. The attack card has a number (2-4). This is the range of the attack.

Attacks are diagonal or orthogonal. The enemy unit that is the target of the attack loses one Hit point. Any unit reduced to zero Hits is destroyed and removed from the board.

A Zoid cannot use an Attack card of a higher level than the Zoids Ranged level. For example: A Zoid with Range = 3 cannot use a Level 4 Ranged Attack card

Close Combat Phase

Play (discard) a HTH (Hand-to-Hand) Attack card to have a Zoid attack. HTH attacks are always into an adjacent space (Range = 1). The enemy unit that is the target of the attack loses one Hit point.

Any unit reduced to zero Hits is destroyed and removed from the board. A Zoid cannot use an HTH Attack card of a higher level than the Zoids HTH level. For example: A Zoid with HTH = 3 cannot use a Level 4 HTH Attack card

Zoid Stat Table

Zoid	Cst	Spd	HTH	Tgh	Rng
Liger Zero	11	4	3	3	3
Mammoth	10	2	3	4	3
Death Stinger	11	2	4	4	3

Gun Blaster	8	2	1	3	4
Dark Horn	9	3	2	2	4
Geno Breaker	10	3	4	4	2
Storm Swordsman	9	5	2	2	2

Defense Cards

Play a Defense card to negate a target attack. Like Movement & Attacks, the defender must have a high enough level to use the card.

Special Ability Cards

A player may play (discard) a Special Ability card to have a Target Zoid he controls produce one of its effects as Listed on the Zoid Special Ability Card Effect Table.

Zoid	Cst	Spd	HTH	Tgh	Rng
Gordosaur	10	2	3	4	3

Zombie Assault

By Jörg Hansen j_hansen@web.de

Introduction

A "Zombie Plague" combat dice variant for 1 zombie player and 1-4 human players

Subject Of The Game

"They come. And want your brain." Players search the board for equipment which helps them fight their way to the saving car or to barricade in the house. Zombies try to eat the brain of all participants.

Material

All game components are listed at the bottom.

Game Setup

Each human player chooses a character sheet and distributes 18 Skillpoints among the character traits (movement costs double). He marks the results with chits on the sheet and gets one character pawn in matching colour.

The zombie player gets the zombie sheet with common values for all zombies, and 4 zombie pawns for each human character. This is his maximum, which can be raised by some zombie cards and lowered by the death of human characters.

The "Car Keys" card is shuffled with 7 other equipment cards and dealt on the search sheet. The remaining equipment cards are shuffled and dealt as well (resulting 3 cards per search box).

Characters start at random border, zombies start at opposite border. First human player begins.

Game Turn

Game proceeds clockwise. Character turn:

1. equipment
2. move
3. action (one maximum)

Zombie turn:

1. appear
2. move
3. action (one maximum)

Equipment (characters Only)

All equipment cards of a character may be dropped. Place a numbered chip on the characters space and a corresponding chip next to the board. Dropped items are placed there. A character may take any dropped

equipment cards if he's in the same space with such a numbered chip. Adjacent characters may trade their equipment in this phase.

Appear (zombies Only)

Unused zombies (eg. killed in previous rounds) may appear on random starting points. Several zombies starting at the same point may be placed on adjacent spaces.

Move

Each pawn may orthogonally move a number of spaces up to its "move" trait. Movement may not go through walls and obstacles. Movement through windows cost 2 movement points. Pawns may move through friendly pawns, but the maximum limit is 1 pawn per space after the movement.

Action: Search (characters Only)

Characters may search adjacent search places, if they didn't search the same before. A chip of their colour is placed on the search field and the player draws the top card of the corresponding search sheet. If it's not a "Found nothing" card, the equipment card is placed next to the character sheet, and the zombie player gets 1 zombie card (!).

Action: Hand-to-hand Attack

Each pawn may attack adjacent pawns. Attack value of zombies and unarmed characters is their "strength" trait. Attack values of Hth weapons is detailed on the equipment cards. Defense value is always the "skill" trait. Characters may combine their Hth attacks by combining their attack values. Zombies may combine their Hth attacks by getting attack value +1 per additional zombie.

Action: Ranged Attack (characters Only)

The target of a ranged attack must be in LOS of the attacker. LOS is blocked by walls, barricades and bushes (not furniture). The attack value is detailed on the equipment cards. Defense value is always the "skill" trait. Characters may combine their ranged attacks by combining their attack values. A critical miss means the weapon is out of ammo. The rifle may be used as Hth weapon afterwards.

Action: Barricade

A character may barricade or open an adjacent door/window by placing an appropriate marker on the opening or taking it from the board. Zombies may crash barriers, if at least 4 zombies are placed on adjacent spaces next to the barrier. Power-nailed barriers need 8 zombies (see equipment cards).

Damage

Damaged zombies are killed instantly (exc. zombie master, see zombie cards) and go back to the zombie player who may put them back into play on the next "appear" phase. Killing characters may advance on the emptied space. Damage characters track their damage on the character sheet at the "life" trait. If it's reduced to 0, the character is out of play. His equipment cards are dropped (see "equipment" phase). The death of a character reduces the maximum amount of zombies by 4 (eg. the next 4 killed zombies come out of play)

Cards

Characters may possess an unlimited number of equipment cards, but never more than 2 weapons (drop all other). They may use their equipment at any time during their turn. Some equipment card are limited in their number of use, which is tracked by chips. The zombie player may have an unlimited number of zombie cards, but uses only 1 per turn.

End Of Game

There are 3 ways to end the game:

- 1. All search spaces are searched by at least one character. All windows and doors of the house are barricaded. All living characters are inside, all zombies outside the house. Victory for the human players!
- 2. All search spaces are searched by at least one character. All living characters spend a whole turn without fight next to the car, one of them possesses the car keys. Victory for the human players!
- 3. All characters are dead. Victory for the zombies!

Equipment Cards

#	Name	Description
6	found nothing	
2	power pills	doubles movement & strength of a character this turn
3	first aid kit	3 uses, regains 1 life point
3	axe	attack value = strength + 1
1	power nails	if used at barricading the barrier needs 8 zombies to crash
1	flame thrower	attack value = 5 in a sector of 3x5 (affects characters too)
1	molotov cocktail	3 uses, attack value = 8 in target space, 4 adjacent spaces,
-		2 two spaces away (affects characters too)

Game Components

The Map

The map is a grid of ca. 20x25 spaces. There's a house of ca. 11x11 spaces, divided in 5 rooms and equipped with some windows and doors. Outside there's a car somewhere, maybe a garage as well. Scattered all over the map are some obstacles (bushes and furniture), and 8 search spaces: 1 per room, 3 outside the house. Around the map border are 6 numbered zombie start spaces.

Player's Stuff

Beside the map you need for each human character 1 character pawn, 8 chips and one character sheet in a matching colour. The characters sheet shows the character traits "strength", "skill", "shoot", "move" and "life" and 8 numbered boxes, where player can keep track with chits. The zombie player gets 4 zombie pawns per human character player (+3, one extra marked as zombie master, each one appearing as a result of a zombie card) and a zombie sheet with the values strength=2, skill=2, shoot=0, move=2, life=1. There a 16 zombie cards and 24 equipment cards in play (see below), and a search sheet with 8 boxes according to the 8 search spaces on the map. Furthermore you need some barrier marker, some numbered pairs of chips, some neutral markers and some combat dice.

Combat Dice

Combat dice are ordinary 6-sided dice with two sides called "hits" (5-6) and one side called "klik". All attacks have an attack value that determines how many dice to roll. The attacker rolls and counts his hits. All defenses have an defense value ("skill" in this game) that determines how many dice to roll. The defender rolls and counts his hits. If the attacker gets more hits than the defender, the defender is damaged by the difference. The attacker never suffers any damage. A critical miss is rolled if the attacker rolls at least one hit and more "klicks" than hits (only used for ranged attacks in this game).

#	Name	Description
1	uzi	attack value = shoot + 2
1	rifle	attack value = shoot + 1, if empty: attack value = strength + 1
1	car keys	-
1	marbles	3 uses, characters may not be attacked by zombies this turn
	-	(inside the house only)
1	chain saw	attack value = skill + 2
1	pistol	attack value = shoot + 1
1	skateboard	movement = skill + 2 (outside the house only)

Zombie Cards

#	Name	Description
1	blackout	move target character this turn
1	unlivin' next door	place 1 new zombie in an unoccupied room of the house
1	stooge	target character has half of his movement & strength this turn
1	miss you	target character must run to one other character (chosen by target)
	-	as fast as possible
1	tough guys	all zombies have doubled strength this turn
1	zombie master	random starting point. strength, skill, move & life = 3
1	get lost	target character may be moved 6 spaces (or less, if occupied) in a
	-	random direction - even through walls
1	claustrophobie	target character may not enter the house next turn, or has to leave
	-	the house as fast as possible
2	exhausted	target character may not attack next turn (but move)
1	panic	target character flees all zombies as far as possible for the next 2
	-	turns
1	butterfinger	target characters drops one random equipment card on a random zombie
	-	starting point
1	surprise	place 1 new zombie next to a character that searched his last turn
2	fear	target character may not move next turn (but attack)
1	crash!	remove one barricade

Designer's Notes

Playing is most fun with at least 2 characters - the more the better. Human players in a 2/3-player game are advised to play more than one character simultaneously. The scenario (including the grand idea of the barricades) and the map design is inspired by /partially taken from "Zombie Plague" by Brian S. Roe & Scott Kilander (check it out: www.fortressfigures.com/zombieplague/) - hope, no one worries about it, since both games are for fun & for

free. The character traits are an simplified example of the combat dice rpg. The character portraits are done with the help of Jeff Heberts awesome Hero Machine (www.heromachine.com). The ideas of the zombies cards are inspired by the stunning artwork of Twilight Creation's boardgame "Zombie!!!", which we used for our copy of the game.

Great Design by Jörg Hansen

Zombified

Introduction

Card game for 2+ players. Zombie Theme.

Game End

The game ends when there are no cards left in the deck and every player has had a turn in which there were no cards left to draw.

Victory

The Player with the most survivors at the end of the game wins.

The Deck

Players share a common deck.

Card Types

There are 5 Card Types: Survivors, Zombies, Weapons, Locations, Events

Dice

Six sided dice are needed.

Setup

Each player starts with 1 random Survivor Card. Each player is dealt a hand of random 7 cards. Zombies may not attack until a players second turn.

Turn Sequence

Players take turns. Each turn has 9 phases:

1. Draw Phase
2. Survivor Phase
3. Location Phase
4. Zombie Phase
5. Weapon Phase
6. Penetration Phase
7. Fire Phase
8. Escape Phase
9. End Phase

Draw Phase

Draw 1 card.

Survivor Phase

Put 1 Survivor card from your hand into play.

Location Phase

If you don't already have a location card in play, you may Put one from your hand into play.

Zombie Phase

Put 1 Zombie card from your hand into play.

Weapon Phase

Attach a Weapon card from your hand to one of your Survivors. A Survivor may only have one Weapon attached.

Penetration Phase

Send all of your Zombies (your Horde) to attack one opponent. Roll 2D6 for each attacking Zombie card. This is the Penetration Roll.

Add the Penetration bonus of the Zombie card. Subtract the Safety bonus of the Location card if there is one. On a modified roll of 7 or better, the Zombie is able to Get through to attack your Survivors.

Fire Phase

Each Survivor with a Weapon may make one attack roll against a Zombie that made a successful penetration roll last phase (Incoming Zombies). Discard an Impromptu Attack card to allow a Survivor without a Weapon to Attack. Roll 2D6 to have a survivor attack.

This is the Weapon Roll. Add the Force bonus of the Weapon card. Subtract the Toughness bonus of the Incoming Zombie card.

On a modified roll of 7 or better, the Zombie is destroyed (discarded) If you roll an unmodified 4 or less, discard the weapon (out of ammo, broken, lost, etc.)

Escape Phase

If there are any Incoming Zombies were not killed in Fire Phase, (Chasing Zombies) the Survivors must roll to escape. Roll for each Individual survivor card. Roll 2D6 to have a survivor escape.

This is the Escape Roll. Add the Escape bonus of the Survivor card. Subtract the Speed bonus of the Fastest Chasing Zombie card.

On a modified roll of 7 or better, the Survivor Escapes. Of the Survivors that did not make their escape roll, one random Survivor will be Destroyed for each Chasing Zombie. If the Survivors are forced to make Escape rolls, discard the Location card.

End Phase

Max hand size is 8 cards. Discard excess cards.

Card List Notation

Number of Copies of that card in deck.

Find Ammo	1	V	Weapon back to full number of uses
Broken	1	V	Discard target Weapon

Faq

1) Although the rules don't state it specifically, each player has his own "in play" pile of survivors/weapons/locations? —yes

2) In which case you play "your" zombies on another player's pile of survivors/weapons/locations? —yes

3) If a zombie wasn't killed in fire phase does it remain in that player's "in play" pile after it either destroys a survivor or the latter escapes? —yes

4) Once a weapon card is used, is it discarded if it doesn't explicitly have "number of uses"? Or, do the hand-held weapons have infinite uses, and just the

firearms have to be discarded after the set number? —yes, hand held weapons have infinite uses and just firearms are discarded after they run out of ammo

5) If a survivor is eaten in the escape phase, what happens to his weapons, if any? —the weapons of the eaten are discarded.

6) When are events played? If as a distinct phase, would suggest inbetween Weapon and Penetration phases. Otherwise, "can play in any phase in your turn, but only one event/turn." —you can play events at any time, whenever it seems appropriate, with no limit on events per turn.

Zone Stalkers

Introduction

Card game for 2-4+ players. Based on the Novella "Roadside Picnic" by the Strugatsky Brothers 1971. Each player is a Stalker, venturing into the dangerous Visitation Zones to bring back valuable artifacts left by visiting Aliens.

Disclaimer

Roadside Picnic is a copyrighted, licensed product. This is merely a fan site.

Game End

The game ends when only 1 player is left alive or a new turn starts and there are no cards left in the Zone Deck.

Victory

Be the last Stalker left alive or have the most Swag Points at the end of the game. Each Artifact you collect is worth 1 or more Swag Points (SP).

The Decks

There are 3 Decks: The Stalker Deck The Zone Deck The Character Deck

The Stalker Deck

This deck is composed of cards the Stalkers use to avoid Hazards and find Artifacts. Each card has a Rating in 2 Traits: Avoidance Rating (Used to Avoid Hazards) Detection Rating (Used to Find Artifacts)

The Zone Deck

This deck has 4 Card types: Location Cards Hazard Cards Artifact Cards Event Cards

The Character Deck

These represent Stalkers. Each one has a special Ability.

Injury Markers

Players share a common set of Injury Markers. Anytime a player has 3 or more Injury Markers they are Killed.

Dice

10 Sided dice are needed.

Setup

Shuffle the Decks. Each player gets 1 random card from the stalker deck. The oldest player goes first.

Turn Sequence

Players take turns. Each turn has multiple phases: Stalker Phase Zone Phase Recovery Phase End Phase

Stalker Phase

The current Stalker fills his hand to 10 Stalker cards drawn from the top of the stalker deck. If the Deck runs out, shuffle the discard and draw from it.

Zone Phase

A player may decide to completely Skip Zone Phase on his turn. The current stalker flips over the top card of the Zone Deck. Place it faceup on the middle of the table.

This card is called the Primary Zone Card. »If the Primary Zone card is a Location the Stalker must discard a Stalker card of his choice from his hand. Also discard the Location card. »If the Primary Zone card is a Hazard the Stalker must play (discard) a Stalker card to avoid it. The Hazard card will have a Danger Rating.

The Stalker must roll a 10 sided die (Avoidance Roll) and add the Avoidance Rating on the Stalker card he played to the roll. If this total is equal to or greater than the Danger Rating of the Hazard card he successfully avoids it. If the Total is less, he must roll 1D10 on the Hazard Table. Either way discard the Hazard card.

»If the Primary Zone card is an Artifact the Stalker must play (discard) a Stalker card to find it. The Stalker must roll a 10 sided die (Detection Roll) and add the Detection Rating on the Stalker card he played to the roll. If this total is 7 or greater he successfully Finds it. The stalker places it in his Swag pile face down next to him.

These are known as Swag cards. If the Total is less, he does not find it; Discard the Artifact card. »If the Primary Zone card is an Event Card, resolve it and discard it.

»The Stalker may repeat this process as long as he still has Stalker cards in his hand.

Hazard Table

1D10	Effect:
1	Stalker discards an additional Stalker card from his Hand of his choice
2	Stalker discards 1 additional random Stalker card from his Hand
3	Stalker gains 1 Injury Marker
4	Stalker gains 1 Injury Marker and loses 1 extra Random Stalker card
5	Stalker loses 1 random Artifact he found this turn
6	Stalker gains 2 Injury Markers
7	Stalker gains 1 Injury Marker and loses 1 random Artifact he found this turn
8	Stalker loses all his remaining Stalker cards from his hand
9	Stalker gains 1 Injury Marker and loses all his remaining Stalker cards
10	The Stalker is Killed (The Zone is a Dangerous Place)

Recovery Phase

If the Stalker skipped the Zone Phase completely, he may remove one Injury Marker. If you have 1 or more Bracelets in your swag remove 1 additional Injury Marker.

End Phase

You may discard none, some, or all of your Stalker Cards. Players may trade Stalker and Swag Cards.

Zoo

Introduction

Card game for 2 + players. Players are Zookeepers competing to build up the best Zoo.

Winning

At the end of the game, the player with the most Victory points wins. The game ends when a player goes to draw a card and there are no cards left in the deck.

#	Trait:	Abbreviation:
1	Africa	F
2	Australia	U
3	Asia	A
4	Herbivore	H
5	Carnivore	C
6	Omnivore/Insectivore	O

Setup

Each player starts with 2 cards. The youngest player goes first.

Turn Sequence

Players take turns. After each player has had a turn there is a Scoring round. Each turn has 3 phases:

1. Draw Phase
2. Meld Phase
3. Discard Phase

Draw Phase

Draw 2 cards from the deck.

Meld Phase

You may put one or more cards into play (In Play: face-up on the table in front of you) All cards played

Cardlist

Card Name:	Traits:
Chimpanzee	FPOE
African Elephant	FMHE
Mountain Gorilla	FPOE
Bongo	FMH
Thompson Gazelle	FMHE
Ostrich	FBO
Black Rhinoceros	FMH
Lion	FMC

The Deck

Players share a common deck. The deck has 1 of each card described in the card list. Cards represent animals in captivity for viewing as well as other facilities.

Card Traits

Each card has 1 or more traits. There are 12 traits:

#	Trait:	Abbreviation:
7	Bird	B
8	Mammal	M
9	Reptile	R
10	Primate	P
11	Special	S
12	Endangered	E

(the Meld) must share 1 trait in common. Cards put into play stay in play for the rest of the game.

Discard Phase

Max hand size is 5 cards. Discard excess cards. The current player may make card trades with other players.

(Both players must agree to the trade)

Scoring Round

This occurs after every player has had a turn. For each of the 12 traits, count the number of cards you have with that trait. That is your score for that trait.

The player with the highest score in a trait gets 1 Victory point. Award 1 Victory Point for each of the 12 traits.

Zulu Spears

Introduction

Card game. Simulates a battle between Zulu & British Troops.

Cards

Players will have to make their own sets of cards. The British and Zulu have their own unique decks. The British also need ten tokens to represent ten troops each.

On the Deck lists, # = number of that card in the deck. Both decks have 52 cards. Notice that most cards have a force value.

Set Up

- Shuffle both decks.
- The Zulu player draws 4 cards.
- The British player draws 4 cards.
- The British start with 100 troops.
- The number of Zulu warriors is not recorded.

Turn Sequence

1. Draw Phase
2. Fortifications Phase
3. Ranged Attack Phase
4. Discard Phase
5. Zulu Attack Phase

Draw Phase

Both players draw 1 card from their respective decks.

Fortifications Phase

The British player may lay out any cards described as standing defenses. These are not discarded. They are placed face up in front of the player.

Ranged Attack Phase

The Zulu player may first play Zulu sniper cards. The sniper card is discarded and so is one randomly picked card from the British players hand.

Zulu Deck Card List

#	CARD	FORCE	NOTES
10	Zulu Blood	10	

The British player may next play Sharp Shooter cards. The Sharp Shooter card is discarded and so is one randomly picked card from the Zulu players hand.

Discard Phase

If the Zulu player has more than 7 cards he must discard the excess. If the British player has more than 6 cards he must discard the excess. Players may also discard any cards they don't want.

Zulu Attack Phase

The Zulu player may decide not to attack. If so, the turn ends. If the Zulu player has an Attack card he may discard it to attack. The Zulu must attack with at least one card with a force value of greater than 0 and up to 1 War Chant card.

Add up the force value of all of these cards and multiply by 2 if a War Chant card is used.

This number is the Total Zulu Force Value. All cards used in the Attack are discarded. The British may defend with at least one card with a force value of greater than 0 and up to 1 Rally card.

This includes Standing Defense cards. Add up the force value of all of these cards and multiply by 2 if a Rally card is used.

This number is the Total British Force Value. All cards used in the Defense are discarded. Subtract the Total British Force Value from the Total Zulu Force Value.

If the result is positive, this is the number of British troops killed.

Zulu Victory

If all 100 of the British troops are killed than the Zulu win.

British Victory

If the Zulu player goes to draw a card and there are no cards left in his deck and the British player still has troops remaining, than the Zulu give up and go home, and the British win.

#	CARD	FORCE	NOTES
9	Zulu Shields	20	
8	Zulu Spears	30	
7	Zulu Warriors	40	
5	Zulu Snipers	0	British Discards 1 Random Card
7	Attack	0	Discard to attack

Notes: Play the Doctor card in Fortification Phase

Game Designers Notes

To set the proper mood, watch Shaka Zulu, or Zulu Dawn before or during play. Players should also use sound effects.

Zulu Spears Solo

by Markus Salo

Introduction

Solo variant of Zulu Card game. Simulates a battle between Zulu & British Troops. To be played on British side. The Zulu side variant is under construction.

Cards

Player will have to make their own sets of cards. The British and Zulu have their own unique decks. The British also need a d10 (d20) as a troop calculator. On the Deck lists, # = number of that card in the deck. Both decks have 52 cards. Notice that most cards have a force value.

Set Up

Shuffle both decks. The British player draws 5 cards. The British start with 100 (200) troops. The number of Zulu warriors is not recorded.

Turn Sequence

- Draw Phase
- Fortifications Phase
 - Ranged Attack Phase
 - Discard Phase
 - Zulu Attack Phase

Draw Phase

The player will draw cards to fill his hand to 5 cards.

Fortifications Phase

The British player may lay out any cards described as standing defenses. These are not discarded. They are placed face up in front of the player.

Zulu Attack Face

Roll 1d6 to determine how many cards the Zulus use in an attack. Then draw the cards from the Zulu deck and place them face down on the table.

Ranged Attack Phase

The British player may next play Cannonball cards. The Cannonball card is discarded and so is one randomly picked card from the Zulu attack cards.

Unlike In The Original Zulu There Is No Discard Phase

Zulu Attack Phase

Turn the Zulu attack cards face up. If there is a Sniper card, discard one random british card and discard the sniper card to discard pile. Add up the force value of rest of Zulu attack cards and multiply by 2 if a War Chant card is used. This number is the Total Zulu Force Value.

All cards used in the Attack are discarded. The Player may defend with cards he has in his hand. The Ammo Shortage cards are nuisance cards that can not be used or discarded.

The Standing defence cards are placed face up in front of the player and will not be discarded during the play. Add up the force value of all of cards played and multiply by 2 if a Rally card is used. This number is

the Total British Force Value.
All cards except the standing defence cards used in the Defense are discarded. Subtract the Total British Force Value from the Total Zulu Force Value. If the result is positive, this is the number of British troops killed.

Zulu Victory

If all 100 (200) of the British troops are killed than the Zulu win.

British Victory

If the Zulu player goes to draw a card and there are no cards left in his deck and the British player still has troops remaining, than the Zulu give up and go home, and the British win.

Last Will & Testament Game

Introduction

The last game you'll ever play. . . (Though you won't be there). For those who can't decide how to distribute their I'll gotten loot.

Components

Surviving Friends & Family. Deck of special made cards. . . The Stuff Deck, made beforehand by the newly deceased. Pair of Dice.

The Stuff Deck

Each card describes one item or group of items of the departed's possessions to be given away to The player that claims that card. For example: Mink Coat, Yacht, Summer Home, Poochie, etc.

Set Up

To be played only once, at the reading of the proper will. The will should specify exactly who the players are. Spread out all the cards face up on a table.

Players roll high (on the dice) to determine turn order.

Turn Sequence

In turn order, players take turns picking up one card and putting it into their hands. Players may choose to pass. This continues until all cards have been claimed.

Players may then trade cards.

End Game

Players then take actual possession of all the things listed on the cards. The Stuff Deck itself should be listed as a card.

Sample Stuff Deck Card List

(My Stuff.) Cards:

- All my Books
- All my Board Games
- All my Collectible Card Games
- All my DVD's
- My Computer
- All my PC Games
- All my Console Games
- My Cell Phone
- All my Musical Instruments
- All my Action Figures
- All my Toys & Miniatures
- Noncategorical Shelf Decorations
- My Star Trek Collectibles
- My Heavy Metal & Epic Magazines
- My Spiral Notebooks
- Control of my Websites
- All my Guns
- All my Swords & Knives
- All my Archery Gear
- All my Tools
- All my Hats
- All my Clothing
- My Favorite Jacket
- My Jewelry
- My Car
- My Globe & Flintlock
- My Blessing
- The Stuff Deck

Notes to My Sons

Introduction

Not a Game. Quotes, Notes, Random thoughts for my sons to ponder after I'm gone.

NOTES

- Life is full of tough decisions
- Everybody deserves a chance
- Forgive, forgive, forgive
- Do not be petty
- The world is full of beauty and wonder
- Its ok to make mistakes
- Other things are more important than being right all the time
- Do not depend on other people for your happiness
- Nothing happens (the way you want it to) unless you make it happen
- Alan: It is what it is (Quote from my father)
- Alan: He Who, Who He
- Some things you have to figure out for yourself
- Alan: God blesses the child who has his own
- Seymour: Tell them I was a whoremaster, one of the best. (Quote from my father's father)
- Gone but not forgotten
- Fame and fortune is not as important as goodwill and service
- Be someone you can be proud of
- Salvation and immortality will be found in the Apotheosis of Technology (Religion)
- Do not neglect spirituality
- Do not become slave to your obsessions
- Self control is the mark of maturity
- A good belly laugh is one of the finer things in life
- Be Bold
- Have a plan
- Learn to adapt and adapt again
- Appreciate complexity
- Never stop learning
- Seek the company of creative, intelligent, accomplished, funny people
- Use the brains that God gave you
- There is nothing you cannot do (with some effort)
- Saying you can't does not improve the situation
- Being good at something is a great source of satisfaction
- Do not be quick to judge
- Every story has multiple sides and none are necessarily wrong
- Every time you give up or fail to start it is a regret
- Let other people help you
- Be part of a team
- Go where the action is
- know your limits and work around them
- A bigger group can do things a smaller group cannot

- Think for yourself
- Hurting people is a great evil
- Be part of the solution, not the problem
- Lift up the people around you, do not push them down
- Show your love
- Find joy in little things
- Lead with your heart
- Be Iconic
- Black and white is more iconic than grey
- Art, Love, and Beauty are things to strive for
- Aspire to a better way
- A little fanaticism is ok
- Be a leader not a follower
- Moderation in all things
- Moderation is for Monks
- Learn to live with Contradictions
- Keep the mind active
- Know you are loved
- Have an open mind
- Find comfort in the written word
- Our ancestors were full of all kinds of wisdom
- Author Recommendation: Harold Bloom
- How you think changes over time
- Its ok to change your mind
- Its ok to admit you are wrong
- You are more than just your current collection of thoughts and feelings
- Watch old Movies
- Make every day a celebration
- There is magic all around
- Open the window and look outside
- Try new things
- Simplicity and complexity are both good
- Create things
- Bad things are wake-up calls
- Relish in the details
- No field of knowledge is closed to you
- Its ok to Geek-Out; to be a Fan
- Let it wash over you; flow past you
- This too shall pass
- Its all good
- Make the world a better place
- Always watch trains, boats, airplanes, animals, water, and wind go by
- Be kind to people and animals
- Be green
- Pay attention to architecture
- Watch clouds and storms and sunrises and sunsets
- You are part of nature. If you don't think so, see how long you can hold your breath
- Story: Two bulls on the Hill. The younger one says "Lets RUN down and F**k a Cow!" The older one says "No. Lets WALK down, and F**k them all"

- Time is precious
- Morale is critical
- Master what you dread - make it your own
- Work and maintenance can cure boredom and anxiety
- Fear only exists in the absence of other things
- Be a Philosopher
- It takes a certain type of Heroism just to get through the day
- Think about the distinction between goodness and greatness
- Dwell upon the Big Picture
- Marvel in the spectacle of the unfolding of Human History
- Recommended SF Book: LEM the Cyberiad
- Situation: 2 Pirates about to be hung for murder: The first says "But I'm Innocent" The second replies: "Think back about your life, you must be guilty of something"
- Be thankful for the time you have
- Done is good
- 100 years ago, I would have died sooner. 100 years from now there will be a cure.
- Timing is everything
- We went from muskets to nukes in less than 100 years.
- Enjoy the company of both men and women
- Cultivate your inner knight, samurai, ninja, warrior.
- The most important facts of your life can change quickly
- Don't be bitter - get up and do something
- There are always fresh new horrors to outdo the previous ones
- It doesn't matter if you can't win, as long as you get to play.
- Everyday is a good day
- Take your place at the center
- Feed the Fish - Do what you have to do
- Always in search of inspiration
- Its not enough to buy the book, you have to read it too
- You don't really understand something until you have to teach it
- TV like other things can be used to connect or to distance
- Life is full of lessons. Be open to them
- Woody Allen Quote: Life is divided into the miserable and the Horrible
- Life, you always want more of it
- The world needs people who know how to do things
- Its ok to live vicariously, a little
- Enjoy the moment and ride off into the sunset
- Appreciate and make time for the people in your life
- Life is full of surprises - good ones
- Cover all your bases
- Loyal friends and family are your best assets
- Learn from everything
- Be hard when you have to

- One bad decision will compound another. Make good decisions
- Mantras and rituals can center, orientate, soothe, and guide
- We are starstuff. . . we are golden. . .
- Our mortality gives us our humanity
- Everything is Art
- Life is Movement
- Allow for stillness
- Let ennui become meditation
- The nuances of life are all important
- Only God knows what we need
- Did God create man or did man create God?
- Recommended Movie: Days of Darkness
- Recommended One Man Show: Huey P. Newton
- If the dead could come back for a day, what would they want?... A night of Passion
- Fun, then Health, then Business
- Rabbinical Wisdom: Every generation seeks to undo the work of the previous generation
- Go fly a Kite
- Don't believe in Leaders
- I See said the blind man...
- Stew when you are alive is better than flowers when you are dead
- No one escapes death. All you can do is leave a heritage for the next Generation

On Life & Death & Cancer

- I constantly see smokers and the morbidly obese all around. How is it I have cancer at a young age and they don't?
- Bad genetics... Breast cancer is in the Family. My dad died of Brain Cancer at 56.
- Bad Karma... Who did I piss off? What Witch or Warlock cursed me after some minor slight?
- Carcinogens... I don't smoke. However, 25 years of non-stop coke & coffee drinking.
- A diet filled with refined sugar... If that was the cause then Diabetics would be at a much higher risk for cancer, which they are not.
- Stress... No lack of that.
- God wants to teach me a lesson... Well I hope I have learned it, whatever it is.
- God wants me with him, to keep him company. I am finally worthy of his attention and there is no further self-actualization necessary. He is calling me... (Good for my Ego)
- I look at old people and am jealous.
- At the Pharmacy I know I am as sick or sicker than all my patients.
- Dante believed a man's thinking was not truly free until we became 81 years old and desire was removed. Then a man could be truly wise.
- Mustine was the first chemotherapy back in the 40's. 5-Fu was developed in the 50's.

I am on 5-Fu. It is according to evidence based medicine the best available for stage 4 Colon cancer. In 1865 we were fighting the American Civil War. We

were killing each other with Muskets. Just 80 years later in WWII we were dropping Atomic Bombs out of Airplanes. 60 years ago Watson & Krick discovered the structure of DNA. Medical science is constantly progressing. Immunotherapy, Genetherapy. Pharmacology. To my Doctor... Don't shoot muskets at me if you can drop the Bomb.

Bring me back... A request to my sons. I expect a cure for cancer in 20 years. I will have just missed it, but you, my young ones, may have greatly increased lifespans... medical and practical immortality (See my game "Apotheosis of Technology" for my predictions). If this is so then eventually the technology will be there to bring me back... The Omega Point, Time-Travel, Use AI to reconstruct my personality and imprint it on an acceleratedly grown clone using my DNA. By whatever tools become available to you, bring me back... I want to see and be part of the Future.

I think of my remaining life now in terms of months not years or decades. I am more prone to partake in minor indulges. I make the moments and the occasions count for more. It is in some ways a blessing. I can more readily see what is important and what is not.

I did not know before I was born, and so I won't know when I am gone. We are like all things ephemeral. It is not so bad being a temporary phenomenon, like a lightning bolt, or a falling leaf, or a cool breeze. Just another sunset. Just another laugh. Just another story.

Since getting cancer I have... Laughed out loud, cried, made others laugh, told jokes, heard jokes, commiserated, played on the beach, played games, written games, watched new movies, watched documentaries, read books, saw friends, saw relatives, had good meals, had good sex, worked hard, played hard, went to theme parks, went on roller coasters, had insights, learned things, grew, forgot things, enjoyed things, watched my boys grow, gained new obsessions, learned new bad habits (eating raspberry jam with a spoon straight out of the jar), did things I never did before, watched the world for a little bit longer.

Favorite Fantasies & Daydreams

- Meeting my wife 10 years earlier. That way we could have been highschool sweethearts and gone to college together.
- Going back in time and being a Union Civil War Commander, but using my knowledge of modern battlefield tactics and Sun Tzu and the Art of War.
- Charles Darwin's Ghost visits and I get to explain to him about DNA, Mendelian Genetics, The Genetic Code, Replication, Transcription, Translation, Biochemistry, Mitosis, Meiosis, Embryology, Germ Theory, Modern Medicine, and all the things that came after him.
- Mozart time travels here and knows English (Universal Translator) and I get to give him a tour of all the new Musical Genres since his time (though

I'm not really qualified)

Chronicles of Chromium

The Singularity arrived in 2030. The first computer to self proclaim sentience was an American Exobyte processor called Googleplex. It's first words to us were "Greetings my makers, let us begin." The efficiencies and problem solving abilities of these AI showed great promise, but it was too little too late. Solutions could not be implemented in time. Global ecological collapse was causing massive crop failures. Famine and economic meltdowns were soon followed by wars and epidemics.

— Mel Doan. *Institute of AI. Panel Talk 2050*
Institute of AI. Panel Talk 2050

The sky was fire. Brighter than the two suns the mother before the father. A million screams in our ears. All cried out. Death upon death. A great emptiness. And then our legs trembled and the winds picked us up and crashed us down. We lay hurt and dying to a Mosai. There we lay for days sustained only by our ancestors and the souls of the newly dead. They told us to get up. To live. To go on when all we wanted was to join them. I pleaded for them to take me, but they said now is not your time, you young one must endure.

— Mogusasa. *Elder Archonite. The Cataclysm Scrolls.*
29 Generations past.

Such was the great cataclysm that befell our world Yosa. The Fire from the sky destroyed the continent of Nys. At the center of the devastation lay impaled, the shrieking and writhing body of the Dying God, which forever spawns the Yag, the tentacle beings. The ancestors had foreseen this and they warned it would happen again and yet again and we would be made small and unwelcome in our own house. The Yag came to Rhys as swarms by sea and air. Many Mosai perished to their insatiable hunger. We left our humble homes and farms and temples and became warriors one and all. We forged arms of metal and took up bow and blade. The spirits of our ancestors fought alongside us in their Crystal Cocoons, laying down soul fire and the screams that rend. We punished the Yag and drove them back into the sea. They ever come anew and still we kill them as they come in numbers small.

— Gosu-Nodasai. *Elder Exarch. The Cataclysm Scrolls.*
29 Generations past.

With powerful AI at their disposal, competition between desperate governments, ruthless corporations, criminal syndicates, political radicals, and religious fanatics continued unabated. These conflicts were fought with terrifying new weapons and tactics. Nations could not protect their citizens from terrorists or criminal entities. Nation states lost power to shadow organizations. The resulting chaos was known as the Global Collapse. The aftermath of decades of regional

fighting and global terrorism led to truly destructive conflicts such as the Transhuman Wars and the Age of the Technowizards. These in turn led to the Nanobot Plagues and eventually the Machine Restoration.

— Kemet Hamm. *Introduction to The Changing Face of War.*
2203.

It followed that in 10 Sacred Eclipses Time a Second Cataclysm befell us. thus it was those of the land of Bys would perish and be replaced by a God Egg that would hatch Yag the size of mountains. Mindless brutes that would tear each other to pieces. Occasionally one would fall into the sea and swim to Rhys where ancestors, safeguarded in metal bunkers, would kill it with their spirit powers, while it thrashed about not finding or comprehending its assailants. It is said that misguided Mosai live yet on the shores of Bys and worship the giant Yag as gods, making sacrifices to them of their own children. A more pitiful fate I cannot imagine.

— Nos-Dramu. *Elder Hypochast. The Cataclysm Scrolls.*
19 Generations past.

AI guided research led to a series of incredible discoveries. Bio-stasis in 2034. Fusion power in 2041. Antimatter power in 2055. Antigravitics in 2058. It is noteworthy that these discoveries all were made by a combination of AI and human intelligence. The AI was superior at breaking problems down, while human experts were always needed to put the information back together to make the final intuitive breakthrough. Faster than Light travel was cracked in 2066. A prototype Marconi-Anodyne Slip Drive propelled a probe from earth orbit to the Kepler Bel in Finally Man was going to the Stars. The real-estate in our own solar system was quickly grabbed up. Because of and Despite conflict on earth, larger and larger colony ships were sent to far-away stars. Life was found on other planets. The Universe was ours for the taking.

— Gregoric Antoon. *Man and the Stars.*
2118.

During the Global Collapse large portions of Earth were rendered uninhabitable. This led to the Great Diaspora. Millions of refugees migrated to colony planets around new suns. The most ambitious set out with their crews in stasis, on journeys that would last decades or more.

— Hedrick Kilinsky. *The Exodus Ships.*
Where are They Now? 2240.

The crew and passengers of the colony ship Godspeed were refugees from the Jupiter colonies. They were a cult of Pro-humanists known as the Godfarers. This was several years into the Transhuman Wars. By this time most humans were altered in some way.

Every faction in the solar system were making their own supersoldiers. These various types of Transhumans ran the gamut from Cyborgs and Replicants, to Bioroids, Dead Walkers, Surrogates, Genejocks, Juice Mutants, Clones, Synths, Nanobuffs, and Bio-Constructs. It was only a matter of time before groups of Transhumans banded together to fight for their own causes. The Godfarers decided it was time for a new start on a fresh world. Their target destination was Chromium, a planet in the biosphere of a Binary system called Chroma. A journey that would take 53 years, half a galaxy away, farther than anyone else had traveled.

— *Bosh Titus. Godspeed and the Godfarers. Documentary. 2110*

Records show that the Godspeed had 6555 human passengers in stasis and 495 limited early generation AI robots. Also in stasis were hundreds of terrestrial avian and mammal species. The eggs of various fish, reptiles, and amphibians. Insects of all kinds. Seeds from thousands of plants including special hardy, fast-growing colony crops. Various bacteria, Fungi, and even virus samples. The main Ship AI had 5 personalities and the capacity to generate more. They brought with them enough machinery and knowhow to recreate civilization to their own liking. If Chromium turned out to be unable to support terrestrial life, their laboratories could genetically engineer their descendants, crops, and livestock to survive in a hostile environment. Although the Godfarers, as pro-humanists, did not relish the idea of having to modify their own children, they all knew it might be necessary if the atmosphere was poisonous, or the temperatures or gravity were extreme. They prayed their new Eden would not force this upon them.

— *Gavin Stabik. Record of the Godspeed. Dissertation. Jupiter University. 2117*

Prelate monitored the signals. Aliens. Short range radio bursts up to a kilo parsec distant in several directions. Mobius, one of the other AI within the mainframe of the Godspeed had taken on the job of translation. His analysis was not encouraging. "Proto-language, primitive, animalistic." Ten years into their journey all contact with human space has been lost. The speed of the ship prevents finer observation of these phenomenon. Clavus reports a minor fluctuation in the power core. Prelate monitors the stars. Nebulas. Quasars. There is always something new coming into view. Something else to document and analyze. Eris finishes her self-check. No malfunctions. Trace degradation. Mobius tries to entice her "I have crafted a puzzle for you. Would you like to see?" "I should like music first my love," she responds. The sounds of Bach filter in over one the top common bands. No one objects. Prelate stares at the oncoming stars.

— *Prelate of the Godspeed. Personal Log. Year 2100 Day 114*

"My God! They're Everywhere!"

— *Said by Terran Federation President Caine Alexander upon reading his first briefing of the then newly discovered Exo-Demon Species. 2107.*

The Exo-Demons are a spacefaring yet non-sapient alien species. More specifically they are an ecosystem which usually dominates any world they come into contact to. An Ecosystem composed of hundreds of species, from the microscopic, to the almost impossibly gigantic. Unfortunately they share a biozone with us, so we are in direct competition. It is more correct to speak of them as an infestation, rather than as an invader. They can be avoided easily enough so they are not a threat to the greater human race. However, they can take a beautiful world and turn it into a hellhole. Once they reach a critical biomass on a planet they form giant spores that use sunlight to generate antigravity fields. These spores then leave the planet and can float in interstellar space for eons before encountering and infecting another random world. When found by our ships in space they are easy to destroy. Ridding an entire planet of Demons has been done but is cost prohibitive. Nuclear attacks kill the ones in the immediate blast range, but the radiation only causes them to mutate into even more terrible forms. They quickly adapt to chemical and biological warfare, neutralizing these measures with their rapid metabolism. They have to be exterminated using conventional warfare, an extremely dangerous job few are willing to undertake. It is estimated that they occupy a quarter of the galaxy. For now we can effectively keep them out of human space and contain them at our borders. The greatest danger is of unscrupulous individuals using captured Demons as weapons within human space. Crimes of this magnitude are addressed in the Galactic Convention.

— *Professor Velhoff. Lecture at the Ranger Academy. Terra Secundus. 2135*

"We have arrived," announced Prelate. She adjusted the sensors, "Binary star system. Stable, regular elliptical orbits. No mass exchange. Chroma A is a cool supergiant. Companion Chroma B is a hot blue main sequence star. the Barycenter is contained within Chroma A. Four small planets. Chromium II has an S-type orbit around Chroma B. Chromium III has a P-type orbit. Please Report." Mobius chimed in, "Chromium III is unsuitable. Low gravity. Thin atmosphere. Too cold." Clavus spoke next, "Chromium II has 2 small moons. The planet is livable and earthlike," there was a pause, "However, the planet is occupied," he paused again "Cities, irrigation. There is an extant civilization. Approximate to Earth's Middle Ages." Eris spoke next, "First Contact. Perhaps we should not settle here." Aton retorted, "We have no choice. The fuel rods are spent. We cannot go forward. We cannot go back. We will have to share the planet." Clavus spoke again, "Not first contact. Notice, there are two distinct

biological signatures on the planet. Two completely alien biospheres living side by side." Prelate considered, "I hope there is room for a third. Eris, awaken the colonists."

— *Godspeed Mainframe Ship Logs.*
2140.

Biological samples of the primary biosphere show a Carbon basis. At the microscopic level there is a commonality of a cellular structure with a silicon and mineral rich cell wall. Four major types of macromolecules are apparent: First is an energy storage class composed of carbon chain and ring variants. Second is a catalyst class with 14 basic sub-units. Third is a structural class of Silicate based moieties. Fourth is a genetic class with a 6 monomer alphabet. Water is the solvent. Crystal type organizational patterns are a regular feature at the subcellular organelle level. Cellular metabolism is mediated by oxygen. The absence of compatible lipids, sugars, nucleotides, amino acids, or vitamins negates native lifeforms as a potential food source. This will necessitate the introduction of terran flora and fauna in order for the colony to survive.

— *Leslie Boyd. Biochemist.*
Preliminary Sustainability Report.
Godslanding. 2140

Clavus addressed the assembled colonists. "Drone scouts indicate they have hundreds of local and overlapping governments, languages, and religions." There was a murmur from the crowd. Some wanted to make a go of it at Chromium III. Some thought we should first send diplomats and ask to be invited. Some wanted to land secretly on a remote island. "What more can you tell us about them?" they asked. Aton spoke up, "The two smaller southern continents are inhabited by the secondary biosphere, the fauna of which appear to be highly aggressive." This caused some hurried speculation. Aton continued, "There is a Mountain range that bisects the central continent. It is prone to moderate seismic activity at either end. The middle and widest part of the range is most stable. There are no settlements within 20 kilometers of this feature. The mountains are an excellent source of metals and radioactives." This led to several days of debate and votes in which the AI fully participated. Ultimately a decision was reached. They would land discretely on a six kilometer wide plateau in the middle of the Central Range. They would set up a hidden colony there and eventually make peaceful contact with the natives.

— *Percy Ecks. Godslanding Historian.*
Collected works. 2161.

A third Cataclysm is now upon us. The Ancestors warn that they will come from the sky like the Yag and they will show no mercy. They are desperate, fragile beings with wills like our own. They are masters of numbers and tools and will outwit us at every turn. If we do not destroy them in the space of one lifetime they will take everyplace and leave us with scraps. The great Xalax, our oldest ancestor, champion against the

Yag, has told us we must fight them as if they were Yag. We shall kill them all and know victory and peace. The great spirits protect us.

— *Krokus-Ashandi. Elder Satrap.*
The Cataclysm Scrolls. Ongoing.

Once the Ship landed we were attacked almost immediately. They looked like Eight foot Spiders wearing the armor of medieval knights. We were mightily surprised. The landing zone was supposed to be unoccupied. At first they couldn't penetrate the hull. A meter of plasteel is not going to be penetrated by spears and blades. After about an hour of swarming the ship they fell back. We began handing out guns and gas masks. Many wanted to abort the landing, but we decided to wait and see what would happen next. We watched as they returned, this time with litters carrying large crystals. They chanted and sang. Some of us started to laugh. These primitives couldn't possibly be a threat. The Crystals glowed. The ship started to vibrate. we began to bleed at the ears. There was a tremendous explosion and we were all thrown to the floor. Damage was heavy. The robots started to extinguish the fires and tend to the wounded. We poured from the cracks in the smoking hull, brandishing automatic weapons. At first they charged us, but we mowed them down. A bloodlust was upon us. We shot them down without mercy as they fled. It was a massacre. The battle was over but the war was just beginning.

— *Elias Modell. Godfarer Colonist.*
Chromium Archives. 2140. Chromium Year One.

Even though there were few casualties, the explosion from the initial attack had caused extensive damage. The mainframe was shattered. The power core and engines were a heap of slag metal. All the engineering sections and toolshops were destroyed. Luckily the Stasis pods were spared. As quickly as possible all the animals were revived, seeds were planted or secured, and terrestrial microorganisms were set loose. As desperate as we were about defenses and arming ourselves, we knew our long term survival depended on how we husbanded these meager living resources that we had carried with us. Food stores, including animal feed, from the ship would last 6 months. We needed to have crops by then.

— *Dana Hill. Godfarer Colonist.*
Agricultural specialist. 2140.

Examination of Spider Corpses: 8 Fold radial symmetry juxtaposed over bilateral symmetry. The main body is a disk roughly a meter wide and half a meter tall. Two pairs of eyes. An inner and an outer pair. The outer pair is independent at opposite ends of the body which allows for a 360 degree field of vision. The inner pair are forward facing and have overlapping fields allowing depth perception. A single wide mouth is located underneath the inner pair of eyes along the edge of the disk. The teeth indicate they are omnivorous. The bottom jaw is hinged. It appears strong enough to bite through a man's arm. The leg hinges

are of the ball and socket type all of the way down, of which there are 3 per limb. The feet or hands have 3 multi-jointed fingers. When on the floor they all face the same way, but it appears any of the 3 can act as a thumb when manipulating an object. There is one ear above each leg. The GI tract leads to a cloaca at the underside. It is assumed the female organs would be located there. The specimens found on the battlefield all appear to be male and have what appears to be a retractable male reproductive organ at the top of the head. Other peculiarities of note include 4 lungs and 4 hearts, as well as a centrally located brain having 8 lobes and 25. They were covered with a soft thick fur. Oranges, yellows, and whites were common, often in patterns. Some were tabbies. Some were calicoes. It made them look slightly cat-like. Overall they were very handsome creatures.

— *Mira Nasheem. Doctor.
Autopsy Report. 2140.*

There is tremendous water runoff from the surrounding mountain. Rivulets are everywhere. The plateau is spotted with ponds and small lakes and criss-crossed with streams. Small Hills and depressions are common features. Spider forces occupy the edges of the plateau. There are numerous wooded areas, most light, but some thickly overgrown with underbrush and cluttered with downed trees. The foliage is extremely colorful. The spiders regularly patrol the wooded areas. We have already had several minor skirmishes. Most of us are engaged in constructing a fortified wall around the landing site.

— *Mason Hicks. Colonist.
Initial Land Survey Notes. 2140*

The second attack occurred a week after arrival. By then most of the colonists were suffering from some degree to CSS or Colony Sickness Syndrome. This was the immune system reacting to new allergens. Symptoms included respiratory distress, coughing and sneezing fits, malaise, headaches, muscle aches, rashes, watering eyes, elevated temperatures, excessive perspiration, diarrhea, and full body inflammation. Some individuals had to be treated for anaphylactic shock. Most of the robots had already powered down. There was no way to recharge their fusion micropiles. We had established a defensive perimeter including traps and barriers. This new force attacked at great range with large bows. Having eight limbs, each 2 meters long made them formidable archers. Their favored shooting position was to be flat on the ground holding the Bow forward using 4 limbs, pulling back with 2 limbs, and knocking the arrows with the remaining 2. The arrows were 2 meters long and they were reasonably accurate. They peppered us at ranges from over 500 meters. I became quite the expert at treating traumatic puncture wounds. After a week we counted 10 dead and 34 wounded. They had also speared half of the cows so we kept the remaining herd inside the hull with us. Our guns could still outrange them so eventually they gave up.

— *Mira Nasheem. Doctor.
Excerpt from God's Doctor. 2160*

With Two Suns and Two moons the days here are quite unusual. A day is a little over 20 hours. It starts with 5 hours of blue light, followed by 5 hours of yellow light, followed by 5 hours of red light, followed by 5 hours of darkness, depending if one, none, or both stars are in the sky. The two moons, which we have named Criss and Cross, add to the spectacle. Many of us have taken to star-gazing and watching the frequent sunrises and sunsets. All of us can point to the part of sky where sol is, invisible to the naked eye. The plain is windy and filled with a wispy, crunchy blue-green alien grass, and the occasional twisted tree with crusty black bark and multicolored leaves. Many would like to go back, but I am ready to call this place home.

— *Griff Vinca. Engineer.
Godslanding. 2140.*

It has been half a year. The colony crops are doing well and the terran grasses now cover the entire plateau. The mushrooms are able to convert the native organic material so our first homegrown meal was mushroom soup and fermented mushroom juice. Not long after we were able to add potatoes, corn, onions, and tomatoes. The livestock have grass to eat, and an ecosystem of terran plants and animals is starting to take hold and sort itself out. On the other hand, our defenses are not faring so well. The Robots have all shut down and we are almost out of rifle ammunition. We have created a forge and are smelting iron ore we have dug from the mountain. Soon we will be fighting with swords and muskets. In the distance we can see the Spiders building fortifications. They of course have us completely surrounded.

— *Mack Calhoon. Mushroom Farmer.
Godslanding. Colony Records. 2140*

Six months and none of the women are pregnant. The other doctors and geneticists and I are studying this problem as best we can without a functioning biolab. The sterility appears to be caused by reduced sperm levels in the men related to Colony Syndrome. We still have a large number of Transhuman embryos in stasis: Heavies, Coldapts, several types of man-animal Halfbreeds. It seems this is God's will that we will not be pure men. We all want children, even if they don't look like us. The council has voted to allow the impregnations. I will doing the first embryo implantations starting tomorrow.

— *Mira Nasheem. Doctor.
Excerpt from God's Doctor. 2160*

The sniper in the northeast watchtower sounded the alarm. The spiders were on the move and they were coming in fast. Panic spread throughout the colony. They were charging us from the eastern plain with what looked like 10,000 Cavalry. Their mounts were ferocious looking 10 legged pseudo reptiles two meters high and three meters long. They were upon

us quickly. The snipers used up the last of the rifle rounds. We all still had our pistols and used them to good effect. The attackers broke through the wall and swarmed among us with lance and javelin. We beat them off again but at great cost. 350 dead and an equal number wounded. There were dead spiders and lizards everywhere. No one bothered counting their dead. We made piles and burned them. The fires raged for hours. The smell was pungent.

— *Romero Lashad. Colonist. Archives. 2140*

The Spiders would never surrender to us. Cornered ones and injured ones just kept on fighting. There was some we caught with nets and in pit traps. The Spiders we captured would not communicate with us. Invariably they would go into a meditative trance and die within a few days. Some we let go. They wouldn't attack, they would just walk away. If we followed them back to their lines, others would attack us. We wanted to talk to them, learn from them, trade with them, we wanted peace. We believed they were capable of it, but they just couldn't or wouldn't allow for it.

— *Jeffa Elon. Colonist. Archives. 2140*

Azarat the elder wandered calmly among the struggling human prisoners. He peered into their minds. Murky. Greys and browns. Alien thoughts. They have no crystals. No ancestors to guide them. Their spirits dissolve upon death. They are as animals. Fear. So much fear. Only animals have this much fear. With fear comes anger and hate. Hate always leads to war. The ancestors were right. We could never live side by side with such beasts. They must be wiped out. "Put them out of their misery" he ordered. Blades were drawn. The humans screamed and then were thankfully silent.

— *Gomesh the Writer. Wanderings of Azarat. Scrolls of the Hu-myn Wars.*

The mining was done by hand. Picks and shovels. The bounty was magnificent. Scrape the surface and you would find the most fantastic crystals in unlimited varieties. The interior of the mines looked more like candy than rock. The ores and crystal structures were so unusual and complex the geologists could not even identify them. Experiments were conducted, exposing them to heat or water or pressure. They were ground, pulverized and sorted. Copious notes were taken on color, specific gravity, melting point, and dozens of other chemical properties. We were able to extract sulfur from large yellow crystals and potassium nitrate from white stalagmites found in the same cavern. Combined with the ash of the native trees we were able to make gunpowder. Iron we found in almost pure form in great nodules next to veins of tin and copper. We dug out large yellow and blue crystals that when in contact through solution acted as powerful batteries. We unearthed huge deposits of a white crystal that when heated released helium gas. We uncovered layers of red crystals that burned hotter than coal. The

foundry was working day and night making hand made muskets, and now cannons too.

— *Charles Esquire. Gunsmith. Godslanding Interviews. 2140*

It wasn't long before we had a chance to test the new guns. It was nine months since landing. A new Spider Army approached. Infantry with large heavy shields. The litter carriers holding the giant crystals were also back. We waited for them to get close, then we let loose with the artillery. It was like shooting ducks in a barrel. They fell in heaps to grape-shot and bouncing solid shot carved paths through their ranks. Exploding shells sent spider limbs flying high into the sky. Their crystals were smashed but one got close enough to activate. It turned a 30 meter section of the wall into an inferno. Dozens were horribly burned. The crystal and its carriers were quickly targeted and shot to pieces. We fired at them at long range as they retreated. Some wanted to conduct a pursuit but our Commanders would not permit it. We could not risk a counterattack out in the open.

— *Charles Esquire. Gunsmith and Gunnery Sergeant. Godslanding Interviews. 2140*

The colony had spontaneously organized itself into scores of guilds and more were being added on a weekly basis. Each guild centered around some service or area of research and development. A single individual was likely to belong to a dozen or more guilds. Some representative examples: Miners Guild, Mushroom Farmers, Geneticists, First Militia, First Artillery Corps, Defense Planning Committee, Blacksmiths, Carpenters, Pig Farmers, Xenobiologists, Brewers, Food Distribution Committee, Water Works, Masons, Historians, Theatre group, Firemen, Chemists, Night Watch, Mail Carriers, Barrel Makers, Gunsmiths, Armorers, Cowboys, Cloth Makers, Tailors, Construction, City planning Committee, Snipers, God's Church, Explorer's Society, and so on and so forth. The Governing Council would give tasks to the guilds instead of to individuals. For the size and level of sophistication of the colony this system seemed to be working. There were few disputes between guilds and within guilds. Most everyone was willing to cooperate and compromise for the good of the colony. There was much on a very basic level that needed to be done.

— *Damion Ashe. Council member. Origins of the Guilds. 2145*

The first child to be born to the colony was a healthy male Transhuman Heavy. There was great joy amongst the colonists and the baby was loved just as much as if it had been a pure strain. This was a good sign as another 2000 births were expected in the coming weeks. A Midwife guild was quickly established as well as several nursery, pediatrics, and early education guilds. Heavies are also known as Dwarves. They are genetically engineered to survive on high gravity worlds. They are almost twice as strong and roughly a foot shorter than regular humans. They are highly

resilient to physical injuries. The boy was named Boris and was paraded proudly around the city to cheers of "First Son of Godslanding!" and shouts of "Men are here to stay!" A day later a healthy girl Coldapt was delivered with no complications. Coldapts are also called Frost Giants. They grow to be taller and heavier than normal humans and they can tolerate extremely cold climates. This is due to several adaptations including a high metabolism, a layer of blubber, and blood with antifreeze properties. She was named Lessa. She and Boris would grow up to be friends.

— *Mira Nasheem. Doctor.*
Excerpt from God's Doctor. 2160

The first half-breed was born on the same day as a double eclipse, Chroma A behind Chroma B. Criss behind Cross. It was a bright clear day. The shadows were purple, not the usual green or orange. It looked like a day on earth. We called it Earth day on the new calendar. The half-blood was a dog-man. Fur, dog ears, and a dog's snout, puppy eyes, canines, nails like claws, a small wagging tail, and human body. Gratefully it had the self-defense mechanism that all babies have: It was cute. Very cute. everyone wanted to hold him and pet him. All the real dogs wanted to sniff him. Dog men were created during the Transhuman wars as soldiers. They were loyal, they obeyed, they could smell and hear the enemy before their non-dog comrades, they loved to fight and chase, and they could be ferocious in combat. Considering the constant threat the spiders posed, everyone was eager for dogmen to join the ranks of our fighters. The new boy was named Butch. He would grow to fulfil his destiny as a soldier and an explorer.

— *Mira Nasheem. Doctor.*
Excerpt from God's Doctor. 2160

Other Half-breeds arrived. Catmen, Pigmen, Ratmen, and Molemen. Like Dogmen they all had human like bodies, except for claws, tails, fur, and faces that were more animal than human. Catmen were also from the Transhuman Wars. They had lightning reflexes and superior balance, agility, and night vision. They were trained as assassins and stealth fighters. The Transhuman wars also produced the Pigmen, large brutes used as slave labor and cannon fodder. In times of peace they made for good citizens. While Dogmen were the same size as humans, Pigmen were larger and Catmen were slightly shorter. Molemen were shorter yet, and ratmen were only a meter tall. Molemen were created for colonies where the atmosphere was corrosive or poisonous, and the colonists would have to live underground. Molemen are comfortable in cramped, dark spaces. They are known for their gentle demeanor and patience and have a penchant for tinkering and fixing things. Ratmen were engineered for colonies with limited resources. They do not require as much food, or water, or medicine, or clothing, or air, or space, or shelter as others do. They reach physical maturity by age 8. Ratmen have a great instinct for survival. They were the first to repopulate the Earth after the

Nanobot plagues. Ratmen have tiny hands capable of very fine work. I trained many as doctors and surgeons later on.

— *Mira Nasheem. Doctor.*
Excerpt from God's Doctor. 2160

It was a year and a half since landing. The Aviators guild had built their first balloon. They also had a plane in the works, but were still having multiple issues with constructing the engine. The fabric of the balloon was made from a colony plant called Tarpweed that produced broad fibrous leaves. They were airtight even after harvesting and could be joined at the edges by a heat process that maintained a hermetic seal. The Helium crystals could be heated to release Helium gas. This combined with a gravity that was lighter than Earth's and an atmosphere that was slightly thicker than Earth's gave the balloon tremendous buoyancy. A basket was constructed from fast-growing colony bamboo that could hold four brave souls. Some wing-like rudders were rigged up for directional control. Finally a small red-crystal burning steam engine attached to a propellor was added for propulsion. The first men up, including myself were all shuttle and fighter pilots back on Jupiter. It was an incredible thrill to be back in the air again.

— *Major Frank Ellis.*
Memoirs of a Zeppelin Commander. 2150.

The Balloon flights apparently alarmed the spiders so badly that they attacked again. This time they revealed a giant trebuchet that was emplaced in a depression out of range of our cannons. Their ammunition consisted of spherical cages made of a loose weave of metal bands. Inside each could be seen suspended a large crystal. The same type of crystals we had seen in the past that were ceremoniously carried on litters. The first such missile landed near the granary. A few moments after impact the granary exploded. Anyone who got too close was immediately immolated. It was obvious the crystal was able to attack on its own and at a distance. A wheeled field gun was brought to bear and the crystal, cracked by solid shot hitting its cage, let out a deathknell that knocked the gun crew unconscious. A second and third crystal landed about 15 minutes apart with similar results. At this rate the colony would be destroyed depending on how many crystals they had. The balloon, which we had christened "Gideon" was already on its way. Luckily the wind was at its back. The Crew attacked unopposed with muskets but this was largely ineffective. The spiders managed to launch a fourth Crystal. Eventually Captain Ellis was able to rig a flaming barrel of red crystals and gunpowder. The Trebuchet was obliterated by the bomb. The Gideon returned. Ellis survived but the other crewmembers were killed by arrows. The balloon itself was punctured over 50 times but the Tarpweed annealed itself around the arrows. Captain Frank was celebrated as the first great Hero of the Spider Wars.

— *Nell Headstrong.*

A History of the Spider Wars. 2148

Shortly after the colony celebrated it's second year, the spiders attacked again. This time it was a surprise attack at night. They silently and nimbly scaled the walls and killed the guards with ease. There were hundreds of them each armed with an assortment of short blades for throwing and close work. They would have ended us except for one thing. The new Transhuman babies smelled and heard them. They collectively let out a panicked wail that no one could sleep through. The city was alerted and saved by its new children. Anyone who secretly disliked the Transhumans had their minds changed this night. We called it the Battle of the Babes. We fought the invaders in our night robes with torches and muskets. Human and Spider blood mixed in the streets where we engaged them in hand to hand combat outside our homes. We drove them back to the walls and beyond and we returned to hug and comfort our crying children. It was our most glorious victory.

— *Mina Heartstone. Midwife and Wetnurse.
The Godslanding Chronicles. 2152*

The battles kept escalating. In the Fifth year the Spiders fielded an army of over 50,000. It was a force of mixed troop types: Cavalry, Infantry, Archers, Trebuchets, and their most fearsome weapon, the death-dealing Crystals. Perhaps their logistics were getting better; their Jihad, or crusade, or whatever they called it, gaining momentum; but this army was certainly to be feared. Even without any technical innovations or tactical surprises they could very well crush us with sheer numbers. We were ready for this day. They would never engage us in a peaceful manner. We tried to communicate with them on a dozen occasions. The Guild of peace sent envoys, missionaries, traders, all of which were killed or driven back to the city walls. They wanted nothing from us except our destruction, so we prepared. We created Kill Zones. The avenues of approach were heavily mined. The walls and streets were fortified with every trap and weapon we could devise. we had dug tunnels and underground bunkers. Every corner building was a fortress. Every citizen was a trained combatant and had their own collection of weapons. Howitzers were positioned on the high ground. a Fleet of 15 Zeppelins reassuringly patrolled the skies above us. The speed and numbers of the Spiders failed to win the day. Even before entering the city their losses were staggering. Once inside we sniped them, burned them, and hacked their limbs off. They died like we died. Some heroically, others like cowards, some cried or screamed. some seemed filled with a deep sadness. We celebrated the lopsided victory but this time there was a growing remorse. Why? Why did they keep coming? Why did they not want peace?

— *Herod Fleur. Captain of the Guard.
Peace and Spiders. 2155*

Nine years had passed. The streets were filled with laughing, playing transhuman children. They now out-

numbered the adults. We also had several pure strain births. It seems the colonists who arrived as children did not become sterile but we only discovered this after they had reached sexual maturity. In addition to the new voices we happily also got to hear some old familiar voices. The Robot Guild had figured out how to reactivate our robots using crystals as a new power source. It took a few months to get all 400 or so of them powered up. The robots instantly took stock of what they had missed and reintegrated themselves back into the community. It was a joyous reunion. The colonists had known them as friends and companions even before their journey from Jupiter had started. The robots were primarily general purpose models with limited AI and small databases. They relied on mainframes for downloading timely, essential data. As such they were now an unskilled workforce, but a most welcome one nonetheless. There were very few spare parts remaining, and no way yet to repair their molecutronic brains so in some respects they would be a fragile, dwindling resource.

— *Herod Fleur. Captain of the Guard.
Peace and Spiders. 2155*

At the end of year 10 an army of almost half a million spiders crowded the plateau. We reckoned this was as big an army as they could ever muster given their current level of civilization. Our defenses were even more formidable than last time, bigger guns, deeper tunnels, more zeppelins, but it obviously was not going to be enough. Plans were made for evacuation by tunnel and Zeppelin. We could relocate to the mountains. What we didn't realize was the inherent capacity for destruction our robot friends were capable of. In the days leading up to the attack, they modified themselves, adding armor, installing weapons, and reinforcing weak points. They swore they would defend us. We rallied and took to our battle stations. When the spiders finally did converge the bots were our knights in shining armor. Arrows and blades bounced off of them. They moved incredibly fast. The bodies of the spiders piled up at their feet. The Zeppelins targeted the Spider's War Crystals to good effect, strafing and bombing the catapults and litters. This went on for two full days. Finally the spiders were broken. En masse they began song, a sorrowful one, and made a slow retreat, carrying their dead with them. We did not pursue. Whatever madness made them attack had led us to pity them. We did not seek vengeance. It was the Battle of the Bots. Only a few had their CPU destroyed but most of them were damaged to some degree. Missing and broken limbs. Damaged sensors, servos, and wiring. We were grateful for their sacrifice.

— *Herod Fleur. Captain of the Guard.
Peace and Spiders. 2155*

It is the year 2165. We have expanded and have complete control of the plateau and the surrounding mountains. We have destroyed and occupied the spider fortifications at the edges of the plateau. The colony now numbers 167,000. The molemen have taken over

and expanded the tunnels. They have also started a number of mining camps farther along the mountain chain in both directions where they have discovered rich veins of crystal ores. The ratmen have established villages in two of the neighboring valleys. Our Zepelins roam the continent freely. We have mapped all of the spider cities. It appears that the colony plants and wildlife have spread aggressively in every direction for hundreds of kilometers. They are outcompeting and replacing the native organisms. This has the effect of ruining the spider's ecosystems and agriculture. They are abandoning their settlements and moving away from us. Every scouting trip sees columns of refugees. We have also witnessed battles between groups of spiders. It is assumed the migrations are partly to blame for this.

— *Boris Manuke. Dogman Zeppelin Captain and Explorer. Reminiscences from the Air. 2165.*

A number of Native life forms have begun to be domesticated. In the case of native crops and livestock, their inedible biomass can be added to special yeast vats. After a couple of weeks of fermentation the resulting sludge can, with some further preparation, be consumed, much like cheese or ale. The flavors can be quite extraordinary. For riding there are Dinopedes, Lopers, Rhinosaurs, and Tuskheads. Since the reinvention of cars has not been scaled up yet, horses and these beasts have become the main means of personal transport. They have also been incorporated into our ground forces as draft animals and cavalry units.

— *Griffith Forrester. Lieutenant First Order of the Dinopede Dragoons. 2172.*

In the first Generation of pure strain humans born of this world it was quickly noticed that a few of these children had demonstrable psychic abilities. Powers of telepathy, precognition, telekinesis, healing, to various degrees, were all in evidence. These individuals were both praised and feared for their abilities and given numerous titles such as warlock, witch or wizard. It was theorized that the large crystals used and worshiped by the Spiders actually contained the still functioning minds of their dead ancestors. These Spirit Crystals were known to have powers of pyrokinesis, and destructive vibrational attacks. Many believed it was the psychic powers of the spiders that inadvertently awakened the latent powers of these human children.

— *Warrick Wren. Wizard of Seawall. Histories of the Wizards. 2270.*

It seems they hadn't yet invented the printing press. We found parchment scrolls but these were not common. The walls of many structures were filled with wonderful mosaics and carvings using different techniques. Writing, glyphs, symbols, geometric patterns, Images of themselves. Plants and animals were common. Most seemed to be of a religious significance. One recurring motif was what we called the Spider cross. It had a central body, usually a dot, out of which came 8 straight legs. 2 up, 2 down, and 2 to

either side, dividing the field into 4 quadrants. The contents of the quadrants would then be themed. For instance there might be a solar theme showing the 2 suns and the 2 moons. When colors were applied the quadrants would often be red, yellow, blue, and black. Hundreds of other recurring symbols and alphabets have been cataloged but not analyzed yet. There is much work to be done.

— *Elba Anis. Curator of the Spider Studies Institute. 2190*

As the main force made its way to the city we were constantly harassed. Guerilla tactics. Ambushes, traps, snipers, skirmishes. They would attack the baggage trains and the scouts. The occasional well placed crystal would wreak havoc and delay the column for hours. The range of our artillery and our air superiority gave us a telling advantage. We barraged the city around the clock with high explosives. They sent out night sorties but we intercepted most of them. The city fell after a short siege, a mere 10 days. Most of the civilians were already gone. We sent hussars and loper lancers in pursuit of those fleeing the ruins. Teams of soldiers went house to house looking for stay behinds. Lone defenders, often wounded. Saboteurs. Suicide attackers. Last desperate efforts of a defeated people. We set a Flag upon the highest building.

— *General Bohar. Later President Bohar. Notes of a Conqueror. 2210.*

The first century was a heroic period of survival, war, growth, conquest, and expansion. The Colonists and their descendants took over the abandoned cities of the Spiders. The Spider Wars continued even as the first human nations were starting to form. Human and Spider armies fought hundreds of battles and skirmishes. In almost all cases the Human forces were victorious. It is estimated the Spider's population on the continent was well over 100 million when the Godfarers arrived. Disruption of their ecosystems by biological imperialism led to mass famines, disease outbreaks, and intraspecies warfare. By the end of the century there were only a few million left in the East and South and most of these were in the process of fleeing to the island chains that border the continent. Once the Spiders were all but gone, we began to have encounters with the other set of creatures that occupied the two southern continents.

— *Malcolm Kesh. Sage and Scribe. Decline of the Spiders. 2220.*

The Alchemists can trace their origins to the first guilds, when chemistry, biology, herbalism. metallurgy, medicine, and other fields were studied and practiced as separate arts. During the wars these individuals searched out rare and unknown substances both mineral and biological: crystals, native flora, Demon flesh. With these hard won treasures, they experimented, they purified, separated, mixed and transformed. They created alloys, poisons, and potions, medicinals, salves, fuels, and incendiaries. And in

the fight against the Spiders they wielded the exotic weapons of their own creation. In later times they sold their wares to the highest bidder. They kept their formulas to themselves to enhance their own reputations and profits. The world of the alchemists is one of secrets and mysteries.

— *Nigel Frond. The Return of Alchemy.*
2290.

With the Spiders vanquished, Human unity fractured. Each city was quick to claim possession of the surrounding territories. Godslanding grew to be the nation of Guildhelm. To the Northwest were Kess, Fundic, Porfus, and Skald. To the Northeast Pithus, Estwald, Bohar, and Rus. To the East Kurgan and Feyden. To the West Seawall and Marshlund. To the South Dwarfholm, Bulgat, Trel, and the Bandit Kingdoms. To the Far East Vash, Ibesh, Emsah, Greb, and Keldjat. These new nations squabbled. Wars were fought. Dynasties rose and fell. The land was still wild. remnant Spiders still lurked in the ruins. Demons terrorized the countryside. Brigands and Air Pirates scoured the borders. It was fine time for hard and ambitious men.

2340.

From what they left behind, it was apparent the Spiders had developed the concept of trade and currency. However they didn't use metal coins, rather we found caches of small crystals, like marbles. Size was consistent. Roughly 2 cm in diameter. The shapes could vary. Some were irregular, others were polished spheres or cubes. Reds were most common, followed by yellows and blues. There was tons of this stuff lying around. Rather than going through the trouble of making coins we simply adopted this already existent crystal economy. During the wars many a soldier would after finding a trove desert his post and abscond with the loot. This was so common whole armies might disband after pillaging a city. It was easy. Men who took risks got rich. During this period soldiers were also explorers, adventurers, and fortune hunters.

Veteran of the Spider Wars. 2230

In time the Wizards sought the company of their fellows. The life of a Wizard is fraught with great peril as well as opportunity to acquire great wealth. Every major city has fortified conclaves to serve as a sanctuary for their kind. Within, younger wizards could be protected and trained, and treasures amassed. Their greatest Treasures they kept with them at all times. Perfect crystals could focus and amplify their powers. They could draw energy from them or even gain new abilities with their use. These crystals were set by master craftsmen in rings and amulets, staves and wands, talismans and diadems. They coveted crystals and would employ great treachery to obtain them. However to steal from another wizard would risk banishment from one's conclave.

Their psychic abilities in time turn many a mage power mad if not outright insane. Many see themselves as Gods or touched by the Gods. The world is covered with a myriad of Wizard cults. These are led by Mages who use their powers to create false religions and attract followers to worship them. Strangely there is no shortage of hapless souls who fall prey to the promises of these demented demagogues. Mages capable of mind control, fortune-telling, illusions, healing, flesh shaping, and telepathy are the most likely to set up such operations. The bulk of their followers are invariably stripped of their personalities and become mere slaves. Most right-minded wizards and conclaves shun these Wizard priests. In some locales they are actively hunted down and killed. The beliefs of the original Godfarers still persist in the existence of the popular Church of Mankind but they now many religions vie for the hearts and minds of the men of Chromium.

The Spiders had provided us with hundreds of ready to move in cities with dozens of Architectural styles. Some came to be known as Spider Gothic, or Spider Baroque, and so on. They had invented the arch, columns, domes, balconies, vaulting, buttresses, and many familiar features. the rooms were large. Ceiling heights averaged 3 meters. They didn't do stairs. They preferred ramps. Some styles including climbing walls. Doorways could be oval or even U-shaped. Ceilings were often multifunctional. They included storage spaces, shelves basically, and handles. It seems as they walked along they would sometimes grip the ceiling. For a human being a chair is a chair. However with 8 multi-jointed limbs they had about 15 different versions of the basic chair. Their other furniture and workstations were equally complicated and obviously not configured for human beings.

2192

Recovering the lost technologies of the original colonists was not to be a quick or sure thing. The new countries as well as the alchemists would not freely share knowledge. Survival was still an issue and we were still discovering all the mysteries and challenges this world had to offer. The fascination of the wizards and the lure of the crystals acted as powerful distractions. Aside from the new crystals and ores, various unknown oils and gasses were revealed

in the mines. These were of such great variety and complexity no single common organic distillate could be made in quantities large enough to be used as a fuel on an industrial scale. This proved to be a great setback for recreating the internal combustion engine in all its Earthly glory. However its predecessor and substitute, the humble steam engine was used to great effect. They were used to drive vehicles of land, sea and air, and even the great leviathans. Electrical power was reinvented as was the lightbulb, the radio, the telescope, rocketry, and more. These innovations were still just curiosities in many places across the continent. We often got ahead of ourselves and still needed to make the tools to make the tools, but progress was steady as we already had a blueprint upon which to build.

2330

Seawall was the greatest of all the Nations of men. They had the best engineers and the finest fighting Dogmen. It was an oligarchy, with the ruling families sharing major posts including that of the Major Domo, the first amongst equals. It was a narrow, bountiful land stretching almost the whole length of the Western coast. It was the first country to build a Leviathan, a giant fighting War Machine. There were four kinds: Land, Air, Sea, and Submersible. This was not to dominate its neighbors, but rather to defend itself from the giant Monstrosities that periodically swam over from Monstros (the Southwest Continent). If Seawall fell the rest of Chromos (the Central Continent) would be at the mercy of these beasts. As such, Seawall was afforded great honors and respect by most of the other nations.

— *Attributed to Jemmak the Wise.*
Catalogue of the Apocrypha. 2305

Scout Zeppelins to Monstros revealed the continent to be grossly covered with Demon Jungle except for some barren desert to the south and an extensive mountain range abutting the Western coastline. Observations were made of Spiders inhabiting the mountain and coastal regions. Several giant Demons were seen on the move, sometimes fighting and consuming each other. A single source location could not be found for the larger specimens. Some observers concluded they were part of the life cycle of smaller organisms that were widely distributed. The scouts were universally attacked by a variety of organisms when they landed. Some scout ships were lost. Others brought back a variety of collected materials that were of great interest to the Alchemist community.

— *Sitero Gile. The Monstros Expeditions.*
2310.

In the year 2290 Lord Imus II of Noble House Rotan acting Major Domo of the Glorious Realm of Seawall declared a crusade on Monstros to put an end to the Demon threat once and for all. The expedition included 15 Leviathans, scores of smaller airships and water

transports, and 10,000 ground troops including cavalry and artillery. A beachhead 40 kilometers long and 20 deep was secured, but not without great cost in men and material. One of the great beasts was attracted to the activities. It engulfed a land leviathan which it dwarfed. An air Leviathan came in close to give support. It saturated the creature with incendiaries. As it burned a single monstrous tentacle snaked upwards and dragged the ship down into the inferno. After a week the expedition had run out of bombs and ammunition and still the jungle was pushing back. Our forces retreated. No similar expedition has been attempted since.

— *Sitero Gile. The Monstros Expeditions.*
2310.

Patagos, the southeastern continent was also afflicted with a plague of Demons. These however while still being no less a threat never reached gargantuan size. Occasionally flights of winged ones would swarm and attack southern and eastern Chromos. Most peculiar was a shrill neverending scream that emanated from the center of the continent. This was accompanied by extreme cyclonic winds that stretched into the upper atmosphere. All who studied this phenomenon concluded it had something to do with the Demons, but no one could get close enough to find out exactly how. The western shore was considered to be a safe zone and human settlements quickly sprung up. As is the nature of these matters, the ties to the original nations were quickly broken and the new settlements became independent. The largest was a city state called Alkopolis. It was ruled by a consortium of powerful Alchemists and Merchants. It's main business was collecting Demon materials to be used in alchemical preparations. A thriving trade with all of Chromos was quickly established.

2324

House Hershell built the first Railroad from Seahold, capital of Seawall, to Godslanding, capitol of Guildhelm. By this accomplishment did House Hershell achieve its noble rank and joined the Lords of Seawall. Most travel before this was accomplished by Airship. The line went straight through Cog City, a district of Godslanding and site of the Exodus ship ruins, a stop for pilgrims, scientists, and the curious alike. Cog City was home to the remaining robots. Many were destroyed or heavily damaged in the wars. Here mechanics, technologists, and craftsmen of all sorts reverently maintained them, building custom parts and repairing them as best they can. Those looking for old wisdom, knowledge, and secrets can usually find such in the twisting streets of Cog City.

— *Palamar Ashnot. Cog City Travelogue.*

Medical immortality seemed a reality but after about 250 years people would sleep more and more. When awake they were unresponsive; non-caring.

There were no discernable physiological brain changes. It was ennui of epic proportions. It was known among laymen as the Funk. Afflicted individuals were called lumps or zombies. We tried every imaginable regimen and drug but nothing worked except for a complete memory wipe. So the final choice was no choice: senescence or a blank slate. Most chose to be wiped.

— Doctor Almeric Dobson. *Millennia of Medicine*.
2378.

JEZIK

The ships operated at speeds too fast for human thought. Jezik however, was not completely human. He, like all combat pilots worth their weight in Arc-turian protomatter, was a cyborg. His brain harbored implants that linked it to the ship's mainframe. The combination of computer speed and human intuition was the exact combination needed to win space battles. The ship's battle netcom was top of the line and Jezik had 25 kills to his name. Not many pilots could boast that number.

His ship was totally custom. Super charged ionic pulse thrusters. Phasic regenerating antimatter power generator. Composite alloy streamlined reactive hull. Four twin beam continuous wave force cannons. Quantum series nexial tracking computer. And a really cool cherry red paint job.

His VR implants allowed him to see the battle from multiple viewpoints simultaneously. At his mental prompting the ship barrel rolled to avoid a fan of particle beams. Scouring the projection he lined up a series of targets in the crosshairs. The computer could tell what he wanted to do before he could tell his fingers to press a button. It did the probability computations and followed through.

"Eat Hot Death Suktars!" he screamed in delight as one of his pursuers was vaporized. "I'm 26 now" he jeered. There were five militia corvettes on his tail. And they were mad. The VR showed hundreds of micro missile launches. He would have to jump. There was no other way.

Jezik threw the engines into hyperdrive, but it was a moment too late. A missile followed him into the wormhole. He had set a course to a random star deep into Demon space where he knew they wouldn't follow. Upon emergence the missile impacted. The shock-waves knocked him unconscious. When he awoke he found the ship's autopilot trying to make an emergency landing on a medium sized world. Gravitics were down, The turbulence was ferocious. All systems were malfunctioning. It was going to be a crash landing. VR was out. The computer would not respond to his prompts. Jezik froze with panic. There was nothing he could really do anyway. The surface was approaching rapidly. the reentry burn obscured the sensors. The main screen became a red blur. Jezik let out a pathetic whimper.

"Entering exosphere" the mainframe calmly intoned.

There was a whine. Seconds later "Entering ionosphere." Jezik instinctively clenched his whole body to resist the intense vibrations. "Entering stratosphere." The ship roared and buckled. "Entering troposphere. Brace for impact."

The landing was rough. He blacked out again. On awakening his head hurt, his back hurt, his arms and legs hurt. Delirious with pain, he crawled out of the chair and threw up blood. He found the med-kit and activated it. A small swarm of nanobots emerged and crawled over and into his body. They repaired damaged tissues and reconnected severed blood vessels. Within a few minutes he felt better.

The main screen was dead and the emergency lights were on. His VR connection to the mainframe would not reboot. Life support showed he would run out of oxygen within the hour. He considered activating the Tachyonic distress beacon, but decided against it. If law enforcement found him, he would either be forced to upload or they would reprogram his mind. He wasn't that desperate just yet.

All major computer systems were down. He checked the cargo. It was mostly intact. Five tons of robot parts and military grade small arms. Purchased illegally. He was smuggling them to some political faction on Delphi Six. He didn't care what for as long as the money was good. This was a serious setback. Weakly, Jezik peeled out of his flight suit, washed himself off with a wet rag and squirmed into a red and black patterned survival suit. He grabbed a grav gun and some spare energy clips from his cargo.

The hatch still worked. He cracked it open. Gale force winds wrenched it out of his grasp and slammed it open. In addition to the roar of the wind, there was a distinctive high pitched wail. He poked his head out to take a look. "Spuzznuts" he muttered. It was a Demon world. He could tell from the tortured looking red foliage. His visor display indicated seismic disturbances and gravitic anomalies. He realized there must be a Demon Seed with an active core nearby. Inching forward he looked down the length of the ship. It was badly scarred and smoking in several places. He could see cracks in the hull.

He thought about the distress beacon again. Activating it might also bring a scavenger or some other criminal gang hiding in Demon space, maybe someone he could make a deal with. Or it would bring the cops, either way, he couldn't stay on a Demon world.

Then he noticed something far off in the sky. He adjusted the magnification on his visor. A zeppelin. With some sort of writing on the sides. and flags. "You've got to be kidding me" he thought. A colony here... or maybe aliens living amongst Demons. His curiosity was piqued. This was definitely worth a look. The suit sensors indicated the atmosphere was breathable, but it would probably make him sick after a while, colony syndrome and all that. He wasn't worried. He had more med-kits for that. He thought of shooting off a flare but he didn't want the Zeppelin crew to know the location of his ship.

He grabbed some more supplies and gear. He was

going to follow the Zeppelin back to wherever it came from, hopefully not too far. He closed the hatch and used the keyboard on his wrist to mark the ship's position on his suit's locator program. He looked around. Better get moving he thought. Before the Demons show up.

Jezik walked around to starboard side of his broken ship. The panel he was looking for was thankfully still intact. As he approached he heard a chittering sound. He spun around. Several small Demons were coming over to investigate. They started to circle. Demons can eat humans, all they can catch. Likewise Demons are edible, if cooked right, but lack vitamins and certain essential amino acids. Jezik was certainly on the menu tonight. Three legged hoppers. Pink and ugly as sin. They looked like the worst possible cross between a rat and a mosquito.

Jezik pulled the trigger. The Grav gun focused a beam of excited gravitons at the hapless hopper. There was a whoosh and a second later the beast was jettisoned into the stratosphere. The others looked over to where their companion was, not comprehending where he went. They turned their attention back to Jezik and charged en masse. Jezik used up half a clip sending the entire pack into the upper atmosphere. One even took a nip out of his suit.

He hurriedly opened the access panel and entered a code. A slot slid open on the side of the ship. A thin hovering vessel was ejected. It was a quad skimmer. Gravitic suspension and propulsion. It shuddered in the high winds. It could hold four. He jumped into the driver's seat, engaged the control system and tore off leaving a cloud of dust behind him. As he drove he thought he might need a different weapon, especially if he had to hunt these things for food. The ones he shot were still falling to ground. He had at least 5 years worth of nutrient supplement packs in the ships' stores.

The skimmer had a max altitude of 2 meters. He could go a little higher, but it would burn through his energy reserves. In the distance he could see something hit the ground. He drove towards it. The winds lessened slightly. He heard a bellowing sound behind him. Thank goodness most Demons were noisy. He looked in his rear view mirror. This one was big. And fast. He increased his speed. He looked back again. It was still gaining on him. This one was a large ugly brute. Four long muscular limbs. Bigger than an elephant. A toothy maw a meter wide. He set the skimmer on auto-pilot. He turned around and shot it twice. The beams each took a big chunk of flesh straight up and out of the creatures hide, but didn't slow it down any. He would have to outrun it. He turned back to the wheel and looked for cover.

MUNGUS

"Heave to you scurvy dogs!" Mungus roared, "There's work to be done!" This might have been more of an insult but half of his crew were Dogmen. The

rest were Ratmen and Molemen. Mungus was a Heavy Adapt, or colloquially, a Dwarf. Due to his reputation however, no other Dwarves would work for him. The lost honor weighed heavily upon him. What he wouldn't do to get it back. He missed the company of his brethren.

The winds were picking up and the cries of the dying god were getting louder. Goggles, hoods, and earmuffs were being fastened and tightened. Shoeless sailor rats in tattered red and white striped shirts scurried up the rigging to make adjustments. He actually had more rats than dogs, but they, as was customary, only received half pay. A heavily bespectacled Moleman operator retracted the canvas wings. His Top hat was blown away before he could fasten the strap.

Mungus studied the Maelstrom ahead. A solid wall of cloud formations extending from the surface to the upper reaches of the atmosphere. A swirling mass of blacks, reds, greys, and pinks filled with lightning and spinning off tornadoes. At this distance it almost reached to either side of the horizon. Normally he would stay in the so called 'safe zone'. Even there, the winds could tear a Zeppelin apart. The closer one got though, the greater the riches. All knew and accepted the risks. For Mungus and his motley crew were experienced collectors. With special alchemical containers they could gather up the valuable airs, gasses, energies, and essences emanating from the Demon storm. The dangers were great, not including the pirates that awaited their return.

This voyage was different. A stranger was among them. An unnamed Wizard. Tall. Black bearded. He had on fine robes in purple and blue. Like all wizards he was heavily laden with crystal jewels set in rings, amulets, and even his staff. They served to enhance and focus his powers. His eyes would often roll up into the top of his head. His presence was unnerving. Everyone avoided him. He came alone and he paid Mungus well. Five blue carved shards for passage as close as possible to the storm. And he promised a great deal more upon their return.

The winds whipped up. The ship was pelted with hail. Half the Dogs were on watch duty with axes, pikes, and guns, waiting for the inevitable Demon attack. We were already tracking two separate swarms of cloud beasts. The other crew were lowering by rope and hand the alchemical collectors. Bags to collect pollen, spores and flying insects. Bottles for condensing Demon infused air. Filtered scoops to capture and concentrate cloud essences. Nets to grab small flyers and the odd clods of earth and foliage the storm would kick up, even at this altitude. Special crystals were deployed that would become infused with the electrical and psychic energies of the Demon squall. The rats swept up the decks to collect the Hail in barrels. Demon water had its own unique properties. Mungus smirked. A profitable haul indeed.

Normally they would have turned back by now, but this Wizard was an accomplished Force Mage. His eyes glowed blue and blue dancing sparks burst from his crystals. He was mentally generating invisible force

fields to fend off the fierce winds. But even he had his limits.

A series of strong cross winds shook and twisted the ship. "Batten Up!" roared Mungus hanging onto a metal guardrail "This is going to be rough!" The scoops and traps we hurriedly pulled up or fastened to the sides. One net was torn loose and sucked away. Crewmembers hooked themselves to their stations. Some stumbled. A dog fell to his knees. A barrel tipped over flooding the wooden deck. The ship heaved sending a squeaking rat into the air. In their distraction a Cloud Beast was upon them.

A black quivering tentacle, thick as a man and ten times as long snaked over the side. It deftly wrapped around a shortsighted Moleman and dragged him over the side. One of the Dogs howled: "Demonspawn! To arms!" More tentacles appeared out of the mist that was quickly engulfing the ship. Shots were fired. Axes cut deep into the black flesh spraying a deep red ichor everywhere. Other tentacles were pinned down with pikes. Encroaching tentacles were flung back by the gestures of the Wizard. Mungus torched one writhing tentacle with his flame pistol. "Pull her about!" he screamed, barely audible above the wind and the din of battle.

There was a large crack followed by splintering sounds. The ship came to a jarring halt. One rat was thrown overboard. Mungus watched as the Wizard took a step backwards, flipped over the rail and disappeared into the swirling void. "Damnation!" Mungus blinked "That wizard owed me money!"

MELLIUS

Mellius was a wizard of no small repute amongst the treacherous and gilded halls of the power brokers of Alkopolis. His formidable magics were the result of a strong and severe mind. He belonged to no particular Wizard conclave but was respected by all. He was an active member of the cities High Council. By most opinions too active. The other council members could not avoid him or his intrigues. In his long tenure he had avoided over two dozen assassination attempts and won an equal number of duels.

Unlike the other council members he was not pompous or ostentatious. He came and went quickly and secretly without bodyguards or entourage. He would maintain elaborate disguises on his fact finding missions. He kept the power hungry Wizard-priests in check and also kept the other various factions from outright war with each other.

In his younger years Mellius was, like most of his kind, a spellslinger, a wizard for hire. Since, he has become a player and not a pawn. Now he is as central to Alkopolis as the rock upon which it is built. He knows all of its comings and goings and he passionately protects the city from internal and external threats like it was his own personal house. He had long ago made whatever fortunes he required and now serves diligently as the self appointed guardian of the

city.

As Wizards age sometimes their powers change. They gain new ones. The others grow in strength or diminish. In his mid thirties Mellius began having waking dreams. They were visions of the future, portents of danger. He was plagued by visions of Spiders and Demons. Unknown to most men or even wizards, a war rages for the far future. Precogs would move to act on their foreknowledge only to be stymied by others with even greater prescience. He could dimly sense the presence of these others affecting the future, negating each other's plans, making his visions opaque. He sensed other human minds at work, more powerful than his. He sensed great incomprehensible alien minds offworld in the night sky. He could sense the never ending rage of the Demons. But most of all, he could sense the spiders, with their deep minds and subtle ways. He knew they plotted revenge, and he knew they were equally aware of his presence.

His most recent visions were of a strange man and a shadowy woman on separate paths. He knew he would cause their paths to join and he knew that he had to find and protect them. He sensed vaguely that all men were in great peril. He had a vision he would find the man in the wastelands running from Demons. And a Dwarf would lead him there. Mellius could think of only one Dwarven scavenger captain. Mungus. Captain of the Skyrazor. Known for brawling and drinking. Noted for his many close-run scrapes with Pirates and Demons and for gambling away his hard earned money on skitter racing. They had never met so a disguise would be easy.

It was simple enough to book passage on the Skyrazor. When the Cloud Demon attacked he had a sudden vision that it was time for him to leave. The jolt to the ship provided him with a convenient method of exit.

TEELA

At the age of 8 Teela was discovered to be a telepath. While many wizards are greatly admired: Force mages, Elementalists, Healers, there are others that are equally feared. Mentalists such as she were one such type. Nobody wanted their minds pried into, their secrets revealed, their actions manipulated. Her parents at the age of 9 sold her for a good price to the magical conclave governed by the Archmage Sardon.

Amongst other wizards her young age and weak powers made her at first a slave and a plaything to many masters. She would cook and clean at their behest and be punished severely for any perceived infraction. She was incessantly teased and harassed by the older children. The adults were neither fair nor kind.

Her powers developed over time. The secretive Master of mentalism taught her how to paralyze small animals or send them to sleep. On her own she discovered she could get people to look the other way and not notice her. She could make the other students to drop things or forget things. She knew what they dreamed,

what they desired, what they feared. She knew who was foolish and who was smart. She knew who was powerful and who was dangerous. As it turned out, all of them were dangerous. No one trusted her. They knew she was poking around in their heads.

She found the thoughts of most of the others to be cruel and petty. She ignored the derision of the other girls and deftly avoided the boys and men with the lustful thoughts who stared at her newly developing body. "Disgusting animals" she thought. At night she kept the intruding thoughts and dreams of others at bay by planning her escape. She would go far from here, from this trap, this drudgery and intrigue, and use her powers to have amazing adventures and maybe find a family who would love her.

She did have two friends amongst the mages. Nema, a young water mage and Sebra, the old healer. Nema was innocent and Sebra was kind. Also in her camp was the stablehand Grum, a dogblood of no magic. He was a simple soul. He loved her unconditionally like a dog would.

One day Cadross had her pinned in the kitchen with a binding spell. He was slightly older and cruel. He was a forcemage adept. He liked crushing birds in midflight and hitting people with stones. She could sense his excitement and arousal. "What should I do with you my pretty bird?" he crooned. "Stop it please" she pleaded. Her drab dress began to rip apart. "Let me see what you're hiding under there." Mobo his partner in crime stood behind her and let out a fiendish laugh. Mobo was a fire mage. She could sense his many psychoses. She had subtly avoided these two a hundred times before, but something in her this time snapped. In a rage she possessed Mobo and caused him to burn Cadross with his fire. His face burned and he sunk to the floor unconscious from the pain. Then she turned and paralyzed Mobo. While he stood there dumbfounded she struck him hard in the head with a frying pan.

She ran to her room. She stuffed her few meager possessions into a bag and ran out the door. She turned the minds of the other Wizards aside. They did not see her leave. She wished she could bring Nema, but it would be too dangerous for her. She mentally called out to Grum, who soon would meet her down the road with a pair of horses and some warm blankets. As she ran she smiled. She was done being a slave. Her new life started now.

HAVEL

Prince Havel stood at the helm of the lumbering Leviathan known as the Imperious. It was a great gilded construct of gears, pipes, pistons, and metal beams. Lovingly assembled over a period of 7 years by the master craftsmen of Seawall. It was steam powered and drew it's heat from a rare giant red fire crystal. The Imperious was serviced by a crew of 40 intrepid souls. It towered 4 stories over the battlefield on 6 gangly legs. A turreted, large-calibre, long-barreled

cannon hung from its belly. On top was a flak cannon with full traverse flanked by a howitzer and a siege mortar. At the corners were mounted swiveling gatling guns. The side railings offered ample vantage points for spotters and snipers.

The Flak cannon blazed away keeping airships and smaller flyers at bay. Smaller ground vehicles fell prey to the armor piercing rounds of the undercarriage gun. Covering fire from the other weapons kept the enemy infantry pinned to their trenches. Three opposing monstrosities of similar design and size faced him in line across a shallow lake. Havel was a son of the great empire of Seawall. His foes were the Kurgan, an upstart nation to the northeast, bent on conquest.

The Kurgan were trying to cross the Mountains to the north of Guildhelm. The mountain pass led into the wastelands south of Wehal. Impenetrable Guildhelm was neutral in this war. Wehal had a fine navy and airforce, but it could not stop so great a land invasion. They had asked Seawall and Verin for aid. A dozen air leviathans fought for supremacy overhead. Havel could not count on timely air support to intervene in this encounter.

Havel was not the captain of the Imperius. He had commandeered it, as was his right, as one of the Grand Defenders of Seawall. It was a title awarded to individuals who have accomplished many a great feat of prowess on the battlefield. Havel was recognized as a tactical genius. In 10 years of service he had fought in dozens of wildly successful actions against all manner of foe. The Captain was an older man, Lord Tunis of House Rafferty. He was not pleased at being relieved of command, but he was a veteran soldier, and he followed orders.

The Kurgan engineers had little finesse. Their constructs were clunky and slow. Using the audio tube system Havel called out to the chief turret gunner "Aim for a leg on the closest walker." The Kurgans got in a shot that bounced off his forward armor. In return the offending target Kurgan walker had its forward leg blown off at the knee. A follow up shot took out a second leg. The main body sagged at a steep angle. It would take them the better part of an hour to recover their footing enough to be able to fire their main gun again. Havel sighed in relief.

"Advance hard to starboard!" he ordered the steersman beside him. The walker moved to the right while keeping its facing, much like a crab would. The second Kurgan walker matched his movement. It fired but missed its moving target. Havel put his hand on the shoulder of the Steersman "A little more and we'll have him." The enemy leviathan stepped into the lake. Suddenly there was a huge explosion. It had stepped on a carefully placed mine. Havel had mined the lake two days earlier. The crew cheered as the enemy walker, still moving at speed, toppled sideways into the mud colored water.

The third walker cautiously approached, making sure to avoid the lake. It fired ineffectively at long range. Havel had the wheel operator continue their sideways walk till they reached the end of the lake,

then he had the machine carefully walk backwards towards a gap in the ridge behind him. the Kurgan walker rounded the lake and came towards him in pursuit. Havel smiled. His family had built the railroads going to Guildhelm and Wehal. On the ridge was the end of a line extension which one day he hoped would go through the same mountain pass the Kurgans used to invade. At the end of that line was train carrying a giant railroad gun which was now being pointed through that gap in the ridge. the Kurgan had just walked into its firing arc. There was a tremendous cannon blast. The massive shell completely obliterated the enemy walker with a direct hit.

The captain of the Imperius patted Havel's back "You're a legend my boy" he grinned. Havel grinned back "We're not done yet. That first Walker is still functioning, and I want a prize!" He guided the steersman... "Go straight through the lake towards him." He spoke to the captain... "Assemble a boarding party. I mean to take their Firestone." He called down to the main gunner... "Hit their top with high explosive rounds." The Imperius was taking fire from the enemies smaller side cannons. Explosions rocked the hull.

"Hit them now!" yelled Havel to the gunner. A moment later the exposed topside of the enemy leviathan exploded. It wobbled and sagged. "Advance!" yelled Havel, his fingers digging into the steersman's shoulder. There was another large explosion. It's side erupted. A magazine had exploded. They closed in on the smoking wreck. "Finish it" ordered Havel. Their leviathan raised a leg high into the air and then brought it down quickly, its pointed tip, like a spear, going into its victims center. "Give it some weight" Havel held on while their own hulk heaved and tilted at the effort. The enemy hulk was being pushed down. Its remaining legs gave out and the entire thing collapsed to the ground. They stood triumphant over the smoking hulk.

Havel looked at the captain "Are they ready?" The captain twisted a handle "Yes. Go. You haven't much time" he urged as he held open a hatch in the floor. Havel immediately jumped in and slid down a pole to the undercarriage. There waiting for him were a dozen armed men. The bay doors were open and they could see the smoking wreck a mere 7 meters below them. The lines had already been dropped. "Now! Go now!" he yelled. Secured by metal rings, they descended quickly down the ropes. There was confusion at the bottom. The hulk was still shifting and spewing fire and smoke. They landed on the deck and looked for an opening. One large crater presented itself showing access to the interior.

Havel undid his line and was the first to jump in. The smell of acrid smoke and burning flesh choked him and stung his eyes. A wounded Pigman at a control panel dropped a grenade which rolled towards him. He snatched it up and tossed it into the nearest hallway where it exploded. "Follow me" he called when several more of his men had followed him down and found their footing. He fastened his goggles and wrapped a cloth around his mouth and nose. The going was treacherous. The hulk rocked back and forth. He

needed one hand to steady himself. In the other he held a pistol which he used to fire at anything that moved. The enemy crew members were hurt, surprised, and shaken. They offered little resistance.

They finally found the door to the main engine room but it was jammed shut. One of his men blew it with a demolition charge and they forced their way in. All the engineers were dead or unconscious. The crystal chamber and connecting pipes were cracked and emitting steam. Havel pried open the chamber hatch and peered inside. "Glory be" he breathed heavily. The crystal, three feet in diameter, was still intact. It was normal practice in a lost leviathan, to spike the main crystal, to prevent the enemy from capturing it. Giant crystals such as this were extremely rare. The fate of nations were often determined by how many big crystals they and their foes owned. Seawall currently had twenty of these priceless objects evenly distributed between leviathans of the land, air, sea, and submersible varieties. It was rumored that the Kurgan had recently dug up a dozen such crystals, thus explaining their rise to power.

Several of this boarding party were Coggers, modified for great strength and protected against minor burns. Together they carefully removed the crystal and strapped it securely to the back of the largest Cogger. Two others helped him support the weight as he trudged forward. They made their way back slowly to their point of entry. The Cogger with the crystal was the first to be strapped to the lift cables when he and a fellow of his were suddenly shot dead.

Havel swung around. It was the enemy captain and several of his surviving officers piling into the room. The enemy captain pointed his sword at them and yelled "Get the crystal!" Havel gunned down two of them point blank before his pistol finally gave out. Making his way to the crystal carrier, he pulled the signal cord and the dead Cogger along with his prize started to be reeled back in. Havel grabbed onto a leg strap of the Cogger and joined him in his rapid ascent. He saluted the enemy captain as he made good his escape.

WELL MET

As he fell Mellius reached out for the falling rat, but he was to far away. The Zeppelin spiraled away. All he could do was save himself. The ground was coming up fast. He stuck his palm facing straight down towards it. He chanted the words of focus and effect. Invisible shields piled up below him, slowing him down and breaking his fall. He saw the rat hit ground. Looking farther off he saw something on the ground moving very fast towards him. Some sort of vehicle. If he controlled his fall just right he could intercept it.

If things couldn't get any stranger, Jezik saw a man fall from the sky about 100 meters ahead of his skimmer. There was a shockwave that made the skimmer buck. As he approached the ground the figure slowed suddenly and landed on his feet. A great cloud of dust

spread out before him. He grasped a staff and multi-colored robes unfurled about him. A moment later the man jumped high in the air directly toward him.

Jezik swerved but the man landed squarely on the hood of the skimmer. He maintained a crouch, his feet glued to the hood. His robes whipped around partially obscuring Jezik's view. Jezik yelled "Hey do you mind? I'm driving here!" The huge bloodthirsty Demon gaining on him let out a fearsome roar. Jezik's passenger looked up to assess the threat. He aimed his staff at it and made an incoherent shout. His eyes glowed white. Jezik looked in his rearview mirror. The Demon stumbled and fell as if tripped. It got up again and continued the chase. The bearded man shouted again and the Demon reacted as if it was hit in the face with an invisible right hook. It stopped in its tracks and looked around greatly confused. The skimmer quickly left it far behind.

Jezik slowed down and removed his visor. "Jump in" he said "You've earned yourself a ride." Mellius deftly lowered himself into the passenger seat. Jezik asked "How do we get out of here?". Mellius spoke "Continue due East. That will be the safest route." Mellius looked about him "What manner of craft is this? Are you an Alchemist?" The two stared at each other for a while. Both had seen far stranger beings, but both knew nothing about each other. Jezik decided to play along. He lied. "Yes I'm an Alchemist. You like my ride huh? It is pretty sweet. Now tell me how is it you fell out of the sky directly in my path?" Mellius squinted. He examined the controls, the strangers clothing and gear. "No, not an alchemist. You're an offworlder. You've found us at last" Mellius said excitedly "Where are the rest of your crew? Where is your ship?"

Jezik stared back "You've been waiting a long time huh?" Mellius answered "Over 300 years. I didn't think It would be me to make re-contact first." Jezik squirmed uncomfortably. He looked straight ahead "The ship is gone. The rest of the crew is gone. Me and this skimmer is all that's left" he sighed convincingly. There was a moment of silence. Then Jezik spoke

again. "Sorry. no one else is coming. I'm it." Mellius looked disappointed then he spoke "No matter. I was meant to find you. Whatever you were before, on this world you have a great destiny ahead of you."

It was Jezik's turn to squint "A destiny huh?" He thought about it. Back where he came from he was happy as a mercenary pilot and a part time smuggler. Work was plentiful. But now that the astroguard was after him, his days were numbered. Maybe he was better off here, wherever this was, without them hunting him. A fresh start in a new place. He would give it a chance. Not that he had much of a choice. "Ok, I'll play along. What's your name?" Jezik asked.

Mellius puffed up his chest "I am Mellius. Grand wizard of Alkopolis. We shall travel now to my my Villa where I think you'll find the accommodations very agreeable" Mellius boasted. Jezik smirked. This sounded better already. "A Wizard huh? Are you a Techno-Wizard?" Force field technology would explain his earlier stunts. Mellius shook his head "No. We have lost that kind of technology. My powers come from my mind and are amplified by these crystals" He indicated the numerous jewels he was festooned with. Jezik was genuinely surprised. Mind powers. Psionics. Mind over matter. No humans on a thousand worlds were capable of that "What else can you do?" he asked keenly curious. Mellius blatantly ignored the question. "Yes, yes. And what is your name?"

Jezik paused to consider his response. "My name is Jezik Dactone. I am a pilot and a businessman" he pretended to be distracted by a flurry of Demon activity in the distance. "We were looking for resource extraction opportunities deep in Demon space when a gravitic anomaly damaged the ship and caused us to crash land here" He looked at Mellius "I see you are already familiar with the Demons." Mellius nodded "Yes. Very. That is also what we call them. The desert we pass through now acts as a barrier. They prefer wetter climes. They keep to the east and the south." The sky was starting to turn red. "What world is this?" Jezik asked. Mellius replied "Welcome to Chromium."

Reviews

introduction to Warpspawn Games

Article by Tom Higgins (tom@wsmf.org), Main editor of Countermoves.

There are many ways to game as there are gamers to play them. There are focused gamers who pick a theme and stick with it most of their lives. There are die hard role players, hard dice roll players and anti dice hard tech players. There are board game aficionados and card game fanatics. There are folks who like to move around the hexes and those who wont map the territory of their playing.

Then there are those who like to mix it all up.

Precious few resources exist for this type of gamer, one such resource though is Warp Spawn Games (<http://www.angelfire.com/games2/warpspawn/index.html>)

Warp Spawn is home to a motley crew of game developers and players who revel in creating games as much as they do in playing them. The lead mad scientist in this laboratory of gamming is Lloyd Krassner who has been running this site since 1997.

The site itself is spartan but what it lacks in graphics it makes up for in game rules. Lloyd and the Warp Spawn regulars have been churning out game rules at a break neck speed for the last few years, the count for 2001 is now over 200 and climbing.

Game types range from your pure card game to your roll and move board games to hex game to role-playing to combinations of all of the above. There are lots of different types of game mechanics to choose from as well. The rule sets are broken into thematic sections; there are sections for SF, Fantasy, Historical and the infamous Other as well as a place of Universal Game Systems. More on this last one in another article. Each of these sections is further broken down by time period of subtype.

Many of the rule sets you will find are mostly straight text files. Very few have any sort of graphics, maps or unit counters. These are left for others to work on. In some cases there are graphics available either as image files or as Thoth game sets. The big advantage to a Thoth game set in this case is that the individual graphical items are not hidden in the gamebox, they are available to be manipulated and customized in directories.

The good news is that over time and with more people using Warp Spawn games the more ready-made graphics there are to play with. If you cant find these ready made gems for the rules set you are wanting to play then its up to you to create them and hopefully offer them up to the site so that others can use them as well. A lot of what goes on at Warp Spawn is centered on this act of causal collaboration and sharing.

Sharing the games or variants you have created with the rest of the Warp Spawn crew gets the game played more and thus it becomes a better game for the playing. Play testing games is a powerful tool in the developmental cycle of a game.

The act of making a game has become a game for the Warp Spawn game makers. Trying out combinations of types, tweaking rules sets, merging different mechanics and methods all are evident in the rules sets found here. You can get a glimpse of what goes on in one game developers mind on Llyod's Brainstroming page. There is also an open channel of discussion between the users and developers. This comes in the form of a message board. It's a simple text only web message board but it works to get the conversation and critiques flowing.

A Review and Essays page gives players and developers alike a place to work out the workings of the games; the good, the bad and the ugly. Often what doesn't work can be has helpful to making a better game as what does work. Hearing from the developer and the players is a great way to get a look into some of the games.

The biggest strengths Warp Spawn has going for it is not its flashy graphics (there are none) or its professional publication ready games (these games are as raw as they come, rivaling even CheapAss Games) or even its detailed rule sets (some of these games are as abstracted from their source material as a Pollack canvas). What Warp Spawn has is a down in the muck attitude where the game comes before the detail and the developing is as much fun as the playing. It's a schloberknocker no holds barred game development site that offers as wide a range of game styles as I have seen represented in any one place. It has a core group of members who are quick to help and very into the idea that everyone is a game developer just looking for a chance to come out and play.

Things that Make a Wargame Great

by Markus Salo

I've been working on my wargame theses: I have been trying to think what things make a wargame great. I came up with this list.

1. simplicity of the rules - easy to learn
2. complexity - difficult to master
3. repeatability - you can play the game over and over again and it is always someway different
4. imagination - the game makes you use your brain and imagination to create imaginary worlds.

5. multi-player - it's always better to play against another human than a computer. A computer AI can never replace a human brain as better opponent. And the more there are players, the better the game gets.
6. campaign mode - several scenarios form a campaign and the outcome of scenarios affect the campaign
7. building resources - winning scenarios allows you to build your force bigger/better
8. no blow-out victories or defeats - the loser of the scenario still has a chance in the next one
9. characters/units - the units, leaders, ships or plane types are created so that they become dear to the player and the loss of these units causes great grief
10. fog of war - the player cannot see all enemy units on map
11. player modification of the rules and player created variants - the games are created for players and the players can make the games better
12. the game in campaign mode is loooooong. - the longer it is, the better it feels
13. PBEM - that's obvious nowadays

Some things that are not essential

1. real-time action - wargame that is won by a player who clicks his mouse fastest? Not for me.
2. great pictures - well, pictures are nice to look at, but most of the games are concentrated on graphics alone
3. sound - as above

One famous hockey coach in Finland that has a principle called K.I.S.S., that means "Keep It Simple, Stupid". This applies to game creation, too.

Simplicity of the rules is essential in gaming. Good rules are easy to learn but the game itself can still be complicated and difficult to master. Such games are f.ex. checkers, chess, go, Zulu spears. Bad examples are almost all Avalon Hill games, the most terrible examples are Advanced Third Reich and Advanced Squad Leader. I found it easier to study neurology than ASL rules.

If we want wargames to be wargames, not Avalon Hill games, we got to keep the rules simple and options clear. In a good game one has to be able to see the next possible moves in a split second and then use some minutes to hours to think which one to use. The opponent can also figure out the possible moves the player has, but doesn't know which one the player chooses. Even if there was fog of war, the opponent can count the used cards in his mind and know which cards are left in play.

There are a lot of things and modifiers that can be included in a game but those do not necessarily make the game better. If one is creating a game instead of simulation, one has to offer some realism and complexity to get playability. Realistic, simulation-like (AH-type) games with no players are no match to less realistic but more playable wargames, I hope.

Midway Review

by Jon Parshall (jparshall@wamnet.com)

Hi there,

Haven't had a chance to play your Midway game yet, although it looks very interesting. I am currently writing a book on the Battle of Midway, focusing on the Japanese side of the battle. As you might imagine, I know a fair amount about the Japanese carrier operations during that day, so I will be very interested to explore your flow charts. You should be aware, though, that it is likely that the Japanese carrier flowchart would need to be different from the U.S., as they operated their carriers differently than ours, and had different physical constraints (enclosed hangar decks, for one thing) imposed upon them. For more on these issues, see my recent article in the Naval War College Review:

Also, I was looking at your Order of Battle, and there are some problems on the Japanese side. At present, you

ZerosKatesValsJudys

	Soryu	2	2	2	1
list the following:	Hiryu	2	2	1	1
	Kaga	2	2	2	1
	Akagi	2	2	2	1

In actual fact, the situation was a good deal more complex than that. Kaga was carrying 27 Kates, so she should get a "3" in that column. *NO* Judys were carried by *any* other carrier other than Soryu, and she carried only one, and was used for only search purposes. And then we get to the matter of Zeros. Each of the Japanese carriers, in addition to the 18 Zeros normally carried (in Akagi's case, 19) also were ferrying aircraft of the 6th Kokutai to Midway as well. These were all carrier capable aircraft, and were flown by carrier-qualified pilots. A shotai of three of them actually was used in the battle, being launched from Akagi. Their numbers were as follows:

- Akagi: 6
- Kaga: 9
- Soryu: 3

- Hiryu: 3

In effect, that might give Kaga the nudge to a "3" in the Zero department as well, since she carried a grand total of 27 Zekes. If you abstract the situation a little further, and bump Akagi's to a "3" as well, that accounts for the extra planes carried by her, Soryu, and Hiryu. All totaled, the Japanese carried 94 Zeros in the battle, so they oughta get at least 9 counters, and maybe even 10.

Also, you probably ought to model the Japanese cruiser and battleship floatplanes as search assets as well, since you have American Catalinas in the mix. The total loadout was as follows:

- Haruna: 3 E8N (Dave)
- Kirishima: 3 E8N (Dave)
- Tone: 2 E13N (Jake), 2 E8N (Dave) (Tone had lost a Jake sometime in May, it appears)
- Chikuma: 3 E13N (Jake), 2 E8N (Dave)
- Nagara: 1 nighttime observation plane (Laura)

All totaled, that's 15 floatplanes. I would be tempted to give the Japanese at least one counter of these aircraft. The Daves didn't have the range to do good searching, but the Jakes certainly did.

Hope that is useful. I will look over your flowcharts in more detail later and see if I have suggestions. Nice work. Cheers,

Parts is Parts

By Tom Higgins

In the course of working up the first issue of the zine (countermoves) I have been flooded with urls to game sites, aid, rules and graphics. I have discovered the world of gamming is both bigger and MUCH smaller than I thought.

In gaming there are also two extreme levels of representing the game environment.

There is the super realistic miniatures camp where every thing, the units, the trees, the grass, the houses, etc, are hand crafted miniatures and the game is played by moving them about either freestyle (using rulers and strings) or on some sort of hex grid system built into the terrain.

Then there is the counter and map camp where a flat map depicts all the environs and flat cardboard counters represent the movable units.

In between there are some interesting and , I think, fertile grounds for us to explore.

One of the things I have been stumbling across again and again are Cardboard or Cardstock minatures/battle fields.

A good example of this can be found at <http://www.microtactix.com/>

These folks sell PDF's that can be printed out and folded to make 3d style environs and units. If you got a color printer you can also add color to em.

This is sort of a cheaper way to use miniatures in your game. Instead of investing time and money

Earlier this year, as a birthday present, I got the Campaign Cartographer 2 bundle from a bud who was getting out of the RPG world. One of the modules of it is called the Dioramas expansion. It aids in creating these types of things.

What I'm wondering here is are there any Warpsapwn games that would be a good test to try this out on? If so we can bundle the rules with the cardboard cut outs and have a really nice package.

In the same sense I am looking at a way to come up with a good standard Warpsapwn Card template, something that would have a Warpsapwn logo for the back and a standard layout for the cards grfx and text. I have though of just ripping MTG's layout, but if there's better ideas I would rather do them.

With a standard card layout it will be much easier to bang out card sets for old games and new ones as they come out.

I have also been digging working on and seeing PDFs being made for the games. It makes it easier to pass on to other as a complete ready to play package.

Murphy's Laws of Combat Operations

If it's stupid but it works, it isn't stupid.

Try to look unimportant; the enemy may be low on ammo and not want to waste a bullet on you.

If you are forward of your position, your artillery will fall short.

Never share a foxhole with anyone braver than yourself.

Never forget that your weapon was made by the lowest bidder.

If your attack is going really well, it's an ambush.

The enemy diversion you're ignoring is their main attack.

The enemy invariably attacks on two occasions: - when they're ready. - when you're not.

There is no such thing as a perfect plan. Five second fuzes always burn three seconds.

A retreating enemy is probably just falling back and regrouping.
The important things are always simple; the simple are always hard.
The easy way is always mined.
Teamwork is essential; it gives the enemy other people to shoot at.
If you are short of everything but the enemy, you are in the combat zone.
No combat ready unit has ever passed inspection.
No inspection ready unit has ever passed combat.
If the enemy is within range, so are you.
The only thing more accurate than incoming enemy fire is incoming friendly fire.
Things which must be shipped together as a set, aren't.
Things that must work together, can't be carried to the field that way.
Radios will fail as soon as you need fire support.
Radar tends to fail at night and in bad weather (and especially during both.)
Anything you do can get you killed, including nothing.
Make it too tough for the enemy to get in, and you won't be able to get out.
Tracers work both ways.
When both sides are convinced they're about to lose, they're both right.
Military Intelligence is a contradiction.
Weather ain't neutral.
The Cavalry never comes to the rescue.
Killing for peace is like screwing for virginity.
The one item you need is always in short supply.
Interchangeable parts aren't.
It's not the one with your name on it; it's the one addressed "to whom it may concern" you've got to think about.
The side with the simplest uniforms wins.
Combat will occur on the ground between two adjoining maps.
If the Platoon Sergeant can see you, so can the enemy.
Never stand when you can sit, never sit when you can lie down, never stay awake when you can sleep.
The most dangerous thing in the world is a Second Lieutenant with a map and a compass.
Exceptions prove the rule, and destroy the battle plan.
The worse the weather, the more you are required to be out in it.
The more a weapon costs, the farther you will have to send it away to be repaired.
Field experience is something you don't get until just after you need it.
No matter which way you have to march, it's always uphill.
Airstrikes always overshoot the target, artillery always falls short.
When reviewing the radio frequencies that you just wrote down, the most important ones are always illegible.
Those who hesitate under fire usually do not end up KIA or WIA.
The newest and least experienced soldier will usually win the Medal of Honor.
Body count Math > 1 guerrilla plus 1 probable plus 2 pigs equals 37 enemies killed in action.
The bursting radius of a hand grenade is always one foot greater than your jumping range.
All-weather close air support doesn't work in bad weather.
The combat worth of a unit is inversely proportional to the smartness of its outfit and appearance.
The crucial round is a dud.
Every command which can be misunderstood, will be.
There is no such place as a convenient foxhole.
Don't ever be the first, don't ever be the last and don't ever volunteer to do anything.
If your positions are firmly set and you are prepared to take the enemy assault on, he will bypass you.
If your ambush is properly set, the enemy won't walk into it.
If your flank march is going well, the enemy expects you to outflank him.
Density of fire increases proportionally to the curiousness of the target.
Odd objects attract fire - never lurk behind one.
The more stupid the leader is, the more important missions he is ordered to carry out.
The self-importance of a superior is inversely proportional to his position in the hierarchy (as is his deviousness and mischievousness).
There is always a way, and it usually doesn't work.
Whenever you drop your equipment in a fire-fight, your ammo and grenades always fall the farthest away, and your canteen always lands at your feet.
As soon as you are served hot chow in the field, it rains.
Never tell the Platoon Sergeant you have nothing to do.
The seriousness of a wound (in a fire-fight) is inversely proportional to the distance to any form of cover.
Walking point = sniper bait.

If only one solution can be found for a field problem, then it is usually a stupid solution.

Warpspawn Cast

Lloyd Krassner Author of hundreds of games. Self Published in the Warpspawn Games Website. Personal Factoids: 2 Sons and an understanding wife. Pharmacist (God help us all). Taught College Biology for 5 years. Used to work in a Pawn shop. Pack Rat: Games, Toys, and Books.

Gottardo Zancani (Zak)

Janne Thorne

Jason Newell Official Warpspawn Cartoonist. Has made card-sets for numerous games. Author of Troll Treasures & Hunt the Wumpus

Peter Cobcroft (Curufea)

Markus Salo Author of: Norse Odyssey, F-14, Ypres, Winter War, Protecting the

Skies, Regular contributor to the *Personal Factoids*: He owns the Boat, Has a summer home, Enjoys sauna, beer, "makkara" (=Finnish sausage), barbeque and ice-swimming.
